

First Strong 921

Chapter 921 - Maritime priest

This is also a very unusual experience for Shen Lang.

After the two worlds, he can be said to have had a wealth of experience, including going to the mainland of the island, feeling a more advanced and powerful self-cultivation civilization, and also feeling the black technology far better than the earth in the city.

But now the impact is to let him not know how to describe, or analogy with what place.

First of all, this energy itself is very soft and strong, just because it is too powerful and not an intentional attack on him.

In addition, such a strong energy, but just in the process of his observation in the air, or even against the big hand is not far away, but did not feel it!

After coming in this huge seamount space, he can feel more intense energy fluctuations, and the lock is transmitted from the top of the pyramid.

In turn, there are many questions based on pyramids, whirlpools, and no return to hell.

But it is only here that I feel that the energy is not known how many times stronger!

Although very puzzled, Shen Lang did not spend more time thinking about it. When the few people were screaming in the air, he directly tried to introduce all the energy into the body and quickly absorbed it. !

This energy is not a true aura, but in the instant analysis of the sacred armor, the confirmation is not a radiation that is devastating to the body, so he also wants to take the risk to try and see if this can be used.

But at the moment of absorption, Shen Lang will understand!

This is the energy of the universe!

The power of the stars absorbed by him using the “Yin and Yang Bo Ruozhen” is a homogenous cosmic energy. This submarine pyramid does not know what it is, but the energy that appears here is directly across the sea and communicates directly with the universe.

This discovery directly allowed Shen Lang to absorb the horsepower.

He has cultivated the “Yin and Yang Bo Ruozhen” to the seventh weight. The speed of the absorption of the stars is much faster. At this moment, it is surrounded by the incomparable cosmic energy. The absorption of the casualness is far better than the outside world. The cultivation of the power of the stars.

For him, it is the ability to refine and become a vitality.

It is a pity that the environment at the moment does not allow him to absorb slowly.

A black robes flew up from under the pyramid and appeared directly in the air parallel to the swell.

“No matter who you are, no matter what purpose you have, please leave there first, go to the details below, how?” The man quickly said a word, try to keep the tone calm, but obviously can hear a trace of anxiety .

Shen Lang is accelerating absorption as soon as possible. Such an opportunity is very rare. It can be absorbed for a while, which is a huge gain. Of course, he does not want to leave. Anyway, he can't figure out the situation here. He is also starting to fight. Here, the other party is a bit of a rat.

“I am the Andean high priest Andes, here I have to go to the sea to be a guest!”

The man in the black robe performed a ceremony, once again invited, but also heard from the words, he is holding back, but the mood swings have been a bit big.

Shen Lang can feel it. This person has a high realm and can control the emotions. But now he is very anxious about the top of the pyramid.

“Andean high priest, I did not intend to offend the sea, I am looking for someone! About two months ago, a group of Terrans disappeared in this sea, I wonder if the high priest is clear?”

I heard that Shen Lang finally responded, and the black robe was relieved.

“It turns out that you are looking for the group of people. They are all guests in the sea. You can see them right away. Please leave your place first, because... this has caused changes, and if there is a big change, It will directly cause the whole world to collapse!”

Shen Lang couldn't help but secretly sneak in. The change is nothing more than that he absorbed a little cosmic energy. With this little change, can the whole world collapse? Also exaggerated!

However, he quickly reacted. The “the whole world” that the Andean high priest said is not the entire earth world, but the underwater world!

This underwater world seems to be in the middle of a mountain, and the whole mountain is on the bottom of the sea, but there is no seawater infused in it. It is also a very high level of construction. All of it must be supported.

Perhaps related to this pyramid building, and this cosmic energy is likely to be the key.

If the pyramid is unable to hold up because of the absorption of a large amount of cosmic energy, the huge water pressure of thousands of meters in the Pacific Ocean will be directly collapsed by this mountain. The miraculous buildings here are compared to countless seawater. There is no difference between it and the beach mud, all of which will be shattered.

After Shen Lang just settled down, he unexpectedly felt the powerful energy, and absorbed the instinct for a time. But it's a bit cheaper. If he ruined the world because of his absorption, it's really impossible to say.

“Sorry, I don’t know if there is such an impact. I will come out and hope that the high priest will keep peace.”

After Shen Lang said one sentence, he stopped the absorption, and then let himself defend himself in layers, then flew out from the top of the pyramid and went to the air in the black robe of Andes more than ten meters away.

Just saying it is good, it is just a rat trap. Once you leave, it is likely to start. He does not want to ruin the world of others, but the world of others has suffered a devastating impact and will inevitably counterattack.

Therefore, in addition to the defense, Shen Lang is also ready to fight.

“stop!”

As soon as I saw the swells, the few people who had chased them immediately wanted to attack, but the Andean high priests opened their mouths.

“Let me go!” Andean looked at the waves and his eyes were complicated.

After that, he flew directly along the hypotenuse and flew down the pyramid.

Although several other people stopped and did not attack, they did not move on it, waiting for the ***** gesture let Shen Lang go down.

Shen Lang did not stop, and followed the Andes directly. Basically, when the front foot of the Andes landed, he followed his foot.

The pyramid is in the middle of the city, and there are huge squares in front and rear. There are two other special buildings on the left and right. The left side is like a temple, and the right side is the appearance of a royal palace.

Now the direction of the Andes falls, on the left side of the pyramid, and then he did not say anything, go directly to the temple.

Shen Lang is also following him. It seems that he should have been the Andean high priest. He was in the temple and shot at the top of the pyramid.

At this point, he is also clear, in fact, in the air before, not only the inside of the pyramid can not be found, this temple can not find out!

When Anders took the shot, they were not aware of where the real person was.

This is not only the strength of the Andean high priest, but also the speciality of this temple building.

Chapter 922 - Chamber

As soon as he entered the temple, Shen Lang immediately felt “speciality.”

And the temples in Thousand Grottoes have the same effect, directly suppressing the strength of people, including spiritual power!

Shen Lang secretly frowned, although he was very careful, but still fell into the trap. On the top of the pyramid, they voted for the mouse, even if they were not at the apex, he still had a lot of room to play.

But when you come here, all aspects are limited, then it is troublesome!

And from the Andes before the shot in the temple, there seems to be no restriction on him, or they can circumvent the method, and even may rely on the power of the temple!

“It’s really awe-inspiring, and the building of light will not be smaller than the temples of many religions on land.”

After entering the inside, Shen Lang could not help but feel a sigh.

Because I couldn’t find the inside in the sky, I can’t think of the temple from the top. I don’t think that the temple is big. Now I feel the grandeur when I compare it inside.

This is much more grand than the dilapidated temple that I saw in Thousand Grottoes.

Andean glanced at him and did not speak. He took him to the hall, which shaped a huge stone statue.

The limited number of Shen Lang, the limited understanding of the gods and religions of different civilizations on the earth, and the limited understanding of different forms of comprehensions around the world.

Now look at this stone statue, there is no clue, I don't know if this is related to any legend.

However, as he found out that the underwater world is not surprising, there are many hidden caves in the world, many mysterious small worlds, and other coexisting spaces. This is not surprising.

