

First Strong 941

Chapter 941 - Deep underground

Of course, it is very exciting to fall into the river. This is her long-cherished wish.

Falling rain and falling canoe are also relieved.

After they knew the secret of this division, they were not excited and expecting, but they were under great pressure.

According to the plan, Master is going to be with them, and the warnings of the death of the gods will definitely make them nervous.

But this is Master's lifelong wish, and if she is advised not to go, it will appear that "you can bear it, even the Master is not willing to bring it."

With the deep waves, the natural safety factor has increased greatly. Even if they are difficult to guard and complete, Shen Lang can bring Master back.

It is not too late, the original Shen Lang did not come back, they are also to explore, and now just arrived here, of course, it is not convenient for him to run another.

Since Shen Lang did not need to prepare anything, he immediately started this adventure program.

Of course, they have already had some preparations, and the most important one is the information about this underground palace.

This piece is the clearest of the river, and I don't know if she has completely revealed it to the canoe and the rain. But now it's four people together, naturally she arranges everything.

The Canoe has already arranged the affairs of the Ice Palace. At this moment, the outside mountain gates are closed and people are prevented from entering.

Then a few of them, not in the main room of the palace, but in the place where the river was rushing to retreat.

In the stone room, Luohe started an organ that they did not know. It also revealed all the methods that were opened to them in detail.

Look at this, she is still ready to go back.

The organ opened a well-covered stone gate, and then a cave with a strong yin.

Four people entered the same time together, and Luohe detailed the method of closing. Obviously she had started to come in and even came in regularly.

Then he walked down the river and took a glowing stone and took them all the way.

It is not far from the depth of the cave. After all, the Ice Palace is built on the entrance.

“The front is.”

With the river falling, they have come to an end, and the front of the river has stopped.

When I got here, I didn't need the glowing stones in the hands of the river, and the front was bright!

Shen Lang has not yet gone, and God has already noticed the situation before.

The front is like a mine, which has been falling down to the bottom. On the stone wall around the “mine”, there are many glowing stones that illuminate the inside.

“The founder closed the place, left a path, and created the ice palace outside. All the ore of the ice palace is naturally from here.”

Looking down at the river, it was a bit embarrassing.

Looking down from where they are, it's completely bottomless!

Generally, in such a situation, if you go deep into a few hundred meters, the light will not be illuminated, the darkness below, or the visual becomes tiny, so you can't see the bottom.

But there are always shining stones here, but they still can't see the bottom. When they finally see their eyes, they are a bright spot.

"Come here, practice here, the speed of progress will be faster. I have always enjoyed this privilege. The reason why I didn't tell you is that it involves the secret of this division."

"But below, it is the forbidden land left by the ancestors. If it does not reach the realm above the equivalent of the gods, it is strictly forbidden."

Once again, the rivers can only be sighed by the ocean. Now, finally, there is a chance to explore the secrets!

"You can rest assured that we can complete the ancestral training."

Shen Lang is secretly calculating, taking the altitude of at least six or seven kilometers here, even if it is a few kilometers deep, it is nothing at all, far from being deep.

Therefore, this underground palace, if it is not relative to the Tianshan Mountains, at least to fall more than 10,000 meters, can be regarded as the depth of the ground.

This analysis is also an expectation for oneself, not to worry about falling for too long.

At the same time, he will also calculate the distance of the decline through the Holy Grail and see how far it is.

"Go!"

Shen Lang drove the cloud disc, brought them together, and then flew down.

In their current realm, it is that the river can also fly down, but in order to save, and in order to make everyone more calm, and one layer of protection, Shen Lang did not solicit opinions, directly used the magic weapon.

In the process of falling, he did not play the speed of the cloud, but like the elevator, keep watching the speed around.

After confirming that there is no speciality around, but it is almost the same situation, it has accelerated a little faster.

In addition to calculating the distance and speed of the drop, Shen Lang also explored below through the holy armor, and his knowledge is also explored. If there is danger, try to know in advance and escape the cloud.

After a period of decline, the knowledge of Shen Lang and the exploration of the Holy Grail are confirmed to the end!

“Be prepared, there are still about a kilometer or so. It seems that there is no danger.”

Hearing the reminder of Shen Lang, several people who had slowly relaxed because of the slow drop were alarmed. Although Shen Lang said that there seems to be no danger, no one can determine the following situation.

In the case that everyone is ready, it will come to the bottom of this crypt.

Shen Lang has already investigated and there is no problem, so the cloud disc is collected.

When you came down from a height, there were always glowing stones along the walls, but when you got here, you found that it was not worth mentioning. All of them are glowing ore!

“It seems to be artificially excavated, but it is incredible to dig out such depth. If it is not artificial, then nature is too powerful.”

The canoe quickly looked at the ground and saw that the ground was flat, as if it had been cut. Look up and look up, you can't see the top of the top.

Falling down and expecting the world of the palace that I don't know for a long time is such a situation that makes her a little excited and a little disappointed.

The two of them are probably discussed with each other When the canoe is checked to check the surrounding situation, the rain is the casual bodyguard that follows the river and acts as her bodyguard.

Shen Lang went to the front of the place, then slowly extended his palm.

His palm did not touch the glowing stone wall, and there was already a force that had been pushed forward.

A few of them looked at them, and immediately saw the sound of a pile of glowing stones collapsed!

Then there was a series of collapsed sounds, and in the case of several of them keeping their guards, there was a big hole in front!

Because the light here is as bright as white, even a bit dazzling, so the front hole is also unobstructed, it is like a passage to the side.

“Go!” The river was a little excited.

There is still a new road, which is the secret forbidden land she hopes, especially after the ore collapses, it feels the yin of the cockroach!

Chapter 942 - Stone giant

When Shen Lang was preparing to move forward, I did not expect that Luohe had already flashed in quickly!

Falling into the canoe and falling rain, keep up.

This made Shen Lang secretly frown, and the move to the river made him feel that there should be something to tell them.

And rushing to travel, it is likely to follow the footsteps of Fuyang real people!

Fuyang real people do not know that there will be this situation, just want to exert a little force. Falling down obviously wants to add a little more power, but she probably knows that there is danger ahead, using her own life to open the way for the disciples!

Frowning and frowning, the speed of the waves is much faster than them. Between the thoughts and movements, the ghosts have surpassed them three and went to the depths of the caves.

After arriving in the front, Shen Lang naturally blocked them, and Luohe understood his meaning, and he inevitably rushed past him.

The Shenlang is still a two-way exploration of the holy armor and the gods.

So deep, everyone feels more and more yin, and this hole is a growing trend!

From their point of view, it seems that it is now in the bottom of a water, above, below and around the stone wall, are bright ore.

Such a large mineral deposit, if developed, is simply rich.

However, the Tianshan Ice Palace will not be greedy, and Shenlang will certainly not care about this.

Suddenly, Shen Lang's heart is warning!

God and the Holy Grail are also sources of reconnaissance. In the space that became big in front, there was a change, as if the ore around was alive!

“These ore are weird!”

Shen Lang sighed, then stopped and stared at the front.

The ore that has changed its behavior has become even more strange, and it has turned over quickly to this side!

