

First Strong 2471

Chapter 2471 - piece

He had expected the patriarch to solve this problem, but did not expect the patriarch to use this way.

Then came the reaction, did the patriarch not have problems with cultivation? Isn't it necessary to be the Pearl of Hanze?

This is the situation, more serious than everyone imagined!

This shows that the patriarch's current strength is also greatly reduced, the patriarch is unable to protect everyone; and the sacred pearl is very important to the patriarch, you must get this thing to recover.

And now I have not seen the great elders, it is very likely that the elders have been killed!

The patriarch can bear the burden of humiliation. Normally, he should also bear the burden of humiliation.

However, he certainly could not reach this realm. When he thought of the elders exchanged with two sun beads, he also broke his arms and sacrificed dozens of people to cover him along the way.

He gave him such an important task, but he did not protect it.

Now the elders may have died, and the patriarchs have been forced to kneel down...

Any face is alive?

But suicide to sin, it is better to fight for you to die!

Therefore, at that moment, he was unable to control his emotions. When he roared, he immediately launched an attack on Gao Hanqiu.

He wants to knock down the cold autumn and take back the cold pearl from the cold autumn.

Although it is easy for others to take away his things before, you know that everyone's strength is very different, which is almost impossible task.

But this time, he is ready to use his life, maybe he can have a success. Even if it is not successful, it is also to express his attitude!

Barbarians can not be humiliated!

“No!”

The patriarch Meng Meng hastened to stop.

But it is too late, he just rushed over, not to the side of the cold autumn, directly arrested, and then fell in front of the cold autumn.

In the realm of the cold autumn, let alone an ordinary barbarian, even if it is an elder level, it can be easily crushed.

Therefore, there is no room for play at all, and there is no such thing as letting the high-cold autumn out of the sword—that is, it has driven dozens of them before, and it does not need him to send a sword!

Directly understatement was tied and fell to the ground.

Gao Hanqiu did not read much at all, as if a mosquito was flying over, and it was as simple as reaching out.

He is still waiting for the decision of Shen Lang.

Shen Lang's gaze is also attracted to the past, but his knowledge is firmly locked in Meng Jin.

In the eyes of Meng Jin, he saw a flash of disappointment!

Combine the situation just now, so that he has already guessed a rough.

Why did Meng and Meng leave that person? I have already said it, and I don't need to keep him to testify. That stays, there is only another purpose.

After a few words of discussion and no results, he decisively kneel down on his knees.

In the identity of Meng Jin, both the impressions in Meng Yi's memory and the words and deeds that come into contact with him are a very arrogant person and a genius patriarch.

Such a person is ignoring the fire, and will not ask for help if it is not forced. Not to mention showing your weak state, let alone the squatting of the people facing the outsiders, it is a shameful shame!

So, this may be his intention to do it!

Even if it is a temporary intention, it may kill the tribe afterwards and prevent everyone from knowing his side.

His embarrassment immediately aroused the great outrage of the tribe, and then it was desperate.

Even if his current strength is greatly reduced, it is still too late to stop the tribe from desperately. It is also possible to pass the implication of the mind.

But what he chose was the "no" that was called out. It seemed to be instinctively blurted out, but in his capacity, it should not be, and it may be intentional!

Then all the lines are clear:

As a patriarch, the initiative to beg for mercy, on the one hand, is really impossible, by pleading for practical benefits.

On the other hand, it is to stimulate the blood and guilt of the people!

The purpose is to force that person to fight.

Shen Lang, three of them, no matter which one is attacked, is stronger than the barbarian. In the face of desperate circumstances, it will definitely be heavier to fight back.

The final result, it is very likely that it will be a shot, the barbarian was killed.

As the patriarch of the barbarian, Meng Jin has already laid down the shame and face of the squat, coupled with the sad card of the dead person, together, it should make Shen Lang smashed.

At that time, he will retreat to retreat, and blame the tribes for their own damn, and they will be more embarrassed by the swaying of the waves. The final result will be to return the sacred pearl to him.

In this case, he himself will come back with no effort, and this group of people who have witnessed his swearing will be destroyed by the enemy.

After the enemy leaves, he can push the death of this tribe and Meng Yu to the enemy's head. You can earn a wave of support for indignation and blood!

His performance is already ok, and the loophole is in that look.

Although he soon showed great gratitude, he was glad that the tribe was not killed, but the disappointment that was flashed was captured by Shen Lang.

He will feel disappointed, that is, disappointment, the piece is not doing well.

If a person is not dead, he will not have a sad card, but he will be more passive. He will eventually solve this person himself.

“What do you think we should do with him?”

Shen Lang asked.

“I hope that the two will exalt your hands and let go of this tribe. I am young and ignorant. I will teach him well.”

What else can I do? Even if Meng Meng is very upset, he can't show it. It can only be a pleading again.

“Let him have no problem, this face can be sold to you. But the Pearl of Hanze, it is not very good? How much do you want to exchange that thing?”

Shen Lang waved his hand and gestured to Gao Hanqiu to put the tribe.

After the tribe gained freedom, the whole person was a little embarrassed.

Just after that, I was detained by the air. Let him be completely awake, and realize that everyone's gap is what is impossible. If you do it again, it will only make the patriarch more difficult.

So at this point he wants to run away, leaving here, will not drag the patriarch.

But Meng Jin saw his mind.

If he goes first, he still needs to deal with the king of the country here. Wouldn't he let him disclose the information here to all the people?

How will the team take it in the future?

“Your Majesty!”

Meng Jin immediately screamed at him, and when the tribe was ready to kneel, he directly stunned it.

“The Lord of Sand, I am not afraid to tell you! This master offended you. If you want to vent your anger, I will dispose of him like Meng Hao, you want to do it yourself!”

This is to put down the camouflage dough and directly put people on it.

Chapter 2472 - Still have to exchange?

Although Gao Hanqiu does not understand his relationship with Shen Lang, he is actually an old fox who has lived for hundreds of years more than Shen Lang. He is very familiar with the world.

Basically, I guessed it. For this patriarch, it is very contemptuous.

Because he is the ancestor of Qiu Lin Jianzong, he has a similar identity with this patriarch, his own strength is strong, his generation is high, and for the younger disciples, it should be taken care of, or even short-sighted.

For the sake of their own interests, it is too unreasonable to offer the tribes to others to vent their anger and kill them.

Of course, he has always been a big brother, even if it is a reincarnation.

So at this moment, Shen Lang is here, he will not talk about anything, waiting for Shen Lang to deal with.

“We are not that kind of person. We are all kind. He is also a younger generation and will not care about him.”

Shen Lang would not have noticed a flaw, of course, sing a high-profile by the way.

“But this thing is already in our hands. This is the Pearl of Hanze. Do you know how it came? You want, that thing to change!”

Listening to the words of Shen Lang, Meng Jin hesitated.

He has just come out of the closed-door forbidden land. It is unclear what the harvest of Meng Xi and his party is, and it is even more unclear about the specific process.

It is too late to read the memory of the people at this time. It is not good to do their faces in the dark.

Normally, this fragrant pearl is the treasure of Hanze, and certainly will not be traded to the barbarian. Otherwise, Meng Hao does not need to bring so many people together.

And the owner of this sand country came back with them, and they should understand the process.

Listen to this meaning, it should be grabbed from the cold side of Hanze!

The head of the sand country has just traded with him, and there are also the beads of chill in his hand, indicating that they should join forces with Meng Hao!

