

First Strong 2531

Chapter 2531 - Real thought

The Forest of Shadows, this is a name taken by the barbarian ancestors.

The name comes from the image. According to them, it is in the depths of the Tianmolin, there is a dark forest, which is probably the center of the Tianmulin, and there is a place where the demon exists.

Because the ancestors of the barbarian, even the first ancestor, could not travel through the magic forest, and the fog would isolate the gods, it was impossible to grasp the overall situation.

Among the Tianmo Forest, there are many strange places like the confused forest. It is already difficult to get away without being lost.

So the forest of shadows is only a guess that it is probably the center of the demon forest. As for the life of the demon, this should be confirmed by the witness.

This shadow forest, Shen Lang said before the analysis of the memory, is also concerned about, but not listed as an alternative target.

On the one hand because it is very dangerous.

Although there is no danger in the information recorded in the stone inscriptions, since it is very likely to be the most central and there is a demon, it represents the dangerous coefficient.

On the other hand, there is no record of any good things.

Shen Lang will resolutely go to the ridiculous land, because the fountain of eternal life, because of the things that make the dragons fascinated, this is worth the risk.

This shade of the forest, it is not clear what is worth his adventure, it is not considered.

In the memory of Fu Yu, his plans did not go to the forest of shadows, the reason is the same. Everyone is safety first.

Now Fu is the proposed forest of shadows. What is the purpose?

Don't think too much about it, in case they want to kill someone by knife?

Shen Lang just repeated it, and did not immediately make a statement, Fu Xi quickly pondered the meaning behind.

This surprised him.

I was originally interested in making suggestions, and I wanted to win the attention of the Lord of the Kingdom of Sand and prove that I have more value.

If you are mistaken for ulterior motives, then it will be counterproductive and will die faster.

“Respected Lord of the Kingdom of Sand, please listen to me... analysis.”

He originally wanted to say “interpretation” and immediately changed his mouth.

If you say “interpretation”, it is a misunderstanding, and you are ready to explain, do you prove that you have ulterior motives?

Switching to “analysis” is much more natural and can be pretended to be a misunderstanding without finding each other, just as a supplement to your own suggestion.

“We didn't plan to go to the Shadow Forest because the description of value and danger was not enough. It was not suitable for exploration, but it was definitely the most special one.”

“The place we went to is also a special existence. But there is nothing to gain. If you continue to go to other places, it is very likely that the harvest will be limited.”

“So I think, if we go directly to the most dangerous place. The shadow forest, since it will be in the deepest and most central place, there are also demons to survive, there will be a lot of treasures.”

“There is another very important point...”

Explained here, Fu Yan reveals a sincere expression, and this continues to be said.

“In the beginning, we only had two districts, and our strength was limited. We dare not take the risk to challenge the highest difficulty! It is not the same now. There are super-existence like dragons, and the countries of the sand with wisdom and strength coexist, far better than us. You should not miss the opportunity.”

Not to mention, when this is said, it is Shen Lang, and it feels quite reasonable.

The plans in Fu’s memory are naturally planned according to the two of them.

Now it is not two, but six, and the strength has doubled!

The place that I didn’t dare to explore is now fully qualified to find out.

As for whether there is any interest, there is no heavy treasure, in the end it depends on luck.

If it is only a high-grade medicinal material, it is nothing. If you search carefully, you will have the opportunity to pick it everywhere. There is no need to go to the Tianmolin, and some other settlements are also cultivated. There are also many mainland China.

Come here, of course, is to find a unique treasure.

Shen Lang originally did not have a specific goal. The whim came to the Tian Molin, purely because of the longing for the Tian Molin in Meng Jin’s memory.

Now that you have more information, you have choices and analysis.

Seeing Shen Lang's gaze come over, Fu Wei realized that he had not fully persuaded the other party, and perhaps he still had doubts about him and quickly clarified his position.

"The lord of the reputable kingdom of sand, you are the lord of the sand country for thousands of years, and with the help of such predecessors and beasts, and even more dragons, this is a team that is unmatched in the past!"

"We are both limited in strength and willing to follow one another and contribute a little meager strength."

"Of course, the Shadow Forest is just an immature consideration, and you need your check. You must consider it more carefully."

When it comes to this, he has nothing else to say.

The explanation, the compliment, and the dodge, have all been made clear.

Now wait for the other party to decide. If you decide to go, it is his wish. The consequences can not blame him, decided to go to another place, his just a statement, also proved that he is worth thinking.

Shen Lang has been staring at the eyes of Fu Xi, through the big eyes, directly through his heart.

Not only to prove his value, they also hope to come through the Shadow Forest!

If you go to a place where there is more information, the final harvest will definitely be taken away by Shen Lang because their barbarians have no right to speak.

The Forest of Shadows is mysterious, dangerous and unknown, and what is there is also unknown.

In this case, the opportunity for everyone is equal. What you can get depends on chance and luck, not on strength.

Even... If the environment of the Shadow Forest can make everyone dark, it is a good opportunity for them to escape!

After leaving the team, they are not necessarily safer but at least more free, no need to reload their grandson. It's also your own, and you don't have to wait for someone else's charity.

From the eyes of Shen Lang, Fu Wei also saw it – the other party understood his true thoughts!

This made him a bit embarrassed, but since neither side has broken it, there is still room for manoeuvre.

“Okay, go to the Shadow Forest.”

When Fu Xi thought about the countermeasures, I did not expect Shen Lang to directly agree.

This made Fu Wei a little surprised, and then he heard Shen Lang add another sentence.

“Lead the way! I don't know more than you. On this point, I believe in your judgment.”

Not only promised, but all gave him to lead the way.

Sudden trust, let Fu Xun's doubts, will this be the desire to engage him?

But can he resist anything? Can only accept it!

Chapter 2532 - Advancing and retreating

The road to the Shadow Forest, except for the most clear of the Fu, is only known to Shen Lang.

There is no way for Meng and Jin to be there at this time. Fu Wei did not tell him completely.

For the arrangement of Shen Lang, Fu Wei immediately agreed, and then began to carefully consider it, pulled Meng and Jin together, leading the way.

He doesn't know what the Shenlang is doing, but he can be sure.

That is, the other party knows that there is no less than him. Let him lead the way. It will also be a test. If he detours or takes a dangerous place to go to another place, he may be regarded as ulterior motive by the other party!

So he had to play the spirit of twelve points.

It's just that he and Meng and Jin both came to the magic forest this day, that is, he has the final say, to give the head of the patriarch, and to ask for a symbolic opinion.

He is wrong, Meng Meng does not dare to say anything, not even know.

But now there is no such thing as a "misunderstanding."

This makes him very painful.

Because the information of the ancestors recorded in the stone carvings is relatively rough and limited. Whether it is going to the shadow forest or some other place, the error may be very large, which is possible to be continuously identified and corrected.

Now they are also the first time to come to the magic forest here, and the fog situation here is also undocumented. The deeper the fog, the deeper the fog, which brings great trouble to the road.