Falling into the rain and falling into the canoe, the falling river guard between them and the sinking waves, their eyes are also staring at the front.

The ore that rolled over to them was not very fast, and the distance was far, so they just kept watched and did not react.

Because both are bright and shiny, the illuminating ore that falls on the ground of the channel, in fact, many will be blind spots in the visual, the actual number is even more than the one seen.

But there is a strange feeling, as if the number is getting less and less...

“They are merging!”

Shen Lang’s knowledge of the whole situation, including the direction of coming, is already at the foot and above. At the same time, through the sacred concentrating to enlarge the specific picture in front, see the slowly rolling ore, merged in pieces.

Because it is not close, plus all are bright, so the light is visually seen to see the scroll, it is only found to be decreasing.

merge?

Everyone is a bit strange, these ores are also magnetic?

According to the experience of so many ore in their ice palace, there is no magnetism, but this place is hard to say. They can fall off on their own and roll over to them. It is already very abnormal.

“If it is merged, will it eventually...” The canoe frowned.

Her words did not go on, but everyone can guess a few points.

If there is any organization, or if there is any design, you can let these stones roll and merge, and finally block the road.

If this is the case, it is not a problem. It is not difficult to break open, or it can only be a warning, let them go back.

But what if these mergers would be spiritual?

This speculation has appeared in everyone's mind. When there is no further inference analysis, the stones that have rolled over in the past have been merged more and more, and the speed has begun to increase, and the naked eye can clearly see. To.

Shen Lang reached out and Ju Yuejian appeared in his hands.

A few of them also started to prepare for the battle immediately, and there was no saving in the canoe, and the nebula chain was also ready.

When these ores rolled to less than a hundred meters, they watched the rapid merger of the stones, and more small stones fell and merged, and the appearance of a stone man began to appear!

Shen Lang waved his hand backwards, indicating that the two of them had protected the river, and then they had already taken a few tens of meters, and they had blocked the stone people in front.

When you are close, you can see it more clearly. It is said that they are stone people. After they merge, they become a bit like human figures. But in fact, there are no five senses, and there is no positive difference.

These are nearly ten stone people, but there are still sources that continue to roll over and continue to merge.

Their heights are different, but they are basically more than two meters. After the swells of the waves, they are already very fast. It seems that they have become violent and quickly rushed over to the waves!

In the back three people, it is clear that the stone is gathered into an adult shape, and it can also fly and attack.

The canoe also insisted on pulling down the river and then retreating a little distance to prevent the stone man from attacking. Now they are two, I am afraid that there will be such a situation when I come back, or I can only protect them one after the other.

Seven or eight more than two meters of stone people rushed over, instantly like a stone hill to smash the waves.

“They can’t kill! Don’t hurt, don’t hurt, bleed, have spirituality, attack on living things!”

The river quickly said it, this is the secret she knows.

I didn’t say it before, maybe I was afraid that they thought she was suspicious. After all, she didn’t see it with her own eyes. She couldn’t imagine that the stone would pile up adults and attack people!

In fact, her reminder does not make sense for Shen Lang.

These have already been guessed when they have just sensed and magnified their observations, and the stone certainly does not bleed. And being able to attack him is naturally spiritual and attacks people for some reason.

However, no pain will not bleed, it does not mean no injury, no death!

The Ju Yue swords prepared by Shen Lang are specially prepared for them. When they are powerful enough to crush them, will they not die if they are injured?

When seven or eight stone people rushed to attack, Shen Lang did not hesitate. Ju Yuejian swiftly waved with strong and unmatched power.

However, the picture of the broken ore of the ore did not appear as Shen Lang expected, but there was a sound of “锵锵” Jinshi, with his strength, with the heavy and powerful

sword of Juyue sword, actually I can't break the minerals of these temporary combinations!

When they fell, they felt a huge icy sigh. After these stones were thrown on Shen Lang, they were released. Not only because it is closer, it seems to have risen again!

At this time, Shen Lang quickly flew out from the cracks of the pile of stone people.

Since they have just been able to wave them and blast them, they can only find another way.

The space above is limited, and the Shenlang is almost attached to the top, and then he immediately sees an amazing situation!

The seven or eight who just rushed to him, even in the process of attack, quickly regrouped, two stone people became the arm, the other two stone people became the legs, one became the head, two became The torso, it is estimated that there is another supplement to other places needed.

It turned into a stone giant of six or seven meters!

Chapter 943 - Mysterious black grain

It was not only merged into a stone giant, but before it was slammed into the sinking wave, after he flew through the cracks, the merged stone giant directly attacked the attack again!

It doesn't need to turn over from the ground, there is no front and rear points, the back directly becomes the same as the front attack!

At this time, there are stones that continue to rush over, gathered into stone people, and they are constantly gathering in front, becoming a more massive stone man, which is ten meters high.

If it weren't for the space they had come to here, it would have been a lot bigger, and it would have to be stuck in the channel. However, since they are spiritual, they are probably prepared.

So now, waiting for the sinking of the waves, it is the siege of the two stone giants.

The rain and the canoe were all tense, and this made them worry about the safety of the waves. They wanted to help him drag one from behind.

But they are all rational, and the strength of Shen Lang is much stronger than them. If he has no way, their procrastination effect is limited. Now their most important task is to guard the Master from accidents.

Between the time and time, inside the channel of the palace, the bombardment of the stone giant immediately caused a large number of gravel to fall. If they were allowed to toss, it caused collapse and the trouble was great.

With this in mind, Shen Lang decided to make a quick decision!

The confrontation just made him realize that these merged ores are not simply put together, or stick together, but instantly reintegrate and seem to become one!

Therefore, his sword can't open a single stone man, let alone turn it into a gravel, but become a whole, unless it can crush the stone giant, or can wear it, or else for them, There is no effect.

These stone people are very fast, powerful, and have a strong ice and yin, especially the bigger and the heavier, there is no front and back, and they are always facing the same attack.

There are almost no weaknesses in this way, and there are countless enemies. Shen Lang is still the first time.

He is actually similar: he is strong, powerful, sensitive, and fast...

But the stone man is a stone man after all!

It reacts quickly, is spiritual, and ultimately has no soul. In combat experience, tactics, etc., it is still impossible to compare with people.

Especially with tools!

Shen Lang can now use too many things, such as the moon needle. For a normal enemy, it will be a defense, and it must be hidden. But this stone man who is not afraid of attack can use it directly.

The stone giant who is not afraid of the attack of Juyue Sword should not put the needle of the moon in his eyes. When the “eight-needle of the moon” is displayed, the effect of multiplication can be smashed into slag!

However, Shen Lang did not use this plan, because if the impact is too big, it is very likely that the place will be collapsed first, and everyone will be trapped here.

For this undead stone giant, he wants to make quick decisions, avoiding it being too damaging, and wanting to study its laws.

At the moment, he was able to pass the sound to let the three of them leave a safe distance farther away, while quickly walking between the two stone giants, looking for a hole in the fight.

The two stone giants who quickly attacked Shen Lang, after the faster speed of Shen Lang, will inevitably touch each other, which once again confirmed the conjecture of Shen Lang – they merged quickly!