Since this thing was originally robbed, there is no way to declare sovereignty. Others have stolen it, and there is no way. The subtext is that there is a skill to **** it back!

Meng Jin has no way to get back now, and he has no ability to do this.

Look at the way they are strong and strong, and then think of all the people. If the barbarian is killed seven or seven, then it is no matter what his patriarch has. It doesn't make much sense at that time.

After hesitating, he let go.

"I use the sun beads to exchange with you!"

During the speech, a sun bead appeared in his hand.

"Yes! Before you said that all the sun beads were given to me, the result is still in your hand." Shen Lang sneered.

Meng Jin did not speak. He must have a hand for a stranger he just met.

“One is not enough, I want you more, two sun beads for one!”

Shen Lang gestured to the cold autumn to prevent the beads of Hanze from being in the air.

Gao Hanqiu is a bit repulsive to this cold thing, this thing is to look at the other side so precious, or else he will not grab it.

“Good! Two of them, but I hope that the two can’t be too much. After the transaction is completed, they will leave Shibuya immediately. I don’t welcome you here!”

Meng Jin is serious. He feels that he is very passive and is eaten to death. If he can’t be determined, he will not be able to get any initiative.

When he said this, he stood up, no longer half a squat, and then there was another sun bead.

The high cold autumn is a different attitude towards the sun beads, and it has an excellent promotion effect on his cultivation.

“exchange.”

Shen Lang gestured.

Gao Hanqiu is very casual, Meng Meng is very unwilling.

This is what they are!

It was brought back by Meng Hao and other ethnic groups.

Now I have to exchange two more sun beads...

But after all, this is really in front of the real thing, if you get it, there is no worry. You don’t need to think about how to deal with Hanze, how to take it from Hanze.

This time, Meng Xi and them were together with the head of the sand country. The next time they are alone, it will be difficult to win, and others will be prepared.

A chilly pearl is obviously able to solve his urgent needs, but he does not know that one is enough.

If there is more than one, he will be more assured. Even if it is not used, it can be used as a reserve for Shibuya.

So give two more sun beads, it is very painful, but still willing to exchange.

When the two sun beads came to the cold autumn, Shen Lang signaled him to close it up.

Gao Hanqiu was not polite with Shen Lang.

He is also fortunate. Fortunately, he has just not been poor. If he feels that he has no value to himself, he will throw it back to the other party. Then there are two such good things missing.

This proves once again that it is certainly not wrong to follow the wave of brothers.

Meng Jin also quickly collected the beads of Hanze, and then stared at Shen Lang.

His meaning is obvious, once again with his eyes, silently urged Shen Lang to leave.

At this time, a wave of chills appeared in the hands of Shen Lang.

“I have it here, do you want to change it?”

“...”

Meng Jin almost vomited blood!

One after another, there is still!

Is the Pearl of Hanze not the treasure of Hanze?

Isn't it hard to get it?

How did it become so flooded?

Looking at the beads of the cold in the hands of Shen Lang, he is not the eye of the eye, but the sun bead that has just lost his heart.

If there is more than one thing, it will make people feel inflation. The value is huge, and it is rare.

Looking at so much now, I feel that it is not worth the price, just two sun beads lost!

But before I think about it, I still have six sun beads and a large number of baby.

This is even more painful...

"Do you really want to change it? I have this one here, but you have to take it from Hanze, but there is no chance." Shen Lang threw the hand of the cold.

Meng Jin, who had felt painful and unwilling, heard this and hesitated.

He thinks it is still a bit reasonable Although he has not yet understood the specific situation, since it is the cooperation between them, the barbarian has a cold pearl here, and the other party has a normal.

The other party's strength is stronger than Meng Hao, Meng Hao is seriously injured, they have two, there is a beast, then according to the distribution, there will be one more, it is normal.

After all, the one that was just traded was not brought out by the Lord of the Sand State. It was on the barbarian side.

Thinking of this, Meng Jin is another heart. Will there be a cold pearl in Meng Hao?

Meng Hao just wants to pit him, and he doesn't want to be a barbarian. On the contrary, without his patriarch, including the vast resources he controls, Meng Hao needs more to supplement!

Such a precious thing will be collected by an ordinary tribe, or to divert attention, but it should also be diverted, so that at least one can be guaranteed.

In that case, will it just ruin Mengzi's pearl when it's just killed?

If that's the case, it will be a big loss!

Chapter 2473 - I have 1 request

Looking back, Meng Meng's arms were gone, and he was seriously injured and was being taken by the god.

If he has the enchanting pearl on his body, it should be taken away too!

If there is a chill on the body, the flame will not burn so easily.

If that is the case, will the enchanting pearl in the main hand of Shaguo now be the sacred beast from Meng Hao?

Then the halal of the Pearl of the Hanze is half of one person. There are two people on the side of the king of the country, and they have taken it away. They just took it again.

Wouldn't it mean that the two that were sold back to him were the two that Meng Hao got?

There are at least two of them on the other side!

Thinking of this, Meng Jin is even more upset.

But he is not happy again, and he can't show it.

Now the people of the barbarian have been dispersed, or else they will be able to greatly enhance his strength.

Now other people are strong and strong, and three are staring at him, waiting for him to worry, so others have an excuse to move him.

He doesn't believe that they will be so kind, just don't kill the people, just disdain. Just as he doesn't care about the life of this person, others don't care.

But he is not the same, his life, his identity, the vital influence.

So at this time he can only hold his grandson.

The question now is, do you want to exchange this one?

To be exchanged, of course, it is very unwilling, and has already paid too much. Even if he has reservations, he will be almost the same.

But if you don't exchange it, you are still not willing.

If Hanze is really caught in the four beads of cold, it will be highly alert in the future and it will not be possible to win it again.

After the Lord of the Sand State has left, he may not be coming back later, or if he wants to get it later, he will definitely have to pay a higher price!

"Don't you? Then we have to go."

Shen Lang completely saw through his mind, which is also intentional.

If he takes out more of the Pearl of Hanze in one go, the other party will definitely despair and will not pay any attention. But with so many more, it makes people feel itchy.

Since I want to have it, I can't bear to pay more, but the opportunity is like this. Once I miss this time, I have no chance to get it.

What is needed is to suffer from Meng Jin.

Meng Jin heard the words of Shen Lang and bite his teeth: "I have no more, I can only give you a sun bead!"

Learn to bargain!

Shen Lang will not give him the opportunity to bargain.

"Two, I have no more, if you don't want it, I will bring it back."

Shen Lang directly took the one of the Hanze beads, and then greeted him, and went directly to the dog god, and Gao Hanqiu came up together.

Meng Jin that tangled!

He is hoping that the other party will leave quickly and leave to be safe.

But is this the zen of the cold still?

When they leave, they have no chance.

Listen to that meaning, the last one is left...

Meng and Jin are suffering again, and they are still rational. The time he has to hesitate is very short. They must make a decision immediately, otherwise they will miss it.

"change!"

He agreed again with his teeth.

Although the loss is very large, he has already given eight pieces of light sun beads. It is estimated that Meng Hao's possibility has also been robbed...

But the following has already drowned the forbidden land. After waiting for a few years, I can get the sun beads again, which can make up for the loss.

Even if it is very precious, it is still a thing that can be controlled by itself, but the Pearl of Hanze is not.

“Complete.”