Besides, the legend of marine life is never lacking among humans in different regions. For example, there are the underwater dragon palace, the sunken Daxizhou Atlantis and so on.

"This is the ***** of the sea, the guardian of the sea, the supreme ***** of our sea." The Andean high priest, who saluted the giant stone statue, suddenly introduced it.

Shen Lang stared for a while, then asked: "You are here, is the world created by Poseidon?"

Andean looked at him and did not answer.

"You don't want to see the Terran? Come with me!" Andean returned to the topic.

"There is work." Shen Lang expressed his thanks.

After the change, the Andes should be more clear, but did not start to work on him, nor did he arrange more people to come, it has already expressed goodwill.

The Andes walked through several rooms with a deep wave, then opened a secret room, and then walked a long, narrow road from the secret room.

After a while, they reappeared in a room.

Although the terrain is complex and completely strange, Shen Lang does not need to memorize and analyze. The Holy Ghost has completely collected information along the way and simulated a detailed three-dimensional map.

And it can spread from the underground secret passage to the outside and the air.

So when I get here, I don't need to ask, Shen Lang has already understood that this is below the pyramid!

The Andes came to the window with the sinking waves. Like the secret road, although it was not very bright, there was a glimmer along the way, and the place where you see it is the same.

Of course, this seabed will not be electricity, oil lamps, etc. It should be some glowing ore, but the light is limited but it can be long.

Looking through the window, there is a lot of space inside. In addition to some architectural features, there are hundreds of people on the ground who are meditation and practice. They keep a certain distance from each other and do not interfere with each other.

And for a quick view, Shen Lang also saw the familiar figure.

"They are..." Shen Lang was a little surprised.

The Andes calmly said: "You also saw that they are practicing. I believe you can also guess that this is below the pyramid you see, and why it is cultivated here because it can gather the aura above!"

Shen Lang nodded.

Although I don't know the principle, I understand that this is not the aura of the earth on the sea. It is too weak. It should absorb the aura of no return to hell, that is, the aura of chaos space overflowing!

Judging from his previous feelings at the top of the pyramid, it is estimated that before the advent of the uninhabited Hell, the energy of the universe is absorbed. After all, this underwater world cannot exist after the emergence of no return to hell.

“About two months ago, they had a group of people who appeared on it. They found out the situation here, so like you, they came down together.”

Ancean continues to introduce the situation.

“At the time, there was a conflict. I didn’t say it. In short, they were large in number and strong in overall strength. Finally, we reached an agreement to let everyone retreat here.”

This sentence is very simple to take, but it has a lot of information.

The high priests of the Andes were not willing to elaborate, apparently because the masters of nearly 100 people were too strong, so that they could not hold it. Or even if you can barely fight, the cost is very large, so in the end will reach such an agreement.

This agreement is a concession for the sea people. But if you don’t make concessions, even if you don’t get robbed, you may destroy this underwater world. For the low-intensity seas, it is the disaster!

Since it is an agreement, it should also be mutually agreed. For example, if the 100-member group does not pass any news, it may be one of the conditions.

They were originally going to the no-failed Haihun expedition. Everyone would think that they might have no return. There is no news for a year or even ten years, and it will not cause any fluctuations.

They were unable to mix in the mainland of Nakajima and were imprisoned and returned. Of course, going back is also bleak. There is such a place where the cultivation speed is very fast, and it is also the best choice for them to retreat.

After a few years of retreat here, after some progress, no matter whether you go back or no return to hell, it is another emboldened.

After the Andean high priest came down from the top of the pyramid, he did not start again, perhaps because of the scruples of the 100-member group.

“others.....”

“This is a cultivation holy place. The speed of cultivation in it is very fast. It was also the place where our excellent sea people practiced retreat. Fortunately, there are more than a few people practicing, and it will not dilute the aura, not much. influences.”

The Andean is a bit embarrassed.

Shen Lang understands nod, after all, this is a hundred self-cultivators! Which martial art this gathers may cost the aura near the martial art.

The energy absorbed by this pyramid is strong enough to sustain the consumption of so many people. Otherwise, the seas will fight to the end.

“To be honest, we don’t have so many people to entertain you. If you are interested, you can go in and practice for a while. If you find them, you still need to pass the information back, you can leave, but you must swear not to leak!”

The Andes is serious.

“Can I go in and see?” Shen Lang did not have a direct choice, but asked. Although I have seen it now, I still have to look at it in close quarters to be assured that they are really practicing here.

Chapter 923 - Read memory

The Andes hesitated for a moment, or nodded and agreed.

From his hesitation, Shen Lang estimated that this place should be opened up and should be consumed. So either let him stay in it for cultivation, how long after that time to open once, or let him leave directly.

Just go in and look at it, and then quit, it is not economical and not cost-effective.

However, he did not say anything. After the Andes promised, he still did not dare to care, and secretly maintained defense and alert.

They can see the window inside, I don't know what to block, but it is a sight that can't be seen directly, nor can it affect anything.

From this room, the Andes still had to open a battle to enter the large chamber space below the pyramid.

And to open the array method, he still needs to cut the blood of his finger, which is probably the verification of the blood.

The other party is very sincere, and Shen Lang is not good at seeing it. However, whether it is from the study of the law, or from the prevention of insurance, he does not start with the sacred record.

After the formation was opened, a stone door opened on the wall and the Andes made an invitation gesture.

Shen Lang kept vigilant and then walked in.

From the window just now, it seems that it is a thin wall, but now it is a passage of several meters, and the Andes stood at the door and did not follow.

Shen Lang's vigilance is even more difficult. If the Andes is closing the door outside, then he will become the shackle!

However, in addition to their 100 people, there are still many people, who should all be sea people, and they should not be murdered.

The distance of a few meters passed in an instant. When the swells appeared in the space below this huge pyramid, there was a strange feeling immediately.

First of all, there is nothing wrong with it. Here, it has powerful cosmic energy and a large amount of aura.

Second is the energy of these universes, which is a great pressure!

Here, there is no suppression in the temple, but the surging cosmic energy must maintain the confrontation of the moment, otherwise it will not last long.

At the moment when Shen Lang felt, there was a sound coming from behind, and there was no need to look back. He already understood that Shimen was closed!

It was not a thin door, but the passage was closed.

As for the window that was seen in the outside room, it was like a one-way glass, and it was not seen in it. It is estimated that the window just made a shape, and the picture actually seen is projected through the array method.

Was shut in, and Shen Lang did not panic.

He didn't know what agreement they had in the 100s, but he didn't have anything at all. Compared with swearing, he still locked people up and didn't leak.

Now that he has come in, Shen Lang is not worried about getting out, but to solve the problem at hand.

Although the energy of the universe is very powerful, he can still linger for a while. After all, when he was on the top of the pyramid, he absorbed it well.

Therefore, at this moment, only a part of the power needs to be divided to fight, and other things can be done normally.

Shen Lang quickly found hundreds of people in the scene and found the person he was looking for – Archbishop Paul.

Among those who were former, the Archbishop of Paul was the strongest, and he also had spiritual communication, so it is most appropriate to find him. As for the rest of the people, they will not care for the time being.

