

## Flames 201

### Chapter 201: Big developments! Three divine decrees!

“Anna, have your people cleaned up?”

Lomina asked in the forest.

Anna nodded and said: “Our two tribes were all packed, Lomina, we could set off.”

Lomina said, “Let’s go.”

Anna gave a “hmm”.

She looked back at the forest where they lived for the last time, with some nostalgia in her eyes. That was normal. Anyone who leaves a place where he lived for hundreds of years would have some nostalgia. But now this neighborhood was no longer suitable for Elves to live in.

Although the ice wall sealed the Rocky Mountains, it also changed the surrounding climate into ice and snow. As a result, the resources in the forest were reduced and so many Elves could not be raised.

Of course, without that ice wall, their situation would be worse.

That was because the Elves would face endless war.

That day there were eight kingdoms. Even if they fought the eight kingdoms, there would be more kingdoms and even empires.

The Night Elves went back to the forest where they used to live.

Twenty years ago, when the Abyss cracks opened after the Night Elves migrated, the God of Darkness sent many Abyss demons up.

Demon bug was the most common life in the Abyss, and there were many kinds of demon bug. The Abyss demon beetle also belongs to a kind of Abyss demon bug.

Twenty years ago, the God of Darkness sent an Abyss demon bug who especially liked to devour plants.

Twenty years ago, the God of Darkness sent an Abyss demon bug who especially liked to devour plants.

But the Night Elves were far from recovering from the forest.

“Don’t look, let’s start. Let’s reclaim the Dark Forest. The forest there is bigger and has the care of the Lord of Flame. We will live well there!”

A Night Elf pulled her companion.

“Well”

Another Night Elf stopped looking at the forest that had begun to snow and followed the army towards the Dark Forest.

This time, like twenty years ago, they left the forest where they originally lived.

But this time, there was no confusion, hesitation, and despair on their faces.

Instead, it was full of hope!

They were going to conquer another forest and open up a new Empire!

Last time, they lost the favor of God.

And this time, they became the favorites of the Lord of Flame!

The Lord of Flames was the source of all their strength and hope!

Therefore, every Night Elf's face was full of longing and hope for the future.

It was not close to the Rocky Mountains to the Dark Forest, but it was only a few days for these Elves.

The travel speed on the ground was much faster than that underground.

And Chen Xi was still around the Rocky Forest, contacting the scattered Elf tribes.

Her work was going well, and two Elf tribes were interested in her proposal.

It was great to cultivate a new Dark forest and build a new Elf Empire.

Even for the indifferent Elves, they all hoped that they could participate in it.

So when they set out, another Elf tribe had packed up their belongings and walked through the vast forest towards the Dark Forest.

At the same time, it was not known how far south from the rocky mountains. In the Xi Ling Kingdom, vigorous construction began.

In fact, such large-scale construction was also going on in Yan Nations. However, the great construction speed of Xi Ling Kingdom was faster than that of Yan Nation. The reason was simple. There were more people in the Xi Ling Kingdom.

They built the road first.

If you want to be rich, build roads first.

There were many roads in the Xi Ling Kingdom, but there were not many straight roads.

Therefore, the first one to be built was a straight road connecting Hope Avenue.

This straight road, from Hope Avenue to the west of Xi Ling Kingdom!

Throughout the Xi Ling Kingdom!

And, the other end of Hope Avenue, which also crosses the Misty Mountains and the God's Miracle City, has been connected to the one that connects to the Lion Clan's Royal City.

In other words, this was a straight road from the easternmost side of Yan Nation to the westernmost side of Xi Ling kingdom!

On this straight road, there were naturally some majestic passes.

That was necessary.

These passes were built in some dangerous positions to avoid using this straight road when an enemy comes!

This was a straight road running from east to west.

At the same time, several straight roads were running through the north and south.

These straight roads were quite wide.

Although not as 100 meters wide as Hope Avenue, each one was 30 meters wide.

Even if the Gods had an underground world, the geology was quite stable. There were few geological disasters. These roads could be managed for a long time.

While building the straight road, some land in the Xi Ling Kingdom that was not suitable for growing rice was used to grow potatoes and corn.

This land was as big as the Xi Ling Kingdom, which could fully support a population of over 100 million.

You know, the Xi Ling kingdom was about 16,700 kilometers from east to west and about 1000 kilometers from north to south.

And the terrain was mainly plain.

If they put it before Lin Yan crossed, such a large area could feed at least 500 million or 600 million people.

But there were only more than 20 million people in the Xi Ling Kingdom.

This had a lot to do with the inability of grain production to keep up.

Although there were magistrates in the Church, they could promote growth and eliminate harm.

But the rice varieties there were not good, and the yield was not much higher.

Coupled with the backward planting method, it was far from reaching the level of hybrid rice before the Lin Yan crossing. But once potatoes and corn were supplemented as a staple food, the population could be increased on a large scale.

Just like before Lin Yan crossed over to the seventeenth century, the population came to a wave of great growth, because of the potatoes and corn.

Moreover, less than one-third of the land in the Xi Ling Kingdom was reclaimed.

The remaining two-thirds weren't reclaimed.

Why?

Because the land was relatively barren, with trees and weeds, it was difficult to reclaim.

The nobles didn't like it at all.

You know, rice was very picky about the land.

Land suitable for growing rice must also be close to water sources and rivers.

But potatoes, corn, and sweet potatoes didn't pick the land

No matter how poor the land was, it could produce more than rice.

So after Princess Luo Ying received a Divine revelation, she soon issued several new decrees.

The first law, after that, all the uncultivated land in the Xi Ling Kingdom belongs to the Lord of Flame. This was not the state-owned land, but the land of God!

The second law stipulates that all civilians had the right to reclaim no more than 10 musks of land, and after reclamation, they had the permanent right to use it.

All nobles, according to different titles and highlands, could reclaim 100 mu, 1000 mu, and 10,000 mu of land!

This was a reclamation order!

In response to Princess Luo Ying's call last time, those who joined the army could reclaim an additional 10 mu of land.

The third law was the trade order.

Both civilians and nobles had the right to sell Divine beans to other kingdoms, and sales to other kingdoms are exempted from business tax!

This was equivalent to export duty-free!

As soon as these three decrees were issued, the entire territory of the Xi Ling Kingdom, whether it was civilians or nobles, was boiling.

The first law was fine. It only stipulates that the land God had.

The second law, as soon as the reclamation order was issued, all the civilians in the Xi Ling Kingdom went to reclaim the land like beating chicken blood!

Although the land was owned by God, once it was reclaimed, it could be used permanently.

Although there was no ownership. What did that matter? Will God fight for a few acres of land with them?

That was why these civilians all saw hope. They were all extremely grateful to the Lord of Flame.

It could be said that this decree not only greatly improved the economy of the Xi Ling Kingdom, but it also made the civilians believe in the Lord of Flame countless times. It was even many times more devout than their belief in the previous God!

The previous God didn't give them so much land and Divine beans!

This decree could be said to be a killing weapon!

It calmed the hearts of all the citizens of the Xi Ling Kingdom, and they had completely returned to the Lord of Flame!