Especially the starting point, if it is according to the place they just sent, there is a reference coordinate, if the general direction is good, slowly can still touch the past.

But now it is starting from the ridiculous land, and it needs his constant memories. From the place where they encounter them, to the ridiculous land, how many directions have been taken, how far has they gone, and thus the side is calculated. A general direction.

This causes the process to slow down considerably.

The dragon is a little impatient, and it is used to it. It is like a step by step temptation, it is too uncomfortable.

However, Shen Lang did not participate in the help and did not give advice.

Shen Lang wants to get a route out, and also according to the information of the barbarian, and then through that reference point, to the specific location now, calculate the route.

However, his sacred armor has always recorded the trajectory. Although it is not possible to navigate satellites here, it can use the trajectory to obtain specific directions and distances.

In other words, if he came to do this step, it was just a matter of instruction, and he did the same, but he only had a reference and did not help, and still let Fuxi slowly calculate and approve.

Slower, faster, and not in a hurry, he can save more time to observe and understand the Tianmo Lin.

On the way to this way, of course, there are also sites like some beasts.

Even the fierce beast living in this day's magic forest can't avoid the fog, but it may be a little stronger than the outsiders.

So basically they are all close, and they find each other. It is equivalent to directly hitting people's sites and nests, naturally it will make the beasts rise.

However, the strength of Shen Lang and his team is strong, let alone start, it is a look, but also knows that can not afford it.

It is the beast of the beast ***** level, and you need to kneel in front of the dog god, let alone a dragon, even if it is a dragon in the form of a dragonfly, it also has a huge influence.

So basically, I found out that a scorpion has not finished yet. Basically, I ran away. I couldn't care about my own nest or the ground. They were afraid that it was to hunt them.

If there is nothing to gain, Shen Lang will certainly not be polite to them. Grab some of the beast gods, take the inner Dan, or take away the treasures of the guardian and cultivated them. Then they will not return empty-handed. .

Now I came to Tianmo Lin, and I received a dragon and a dragon from the ridiculous land. Even if I don't know the effect, the minimum grade is different.

Therefore, Shen Lang did not want to make extra-budgets, and even suppressed the actions of Meng Jin and Fu Yu to hunt.

Gao Hanqiu and the dog **** are of course following the meaning of Shen Lang. The old dragon is completely invisible.

Meng Jin and Fu Yu are both interested in it. It is also a good harvest for them to get such a beast. However, Shen Lang's instigation made them afraid to come.

If you want to persist, do you think they are going to run away? If you can't do it, the claws of the dragon will be directly burned!

But the beast can run, and the nest is still there.

In this ancient icy world, the construction of settlements by all ethnic groups will be the most suitable environment, including security and resources.

In the Tianmo Forest, there is no cold fire attack, and the beasts can live anywhere. Will build a nest, often it will hold the same, or a resource.

This includes spiritual ore, medicinal herbs, etc. The beasts are running, and these are not going to run.

Some of the swells and the cold autumn festivals are smashed, and they can't see them. Meng Jin and Fu Yu are not welcome.

So slowly walked for a long time, two days later, finally turned to the Shadow Forest!

After approaching, Shen Lang will understand why it was named the Shadow Forest by the ancestors of the barbarian.

It was surrounded by fog, but there was no problem with light, and there was no day or night.

When you are close, it is obviously dark. Then, as you go forward, the more dim, just like the night is coming.

“Are we... still ahead?”

At the level of Meng Jin and Fu Xi, the eyes of the barbarian are so big that they can't see how far they are.

Originally, I wanted to see it here. Can you fish in the water? Maybe there are any adventures.

But really close, but it is a bit flustered.

Not only the symbol, everyone has habitually looked over and waited for Shen Lang to give an order.

Fu Xi and Meng Jin, they are also hesitant, and now they need to push the waves.

“My decision is to continue, you can decide for yourself, not reluctant.”

Shen Lang will agree to come to this shadow forest, but also want to see what is in the dark forest, what is the demon in the sky.

It's already hard to come here How can I not enter?

As for the latter sentence, it is actually an opportunity to release the two barbarians. If they really want to leave, they can go now.

The old dragon should be with him.

Hearing this, Gao Hanqiu and the dog ***** do not need to speak, they are both advancing and retreating with Shen Lang.

The old dragon also immediately stated: “I naturally want to be with you.”

Meng Jin and Fu Wei are very tangled.

Just after their hesitation, they want to enter the Shadow Forest, and they are a little worried about danger, so I want to give this decision to Shen Lang, just follow the order.

I didn't expect Shen Lang to come back again, and gave them a better choice.

If you don't go in, you can go!

But the problem is... he is so determined to go in, really no other information? Do you know that there are good things inside?

Chapter 2533 - Follow up

There is an old joke of oil. After a person died, he went to heaven, but because many people lined up and he waited impatiently, he compiled a rumor that "Hell found oil." The news spread and many of the queues went to hell. went.

After someone left, the news spread and more people followed Hell. The man went to the front with his wish.

But as more and more people walked, he began to secretly scream "Will the ***** really find oil?" In the end, he could not help but run to see.

Fu Xi and Meng Jin are such a mentality.

It's their proposal to come to the Shadow Forest. I haven't planned it before, I don't know what will happen.

However, Shen Lang not only agreed, but he has just made it clear that he will definitely go in, but he can let them leave.

This makes them secretly doubt, is it the owner of this sand country, knowing the secrets of more shadow forests, do not want them to share a piece of cake, so they want them to leave first?

Otherwise, the Lord of the Sand State gets the information from them, the same as them. It is not clear what benefits the Shadow Forest will have. How can it be so determined?

The result is that they have now received better treatments than they expected, but instead let them wonder if Shen Lang has a good thing to open them!

Fu is because he is older and has more knowledge. He feels that he can get a lot of hidden news, and others can get it. So it is more speculative that there is no information about Shen Lang.

Meng Jin is more direct because of the conflict with Shen Lang. He does not want to let go of Shen Lang. How could Shen Lang let him go so kindly?

Either want to wait for them to go and sneak them behind.

Either there is a huge advantage here, so that he is happy, as long as they don't take a share, don't care to let them go.

There are dragons, why do you need to attack them later?

That's only the second possibility!

He has a certain tacit understanding, and there is no need to say anything at this time. Everyone can sense each other's minds.

I don't need to discuss it anymore, and I made the same decision quickly!

"The Lord of the Kingdom of God! We are able to walk with you, it is our pleasure, and we have learned a lot."

"If we don't give up, we are willing to continue to follow, go forward together and enter the forest of shadows. Of course, if there is any gain, we are not willing to hide, we are willing to turn in, and how much you are willing to allocate to us."

Fu Wei made a statement immediately.

What is handed over, of course, is to make a good posture. After entering, everyone is likely to be dispersed. When there is any gain, it will be turned over!

Meng Jin also joined the side, indicating that they are willing to follow their peers.

This point makes Shen Lang a bit surprised. I thought it would be very happy to let them go. After all, there is no investigation plan for the Shadow Forest in Fu Yan's memory.