In front of the Archbishop of Paul, Shen Lang carefully observed it. It is not the same as the distant view projected in the secret room. Now, when you look closely, you can clearly confirm that it is in the form of hard support!

Shen Lang took a deep breath and mentally invaded the head of Archbishop Paul.

When I was in the pastoral garden, I once came here. It was the Archbishop of Paul who was not fortified. He was invaded to help lift the mental ban.

The current situation is a bit different. Archbishop Paul is not subjectively undefended, but resists the energy of the universe and cannot stop new invasions!

Of course, he also felt that someone had invaded his brain, but there was no way, because as soon as he moved to defense, he would first be beaten by the pressure of squatting. As a result, the defense could not prevent it, and it might be even worse.

Now I can only “see” the enemy invaded...

However, this time Shen Lang only entered his consciousness, did not control his consciousness, but in this way, to communicate with him!

Shen Lang is very clear about his current situation. If he wakes him up, the result is that he is pitted. Now that he enters his consciousness, there is no such risk.

“Don’t worry, it’s me, Shen Lang. I found you, what problems have you encountered here?”

The invading enemy did not control his consciousness, so that Archbishop Paul was waiting quietly, thinking that the other party was searching for his memory. I did not expect to have such a thought!

He immediately gave a surprise, and immediately touched it carefully. After all, he had controlled his thinking and had a certain familiar feeling.

And here, unless you have already read his memory, or you will not know the waves.

Archbishop Paul immediately gave himself a little bit of consciousness to respond to the waves.

He can't even control someone to invade the brain. Naturally, it's because it's hard to distract him. Fortunately, just pass a message at this moment, and think about it in your own mind, and consume less.

“You read my memory...”

Shen Lang is now in his consciousness, almost empathy with him, knowing his current state, it is not polite.

It is only that he reads the memory from another angle, and does not increase the greater pressure of Archbishop Paul. It is only that the other party has an unusual identity. If he is not allowed to read his memory, he will offend people.

The last time he helped him to lift the mental ban, Shen Lang did not go to snoop on his memory, and he did not have any interest in the secret of the Holy See .

Now, out of necessity, he also tries to intercept the memories of recent months.

The memory to be extracted is actually more accurate and difficult. For example, it is very difficult to read only one of the days. To extract a time period, the longer it is, the easier it is to intercept.

The memory of a few months, although not too long, but a few days ago, Shen Lang tried again once in Bagan, but it can also be more accurate.

In fact, this is only his personal morality. For Archbishop Paul, it is not clear how many memories have been read. Just like someone else's computer has entered a password, letting you copy the information, if you can't stare at you, just take the test, or move all the information, it depends on the individual.

The situation in front of us is very obvious. They may have been trapped here for two months. The memory to be read back two months ago is difficult, so it's difficult to be precise. The months are all read.

Then he didn't even need to withdraw from Paul's consciousness, and he quickly merged the memory.

Chapter 924 - Cause and effect

Paul's memory is from the boat, but there is nothing special in front. Shen Lang basically knows about a certain, including those who are controlled by Yuxianmen. They all know, but now the impression is more clear. .

What really needs to be understood is the memory of leaving Yuxianmen.

At that time, Yuxianmen used a magical ship-like magic weapon to put them all together, plus almost a considerable number of people to watch, and then sent them away.

Shen Lang carefully recalled, he also wanted to find out how Yuxianmen did it. After all, you can go to the chaotic space to "fishing". There is still one hand, that is, Tangcheng, and even the whole of China, may be unique.

At that time, although he was the opportunity to escape from the people he had left, he was left with joy and humiliation, but the characters like Paul were naturally very calm.

Therefore, he had to take the lead in the core, manage and be responsible for the safety of everyone, and also wanted to understand the special technology of the other party as much as possible.

At least I want to know how to get into the world!

After all, they are not like Shen Lang, who are looking for a space crack, but are brought back in a coma, and wake up is already in the pasture.

However, it is a pity that I don't know if the people who led the team were eye-catching, or whether they had passed through the sky, or the original characteristics of the ship's magic weapon.

In short, when they are inside, they can't see the outside, and they don't know the specific direction and mileage!

If the swell is in the air, you can rely on the sacred armor to make a position based on the trajectory of the action and extend the map. For them, it is the fog in the clouds, and in the chaotic space, not to mention.

However, because Shen Lang had mentioned it, before he disembarked, Archbishop Paul asked everyone to hold hands together to avoid distraction.

After entering the air in the chaotic space, because of the fog that is too thick, they can't see or hear the surrounding situation, so they rely on the left and right people to hold hands, led by him, with the breakthrough of space barriers, back to no Return to the coastal side of the sea.

Everyone is traveling with a dream. As a result, the world that has arrived is good, but it is a lot of good earth, but it is also dangerous.

They are all people with identity, so come back so fast, but they really have no face to declare a record!

In particular, there are many friends who are Shenlang on the scene. They must not obliterate the deeds of Shen Lang's life and save them. They cannot use a unified lie to whitewash the facade.

The aura of Nakajima, including the aura of the sea that can be felt at the edge, makes them unwilling to leave.

Practice in such an environment, even if there are no other resources and adventures, the speed can be several times faster!

Like Shen Lang is progressing so fast, several times the speed is nothing. But for the old guys who are nearly a hundred years old and old, time is life!

And the high efficiency at the same time is equal to prolonging life!

For example, when someone reaches the beginning of the realm of the gods, with his talents, exercises, etc., without special resources, he wants to break through to the middle of the realm of the gods, assuming that it takes 50 years, and he may only live two. For thirty years, of course, there is no hope in this life.

However, if the efficiency of the cultivation environment can reach five times, even if the talents and exercises are unchanged, there will be no more resources. In theory, ten years will be able to break through the middle of the realm of the gods, which will allow the life to be extended. There are more possibilities.

Although the urgency is different, these are the old guys who have encountered similar problems. Now they have verified that it is a better world, even if there is danger.

So everyone is not willing to go back like this, so they are meeting on the sea.

Qiao Yuxian, Nanliuchuan and others suggested that they should be killed. It is dangerous. Try to save Shenlang back. Otherwise, if you sacrifice one of others and rescue everyone, it will be hard to live.

But people who are not familiar with Shen Lang will naturally not agree with this proposal. Even if they want to go back, they want to find another way to see if they can get to a safer place.

Even if most people don't know the situation of the sinking waves and the canoe, they are coming from behind, and they seem to come from afar. They can also guess that they are not caught in the same place, in other words. , that is, there are other entrances and exits!

If you find that entrance, you go to other places, or just find a place to practice, isn't it good?

But the problem is that they don't know how Shen Lang found it. So, if you want this plan, you will look at Paul. He hopes to know something about him if he has contact with Shen Lang.

Like Shen Lang, when everyone came, the focus was on no return to the sea, so I did not pay attention to the other.

This time, because there was a meeting on the sea next to the sea of innocence, there were as many as 100 people on the scene. Some of them took the initiative to express their opinions and tried to convince others that more and more were drifting.

If you don't participate in the debate, you naturally want to see if you can have a way to practice nearby. Although it is not as good as it is inside, it is much better than other places, but it is impossible to do it all over the sea.