In this way, it became a stone giant of more than ten meters!

And the ore in the distance, still continue to roll over here, and a small to large merger, formed a stone man, after the stone people met, then gathered into a stone giant...

When it was said that it was too late, in fact, the scene did not give Shenlang a lot of time, but he always distractedly manipulated the holy armor, and scanned and observed all the combined stones, and enlarged the picture and refined the individual data.

This found a rule. When the glowing ore merged together, it seemed that there were subtle black particles that quickly clustered together, from the center of the two ores to the center after the merger.

This is obviously the key to the merger of these ores, because these black particles make them spiritually merged!

The merger of the two stone giants was verified from the big side, and a larger black grain was merged together.

With this discovery, Shen Lang has an attack target.

The black particles are very small, and when they are merged into one big giant, they are already relatively large black particles, but the size of the stone giant is also huge. However, with the calculation of the holy armor, Shen Lang can still lock a more precise point.

In his hand, he still holds a strong and heavy Jue sword, but it is not a slash, but a slamming past!

He lifted the other hand, and the sacred arm extended the attacking weapon. He cut the ray directly in a circle, and directly cut the whole of the black granules around it!

The collision of Juyue Sword is followed by the opportunity to re-integrate the cut ore and quickly knock it out.

After the middle cylinder was struck out, it was as fast as a stick to attack the waves!

The change in volume makes it appear to be defective in power, but it is more flexible and fast!

Shen Lang is once again cutting the past, splitting it into two, separating it in the middle of the black grain, and the Juyue sword will also open it.

At the same time, the same magic treasure Ba Tianta that Shen Lang has prepared is already sacrificed, and the black particles that are preparing to escape are absorbed into it!

The scene just happened, for the three people in the river, it was a bit confusing, and the battle was over without fully understanding the specific state.

This shot is to prove the speculation and analysis of Shen Lang, let this stone man have spirituality, which is the mysterious black grain!

When the black particles were cut, the remaining stone giants seemed to have no brains and stood still.

He did not stop much, quickly turned back to the back, and in the same way, continued to “kill” another newly formed stone giant.

The black grain was also absorbed into the tower, while the stone giant allowed it to remain, chasing the past directly.

The black particles in the ore are too small, and the individual is still very troublesome. What the sun waves need now is to merge them one by one. After the formation of larger black particles, they are completely “caught”.

The three people in the rear of the canoe were blocked by the remains of two stone giants. They found that they didn’t seem to be moving, worried that there was an accident in the waves, or they kept chasing them.

At this time, there was a big change in front of Shen Lang!

Chapter 944 - Long palace

Those mysterious black particles, I don’t know if they are manipulated by what is unknown, or are they really so spiritual.

They seem to “discover” the stone giants to be “killed” one after another, and when the chasing waves chased the past, they began to “escape”!

They are deposited in the illuminating ore, they are attracted to each other, and then merged very quickly, and the ore is also combined.

But now, they directly abandoned the ore that was inhabited, and directly fell into the ore on the ground, and then disappeared!

Because the ground, from the top to the top are all connected to the ore, they can avoid the loop of adsorption and go straight along the fast.

Shen Lang is aware of it, but it is too late to arrest. The black spots that disappeared from it are not easy to grasp, let alone so many at the same time.

But for a moment, when the three of them approached, everything disappeared!

Looking at the still ore that fell on the ground, they were a little surprised.

“This is... got it?” Rainy whispered a question, still keep vigilant, so as to avoid the ore “rolling over”.

Shen Lang nodded. “It’s not that these ores are spiritual. There are tiny spirits that control them. The merger is also because of those substances, including the cold ice.”

“You have nothing to do?” The canoe carefully observed the dark waves, and asked more questions without worry.

Shen Lang smiled and shook his head: “How can I hurt me with such a small thing? I have already imprisoned them.”

After showing them the Ba Tian Tower, they closed it up.

“Fortunately, there is you.”

Falling into the river is a bit embarrassing: “If you don’t, if we are prepared, if we encounter such a situation, we will still be caught off guard, and if we look at their combat power, perhaps they will not be able to turn the gods, they will be killed directly. ”

Her feelings are the fulfillment of their teacher’s ancestral training.

The specific level of attack power of these stone people is actually vague, because they are not afraid of attacking this, it is enough to fight. Moreover, they can continue to merge!

Dozens of them become one in a while, and the attack power is a change that is multiplied at any time. Even if it has a sacred state, and the combat power and preparation are not enough, it is easy to be destroyed.

After that, the river was a bit awkward.

“Sorry, I don’t mean to hide you, but in the ancestral training I know, there is a resurrection of stone, but I thought that, like the collapsed activity that I just came in, I didn’t expect to live.”

Shen Lang shook his head, and this apology was mainly to him.

“Go ahead! If there is any ancestral training, the seniors can reveal it. We all have a total analysis, which may be more effective.”

With the previous encounter, Luohe did not hide again, and everything was said.

According to the ancestral training, after entering the realm of the gods, you can enter here, and in this palace, what can be harvested concretely depends on the personal encounter.

Generally speaking, as long as you can pass the stone resurrection, you will be able to go back in strength. But what is the specific form, and what is ahead, but it has been passed down from generation to generation, and the information has been smashed.

Although this does not have much information, there is still a certain reference for Shen Lang.

He believes that the ice palace’s predecessors did not lie, and the key point is on the mysterious black matter!

All the cold and yin is due to them, so it can be guessed that the ice palace predecessors came here, it should have got a certain amount of mysterious black particles!

The practice of the Ice Palace is extremely yin, these things are fatal to others, and they are great for them. Snow Lingguo, Yinquan, Froststone... These different forms of matter are essentially one type.

As for the black matter, what made the ice palace ancestor, let her create and modify such a practice? Or did she come here when she was looking for this kind of substance?

Shen Lang is not known, it is estimated that they complement each other, she will find her here because of her overcasting, and here her practice is more yin.

The founder did not stay to explain, and the later generation did not say more, perhaps it could not be explained clearly, or it might be mysterious.

As for the situation after the resurrection of the stone did not stay, it is most likely because no one has traveled farther!

This is very normal, and their exercises are very suitable for this, but the previous generation of ancestors and predecessors may not have the realm of Shen Lang.

And even if it is a sinking wave, it can be solved quickly, and it is also the use of the black technology of the holy armor.

For normal analysis, they should be alone, so the impact is not that big, and it may be directly rushed over. When the stone has not merged into a giant, it has already fought.

The battle is just retreat. When the black particles are not merged into the larger ones, the power is not so great, and they may not be greedy. When they are hunting, they will leave and leave.

I have just scared off those black particles and have come here. Shen Lang certainly will not retreat now.

Now he got two **** tablets But what is it, and what effect, he still maintains a cautious attitude, and does not dare to give them directly.

So it is best to go inside and see if there is any gain.

Falling into the river is also the same mind. It is her wish to see it, but since it comes, of course, I hope that I can get something back, even if she can't use it, it can bring opportunities for the Ice Palace.

Continue to walk forward, but it is once again shocking them!

This one does not know when it will appear, and I don't know how to create the tunnel of the palace, which is dozens of miles long!