Let them leave, they can follow the original plan, and there is no other loss except for a little delay.

However, he was only slightly different. From their reaction and tone, they quickly guessed a rough idea.

This is a bit of a dumbfounding.

Do you think that this is going to enter Baoshan, afraid that they will get more baby?

Since they are willing to take risks, then Shen Lang certainly does not care.

Anyway, this is what they have to follow, what happened, and not his business. He will not refuse them to come in, but if they are in danger, it is naturally impossible to treat them with the cold autumn and the dog god.

The strangeness of Shen Lang falls in the eyes of both of them, but I feel that it is right!

He hesitated!

really! The Lord of Sand Kingdom has another news, knowing that there is a huge treasure here!

I am sure that they would have liked to come here, but just when they came up, they would push the boat. If you leave like this, the benefits of the Dark Shadow Forest will be enjoyed by the sand country!

For a time, both of them felt that the decision was correct and should be left behind. No matter what, following the owner of this sand country, even if you can't take the big picture, you can certainly eat a little meat.

So at this moment, they all kept a very sincere look, and it seems that they are really purely following.

“Well, you have to go in and enter. But you have to pay attention to safety, I don't pay much attention to it.”

Shen Lang is also talking about ugliness.

They have already let them go, it is not that he forced them to go in, then they need to be self-responsible.

“Thank you for the Lord of Saudi Arabia, we will be careful.”

Fu Xi and Meng Jin immediately thanked.

Pay attention to safety, this does not need to be embarrassed, they will certainly pay attention to themselves, this is related to life, can not pay attention to?

Since they agree, it is equal to giving them the opportunity to share their interests.

What they want is this opportunity. Even if they refused, they will go in by themselves.

The battle between the last wave and the Green Devil, coupled with the attitude of the beasts encountered in these two days, made them aware of the importance of the team.

If they are two, although they are more free and the benefits can be enjoyed exclusively, the risk factor is much larger.

Along with this team, small troubles naturally evade, and if they are in trouble, they will bear most of them.

Since everyone has decided, they are not waiting for anything. After a little preparation, they will continue to go into the shadows.

Originally, Shen Lang and Gao Hanqiu, the dog ***** three, have been sitting on the spine of the dragon dragon.

Now it is the angle into the inside of the tibia and sitting in the abdomen.

Because of the size difference, the dragon is just a small bone They are also very good to sit. Now falling from the back into the abdomen, it will not fall from the gap.

But this is very obvious. In this abdomen, the danger is further reduced. No matter which direction the attack is, it will be the first bone protection of the dragon.

This scene makes Fu Xi and Meng Jin, shameless and envious, they also want to get in, in that case, you can just smash the dragon.

However, Shen Lang is so cautious, and let them more and more recognize that there are a lot of treasures inside!

The old dragon is also a bit speechless, but what can it say?

Besides, sitting on the back and in the abdomen is actually about the same. Before the green little monster, it also proved that it is now in a state of paralysis, not afraid of attack!

Under the command of Shen Lang, the demon dragon took the lead and walked over. The claws have not yet stepped forward, and the dragon's bones have been explored far away.

Meng Jin and Fu Wei, not far ahead, but close to the side of the dragon, and go forward together, so if there is danger, you can also get the assistance of the dragon.

Chapter 2534 - Have light

The dragon has always been fearless, and the green monster that is not afraid of death and killing has given it a shadow.

It is now a state of paralysis. It is even more afraid of attack. Therefore, in the past, in the shadow forest, there is no tension between Meng Jin and Fu Yu.

However, this place, in this day, in the magic forest, can still be considered mysterious and special, it does not dare to take a nap, the speed is not fast.

Originally they had already entered the scope of the shadows before they stopped.

So when the discussion is good, go ahead, there is not too long distance, and soon the shadow becomes more and more thick, and the fog and shadow effect make the visibility very low.

Fortunately, the shadow only affects the vision, and the influence on the gods depends on the fog. Although the fog here is very strong, the range that can be sensed is still about 100 meters.

This range is unacceptable for the barbarian and for the dragon. It is almost equivalent to being able to sense the side.

However, Shen Lang has experienced chaotic space, and the space that is suspected of connecting different worlds, the huge range is filled with a thick fog, directly to the extent that it is not visible.

Under that state, it is face-to-face, invisible, inaudible, and within the space of the hustle and bustle. Once loosened, it may completely drift to different places, even forever in the fog and chaos. in.

Now, you can still sense the state in the nearby range, and you can still be on the ground. You don't need to use the dirt method when you leave the earth.

“Respected Lord of the Kingdom of Sand... Do you have any further clues? So dim, we probably can't find anything, and it's easy to get lost.”

Looking at this situation, Fu Hao could not help but ask.

Since everyone is already a partner who comes in together, even if you don't share information, should you at least refer to a road?

It didn't take long for them to go deeper, and they became more and more aware of their feelings. If they continue, will they not see anything?

Shen Langxiao smiled: "My information is entirely from you. It is also your suggestion here. How can I have more information?"

"..."

As soon as this statement came out, the symbol was directly stunned.

Normally, this is true, but he never believes! The owner of this sand country certainly has more information, just don't want to share it with them.

When it comes to this, he certainly can't say anything.

The three continued to move forward, and soon, almost nothing was visible to the naked eye, just like walking in the darkness.

Although it can sense the range of about 100 meters around, in the complete darkness, the effect is greatly reduced.

After the disappearance of the vision, the hearing seemed to become more sensitive. It was quiet, and now it is the voice of each step, which is very heavy.

The sounds of flowers, trees, and soil that are touched by the dragon's cheekbones are huge.

The dog ***** and the cold autumn, do not know if there are any plans for Shen Lang, anyway, they are cooperation, this time is a high degree of alert.

"Are we going all the way?"

Although it is sensible to know that it has not gone too far, in this darkness, time has been greatly lengthened, and Meng Jin could not help but vomit.

“Ask me, he will propose to come here, is there any better consideration?”

The response of Shen Lang directly made them both bored.

Although they did not give them a good face, Shen Lang is actually thinking about countermeasures. Just as the light gradually dims, he is constantly observing and analyzing.

At this point, he is actually a bit skeptical.

I am completely in the dark, especially knowing that this is a very dangerous place, it will give people psychological hints, and it will generate more pressure faster.

But will there be external factors?

For example, the area that has just entered the scope of the Tianmo Lin, which is called the enchanted forest, is very pleasant and comfortable, so that the body is in good condition, the mood is very good, and I don't want to think more. When the reaction comes, Already confused in the forest.

The impact can be many aspects, such as the burial of the Dragon Valley, there is some kind of radiation or toxins, people have been unknowingly tempted.

If you are confused, there will be no poison. It is purely environmentally friendly and makes people naturally immersed in it.

Now the impact of this shadow forest is two possibilities. For example, it is getting darker and darker, and the whole process is very fast. It is completely invisible, which would have been suppressed.