As a result, some people discovered the following anomalies. Paul did not stand up and take everyone to kill them. No one else can have this influence to convince everyone. The final result is that everyone should first explore this below, in case there is a safety underneath. The door to space?

They sink to the sea floor of several kilometers, which is more difficult than Shen Lang, but because there are more people and some preparations are more adequate, there will always be people who notice that in the end, the vortex of the mountain top is discovered. After disappearing in the past, I thought it was the door of space, and the excitement quickly passed.

When the first one fell into the air, the Hai people immediately sent a few people to go up, but they did not expect one after another, and eventually nearly a hundred people came down.

Such a battle directly makes the Hai people panic.

Because it is too strong and strong. Although Andes has called the sea, it still restrains everyone, so as not to ruin the underwater world.

The final result is that Paul's negotiations on behalf of the Terran and the Andes show that everyone is not malicious, but that they want to borrow a place to cultivate and not invade the people and things in this world.

The Andes agreed after the consideration, but made a request, can not let them practice in the square on the edge of the pyramid, nearly one hundred masters of the human race, is a threat to all seas, the palace is also deeply taboo, time will certainly start conflict.

His together is to go to the secret room where they practice to retreat.

Then I selected a few representatives, went through the secret passage, went to the outside room, and checked the situation inside this huge space. I saw that there are hundreds of people practicing in the cross-legged, and it is really under the pyramid, it should be more aura. Strong.

Therefore, representatives including Paul have approved this proposal and described and proved that the other party is not malicious.

So all of them came in here...

Chapter 925 - Shocking

At the time, Andes was the same saying, just took them to the scene and said that it was very expensive to open and exit.

Like Shen Lang, I saw that there are so many people inside, and I believe that this is a cultivation holy place.

Since everyone has come up with such a place to practice for them, what else can you say? If they really want to grab it, they may not be able to get the Haizu. If they don't fight, they will both be very worried.

Of course, they also understand that since it is not easy to open and exit, it is inconvenient and not free to go in, but they need to cultivate, one and a half years, ten years and eight years, nothing to say.

The final result is that everyone has entered it.

Just coming in, it is also obvious that the vast cosmic energy, the experience is even worse than in the chaotic space, the mainland of the island, so that they are very excited, quickly find a place to sit down and start practicing.

They have not yet entered the state, they have already felt tremendous pressure, but at the time they saw hundreds of sea people practicing here, and below the pyramid, they felt that under such pressure, they could stimulate their potential, and the effect would be better. .

They don't know how long they have not encountered such difficulties. They don't realize that they are not right, but they are excited about the challenges.

No matter how much I knew about my mental strength, the last encounter in Yuxianmen gave them more experience. This time, for the vast oppression of the cosmic energy, they are also the skill of the whole body, and have the most powerful mental strength to confront.

After a while, they discovered the problem, there is no way to cultivate, all the energy is supporting the pressure, a little distraction, and immediately will feel the general crisis of the disaster!

Later, Paul guessed that there were so many sea people on the scene, not here to retreat, but may be working together to counter these pressures!

He is not aware of the source of these pressures, but he can also guess that it is related to the pyramid and thus to the balance of the world. If there are not so many people holding on to the pressure, maybe the world will not stand and collapse!

The arrival of their 100 people is equivalent to giving someone a free job and helping to fight pressure. Now they are trapped here, and it may be a lot easier for those who have been dying.

After discovering this, it is already late, and it is too late to get out.

This is not a few hundred people holding a huge stone together, but the pressure has been spread to their respective heads. If a single person wants to pull out, it will be directly smashed into waste.

As a result, Archbishop Paul did not even have the energy to think of a solution. He must concentrate on confrontation. The only expectation is that after a long period of confrontation, his mental strength and skill can be made stronger and he will be able to renew in the future. Turn over.

But that must not be realized in a short time, and I don't know how long it will last.

Only then came out of the tiger's mouth and entered the wolf's nest.

Archbishop Paul also had a bit of remorse. The last time was the spoiler of Shen Lang, which successfully saved everyone and eventually sacrificed the individual and exchanged the way home.

However, they did not cherish it. This time, they were looking for a safer place. They did not expect to be trapped again.

Can someone save them?

If the forces of the parties, such as the Pope, go out and join forces around the world, it is still possible to save them. But the problem is that they have not returned yet, and there is no connection in any way. They all thought they were exploring beyond the sea.

What about Shen Lang?

Even if Shen Lang is lucky enough to survive in that martial art, it is still in another world, not necessarily coming back, and not necessarily returning to Earth. Even if you really come back, it's hard to know that they will be underneath!

In the end, Paul was completely hopeless, only because he had a firm belief and believed that his light God God would not abandon him in order to support it.

Others, of course, have also experienced great winds and waves because of their age, so there is still no collapse in two months.

After fully understanding Paul's memory, Shen Lang has already counted it.

Paul can guess a few points, of course he is more clear. The cosmic energy absorbed by this pyramid is the largest resource of this sea!

Their cultivation, their lives, including the maintenance of this world, are all related to this.

The creators of the underwater world in this huge mountain, perhaps their sea gods, must have been measured, and the absorbed cosmic energy will not make it unbalanced.

Even after thousands of years have passed, the trajectory of the sun, the moon and the stars have changed, and the overall impact on the fluctuations here will not be too great.

But hundreds of years ago, there was a space crack in the upper sea!

I don't know if it is a coincidence, or the appearance of the crack in the space. It is related to the long-term absorption of cosmic energy by this pyramid. It directly makes the large crack of "no return to hell" just above it.

As a result, the cosmic energy absorbed by the pyramid began to change greatly. The longer the time, the greater the change!

Perhaps it is the relationship of aura, perhaps the absorption of more energy in the chaotic space, in short, let the sea people feel the pressure.

Of course, there are no god-level characters who can change the world. What they can do is to consume as much energy as possible to maintain balance. But by practicing alone, the speed is still far from enough.

The final result is that in this place that was originally used to borrow heavenly opportunities, it became a large number of sea people to help with the pressure. The number may have increased over time, and it has reached hundreds now.

When Paul's hundred people came down, Andean may not have thought about a war at all, but expressed goodwill and sincerity through showing good ways, and directly led them here, directly smashing them to thunder.

More such a large number of powerful force army may directly let them worry for decades!

Just because of the success of two months ago, even if he had the advantage of geographical advantage, he would only drive away when he was above the pyramid. When the waves fell, he would not do it again. And this time they used their hundreds of people to make bait, and tricked him into one more thunder.

Although more than one person is only a few hundredths more, for a long-term and arduous task, one more sea can save one. All he needs is to open it once.

These are the combination of Shen Lang and Paul's memory, and it is estimated that even if there is deviation, it will not be too different.

The problem now before him is that if you want to save them, you must help them to put down the pressure of the energy of the universe.

However, it is impossible for Shen Lang to be able to get down alone, or to find a way to shirk it out. The consequence is that every one person has to unload the burden, and others have to bear more pressure.

In other words, after each save, the next difficulty will increase by one point!