When I first encountered the mysterious black-grain attack, it was solved by Shen Lang alone. It was discovered later that this is not the only one, but it will appear once in about ten years.

I don't know if such distance is an ecological range of them, or a guardian level of them.

After the previous experience, Shen Lang made a new arrangement. When the ore was found to be rolling over, they took them three quickly and greeted them.

Do not give these ores the opportunity to gather into the stone giants, even the stone people can not form, he dialed the sword, hit them in different directions, avoiding merging.

And the three of them, under the reminder of Shen Lang, tried to use their exercises to arrest them. Even if you can't get stuck, you can absorb the extremely cold air they release as soon as possible.

As a result, although he did not capture the black particles merged into large ones, many of them escaped, but they also gave them a lot of harvest.

The more I walk, the more I feel mysterious and weird. I always feel that something is wrong. The front is not detected at the end, which makes people feel guilty.

However, I have already gone out for a few dozen miles, and I am not willing to return.

I continued to go forward for dozens of miles, and finally this long underground passage came to an end!

Chapter 945 - Weird exit

After seeing the end, everyone is refreshed.

This road has absorbed a lot of extreme yin, so that the mental state of all three of them is very good. After many times, I am not so wary of this mysterious black grain.

Shen Lang is also a little relieved. If the palace continues to be hundreds of miles long, he will doubt it. Because it is almost impossible, who can dig up such a long tunnel in the Tianshan 10,000 meters?

If this is the case, it may be that you have entered a circular array. It is possible that they are all circled in a range, just because the surroundings will change due to the formation, so that they cannot confirm where they are going.

Now that it is at the end, it is nothing. Although it is already very exaggerated in more than one hundred, from the outside, it is also the distance of several hills.

He is a bit curious now, where will it come from?

If it is really only a distance of more than one hundred miles, it is completely within the control of the Ice Palace. After several hundred years, it should be investigated and there will be no omissions.

So the biggest possibility is that the end, the exit, is actually hidden in the mountain!

When they reached the end, it looked like the abyss channel down from the ice palace.

With experience, Shen Lang will once again drive the cloud disc, and fly with everyone together, the speed is much faster than when it was before.

It was swiftly swept outside, but it was still noticeable. Under the ice palace, the more ore that glowed down, the more it was placed in the upper part.

Finally, after almost the same height, they reached the top of the cave.

Shen Lang was full of speed, looking at the situation around him, and immediately let them all stunned.

They are now flying from a bottomless tiankeng, but above it is a huge cave.

This kind of environment is nothing. The strange thing is that there is no snow and ice around, and there is no cold in the snow. You can see that there is a green outside the hole!

Not to mention a few people who are very familiar with the surrounding ice palace, that is, Shen Lang, you can also clearly determine that this is not within the range of more than 100 miles in the Ice Palace!

Shen Lang immediately leaped to the side of the cave, and put away the cloud disc. In addition to observing the abyss of the tiankeng, everyone also quickly flew to the hole and wanted to see what was going on outside.

This look is even more so that everyone is speechless!

This piece of green is not a green tree like a tree or a grass outside, but a large forest in front!

Now the cave where they are located is above a cliff, below is a cliff, and below the cliff is a forest. The green that I just saw is not the hole, but the green of the distant trees.

“What is this? Where did we go?”

When the boat was in doubt, the mind was thinking about it quickly. Where is the Tianshan, similar to the situation here.

It is a pity that the Tianshan Mountains are thousands of miles apart, let alone her age, even if it is not possible to know the river, it can only be familiar to the ice palace.

The current scene, so that they are all three, can not be seated.

“Everyone... we seem to have encountered a miracle...”

The words of Shen Lang attracted their eyes and looked over.

“what happened?”

Shen Lang was very helpless and smiled a bit: “Although I can’t explain why this is the case, we are probably on the other side of the ocean... This is probably in the Amazon forest.”

“...”

The three people were shocked by the words of Shen Lang.

“We...we don’t go far, how can we run to Amazon?” With the calmness of the rain, I couldn’t help but scream.

The canoe was quickly analyzed: “If there is anything that crosses the transmission array, it is understandable to send us to the other side of the earth. But we have not come across this way. It is purely just the distance. No matter how far from east to west, it is not enough to cross tens of thousands of miles.”

“Will it be... this exit, in fact, is connected to another world?” The river immediately opened the brain.

Since they can go to other worlds through the return to the sea, or enter the world of dead forests in places like Death Valley, it seems not strange to enter another world through this secret palace.

Shen Lang shook his head slightly.

He didn’t say it. He didn’t guess it. He didn’t think of the forest. He thought of Amazon, but he had data support!

The holy armor is a super-civilized black technology product, but after all, it is a product of the river basin city state, leaving the river city-state, there is no network technical support, and a lot of functions are missing.

The one used by Shen Lang earlier was to use combat-related functions a little more.

The last time to bring back this latest sacred armor, it is much more powerful, and in the river city, it is a great convenience for him. So I came back and thought about it. In the wind, I was connected to the computer network and connected to the Earth's network.

With the super level of the holy armor, this is certainly not a problem. He just tried a bit of positioning, although he can't say what the specific position is, but the large area can be determined to the Amazon forest.

Looking at him like this, all three people understand that Shen Lang definitely has his way to confirm this information.

"Then we... or the original way back? It should be possible to go back." Rain fell to see Master, and looked at Shen Lang, and consulted their opinions.

Who can think that from the bottom of the Tianshan Ice Palace, there is actually a tunnel that directly crosses the continents of the continent and leads to the Amazon forest?

Luohe is a little understanding of the ancestral teachings. If, after many years, the ruin will pass on today's encounter to the next generation of the lord, the next generation of the lord who has not experienced it, must also think that she is old and confused, and will not be believable.

This is as incredible as the resurrection of the Stone Man!

"Go back! But since I came I still have a look at the situation here."

The situation of Shen Lang is not the situation of the Amazon forest outside, but the situation of this cave!

This magical underground passage, since it was sent to them, no matter how weird, the two ends will definitely not be ordinary places.

The four of them returned to the big cave on the mountain wall. They saw some words and patterns on the stone wall, but they couldn't recognize what it was.

Shen Lang first recorded it with a scan of the Holy Grail. This may be the civilization of the ancient Amazon who lost or did not find it. Perhaps in the distant past, ancient people have come here to discover the crater and traces left behind.

However, he is also a bit strange. It is not surprising that there is no legacy left in ancient times, but hasn't modern civilization developed here?

Even if you don't develop it, you should have a team of expeditions and expeditions. This tiangkeng exists here, unlike the other end, which is hidden in the high-altitude snows of the Tianshan Mountains.

Chapter 946 - Gold day book

The tiangkeng is close to the mouth of the cave. As they go inside, the cave is also extended into it.

The cave is getting smaller and smaller, and at the end of the cave, there is only one room.

In this space, I saw some small statues, basically three or four feet and a meter or so. These statues look at the image of the indigenous people here.

Shen Lang did not understand the relevant legends of Amazon. It is also unclear whether it is like Amazon, Maya or Incas.

From the image of these statues alone, it seems that it is a sincere worship. Not high, in addition to reducing the proportion itself, but also because of the knees kneeling, knees worship.