Shen Lang also traded this one of the stars of Hanze to Mengjin. The two sun beads that were obtained, he gave the same cold autumn, and it was useful to see the cold autumn.

Gao Hanqiu was not polite with Shen Lang, just as he could take care of Shen Lang before, and did not want Shen Lang to be polite with him, so as not to give birth.

“you.....”

After the transaction was over, Shen Lang was just opening his mouth, and Meng Jin immediately called.

“You don't want to talk! I beg you, please leave!”

He really didn't want to hear Shen Lang say anything.

If you come up with the Pearl of Hanze, he will not change the problem, but will feel collapsed!

In this light, he has already traded ten sun beads!

Although I got three beads of cold, this is a loss of savings that has been surplus for at least a few thousand years.

If only these three are really precious, he can still comfort himself.

If the other party can continue to take out the beads of cold, it means that the value of this thing is not so great, and he can not be robbed back, and it is impossible to buy it at a low price.

Therefore, the best is “I don’t listen, I don’t listen, I don’t listen”, don’t say anything, just leave, don’t hurt me anymore...

Looking at his unbearable look in life, Shen Lang is a bit speechless.

It is estimated that it is impossible to squeeze out his more valuable baby, and it is boring to continue to consume it.

Before they came to this world, it was because of the legend of the demon domain that they thought about this demon domain and see if there is any gain.

Just after the dispersal, Shen Lang “forgot the original heart”, first to find the dog god, and then to find the cold autumn.

But there are some things that are always like this. I didn’t want to harvest anything, but I also got some precious treasures.

Up to now, everyone has merged and has already gotten a lot of things. It is a direct return to the government, there is no regret.

Of course, the three together, together with the situation of the three settlements of Shaguo, Hanze and Shibuya, they are all here in the ancient cold world!

The barbarian was comatose on the ground, and the remaining barbarian patriarch Meng Meng was looking at them at the moment.

Shen Lang nodded. “I have a request. If the patriarch is willing to cooperate, we will leave immediately and will not stay in Shibuya for a while.”

“If you don’t want to?”

Meng Jin wrinkled his brow Instinct to repel the question.

“Although I am not familiar with Meng Hao, he is also pitting me, but I have to ask him a fair. Not because I am just, but I am gone, you will definitely plant his death to my head.” So, so I will first look at this paragraph to the barbarians.”

Shen Lang pointed to the front, and immediately presented the paragraph that Meng Jin spit out the fireball to engulf Meng Meng.

“I won’t explain too much, and I won’t add more vinegar, but this fact must be stated, and I can’t whiten it.”

He said it was helpless, but Meng Jin was eager to eat him!

This is blackmail again! The black fruit of the red fruit!

He must be planted, and there will be very reasonable explanations. Meng Hao wants to kill him. It is also a fact that has already been done. He is not embarrassed.

But if the picture of this scene is seen by the barbarians, what he says, no one else will believe it.

“What do you want?” he asked with a grin.

Chapter 2474 - Want your memory

Meng Jin feels that he is right. The owner of this sand country is really prepared!

Even if there is no such thing as Meng Hao, the three of them will find an excuse to move the barbarian.

But he has no way!

Originally, he was the strongest one. It was more than the patriarch of the previous generation. It is not the best state now, but it is still reluctantly suppressed. Otherwise, even normal is not.

If he wants to do it, he will only attack Meng Meng as before, otherwise Meng Hao may not beat it.

Calling all the barbarians together, it is indeed a **** battle, enough quantity, to a certain extent can make up for the gap in strength.

But the other party is not alone. Just one of them can expel dozens of barbarians. If you really want to fight blood, all the blood will be barbarians!

In this state, he had to bow his head.

Including the sun beads that have been sustained, it is also a feeling of being forced to buy and sell.

“I want your memory!”

The words of Shen Lang are said to make Meng Meng stunned.

He has already made various ideas in his heart, and the demands of the king of the country will certainly be difficult to achieve, or else it will not threaten him.

What he can think of is naturally the various interests of Shibuya. Shaguo wants to invade!

I did not expect that I want his memory!

After a glimpse, he sneered.

“Hello, this is too greedy! I have gotten more than a dozen sun beads from me, got the items we have stored for a hundred thousand years, are not satisfied, and want to put us in the pot?”

He gasped up: “I am tolerant everywhere, you are pressing hard, it is really deceiving too much! Do you think we are afraid to give up our lives? If all of us barbarians fight, you will be stronger and better.” Leave it?”

Meng Jin feels very wrong!

He is not only the patriarch of the barbarian, but also a genius who has not been so strong in several generations in Shibuya!

It is this idea of staying in the green hill that allows him to bend and stretch. But today is humiliated, it feels more than a lifetime of humiliation!

There is also a limit to bear the burden of humiliation.

He is a barbarian of the calf, not a ninja turtle.

“Don’t be nervous. I don’t want to take possession of you. To put it bluntly, I have no interest in your barbarians. But I want to know more about the ancient cold world!”

Shen Lang said seriously without emotion.

“Not only you, Hanze, I also went. I also collect information from Hanze. My purpose is purely to want to guess the memory, and there will be no invasion of the barbarian. Otherwise, I will You don’t have to talk to you at all, just do it yourself!”

Meng Jin’s face has become more ugly.

Although he has just been toughened, he is also very clear about the current situation. Now the other three have joined forces together. He has the opportunity to inform all barbarians at most, and he will not be able to wait until everyone is shopping, and he will clean up.

He cares about the whole valley, and cares about the barbarian, but the first thing he cares about is himself. Without him, he can’t protect the barbarian. Everything can’t be said.

“I swear, I just want your memory. If I have any infringement of the barbarians and the slightest damage to you, let the sand country be destroyed immediately!”

Shen Lang made a serious vow.

The face of the dog ***** and the cold autumn is a little wonderful.

Of course, they are not surprised by the swearing of Shen Lang, but the vow is to bear the sand country.

What is the sand country, they are not very clear, but from the Shenlang is considered the head of the country, can also guess a general.

This is not something that really belongs to Shen Lang. If you vowing anything, even if it is fulfilled, there is nothing to say.

However, with their familiarity with Shen Lang, I feel that as long as I can't deal with any moths, Shen Lang itself should follow the promise.

Originally Meng and Jin were blocked by Shen Lang's words, and now this sentence is equivalent to giving him a step!

Isn't the family swearing by the sand country?

As the owner of the sand country, how to invade, it is impossible to hope that the sand country will be destroyed.

Having such an oath is enough to show that he is very serious and certainly will not violate it.

The previous sentence has already been said, you want to fight, have you played three people alone?

Since it can't be beaten, it can only be pressed and can only be surrendered.

This swears is equivalent to giving him a step.

"Since you have all been swearing by the sand country, what else can I say?"

Meng Jin is a bit embarrassed, so it is the default.

Now that he is in this state, he can't beat it. It can be a bad smell, but it will die.

Yielding is very humiliating and may be directly killed, but there is a chance that it will be fine.

He can only accept this.

Even if he has already taken this attitude, Shen Lang will not relax his vigilance. He is also highly alert. Then he uses the field of God to control Meng Meng to the situation. This is close.

Meng and Jin did not resist. Shen Lang has already made clear his situation. Rebellion has no meaning. It can only be coordinated.

When Shen Lang's consciousness entered and read his memory, he did not hurt him any more.

"We will leave now. There will be a period!"

