

First Strong 2501

Chapter 2501 - Alien of barbarian

Fu is not stupid, he can also guess that Shen Lang has just despised his information, it may be to “price”, when you are low, you have any qualifications to be expensive?

But the problem is that he and Meng Jin are both crushed by the dragon!

Just one shot, the people just lifted their dragon claws and crushed them.

Under such circumstances, there is no qualification for asking price. All that can be done is to create a good negotiation atmosphere so that the other party can accept itself.

To put it bluntly, it is to please as much as possible, let the other party feel comfortable and let yourself be a horse.

When you are a grandson, you must have a grandson.

When you should be a fool, you must be a fool.

If you still want to play and want to bargain with each other, then the two of them will be destroyed in this day.

What is especially crucial is that in the current situation of the enemy and the enemy, people want to capture their memories, but it is only a little bit of a hard work, and even if the dragons suppress them in a coma, it does not take much effort.

At that time, they are dead, and information and intelligence are the same as others have gone. Instead, because of the unhappiness, after leaving the transmission array, they may have ruined Shibuya by the way!

He and Meng Jin are here, are not opponents, what other people in the barbarian still have the ability to parry?

In the past, their lineup is directly the level of slaughter of barbarians!

Therefore, the old-fashioned Fu Xi, this time the grandson generally offered his sincerity. Shen Lang asked them to look up and he looked up in a very low profile.

The result is as willing to give them a chance, as he wants!

This actually shows that the other party is very satisfied with his attitude. At this time, the most feared thing is that Meng and Meng have not responded. They will have a hot head and want to break the net, which will be wasted.

However, under such a state, he did not dare to discuss with Meng and Jin, so as not to be suspected of any plot.

Fortunately, Meng Jin did not consider him as deep, but he has given up his struggle. This is a place where he thinks that he has something valuable.

The next situation is very smooth.

With the suppression of the old dragon, Shen Lang did not even have to worry about his daring attack. It was easy to invade his spiritual world and read the memory of Fu Yu.

After reading the memory of Meng Jin last time, they left Shibuya first.

Now it is a bit arrogant. Anyway, the other side is in a state of being crushed by the dragon. I don't mind letting them eat more.

Shen Lang did not evade, just here to fuse the memory of the symbol.

At this point, Fu Wei is a lot of peace of mind.

His conscious intelligence information is still of great value, because this is his lifelong research!

He even took the initiative to step down the elders for the magic forest of this day, in order to more convenient to leave Shibuya, but also has a great impact on the new patriarch Meng Meng.

When Shen Lang has read his memory, now it is digested, he can be safe, this will send the idea to Meng Jin, simply let him not mess, patiently cooperate.

Meng Jin's heart is a little disapproving. He feels that this is nothing but fear that he will affect his own safety.

But he did not think of a better way to think quietly, and he could only hope that Fu can be successful here.

The memory of Fu Xi is also huge. The current mental power of Shen Lang is to quickly integrate his memory, but it takes a lot of time to go through it one by one.

So after the integration, he also quickly passed his big life, and then focused on searching for memories related to the Tianmo Lin, especially the latest.

This person, in the barbarian, is considered a different kind.

He is not a genius like Mengjin, and he has never been a successor to the patriarch, but he is very willing to use his brain. This is what most barbarians lack.

The ancestor occupied the valley, created a settlement suitable for the survival of the barbarian, so that their ancestors can pass on here, and everyone is very satisfied.

The special and cruel environment of the ancient cold world has created a pattern of vast and sparsely populated areas, and the settlements are far apart. And there are no races that breed a lot, and everyone is generally safe.

Coupled with the settlements created by the ancestors of the ancient times, they are all looking for a good place to rely on a "bone and heaven", and resources can be self-sufficient, so there is very little war.

Like the barbarians, it pays special attention to Hanze. It is a race that is likely to restrain them, even if they are far apart, they have to guard against it.

But in fact, just like they hate the environment of Hanze, the mermaid of Hanze generally does not leave Hanze, and even hates the hot and dry land like Shibuya.

In short, such a big environment, so that they do not need too much wisdom, too many plots, a suitable ease of environment, there is not much external pressure, and there are very few evolutionary mutations. And because there is no change, there has been no change in all aspects.

Fu Lu, who is willing to use his brain and ambitious, is even a different kind.

From a young age, he often went out to explore and learned a lot about all aspects of information. A very important part of this is to find out a lot of information and intelligence on the grounds of searching for information on Hanze, contact with many races, and many places.

The barbarian is also a great contributor to the intelligence of all walks of life, especially Hanze.

In this process, Fu Yi comprehensively learned a lot of information about Tian Mo Lin. Although the rumors of all parties are extremely limited, it is much richer to meet him.

Hanze is the precaution of the barbarian, and Tianmo Lin is his personal hobby.

When he was an elder, he also influenced Meng Meng, who was the successor. Later, he took the initiative to step down as an elder and went out to search for various information all the year round.

About the information of Tianmo Lin There are three levels, the first level, is a part of the general summary of the information database in the barbarian. The second level is a more part, telling Meng Jin.

This is also an exchange. After Meng and Dang became the patriarch, if he did not give him more information and attracted it, it might also give more restrictions to Fu.

The third level, of course, is that he knows the most.

Now recalling his memory, Shen Lang discovered that the deviation of at least 100,000 miles before, in fact, Fu Xi left a hand on Meng Jin, otherwise, even if it is not so accurate and detailed, the deviation will not be so big.

The content of this part is already much more than the memory of Meng and Jin.

There is also a part of memory, which is completely absent from Meng's memory this time. That is, the information he got after he left the last wave and went back recently.

This time, the information also has a great breakthrough.

That transmission array is actually in the valley of the valley, just in the middle of the barren hill!

Chapter 2502 - Arrangement of the ancestor

The barren hills and the waves have been close to each other. Meng Jin and Meng Yu lived there for a long time, but never knew there was a transmission array, which could be directly connected to Tianmo Lin!

At the time of the expedition, Fuxi got a slate with the words printed in a settlement and a race.

He collects all kinds of information, that is, through many ancient things to find clues, he has gotten a lot of such things, most of them have no value, or it is of no use to him.

But as long as there is a small amount of useful information, it is worth collecting.

Originally, this was also a collection of regular cases. After the accident, I discovered that the material of this stone carving was actually unique to Shibuya!

This immediately evoked a great interest in Fu, after injecting various attempts from the barbarian's unique martial arts and barbarian blood, I found that there is really hidden content!

The content on the surface of the stone inscriptions is a record of some of the travels that have appeared, similar to what the poems of the poems express to this tour.

However, after passing the verification of the barbarians, it was confirmed that this was left by the barbarians, and there was a lot of information that the barbarians could understand.

Before I knew how many generations, the barbarian had a predecessor, and it was similar to Fuxi. She loved to use her brains and love to explore everywhere. Later she disappeared.

Because there is no such great achievement, and there is not much information left, so for a long time, in the history of the barbarian, there is no place for him, and he does not remember such an ordinary ancestor.

This stone inscription is a complete record of his lifelong research on the demon forest. Some of them were collected and heard in his time, and some were his experience of going to Tianmo Lin personally!