"The objects they worship should be painted on this stone wall!"

The canoe took a piece of glowing stone and approached the past.

But what is puzzling is that just because the shadows are not really cut, they are close to illuminating, but they find that there is nothing on the stone wall.

In this way, I can only say that these statues are worshipping this stone wall!

This cave is above the cliff, it is already very special, plus the bottomless tiankeng, if the ancient Amazons came here, it will be shocked and fearful.

If you can't go on an expedition, you will have to explore the cave. Finally, you will see that there is nothing at the end, and you may feel that there may be a god.

If there is a disaster, you may feel that you are stunned and shaped like a statue.

This assumption is the ancient Amazon, the original native. If you have a self-cultivator, you can't understand it that way.

Shen Lang recruited and waved, indicating that the boat was coming back first. The situation here is still unclear and not safe.

Then let them all be outside the statue, only he slowly approached the end of the stone wall, and then tried to touch it with his hands to see if there were any organs or the like.

“Be careful!”

The three of them almost screamed in unison.

Shen Lang is a step ahead and already knows what happened.

When he touched the stone wall, these figurines that worshipped were like being touched by the organs, and Zhang mouth sprayed a lot of things out to Shen Lang!

Although Shen Lang focused on the stone wall, but the gods have been sacred, they have all the aspects of the situation inside, even from the entrance did not let go.

Therefore, when there is a change, they do not need their warnings, he has already reacted.

The three of them are in the outer circle of the sculpture. When they see the sculpture spewing things out, they then open the door to the police, and then the sound reaches the ears of Shen Lang. In fact, it is too late to react.

Shen Lang was already laid out in advance when their voices had not yet fallen.

Some of these sculptures are short arrows that spit on him. The angle of the upswing, some can be nailed to the back of the brain, and some are nailed to his waist!

And there is some squirting out of mist, covering all around him!

If it's just a nail, even if it's a poisonous arrow, Shen Lang is not afraid. Just the Holy Grail can make them invalid.

But the poisonous mist is different. It is not just him. With a few of them around, they will be attacked by the scattered poisonous mist.

Therefore, Shen Lang's shots first formed an isolation, so that these poisonous mists would not be dispersed to the back, and then they would not be able to shoot down the poisonous short arrows.

Then he shook his hand, all the fog, directly wrapped up, formed an air mass, flew outside, and flew directly out of the cave.

Even if it is a fierce toxic mist, it will not be a problem after it has been diluted from the outside of the cliff.

There aren't many special things about those short arrows. This is not worth mentioning.

But since there will be organs, it means that this stone wall is still a bit problematic!

The Lanzhou Nebula chain has been taken out, ready to cover the waves. Falling rain is to protect her master. If there are any dark arrows in the office, everyone will not be caught off guard.

Shen Lang's attention was on the stone wall, and he directly reached out and he thought about it from the perspective of the formation.

Even at the other end of the earth, everyone's institutional rules will be different, but the nature of the ideas is similar.

So after some trials and analysis, he was asked to find a little law, and then those statues were taken into account, and their head and eyes and the corresponding angles of the eyes were counted one by one.

He doesn't need to look back, he can calculate all of them directly through the sacred armor, and virtualizes the straight line to find the point on the stone wall.

After he was so tossed, the stone wall cracked open!

All three of them are more vigilant, and Shen Lang also makes himself alert.

But this time, there was no organ, but on the cracked stone wall, there was a groove, which was faintly visible, and there was something inside.

Shen Lang directly reached out and saw a quaint and rough iron box.

The eyes of the three of them also attracted.

According to the general situation, there is a place where the organs are guarded, and there must be hidden treasures. There must be something good in this iron box.

Shen Lang went to the dust, just from the outside, can't see what it is, the above is also engraved with words and patterns, but like those outside, I don't know at all, I don't know what it means.

“You take a little distance, I will open it directly.”

When Shen Lang spoke, he had already come over and left the stone wall, so as not to disturb the organs.

The river fell and nodded, pulling them both back a little further.

Shen Lang has already observed that this iron box has no organs and no locks. It looks like it is directly covered.

When I started, I found that the fitting was very clever, not relying on brute force to open it.

However, for a team of players, this is just a small technology, and Shen Lang quickly opened it up.

When the iron box was opened, a golden light was released immediately!

The three people in the river rushed to their respective defenses so as not to be attacked or radiated.

Shen Lang has a holy armor, but also a sports body.

However, this golden light quickly dimmed, and then saw what was in the iron box, actually!

“what is this?”

“Will it be the inheritance of ancient civilizations and the like?”

Falling rain and falling canoe are very curious.

This is not in the scope of the Ice Palace, but it has already gone beyond the knowing of the river, she is also curious, but can not insert words.

“do not know.”

Shen Lang shook his head slightly and reached out and took the “Golden Heavenly Book” out.

“what!”

“Be careful!”

They cried again, because they saw that there was something like a scorpion under the golden book. When Shen Lang reached out and took the book, he directly bit his finger!

However, Shen Lang seems to be nothing, but the same thing as this scorpion, quickly shrinking, and soon died.

“This... what is going on?”

Shen Lang smiled and said: “This should be the last guardian of this gold book! I guess that when the iron box is just opened, the release of the light will make it a wake-up effect.”

“I reached out and took the book. It was like a violation of the awakening. It was instinctively bitten. Needless to say, it must be extremely poisonous, but it did its best to bite it and let it die.” It is.”

Shen Lang did not want this iron box, directly covered it, regarded the iron box as the coffin of the scorpion, and then relocated it back into the groove, and then manipulated to heal the stone wall.

“Your hand is okay?”

“It looks like it is biting you.”

They are all worried that although the waves are light and windy, they really bite his fingers!

Shen Lang did not elaborate, in fact, how can he be assured that this unknown iron box, even if it is not locked?

Let them retreat a little further, that is, cautious performance. He himself is secretly manipulating the full protection of the sacred armor, and began testing all aspects of the iron box.

When it was opened, he detected whether there was any poisonous gas. As a result, there was no poison gas, but instead discovered the living thing. It's his hand that just bitten his throat, but it's actually going to be on top of the transparent sacred beggar!

"I am fine."

Shen Lang nodded and then hesitated. Would you like to open this gold book on the spot and have a look?

According to his reason, or a sense of the sixth, it should not be opened here, it is likely to cause various problems!

But I have to say that this gold book, like the Bible, is full of an inexplicable magic, so that he wants to open it now, just like the old man saw the food.

"If you open it... Do you want to combine it with this environment? Or what it is with the outside environment."

She doesn't know if it matters, just because she is cautious. After all, this is not a general thing.

Chapter 947 - Fantasy space

It's still a bit hesitant to say that it's a bad thing, because once this thing is turned on, something bad will happen.

However, after listening to the canoe, he reminded him that since this thing is hidden here, it should be certain. After leaving, maybe it will not have this effect.

So, even if you don't have time to study the contents of this gold book slowly, at least you should open it here to see if there is any difference.

Shen Lang nodded to them and signaled them to withdraw from the cave. If there is any problem, it is only him alone, and will not be tired of them.