Watching them leave in the direction of the exit, Meng and Jin are a glimpse.

He can feel it, he really has no other injuries, just read the memory, and did not extract his spiritual power.

This made him frown.

What is the purpose of the Lord of Sand Kingdom?

Memory, want to understand the ancient cold world?

The sand country, plus Hanze, plus Shibuya, does indeed make him know more about the whole world. But what purpose does he have? It will never be just for curiosity.

Is he Shaguo really wanting to unify the entire ancient cold world?

Because I don't understand the intentions of Shen Lang, Meng Jinyue wants to be more complicated.

The other party has already left, he did not dare to ask more just silently followed the drop-off, has been sent them into the long channel of the outer layer of Shibuya.

Meng Jin has not left for a long time.

As a barbarian patriarch, he was naturally able to sense the outer channel of Shibuya and confirmed that they had gone out to Shibuya.

But he still didn't dare to go. He always felt that it was not so simple. The owner of the country of sand has just been so embarrassed, so many people have been pitted. Now it is so simple to leave?

When he was suspicious, Shen Lang and Gao Hanqiu were stunned by the dog **** and had already come out of Shibuya.

Just this paragraph, Shen Lang intends to let the dog **** not go too fast, too fast will make Meng and today more doubts, will feel that he has the advantage of his greatness.

And with this period of time, Shen Lang is communicating with Gao Hanqiu. Gao Hanqiu sent this memory to him. He also used the same method and quickly completed it. Let Gao Hanqiu go to understand why everyone will be scattered, and the various countries of Shaguo and Hanze to Shibuya.

Shen Lang himself is in the memory of Meng Jin, to search for one thing he wants to know!

Chapter 2475 - Cloud Palace Memory

Regarding the situation of Shibuya and the situation of barbarians, Shen Lang already has the memory of Meng Yu, and basically can be said to have mastered a general.

The reason why I want Meng's memory is because I look at Meng's attitude towards Meng Yu. It is estimated that there are some highly confidential ones. Only his patriarch knows that he is unwilling and disdainful to let Meng know.

Shen Lang has already harvested most of the reserve resources in Shibuya. It is considered to be full of pots, and there is really not much interest in the things of Shibuya.

But there is one more thing, he is curious.

There is a cloud palace holy land over there!

When I was in the holy place of Yungong, in the depths of the cloud palace on the top of the mountain, I met people who had been barbarians!

At that time, the situation that was learned, the barbarian and the Weiner Stars, and the people of the Lingxi Kingdom, had long known. It did not seem to be the first time in the Yungong Holy Land.

But the specific origins of the three parties, how to get there, is also unknown.

This time I saw the barbarian in the ancient cold world. Shen Lang first thought of them and the barbarian in the Yungong Holy Land.

Is the barbarian seen in the cloud palace holy land a barbarian from this valley?

There are barbarians in different worlds, and they are normal, but they have not seen them before, and they have encountered them here, so I want to find out.

In Meng Xi's memory, he also searched, and there is no memory in this regard.

Normally, he is the great elder of the barbarian, so he should know the group's actions in the Yungong Holy Land.

However, looking at Meng's attitude towards him, there is no guarantee that it may not be possible for Meng Jin to let Meng Yi know it.

Therefore, Shen Lang intentionally tossed up with Meng Jin, to get his memory.

Meng Jin is the contemporary patriarch of the barbarian. If it is a matter in Shibuya, he cannot know.

If you really want to be the same ethnic group, you can know how they got into the holy land of Yungong.

If you want to re-enter the cloud palace holy land, Shen Lang can go back from the original place of the meditation, or try the door of the Three Realms.

But if there is any change, it may not be found in the meditation, or the door of the Three Realms can not be located. After all, the mainland of the island has been pursuing for thousands of years and has not found it.

Of course, that is also because of the intentional interference of the Dragon Gate, perhaps just that one entrance, not necessarily. Or every time it is actually correct, but a lot of people can't come out.

They seem to have a mature route and have traveled many times. If you know this secret, you will not only go to the Yungong Holy Land, including Weiner Star, including the Lingxi Kingdom. Going there!

Shen Lang came to this world because of the legend of the golden coffin leading to the demon domain. I want to see this demon domain, is there any good baby I have never seen before?

Now that I have been to Shaguo, Hanze and Shibuya, these three different characteristic settlements have indeed made him harvest a lot of different things.

The sun beads, the beads of the cold, are also the treasures that have not been seen.

But if you can get to Weiner Star and Lingxi God, of course, you are happy to go there once.

When it came out of Shibuya, the dog **** stopped and waited for the instructions of Shen Lang.

Before they were ready to leave here, they went to other settlements and left a few stone monuments to make the cold autumn feel.

But now it is no longer needed, and Gao Hanqiu has already understood all the situations.

So now where to go, you have to wait for the instructions of Shen Lang.

Shen Lang is also silent.

“what happened?”

Gao Hanqiu knows that Shen Lang should just be a memory of the barbarian patriarch. Seeing him, he seems to have encountered something.

“When we were in the holy place of Yungong, did we not meet the barbarian? I want his memory, I want to see if they are. Unfortunately...”

Shen Lang shook his head.

In the memory of Meng Jin, there is no memory about the holy land of Yungong. It is not that the name of Yungong Holy Land is another name similar to exploration.

According to normal, the barbarians and other three parties, if they can explore frequently, even if only once in a few decades, Meng and Jin should have been there.

He is a genius. He should have been cultivated by the barbarian early. There is a patriarch behind him. This situation must be passed on to him.

“It’s not the same when you look at it. Although it’s all barbarians, it’s still different. Just like there are people here, it’s definitely different from the people on our side, and the people on the other side.”

Gao Hanqiu comforted it.

Of course, he also thought of the barbarian, but he was not obsessed, but he was already bearish.

Shen Lang thinks about it, and what he said makes sense. The Terran is like this. The Barbarian is like this. It is the mermaid. It is different in different worlds and different places. It must be different.

You can't think of all barbarians as one because they are rare.

"So where are we going now?"

He just managed to get the cooperation between Meng and Jin, and made his memory, that is, for Weiner Star, Lingxi Shenguo, etc. If there is a way, go directly to see it.

Searching now, there is no correlation in Meng Jin's memory, and you can only make another plan.

The dog **** is silent, and Gao Hanqiu is also watching him.

This is very obvious, where to go or wait for him to decide!

Shen Lang immediately stunned.

He just gave the recent memory to the Gao Hanqiu, but it is what he experienced. For the memory of the King of the World and the Hanze patriarch, Gao Hanqiu still does not know.

He has the most people's memory, to determine the destination, of course, he is more appropriate.

Shen Lang immediately searched their memories together to see if there is anything worth going to.

Although I have already got a lot of things, but the three are considered to be successful, of course, it is best to act together.

Soon, a place appeared in his target range!

Tianmo Lin!

This place is in the memory of Meng Jin. In Meng Jin's heart, Tianmo Lin is a very desirable place, and he has not been personally.

According to his impression, Tianmo Lin can also be regarded as a settlement on the ancient cold world, but it is very mysterious and very dangerous!

First of all, the scope of Tianmo Lin is very large, far larger than that of Shibuya. In such a large area, there is no cold fire, but there are various dangers.

Secondly, Tianmo Lin is the name of the forest where the devil lives.

There are different races here, and they are also guarding each other to maintain a distance from each other. But the demon in the Tianmo Lin is what it is, but no one knows.