One of the most important clues is that he learned that there is a transmission array in the barbaric, which is through the Tianmo Lin, which is probably the ancestor of the barbarian.

But the barbarian himself has lost the biography. This predecessor got this information, but before he could return to Shibuya, he eventually encountered an unexpected event.

Before he died, he made such a stone inscription, and banned the details in it. Only the barbarians could unblock them. What remains on the surface is the textual information of the barbarian. The material is also from the barbarian, in order to hope that one day it can be circulated to the barbarians.

If the world is often traded and traded, this unique thing, trading with the barbarians, or trading good things, even if it has been devoid of decades, hundreds of years, someone found out, will find ways to follow the barbarian transaction.

However, it is extremely inconvenient and the atmosphere is very low. If it is not a tour of Fuxi, and if you try to collect some antiquities, you will not be taken out of the transaction, and the garbage will be thrown.

After getting the stone engraved content, Fu is very excited. He has a feeling of being recognized, and there is a sacred shoulder with a historical mission!

He feels that this is the ancestor of the gods in the blessing, separated by a long time, there will be such a person, inexplicable external exploration, inexplicable attention to the Tianmo Lin.

This is definitely the ancestor's will, and through the guidance and his personal efforts, he finally got the inheritance of the ancestors.

That ancestor has done more than he has to get more information. But did not bring back to Shibuya, so I did not know how many years.

Now that he has got it, he should take it back immediately, and then make plans to explore the Tianmo Lin.

If you can get more good things like never before in the Tianmo Lin, then the barbarian will fly to the sky, no longer confined to Shibuya, and even dominate the world!

Fu Xi did not stop for a moment, and the fastest speed rushed back to Shibuya.

He also has wording over and over again, how to explain to Meng Jin, and convince Meng Jin to let him go to Tianmo Lin. But all the information, he will still not fully disclose, but will contribute a part to Meng Jin.

When he returned to Shibuya, it was Shen Lang who had just left.

He knew the experience of the barbarian and knew the death of Meng Xi, but because he was worried about the more important and greater "historical responsibility", he did not delve into it and fully believed in the story of Meng Jin.

At that time, when Meng and Jin combined with the Pearl of Hanze, Fuxi had more insights and gave many suggestions. Of course, Meng Jin also gave him a cold pearl.

This is a reward for bringing back so much important information to him. It is also a kind of solitude. If he fails to integrate, he will rely on the symbol.

But after all, there is still no defeat, and I am reluctant to give everything.

The result was very good. He spent a day or two and reversed the situation!

The energy of the Pearl of Hanze changed his flaming to the sun. He was originally cultivated to a very high level. When he changed this problem, he would restore his strength.

Then, better cultivation, under the yin and yang, reached a new height.

After completing this step, Meng Jin will consider Fu Xi's proposal.

Normally, he is a patriarch. He should be in the valley of Shibuya. He can't take risks, and the elders are the same.

However, Tianmo Lin's attraction to Mengjin is too great. It is also found that this is something that ancestors have explored, and it is more likely that the ancestors had arrangements. Such "historical responsibility" will certainly be a matter of eternal history.

The patriarchs are from generation to generation, and this may go straight to the ancestor's feats, and only one or two names may be reserved.

Feelings, interests, sense of mission, sense of historical honor, etc., let Meng and today decide to go and explore together with Fuxi.

The reason he used was that this time, many of the barbarians were eliminated by the Lord of the Shah State, including the elders Meng Mu, who were killed. The barbarian's strength was greatly damaged. His patriarch should bravely take the risk and bring back the family. More treasures to enhance everyone's strength.

He even suggested that Fu Wei stay in the town he personally went.

Fu Yi pursued a lifetime, and finally arrived at this step, of course, do not want to pick him a peach. He has been practicing for a longer period of time, and he has gained a lot of improvement in his practice. Even if Meng and Jin's strength rises, it is not inferior.

Coupled with the intention to not hand over the stone, just gave a part of the information, so that Meng Jin also understands that he has a lot of reservations, lacking him can not succeed.

Therefore, everyone is “a happy and happy”, and they agree that both sides will go to Tianmo Lin together.

Then under the leadership of Fu Wei, I really opened a transmission array method in the barbaric, and directly sent them to the magic forest.

When they got here, they were first looking for the way back. They couldn't determine if the array was still open, but at least around it, there was no trace of the transmission array!

Then they also learned that the fog around them has suppressed people in all aspects, and they are not convenient to search and explore.

I haven't made one, so Shen Lang will come...

Chapter 2503 - Grandson

Shen Lang guessed that they found a transmission array, so they reached it directly from the vicinity of Shibuya. But I did not expect that it was in the barbaric, but I did not expect that this was actually the ancestor and ancestor of Shibuya.

At the beginning, he deliberately stepped on the plaque and said that their information and intelligence were useless, but in fact they still attach great importance to it.

Because he knows the situation of the dragon, it is not long in this time, but after the heavy damage, it is long-term crouching, and the soil is covered with lush vegetation, which shows that there is no understanding of daily life.

Their information, no matter how old or not, will be a good reference.

Now that we have harvested this information, we have an overview.

After figuring out the approximate life of Fu and the situation in recent years, Shen Lang skipped a lot of irrelevant details and focused on understanding the information about Tianmo Lin.

This is divided into two parts, some of which were previously heard by all parties, and the practical value is not high, basically all kinds of myths and legends.

The other part is the information contained in the stone inscription. This piece is not only a lot of content, but also the first-hand information, it is really coming to the Tianmo Lin.

This information, I don't know how long it has been, but there is still a good reference.

Just before the verification is done, the information can't prove whether it is completely accurate.

"Yes, your information still has some value. The old dragon let him go...the two of them!"

Shen Lang has just merged with the digestive memory, Fu Xi and Meng Jin have always been suppressed by the dragon.

The dragon is now in a state of paralysis. Just after a shot, I want to prove my value. The result is that Shen Lang has helped it.

So when you suppress the two of them, they are not relaxed at all, and they can't let them escape. Then the face is lost.

Although the dog ***** and the cold autumn are still on the dragon's spine, they are not relaxed.

They all divide their mental power into two. On the one hand, they are surrounded by vigilance. The range that these fogs can sense is too short. If there is any attack close, once you miss the best reaction time, you will be in trouble.

On the other hand, it is a warning for Shen Lang!

They should not only be wary of the two of the barbarian, including the dragon, but also within the scope of the alert, lest it have any disagreement.

At this moment, the waves are open, and everyone is relieved.

Fu Wei is still very confident about the information in his memory. As long as Shen Lang understands the situation, he will definitely find it valuable.

But he does not understand the owner of this sand country!

According to what Meng said before, and the owner of this sand country said, it can be said that this is a particular person, not killing and robbing.

This has a great chance to survive.

It can be absolutely absolute, because before it was in Shibuya, all the barbarians will work together, it will still be a huge force, and it still has a home advantage.

But here, they have more dragons, kill him and Meng Jin, without any risk, and will not spread out, there will be no moral burden.