The surrounding environment may also produce substances such as toxins, which are not necessarily so toxic and suffocating. They may be invisible and colorless, and people are naturally affected.

The reason why this is analyzed is because now it is obviously arrogant, that is, two of the barbarians.

Shen Lang and Gao Hanqiu are in the holy place of Yungong. In the mysterious space, they have been transformed into physical fitness. There is no feeling in the funeral dragon valley. Needless to say, the dog god, combined with the poisonous grass seeds, can stop the poison and not invade, it can poison itself.

The dragon is far better than other races. Now it is awkward and it doesn't affect it.

Therefore, the remaining two barbarians, which are relatively large, will be obviously affected.

“You have to have light!”

The moment that Shen Lang opened, immediately released the light source through the holy armor, and instantly illuminated a large area around it!

Shengjia is a common name for the super-black technology bionic super-ready system in the river basin. It releases a light source, just like the “calculator” applet in mobile phones and computers. It is a trivial function.

This effect is very amazing for the earth science and technology, and it is even more incredible for the ancient cold world that has never seen the technological civilization.

Of course, they can also present a certain light source by means of spells like , but the cost is very low, and it takes a lot of energy.

At this moment, with the words “There is light”, he began to shine from his whole body and shined to a large area around him. These lights are bright and not glaring, soft and clear, and they are big-handed at first glance!

Normally, with the energy of the holy armor, the brightness and intensity of the light can be adjusted. If necessary, it can shine far away.

But now, it can only be regarded as lighting up the shadows, it is impossible to dispel the fog, it also shines a radius of about 100 meters.

But for this one, for the two of the barbarians, it is already enough.

I can't see the distance before, the only difference is the difference between thick fog and dark fog. But they can see the surroundings, but they have already made their anxiety greatly relieved.

At this moment, they only have two ideas.

One is more determined, and there is definitely more information!

The other one is that Shen Lang is unfathomable!

Chapter 2535 - a few times 10 times

With the shine of the light, everyone feels a little spirited.

And Meng Jin and Fu Wei, also feel that the king of the sand country is stronger, and can not always support the light, they just paid attention to it, he did not hold any magic weapon, pearls and the like, is pure self-lighting.

The stronger the boss of the country, the more secure the team is. From this perspective, no matter whether they hate or hate each other, they don't want the other party to weaken before they leave the shadow forest.

So now under such conditions, they naturally speed up the pace.

The same is true for the scorpion dragon, moving a bit faster.

Because Shen Lang did not give them any clues, they could only search for them randomly. Since it is random, no matter how you turn around or go straight, it is the same.

Before you know how big the range of shadow forests is, you won't consider all the carpets.

So when they continue straight ahead, they are twice as fast as they were.

Shen Lang consumes energy to illuminate the surroundings, and gets their compassion and concern from Meng Jin and Fu Yu.

But in fact, for the holy armor, the consumption is minimal. Just energy consumption, Shen Lang can easily make up.

The spar energy used by it is the finest stone. If the sun wave fills the Yuanling stone, or if it is a spiritual pulse, it can be used for a long time. The weapons that are stored inside are the consumables that cannot be replenished.

So at this moment, he himself does not need to worry about the problem of light, but to focus on the surrounding, the knowledge spread to the maximum extent, on the edge of the light, pay attention to the slightest change.

Although there are no further clues to Shen Lang, according to the clues of the barbarians, there are some that can be analyzed.

This is the environment of the Shadow Forest. In this dark forest, the light is a huge explosion!

No matter what kind of devils you might live in, or anything else, whether the light is hopeful or fearful for them, it will inevitably attract their attention.

Of course, whether reality will eventually have an attractive effect is hard to say. The “dark forest” theory is just a setting for a novel.

The glint of a civilization in the universe, and the light of two hundred meters in diameter in the shadow forest they are now, are like fireflies in the darkness –

When it comes to the past, it is very obvious, and in a farther place, it is actually impossible to find.

At this moment, their “Firefly” team is faster than before, walking through the Shadow Forest.

Shen Lang paid attention to the progress of the record of the holy armor, but it has already reached more than a thousand miles!

This discovery made him a bit surprised, because they were walking step by step in the front, even if the speed was doubled later, the whole was still cautious and there was no rampage.

With the feeling, he personally feels that it is a few dozen miles, and it will not be as fast as a thousand miles.

However, the sacred armor is not affected by light, shadow and fog. The recorded trajectory is the distance of objective movement.

what does this mean?

In this shadow forest, the speed of their advancement is actually ten times or even dozens of times?

This point, except for the Shenlang, which has an objective reference to the Holy Grail, has not been noticed by others. It is as careful as the cold autumn, and I don't know that I have left so far.

In fact, it is the sorrow of the data. Not to mention their realm, it is ordinary people, the speed difference of ten times, dozens of times, can also be clearly felt.

It is the same in the dark, unless the whole person is completely suspended, and no reference can be seen, heard, or felt.

But they are not only walking on the ground, but also behind the light, can clearly see the surrounding.

After discovering this, Shen Lang also noticed the surrounding, even if he confirmed a reference object, watching its moving speed, in the record of the holy armor, is still dozens of times apart!

That is more likely to be another situation: the Holy Grail is affected and the induction is out of order!

This also corresponds to the speculation in front of Shen Lang, the environment here, will be unconsciously invisible, affecting them invisibly!

If the Holy Grail is not affected, it is that their feelings are affected. If they know what it is, then the Holy Grail is affected.

Even the Holy Grail is affected, and their bodies may have other effects as well.

This discovery, Shen Lang did not say, is to continue to pay attention to the changes in the record.

Finally, it was found that the proportion of the track record of the holy armor was basically fixed, and there was no change because it moved to a different place.

The only thing that affects it is the speed at which the barbarian and the dragon are on the road.

There have been loops of confusion, and here is really “shrinking into the inch”, and Shen Lang does not think there is anything strange.

This is the ancient cold world, everything can not follow the rules and logic of other worlds!

“We don’t seem to have any discoveries... Do you want to weaken the light of the lord of the sand country?”

When he traveled about five thousand miles, Fu Wei continued to hurry, but made a suggestion to Shen Lang.

In their feelings, probably more than a hundred miles away. This is not very long, but the illumination of this section has stabilized them.

Moreover, Fu Wei feels that Shen Lang always maintains a brightness, which is too wasteful of energy. It is better to lower the brightness. As long as you can not get stuck in the dark, you can better hurry and discover.

Normally, lowering the brightness naturally extends the energy usage time.

This may be a long battle.

For the problems he cares about, Shen Lang is completely unconcerned.

“We have gone deep into the shadow forest, and there may be changes at any time. You are always very vigilant!”

Shen Lang did not explain that the Holy Grail has gone deep into the five thousand miles. It is really very deep, he just made a mistake.

Others feel that the distance they enter is not far away, but the premise is that everyone does not know how big the range of the Shadow Forest is. If the whole range is two or three hundred miles, then after more than one hundred miles, it has already reached the center.