By contrast, that law gave the aristocracy less benefit, but there was a third law!

As for the third decree, trade order!

Regardless of whether it was a commoner or a noble, they could transport the Divine beans to other countries for sale. Most importantly, it was duty-free!!!

It should be known that selling things in Xi Ling's Kingdom required a tax. This tax was not low, and it was around 15%.

Don't underestimate this 15%. Sometimes, the net profit of a business was only 15%.

But now, if it was sold to other countries, it would be tax-free!

The average citizen had no ability to sell to other kingdoms.

Therefore, this business would belong to nobles.

Of course, it was not ruled out that a few civilians had this ability. However, since the percentage was not large, they could also benefit from it!

That was why those nobles were all full of ambition to set up caravans to sell Divine beans!

Of course, to ensure the supply of rice and enrich the variety of food, Princess Luo Ying still ordered a certain percentage of rice cultivation, and almost all the land owned by the Royal Family was planted with rice!

As soon as the three decrees were issued, a completely unique aura appeared within the Xi Ling Kingdom.

It could be said that these three decrees were like God's decree. Countless people of insight were amazed at the wisdom of those who came up with these three decrees!

### **Chapter 202: Another battlefield! Destroy them financially!**

"Many nobles have already begun to sell our Divine beans to the Hun River Principality. The Horton Kingdom is hostile to us, so the nobles don't dare to sell the potatoes."

In the newly renovated temple of Xi Ling Kingdom, Princess Luo Ying said.

Meng Ying nodded and said, "I'll sell all the beans to the Hun River Principality. By the way, Luo Ying, how is the Hun River Principality's grain production?"

Princess Luo Ying said, "Hun River Principality's grain production is relatively high. In addition to satisfying all of their citizens, they sell us some of them every year. In addition, the Hun River Principality has a sweet sorrel that can be used to brew wine. It's quite good to drink, and the sorrel root is also very sweet. Some children like to eat it very much, but the price is very high. It costs 3 silver coins per kilogram."

Eating the sorghum bar differed from eating. Eating the sorghum bar was like eating sugar cane. It was just that eating the sweet water inside was not something you could eat.

That was why he could only treat it as a sweet meal, not enough.

Hear that, Meng Ying's heart skipped a beat.

She was Lin Yan's favorite. When Lin Yan gave her enlightenment, he was teaching her carefully. He hoped that she could grow up rapidly!

By now, Meng Ying's wisdom was already quite tall.

In fact, she came up with one of the three decrees.

"There's a sort of sorcerer brewing method in the enlightenment that my God gave me."

Meng Ying muttered to herself.

Princess Luo Ying looked interested. "If it's from my God, the wine should be very delicious, right?"

Meng Ying said affirmatively, "That's for sure, but I'm thinking about another question: how to take down Hun River Principality. We still need some time to stabilize the Xi Ling Kingdom, then we'll take down the Horton Kingdom first?and?then Hun River Principality. In other words, it'll be a few months before we attack Hun River Principality."

Princess Luo Ying nodded and said, "Yes, according to the time, this is the case. After all, the situation in the Horton Kingdom is more complicated."

The reason why the Xi Ling Kingdom stabilized so quickly was because of Princess Luo Ying.

She was a Princess. In that situation where only she and the Eldest Princess were left dead, it was natural for her to be Queen.

But the Horton Kingdom was different.

The Horton Kingdom had no?existence like Princess Luo Ying, and the Royal Family and the Church were now united.

The nobles were also in the line with the Royal Church.

After taking down the Horton Kingdom, it would take a lot of time to digest and stabilize the Horton Kingdom and eliminate all the hidden dangers!

After that, it was time to attack the Hun River Principality?Principality.

The principality?of Hun River Principality?had five Churches and five Gods. The situation was more complicated than the Horton Kingdom.

Meng Ying stood up and looked at Fox Lady Qing Ling, who had been silent. She quietly listened to their discussion and said, "Saints', Luo Ying, let's do this. We will issue an announcement that the Yan Nation and the Royal Family will buy Hun River Principality?Principality sorghum at a premium of 50%. We can take it as much as we like!"

"50% Premium? Meng Ying, is this to let our gold coins circulate faster?"

Luo Ying asked.

Meng Ying said, "That's only one thing. More importantly, we can use this period of time on the Horton Kingdom to destroy the foundation of Hun River Principality?Principality, which is the food supply, to destroy them economically!"

Hearing Meng Ying's words, the Fox Lady Qing Ling's eyes lit up. Obviously, she had already figured it out.

Luo Ying was still confused. She?asked in confusion, "Buying sorghum at a 50% premium can destroy the food economy of the Hun River Principality?Principality?"

Meng Ying nodded and said, "Yes, that's the reason. "

She slowly explained:

“The price of rice in Hun River Principality is still 2 silver coins per catty. Our nobles bought divine beans in the past, which is definitely lower than the price of rice, so ordinary people would rather buy divine beans. However, there are still a large number of nobles and people who have their own land, so they still choose to grow valuable rice, because they don’t have seeds of divine beans.”

Luo Ying listened attentively and did not reply.

Meng Ying continued, “The price of sorghum is three silver coins, a catty. The yield of a mu of sorghum is the same as that of rice, but because the price is too high and the sales are not much, the people of the Hun River Principality do not grow it on a large scale. “

She looked at Fox Lady Qing Ling and said, “But Saintess, if we buy a tall beam for 4.5 silver coins, we’ll take it as much as we want, and the people of Hun River Principality can buy the divine beans we sold. Their food problem is solved. What do you think they’ll do?”

Hearing Meng Ying’s words, Luo Ying finally understood. Her face was filled with surprise, “I understand now. Sister Meng Ying, the people of Hun River Principality, no matter whether they are nobles or civilians, will definitely use a large amount of land to grow our sorghum. Under the circumstances that they are worthless than gold coins, they will even use all of the lands to grow high beams!”

Meng Ying nodded and said, “I’m sure that if we do this, in less than three months, Hun River Principality will have no more than 10% of the land that is still growing food! We should control the shipment of Divine beans. Don’t send out too much so that they can eat up the grain in the next three months!”

Princess Luo Ying’s eyes grew brighter and brighter. She added, “Then when we attack Hun River Principality, we will directly cut off the food supply. Hun River Principality will lose without fighting!”

At this point, the two ladies looked at each other and saw the excitement in their eyes.

They had never tried this before.

That was why it was called a warless war!

Directly destroy your food base. Once the war starts, cut off the supply of Divine beans. Where could they get so much food in a short time in a country as big as Hun River Principality?

And all of their lands were planted with sorghum!

Sorghum could not be eaten as a meal!

Without food, the Hun River Principality was useless no matter how strong it was.

Moreover, they were not much stronger than the Horton Kingdom.

Of course, even if they did not use this strategy, the Xi Ling Kingdom and the Yan Nation, which were the two countries of the Lord of Flame, would not have much difficulty in attacking them.

But once the war starts, it would take a lot of time, and there would be a lot of uncertainty in the war.

How could it be so fun now!

From an economic point of view, it would destroy the entire area!