It is just like this, he is waiting until Shen Lang to speak out, is really a sigh of relief.

And Meng Jin, it is more heart-hanging, that is the information of Fu Yu, has nothing to do with him, compared to his information may be worthless.

Until Shen Lang said that he had put “they”, he was half assured.

“Thank you for the Lord of the Kingdom of Shah! You are not only kind, but also very reputable. It is a model for all parties and it is worth learning for all races.”

“As long as you need us to serve, we must be willing to be a cow! Let us go to the front, let us go to the fire, we have no complaints!”

After Shen Lang ordered it, it took a little more time for Lao Long to release the dragon claws and the gods to release them.

The dragons also want to give them a little warning, let them understand that it can suppress them at any time.

However, Fu Xi did not care to let them be a second or a few seconds later, but sang a hymn.

Next to Meng Jin, listening is very embarrassing.

When necessary, for his own life, for the continuation of the race, he can yield and be pleased.

However, Fu Hao is also an old man, strong in strength, and has many insights. At the beginning, he was very tough on the king of the country. How can he be so enthusiastic and praiseless without psychological obstacles?

In fact, this is the difference between Fu Yi and Meng Jin!

Meng and Jin are smooth sailing. When they were young, they were geniuses. They were then given the attention of the previous generation of patriarchs and elders, and they were listed as successors of the patriarchs.

Basically, in the interior, it is the best resource. Except for the big guys, no one else dares to be good to him. For example, Meng Hao has always been the younger brother he can't see.

When it comes to the outside world, no matter whether it is experience or task, the elite of the barbarian will give priority to protect him. He will not hurt him as much as possible. And some key experience is to be left to him to complete.

Not to mention the patriarch, it is always high.

Fu Wei is not the same as Meng Xi's route. He did not settle in the elders, but chose a large number of outings.

This process allowed him to go to many places in the ancient cold world, experienced a lot of dangers, and was passing by and visited many settlements.

How can it be smooth in the span of decades? And he is alone, there is no support for the entire barbarian, where dare to squat?

Originally, the exchanges of various settlements were limited. I don't know much about the strength of others and what others are good at.

In this case, it is best to be friendly, when necessary – to have a grandson!

In Shen Lang read his memory There are a lot of scenes for grandchildren, which also solved a lot of trouble for him.

It's just how uncomfortable outside. When he returned to the barbarian, he was a former elder, and his age and generation were all detached, equivalent to the ancestors of the human sect.

Not to mention the average barbarian, it is the contemporary patriarch Meng Meng, but also to respect the "elder."

This difference makes Fu Xi back to Shibuya, in front of the barbarians, naturally the style of the high man, do not need him, all others are jealous of him.

If it is not today's experience, Meng Jin will not see this scene. Of course, if this is not the case, Meng Jin himself will still be a super generation patriarch.

At the end of the day, the dragon's claws and the realm of the gods were withdrawn, but Fu Xi did not get up immediately, still squatting on the ground and finished the big pass.

Meng Jin feels that he can't do it, but he also understands that all the elders of Fu Yu put down their dignity in order to save the lives of two people.

Therefore, he did not have any waywardness, and he was squatting with Fu Wei, and he was silently pretending to be a grandson.

Chapter 2504 - Dog and horse

Shen Lang's attitude towards Fu Yu was very satisfactory. After having his memory, he was more aware of this person and better manipulated.

He also has a memory of Meng and Jin. Both of them are in-depth understanding. If you want to delve into it, you can understand your own understanding.

Meng Jin is the patriarch's identity, and all aspects still have the arrogance of the patriarch. But in itself, it is also a person who can bend and stretch, the so-called big event.

And Fu Wei is the first person to be practical!

The wandering outside of the year allowed him to better judge the situation. Once he did not, he immediately surrendered and surrendered thoroughly.

To put it simply, as long as they maintain the strength of the crushing, it is easy to control the symbol, and the symbol will actively cooperate.

Meng Jin is difficult to do a little bit, but in the current situation, there is no part of him to be the master, but he can only choose to cooperate with Fu Yu, or else he is looking for death.

So at this moment, the waves are very reassuring, don't be afraid that the two of them will be reversed.

Don't even worry about them running away!

Because of all the information that Fu Xi has, Shen Lang also has it. As long as they are still in this day, as long as they follow the route of the barbarian ancestors, everyone will come together.

Unless they give up everything, go back in advance.

But now it is impossible to find the transmission array, as if it is a one-way transmission array. If they want to leave, they can only go out, and finally break through the confused forest, go out of the forest, and return to the valley of millions of miles.

In that case, what is the significance of their escape?

It is better to follow them and do them!

At least Shen Lang, they are strong and strong, far better than their barbarians.

Together, the loss is only dignity, and the independent action becomes the embarrassment of the hand. But what you get is safety. You can share a piece of cake and follow the soup.

This point, the pragmatist symbol, is clearly analyzed, and it is bound to choose this.

Shen Lang is also a similar style!

Now this is a special environment. It is his strength with Gao Hanqiu and Dog God. Although he has certain certainty, he is sure to leave safely.

But if you have something to gain from this day, you must let go and explore. In that case, you will be in conflict with more unknown dangers, such as the green monsters, such as the Fountain of Eternal Life.

In that case, uniting more power will be a safer process.

If the dragon is like this, the barbarian is also like this.

Before the demon dragon was conquered by the way of conspiracy, everyone can act together, and now has the first cooperation, is gradually merging, fostering a sense of belonging and tacit understanding.

Two of the barbarians, the value is also not small.

After all, Meng Meng is now much more than his peak. Far from being comparable to Meng Xi, it is stronger than the Hanze mermaid.

Fu Xi is not only inferior to Meng Jin, experience and other aspects are far better.

These two additions are actually more useful than the scorpion dragon in practical terms.

Only the dragon is more pulling the wind, more powerful.

Of course, the two of them can only be a “coercive and tempting” way to unite them together. Once there is no repressive power, or no benefit, the two will certainly run.

But it doesn't matter. Shenlang needs useful people and doesn't mind giving them a share. Nor do they need their loyalty.

“Let's go! Since you can't find your transmission array here, it doesn't make sense to keep it. Follow us to the magic forest to explore the past!”

Shen Lang let them stand up and made a decision right away.

“Thank you for the Lord of the Kingdom of Saudi Arabia, we must work hard to prevent danger in the front!”

Fu Yi, a loyal and **** look, pulled up Meng Meng and made a gesture of rushing forward together.

But now it is still waiting for Shen Lang to indicate a direction. This decision-making power is handed over to Shen Lang.

Shen Lang has just stressed that the decision-making power of this team is not in the dragon, but in him. Now add two more people who have no right to speak, of course, still respect him.

He immediately pointed to one direction!

Fu Wei and Meng Jin immediately took the initiative to open the way.

But this open path is also a situation, and does not need to really do anything.

The dragons followed them behind, which is just a distance from the front.

Shen Lang still returned to the spine, along with the cold autumn, the dog god.

This arrangement allows the dog to continue to maintain a very comfortable state. This shows that it is the same as Gao Hanqiu. It is not an outsider in Shenlang!