Shen Lang will remind you that everyone is of course obeying orders.

Shen Lang only took the opportunity to marry them now. After he found out that he had not been able to find it from more than a thousand years, he was always on high alert.

“God... what the **** is it?”

This time, it's not a symbol, but it's a dragon.

In the memory of the dragon, they are not the name of the demon forest. They come here, and they are directed at the fountain of eternal life. Therefore, it does not know exactly what the demon is.

Gao Hanqiu and others, in fact, have similar doubts, but they fully support Shen Lang, Shen Lang does not say, they do not ask.

Chapter 2536 - The demon appeared

Now the dragon is asked, and in the cold autumn they also erect their ears to listen.

Fu Xi and Meng Jin two, because they have always felt that Shen Lang knows more information, but they are not willing to let them know, and this time they are listening to it.

According to the face of the dragon, the owner of this sand country should give it, and explain it to it.

What they are worried about is that people will explain it privately and will not let the two of them know!

After all, in this team, they are two outsiders.

“All the information about Tianmo Lin, I got it from the three of you. What is there in the ridiculous land, what the devil is, I really don’t know.”

Shen Lang is very helpless and tells the truth.

What he said is the truth, except for the cold autumn and the dog god, the other three do not believe.

Who are you cheating!

If you don’t know at all, dare to take such an adventure? Dare to pay so much? This light consumes a lot of energy.

Because there is not enough trust and understanding, and the information of the two sides is not interoperable, the barbarian does not know the information of the dragon, and the dragon does not know the information of the barbarian.

Shen Lang knows everything, so both sides think he knows more, and may even have other sources of information that they don’t know.

Just this sentence, Shen Lang is publicly stated.

So not only the barbarians, but the old dragons, they feel that he may not want to say it publicly, but to tell it privately.

Just the attention of all of them is in Shenlang here, they all want to know the information of the demon.

But even if Shen Lang is dealing with them, he has not relaxed his vigilance around him.

At this moment, he found something wrong around him!

Because they just didn't stop talking, just unconsciously slowed down a bit.

According to the trajectory of the record of the holy armor, it is a tens of times the speed gap, which is very sensitive. The speed of ten will be five hundred, and the speed of eight will be four hundred.

However, Shen Lang found that at this moment, the trajectory distance of the holy armor did not increase significantly!

Although there are changes, it is a small number of changes like the error.

This is a problem!

“stop!”

Just after the waves, everyone was on high alert. Now they are shouting and stopping. They immediately let them relax because of the devil problem. Once again, they are highly concentrated and immediately pay attention to everything around them.

But they don't have any awareness.

At this moment, the light is still as old, and the light is just the endless dark fog. Nothing is wrong.

Shen Lang did not explain it, because it is more difficult to understand from the double speed gap and waste time.

“Is it the legendary demon? Come out!”

The words of Shen Lang were spread out. In this dark forest, it looked very loud and shocking.

Heavenly devil?

Did he find the trace of the demon?

Although they were a bit skeptical, they felt that it might be a smoke bomb, but they were rather credible and immediately entered the state of preparation.

“Can you find me?”

Just when everyone’s suspicions have not been further questioned, there is a response in the dark forest!

This voice immediately made everyone ready for defense and offense.

“Come out!”

The dragon has issued an extraordinary voice. It is not a complete dragon now, but it still has the pride of the dragon.

No matter what ethnicity this day is, in front of their dragons, there is no qualification to install!

Meng Jin and Fu Yu two, but now it is quiet and does not speak.

Because they still have self-knowledge, no matter what the devil is, this time is the Lord of the Kingdom of the Kingdom and the dragon, they only need to protect themselves, there is no part of them to speak.

In an instant, under the light, from the darkness of the fog, a shadow came out!

A shadow is just the first impression.

In fact, you can find out immediately, not one, but around a circle around them!

These shadows are all coming out of the darkness, as if the boundless dark mist is concentrated and condensed.

All of them have had the experience of fighting the Green Devils. This picture, I thought of the Green Devil that appeared out of thin air.

Although there are not many green devils in the quantity, there is no endless source, but it is all around, which is also surrounded by everyone.

In the next moment of confirmation, everyone found that these shadows were originally one by one, and they were actually materialized and turned into a personal object.

“Give me a good appearance!”

Shen Lang sneered, and the light was brightened to the point of glare through the Holy Grail.

Because it was exhaled from him, he was in the center of the dragon, and the cold autumn and the dog **** around him were also staring at the surroundings.

So everyone doesn't have to stare at him, it won't be directly affected by glare, which affects the shadows that have just been materialized around.

Of course, the glare of the light is just an attitude that will not hurt anything.

Suddenly, the shadow that had just been materialized, and quickly blurred, like a shadow. Then a shadow around the diameter of two hundred meters, quickly gathered and gathered, to the front, forming a large virtual shadow.

This big shadow, but the height of about 20 meters, is similar to the barbarian, far less than the body of the dragon.

After the gathering, it quickly became materialized and became a giant standing in front.

This imaginary giant of the illusion, the overall shape looks like it is not much different from human beings, it is much more pleasing than the barbarians.

But there is also a difference in this day, that is, there is no face...

To be precise, there should be no facial features on the face, or a flat face.

With a height, it is like a big drum on the head. There are no facial features, and naturally there are no eyes.

But it is also a positive confrontation for their camp.

In the process of its ghosting convergence, Shen Lang has already transferred back the appropriate light, and then he flew out of the dragon's scorpion and landed directly on the faucet.

The dog **** and the cold autumn also flew out, but the two of them have a tacit understanding, the high cold autumn is on the back bone of the dragon's back, and the dog **** is in the tail direction.

This is obviously arranged in the high cold autumn. Now the enemy is unclear. If all of them are gathered to the leading bones, it is indeed the fastest assistance to Shen Lang.

But in case of other directions and corners, is there a scorpion attack?

Now such a station is centered on the dragon dragon, Shen Lang stands on the faucet, next to Meng Jin and Fu Xi, there is a dog **** behind, Gao Hanqiu sits at the center of the town, where there is a problem, he is always ready to assist .

Have a good formation.

Chapter 2537 - Phantom Demon

They all waited for it, and quickly formed a coping style. But the opposite demon did not seem to care about them at all.

“You are the devil? Are you a race?”

Shen Lang represented everyone and made an inquiry.

No one else has any meaning, including the dragon, which is willing to let Shen Lang represent.

It's just the head and shape of the demon, and no one is afraid of them.

But it can lurk around in a situation that everyone is not aware of, and don't know if those shadows are real or all are avatars.

Especially in this forest of shadows, it is the barbaric information that is still taboo, and naturally it is very important for everyone.

The question asked by Shen Lang is also the voice of all of them.

Is this really a demon?

Is the demon an individual existence or a race?

Normally, the Tianmo Lin is a legend that has been made by all parties since ancient times. This shadow forest is the area where the barbarian ancestors determined that there is an active demon.

After such a long period of time, it can not be an individual, but more likely a group of people, a race is called the demon.