And she took advantage of this period when she had no time to fight Hun River Principality?

“Sister Meng Ying, you really are a genius!”

Princess Luo Ying praised sincerely.

Meng Ying shook her head. She didn't do anything. “This is my entire God's instruction.”

Actually, this plan was her original idea.

No one on the Continent of Gods had ever done this.

There were no economists on the continent, and none of them would be in Hun River Principality? Principality, so Meng Ying was certain that Hun River Principality? Principality would not be able to see through their plans.

After all, neither the Xi Ling Kingdom nor the Yan Nation had any intention of attacking the Hun River Principality? Principality.

Not even spies were sent.

As long as the Xi Ling Kingdom made a decision, even the King of Hun River Principality? Principality would be tempted by the constant flow of God's coins.

Who was going against Gold coins?

“Sister Meng Ying, I will issue this policy now!”

Princess Luo Ying did as she said.

Fox Lady Qing Ling said, “We haven't harvested the Divine beans from the Xi Ling Kingdom yet, but the Yan Nation has produced a lot of them. I'll make sure they export them to Hun River Principality? Principality.”

“Well, Good!”

The ladies quickly came up with a plan.

Now, the new temple was divided into several areas. The Fox Lady Qing Ling had her own area, so she did not have any problems staying here.

Princess Luo Ying quickly released this new policy.

This policy excited many nobles.

This meant that these nobles could earn money twice.

When she went, she pulled Divine beans to sell to earn money.

When she returned, she pulled Divine beans to sell to the Royal Family and the Yan Nation, earning money again!

Under the encouragement of this policy, the nobles began to move. They formed a large group of merchants and began to sell the sacred beans from Yan Nation to Hun River Principality? Principality.

It wouldn't be long before the Hun River Principality?principality would grow sorghum under the stimulation of gold coins!

### **Chapter 203: Was a safe bet! Dark Forest and Holy Flame!**

The Hun River Principality was located in the south of the Xi Ling Kingdom. In the west, there were also some territories.

From this day forth, the noble caravan of the Xi Ling Kingdom had a territory of the ?Hun River Principality, dragging away the potatoes from the vehicles of potatoes!

The Hun River of principality naturally allowed these nobles to trade, but they still had to collect taxes.

But compared to the income, these taxes were nothing.

Just what did Lin Yan's saints had surprisingly expected?

Potatoes were selling crazily in the Hun River Principality!

Some of the nobles sold it to the nobles of the Hun River Principality at a lower price in order to sell it as soon as possible. This was equivalent to wholesale.

The reason they did this was that they wanted to buy something else.

Sorghum!

"You want sorghum? How much? "What price to give?"

This was a conversation between two kingdoms.

"As many as you want! 3.5 Silver coins a catty!"

A nobleman from the Xi Ling Kingdom said.

Yes, the Royal Family bought it for 4.5 silver coins, but the nobles of the Xi Ling Kingdom still only offered a price higher than the market price.

This was the situation Meng Ying, and the others had considered for a long time.

He wanted to know the activities of nobles of the Xi Ling Kingdom to be more proactive and help them fight this economic battle. He couldn't do without benefits. This 3.5 silver coin was the lowest purchase price set by the Royal Family. It was equivalent to giving the nobles a profit of 1 silver coin!

However, the purchase of sorghum in the Hun River Principality at a price of 3.5 silver coins per catty was still enough to make the Hun River Principality grow sorghum.

The reason was simple.

Rice could only sell for two silver coins per 1KG.

But sorghum could sell for 3.5 silver coins.

The yield of sorghum was about the same as rice per mu. She didn't even need to take care of it, so she would save a lot of labor.

Most importantly, now, there were cheaper Divine beans representing rice. If they all planted sorghum and purchased divine beans as their staple food, they would gain much more than they would gain from growing rice.

Of course, they could also plant a small portion of rice for their families to eat, and then plant sorghum on the rest of the land. In a year, their income would still double!

Who wouldn't want to double their income?

That was why the nobleman of the Hun River Principality immediately sold to all the sorghum stock to the nobleman of Xi Ling Kingdom.

"Will you always keep buying like this?"

The nobleman of the Hun River Principality asked.

"Of course, it's always been bought. You can buy as many as you want."

The nobleman of the Kingdom of Xi Ling said.

However, on the first day, the nobles of the Hun River of Principality still had not made a decision.

However, on the second day, the third day, and the fourth day, a large number of nobles from the Xi Ling Kingdom were buying sorghum every day. Some of the nobles saw business opportunities and were bold enough to grow sorghum, where it was already growing on a large scale.

The climate of the Hun River Principality was quite good, which was one of the reasons for their high grain production.

The light here was strong, the climate was good; the soil was good, and almost all were plain.

After these nobles planted sorghum, some anxious nobles had already gone to the Church to apply for sorcerers.

After the mage accelerated, the growth cycle of sorghum would be greatly shortened!

As more and more nobles came to the Xi Ling Kingdom to buy sorghum, the sale of divine beans became more and more popular. After pressing the sale of rice, more and more people grew sorghum in the Hun River Principality.

Then, a new sorghum wine was brewed in the Hun River Principality, which was well-brewed in Yan Nation but said to be brewed in the Xi Ling Kingdom.

That sorghum wine was especially delicious, and it instantly made Hun River principality's people go after that.

Now the people of the Principality of Hun River knew why the Xi Ling Kingdom wanted to buy sorghum!

At this time Queen Luo Ying sent an envoy to sign a long-term sorghum purchase agreement with the Royal Family of the Hun River principality.

With the guarantee of the sorghum purchase agreement, more nobles in the Hun River principality began to grow sorghum on a large scale!

“In fact, we didn’t pay a lot of gold, but we made a lot of money.”

Inside the temple, Luo Ying looked at the sorghum wine in front of her.

She was the Holy Lady, so of course, she couldn’t drink. This wine was just for their discussion.

Meng Ying nodded and said, “Yes. We’ve already taken back a lot of gold coins from the sale of divine beans. Although sorghum was bought at a high price, the wine we brewed was sold at a higher price. That way, we won’t lose money. We even spent a lot of our gold coins on the Hun River Principality, and we’ll be able to destroy the Hun River principality’s food base.”

That was the beauty of this move.

It seemed like they had lost a lot of money to buy sorghum. They were trying to destroy Hun principality’s grain base, but actually, the delicious sorghum wine had earned it back.

The wine was the most profitable thing.

Normally, two kilograms of sorghum could brew one kilogram of sorghum wine.

Two kilograms of sorghum Xi Ling Kingdom spent 9 silver coins.

However, the price of a kilogram of sorghum wine was 10 silver coins. The selling price was not to mention the price. It was the price and profit of the nobles who were in charge of selling it.

Ordinary wine could not be sold at such a high price, but this sorghum wine came from the enlightenment of God. It was terrible to drink.

In the Hun River Principality, drinking this sorcerer’s wine was a symbol of identity and status. After some commoners saved their living expenses by eating divine beans, they had to eat and drink!

Therefore, the volume of sales of sorghum wine was quite good!