The explanation is not because it has value in use, it is important to pay attention to it. This newly conquered dragon can only be their mount. The two updated barbarian figures can only be opened in front of them and are not eligible to come on the dragon's back.

The old dragon is a bit uncomfortable!

“Why... you don't need to give them control of the soul mark?”

It itself is the soul imprint, is controlled by Shen Lang, two of the barbarian, without this treatment, do not need to be a mount – with the barbarian's head, they can also sit on their heads, The shoulders are gone.

Doesn't it seem that it is even lower?

It is a bit uncomfortable in the heart, but it does not dare to directly resist it, so it is still the idea to communicate with Shen Lang.

Shen Lang smiled lightly: “Because they are too weak, they can't compare with you. I want to control you this way because your strength is too strong. If you want to kill me, I have no way. But what are they? ”

“...”

The old dragon was immediately balanced. Although there was no change, the meaning of this sentence has already made it feel a lot better.

No problem! What is the barbarian in the district, why can it compare with its dragon?

Once it regains its strength, no one is its opponent, which naturally makes people fear and fear. And these two barbarians it shot dead, and Shen Lang also shot to help, to be able to get it is also easy.

The freedom that is controlled is already lost. This is what it has accepted before. Self-consolation says that as long as there is no killing of Shen Lang, it means no constraint.

But now it is equal to complimenting its powerful words, and it satisfies its vanity.

Poor it, the Tang Dragon, left a bone, and buried in the barren hills, do not know how many millennia, has long been the courage of the year.

At this moment, if it is only a compliment of the barbarian, it will not care much, but the Shenlang that can conquer it, and so high evaluation of it, will make it satisfied.

In the cold autumn next to it, it is a bit surprised.

Because he always maintains a hint of guard against the dragon, it is very subtle and will not be discovered. He just felt that the dragon seemed to have emotions. If you think about it, you can guess one or two.

Unexpectedly, the mood of the dragon became very good. He could guess that it should have passed with Shen Langgou, but he did not know what Shen Lang said to him, and let it change his mood.

Chapter 2505 - river

Fuxi and Mengjin both opened the road ahead. Even if they got the direction of Shenlang, they did not dare to go too fast or too slow, but they always understood the footsteps of the giant dragon behind.

They must adjust their speed according to the speed of the dragon and maintain a stable distance.

Although the distance between them is less than a few tens of meters apart, it is actually making them feel the pressure, because the dragons can attack them by raising their claws.

But even if the man is on the back, you must maintain this distance, you must have a sense of cooperation.

At the same time, they finally have a chance to communicate secretly.

Basically, Fu Wei gave Meng and Jin a psychological construction, letting the patriarchs put down their humiliation and accept the reality, so as not to burst out when they could not resist.

Meng Jin's self-examination is difficult to do, but the grandson who is silent can still do it. He also has some respect for the sacrifice of Fu Xi.

So ahead of the road, for the barbarian two, it is still strange, even if there is a lot of information about the demon forest in the stone inscription, or even a general map, but it is also a large-scale rough sketch.

For details that are specific to a few hundred meters, they are completely unaware of it. They can only observe while watching and looking forward.

Shen Lang is because of the memory of the old dragon, there are more direct details for the Tianmo Lin.

However, Laolong is not aware of the ancient memories of thousands of years ago. Many mountain and stone trees have changed a lot.

Besides, when it first went, it was a domineering rampage. It didn't pay much attention to the environment. Later, it was covered with green little monsters, and it was desperate to escape. It was also a matter of mind.

Therefore, the details of the surroundings are also vague. Shen Lang can still search from its memory because the dragon is strong, even if there is no special attention, some are recorded, but it does not care.

Shen Lang now has no intention of chatting about anything, but a high concentration of mental power.

The information of both the dragon and the barbarian adds up. In fact, they are only an overview. They are far from detailed, and they are all ancient information. Everything may change.

For example, a powerful beast that once lived in a certain place may have already died; or a weak beast has grown into a super beast.

These all require the current random strain.

So go further, you can feel it, the fog is more intense, and the range of the sensory measurement is shortened again.

The goal of Shen Lang's choice is that ridiculous land, to find the spring of eternal life.

But now, for the sake of safety, I have to let the speed slow down a bit, not rushing for a while.

The change finally appeared!

In front of them, there is a river, the scope is not big, it looks like it is only a few tens of meters. But look at the opposite side of the river, but it is already awkward.

If you don't see the opposite, it's that the river is at least a few hundred meters wide, but now you can see the opposite, just a few tens of meters away, but the opposite is even more embarrassing.

This situation, let Fu Xi, Meng Jin two naturally stopped, Shen Lang is also to let the old dragon stop.

There must be a big change in the opposite, perhaps on the other side of the river, the fog is further rich, and the visibility is even shorter.

What makes Shen Lang feel bad is that in the barbarian stone carving content, there is no mention of this river. In the memory of the dragon, it is also faintly not going through such a river.

But this may be a change, or it may simply be ignored. Because tens of meters is nothing compared to any strong one, it is a river that is insignificant.

Unless it is like a wild river like the Tianhe River, the width of the river reaches more than ten miles, so that the strong people can pay special attention.

It's just here, whether it's Shen Lang or each of them, there is a feeling that this river is not simple.

It's just that no one can say what it is because of it.

“Fu Yi, Meng Jin, the two barbarians, it is time for you to go through the fire!”

Shen Lang slightly ridiculed the ridiculous sentence, indicating that the two of them first experienced the situation of the river.

Fu Xi and Meng Jin are a bit embarrassed.

Fu Wei was at the time to say it well, in order to win the letter. If you are in a dangerous situation, you will naturally hesitate.

But the problem now is that it just doesn't feel simple, I don't know if there is any danger, or whether it will be dangerous.

If you dare not go at this time, it is really difficult to cross. After returning to surrender, this is just a way to open the road. This is the first time they want them to lick.

“I come!”

When Fuxi was still hesitating, Meng Jin called, and then jumped to the other side.

Under the opening of Fu Xi, Meng Jin did not protest anything, and he was also honest with him.

But in the depths of my heart, after all, there are still grievances and shame.

At this time, he was forced to explore first. It was a detonation. He couldn't resist, and he took the initiative to take risks. With a little pique, he also wanted to prove his strength.

After he spoke, no one persuaded him, but Fu Xi also gave him a modest.

The barbarians in Shibuya, like the forty and fifty elites they saw last time, all have a head of more than ten meters, but when they run between the cold, they will compress to two or three meters, which is more convenient and flexible. .

The same is true of Meng Jin and Fu Yu. This kind of head makes him want to cross a river of several tens of meters, which is a simple leap.

At the moment when Meng and Meng started, Fuxi did not humbly fight for it, but he was prepared for defense and response. If there is any danger in Mengjin, he recently rescued at the fastest speed.

There is no doubt that he does not believe in them!

Shen Lang and others, attention is also on Meng Jin's body.

Seeing him jump to the middle of the river, but when he went to the other side, the people disappeared!

In the absence of a clue, everyone's defense, that is, opposite, there are no strangers in the river, etc., or there will be any natural accidents.