Chapter 926 - Retreat

The addition of 100 people is to reduce the pressure of the previous Hai people, but now that 100 people are unloaded, it will increase their pressure!

Although it is still back to the situation of two months, but "by breaking into luxury, easy to enter the martyrdom", maintaining a difficult burden, and a slight increase, still can barely survive.

Suddenly reduced a part of the weight, and has been used to it for two months, and then re-increase a part of the weight, it may not be able to hold it.

If the sea people can't hold it, will it make the world collapse?

Shen Lang does not have any feelings for this sea world. Even if it is destroyed, there will be no psychological burden.

But the question is, what will happen to the collapse and destruction of a small world? Will it cause a tsunami and directly hit the Pacific Rim?

More importantly, they are still here, they still need time to crack the array, leave this underground space, pass the secret road, the temple, and then leave the world from the outside, and then rise thousands of meters to reach the sea...

If the moment collapses and ruins, it will not give them time to escape.

Another troublesome question is how to get out and still need to study. Otherwise, even if everyone is saved, stay here, and wait for a long time, you must fight again, and you will fall back into it!

And Shen Lang himself, how long it can resist, it is not known, if he is also caught in it, then everyone can not be separated.

These difficulties make Shen Lang not dare to neglect, and must make a decision immediately.

He thought about solving Paul's problem first. One more person can discuss it. From Paul's memory, even if he is freed, he will not play much.

And it won't last long, but it will continue to fight these enormous pressures, which is tantamount to useless work.

It seems that Shen Lang can only rely on himself!

Not to say that they have saved all of them, that is, he wants to leave and leave, and he must rely on his own way.

His brain is also a quick analysis. All the problems are, in the final analysis, a problem – the pressure of the cosmic energy here.

If you can solve the unbalanced energy pressure, then others will not be helpless, and there is a time to solve the open-up method.

Can he solve this fundamental problem?

Honestly, Shen Lang himself has no confidence!

If he can't solve it, the result of taking the initiative to confront will be as riddled with everyone.

After Shen Lang hesitated, he still began to try to absorb these cosmic energies.

When he was at the top of the pyramid, he had already experienced it. These cosmic energies, after the seventh weight of the "Yin and Yang Bo Ruzheng", can be absorbed and refining, and his cultivation effect is excellent. .

The concentration here is actually not as good as the top of the pyramid, but because of the cumulative accumulation, the overall pressure is greatly different.

When he began to absorb, the cosmic energy that formed pressure on him was immediately invisible, because it was directly absorbed, and the pressure was relieved.

Soon, I realized the progress of this cultivation, and Shen Lang could not help but secretly feel.

From a certain point of view, the Andean high priest did not lie. This is indeed a cultivation of holy places. It is a year of retreat here, comparable to more than ten years or even decades.

Of course, the premise is that you can absorb this energy directly like him, otherwise it will be as hard as other people.

They are not doing anything for the time being, and Shen Lang is also relieved. What is needed now is to learn more about the environment here.

He can't see the outside from here, but I believe that the Andes must still be in the secret room. If he has more movements, it will inevitably make the Andes doubt, so there are other actions against him.

So now, after starting to cultivate, it is similar to the appearance of other people, as if it can not stand the pressure to begin to resist.

He didn't know how long the Andes would observe, but in his capacity, he shouldn't be staring for a long time, so he would practice it for a few days.

A glimpse of the past ten days!

These ten days of deep waves are twenty-four hours of sleepless retreat!

Normal practice outside, eating and sleeping, and all kinds of entertainment, can have eight hours of absolute time, it is very good. Now he can't sleep for twenty-four hours, that is, one day is equivalent to three or four days, and ten days is equivalent to one month.

The cosmic energy here, after the convergence of this special pyramid, is now a mixture of the energy of chaotic space, compared to Shen Lang himself to absorb the power of the stars, at least dozens of times faster!

Simply put, these ten days of harvest are comparable to quiet cultivation outside for several years.

This also allowed the sinking wave of the peak of the realm of the gods to be achieved, and the strength was improved a little bit, once again reaching the edge of the breakthrough, but there was still a lack of opportunity.

For the higher level of modern comprehension, it is not clear what the name is. In terms of the overall strength of the current comprehension, there is no higher level, and it is not known.

Therefore, Shenlang follows the habits of his last life. If he can break through, it is to reach the semi-fair realm.

This cultivation environment makes Shen Lang very embarrassing, even a little addicted!

According to this speed, it is a year of retreat here, comparable to the outside for decades, and the speed is as good as the mainland of the mainland, and it is not comparable.

However, he still resisted and did not continue to cultivate.

Because other people can't live for a year, it's hard to say!

Hundreds of people in the sea may not be one-off. If you go out for a whole year or half a year, let other people come in and squat, then they can circulate.

Hundreds of Terran people are invaders, and the sea people can't wait for them to be the main force to squeeze every effort.

Shen Lang is the consciousness of entering the Archbishop of Paul. Knowing that the pressure on them is great, if you persist for a year or a few years, even if the willpower will become very tenacious, there will be many damages.

Besides, he came to save people this time. The comprehension community is waiting for him, and his relatives and friends have not gone back for too long, only to worry about his safety!

After Shen Lang stopped moving, he felt the situation on the spot and found that after his uninterrupted absorption, the ten-day time was to relieve some of the cosmic energy pressure inside.

But after all, it's just a person, plus the time is short, just like a person madly drinking, it is difficult to drink a pool of water.

However, he has become more powerful himself, and he has no problem for a certain period of time. Then he can start to solve the problem of export. Once the export is settled, he can begin to help others to get out and fight for a one-time rescue.

Before starting retreat ten days ago, he made an arrangement first, and now it is time to examine the effect.

Chapter 927 - Unexpected black technology

All the arrays are actually traceable. For example, the gossip array is arranged according to the different combinations of gossip, and the more complex combinations of gossip plus five lines and sixty-four lines, just like passwords, the more the number of digits combined, the more difficult it is to crack.

When he came in, the Andes opened the array, and the Shen Lang was recorded with the Holy Grail. Before the retreat, according to the direction of simple analysis, an order was issued to the Holy Grail, so that the Holy Ghost began to calculate.

In other words, he confirmed a direction, and then let the wisdom of the holy armor to calculate, use the exhaustive method to crack the array!

Exhaustive natural consumption will take a long time, but the water quality of the city's black technology in the basin is astronomical. As long as it gives it a direction and law, the possibility of calculation is still very large.

Anyway, Shen Lang began to retreat and practice. The loss of this time will not affect him, nor will he be eager to use it, but it will save time for himself.

Now I have adjusted the results. Sure enough, I have calculated the various combinations according to the probability.

At this moment, Shen Lang reversed the reaction according to the combination, and immediately verified that the optimal result is correct.

Just one thing is not very sure, it is blood test.

When I came in, it was Andes that cut the blood of the fingers and verified that the blood of the high priest was the key "key"? Or can all the blood of the seas be?

If it is the blood of the high priest, there is really no way in it. Must wait outside to open, or try violent destruction!

If it is a sea, then there are a lot of sea people here, you can reach it by bloodletting.

Now there is a problem with Shen Lang. Is it to try to open the door first, or to liberate other people first?