According to legend, the person who went to Tianmo Lin had no chance to come out. He said that he was eaten by the demon inside, and he said that he became a demon in it.

Before Meng Meng entered the magic, he reached a peak, and he wanted to explore the mysterious Tian Mo Lin in the end.

Chapter 2476 - Tianmo Lin

After the clue of the Tianmo Lin, Shen Lang combined the memory of the Lord of the Kingdom of Sha and the leader of the Hanze, including the memories of Meng Yu and Feng Qiu.

Sure enough, they actually know Tianmo Lin.

However, in their memory, the demon forest is not regarded as a settlement, but as an extremely dangerous forbidden place.

No one has ever been with the Tianmo Lin, nor will he want to go to the Tianmo Lin, and naturally he will not regard it as a settlement.

Even where the Tianmo Lin is specific, the memories of several of them are vague.

This is actually not surprising. Originally, this ancient cold world was very dangerous. A lot of cold fires isolated the various settlements. It is not easy for everyone to come and go. Generally, it is closer to know more.

Those who are far apart, basically know a little information for hundreds of years and thousands of years. Just like Shibuya's collection of information on Hanze, it is an extremely long accumulation.

Because Tianmo Lin is a forbidden place that everyone is unwilling to take care of and is not willing to provoke, naturally no one knows and explores.

In the whole environment, the geographical location is blurred, and even in different places, the result is extremely error.

But in Mengjin, it is different.

Shibuya was originally a very large settlement. In addition to Hanze, there are also information on collecting many other settlements.

Because in this isolation, a lot of information is exchanged and transmitted in a very original way. There is some information that must be exchanged to get it.

So even if they pay more attention to the information that will restrain their Hanze, but in order to get the information of Hanze, they have to know more information and exchange with others.

For a long time, let them also reserve more information, including the information of Tianmo Lin.

Meng Jin is a genius, which was highlighted from a young age, so his ideals are bigger than others.

The devil forest that others dare not go to, also from a point he pays attention to. Forbidden land means that no one dares to go, that means undeveloped, there may be more good things!

Of course, that means more danger.

He is a genius, but as a patriarch's successor to train, he also trained very calm early, knowing that his strength is not enough, and he did not really take risks.

Later, his strength became stronger and stronger, and reached the height that the previous generation patriarchs did not reach. According to this cultivation, not to say that they are invincible, but also have sufficient strength and confidence.

Therefore, in recent years, he has paid more attention to Tianmo Lin, systematically sorted all the information, and collected more.

If you go normally, it will take a few years for him to go to Tianmo Lin to find out. This is not only an opportunity for the development of Shibuya, but also a long-cherished wish to achieve strength for many years.

But because the energy absorbed too much, the plan was directly stranded.

Now these are all searched out by Shen Lang.

“Go here!”

Shen Lang directly transmitted the route of Tian Mo Lin to the dog god, letting it start in the direction.

This is also to save time. On the way to the road, Shenlang can learn more about Tianmo Lin.

Meng Jin himself has not entered the Tianmo Lin, and all the information collected is also a phrase that catches the wind and catches the shadows. After all, no one has ever been in and safe.

In general, this is with a lot of myths and legends.

From the valley of Shibuya, Tianmo Lin is still very far away. In this process, Shen Lang himself digested it and turned it into his clear memory, and then passed it to Gao Hanqiu.

“Will you go to this magic forest? Is it dangerous? Or do we go to a safer place?”

Gao Hanqiu is a bit embarrassed. If you say it, there is no such confidence.

This is a relatively old-fashioned view. After all, everyone in this world is still not enough to understand. Although Shen Lang has been successful several times, this day, the magic forest, is the world's patriarchal level, and feels very dangerous forbidden land.

However, he is only thinking about the safety of everyone, just to suggest it, the key is to look at the waves. If Shen Lang is determined to go, then he will not insist.

Shen Lang smiled and said: "I have been to the sand country. It is the owner of these golden magic weapons. It is induced to go back."

"Going to Hanze is to find the Emperor's behemoth, and then go to Shibuya. It is a coincidence that I can find you to meet and meet."

"But we can't live in the same place and kill one by one. If we directly grab someone else's things, we can't be safe."

Hearing here, Gao Hanqiu nodded silently.

He already understood the thoughts of Shen Lang, went to other settlements, and even if he did not take the initiative to cause trouble, others would treat them as intruders.

What should I do then? I can't believe it, that is the battle.

If they are almost as strong as the patriarch of Meng Jin, then they are not their opponents at all. They can push them all the way, but they will not be too good.

But this day, the magic forest is another situation. There is a great scope. There are rumors that there are gods, and it is not known what the situation is.

But to put it bluntly, it is a measure that fits the concept of one's righteousness and evil.

The general settlements, if you do a big job, there will be conscience and uneasiness in the death and injury, and they feel that they are innocent.

The demon of the Tianmo Lin is the magic road and the evil road, and there will be no burden.

But then again, the road to comprehension is to act against the sky. From the perspective of conservation of energy, you occupy more resources and someone will get less resources.

Do not say that the evil factions are decent. If they come to this world, they will invade the resources of this world, even if they are originally without the Lord, it is also the world.

Shen Lang and Gao Hanqiu, whether they are flying or leaping, or leaving the earth by other means, come to the mainland world of Nakajima, or any other world.

In essence, it is a process of robbing resources. The strong people from the earth were not in the mainland of China. They were based on sacrifices and they were based on local resources. From such a deep “essence”, nothing can be done, human beings live, but also occupy the living space of other species.

So they will not consider that much, just follow the concept that they are used to.

To explore the Devil Forest, just like the world, everything is unknown, there may be great gains, it may be very dangerous, and everything is full of expectations.

The dog **** does not decide what to do, it completely follows the direction of the Shen Lang, and goes to the devil forest!

Converging with the cold autumn, they do not need to hurry to hurry, do not need to grab more time to run a few places, Shen Lang let the dog **** is safe first, the speed is second.

Therefore, this time, it was also a few times on the road. The dog ***** sometimes needs to identify the direction, or go wrong, and need to correct it.

On the sixth day of the ancient cold world, they finally came to the Tianmo Lin!

Or, finally, I found the edge of the suspected Tianmo Lin.

Chapter 2477 - Feeling good

The ancient cold world is full of cold fires, some have no cold fire, or less, have been built by the powerful predecessors, one by one.

The living environment of the whole world is much worse. However, the overall population is very small, and the area is sparsely populated. Even in poor mountains and rivers, in general, the average living environment and resources are still quite high.

But compared to the hugeness of the world, there are so few settlements that it is a drop in the ocean.

This day, the magic forest is in a very remote place. The information of Shaguo and Hanze is blurred. This is the information collected by Shibuya Mengjin, and there is still a great deviation.

Finally, I searched for a long distance, and it is estimated that it will not be less than 100,000 miles. Finally arrived at this place, it looks like the edge of the Tianmo Lin.

According to Meng Jin's message, Tianmo Lin is a huge forest-like existence.

Now they are on the edge of a forest.

Because the fire is rampant, the world is full of vast wilderness. Except for some special plants that can adapt to this world environment, ordinary flowers and trees are basically non-existent.

There is a huge area of forest here, and the environment is undoubtedly very special.

Under the instigation of Shen Lang, the dog **** stopped first and kept a little distance to the forest. Everyone stared at the edge of the forest and carefully observed it.