But after just halfway through, the whole person disappeared, not falling in the river, nor appearing on the other side. This is abnormal.

Everyone's first reaction, I think this is a space gap, a transmission array and the like, sending people to other places, or entering a small space.

This state is not swallowed up by a river, but it has disappeared, but it may have another chance.

Therefore, I am not too worried about applying for the test. Then they have to decide each other, do you want to follow in?

The decision-making power is here at Shenlang, and everyone else is waiting for the arrangement of Shenlang. Fuxi is more concerned.

“What is the situation?” Shen Lang’s words, let everyone’s attention go back to the river along his eyes.

The result saw a scene that surprised them!

Chapter 2506 - Mirror space?

Meng Jin, who has just disappeared, reappeared above the river!

But his appearance is very weird. It seems that there is a dividing line in the middle of the river. He is on the side of the dividing line and wants to come back here, but it seems to be blocked and cannot return.

Fu Wei just hoped that Shen Lang decided to go over with everyone, because he was worried about Meng Jin.

Generally speaking, there will not be too many problems, but they are also afraid of accidents.

And now, seeing this situation, it seems that there is an accident...

Meng Jin seems to be blocked by the invisible wall, and can’t come back there!

One-way transmission array?

One-way transmission is very common, whether it is a transmission array or a space crack, just as they come from the barbarians. Shen Lang, they came to this world again and again through the golden dragonfly. This is true.

But that is basically impossible to find a route to go back.

But now Meng Meng, it seems that it is not in a different place, and can not find the way back, to see his situation, is on the other side of the river.

It seems to be crossing the river, but there seems to be a glass-like invisible wall in the middle of the river, so that people who have passed can no longer come back!

Everyone came here all the way, there is a big direction, the specific details are a bit random here.

Just Meng Mengxian tempted, if there is no danger, then continue to cross this humble river. What troubles, everyone has another detour.

But now, in this case, Fu is naturally going to see what is going on.

However, the decision-making power is here at Shenlang. He still has to get the decision of Shen Lang. It is that Shen Lang decides to take the road, and he will also ask for it.

“Let’s go!”

When Fu Wei’s eyes were still not spoken, Shen Lang had already waved his finger.

This is the command of the dragon to step past, but listening to the ears of Fu Yu, it is a secret to breathe a sigh of relief.

He is a practical person. If you have to choose, follow Shen Lang and others, it is safer and more correct than to take risks to save Meng and Jin.

But as a member of the barbarian, he still can’t give up the patriarch of the barbarian!

Life is expensive. If it is just an ordinary barbarian, he will not sacrifice because of his fellow men. But Meng Jin is a patriarch, whose identity and meaning are different.

Now the words of Shen Lang have avoided his unspeakable opening and avoided his decision.

Moreover, he can feel that the owner of the sand country can understand his mood. The reason why he decides at random is not to wait for him to plead, but to give him a little more face and respect.

Of course, gratitude is grateful, old people like him, various concepts have been finalized, it is impossible to sincerely surrender to the waves because of this.

It's just that it's going to be more friendly now, and it's more willing to be a pawn. When he is in danger, he will still consider himself first.

Shen Lang has already commanded the dragon to step in the past, and Fu Wei is of course rushing forward one step earlier.

There are Shenlangs who have passed together. If there is any danger, the coefficient will be much lower. And visually, Meng and now are only trapped and not in danger.

When Shen Lang made a decision, he informed Gao Hanqiu and the dog **** to keep them on alert.

The more confused this situation is, the more surprised it is.

If you can see that there is a natural danger, or a demon or something, then it is better to say that nothing can be seen, it is even more dangerous.

The first step of the Fuxi has passed, and the dragon has also strode across this strange river.

They are on the dragon's spine, almost half of the body, and they still pass the dragon head.

I couldn't feel any abnormality in the front and I have waited for the middle line of the river.

After the middle, Shen Lang can see the first encounter, and Meng Meng, who came earlier.

Meng Jin is floating in the middle of the river, just like he saw him on the other side. Fu Wei is also now, it seems that Meng Jin is communicating with him first.

The body of both of them is not small, and the dragon's cockroach is bigger. After coming over, it is necessary to step on the shore and then turn over.

“It’s very strange here. When I just crossed the river halfway, I saw you on the other side! Then when I landed, I couldn’t see anyone, and I wanted to go back, but I couldn’t get through.”

Meng Jin also loudly counted his findings.

At this moment, the dragon dragon has landed, and turned around, watching the two barbarians above the river.

It doesn’t need to step past. It only needs the dragon head to go forward and feel it. Just above the river just coming, there is an invisible existence of the copper wall and the iron wall directly blocks it.

The cold winter has already waved, and there are objects of different hardness immediately on the shore. Leaves, branches, and stones are thrown across the river at different gravity and speed.

But when they reached the middle, they were all blocked by the invisible walls and then fell into the river.

Meng Jin is keeping the middle of the river. He wants to try to go back. After Fu Lan came over, he was also with him.

Now everyone has come over, and then see the experiment of Gao Hanqiu, it is verified, not only living things, but also the wood stone can not penetrate.

They also fell back to the shore and observed the situation ahead.

Meng Jinyi raised his hand, pulled up a tree, and then went over to the invisible barrier in the middle of the river, constantly exerting strength to see if there was any change.

Others are observing the situation around them and then waiting for Shen Lang to speak.

Gao Hanqiu and the dog **** are accustomed to taking Shen Lang as the center, while the old dragon is just the leader of the bones. It has no effect and is a bit puzzled.

Fu Wei is because Meng Jin is already busy he does not need to do the same thing again.

Shen Lang did not move, because the dragon dragon smashed into the past, it is already a great force, it has no effect, trees, stones or something, no meaning.

He has seized a key point. Meng Jin said that just halfway through, he saw that they were on the other side, but there was no trace in the past.

On the other side of the bank, they are now on the shore, but they were based on the present. To be here, in addition to the illusion, there is another possibility – mirror!

If the invisible barrier in the middle of the river is a mirror, the effect of the reflection is as it is on the other side.

Once you break through the middle line, you can't see it, and you can't go back. Is it a strange state? Is Meng Meng actually entering a space like a mirror?

With this idea, Shen Lang quickly passed the Holy Grail and checked the picture around him.

The result is a testimony, and now they are on the shore, and the situation just came across the other side is almost exactly the same!

Chapter 2507 - Mirror mystery

This is in the same place, the river is not much different on both sides, it is also very common, generally not carefully identified, visual inspection is easy to feel the same.

But for the Holy Grail, it is the recorded data to speak.

The result of the comparison to Shen Lang is almost the same, not 100%, because it is a little different.

A little bit of leaves, branches and stones in the cold autumn, it is in the error range, there will be no obvious data impact, but Meng has just pulled a tree, the contrast is obviously a little different.

But this ratio is extremely low, and it is directly understood that it is because of the impact of the tree.

So it is equal to the result of the testimony. Now they are in the same place, just like the original opposite shore, is a mirror!

“The front line of the river is a dividing line, and we have entered a space similar to the mirror.”

“Space in the mirror?”

The words of Shen Lang caused two reactions.