The liberation came out, but the door could not be opened. They could not persist for a long time and immediately returned to the previous state.

The door is open, and if people have not had time to liberate, it will inevitably allow the Andeans to come outside to be a husband, or other blockade.

In a little bit tangled, Shen Lang unexpectedly found another problem!

In accordance with the process of command calculation, the sacred armor first scans all the various data in this space before it can begin analysis and research. This includes the energy of the universe!

As for the analysis of these cosmic energies, it has reached a certain conclusion. It should be that the city-states in the basin have studied this aspect, and that is the same.

This unexpected discovery, let the Shen Lang accident, immediately began to query this information.

Although there is no internet connection here, there is a huge database in the holy armor, especially the latest one is the top equipment of the blue sea family, so there is also this information.

After understanding, Shen Lang discovered that for the watershed city-states, these energies are also studied and used, but they are also difficult to obtain. They can only be applied to cutting-edge technology and are not as common as spar energy.

After a deeper understanding, I found that they have a collection technology for this energy!

collect!

There was no such thought before Shen Lang.

Those places where the aura is full, such as the mainland of the island, or the dead forest that is relatively easy to enter, should collect the aura and take it away. The price/performance ratio is very low. It is better to find a Lingshi and a medicinal material.

So even if it is closed for ten days, he is also improving his personal strength, to see how effective it is, never thought that one person can absorb all the cosmic energy.

But now this is not the same, if the river city has a collection of technology, maybe it can really solve the problem here!

Shen Lang is not sure what to do, but from the black technology of the Holy Grail, it is still quite confident, so directly ordered, so that the Holy Ghost began to collect these cosmic energy.

If you can really collect it, then he doesn't have to spend time here, he can absorb it anywhere.

After getting the order, the holy armor began to work.

In order to avoid being shocked by himself, Shen Lang even thought about whether to take off the sacred armor first... but in the end, he kept his alert and slowly absorbed it. He prepared to stop the collection of the sacred armor once he could not stand the impact.

The absorption of Shen Lang, like a person drinking a lot of water, after all, still need to absorb this water, the speed is limited, it is difficult to drink a pool of water alone.

But now the way of the holy armor is like using a water pump to pump water to another place, without having to consider the problem of absorption and digestion, the efficiency is naturally different.

Although there is this technology in the G-3, there is no related reserve refining equipment, so it is not concentrated into liquid and solid, but only collects all the cosmic energy into a miniature space.

The external form of the sacred armor is a tight-fitting suit, but when necessary, it can extend arms, armor, aircraft, etc. These are all shrunk in the folding space, and now these cosmic energies are also stored. .

The mad “pumping water” generally absorbed, and in less than half a day, hundreds of people on the scene felt a huge change. They found that there was no great pressure to sway, and the whole space became harmonious.

The members of the Hai people still maintained their responsibilities. Although they changed, they did not change until they were ordered by the high priest.

But Paul and other ethnic monks found that they could get out of the way, and of course they would not continue to fall in.

However, they have been struggling for two months. Even if they get out of the way, they need a little time to recover. It is difficult to get up immediately.

Fortunately, they all know that they are in a dangerous place. They don’t know what is going on now, but they certainly shouldn’t stay for a long time. They have recovered a little. They are all hurrying up, and they are carrying the medicinal herbs. They quickly find out to swallow them.

“You are the master of Shen Lang! Master Shen Lang has come to save us! No, it is another time to save us!”

Archbishop Paul knows that Shen Lang has come. These ten days are also a painful suffering for him. The days are much longer than before. Every time he spends an hour, he feels more desperate.

Now that he has finally got out of the way, he can’t help but let go of the identity of the Archbishop and cheered like an ordinary person.

Hearing this voice, the people who had not slackened from the tight state slowly returned to God, and then searched and saw Shen Lang.

Shen Lang does not need to work on his own, of course it is very easy. Seeing their wilting, they released the power of the spirit, expelled a little fatigue for everyone, and also sprinkled a bottle of Lingquan, flying the fountains to everyone.

The spirits of the people, not polite, directly swallowed Lingquan, for their realm, this direct absorption can quickly make up for the loss.

“Thank you for the help of Master Shen Lang!”

After someone shouted, everyone shouted.

At this time, other sea people who were still continuing to be awakened by their noise, gathered together, and watched the strangers who appeared in the forbidden room.

At this time, the place where I came in, the sound of opening the door...

Chapter 928 - negotiation

It was discovered that there were many strangers and the awakened sea people kept their vigilance, but they did not act rashly before they figured out the matter.

Also seeing their awakening, the first step of the waking up of the human race, and immediately rushed to the surrounding waves, immediately in this huge underground space, formed a distinct battle between the two armies.

And the opening of the entrance and exit, some people quickly came in.

It was the high priest Andeans.

Seeing the inside situation, Andes was stunned and felt the environment inside, which made him more cautious.

Seeing the Andes coming in, the seas hurriedly greeted them and saluted him.

The Andes waved everyone to be quiet, and then quickly reached the front of the waves.

“What have you done?” Andean stared at the eyes of Shen Lang.

Shen Lang smiled slightly: “What have I done, need to tell you? The High Priest said that let me come in and see, but it is blocking me, I have not given me an explanation!”

Andean shook his head: “That another, what did you do, why, why...”

He wants to say it directly, and may also care about hundreds of people at the scene. After hesitating, he will voice to Shen Lang.

“The energy here is more than acceptable, so we need everyone to contend. This process of helping the resistance is also a process of tempering. Therefore, you guys, I have not imprisoned them, nor harmed them. It is indeed Let them practice here.”

“And you, I don’t know what you did, now the energy here has been reduced, it has not been strong before, and it is still obviously weakening.”

“What is needed here is balance! Too much, the world can’t bear it, and it’s too weak. The world can’t support it anymore, it will be collapsed and destroyed!”

Others looked at him with a look of excitement, but without sound, he could guess that he was talking to Shen Lang in the voice.

Shen Lang smiled slightly and also gave him a voice: “What is that about me? You didn’t tell me the specific situation, including them. They all sneaked us in for your use. Now I worry about the imbalance? If it is me.” Ghost, do you think I will stop?”

“No! You have to stop. It is not my own problem. I can even escape. But our maritime owners, innocent old and weak women, will become victims!”

“You, and all your friends, have no time to leave here, everyone is buried together in the sea! And it will trigger the wrath of the sea, and then the roar of the land! The land can’t fight the ocean!”

The situation that Andean said is similar to that guessed by Shen Lang.

This concern has also been caused by Shen Lang. It was feared that the two battles would lead to collapse. I didn’t expect to be able to extract the energy of the universe, and this would make the Andes helpless!

“So? Are you ordering me now?”

Shen Lang's smile turned into a sneer.

The Andes is dumb.

He is not very familiar with the situation on land, and he is also well aware of it. It is not completely untouched.

It is at the center of the ocean, and it really wants to cause a big tsunami. There are thousands of miles away from the land. I don't know how much it will weaken when it arrives.

Even if it is really destroyed on the land, it should be the residents of the coastline. After landing, the power will be lost. Beaches, buildings and mountains will greatly block the tsunami.