No matter what, the Yan Nation and Xi Ling’s side would not lose money, while the Hun River Principality would not lose money.

However, the people of the Hun River Principality hadn’t found out yet.

The nobles of the Hun River Principality were spending their gold coins and enjoying their lives with the delicious sorghum wine. They all felt that they had taken in more gold coins and could enjoy more wine and more women.

However, they would soon realize that they had already fallen into a vast pit and could not climb out!

Of course, there were still some unexpected incidents. For example, some nobles in the Kingdom of Xi Ling also wanted to plant sorghum, but these nobles were secretly warned by the Royal Family.

Of course, they could plant it. It had to be after they took over Hun River Principality. When that happened, the price of sorghum would plummet.

When Lin Yan’s holy daughters dug a vast hole for the Hun River Principality and the economic war was raging in the north.

“Ho, it’s finally there. Is the Dark Forest in front of us?”

A Night Elf looked at the dark forest and asked.

The forest was quite large.

When he mentioned the Dark Forest, there was actually a prefix: Endless.

Endless Dark Forest.

No one in this dark forest knew how big it was.

Of course, Rocky Forest was cultivated by the Elf Empire from the Dark Forest.

Now, the Night Elves and Green-Elves had become the second batch of cultivators.

There was a dark substance in the air of the Dark Forest. The existence of this dark substance made the Dark Forest look very dark no matter what.

Even the noon sun could not shine in, nor could it dispel the darkness.

Even if it was lit inside, it could not dispel the darkness.

In the past, when the Rocky Forest Empire used to reclaim the Dark Forest, they used a special magic flame.

The hundreds of thousands of Elves were reclaimed at the same time. In order to maintain this magical flame for more than three days, the surrounding dark matter would be dispersed.

But they didn’t think it was enough to dissipate.

They had to keep moving forward.

Because dark matter could spread, once the flame was extinguished, dark matter would return!

The reason why it didn’t spread now was that the Elves Empire of Rocky Forest had set up a large barrier after the reclamation, blocking the spread of dark matter.

However, such a large-scale barrier could only be arranged after the reclamation was completed.

The reason why the forest had not been reclaimed was simple. They had used up a small magic stone that was needed to ignite the magic flame.

The methods the Night Elves prepared to use were different from the methods used by the Elf Empire in Loki Forest.

Because their God was the Lord of Flame.

He only needed to pray to the Lord of Flame to obtain a special flame.

Lin Yan got this flame from the few Holy Spirits.

Lin Yan called it Holy Flame!

When burning, it could emit Holy Light!

Holy Light was the most popular method used by the gods of the Heavenly Realm. The Holy Light was too useful.

The simplest point, of course, was to dispel the darkness. This was the basic function of all light!

This was also the reason why Chen Xi was not worried about the beliefs of the other elves that joined the reclamation.

These elves prayed to the Lord of Flame every day to obtain the Holy Flame, and their faith would unknowingly turn to the Lord of Flame.

#### **Chapter 204: Invincible Holy Flames! The terrifying speed of reclamation!**

“Huh, our perception of the forest is much weaker.”

.

Over 50,000 Night Elves, over 40,000 Green-Elves, and nearly 100,000 people walked into the Dark Forest after one another.

In the Dark Forest, there were many dark creatures.

But ordinary dark creatures were not a threat.

The biggest threat was the legendary dark creature among them.

The deeper into the Dark Forest, the stronger the dark creatures were.

When the Elves Empire of Rocky Forest was reclaimed, the danger was actually less, because they were the ones who had started from the edge of the Dark Forest.

“Lomina, what kind of method are you going to use it reclaim land?”

Anna asked.

Lomina looked at Anna and said, “My God will give us a special flame.” She prayed.

As she prayed, a white flame appeared in her hand.

When the flame burned, it emitted a pure white light.

The pure white light instantly dispersed the surrounding darkness.

Since the flame wasn't big, it dispersed in a small area.

“Oh my God, why do I feel the Holy Light when the flame burns?” Anna exclaimed.

Lomina was also startled for a moment because she also felt it.

God didn't tell them what that flame was.

But then, she knew.

This was a flame that could emit Holy Light when burning!

Although the Gods of Heaven were fond of the Holy Light, it took a lot of Divine energy to descend.

In the Church, there would be some special stones, and there would also be Holy Light stored inside. This kind of stone could be said to be priceless because it could not be bought outside, and the quantity was very small.

In short, the Holy Light was precious on the Continent of Gods.

That was the reason why the Elves of Rocky Forest didn't let their Gods descend into the Holy Light.

The price was too high.

It was not worth it.

But then, the flame that was in Lomina's hand could actually emit a Holy Light when it burned!

Of course, the Holy Light was not particularly strong.

But dispersing the surrounding darkness was enough.

And it wasn't dispersing slowly.

It was the instant the Holy Light came out; it dispersed the surrounding darkness!

It should be known that when the Rocky Elves' Empire was first reclaimed, the magical flame was burned for over three days before it could dispel the darkness.

The Holy Light from the burning of the Holy Flame was able to disperse immediately!

The Holy Light still needed to burn in this area for some time, because dark matter could spread out at any moment.

But that was amazing enough!

"Lomina, how many flames are there? If there are many of them, I'm afraid we'll be able to reclaim them at an astonishing speed!"

Anna was excited.

At that moment, she saw the 50,000 Elves were praying.

Along with the prayers of the 50,000 Night Elves, the hands of these 50,000 Night Elves were filled with Holy Flames!

The Holy Flame was not big, and the energy inside was only ten. When Lin Yan rose to the level of the Eternal Holy Flame, the little flame that he gave them had some of the properties of not being able to extinguish the flame. They couldn't say it was not consumed, but it was not consumed!

It was not consumed when it was burning. If it was used to attack, it still needed energy points. That was the reason why there must be energy points in the burning Flame.

The ten energy points in such a Holy Flame were enough to burn for three days.

The area that could disperse was almost 50 meters square!

At the same time, so many Holy Flames appeared. The forest was filled with Holy Lights. The Holy Light instantly dispersed the darkness and made the edge of the forest brighter than the day.

That scene shocked Anna!

Even the 40,000 Greenland Elves were stunned!

In fact, Lomina was also surprised.

More than 50,000 Night Elves were equally surprised.

They didn't expect that the Lord of Flame would directly give them a flame that could emit Holy Light when it was burned!

That was too amazing!

"Oh, My God!"

Anna was shocked.

She once again had a clear understanding of Lord of Flame's strength.

The Lord of Flame controlled all the flames in the world.

There was not only a flame that could absorb heat and allow the surroundings to freeze quickly.

There was such a flame that could emit Holy Light when it was burning!

Moreover, there were so many of them!

"Thank you, to be my God!"

Lomina covered up the shock in her heart and sincerely expressed her gratitude to the Lord of Flame. She then said:

"I didn't expect that my God would actually give me the Holy Flame. Anna, you'll be in charge of reclaiming the land. I'll go ahead in case there's a powerful dark creature attacking us."

"Me? Alright, leave it to me. With this kind of Holy Flame, ordinary dark creatures won't be willing to come. The speed and safety of our reclamation will greatly increase. The only thing we need to guard against is powerful, dark creatures and legendary creatures. Those can only be yours, Lomina."