Gao Hanqiu was amazed, while others were puzzled.

The world of giant beasts, barbarians, and dragons may not have mirrors. Naturally, they did not understand what kind of situation is in the mirror.

“It’s a reflection. We are close to the water, we can see a reflection in the water, the world inside is exactly the same, but reversed.”

The simple analogy of Shen Lang explained it and then pointed to the front.

“That is what prevents you from going back. It’s like a layer of water. We are now in the world of this reflection.”

Listening to the description of Shen Lang, there are scenes on the scene. When they look inside the river, they understand how this is a situation.

With everyone’s wisdom, I immediately understood how a mirror reflection is.

Then they are silent.

The reflection of the water surface, they have all seen, people can not enter, and when the touch of water fluctuates, they can not see the reflection.

But what I encountered here is obviously not so simple. There is a strange thing in one layer that allows everyone to come in, but it can't go out. All that is seen inside is the existence of the image on the other side.

Although it is speculation, but listening to the tone of Shen Lang, everyone feels that he should grasp a lot.

Ever since, everyone has looked over and see if he has any way to crack it.

In Fu's mind, I also thought about the contents of the ancestors' moments, but it seems that there is no mirror space.

Gao Hanqiu is also silently thinking about it. He knows the mirror. Follow this idea and think about whether there is any way to leave.

"If it is really a mirror space, it can't be infinite. In theory, we just have to go out and just circumvent it."

Shen Lang said a faint sentence.

Everyone listened very speechless.

Isn't that nonsense?

Even if it is not infinite, who knows how big? The scope of the visual inspection is now the same as the opposite, and farther away?

And now the situation is obvious, there is no obstacle outside, you can enter directly. Without the invisible barrier, I don't know where it is the entrance to the mirror space.

Inside, the middle line of the river is a separation, and it is no longer possible to go out from here.

The dragon has tried it, and the cold winter has been tried. Meng Jin has tried many levels, and now he has given up that tree.

The calmness of Shen Lang is from the door of the Three Realms!

Having an ancient artifact is a great reliance on him to come to the Tianmo Forest. As long as he can use this magic weapon, no matter where it is, no matter how dangerous it is, it will leave.

This is also the reason why the Barbarian transmission matrix was not concerned before.

Now in this mirrored world, as long as he is willing, you can use this new three-door door Kunlun mirror, with everyone to send it out.

The problem now is that he encountered such a mirrored world for the first time. There is no further clue in the memory of the dragon and the barbarian.

So he wants to personally understand and see how this is an environment, how it is caused, and how to leave.

Because he thought of Hanze Xianbei, would this be also an artifact, a saint and the like?

For example, what is a mirror artifact, it is such a space. They just entered the entrance to this artifact.

If this is the case, then it is not only necessary to figure out, but also to find a way to collect it!

“It’s easy to go out, but now I want to explore the situation around.”

After Shen Lang finished speaking, he flew away from the dragon’s spine.

Everyone heard that he said that it is simple, they are a little disbelieving. I felt that I was worried about being trapped in any special scene. I heard that this is a mirror world, and it is even more difficult to imagine.

Looking at Shen Lang now, I feel that he has no choice. He has to say a simple sentence to save his face. In fact, he is looking for an exit.

The two barbarians are also scattered, to observe and look for exports, and not to push hopes on the Lord of the Kingdom of Sand!

The dragon is because the body is too big, and it is not easy to move around, just standing on the shore.

Gao Hanqiu and the dog **** are absolutely convinced of Shen Lang, but since Shen Lang wants to explore the surrounding situation, there must be his truth.

So they also explored, although they didn't know what to explore.

Shen Lang will soon have a result!

A few hundred meters from the shore, they are all foggy mountains, and the other side, except the mirror image, is exactly the same.

Including the traces of their coming!

Shen Lang and Gao Hanqiu and the narrowed dog gods, when they are on the road, they will not leave any traces. But now it is different. Everyone is slow. The barbarian's body is big and it is no longer a flight. It will naturally leave traces.

Not to mention the dragon, its physique is so huge that when the body passes, many branches will be crushed and the ground will have obvious paw prints.

Shen Lang now goes directly to the "coming road" and can see paw prints, but the body moves forward and can't sense more space!

After a few hundred meters of this foggy area has been explored, it is basically the end. In front of it is a smashing I can't see anything, and I don't feel anything, as if it is a margin.

"This is over?"

Gao Hanqiu is not next to him, but the scope is so big, not far from each other.

He tried again with stones, branches, etc. The place in front of him was another barrier, and these things were blocked.

Shen Lang nodded, and he already had a rough thread in his heart.

“Not much here! This is the end!”

Meng Jin and Fu Wei, also searched in different directions, and they immediately came to an end.

This is also the case with the dog god.

Because of the large size, the old dragon did not move, fearing that its movement triggered some clues, but did not expect them to end up so soon.

It looks like a cage surrounded by it. Where can I call the space and the world!

Chapter 2508 - I will take 1 step first.

Everyone was very frustrated, and I was very worried about the situation I didn't understand.

Now that I found a range of a few hundred meters, the pressure is much less, and even an inch-inch search can flip it over.

In the past moment, I also felt that Shen Lang had to bluff the barbarians, and I had to admire them.

It seems that people have discovered this problem first, so they are so sure!

Is the Lord of the Sha State the first to run to the edge?

Then they immediately came together and listened to the opinions of Shen Lang.

“The Lord of the Sand State, do you have any findings?” Fu Yu's humbly ask for a sentence.

Shen Lang took them back and returned to the dragon's back bones.

"This mirrored world is not a big world, or space, it may be inside an artifact!"

When I said this, I was amazed by everyone. It turned out to be inside an artifact.

Even if they find a small range, it is not surprising that it is like entering a cave. This cave can be very large or small.

But even said that this is inside an artifact, it is difficult for the barbarian to imagine.

The dog **** is waiting for Shen Lang in Xianbei, and there is a sense of the same.

After Shen Lang finished this sentence, he did not pay attention to whether they could understand and continued to tell his guess.

"This artifact should be a mirror-like object. I estimate its characteristics. It is everything that can replicate the scope of the vision, forming a mirror world."

"Copy everything in sight?"

"Is this not to create a world out of thin air?"

Gao Hanqiu and the dog **** did not doubt the saying of Shen Lang, Fu Xi and Meng Jin, could not help but be shocked.

What kind of artifact is this, even if you illuminate it, you can create a world out of thin air!

Shen Lang is too lazy to explain so much to them. Although he is only a personal guess analysis, he feels that the possibility is very big.

For example, the Holy Grail can create a vivid picture through virtual reality technology. In addition to the absence of real objects, seeing is completely indistinguishable from reality.

That magical magic weapon is even worse. The real fantasy of the present is that even the powerful comprehensible can be blinded. Just like Meng Jin and Fu Wei are so powerful, they are blinded by a moment.

This is the characteristic of this artifact, and it is not impossible to do this.

For example, after entering this area, everything is affected. Even if it is not necessary to create the world out of thin air, the influence in this mirror is completely an illusion. As long as it can be touched, destroyed, etc., people without experience in this field. How do you tell the truth?