For the strong people at this level, ordinary people who are completely unaware of death and injury should be incapable.

After all, the number of human worlds is said to be billions!

But...they are only a small world in the sea, and all the people have only these. If they are destroyed here, then they will die!

Even if the strongest ones can escape, the whole homeland is gone, and it is difficult to develop a family and a home.

"Not an order... I am asking for you." Andean's attitude was soft.

Shen Langhehe smiled, did not say anything.

"You stop first, everyone goes out first, we discuss the solution separately. You... I have promised you to ask me." Andean once again pleaded.

Shen Lang is really undecided: “You used to swindle them here, and then I scammed me here. Now I want to lie to us and start again? We don’t want to go out, the effect of cultivation here is really good. Right here. Ok, you can continue to block us.”

The face of the Andes became ugly.

This place is a very important core area for the sea people. If it is controlled by outsiders, even if it is blocked from the outside, it will still not change the situation of destruction.

It’s like locking a gangster in the cockpit and cab. Even if the gangsters can’t get out, they can’t control the plane and the train. The people inside can take it to where they want to go, or even destroy it!

Shen Lang’s absorption of cosmic energy has already begun to affect the balance here. If it continues, it will directly lead to problems.

“Don’t force us, we don’t want war! We have already avoided the bottom of the sea, do you still have to kill them?”

“Don’t buckle big hats, we don’t represent human invasion, and you are pitting us first. As for war, if you want to use this to threaten me, you can try it!”

Shen Lang snorted, and there were nearly a hundred members of the sea in an instant, and he was attacked by his mental power!

These sea members have a longer mission than Paul and others, and of course they are more vulnerable at the moment. And this is also a sneak attack, but after all, those who can come here to perform tasks are strong.

Shen Lang is just a meditation, and he knocked down hundreds of people. The scene is still very spectacular and very shocking!

The Andes also took a breath of cold, the young man in front of him, the strength far exceeded his expectations.

Soft and hard will not work, so that he has no temper, can only ask for mercy What do you want to do in order to stop? ”

“This is my sincerity.”

During the speech, Shen Lang stopped the collection of the Holy Grail, and the energy of the universe stopped changing and maintained a state of balance.

For this very sensitive Andean, I immediately felt it and I was relieved.

“Then it is to see your sincerity. If you are not here, go out to the top of the tower, or on the sea, you have too many opportunities for you.”

After Shen Lang finished talking to him, he did not pay attention to him, but greeted him and let everyone leave from the entrance.

These big monks, who had wanted to go back here for ten or eight years, once again suffered a blow. If it wasn't for the sake of the waves, they would save them again. This time it's not a farm animal, but a cool life!

No one is interested in staying, and quickly and quickly leave the passage.

Chapter 929 - Ignore the sea king

After everyone came out along the secret road, Shen Lang reminded everyone that they should not stay in the temple.

This situation is believed that they all can feel it themselves, and the support is sleepy for two months, for fear that they are confused.

Going out to the square outside, will not be bound by the power of the temple, and can have more room to play, with their number, even if there is no advantage, it is enough to protect themselves.

In addition to confessing to those other people, Andean quickly followed up with Shen Lang.

At this distance he came out, he also thought about what “sincerity” to pay.

Originally, he was jealous of Shen Lang. They stayed in this underground space secret room. As long as they went out, he would not have to vote for rats.

But the words behind Shen Lang made him very passive. There are hundreds of people rushing to protect themselves, and it is not difficult to sink the waves to the top of the pyramid. It is the same as the destruction and the destruction in the underground. It will be more convenient even on the top!

Even if all of them have withdrawn, and then the outside of the sea will be destroyed, for their seas, it is also impossible to prevent.

So there must be a gentleman’s agreement.

However, their previous agreement has already made the other party angry, and if they want an agreement, they must come up with compensation.

If Shen Lang really spoke of specific requirements, he would have to consider it and give it? Can’t give it? These are all measurable.

Now throw the problem to him and make it difficult for him.

Give more, naturally distressed, give less, may intensify contradictions.

And how much is more? There is no standard. If you want to solve the problem, he can only give it a little more within the scope that he can accept.

When Shen Lang appeared in the temple, he saw that the king of the Guardians was in the inside. After seeing the high priest, he ignored him and quickly went to see him.

Look at this, it should be the contemporary sea king living in the palace on the other side of the pyramid.

The influence here is no longer a high priest. It is estimated that all the sea people feel it, so the sea king is also coming in person.

Shen Lang did not pay attention to it. He did not say hello to them and went out with the temple directly.

The high priest also happened to be squatting in the dark waves, and discussed with Haiwang.

From the bottom of the pyramid, everyone has a feeling of breathing fresh air, and the rest of the life is fortunate, so that they are embarrassed.

“Shen brother, how did you escape?”

“Yeah, after we came back, I was worried that you would have an accident there. I also suggested that everyone kill it again, but it wouldn’t affect too many people.”

Nanliuchuan and Qiaoyuxian are also surrounded by Shenlang and feels up.

“I am fine, I have my way.” Shen Lang smiled.

“Right, small drop...” Liu Yuchang remembered the canoe, which was down to him to take care of him. In the end, he could not protect himself, and he did not take care of the boat.

“Do not worry, the light boat has returned to the Tianshan Ice Palace. The Lord of the Ice Palace, I am still worried about you.”

In the words of Shen Lang, Liu Yichang was just relieved. The latter sentence made him look red, and quickly hit a haha.

“I have also seen Joe and the South, and they are worried about you. I promised to come out to find you again.”

Shen Lang then greeted the people who had thanked him, Zhang Zhanlang, Zhu Zikai and others, and said that they had seen their family members.

“Black Dragon King.”

Because of the limited friendship, the Black Dragon King only thanked him and did not leave a visitor.

He was surprised when he heard the shivering call to him.

“This time, I really want to thank your younger brother, Bagan. If it is not that he has sensed that you have returned to Earth and have been on the earth, even if I help you search again, I will go back to the place I was looking for. It will also be a bamboo basket. An empty space.”

Although this does not need to be disclosed to everyone, it is still necessary to emphasize the contribution of Bagan to the Black Dragon King.

The Black Dragon King nodded slightly with a smile.

He can understand what it is, but he guesses that Shen Lang also understands.

After nearly a hundred people were chilling, everyone once again expressed their gratitude to Shen Lang. Other foreigners who are unfamiliar will also thank them. The Archbishop Paul, who had worked together before, was very enthusiastic.

Shen Lang can save everyone back, and his meaning is even greater. Because among the heroes, he relies on the prestige in the West, plus his own strength is the strongest, how much is the role of the core leader.

He also has this sense of mission, the first time it is, after all, he was also caught in a coma. But the second time, in the state of being awake, he did not take a good road, and he really had an accident, as if he had harmed everyone.

Shen Lang rescued everyone twice, and he did not make him a big mistake.

Now he also knows that Shen Lang is negotiating with the other side, so he is also firmly standing on the side of Shen Lang and organizing everyone to cheer for the Shenlang platform.

Many people in the sea have been hiding. Now there are some royal guards and clergymen who are watching them in the square to prevent them from coming to the land.