All three of them looked at each other, and with their familiarity, they didn't need to talk, and their eyes could be discussed.

Later, Luohe took them both and walked close to Shenlang.

"You will open it! What are the problems, everyone will bear it."

In order to make Shen Lang feel a little more peace of mind, she added a smile and said: "Maybe we can still touch your light."

Seeing the gaze of falling canoe and falling rain, Shen Lang can only nod.

If there is really something wrong with the opening of this golden book, then if they quit the cave entrance, there will be no big difference.

In this case, Shen Lang will have nothing to hesitate.

He turned the gold book in his hand straight.

This looks like a book, but it opens like a greeting card, just the first two pages of the fold, and there are no more pages.

There is no content in the open gold book, and the inside pages are golden and smooth on both sides.

A few people who were secretly alerting saw that the result was nothing, and it was a little discouraged.

“Since this thing is hidden like this, it should not be ordinary, it may be the time to open it.” The canoe comforted one sentence.

It was found on this stone wall. It is the biggest possibility to open it in this cave. If there is no abnormal situation when it is opened here, then it is even more impossible to go back to Tianshan and open it.

Since it is not an environmental relationship, it may be a timing relationship.

After thinking about it, he suggested: “If you want to try blood, a lot of verification and opening are through blood.”

Blood is indeed the most common way, from the perspective of modern science, blood can also contain a lot of information, from the simplest blood type to the microscopic DNA genetic code.

Shen Lang also decided to try it, then took the willow sword, pierced his finger and dripped a drop of blood on the cover of the book.

However, there is still no effect, and the blood is not absorbed, as if it is dripping on a normal metal, it still maintains a blood drop.

It’s already like this, and Shen Lang will try it out indiscriminately, and smear the blood into various representative patterns such as “卐” , taiji yin and yang, and six-pointed star.

In addition to the cover, the inside pages have also been tried.

The result was a waste of a few drops of blood, except for the blood stains on it, the gold book did not change, and there was no change around.

The proposed river is a bit awkward. “Forget it, take it back and study it slowly. After all, we don’t know anything about it. Go back and check it out. Are there any scholars and experts in this area, including this cave? The text on it.”

After the gold book was taken out, Shen Lang put the quaint iron box aside. After there was a scorpion-like thing out, there was nothing else.

It makes sense to think about it now. There is no purpose in anyway. It is an accidental occasion, and it is the best. If you don't have it, you don't need to be disappointed.

But when he picked up the iron box and prepared to put the gold book in, it was a sting in his hand!

To be precise, it is a stinging at the finger that has cut the skin.

Look carefully, but see the fingers seem to stick with this iron box!

Some of them are still unclear about the changes in the hands of Shen Lang. At this moment, they are observing the surrounding areas, and they are working together to see if they can find out what is missing.

This is a stinging pain. Of course, it is nothing to say about Shen Lang. He also immediately analyzed the problem.

The place where the finger was pierced, although there was no blood left, and it was already bleeding, but there was still blood on it, but it seemed to be contaminated with blood, and then began to ***** his blood from the breach!

Look closely, his hand is holding the iron box, the thumb of the broken mouth is pinched in the bottom of the iron box.

This made Shen Lang not help but be cautious. Just at the bottom of the gold book, but there is a poisonous scorpion-like thing. If it is not an abnormality of the iron box, it is contaminated from the wound to the venom remaining in the bottom of the box... ..that's it!

"Look!" The rain fell and found the anomaly here.

When everyone looked at it, what I saw was that the iron box gave off a golden glow, just like the light that appeared when I opened the iron box.

“How did you do this? This should be a bit abnormal?” The canoe asked a busy sentence.

Shen Lang found that the finger could be removed at this moment. After looking at the situation again, the heart moved, and immediately put the gold book in the other hand and put it back into the iron box.

Just a little bit of light, it was suppressed.

But it was only a moment. The gold book and the bottom of the iron box just fit together. Now, after pressing back, there will be a new reaction. The direct effect is to let the light of the pressure go down and become blazing!

All four of them are vigilant, and when they are shining, they are even more powerful, especially the deep waves.

But now these light directly shrouded within a few meters, but did not emit farther.

These radiances did not make them feel uncomfortable, but instead had a strange feeling that was hard to say.

After a while, the three of them and Shen Lang found that the light was dissipating, and the speed of the dispersion was slower, but for everyone’s eyes, it became clearer after the glare.

Then they found out that everyone is not in the dark cave, but in a space filled with soft golden light!

This space is like a virtual one. No matter where you look around, you can’t see the boundary, even the top and the bottom. There is nothing else in it, only four of them.

“This is...what place?” The canoe couldn’t help but ask. “How does it feel like it is in a sci-fi space?”

“Stop sci-fi, it’s just as hard to describe in the movie as expressing the online world.” Rain fell and sighed.

Chapter 948 - Paradox cycle?

When I heard the two of them, Shen Lang slightly comforted it. No matter what, at least the situation here is better than the chaotic space.

He tried to use his knowledge to extend around and found that the effect was the same as visual inspection. There was no change at all, and no boundary was felt.

It is the same effect to use the holy armor to investigate and analyze.

“Wait a minute... what about the book?” Shen Lang looked at his hand and had no gold book, including the iron box.

Luohe slowly said: “If I did not guess wrong this time, we may have entered the world inside the gold book.”

This explanation surprised the canoe and the rain, and Shen Lang nodded.

In terms of the changes just now, this is the biggest possibility!

Entering the world inside the book, what about the book? If someone came here to take things away...

Shen Lang immediately said: “We all feel that there is something different in this world! If you figure out a little, you can find a way back to reality.”

He himself is the same, try to feel the situation around him.

It is a pity that there is nothing to start with. Where they are, it is equivalent to floating in the air, front and rear, left and right, up and down ten, all empty and unlimited.

And the soft golden light has no speciality, as if it is the light of illumination. Of course, it is completely impossible to find its source.

For such a situation, the canoe and the rain are still too young, there is not much experience, and the age of the river is there, but the knowledge is limited.

The key is to look at Shen Lang himself!

Sure enough, it didn't take long for their eyes to look over and apparently nothing.

Shen Lang shook his head: "I don't notice anything."

"Is this going to be... a spiritual world?" The downfall is a predecessor, and the problems are more instructive.

But Shen Lang still shakes his head directly, and he also thought about this possibility.

If those golden rays that shroud them have a hypnotic-like effect and bring everyone into a common spiritual world, then it might be like this, there is no real thing around, people will not fall, and will not receive any The impact of the physical world.

Because it is a spiritual world, everything is a fantasy, and the external items such as clothes can be presented in the same way.

But there is one difference, that is the holy armor!

Shen Lang just tried to analyze the surrounding with the sacred armor. It is still possible to directly manipulate the sacred armor through consciousness. It is not an illusion, but it is actually worn on the body and followed.

He can't say it at this point, but it is starting to verify immediately!

She took the nebula chain straight out and then manipulated it directly to attack the back of her hand.

The pain caused her to breathe a sigh of relief.

Shen Lang and Luo He looked at each other.

When you are dreaming, you will not feel pain when you pinch yourself. If it is a dreamy spiritual world, it should be similar.