For ordinary people, fantasy, virtual pictures, etc., even if they are realistic, they know that this is a fake. But what if you are dreaming?

It often feels real, because in that state, the ridiculous scene, the consciousness feels normal, and all experiences are real feelings.

Of course, there are some people who can realize that they are dreaming, but it is difficult to wake themselves up, or wake up, but it is just a dream in a dream, actually in a dream.

Besides, this ancient cold world has many incredible conditions, which cannot be shared with other world logics.

For example, the cold fire can not be explained. Can have the existence of Xianbei, and another mirror artifact, even if the real illusion replicates a world, it is completely normal here.

“The reason why we explored it, the scope is only a little big, because there is fog, the range that can be irradiated is limited, which is almost equivalent to our visible range, or the scope of this fog barrier.”

“If you change a place, for example, in Shibuya, you may reflect a great space!”

When Shen Lang continued to speak, Meng Meng and Fu Wei were shocked.

It's incredible to create a world. It's still completely different. The larger the range of illumination, the bigger the world can be!

The idea of Shen Lang makes them unbelievable. But they did not have a better analysis of themselves, and the rhythm has already completely followed Shen Lang.

So no matter how absurd and bizarre, their hearts are beginning to be more inclined to be true!

"Then we... what should I do?" Fu Xiao smiled.

It's hard to see the brutality of the barbarians. It's even more ugly.

Shen Lang smiled and said: "Go out!"

"How come out?"

Meng Jin did not say good.

Is this not nonsense?

Originally everyone is trapped here, always thinking about going out, the problem is not knowing how to go out!

"I will take a step first."

The words that Shen Lang followed, let them both glimpse.

What do you mean?

The Lord of the Shah State has a way to go out?

They did not believe it. Although the direction of the inspection was different, we can see that everyone has no gains. The Lord of the Shah State only had a direction of speculation and did not find an exit.

And if you want to go out of violence, it is just the dragon's faucet that has passed, and it has no effect.

There is an idea in Meng Jin and Fu Yu's heart: If you can really go out, Lao Tzu will serve you!

But they are even secretly scornful, do not believe that Shen Lang can really go out immediately.

Of course, now he is in control of the decision-making power, is the head of everyone, and on the same boat, they are not easy to directly vent their morale.

"You wait first."

The sentence of Shen Lang seems to be casual, but it is mainly aimed at the cold autumn, the dog **** and the old dragon. As for the barbarians, the identity is different. It is the descendant of the service and there is no partner treatment.

After that, after waiting for the high cold autumn, they agreed, and they felt a slight space fluctuation.

When everyone concentrates on the past, Shen Lang has disappeared!

"He, he... actually went out?"

Meng Jin couldn't help but mutter up At this moment, he felt that he was in front of Shen Lang, like a weak person, a childish person.

Originally, he was the number one person in Shibuya. The patriarch of the barbarian was a level with the king of the sand country. Even Shibuya was bigger than the sand country. He should be a higher level.

So when I was in Shibuya last time, even if he was greatly discounted, he even felt embarrassed when he first met, but he still maintained the attitude and momentum of the patriarch.

But this time in this day, in the magic forest, he did not know how many times he was stronger than a few days ago. Not only did he not take the slightest advantage, but he felt that the other party was getting farther and farther away!

It's not just the two of them, it's the old dragon. It's also a surprise to Shen's sudden departure.

It just got a clearer feeling. I probably know what method and how to leave it. In surprise, I have to take it. This man-made means surpasses his imagination!

Chapter 2509 - Lock target

Gao Hanqiu and the dog **** know that Shen Lang has left in any way. They don't have to worry that Shen Lang will leave them alone. If they want to come in again, they can do it.

But this time, the eyes of the barbarian two have come over, the dog **** is now a puppy, directly ignored, attention is here in the cold autumn.

Although the old dragon did not look at the naked eye, it was obvious that his attention was also here.

“Sand...Sand...predecessors, don't know the king of the country, will come back and take us out?”

Fu Wei does not know how to call the cold and good autumn, just to see that he is far older than Shen Lang, the strength is not inferior to the Shen Lang, can be taken out of the door, must also be extremely high in the sand country.

So even if he lived a lot of old barbarians, he still called Gao Hanqiu a predecessor.

“Reassured. We wait patiently, and cooperate if necessary.”

Gao Hanqiu responded faintly to them and then pointed to the front.

They are all on the shore, because there is no way for the river to go back, so they don't look at the river again.

At this moment, with the indication of the cold autumn, everyone paid attention to the past, and immediately saw the other side of the river, there is a figure, is it just a wave?

Just after the Shenlang disappeared, it was only a guess that he left, even if he was very determined to take a step.

Now I see that it is indeed on the original side, outside the mirror world, Fu Xi and Meng Jin, is the real confirmation, the Lord of Shaguo really has a way to easily leave!

They could not help but sigh secretly, the owner of this sand country, unfathomable!

It is no wonder that people dare to go to Hanze, Shibuya, dare to come directly to the Tianmo Lin, which is supported by strength.

Meng Jin is experienced. He can see the outside here, but he can't hear the words. He can't speak here, and they can't cross the invisible barrier.

So don't do anything useless, wait for peace of mind, and then observe the situation outside the mirror world. If Shen Lang has any action and asks them to cooperate, they can cooperate immediately.

The sinking waves at this moment have already arrived outside and returned to the river bank before.

He now looks at the past visually, or as he just did, he simply saw a river of tens of meters and then smashed the other side.

That is to say, if the person in the mirror world does not approach the edge of the dividing line, it seems to him that he is blind and can't see the details of the other side in the mirror.

But he knows that people in the mirror should be able to see him.

And now I have a bottom in my heart, knowing that there is such a presence in front, whether it is a small world entrance, or a spiritual thing, an artifact, so that he has already understood.

When Shen Lang raised his hand, some water in the river flew up and then quickly vaporized!

Originally there was fog around, and now these vaporized water mists are immediately integrated into them. Although they are obviously thicker, they have not achieved a good observation effect.

Shen Lang slightly frowned, and then all of them were dispelled.

Then he passed the holy armor and released some smoke.

The sacred armor is for signal storage, it can be used in a variety of colors, or it can be concentrated.

The smog that is now being released by Shen Lang is the red smog. When the smog is released, he manipulates them to drift away.

This is a test to test the entry range of this mirrored world!

Like the shore around and behind the shore where Shen Lang is now, there is no problem how it can be dispersed. If you go further, the middle of the river can also be dispersed.

But when it comes to the dividing line, the diffuseness enters the mirror world, which is the disappearing effect that they presented before.

Shen Lang, they have just paid attention to it, but they can't sense the specific boundary line. Even if they have a goal in mind, they just know one.

This is equivalent to a transparent, invisible entrance, so he needs to use this colored smoke to achieve the effect of this test.

Shen Lang's knowledge of the gods and the sacred armor are all working. With the effect of the red smoke, the invisible entrance is quickly outlined.

This is indeed a range of a few hundred meters, and then spread to the side, the red smoke can continue to spread, which means that it is a normal mountain.