Anna said.

Many dark creatures in the Dark Forest were afraid of the light.

Therefore, when the Rocky Forest was being reclaimed, the hundreds of thousands of forests that were in charge of reclamation were very slow. The entire Rocky Forest was reclaimed for decades.

Because they had to wait for the darkness to be completely expelled before they could move forward so that the dark creatures would not attack them.

Although they were not weak, they could not withstand the sneak attack of the dark creatures.

Once they were ambushed, how could the Elves, who had a few of them, to begin with, withstand a few casualties today and a few tomorrow?

Regardless of whether it was Chen Xi, Lomina, or Anna, they were all ready to reclaim land for decades.

But,

They never expected that the great Lord of Flame would directly give them the Holy Flame!

With that kind of Holy Flame, they could dispel the darkness in an instant and that could be obtained continuously, their cultivation speed was shocking!

It was like, it would only take a few months for the elves of the Rocky Forest to complete the amount of work that took decades to reclaim!

It could be said, the Rocky Elves who spent decades but still felt that they had done a great thing would feel that their decades were wasted.

Well, they were just afraid of having a comparison!

.....

After witnessing the Holy Flame, both the Green-Elves and the Night Elves were extremely excited!

They were also amazed at the magic and power of the Lord of Flame!

When Anna saw that she agreed, Lomina said, "The Holy Flame is placed every 100 meters. This way, it can be fully covered. Since my God has bestowed such a divine object, we will speed up the reclamation. Anna, you Green-Elves, join my God as long as you pray to the Lord of Flames; you can obtain the Holy Flame."

Anna couldn't help but feel a little surprised, and then she felt that it wouldn't be good. After all, they had faith in God.

Lomina nodded and said casually, "It's just a prayer, nothing more."

Anna thought for a moment and said, "Alright, we can't just sit around and do nothing. I'll let them all join in."

Lomina said, "Alright, I'll leave this to you. I'm going to guard the front. You guys keep moving forward, don't take the risk."

Anna said, "That's good!"

.....

Lomina flew to the front of the team and felt the smell of powerful, dark creatures back and forth.

Anna was in charge of the entire reclamation process.

Under her command, the Green Elves and the Night Elves were divided into five rows. They stood in five long rows and took over a dozen kilometers of line, and they began to advance steadily.

A large number of fifth-ranked and sixth-ranked Elves from the two races didn't participate in the reclamation. They were evenly distributed among the teams and were responsible for guarding.

After all, safety comes first.

Although they sacrificed some of their speed in order to be safe. With the Holy Flame, the speed of reclamation was quite amazing.

The Dark Forest was constantly lit up.

Whether it was vertical or horizontal, there was a Holy Flame every 50 meters.

Their Holy Light dispersed all the surrounding darkness.

To pray for the Holy Flame required Divine energy, but it did not require much Divine energy.

Even then, frequent prayers were still a burden.

That was the reason why Anna wanted to divide all the Elves into five long lines.

So that they could be divided into rows and then reclaim!

Two of the five rows of Night Elves were praying in turn.

What was the third row doing?

Their role was simple.

After the Night Elves had reclaimed a thousand meters in front of them, they were in charge of taking down the last Holy Flame and sending it to the front. They used it repeatedly!

After the dark matter was dispelled, as long as there was no dark matter that surged up, it would not appear out of nowhere.

Although these dark substances were also attached to the plants, under the illumination of the Holy Light, the dark substances on the plants were also completely dispersed.

Therefore, the Holy Flame could be used repeatedly.

This formed a wheel.

It quickly rolled inside.

Of course, the Holy Flame in the north of the team was still not taken down. Not only was it not taken down, but there would also be people there to replenish it in a couple of days.

Because they had to reclaim the land, they had to reclaim it for a period and then reclaim it to the north!

.....

“The speed of reclamation is too fast.”

In the sky, Lomina was on guard as she said.

The Elves could reclaim more than five kilometers into the Dark Forest in an hour!

In just half a day, they had already reclaimed a rectangle 30 kilometers deep and 10 kilometers wide!

It could be imagined that once more Elves joined the reclamation, the reclamation speed would become faster and faster. It was very likely that they would be able to reclaim a forest as large as Rocky Forest in just a month or two!

## **Chapter 205: Stunned Wind Elves!**

In the blink of an eye, another three days passed.

After the Elves reclaimed the land 100 kilometers deep, they began to reclaim it again.

In these three days, they cultivated 100 kilometers deep in the Dark Forest. There was also a square that was 100 kilometers north!

“Continue to reclaim the north.”

Anna made a decision.

Instead of reclaiming the land in-depth, they continued northward.

This was because there were few dark creatures outside the Dark Forest, and the difficulty of reclamation was also lower.

During these three days, the Elves prayed to the Lord of Flame every day.

As their prayers increased, and after every prayer, they saw the Holy Flame coming out; these Green-Elves had a better impression of the Lord of Flame.

On this day, another Elf finally arrived outside the Dark Forest.

“Finally arrived.”

A Petite Elf said.

That was the leader of the Wind Elf Tribe.

There were not many Elves, and the way they named them was Messy.

Many of the Elves were named after the living forest. Some were named by the Gods of faith, and some were named by magic.

For example, why were Night Elves called Night Elves?

It was because they had previously believed in the Moon God.

Greenland Elves were called Greenland Elves because they order for the forest they live in as Greenland.

As for what kind of Elves they were, there was no such strict distinction.

In fact, they were no different from the Night Elves, but they were different.

As the name implied, Wind Elves were Elves that specialize in Wind magic.

Elves were different from human magistrates.

Their magic was not directly used to attack.

Anyone rarely saw an Elf holding a wand.

Yes, but less.

The Elves' magic was usually combined with their arrows and machete.

Therefore, the Elves were not afraid of close combat.

Even if they knew magic, they were also excellent warriors.

The arrow that Lomina shot into the sky outside the ice wall was legendary magic she used.

.....

In Rocky Forest, many Elves gave up their original appellation after they entered Rocky Forest.

They could all be referred to as high-ranked Elves.

It was a pure and unified Elf born from the Tree of Life!

Of course, in the periphery of Rocky Forest, these Elf Tribes had their names. Otherwise, how could they be distinguished?

.....

Compared to the other Elves, the Wind Elves were smaller.

“Hey, Patriarch, is there something wrong with this place? What about the Dark Forest?”

At this moment, a Wind Elf spoke.

The Wind Elf leader took a closer look. Although the forest in front of him was tall, no darkness could not be removed. It was not the Dark Forest.

“It’s true that the barrier is here. They were cultivated for several days. They must have cultivated for several hundred meters.”

The Wind Elf leader felt the barrier and said.

“Let’s go, let’s join in too. This project will take a few decades. Are you all ready?”

The Wind Elf leader asked.

“Patriarch, of course, we are prepared. It’s a great honor to be involved in such a great project.”

A Wind Elf said.

The other Wind Elves expressed their opinions.

“Then let’s go!”