However, it does not rule out that everything can be projected realistically, including the holy armor, including weapons, as well as attacks on themselves and others.

“It’s okay. You calm down and feel slowly. After all, this is verified through your blood test. Even if you have already been a master, this space has something to do with you. If you come in, you won’t get out.” “”

Luohe comforted Shen Lang, she did not know the identity of Shen Lang’s layer. Under this situation, even if she had the lowest strength, she should have the effect of her elders.

Shen Lang nodded and let himself clarify his thoughts.

Assuming that it is in the spiritual world, if you want to recover, you only need to know this yourself. In theory, you can clearly return.

Assuming it is similar to the spiritual world, but everything is substantial, there should be an opportunity for entry and exit.

Entering because of the box and the gold book, go out?

Shen Lang did not go to the surrounding environment, the iron box and the gold book appeared in his mind, and then tried to sense the connection with them, trying to use consciousness control to come out of the world.

I didn’t expect it to be so simple. With his thoughts, everything around him changed!

Everyone appeared in the cave again, the soft golden light was gone, and the contrast was very dark.

“We are back!” The boat was excited and called.

The river was immediately illuminated by illuminating ore.

Then they looked at Shen Lang, but saw him looking down at his hand.

His hands are empty!

“What about the Golden Bible?”

Shen Lang shook his head: “I can’t be sure if we are in a spiritual world, because I just came back through consciousness, but that thing is no longer in my hands.”

Falling into the river thought about it: “I don’t know how many centuries have been there for thousands of years. It is impossible for us to disappear. Someone just took things away. Maybe it is...”

Her eyes fell on Shen Lang’s body.

Shen Lang went on and said: “Maybe it has already merged with me. The world just now may be in my body, so it will be so weird.”

“If it is in your body, then you have entered the world in your body, and the world is in your body... so there is no endless cycle.”

If you fall into the rain, let Shen Lang also laugh and cry.

If the world is really in his body, and his body can enter the world again, it becomes a paradox.

However, many things cannot be explained by routines.

For this world of books, Shen Lang has not figured out now.

“I will verify it first. Is it true that I have merged with can I still enter the world?”

Shen Lang took out the mobile phone. "I use mobile phone photography, take the whole process and take a look back later to see how it works."

"I stayed!" Luohe took the initiative to take over the mobile phone. "I should not be photographed outside the aura. I also took a copy of the mobile phone. I also carefully observed it myself."

Such an arrangement, Shen Lang also feels very good, in fact, if you can leave the record of the Holy Grail, it is incomparable to the mobile phone, the naked eye observation, you can record all the detailed information.

The sacred armor is worn close to the body. Although it doesn't need to be undressed when it is worn off, it is his secret until now. Even if they are familiar, they don't want to show it for the time being.

Anyway, the world in the book of heaven, everyone has also seen it, leaving a person to come, there is no problem.

Falling in the canoe and falling rain, it was a little hesitant, and then the two people's eyes exchanged a decision: one to stay with the master, one to follow the Shenlang, no matter where there is risk, can stay together.

Chapter 949 - Time error?

Together with Shen Lang is the rain, this time is the active use, the effect is very obvious, with his mind moving, there is a faint golden light.

And this time the light is emitted from the body of Shen Lang!

This time, the speed is much faster. In the absence of more preparations for Shen Lang, the two people immediately appeared in the space before.

Everything is as good as it is, with a soft golden glow, which makes people feel a good light and atmosphere.

"It seems that our conjecture has been fulfilled. This is really in the world of my consciousness!" Shen Lang was a little emotional.

Rainfall added: “The world of the golden book that should still enter, just communicate through your consciousness. In this case, there is no paradox.”

It is also reasonable to think about Shen Lang, but this premise is that the golden book, or the box still exists. If it is integrated with him, then the world of this book is still equal to his body world.

“I don’t want to be so much. Since my consciousness can be manipulated, I will try it out.”

He said, he grabbed the hand of the rain: “Let’s try, leave a distance from here, see if you will go back later, is it still in place.”

“Ok!”

Falling rain is also very much looking forward to, regardless of the world of this golden book, whether it is the same as the body of Shen Lang, in theory should be with his body.

But the problem is, if the consciousness does not enter, but the body has entered the world, then the body moves, shouldn’t it go in the corresponding place?

What Shen Lang originally thought was that if you grab the rain, move a few kilometers, then there is an obvious reference.

But considering that their place is very special, who knows what kind of environment is a few kilometers away from the cave. The goal was revised for security reasons.

Before the entrance to the cave, to the end of the cave, the holy armor has records, you can retrieve the data and the trajectory, so now with the rain, it is also according to this, moved to the position of the cave.

“This place is a cave entrance. Let’s try it now and see if it is in the same place or in the cave!”

Shen Lang now has an experience. Compared with the previous one, it can be a little smoother. With his thoughts, he once again appeared in the cave.

Do not look carefully, here is still relying on the illumination of illuminating ore, obviously not at the mouth of the cave.

Then both of them saw the two people falling and falling in the canoe, and they were in the same place before leaving.

“What happened?” Two people who fell into the river and fell into a canoe, were very surprised to ask, and then came over immediately.

“What happened?” Shen Lang was a bit inexplicable: “The two of us went in, and then moved a seat, probably at the distance of the cave, and then came back, want to verify whether it is still in place.”

The results are clear at a glance.

The raft was surprised to say: “But your figure has just disappeared, and the golden light has not been completed, and it has appeared immediately. It is almost a moment, and it looks like something is going on.”

Shen Lang is a bit strange: “Is it so fast? After we went in, I checked it, then said a few words and moved the seat. Although it didn’t take much time, it was not a moment.”

“Look.” Luohe handed the phone over.

Just now she opened the video function, and now she will record the recorded video to Shen Lang.

Shen Lang clicks to play, because although the light is not good enough, the basic situation is also clearly seen. Just on his body, a burst of golden light emanated, shrouded the surroundings, and then he and the falling rain inside the golden light quickly disappeared!

But it was like a flash, and then they both appeared again. Jinguang was completely dissipated after they reappeared. At the same time, he heard the exclamation of “What happened?”

The video that has just been released from the mobile phone has not been edited, and the others are all normal. If the error is not good, the card will be stuck within that second.

The accuracy of the video is limited and cannot be further confirmed by technical analysis without further analysis. But it can also be determined that their disappearance to appear, are within one second!

“Time is wrong!”

Shen Lang immediately thought of the key points.

The three of them heard the prompts and immediately figured it out.

“Yes, it should be that the speed of time is not the same.”

“So, maybe it’s been a hundred seconds in it, but in reality it’s not a second!”

Although this explanation is a bit absurd, from the point of view, it is indeed possible.

“I will understand it after verifying it again.” Finally, I knew a little bit about the strangeness of the world of Tianshu, which made Shen Lang more interested.

The movement in the world of Tianshu cannot change the physical position of the real world, and it also makes Shen Lang dispel the paradox.

Fusion may be a fusion, but the form may be different, perhaps attached to him, perhaps when his mind is open, the golden light that appears is the existence of the iron box gold book.

Once again, there is a goal.