As for whether it is purely coincidental, or a hunting layout with spiritual artifacts and spiritual objects, it is temporarily unknown.

Shen Lang personally prefers the latter case.

Because they are riding dragons, to the huge body of the dragon, the range of a few hundred meters, to be aligned, must be very clever, or else it is a few steps away from the side, may be staggered .

If it is such a existence, and they are hunting as prey, then this invisible entrance can be positioned according to the goal of their movement.

They come here, they appear here, they go on the other side, they will be on the other side.

After Shen Lang locked the scope of this “entry”, he immediately made further inferences!

Because he first analyzed that this might be an artifact or a spiritual thing, so what you need to do now is to find out where it is.

If you can’t find it, then it’s possible that this is a small world.

Combined with the possibility that this is an analysis of their hunting, the space of this large piece is directed at them. Normally, it will not deviate.

Whether it is a circle, a square or an irregular shape, the existence of this mirror should be in the middle, not the division of the left, right, left, and right.

But now it is presented on the front of the river, below is the river, then below is the earth, normal people will not enter below, there is no need to arrange.

It is also not presented in the air, the biggest possibility is in the middle of the lower part of this mirror!

With these analyses, Shen Lang's gaze locked into the middle area.

His people are not close to the past, and their eyes are still observing the red smoke changes, but the gods are paying attention to the one, and the holy armor is also pushing the close-up there.

How deep the river is, and it has not been tested.

After entering the mirror world, Meng Jin is also floating above the river, but did not dare to step on the river directly.

At this moment, the focus is on the bottom of the water!

Originally came to the river, even if it feels a bit wrong, it will be wary of whether there are strong beasts in the water, and will not pay attention to some small, dead things and the like.

Now that there is a specific goal, Shen Lang is targeted and deep, and immediately has a different discovery.

On a stone in the water, a mirror-like object is placed. If you don't have a targeted understanding, even if you see it before, you will only feel that it is a flat stone and you don't pay attention.

Chapter 2510 - Mirror disappears

After discovering the trace of this thing, what Shen Lang is doing now is how to collect it!

Until now, everything has been just a guess, and there is no real verification.

For example, whether this flat stone is really a goal is only a suspect.

For example, is it a spiritual or spiritual artifact?

Is it an autonomous hunting, or is it accidental to wait for a rabbit?

Shen Lang did not go straight, but searched in a way that did not reveal traces.

Now that the target has been locked, how to take it over will still need to be carefully considered.

If it is a spiritual thing like Xianbei, it is possible to run it yourself.

They are still in this mirror world. If this thing ran, and did not catch up, it would be more troublesome.

Therefore, Shen Lang must now have to counterattack it in one fell swoop!

At this point his state has reached its peak and treated this as a powerful opponent.

Before he was ready to go, he had already used the field of God first, from the front, slowly spread out, until the river.

Control the river around the “flat stone” and quickly lock the past!

His cautious approach is to treat each other as something that will start and run.

When the field of his ***** controlled the flat stone, the man had already reached the river, and above the water, he directly controlled the flat stone.

What makes Shen Lang a bit surprised is that he is attacked by the whole god, and the flat stone is really like a stone. Don't say that he didn't run away, he didn't move, and he was not controlled to struggle!

This situation, let him also be a moment of shaking, is it a table of wrong?

This is a stone, not a spiritual thing, an artifact?

However, his control is not relaxed at all. The rapid contraction of the field of God has just been paved from a large area around it to avoid the other side running.

After it has been successfully locked, search the range immediately to increase the intensity, and then take the stone out of the water.

He has seen the existence of the Deadwater River, and has seen countless flying fishes. It is an ordinary river in this strange Tianmo Forest, and can't wait for it.

In particular, there has been a situation here, knowing that there is no problem with this river?

So this is controlled by the realm of the gods, and it is taken out of the air.

When this flat stone appeared in front of Shen Lang, he also carefully observed all aspects of the focus and angles.

At this time, the holy armor gave a hint, the direction of the slight negligence of Shen Lang – red smoke.

Just after he released the red smoke through the holy armor, and let the holy armor monitor the details in detail, in order to determine the specific data of the entrance.

When the red smoke enters the mirror world, if he is close enough, or has other conditions, he can be reminded in time.

Later, he has determined the scope of all the entrances, and locked the target, naturally there is no need to pay attention to the situation of red smoke.

However, the red smoke has not completely dissipated, and the holy armor still maintains detailed monitoring.

Just when the attention of the waves was on this flat stone, the holy armor suggested the spread of red smoke!

Shen Lang has a glimpse of the content of the sacred armor, as well as his own knowledge.

What is the situation in the end, it is already clear to the heart!

Originally, the red smoke has been determined, and after that boundary, it will disappear.

But now, the dividing line is gone, and these red smokes have not disappeared, but continue to overflow into the space behind the original dividing line.

Because this range is not small, the large area has a different appearance, so that the holy armor has a hint.

This also means that a situation has arisen – that entrance is closed!

When the entrance is closed, the mirror world can't enter. The red smoke that had disappeared just entered the mirror world, and it is still in the current space.

This change is because the flat stone is moved, which means that the target is not wrong!

Shen Lang has made a certain point. This change is equivalent to a side proof that allows him to take the flat stone directly into his hands!

He must speed up, what kind of changes will happen in the mirror world, and he knows nothing outside. If it's just the entrance, it's still the same, it's better, waiting for him to open the solution.

But this mirrored world, if it is copied or illusioned by illuminating the real world, is it not irradiated now, will it disappear directly?

The disappearance of the entire space, all the rivers, trees, and land that appear there will disappear, and what are the people inside?

To this end, Shen Lang must be clear as soon as possible.

The key point is in the palm of your hand!

He has been in the process of ingesting it, he has observed it in all directions, and does not feel that it has life, not like a spiritual thing.

So I will start with it directly, and through personal contact, the exploration of consciousness, to understand what it is.

This stone-like thing, after reaching the hands of Shen Lang, feels like a stone. It is like a mirror, because it is very flat, and actually does not see a bright mirror.

But Shen Lang did not give up, because the mirror is just a description, such an object is not necessarily the same shape.

What I can't see on the outside is already in his expectation. What he has to do now is to go deep into the inside!

He is injecting vitality into the palm of his hand, and his mental power has invaded the past. At the same time, he has firmly controlled it in the realm of the gods to avoid any demon moths.

This is a well-prepared two-pronged approach. At this time, the mental power he just invaded into, as if suddenly a black hole crazy to draw in general!

This originally stone-like thing reveals its fierce other side, not only will it not be explored by Shen Lang, but it will directly engulf his spiritual consciousness completely!

In such an instant, the consciousness of Shen Lang suddenly had some different feelings.

He seems to be a huge space, and it seems like a huge space in his body.

This space presents the world that I have just entered, but it seems that it is only a small corner.

Immediately, it seems that you can see the people like Gao Hanqiu, they seem to have a bit of panic.

For such an instant, he seems to have entered another state, as if he would sleep and sleep, the whole consciousness is blank.

Shen Lang is a pin-up, and quickly wakes himself up!