The Wind Elf leader led the thirty thousand Wind Elves into the Dark Forest.

At this moment, there was no longer any Holy Flame around the Dark Forest, because it was no longer needed.

This place could no longer be called Dark Forest. Chen Xi thought of a name for a long time. She gave it the name Holy Flame Forest.

This was a forest that was reclaimed by the Holy Flame of the Lord of Flame!

The Wind Elf leader and thirty thousand Wind Elves quickly walked into the Dark Forest, and they walked inside.

After walking several 100 meters, they still didn’t meet a single Elf.

However, the surrounding darkness was dispersed.

This meant that this place was reclaimed.

“Hey, what kind of method did they used to reclaim the forest? It seems that the speed of reclaiming the forest is a bit fast. Let’s go. Let’s go further. If we go a few hundred meters, we should be able to see them.”

The Wind Elf leader was still calculating the rate at which the forest was reclaimed.

When the Rocky Forest was reclaimed, the average day was 200 meters.

Yes, that was it.

Of course, it was deep. It was dozens of kilometers wide.

In the entire Rocky Forest, with the increase in the number of Elves that were reclaimed in the later period, the rate of reclamation increased slowly. However, it took a total of 60 to 70 years for it to be reclaimed.

Of course, to the Elves, every Elf could live thousands of years. They did a great thing in their 60s and 70s. They didn’t feel anything. Instead, after they completed it, they had a high sense of honor!

.

Back then, when the Rocky Forest was being reclaimed, there were more people than there were now. As they were outside the Dark Forest, the difficulty was less.

Therefore, the Wind Elf leader was not wrong.

However, when they walked eight to nine hundred meters again, they still didn’t see the Elves inside.

Moreover, there wasn’t even the slightest bit of dark substance in the surroundings, which meant that all the dark substance was dispersed.

This made them a bit confused.

“Could it be that they’ve used some new method, so the reclamation is faster than I thought?” The wind Elf leader thought.

“Forget it, I’ll contact Sister Mina.”

The wind Elf leader said.

After that, she cast a small spell.

This little magic was the method the Elves used to contact the forest.

The prerequisite was to know the characteristics of the target.

It would work only in the forest. Once they left the forest, it would not work.

The Elves were born in the forest.

“Hey, Aishara, you guys are in the Dark Forest?”

Lomina’s voice sounded.

“Sister Mina, where are you?” We’ve been walking nearly two kilometers into the Dark Forest. We haven’t seen you yet.”

Lomina quickly gave the location to Aishara.

.....

An hour later, Aishara and all the Wind Elves were standing about 100 kilometers away from the edge of the Dark Forest. They were dumbstruck as they looked at the Holy Flame everywhere in the forest.

“Oh my God, you guys are cultivating so quickly!”

Aishara still couldn't understand.

It was the speed at which the Night Elves and the Greenland Elves were reclaiming, which was out of her expectations.

It was too fast.

It had only been a few days.

They had all reclaimed such a large forest.

You know, the original Rocky Forest was so big, but it took years! But Night Elves and Green-Elves only took less than a week!

The speed was terrible.

Her brain was full of shock!

In fact, not only she but also more than 30,000 other green Elves were shocked.

These green elves had been prepared for a long time to spend decades on this great project.

But now, they reckon, at this rate, at most a few months, they would be able to reclaim a new Rocky Forest!

Such a strong contrast left them completely dumbfounded!

They should be happy at this speed.

But now, their surprise was more than happy.

Really, too fast!

## **Chapter 206: Imperceptible! Elves that joined one after another!**

“Great Lord of Flame, thank you for your kindness. Please give us the Holy Flame and help us light up the darkness.”

In the forest, a Green Elf prayed.

Their prayers were different from the Night Elves.

If he was a Night Elf, he would add something like “I am your true believer “.

After the Elf prayed, a white flame appeared in her hand.

Although she had prayed many times, every time she saw this white Holy Flame, she could not help but sigh.

He lamented the wonder of the Holy Flame.

A flame that could emit Holy Light when burning and a single flame that could burn for several days. I really don't know how the Lord of Flames created such a flame.

That was why every time she saw the Holy Flame, this Green Elf would be more curious and worship the Lord of Flame!

Even though the Elves had a God of their own faith that did not prevent them from worshipping the Lord of Flame.

Especially when these Greenland Elves interacted with the Lord of Flame Holy Flame every day. Every time they saw the magical Holy Flame that lit up the Dark Forest easily, they were amazed.

As for faith, it sometimes started with worship.

Now, there were a few more Elves who were amazed. They were Wind Elves.

The Wind Elves had just joined, so they were led by the Green-Elves. One Green Elf led a Wind Elf.

"It's good to have a Holy Flame every 50 meters, but before you put down the Holy Flame, you need to take the Holy Flame around and disperse all the dark matter around you. After the dark matter is dispersed, it usually takes a few minutes for it to return, so you need to walk 50 meters around you."

In the forest, a Green Elf explained the decision to the Wind Elf.

It was actually very simple.

First, they took the Holy Flame and walked around the area to disperse the dark matter everywhere, leaving no corner.

Although dark matter would spread, it would not spread too quickly. It would be slower than the fog.

Therefore, they could just fix it after dispersing it.

Holy Light was different from ordinary light.

The Holy Light had a certain penetrability. The stronger the Holy Light stronger would be the penetrability.

Just like when Princess Luo Ying saved the Eldest Princess in the Church of the Eastern City, the Holy Spirit used a holy stone to emit a strong Holy Light. Even the ground and the wall could not block it.

When the Holy Flame was ignited, the Holy Light was naturally not that strong.

After all, the energy in the Holy Flame was limited.

Lin Yan could not put too much energy into it. This was a large-scale reclamation, and quantity was more important than quality.

A hundred thousand elves prayed for over a million energy points at once. Even if they could use the Holy Flame repeatedly, they could still consume a large amount of Holy Flame in a single day. It would not be worth it to put too much of it.

However, even if that was the case, as long as they took the first step, all the dark matter in the dead corner would be removed and then fixed for more than ten minutes. Even if there were some dark matter in the dead corner, they would not exist anymore.

The Wind Elves learned very quickly. They were not stupid.

When they learned it, the battlefront of reclamation was lengthened.

It increased the rate of reclamation by about a third.

After all, the more people there were, the better it was.

The Dark Forest was lit up one after another.

Since they were advancing slowly, almost all the dark creatures in the Dark Forest had been driven away by the Holy Light. There were no dark creatures that did not open their eyes to attack them.

When Rocky Forest was being reclaimed, the elves were very careful. However, over the decades, hundreds of Elves were injured and dozens died.

However, this time, since the Holy Light was far more powerful than the magical flames used by the Elves, after several days of reclamation, no dark creatures came to attack.

Holy Light was the dark creature's nemesis.

Some of the weaker dark creatures were injured by the Holy Light.

It was not that the powerful creatures didn't appear, but they were not willing to let the Holy Light shine.

In addition, dark creatures were not everywhere in the Dark Forest. The density of dark creatures was not high.

This had something to do with them not going too far.