The sea kings and the high priests in the temple, even in the face of such a big event, dare not negotiate for too long. If the hundred people violently walk outside, the impact on the world is enormous.

After a while, the high priest Andes came out personally and invited Shen Lang to go into details.

Qiao Yuxian, Nanliuchuan and others immediately spoke, let them talk about anything outside, and can't let Shen Lang enter a temple to talk about.

Andean is in a difficult situation, they are already a faceless face, but they can't be shamelessly open! Otherwise, how can the royal palace and the temple continue to maintain prestige?

Shen Lang can be imagined, and he is to accept the benefits of "sincerity", of course, do not want to be in front of everyone, or else others will be jealous.

So he nodded to Jonan and others, and Archbishop Paul, who nodded to signal that they were vigilant outside, and then re-entered the temple with the high priest Andes.

Once again in the temple, Andes took him to a room. The sea king he had seen before was already in the screen, and now they only have three of them.

"This is the king of our sea, deep Dell." Andean brief introduction.

Deep Dale Wang maintained the dignity of Neptune, only nodded to Shen Lang, expressed politeness, and did not stand up and salute.

He is not polite, Shen Lang will not be polite, directly ignore him, and look at the Andes again.

“Call me to come over and talk, let me talk about it! I believe that you don’t want to see us stay here.”

Shen Lang’s disregard of Neptune made the Andes a little embarrassed, and the deep Dell was frowned.

“Yes, we invite you to come, it is to offer our sincerity, and there are things to discuss with you.” Andean quickly introduced the topic to the topic.

Chapter 930 - Thick gift, small request

The Andean high priest, after two simple confrontations, has already understood that Shen Lang is not hard to eat, but also has mysterious strength.

So I didn’t let the topic go wrong, and directly took out the “sincerity” they had prepared.

This is placed on a tray with a number of shells inside, and the shells contain the things they want to give.

“These three are deep sea yin springs. For some special exercises, they have amazing effects. It is also very powerful to make a magic weapon, even if it can be used directly.”

This point of deep wave is deeply understood. Yinquan is originally extremely cold. Ordinary people don’t say touch, they may be frozen near, and they will pour out directly. If the realm is not high enough, it will be frozen. Infuse it in the magic weapon, play the extreme cold, and the attack power is really good.

This is the Yinquan in the deep ocean of the Pacific Ocean. It has never been touched by anyone. I don’t know that it has been formed for hundreds of thousands of years and hundreds of thousands of years. It is much stronger than what he encountered before.

However, this thing is really useful for Shen Lang. Whether it is raining or falling, it can be used.

“These three copies are the special pearls of our sea people. They can solve a hundred poisons and cure all diseases. Exaggerated, there is no problem in getting back to life.”

The three beads are taken directly, and without feeling touched, they can feel full of comfort.

“The two are the inner Dan of the 100,000-year-old deep-sea turtle. If you can’t ask for it, it’s us. It’s not necessarily a hundred years, and it may not be able to capture the kill.”

Andean introduced the eight gifts on the tray, and then said with sincerity: “These things are the treasure for our sea people. It is the royal palace reserve that our sea kings have come out, which represents the greatest sincerity of our sea people!”

“What are your requirements?” Shen Lang asked directly.

He is acquainted with the goods. The two inner seas of the deep sea mysterious turtles are indeed extraordinary. They may be exaggerated in 100,000 years, but tens of thousands of years are possible, at least for more than 10,000 years.

A single one is nothing, and eight copies add up, the value is not small.

“Yes, we do have a small request. If you just want to let you let go, then paying so much compensation is not a shame for us. Although the Hai people are not many of you, we are all warriors. For dignity, we can also fight to the last drop of blood!”

Listening to the impassioned words of Andean, Shen Lang is just laughing.

If it is so hard, I have already started. They didn’t do it two months ago. They didn’t do it ten days ago. It just restrained everyone. Everything shows that the sea is not a violent group.

Perhaps it is because there are few local villains, perhaps because of long-term partiality, there is no fighting blood. Of course, it may be purely a personal decision of the high priest.

Now his remarks, that is, for the generosity of his face, are still in front of their sea king.

“First of all, you have to make sure that everyone will not come again in the future, and will not reveal our secrets!”

“Secondly?” Shen Lang did not agree with anything, first ask all their requirements.

“Just that one must be guaranteed, the latter is our small request, and this request is related to you personally. We hope to cooperate with you!”

“Cooperation?”

“Yes! I don’t know what you can do to absorb the energy of the scorpion. Our sea people are loyal, don’t swear, and don’t get your method with disgraceful means.”

Andean makes his expression as good as possible, so as not to cause misunderstandings.

“But you should also know that this is a big crisis for our world. It is the sword of Damocles hanging over the head. And we need it again, no, no, and can’t eradicate. Our little The request is that you hope that you will come over regularly to help absorb too much energy and keep it balanced.”

Confidentiality is not difficult to understand, but this request is not thought of.

His absorption today, with his departure, can be slowly absorbed in the future, used to grow up. However, after encountering such a situation, the Haizu will certainly take strict precautions and avoid directly letting them in.

Unexpectedly, the Andean’s small request was to ask him to help solve the problem of excessive energy in the universe.

“I did understand your problem. There is no way for you to use it. Similarly, I do have a way to solve this problem quickly...”

Shen Lang acknowledged this, but did not say it later, let the Andes and Deep Dell King stare at him, waiting for the words behind.

“I have no enmity with the Hai people. I don’t want you to be bothered and collapsed. So if I can help the peace of the Hai people, I am willing to help. But I don’t know much about your situation, probably. How long does it take? If it is too frequent, then I can’t do it.”

Shen Lang is also very straightforward.

Neptune and the high priest were relieved. It was not a big opening for the lions. They were afraid that the waves would sit on the ground. If the cost is too big, then it is better to use the old method.

“This one is not a problem. To accumulate to the previous level, it is a long time. Now that you have made it weak, it will take time to balance back slowly, so look at your time. If you have Time, once in three or five years, if there is no time, a little longer, we can hold on.”

The Andes also said very sincerely. After all, it is a “small request”, but in fact these hundreds of years are big problems that bother them.

Although their own people can take turns to perform their tasks, so many people have been delayed, which directly affects the development of the sea.

Shen Lang thought about it, this is no problem. His concern is that every month or every year is fixed, so it may not be possible, three or five years or even longer, then it will have no effect.

“You ask for this I can promise, after all...”

He pointed to these things in front of him: “You gave me a gift, and I need to promise to do something, or else it seems to be extorting you. But...”

“But what?” Two people who were just worried, I heard a busy question.

“But these people are not all my friends, not my men. I can propose, but I can’t restrain them, or even if they verbally agree, they will come back in the future, and there are definitely more than ten eight. ”

Regardless of whether this is a help or a transaction, Shen Lang can only promise part of himself, and others will not bear it.

Once he has promised, it is a troublesome thing, can’t always stare at them? Nearly 100 martial art families around the world!

Not to mention the delay time, even if he is bored, he really did this. Others would not think that he is trustworthy in the sea, but he would think that he wants to swallow the resources of this sea world!