"The devil?"

The demon who had no facial features responded and seemed to laugh.

That picture is even more embarrassing.

"It can be said that my family is called the demon and the demon. If you know that we are gods, we will know that this is the territory of our demon, and dare to die?"

It also has a high-profile attitude. For the problem of Shen Lang, I don't feel that I need to hide anything. I directly answered it and solved everyone's confusion.

It is a demon, a demon or a demon, all describing a race.

It says that the demon territory is obviously referring to the scope of this magic forest, not just the forest of shadows.

Shen Lang continued to talk.

"I don't know the geometry of your life. Anyway, the life span of all of us is different. In general, the outside world has already had a long development. We are not aware of the situation here." ..."

His work has not been finished, he was interrupted by the demon.

"Less nonsense! I am not interested in so much nonsense with you. Since you have come here and broke into our territory, you have to pay the price. You should know what the price!"

"What is the price? I really don't know."

Shen Lang shook his head. At this time, he wanted to let the other party talk as much as possible and reveal more information.

"Of course it is your life, and your soul! For those of you, we are disdainful, but you still want to come and fight our ideas... **** it!"

It is strange to say that the face of the giant demon is like a big drum, and there is no expression at all.

But when it said this, it still gave people a feeling of rich expression. Including pride, including disdain, and anger, it seems that it can be interpreted from its face without facial features.

"Damn **** it, but you didn't attack us at first, but lurked around us, observing us. Presumably you don't want to kill us so much?"

“Your life, I can take it at any time!” said the devil.

Shen Lang nodded and continued to speak slowly and reasoned.

“I know that your strength is strong and you can take our lives at any time, so you are not in a hurry. Since you are not in a hurry, don’t you mind if I say a few more words?”

“...”

In this sentence, the demon did not respond, but this is equal to the default.

Powerful! Of course, there must be a strong demeanor. If you are anxious to kill them, don’t you feel nervous and guilty?

“This god, what should I call you?”

Since the other party’s emotions have been successfully guided, Shen Lang is also welcome, and talks.

“You can call me a phantom demon!”

This day, the demon does not directly say what its name is, and this phantom demon, certainly a class, is a branch of the whole big race of the demon.

Listening to this name should be related to the phantom. Before that, everyone saw so many shadows around it, it was really just its phantom form.

“Phantom Devil. You don’t want to kill us so fast, you should also want to know the world outside? Do you want to listen? I can talk to you.”

“Hey! I don’t need it!”

The temptation of Shen Lang, in exchange for the sneer of the phantom demon.

Quite simply, if the other person wants to know the outside world and wants to get information from them, the story is too slow, and there may be various illusions.

The most effective way to do this is to read the memory directly.

This phantom demon must have a similar means, and it is also able to achieve this.

“Yes, because we are too weak, if you really want to do it, you may kill us at any time, and you will not get any information at that time.”

There is no cowardice in Shen Lang’s state of mind and momentum. However, above the verbal speech, it has already taken the initiative to show weakness.

Meng Jin and Fu Wei, the heart could not help but secretly mocked.

Lord of the sand country! Are you not very arrogant?

Isn’t it in front of us that you are arrogant and pointing to the mountains?

Now that you have a stronger enemy, you will soon recognize it?

Do you think you are too weak?

However, everyone is on a boat, ridiculed, and gloating, it is just an instinctive reaction.

When the reason comes, they all know that the Lord of the Sands is not just a group with them, but also the core decision maker of everyone!

If you want to survive the catastrophe of the demon, and want to leave here safely, then the one who needs to rely on the most is the owner of this sand country.

Whether you are happy or not, even if they want to take revenge in the future This must also support Shen Lang, you must expect Shen Lang to hold this magic.

“You can try it.” For the response of Shen Lang, the Phantom Devil reported sneer.

“There is nothing to try, you are very strong. We are not aware of it around us. This shows that you are very strong.”

“Although I feel that your personal ability is impossible to achieve this effect, it should be based on the magic of your race.”

In the words of Shen Lang, the Phantom Devil does not like to listen.

What do you mean? Is this powerful enough to pretend?

“I need to rely on magic weapons? How much do we need to pay for these little things?”

The gesture of the phantom demon is equal to the fact that human beings are cold to some small insects, and there is a feeling that they dominate the other's life and death.

In these words, whether Shen Lang is weak or procrastinating, and the words of inquiry are all with guidance and inclination. What is needed is to get more information from it.

Chapter 2538 - Light problem

“last question!”

Shen Lang seems to see the other party's impatience, seems to skip a lot of problems directly, and transition to the last question.

The Phantom Devil had wanted to refuse, but after thinking about it, he still agreed.

“If we kill you, will someone give you revenge?”

Everyone is surprised when this sentence is spoken.

Meng Jin and Fu Xi could not help but secretly complain, they remembered this time, the owner of this sand country is still young!

Young and energetic, it will inevitably lead to confrontation. But this problem is provocative and the consequences are not good!

I knew that I should let the seniors come and see what his grades should look like.

But this time, it can only be a dark belly, on the surface must support the sinking waves, or else it is guilty.

“If you have the ability to kill me, no one will avenge me.”

The phantom demon sneered a sneak, the meaning of this is – just because of you, but also have the ability to kill me?

“Do you not feel that our strength is very strong?”

Shen Lang is also a proud face, standing on the dragon’s head, slowly opened his arms.

This is to let the other side see, their soldiers are strong.

Phantom Demon, this time no response.

But it does not have the facial features of the five senses, but it can vaguely induce a kind of contempt. This is disdain to respond to the waves.

Fu Xi is anxiously anxious. He feels that the Lord of the Shah State is too ugly to talk. He should be allowed to come. If it is him, he can handle it freely and can not irritate the other party.

“I will give you a chance once, if you don’t cherish it, there won’t be a second time!”

The tone of the Phantom Demon began to get cold, and it didn’t have a facial features, and it seemed to be serious and serious.

“How did you do this?”

So many nonsense that Shen Lang just said, whether it is jumping thinking or provocative anger, is actually a strategy, a strategy that allows the other party to guess his path, the purpose is to collect information!

There are many ways to collect information through conversations. The method he uses now is to deliberately make a sentence in the East. It is formal and irrelevant.

That's it, let the other party inadvertently reveal some information.

Some of the information revealed by this phantom demon has allowed Shen Lang to analyze a very important part of it.

The other party did not attack them, but secretly observed them, not because no one has come here for a hundred years, but because of this light!

They don't know whether it is photophobia or worship light. Anyway, it is very important for the phantom demon, it must be clear.

There is no direct hands-on memory, maybe it is afraid that they will self-destruct, so first try to finish the peace talks.

“I said, if there is light, there will be light!”

Shen Lang has just opened his arms, although the appearance is a bit of the second, but the momentum is still there.

At this moment, I moved my finger slightly, and nothing else was done.

Then the light that emanated from him began to weaken significantly.

The light he has been keeping is very abundant. Now weakened, it immediately dimmed the surroundings.