However, with Lomina's vigilance and with the elves sending a large number of powerful fighters to guard, the threat of dark matter was reduced to the lowest.

Just like that, the reclamation continued.

Some of the Greenland Elves didn't notice it at all. As time passed, when they mentioned the Lord of Flame, their voices started to develop toward "Piety".

The same was true for the Wind Elves that joined in.

.....

A few days after the Wind Elves joined, another Elf tribe arrived.

This was also an Elf tribe living in the east of Rocky Forest. This Elf tribe had more than 30,000 Elves, and they were a tribe belonging to the Japanese Elves.

Like the Wind Elves, this Elf tribe was shocked when they arrived at the Dark Forest.

When they arrived, the Dark Forest had already been reclaimed, and the forest was even larger!

That shocked the 30,000 Elves!

After being shocked, they were naturally delighted.

Every Elf was happy.

This meant that they could quickly reclaim a huge forest.

As long as they thought about it, they could not help but feel a little excited that they had used only a few months to complete the feat that the Rocky Forest Empire had taken 60 to 70 years to complete!

They did not enter Rocky Forest, but it was not just their strength.

There was also a reason for first come first served.

At first, these elf tribes all lived in different parts of the continent.

They were scattered, and their living environment was poor. They often needed to use a barrier to hide their living forest.

There were too many humans who covet them.

Humans who didn't think of them were fine.

Who would let go of such a beautiful Elf who was still young?

That was why several Elf tribes agreed to reclaim the Dark Forest behind the Rocky Mountains.

Well, that was thousands of years ago.

After that, they spent decades reclaiming the Rocky Forest.

There were many Elves Tribes that were added one after another.

For example, the Night Elves Tribe, the Wind Elves Tribe, and the other tribes outside the Rocky Forest were the last to know the news, and then they rushed over.

At that time, Rocky Forest was almost saturated.

Fortunately, there were still a lot of scattered forests outside Rocky Forest that could provide them with a living.

However, not being able to enter Rocky Forest was still their biggest regret.

But, now, this regret was about to be compensated.

Because in their hands, a new Rocky Forest, Holy Flame Forest, would be born! Thus, each of the Elves raised their spirits and took out a dozen percent of their enthusiasm to do this.

In their mouths, the words 'Lord of Flames' were mentioned more and more times every day.

They not only mentioned the Lord of Flame when they prayed.

Even when they were talking to each other, they couldn't help but praise Lord of Flames' greatness.

It was because of the holy flame given by the great flame Lord that they can cultivate so quickly.

Now, they were all looking forward to it. After they had reclaimed the land and established a new Elves Empire a few months later, the Elves Empires in Rocky Forest would not know what they would be surprised about ~~

.....

Three days later, another Elves Tribe joined.

Now, five Elves tribes had joined

The addition of this Elves tribe made the reclamation team even larger.

Anna, Aishara, and the new Elves' tribe leaders Daisy and Heidi were each responsible for a piece.

Night Elves, Green-Elves, and Wind Elves were in charge of reclamation.

The newly joined two Mia tribes were in charge of reclamation to the north.

The total population of the four Elves' tribes was 180,000.

They could catch up to the number of people who were reclaimed by the Elves' Empire in Rocky Forest.

However, the speed of reclamation was not even comparable to that of the hundreds of thousands of Elves in the late Elves' Empire!

### **Chapter 207 Changes in faith! The gaze of the Fairy Goddess!**

In the Dark Forest, more and more Elves tribes joined.

Half a month after the beginning of the reclamation, the entire Dark Forest was reclaimed by nearly 300,000 Elves.

These geniuses who joined the team were startled by the speed at which they reclaimed, and they took out a dozen percent of their enthusiasm to reclaim the Dark Forest.

However, as they got deeper and deeper into the Dark Forest, the rate of reclamation deep into the Dark Forest slowed down.

The reason was simple. There were more dark creatures, and the dark creatures inside were becoming stronger.

The dark creatures of the past had fled as long as they saw the Holy Light from afar.

After clearing hundreds of kilometers into the Dark Forest, the Elves had not seen a single dark creature.

But now, there were some dark creatures peeping at them in the darkness, as if they were waiting for an opportunity. Only when the Holy Light was about to reach them these dark creatures would leave.

Because they were still afraid of the Holy Light.

Dark creatures was a collective term.

Some of these dark creatures were inherent in the Dark Forest, and some were infected by dark substances and became new dark creatures after Warcraft in the outside forest ran in.

They were obviously different from the dark creatures underground and the chaotic creatures in the Abyss.

They were afraid of light, so they only stayed in the Dark Forest and didn't run around.

That was the reason why Elves were divided into three rows after the number of dark creatures increased.

A row of Elves holding the Holy Flame walked ten meters into the uninhabited Dark Forest.

Then, the second row of Elves held the Holy Flame and walked another ten meters.

Then, the third row of Elves continued walking ten meters.

They gave three people the steps that one elf could complete with the Holy Flames. The amount of Holy Flames they needed increasing a lot.

However, this safety factor increased.

Although the speed was slower, the Elves had cultivated one after another, and no one was secretly attacked by dark creatures.

The dark creature wanted to sneak attack, but they couldn't find a chance.

"As long as the Holy Flame is in our hands, they will not even dare to come over. If we encounter a sneak attack from a dark creature above the sixth rank, we'll crush the Holy Flame in our hands. The Holy Flame will shine twenty times in an instant, and we can chase them away."

"In addition, if there's a more powerful dark creature coming, and we don't have time to support you, you can pray to the Lord of Flame to get a bigger Holy Flame, but you only have this opportunity once a day."

The Elves were explaining the art to the Elves of their chief of the tribe!

After the reclamation was getting deeper, it was necessary to be careful.

Of course, this slowdown was relative.

As more and more Elves joined, the rate of reclamation was still much faster than at the beginning.

In more than half a month, the Dark Forest was reclaimed to an area over 400 kilometers deep and 600 kilometers wide.

This was equivalent to one-fifth of the Xi Ling Kingdom and one-third of the Yan Nation!

Of course, the Elves needed a large forest area.

Like Rocky Forest, it was a huge forest that was over 1,000 kilometers wide and nearly 2,000 kilometers long.

In such a large forest, there were only a million Elves there.

As for Holy Flame Forest, Chen Xi originally planned to reclaim a square of a thousand kilometers in the first phase, and then continue to reclaim it.

But now, because of the smooth progress of reclamation, it could be completely reclaimed at once!

.....

After such a long time of reclamation, aside from the Night Elves, the Greenland Elves prayed to the Lord of Flames every day. In fact, they had already started to contribute their faith to Lin Yan.

Of course, these Greenland Elves had not been discovered yet.

But someone noticed.

.....

This was a beautiful place.

Forests, grasslands, flowers, lakes, rivers, and everything.

The Flowers bloomed on the grassland. No matter how long it took, it would not wither.

Between the forest and the grassland, there were many Elves carrying wings flying around. These little Elves had many things to do, but now, they were mainly in charge of gathering nectar, just like bees.

In the sky, the clouds were exceptionally white. They were floating like balls of cotton. If the owner of this place was in a good mood, he would sleep on the clouds.

