

First Strong 261

Chapter 261 - Ferris wheel weapon

At the height of this Ferris wheel, people are already very small on the top, and with the night, it is difficult to identify clearly.

The knowledge of Shen Lang was spread out. The entire Yunhu Park was inspected clearly. The Chu masters who came around were aware of it, and the key figures above the Ferris wheel were carefully observed.

Chu Yuxiong!

Shen Lang has a limited understanding of the Chu family's information, basically relying on Tian Luning to ask questions. Today, after meeting with the bleak, I got more information from her.

Desolation uses Zheng's channels, as well as money to clear the way, plus a year and a half of long-term collection and accumulation, all the information about the Chu family has statistics.

This is also why today's can be so fast and accurate, killing dozens of Chu family.

The appearance and general information of the Chu family's contemporary core figures can be explored, and she has collected them.

Chu Yuxiong is not only the father of Chu Yunlong, the son of Chu Mofeng, but also the actual family of the Chu family in these years.

In other words, Chu Mofeng, as the owner of the Chu family, has long been nominal. In fact, it is like the emperor who has retired behind the scenes. The specific thing is not to be managed. Or he is the chairman of the board, and Chu Yuxiong is the CEO of the current implementation.

Retiring behind the scenes, not because of the old is not used, just do not want to and can not delay his time! Of course, they need the banner of Chu Mofeng, just like the Yue family needs Yue Baichuan in Pingxi.

Chu Shixiong, as the actual owner of the Chu family, is not only an executor, but also the responsibility of being competent in all aspects. What he needs is to break through the realm of truth, so that he can really sit down in the name of the family, and at the same time can assign specific matters to the successor.

According to the collected information, Chu Yuxiong is the second person of Chu family regardless of his identity, influence, or personal strength!

He should have reached the peak of the virtual world. If he is able to break through the real world, he needs the accumulation and opportunity. If there are no other hidden masters in the Chu family, then there should be only one of them.

The son was separated from the video of the mobile phone and watched him being killed. So Chu Chuanxiong could not restrain his grief, so he decided to go out in person.

Moreover, Chu Yunlong in the middle of the virtual environment, plus the Chu domain of the Chu Dynasty in the late period of the virtual world, this is already very heavy strength, and the results are all killed by the Shen Lang, and they are not allowed to go out. Others may have died.

The Chu family's Shen Lang did not recognize who it was. Under the bleak attack, he also displayed the Dragon Dance, and this time it is not like Yu's arrogance, but Yushui!

He is on the edge of Yunhu Lake, both to lead people to this destination, but also to rely on Yunhu as ammunition!

Originally, their Tamron technique can be as strong as the real one. Now he is a weapon, and the effect is even more unusual. The water splash is like a sharp ice blade! The scattered water drops have become like bullets!

And the water dragon that keeps coming out, it seems that it can open everything!

The chilly cage covered his net of swords and gas, and suffered a reversal of the Dragon of the Dragon, which was blocked all the time. The water dragons, which were opened by the sword, did not wait for the landing, and they turned into water arrows and came to the bleak!

After Shen Lang discovered that Chu Xiangxiong was above, he did not pay attention to the battle between the two.

“Chu Xiong! Go down!”

The faint sentence of Shen Lang, the sound is directly transmitted to Chu Yuxiong.

“Frenzy! Today, my Chu family does not destroy you, why stand on it!”

Chu Tianxiong also had a small voice and was directly transmitted.

Chu Shixiong, who is actually a family member of the Chu family, did not say anything, and did not care about what face, directly grab advanced attack!

On the top of the Ferris wheel, he saw that the three of them had followed up. When the following shots were taken, his attention was also on Shen Lang.

At this moment, Shen Lang called him, and he was not polite.

Cheng Wang defeated!

The world will only remember the winners, even if the means are not very glorious. After a long time, no one will remember or understand the inside story.

Today, half a day, Shen Lang has already made the Chu family face a big loss, and only then can kill as soon as possible, in order to save face. If you still take advantage of the predecessors, and say that you don't want to make a big bully, you will only make the Chu family worse.

So when he was talking, he kicked his foot and kicked a cockpit from above to the ground and shook it!

Then he walked quickly and step by step, his body did not fall down, and the Ferris wheel was turned up!

The Ferris wheel is a thousand-ton steel wheel. Although it uses design and gravity, it doesn't need that much power, but it is a person, especially a person standing on top of a hundred-meter-high Ferris wheel. Still remains an incredible terrorist force!

Chu Xiongxiang's hi-hat soon reached another cockpit, and once again he fell and fell to Shen Lang!

When the first Ferris wheel cockpit flew down, the speed was getting faster and faster, and it was also mixed with strong wind. If you lie directly on the person, it is not a problem of getting rid of the bones, but it may break people into The problem inside the soil!

This is not only a crushing attack of a huge force, but also an attack of a superpower who is still at its peak!

Shen Lang did not dare to neglect. When the cockpit came at a rapid speed, he had already jumped up one step at a time, prepared the angle in advance in the air, and then took a shot of the "Da Shou Mi Long Xiang Shen Gong"!

Such gravity has a huge attacking power, Chu Chuanxiang's shots ensure its speed, but in the end it is flying from more than 100 meters high, and can quickly give Shenlang a little time.

And so heavy so fast shot people are more than 100 meters high, decided that it can not be controlled in the air. The height of Shen Langfei is about twenty or thirty meters. The palm of the shot is not to be hard to fight with it. Instead, it uses the angle relationship to shoot it out to the side.

This kind of practice, so that Shen Lang does not need to directly fight against the tens of thousands of pounds of force, but skillfully transferred it out.

But this is not his only purpose!

After the filming, the huge reaction force made Shen Lang very uncomfortable, but his body was still a quick one, and on the other side, facing the second cockpit!

Chu master from the four sides of the master, one of them just appeared on the side not far, is looking up to appreciate the rare Chu Shixiong personally shot, the result of a Ferris wheel cockpit changed the trajectory, quickly reached his front... ..

He couldn't even open his mouth with a scream, and he flew out for a few tens of meters!

This is because Shen Lang changed the trajectory and slanted from the height of twenty or thirty meters, otherwise it might be possible to take him to the soil.
