

## First Strong 265

### Chapter 265 - Giant ice sword

Not to mention that the Ferris wheel has been fixed, but its own steel will weigh thousands of tons. It is almost impossible to push it down by hand. Even if it really has this power, it is not worthwhile to push it down to swear. of.

When Shen Lang arrived at this time, the “blood-induced madness” has basically been completed, but it will not be crazy to use the Ferris wheel to smash the enemy.

After his palms were shot, the body immediately took the opportunity to fly back to the back, directly through the back of Yunhu, and flew across the artificial lake!

Want to escape!

Chu Xiangxiong reacted here. Shen Lang is not stupid to do useless work, but to speed up the escape!

At this time, he has been led, and the desolation has continued to attack the other Chu family. It is indeed a good time to escape.

Of course he won't let Shen Lang succeed!

Others also immediately went to the Ferris wheel, in addition to using the foot to step on the borrowing power, also showed the Dragon Dragon.

The same Tamron technique, let alone Chu Yunfei, their difference is the world, it is the former Chu family who manipulated a lot of water dragons, it is far from comparable.

Under the control of the Chuo Xionglonglong technique, almost the entire Yunhu Lake seems to have obeyed his call and instruction!

Shen Lang flew to the other side, and the result was the following Yunhu Lake. Like a huge monster with countless minions, a wave of madness swept over, front, back, left and right... completely wrapped up his dumplings!

Through previous observations, Chu Yuxiong is actually very clear. It is these powerful water dragons that rely on Tamron, and there is no way to hurt Shen Lang. Therefore, his real purpose now is to obstruct and delay the speed of the escape.

For a moment, the entire lake faces the distance between the Chu and the Shenlang, forming a row of waterfalls. The bottom of the lake is like the mouth of a monster growing up. It seems that the sinking waves are swallowed.

Chu Yuxiong followed closely, and immediately reached the top of Shen Lang. His hands were in the air, and all the water dragons gathered together. Immediately, a huge fountain like a huge wave was formed on the Yunhu Lake!

The speed of the sinking waves blocked by the front and the back was greatly affected, and it was completely wrapped in all the water dragons.

“Death!”

Chu Yuxiong once again sighed.

Under the control of his hands, this piled up to form a huge fountain-like water column, which quickly frozen up!

It is not simply to condense water into ice, but to pile up and squeeze, the target is the middle of the waves!

The situation here also attracted the bleakness of fighting with the Chu family. She couldn't help but look at her heart. The experience of Shen Lang made her feel sinking and almost turned around and rescued.

“roll!”

With a violent drink, Shen Lang appeared on the water.

Chu Yuxiong could not help but be shocked. He had just piled up a huge fountain-shaped ice pile, but at this moment it was in the palm of the hand, like a huge ice sword!

When he heard the sound and saw the shadow of the sun, the huge ice sword had swept to his side!

With his ability, of course, he would not find no change, but he thought that the huge icicles had no support, so they would collapse. I didn't expect that the waves were swept away.

It is too late for people to dodge in the air. He can only defend himself from the body and not be injured.

The ice sword is formed by the frozen water dragons gathered in all directions by the Chu domain. It presents a huge fountain with a large front and a large top. The scale of light is even larger than the big trees on the shore. Coupled with the sweeping of the waves, the intensity is naturally small.

At the moment of the impact, Chu's body flew out, and the top of the giant ice sword also broke a large piece.

Standing on the surface of the water, the waves were forced to sink down, and his body was flying up, carrying a giant ice sword, not waiting for Chu's reaction, and then coming back. A bit!

The tip broke a large piece, and the more the left is, the greater the strength of the squat is, of course, the first one is for the sake of the map, to hit Chu Yuxiong. Now it's a little more time, and you can work harder.

This time, the Chu domain was slanted upwards and flew upwards, flying directly out of the height of 100 meters! Hit the top of the Ferris wheel.

Colliding with the defense of the Chu domain, the ice sword certainly couldn't stand it, and it broke a large piece...

At this moment, the ice above the two breaks has no appearance of a fountain. Of course, it is not like a sword. The Shenlang is like an icicle.

Because of its large size and weight, using this thing as a weapon is very clumsy, and it can only be an unexpected effect. Now it has already taken effect twice. With the experience of Shen Lang, it should be given up.

But this time, the waves are still carrying out the third attack!

He flew over the broken ice and stepped on it. The body quickly pulled up a few tens of meters, and the huge icicles in his hand, immediately like a cannonball, smashed into the Chu domain that fell to the Ferris wheel!

Although this icicle is not iron, one side of the water is one ton! Although the icicle is long pointed, the weight is at least tens of pounds!

He smashed twice in a row and did not let Chu Xiangxiong be injured. He could make people feel very embarrassed by the huge impact. Chu Xiangxiong under the anger, standing directly on the Ferris wheel, letting the icicles that followed come to the front!

Of course, he also noticed that Shen Langfei chased him over, so when the icicles arrived in front of him, he took a calm shot and let the icicles smash back to the waves!

When the icicles were about to reach the front of the waves, they burst into fierceness and became countless pieces, and all the fragments were shot at a faster speed!

Because the size of the icicle is large As long as time is available, dodge is relatively easy, but after breaking into countless ice slag, the scope is large, and the surrounding is blocked!

Shen Lang did not care, but still quickly rushed over to the Ferris wheel. When the countless ice \*\*\*\* was shot on him, he was holding the sword, and before he arrived, the volley pointed to Chu Xiangxiong.

Chu Yuxiong did not expect those broken ice \*\*\*\* to reinvent the Shen Lang. Just like the previous Tamron technique, it only eased and strived for a more favorable offensive opportunity for himself.

So after the icicles were shot, he had already pressed on the Ferris wheel and followed.

The two people come opposite each other, just like the hard-handed palm, which is naturally a close distance. At this time, the sword of Shen Lang pointed to the direction, so that Chu Yuxiong slightly glimpsed. He doesn't think that Shen Lang will do useless work. What is the purpose?

As soon as the thoughts started, he immediately understood what was meant!

A force that rushed to the sea, following the instructions of Shen Lang, quickly shocked! It is similar to the effect of using the Dragon's technique, but the momentum and speed are far better than the Dragon's technique, as if there is a bitter smoldering wind that penetrates his body!