Seen from the gaze, the forest was shrouded in a faint mist.

When the sun waves all the way, the golden mask can be played normally, and it can sense the range of thousands of miles.

It is precisely because of this that you can search for it in the case of a difference of 100,000 miles.

When it was near, it was also because it was inductively surrounded, as if it were the edge of the forest for thousands of miles. Together, it made him confirm the Tianmo Forest, which is suspected of being Meng and Jin.

But now, in the past, the golden mask is once again restricted!

These faint fogs seem to be a layer of isolation, so that their consciousness can not penetrate too much.

In this regard, Shen Lang has already had a lot of experience. Far away, it is only the settlement of Shaguo, Hanze and Shibuya here that there are still such restrictions.

This day, the magic forest will become a general existence of forbidden land, and nature is even more difficult.

A special kind of material is presented in the form of a fog. After many waves have passed, the strongest is the chaotic space connecting different worlds. It is the extent to which you can't reach your fingers. That is, you can't feel it in front of you.

Different environments such as the meditation domain and the Yungong Holy Land have different effects. What kind of effect is specific here is not clear at the moment, and it does not have much significance.

The current observation, Shen Lang mainly found a point, these fogs shrouded, it seems that the forest is the boundary.

At the edge of the forest, there is a little spillage, but it will not spread out. As if there is a line drawn well, it gives the forest and the fog can't pass.

"This is the Tianmo Lin, the patriarch of the barbarian. I can look forward to exploring it all my life. Combined with other information, this is a very dangerous place, but it may be full of resources."

The legend of the forbidden land of Tianmo Lin is generally going to the quest for this quest. There is no saying that it is the allusion of the demon leaving the magic forest and attacking other settlements.

This is two aspects. On the one hand, the world is too huge. The Tianmo Lin is far away from other settlements. If there are sufficient resources in the Tianmo Forest, it is naturally impossible to take risks.

On the other hand, it is a question of message transmission. For example, the demon has once reached a settlement, completely killing them, and so on, the news will not spread out.

It's been a long time, and it's what happened. No one knows.

“go in!”

Since I have decided to come and have already arrived here, Gao Hanqiu certainly maintains enough enthusiasm.

Not to mention the dog god, it was willing to leave the world of behemoths, just want to go out and see.

This time, following a few random crossings of Shen Lang, it has already made it a little too late. I would rather explore this magical world first, and it shows its strong passion.

Along with this, in this world, I have seen Hanze and Shibuya, and the innocent wilderness, countless cold fires, and even the tiredness of seeing it. The appearance of this foggy forest is a very good appetite for appetite.

After making a decision at the same time, everyone went inside together, and there was no longer a dog-going mount.

Because there is no more information in the Tianmo Lin, it is full of unknown danger. For the sake of safety, let the dog **** become the size of the dog, and go with them both.

The faint mist was separated at the edge of the forest, and the picture was quite magical, as if it were a transparent curtain, and it was opened.

When they actually entered, they did not encounter any obstacles. In terms of feeling, there was an opposite experience.

Normally, when it comes to such a foggy forest, it is also known as the place where the demon lives. It should be a bit creepy and gloomy.

However, because the outside is cold and cold, the temperature is much lower. After entering the forest, there is no cold around. The temperature is obviously warmer, and it will not be as hot as the valley. It feels more comfortable.

This is a feeling of entering the Tianmo Lin. When you continue to move inside, the temperature and humidity are all more comfortable.

This is the same feeling that ordinary people have entered the forest of the four seasons like spring.

But Shen Lang was immediately alert!

Because it is the realm of his already cold and heat does not invade. Whether it is the high temperature of Shibuya or the low temperature of Hanze, it will not affect his physical condition.

He will feel cold and hot, but only psychologically, and physically unaffected.

But just entering here, he felt very comfortable, and he felt that the environment was very good and comfortable. This is a bit wrong!

Normally, it should be that he personally feels that the environment here is good, and then he has the heart to sense the environment, and then experience it physically and mentally.

It's just natural.

If it is an ordinary person, it will be quickly affected by the environment, which is normal. For example, from the cold environment, into the heating, the sense of body zero to the sense of twenty degrees, is a very huge change, but the sense of 20 degrees to 20 degrees of body, should not change.

Into this strange and unknown and dangerous environment, Shenlang is always on high alert, but it is affected by the environment, indicating that the environment is very unusual, and it is very likely that there is something affecting them!

Chapter 2478 - Sanjia wrong?

“Be wary, the environment here is a bit wrong.”

Shen Lang sent two ideas to them and reminded them.

In fact, all kinds of experiences in Gao Hanqiu will not be inferior to him. Shen Lang is not worried. He is worried that the dog **** is not paying enough attention.

They are just coming in, the overall speed is still relatively slow, we must first understand the environment and then say.

But according to the legend, the demon forest is very huge, we must speed up, so I don't know how long it will take.

After entering the magic forest in this day, Shen Lang already has more detailed data, and basically can sense it, it is about a kilometer.

In such a restricted environment, the golden mask's bonus effect is gone, and it doesn't matter if you wear it.

It is equal to a circular range with a radius of about one kilometer, which is really not a safe distance. Enemies in their realm can attack them from a few kilometers away.

After clarifying this point, the three of them were more careful, and then naturally formed a fan-shaped protective ring, probably one person responsible for about one hundred and twenty degrees.

This is mutually trustworthy, and the defense range of one-third of each defense can be more rigorous and safer.

But in this day, there is no danger in sensing the magic forest, and no creatures are there. Instead, it is the surrounding environment that gives them a feeling of more and more comfort.

Shen Lang is also a little bit puzzled. He makes himself more sensitive, examines the slight differences between the surrounding ones, and analyzes the surrounding material with the holy armor.

But there is no problem at all!

It's really just that the environment is very good, nothing more.

But they came from the mainland of the mainland, not just when they left the earth. The environment here is good, it is just compared with the outside of the cold, compared with the mainland of the mainland, it is very common.

Why do they make them feel very comfortable?

I have to say that when I first came in, I may not realize it, but now I have been targeted and alert, but I still feel more and more comfortable.

This is very abnormal, and it does not match the name of Tianmo Lin.

However, Shen Lang did not say anything. After all, it is not far from entering, just the edge of the forest. It is not enough to go deep into it.

In this way, they slightly speeded up a bit.

About a hundred miles away, Gao Hanqiu suddenly stopped.

“Is the description going through here?”

In this sentence, Shen Lang and the dog **** carefully pay attention to the surrounding environment and the ground.

“I think we seem to have passed by here.”

Gao Hanqiu further uttered his feelings.

“should not.”

Shen Lang shook his head.

There are all kinds of plants in this day, but they all look similar. He doesn't need to check every detail one by one, just look at the walking track of the holy armor.

After they entered the forest, they kept moving forward. Although they did not do 100% straight, they generally went straight ahead.

Just after the question of Gao Hanqiu, Shen Lang immediately checked the trajectory of the Holy Grail and confirmed it.

If you pass by, even if it is not a direct turning, it is a circular arc-shaped circle. In the range of a hundred miles, Shen Lang can still detect it.

Now whether it is his personal feelings or the records of the holy armor, it proves that there is no circle.

In their realm, even if it is slower, it is also flying in the air, and naturally it will not leave footprints on the ground.

To prove whether it has passed, it is really only the super black technology such as the holy armor is the most accurate.