However, even if it is two of the barbarians, there will be no diarrhea at this moment, and they will focus on the phantom demon.

But in fact, Shen Lang does not need to rely on his fingers for the manipulation of light.

He just moved his fingers and was deliberate.

He believes that the Phantom Devil will certainly not ignore this detail and will guess if it is the key.

Then, Shen Lang added another hint.

As his fingers moved again, the light that had been dimmed began to brighten up, getting brighter and brighter, and began to have glare.

Shen Lang is also paying close attention to the slightest change of the other side.

His just dimming is to test whether there is any effect.

At this moment, it has been noticed that when the light dimmed, the phantom demon seemed to calm down a bit.

When the light gradually strengthened, it began to show a more anxious state.

Light, it has an impact on them!

Perhaps these devils, hiding in the shadow forest, are to avoid the light. Even this dark forest is their big hand, this is a settlement of the Mozu!

With the strength level of everyone and the distance, the phantom demon, if it is shot, it is completely confident that it can kill Shen Lang and others.

But what is the matter, or must be clear, otherwise, even if you kill one, there are also the second and third...

And know that the scope of this exposure will be getting bigger and bigger?

“Are you interested in this light? I can tell you! Of course, you have to tell me what you know, this is fair!”

“Dream! The opportunity has been given, this is your own death!”

When the Phantom Devil finished this sentence, the body suddenly began to change!

Originally, this magical entity was a large circle of “Devils” gathered together, and those “Devils” were originally only the virtual shadows that emerged, and then the materialization.

The change now is just a return to the previous appearance.

Gao Hanqiu is above the dragon’s back, not only looking at the overall situation, but also doing the role of assisting the cover as in the ridiculous land.

Now these gods are re-encircling around, and this distance is less than 100 meters, everyone is very dangerous.

When Shen Lang just communicated with Tianmo, the deep chilling autumn with a sense of tacit understanding realized that Shen Lang was intentional.

Therefore, he has secretly passed the voice to the dog god, wants the dog ***** to play an important role, and also conveys consciousness to the dragon, so that the dragon is ready.

But what he trusts most is still himself!

The other one is Shen Lang.

At this moment, the innocent scruples, he must shoulder the responsibility.

So this time, he is no longer an attack of Jianqi, but a sword does not know when it will appear in his hands.

With his realm, picking flowers and flying leaves can be a very left weaponThe empty hand can also have a very strong sword and sword.

He still puts the sword of the entity in hand, showing how important this high cold autumn is.

“Looking for death? What can you do?”

Shen Lang sneered.

When I first spoke, in addition to collecting information, another important reason for his delay was to attract the attention of the Phantom Demon and then lay out the realm of God without any trace.

The scope of this god’s field is the area where the whole light can shine, that is, about 200 meters in diameter.

At this moment, it is scattered into a phantom of the genius. If you want to be really aggressive, you need to control the field of his ***** first. Otherwise everything can be intercepted, at least delayed.

When the field of God appeared, although there were obvious differences, it still made the dragons feel familiar, this is the realm of the dragons!

This little human being really has an intersection with the dragons?

Chapter 2539 - phantom? real?

The feeling of the dragon is to verify that Shen Lang is really related to the dragon, which makes its good feelings increase.

It was the fastest time to discover this. Meng Jin and Fu Wei did not realize it yet, but they quickly defended.

At this moment, everyone's defense is equivalent to forming a protective cover, and Shen Lang has deducted a large protective cover.

Shen Lang uses the realm of God, especially the preemptive completion, which was able to control everything around him. But in the realm of God's field, everything is free.

His control does not affect other people's defenses, but around them, it is equal to a layer of defense.

In front of this demon, everyone is a person on board, that is, two of the barbarians, and will not give up on the premise of being able to protect.

When Shen Langdong pulled the West, it was laid out in advance, and everyone's self-defense, Gao Hanqiu was also a coordinated defense. It was already a heavy defense. In the face of the demon, everyone is very confident.

Everyone is waiting to see the performance of this demon.

All the demons that have been scattered around a large circle are beginning to step by step. Under their pace, the field of God is useless!

Before we figured out the specific ability of this phantom demon, everyone did not rob the advanced attack, but the defense.

As a result, the devil is approaching step by step, completely ignoring their defense!

The first thing I felt was the impact of the waves, because of the effect of the realm of God, he knew best. Moreover, in addition to everyone's defense, they first came into contact with these demons.

It was the old dragon, and it also found that the realm of God is almost as ineffective.

Then came the barbarian, and they also felt the impact of the demon.

This is in the shadow forest, the land of the demon, everyone will naturally pay more attention.

And now facing this, claiming to be the phantom demon, the scene that I just saw, will it be a phantom?

They really doubt that these phantom demons are an illusion created because they do not feel that the defense is shocked and directly ineffective.

Because their size is not small, but a few steps, it has already approached tens of meters!

Those drum-like faces have no expression, but they give people a sense of pressure.

At this moment, there is no need to order the waves, and the old dragons and barbarians have been unable to hold back!

Because of the length of the body, the old dragon is the first to bear the brunt, and the body of the phantom demon has already reached its head and tail keel.

At this moment, its bones moved, and the tailbone, like a giant thorn, quickly rushed to the front of the phantom. The front fascia was also hit.

And the claws also moved and began to grab.

And it is just a physical attack, and in this dark forest, it seems to have set off a thunderstorm, every move, with strong energy fluctuations.

The dog **** is above the dragon's tail. When the old dragon moves, it is also from the state of preparation, and it starts to attack directly!

Meng Jin and Fu Yu two, the body did not move, close to the old dragon, let them have a more sense of security, but the defense has been attacked, and direct fire spells attacked.

The cold autumn is already in the hands of the sword. With his realm, any blade in his hand can play at a super level. The sword that he throws out of the sword must be more savage, directly to those phantoms. The head of the demon!

As the core decision-maker, Shen Lang is also the first wave in the field of God to be impacted, but it is the only person on the scene who has not attacked.

He felt very strange that this state is a bit wrong.

But this is in the ancient cold world, can not be speculated by common sense, the most need to do is to understand and accept information, and then find the law of cracking.

Therefore, the pace at which they can advance is swayed by Shen Lang. He did not attack, but the domain of God has not been revoked. It is still in control of everything in the surrounding environment.

Through these few steps, Shen Lang has discovered some conditions at the moment of everyone's shot.

All the devils, one missing!

Surrounded by phantom demon, these are not just shadows, all of them are real bodies, but they are like obstacles without obstacles, which can break through everyone's defense.

What is missing is the demon who talked to them in front of them!

This is not a problem.

Because this phantom demon – alone to count it, is the formation of all the phantom demon around. And when it broke out, it was a demon that spread out into a circle.

One is it, one hundred is also it, normal can not say less.

However, Shen Lang always feels that it is missing, not because it has one less position, but a feeling that these phantom devils do not have its breath!

When he discovered this, everyone's attack has already been connected with the devils!