The river and the canoe are both outside. In addition to watching the time, they also restart the video with their mobile phones and record the time through two aspects.

And Shen Lang and Luo Yu are once again entering the world of Tianshu.

Falling rain lingers inside and looks at the time record.

Shen Lang actually used the consciousness to read the time record of the Holy Grail. It turned out that there was a disorder, and the Holy Glance had two calibration times.

This proves two things. One is that the holy armor really followed him into the world, not purely conscious. Of course, the two of them have seen and photographed the disappearance of both of them outside, which proves this.

Another is the time between the world of the book and the normal world. Although the time of both times is very short, from the perspective of deviation, it is probably a hundred times difference!

Just like he and the rain fell inside, it was more than a minute, and the outside world was less than a second.

With this information, Shen Lang does not need to be so heart-warming. The holy armor can record the time on both sides. Even if it is calibrated, there is a record of error.

Knowing the gap of about a hundred times, he also has a test amount in his heart, not blindly letting outside.

So he is testing another aspect – about this space.

The breadth of depth, I have tried every time, the performance is infinite, and there is nothing and reference. It is meaningless to test the length, width and height by moving.

Therefore, Shen Lang directly took out a fine Lingshi, and then began to absorb while practicing. What he wants to test is the speed of cultivation, the speed of cultivation, and the efficiency of Aura absorption!

Chapter 950 - Return, abrupt change

Shen Lang calculated the time and practiced it for a hundred minutes directly.

In this process, he did not fully devote himself to cultivation, and it is not important to pay attention to time. It is to be distracted to calculate the progress of cultivation, the efficiency of the absorption of Lingshi.

One hundred minutes, of course, for cultivation, it is very small, and it cannot be cultivated as a significant improvement. But to test the relevant data, it is enough.

Just like running, it takes a long time to insist. It is only a one-time run of five kilometers and ten kilometers. It does not improve the runners' performance, and even the exercise is minimal.

But for a mature runner, you don't need to play at full speed. If you run it once, you can get a rough idea of a new running environment, temperature, humidity, air quality, softness and hardness of the ground.

Just a hundred minutes of experience, let Shen Lang know about a rough – no miracles.

The effect of cultivation here is similar to that of the outside world, and the absorption efficiency of Lingshi is similar.

After all, this environment has a hundred times of time, and it is already a miracle.

Looking at the rain of time and so on, it would have been boring, but fortunately her character was bleak, and there was cultivation for a while, and it was not boring.

When Shen Lang took her back to the original place, the river and the canoe came straight.

“One minute. How long have you been in it?” The canoe immediately said the time she saw.

The two of them are outside, basically looking at the stopwatch, and the video taken by the mobile phone has also been calculated from the beginning of the calculation, and now it is over, there will be no error of a few seconds.

Drop the rain and show her the watch directly.

For the first time, everyone went in together.

The second time, Shen Lang and Luo Yu were two people, but they came out in more than a minute, so the error was not obvious.

This time it was a hundred minutes of deliberately waiting for an integer. The time between them was more than an hour!

Shen Lang read the data of the holy armor. Although the error was calibrated immediately, the corrected data was exactly one hundred times.

“We chose an integer to get out of the calculations. I didn’t expect it to be a hundred minutes. It took only one minute outside. It was amazing!” The rain sighed.

It is also awkward to fall into the canoe, but it is the eyes of the river.

For young people, this is magical and fun. For her age, it is undoubtedly a recipe for success!

With her life, it should be no problem to live for decades. It may not be able to break through to the realm of the gods for decades, but if it is in this world, it will last for only one year.

That can not only support her to break through the realm of the gods, but also no problem to upgrade. As the realm improves, Shouyuan will increase again. So count it... Isn’t it necessary to get a super magic weapon that is almost infinitely sustainable?

This does not say eternal life, at least it is also a longevity.

At the age of Shen Lang, there will be no problem if you live two or three hundred years. If you have been practicing here, it will be equivalent to two or three thousand years, which is enough to make him cultivate into God! Shouyuan will increase to not know how much.

After carefully watching the video of the waves, I asked again: "After we left, is it really a trace?"

Both the river and the canoe were confirmed.

It used to be too fast, and Jinguang has not dissipated. This time, one minute, it has really disappeared completely.

Shen Lang smiled and said: "That is good. When you encounter a strong enemy, you can hide in this world and you can't find it."

The raft was a '噗哧' and laughed: "Don't be too happy, don't forget this time difference. You are hiding inside for a day and night, but it's actually only ten minutes. When you come out, the enemy is still Keeping."

"It doesn't matter. I practiced it directly for ten or eight years. I can't wait for a month. Even if I can, when I come out, the strength will advance. He won't make much difference in a month. Counterattack is over!"

Although there are no other specialities in the world of Tianshu, this time difference and complete disappearance are still very good. It is a well-informed Shenlang, and it is also full of praise.

"Since we have already explored it for a while, let's go back first! Although it has just been kept by the organs, it is hidden, but relatively speaking, it is still too simple. I am worried that it will take a long time, and there are other crises that we do not know. ""

The river fell in time to remind the excited waves.

In fact, it is not easy to find the law from the stone wall. The scouting of the sculpture organs is also very dangerous. When the poisonous scorpion is opened, it is the final gold day book. It is also focused on the gold book. It is accidental to open the iron box.

Strictly speaking, Shen Lang can get the fusion of the world of this book, it is not easy and simple.

However, he also agreed with the view of the river, this place should not stay long, or leave early.

Before leaving, he carefully scanned all the details in the cave with the Holy Grail, so that he could have a reference in the future.

Then the four people came out together and returned to the crater.

When I came, I still drove the clouds and took them down to the bottom of the earth.

Come to the underground passage with glowing ore, and everyone will return along the road.

Similarly, stone people who have mysterious black particles condensed every ten kilometers will attack them, and Shen Lang will help them, so that they can absorb the extreme cold energy of some black particles.

Finally, in the distance, it is about an underground passage that has gone more than 100 miles, and once again returned to the entrance below the ice palace.

When I went there, I didn't know it at all. I didn't know anything about it. So the passage of more than 100 miles directly sent everyone to the other end of the earth, making everyone feel unbelievable.

When I came back, Shen Lang was ready. In addition to letting the Gaga record more detailed data, I was also fully absorbed to understand the changes in each distance.

But unfortunately, I have been walking for more than a hundred miles and returned to the original place. I have not found any strange places, and I have not inadvertently experienced the existence of transmission arrays and space gates.

Is this underground passage also a distance difference? Every time I walked, actually went a few hundred miles?

If this is the case, it will be even more incredible! After all, the abyss of the earth, with a passage of more than one hundred miles, is hard to imagine how it was built. If it is tens of thousands of miles long and runs through the land of the ocean, it is even more impossible.

“Do you want to seal it up?” Shen Lang asked for the meaning of a falling river, falling to the collapsed stone wall at the bottom.

“It doesn’t matter, anyway, if you can get here, it’s not bad for this barrier. There is no barrier there.” The river shook his head.

Shen Lang will drive the cloud disc, gather everyone together, and fly back to the Tianshan Ice Palace.

At this time, the abrupt change suddenly!