Originally, Shen Lang said so calmly that Gao Hanqiu would fully believe him.

But this time, he still believes in his own feelings.

His realm is higher than Shen Lang. Even if there is no specialization, there will be a hunch for something. This feeling is often not wrong.

In order to verify that there is no problem, his fingers gently waved, and a scratch on the largest tree next to it.

They continued to move forward, and then, at about a kilometer or so, they were able to portray two scratches on the edge of the range that could be sensed.

Scratches are also very particular, with one sketching the direction and the other pointing the direction.

So going forward is three, four...

There is nothing wrong with being cautious. Shen Lang will not feel that he has to listen to him. Even if he feels that he has no problem, he still respects the cautiousness of Gao Hanqiu.

He himself will also pay attention to the trajectory of the sacred armor, confirming the direction of their march, or basically straight ahead, and there is no problem.

So by the tenth time, it was almost close to 10,000 meters, that is, nearly twenty miles.

Gao Hanqiu has decided to paint the last time. There are no abnormalities in the 20th, and it should be that his feelings are wrong.

But at this time, the three of them found a problem almost simultaneously!

During the time, everyone speeded up and rushed straight ahead.

Then stand in front of a big tree.

On top of this tree, there is a scratch on it. The scratches have a little trace of the direction at both ends. It can be confirmed that it was before the cold autumn painting.

Shen Lang also quickly mobilized the data in the holy armor.

Twenty miles away along the way, there is too much data. Even for the storage space of the holy armor, these are insignificant, but it is troublesome to let Shen Lang go to check one by one.

But just intercepting a point to compare, it is not much engineering.

He directly recorded the sacred armor to the picture at that time and projected it one by one. With the angle of correction, the orientation of the surrounding trees and rocks can be matched one by one.

In terms of details, the traces of the characterization can also be completely matched at every point.

This has basically been confirmed, and this is really gone!

When I used to mark it, Gao Hanqiu had already felt that I had passed, and I could feel it or find out that it might not be the first time.

In other words, they are likely to have come here at least for the third time!

But the magic is that still keeps the forward route in the running track of the holy armor.

Just like the projection just now, the holy armor is a record of data information. In theory, it is more error-free than humans, and the accuracy can be extremely high.

But now, in its record, everyone is always moving forward, but in reality, this is obviously re-traveled.

Gao Hanqiu's eyes looked at Shen Lang.

Of course, he would not feel that his feelings were better than Shen Lang, but he felt that the cautiousness of Shen Lang would not be inferior to him. He just had no idea that there were other factors supporting him.

“My record of this instrument, we have been moving forward. Normally, it is just a record, it can’t be wrong, just like this picture, it is recorded.”

Shen Lang took the projection, and he is now full of doubts.

The Holy Ghost can’t be broken, and the record is not wrong. Is there any difference in the environment here that affects the direction of the Holy Grail?

Chapter 2479 - Infinite loop?

For a time, everyone was silent.

The dog **** is conscious of no constructive ideas, honestly not speaking, just follow the arrangements of Shen Lang.

Gao Hanqiu is also thinking about where the problem lies.

He didn’t know much about Shenlang’s instruments, but he never doubted it. Because Xu Yuyue knew about the ever-changing technological civilization on earth, it was an area he didn’t understand.

But he is very convinced that Shen Lang, Shen Lang can believe this instrument, the description is absolutely reliable.

There is a contradiction now. In theory, it should be that there is a problem with this environment.

“Let’s take another look.”

Shen Lang made a decision.

Twenty miles for them, it is not too far, and time can’t be used much. Just like the random transmission before, you can verify it a few times.

Just because he believed in the trajectory of the holy armor, the degree of attention was not enough.

Now, once again, Shen Lang is much more busy and begins to contrast.

He took a scratch to the distance of the two scratches, the key test, and forwarded to compare the impact of the record.

The result is no problem!

They slow down and are still relatively fast. A slight deviation may be a deviation of tens of meters. However, if you follow the original path, you can use the trajectory of the holy armor as a navigation.

Such a basic can be achieved without major deviations, as well as the mountains and trees seen along the way, can correspond to the impact of the record.

On the other hand, Shen Lang re-acquired the data of the previous forty miles according to the distance, triple comparison.

The result is still able to match!

This shows that the feeling of the cold autumn is correct. When they came over, they were already repeating the road.

Going forward, Shen Lang also continued to adjust the data in the first sixty miles, the data in eighty miles...

The result of the final one-to-one comparison made him very helpless.

The process of such a check is not only the first one kilometer, but the twenty miles are directly compared.

They once came to the spot where the scratch was.

“Unfortunately. I have compared one by one. From now on, we have gone through more than one hundred miles. In fact, we have gone through multiple cycles. It has been repeating this distance of about twenty miles. Until Xiaogao discovered an abnormality.”

Shen Lang announced the final result.

Gao Hanqiu and the dog god, there is no accident.

Even if they can't make such a precise comparison, they know that when they walked the repeating route, they saw some mountains and trees and they began to have an impression. The scratches that are artificially portrayed are even more direct evidence.

“But the instrument records, this cycle we just walked, is still ahead?”

Gao Hanqiu asked the point that Shen Lang did not say, and asked directly.

“Not bad.”

“In my sense of direction, I just didn't feel the bend, and there was no direct reentry. It's not easy to get back to the original point in the 20-mile area.”

After listening to the cold autumn, the dog ***** also felt that he could finally insert a mouth.

“I didn't feel the bend!”

Let's take a look at the front and look at the back.

In the past, it is faintly able to sense two scratches, and later it can sense nine scratches.

The turning point is definitely no turning point, which is ok. And if the arc is round, it is not possible.

Because the total length is only about 10,000 meters, this length is the time of the previous depiction, according to the limit of induction, the distance calculated by the holy armor is similar.

If you circle around, the radius will be just over a thousand meters. At each Peugeot, it is about thirty-six degrees arc length of about one thousand, and the direct distance between two points is shorter.

It is only based on the sensing limit, it is not the same.

“There is still a problem. If we come in, we will start a loop. Now we should still be in the place just coming in.”

But now, they sensed behind, the nine lines that had passed before, not the outside of the forest.

Going forward and backward, I did not feel this.

It would be normal to come in for a kilometer or two. After entering again, is it into the loop?

In that case, even if you loop to the very beginning, you will not be able to sense the edge of the forest.

“Remember the Yungong Holy Land?”

Gao Hanqiu gave a reminder.

Shen Lang immediately remembered that the summit palace in the Yungong Holy Land, after entering the main entrance, passed through a corridor, and then went forward to a square that seemed to be only about 100 meters away, and then inside the main hall building.

At that time, people have been suppressed, just like ordinary people, but even the speed of ordinary people can quickly run away. The result ran for a while, looking at the front tens of meters, watching the back tens of meters, but how can not run.

At first, I thought it might be a magical array. It seems to be straight forward, but it may actually be in a loop, and then it is determined that it is ten times the distance.

Shen Lang and Nacalo met, and they naturally met in the cold autumn, and they all had such an experience together.

A distance of about one kilometer, even if it is pressed into an ordinary person, it actually takes six or seven minutes to run, and four or five minutes.

What made people uneasy at the time was the gap. It seemed that things that could be finished in a few seconds. After running for a few tens of seconds, they were not finished, and they were worried about whether they were looping around.

It now looks like this seems a bit similar.