Shen Lang did not stop it, and did not even blame them, but at the moment it is highly concerned with the slightest change.

Because it is very close to a few tens of meters, all can be clearly sensed. These phantom demons are not imaginary, not only the entities that are presented, but also the actions that have come to the front, or they dodge, or confront, or counterattack, have already acted!

At this moment, they were attacked by dozens of hundreds of phantom demon!

Observed this time, the information of Shen Lang is something to gain, but it is not enough. And time has not allowed him to observe for so long, he must join the battle, or else others may be chaotic.

The Phantom Devils were originally a large circle outside their 100-meter diameter, but because all of them went a few steps forward and narrowed to tens of meters, they were all close together.

Originally speaking, it would be easier to attack them. It is not so convenient to dodge them.

But in fact, on the contrary, these phantom demons, one by one, cooperate very well, no matter the movement of the front and rear, the surrounding demons can avoid in time, and cooperate with the attacking people.

As a result, the sword of the dagger of the cold autumn was avoided, and the barbarian attack was blocked or evaded, and the direct attack of the dragon and the dog ***** was even worse!

Whether it is the keel or the claws, or the dog god, their attacks are immediately hit by the attack of the next day after they are avoided. It is a real attack!

All of this explains a bit. These phantom devils are real, not phantom illusions. If they think that it is caused by hallucinations, it is very likely to be dangerous.

At this time, everyone found out that the scarab came out, and a large number of dense scarabs rushed out, instantly filling the space around the large pieces.

Chapter 2540 - Scout

When the scarab appeared, everyone felt a sigh of relief.

A few days ago in the ridiculous land, a large number of scarabs, fighting the consumption of the Green Devils, although the individual strength is not too strong, but not afraid of death, endless madness, is left for everyone Impressed.

The phantom demon in front of us, although the nature is a bit different, but before they can find out the situation, if there is a worm army to come to the last round, it can save them a lot.

However, a situation that surprised everyone.

This army of insects covered in the air did not even rush like the phantom demon!

Facing the rows of phantom demon in front of them, they turn a blind eye, but fly in the air.

This picture surprised everyone, but it was also a sinking heart.

The bloodthirsty crazy worms don't attack them, enough to show that their defensive performance is far better than the Green Devils, even far better than them!

When the worms don't feel them at all, they naturally won't attack them.

This also means that although the number is not more than the Green Devil, the degree of danger is much higher.

This is the master of the demon forest, the phantom demon inside the demon family!

But this one does not include Shen Lang!

Everything is still in control.

He put so many scarabs out, not expecting them to kill the phantom demon, or even use them as cannon fodder to delay the time.

He is a guess to verify himself.

After the army of the scarab came out, he had already taken control, and excluded them from the target, and let them gather around the phantom demon.

But these phantom demon did not attack the scarab, and the scarab did not attack them.

According to the rumors of the snake ***** Kemrisu, the scarab is summoned from the demon domain. In this way, the scarab and the demon may have some kind of connection, and it is not necessary to be safe.

But Shen Lang thinks this is not the case!

As a result of his analysis, the demons of these entities are all illusory and materialized, and they are all ordinary. No matter what means the other party uses, the nature is similar.

In other words, they are all lifelike, can defend, dodge and attack, but they are not really “phantom gods”, is the phantom, shackles controlled by the phantom gods.

Their lifelike physical body is not the real flesh and blood!

The scarab is not safe with it. It is totally inappropriate for them to be food. It is no different from a big tree and a row of stones.

Shen Lang can clearly feel their crazy hunger, but there is no feeling or thought for the phantom demon who is near.

On the other hand, these phantom demons did not attack a large number of scarabs around them, because when they were morphed, they were already commanded to attack, and the target was their group.

Numerous scarabs are suddenly coming out, and the behind-the-scenes phantom demon does not have a non-target to issue an attack command. To be a living being, to block a large number of

worms in front of them, not afraid of jealousy, but also instinctively dispelled by disgust and being blocked.

It is now proved that in their eyes, only Shen Lang and other target enemies that have been ordered and “set” are good.

This is the first layer of verification, he put the scarab, and the second layer of verification!

Everyone reacted differently at the scene, but in fact, there was no one who paused, and everything is still going on.

The field of Shen Lang Shen can't control these phantom demon, but it can speed up the attack of his own people!

At this moment, all the scarabs are accelerated. They just appeared, and they immediately surrounded all the phantom demons, and then quickly spread out to the outside.

The release of Shen Lang is also indiscriminate and spread out to the surrounding.

Immediately, his verification will have the result!

In one of the directions, the scarab of the piece was madly rushing into the dark forest!

Phantom Devil!

Those saint beetles can't feel it, don't lick it, all of them are without flesh and blood, but the real phantom demon is real.

Shen Lang analyzed that it should be in the darkness after the light shines, and then manipulate all the phantoms to attack.

When the scarab appeared around, there was no response.

Shen Lang does not think that there is no other living nearby, but the scarab is not strong enough, and all functions are affected by the foggy environment.

Even they can only have a radius of about 100 meters, and the scarab be sure to be shorter.

So he immediately followed the field of God and sent them around to the edge of the light.

He has no clear goal, because he can't sense it himself. The light is the limit of the sense of God, but the scarab is quickly transported to the edge of the light, which is the edge of the field of God. They are nearby. It is.

The process is to be fast enough, and wait until the phantom demon in the dark has not had time to pull the distance, you can find the seat where it is.

These scarabs did not disappoint him. They circled around. When there was a sacred beetle in one direction, it sensed "food" and immediately went crazy!

The manipulation of the field of Shen Langshen, in a moment, transported the other scarab beetles in the same direction, and in the meantime, a large number of scarabs were covered.

They are not expected to eliminate the Phantom Demon, but they can play a role in positioning!

The purpose of Shen Lang is to dig it out. Now both layers have been verified, and of course I will not miss the opportunity.

His other plans have already been arranged.

When he was transporting the scarab, he himself used the field of God, and the edge of the light was a hundred meters away.

The light is radiated from him, and the edge of the light, the edge of his detective knowledge, has become a new center at the moment!

And he can't let other people have no light, so as not to be accustomed to the moment, but the illusion of the phantom demon has hit, when the release of the scarab, it is already emitting a flare!

At this time, Shen Lang left their circle. Near the phantom demon, the flares have already been illuminated, replacing the light that he released.

The lighting bomb is definitely not as good as the light that he controls at any time, but it can still shine to the edge of the fog seen by the naked eye, so that everyone can continue to maintain the range visible within a radius of 100 meters.

It is now equal to a circular bright area with a radius of about 100 meters, and the dark waves illuminate a circular bright area with a radius of about 100 meters on the edge.

The longest place is up to three hundred meters.

But because of the fog and darkness here, it is not ordinary fog and darkness. With light, it can't be seen or sensed by three hundred meters.

For example, the dog ***** is on the side of the dragon's tail. It senses forward, that is, the fog of darkness. It is clear to the battlefield behind it. To the dark wave, it is the fog of light.