If it is also ten times the distance, then one hundred meters to run a kilometer, this 10,000 meters is to run 100,000 meters?

According to this line of thinking, it is not enough for them more than one hundred miles. It still needs a few more cycles, reaching more than two hundred kilometers, perhaps crossing the cycle of ten times distance!

It was just that the original situation was different from here. There was an empty square. There was no marking and no reference. Even if the current wave can also recall the record of the holy armor, it can only confirm that it looks like a hundred meters. Distance, actually there are kilometers.

However, it is not certain that this distance is ten times. Is it a ten-time cycle of ten meters?

If it is 50 meters, it will be repeated twenty times?

Ten meters cycled a hundred changes?

Even... one meter cycle for a thousand times?

These are not known so it can only be a similar reference, but can not be copied. Otherwise, after running for two hundred miles, there is no result. Is it going to continue to cycle to four hundred miles, one thousand miles, two thousand miles?

“Although it is not clear how this environment is caused, the possibility of repeating the cycle is greater than that of the circle. But the question is, how is this cycle broken? After many passes, it will pass, or it will loop indefinitely. ?”

Both of them thought of ten times the distance according to the condition of the Yungong Holy Land. At the speed of three of them, even if it is a hundred times in 20 miles, it is not a thing. It is a thousand cycles, and it can run.

Like they came from Shibuya this day, the magic forest, more than a million miles!

But even if you don't know the specific goals, you know that you are moving forward. This kind of repetitive cycle is desperate. Who knows if it will be infinite?

Because this may also be a place to trap people!

Chapter 2480 - Entering the ground

Shen Lang thought of another point. The legends of the ancient cold circles about the Tianmolin—the people who entered, did not come out!

If this is an infinite loop, or there are many such infinite loops, after entering, it will remain trapped in a range until it is exhausted and died...

The main factor that led them to come is Meng Meng's concern for Tianmo Lin. Others just know that there is such a legend, specifically how long ago, it is not clear.

But Meng Jin has been paying attention to this information for decades, and collect as many real and false information as possible.

These add up, it seems to be a three-dimensional understanding, but also let him have a thorough preparation, just wait for the strength to go further.

In the capacity of Meng Jinjin, even if there is no gain in exploring Tianmo Lin, as long as it comes back safely, it has historical significance. It will be promoted as a capital that can be shown off, and there will be an improvement in his personal and Shibuya status.

However, the great deviation from the arrival here has proved that the information of Mengjin is very limited. It is basically a hearsay, and the source of these hearsays is probably a mess.

For example, the current existence of this cycle they encounter, Meng Jin know nothing.

Shen Lang does not believe that this is their luck problem, and it is not accidental, because they come basically randomly.

With the initial induction, at least the breadth of the miles has reached a thousand miles. On a forest line of a thousand miles, if you enter at a point, you will encounter such a situation. To be exact, it is too coincidental.

The bigger possibility is that if you enter from that point, you will encounter such a situation!

The problem now is that it has already come in here, and the retreat may not be able to return. It is certainly still within this cycle.

“Before, it is estimated that I have not encountered any demon, I am trapped here. Now we will gamble, go ahead and see if there is any chance to cross this cycle.”

“Either... you have to find a way to crack this situation!”

When Shen Lang’s words are spoken, the dog gods are silent, waiting for them to discuss.

“The betting cycle is useless. Cracking is a more reliable choice. Just... the people who come in will definitely think of this and try.”

Gao Hanqiu agrees with the analysis of Shen Lang, but it is not optimistic.

He then pointed to the top.

“I believe that the predecessors will also choose to leave from above, but they should not be able to leave.”

Shen Lang silently nodded.

Meng Jin sat down to the Shibuya patriarch and did not dare to venture. He was prepared to cultivate beyond the realm of the former patriarch and dared to come.

In the past, other people who dared to come here, no matter which race, must be a worldly genius, there is a mentality of seeking defeat, will come.

And the time they prepare will certainly not be short, and in the end, no one can go out.

They are trapped here, and they find that the cycle is only a matter of time. It is definitely an inevitable choice to find a solution.

They have not been to the Yungong Holy Land, and there is not even a concept of tenfold or twentyfold cycles. The optimization is even an inevitable choice, that is, cracking.

And if it's just a 20-mile range, it's probably not too difficult to crack it.

But if you put it in a thousand miles, you can encounter such a trap in a random point. It is a very large giant.

In that case, just breaking at a point, it is completely ruining the scope of these twenty miles, and it does not affect this giant.

There will definitely be a variety of bans on the top, which is not encountered in Zhoushan. Since it is so taboo here, it will inevitably set limits.

“God can't do it, then go to the ground!”

Shen Lang suddenly said something to let everyone know.

Then, a small shovel appeared in his hand.

“The cycle here, no matter how it is done, whether it is born or artificial, is to confuse us to trap us.”

Shen Lang pointed to the top. “If you fly, you can look at the whole picture. But here is a lot of fog, you can’t see it below, you can’t see it at the top, and there must be other prohibitions.”

“Then let’s try to go underground!”

He pointed the shovel to the ground.

This is not a whimsy, because the earth is a natural barrier. For example, the guardian mountain array of the Tianshan Jianzong is actually to protect the entrance of the mountain gate, and the snow peak behind is the natural protection.

Qiu Lin Jianzong’s Guardian Mountain Array is also completely covering the mountain. If there is a shoal of slaves, through the mountains in the distance, it has been drilled underground, through the underground to the mountain of Qiulin, and then drilled from the mountains. It is also possible to come out.

Therefore, just mentioned the difficulty of breaking the line, Shen Lang immediately thought of going underground.

Underground is not always able to walk through, but at least it is more likely than the ground!

Seeing that he has a way, Gao Hanqiu and the dog ***** did not ask much. Anyway, everyone is ready, can you be useful, try it first. If you can leave the best, you can’t leave, and it won’t be worse than trying again in the forest.

Shen Lang brought them two, and borrowed a small shovel magic weapon to start a trip to the land.

When the shovel is smashing the ground, the speed can be very fast. Before the shoal was in the cold, it was in the cold waters, and the underwater bottom penetrated the island directly, and it was directly connected to the pit.

Now the environment here involves a cyclical dilemma. For the time being, I don’t know how it is laid out. So, I’m going to go deep into the journey.

If this is a formation, it is a few meters into the ground, tens of meters, it may still be within the scope. But if you go deep into a hundred meters, a few hundred meters, it may be over.

Of course, there is also a possibility that when they go underground, they will also encounter a ban, just like flying in the air.

At this moment, Shen Lang directly runs up. The small shovel magic weapon is also playing to the limit, first to drill into the ground at a very fast speed, and then go straight to the distance!

When they were on the top, they had already gone again and again. The record of the holy armor has been going forward, so even if it has entered the depths of the earth, Shenlang can keep moving in one direction.

A cycle on the ground is about twenty miles. Now under the ground, you want to go beyond the past. This distance must be at least twenty miles away.

For the sake of safety, Shen Lang is predicting the distance to walk away, and has gone straight for a hundred miles!

After leaving the hundred miles, he took them both and drilled out from the depths of the ground.

Naturally, it is still in the misty Tianmo Forest. According to the previous measurement, there are five more cycles around the hundred miles.

If they are still looping, then they should be back to the origin, at most a bit biased.

So after they appeared, they quickly searched around to see if there was a big tree with scratches.