As expected, in a white cloud, a pair of lotus-like arms stretched out. They had five slender fingers, fair skin, and both arms and hands looked perfect.

Then, a woman with a wreath on her head stood up from the clouds.

She also had two sharp ears.

Looking at her appearance, she was naturally an Elf.

The appearance of the Elves was all quite high. Like the Night Elves, not to mention 100 points, but 98 points or above, were certain.

Chen Xi and Lomina could even reach 99 points.

But they were still one point away.

That score wasn't actually different in appearance.

Chen Xi's looks were comparable to that woman's.

However, Chen Xi's 1% was lacking in a certain temperament. This temperament didn't reach a certain level, so she couldn't make up for it.

Even if Chen Xi reached the Sanctuary, she could not obtain such a temperament. At most, she obtained 99.9 points.

.

However, if Chen Xi saw that lady, she would know what the difference was.

Because she had already left the Human Kingdom, she was a God.

God was perfect.

.....

The lady got up from the white clouds and gently flew into a deep lake, where she took a shower.

When she stood up after washing, the water naturally flowed down her body. There wasn't a single drop of water left on her body. It was obvious how good her skin was.

In fact, she only needed to flick gently her hair and all the water in her hair would fall off.

After taking a shower, she put on the gauze and came to the grassland.

A long bench made of fresh flowers quickly took shape.

She sat on the flower bench and tasted the nectar sent by the Elves.

Then she took out a book and flipped it over with relish.

After flipping through it for a while, she said to herself, "It seems like I haven't collected the power of belief for some time, right?"

After some thought, she seemed to have turned on a certain switch and listened carefully.

After a short time, she found a certain line and opened the tunnel to connect the power of belief.

All the faith energy was turned into a white ball of light, which she stored into her Godhead.

"Oh, why do you feel a lot less?"

The Goddess of several Elf tribes muttered to themselves.

The Gods of the Elves were all Goddesses. Basically, every tribe had different Gods.

The issue of faith was very difficult to unify. As long as they did not believe in the Demonic God of the Abyss, no one would force them to do anything.

For example, in the Rocky Forest, half of the Elves had followed the most Elves in the Rocky Forest. The Elves of light believed in the Goddess of Light.

However, half of the Elves had their own beliefs.

Of course, they all believed in fairies.

"What happened? Could it be that they've demonstrated a miracle again?"

This Elf Goddess decided to cast her gaze to see what was happening.

## **Chapter 208: Poor Elven's?Goddess**

After the number of Elves reached 300,000, a few days later, Chen Xi returned with the last two Elves.

This way, the number of Elves reclaiming the Dark Forest reached 350,000.

Those 350,000 Elves were all Elves around Rocky Forest.

“Mother, I’ve already sent someone to invite the Elves who are still scattered in some of the small forests on the continent. If it goes well, in a few years, the number of Elves in Holy Flame Forest will reach as many as a million.”

Chen Xi said to Lomina.

.

Lomina nodded and said, “Chen Xi, we’ve already reclaimed so many of them. We can let the Elves behind us plant them.”

Chen Xi said, “Yes, I can plant it.”

The reclamation of the Dark Forest was the first step to disperse the dark matter.

The second step was to plant some special magical plants.

When those plants grew up, they would further improve the environment of the Dark Forest and would turn the Dark Forest into the Holy Flame Forest.

Those plants were also the eyes and ears of the Elves throughout the forest. There were many kinds of plants that could provide food, fruit, drinks, and so on.

The longbows they used were also made of a special plant.

In addition, the clothes they wore were also extracted from a magical plant and woven.

It could be said that everything about the Elves came from the forest.

Of course, the most important thing was to plant the seeds of the Tree of Life.

This matter had to wait for the entire Holy Flame Forest to take shape.

The Tree of Life must be planted in the middle of the Holy Flame Forest to protect the entire Holy Flame Forest.

The Tree of Life was not only capable of breeding Elves. It could bring the entire forest back to life and become the new home of the Elves!

In addition, outside the Dark Forest, ancient trees with excellent defense must be planted.

With these ancient trees around, the enemy could never enter Holy Flame Forest from the ground.

As for the sky, there were Elves defending, and the enemy could not even sneak in.

Even if a powerful enemy slipped up, it would be discovered.

Hence, the 50,000 Elves planted ancient trees at the edge of Holy Flame Forest.

Chen Xi’s division of the Holy Flame Forest was not based on the line that was originally reclaimed. Instead, it was extended to the west for a hundred kilometers before it became the line of the Holy Flame Forest.

As a result, there was a large area around the Holy Flame Forest.

The reason for this was the same as the Elven Empire of Rocky Forest.

When the Rocky Forest was reclaimed, all the reclaimed forest was not Rocky Forest. Some area was left outside.

This was because when Rocky Forest was being reclaimed, it was an invitation to the Elves of the entire continent. The Night Elves also responded to this invitation, but when they arrived, Rocky Forest was almost full.

However, they had already risked their lives to come there. It was impossible for them to return.

That was why the Night Elves lived outside Rocky Forest.

Now, at the edge of the Holy Flame Forest, if the Holy Flame Forest was full, the other Elves' tribes would have nowhere to stay.

What the 50,000 Elves had done allowed the reclamation of the Holy Flame Forest to reach the second stage.

This was the planting stage.

It was only 20 days since the reclamation, but it already entered the second stage!

When the Rocky Elves were reclaiming land, it took them ten years to enter the second stage!

This difference was not ordinary!

.....

When the Holy Flame Forest was expanding, the fairy goddess was sitting on a flower bench in the Heavenly Realm. She looked worried.

Because of the existence of the Heavenly Barrier, every time the gods of the Heavenly Realm did something related to the Continent of Gods, they consumed their Divine energy.

Even if it was just a glance, it would still cost them Divine energy.

This kind of consumption increased with time.

The longer it took to focus, the greater the cost.

For the past few days, she had put in a lot of attention.

Naturally, she knew what the Elves were doing!

They were reclaiming the Dark Forest!

Then she was surprised to find that the Elves were cultivating too quickly!

More than a thousand years ago, she knew about the reclamation of Rocky Forest.

Rocky Forest took over ten years to reclaim.

The comparison was astonishing. Even though she was a goddess, she was shocked.

Then, she realized why the Elves in Holy Flame Forest were reclaiming land so quickly!

Holy Light!

They actually used the Holy Light to reclaim land!

This was even more shocking!

Such a large area was actually reclaimed with Holy Light!

This kind of Holy Light did not disappear with a single flash; it was a continuous Holy Light!

As a God, she was able to create the Holy Light. Her kingdom did not have a sun, but the kingdom was incomparably beautiful. All plants were full of life, and what she used was Holy Light.

It was not impossible to descend the Holy Light to the Continent of Gods.

The cost was similar to the drop in power.

But the problem was, with such a large area and for such a long time, they were actually using the Holy Light!

How could she not be surprised?

When she was shocked, she observed the source of the Holy Light.

That kind of white flame they were using was called "Holy Flame".

When this kind of flame was ignited, it emitted Holy Light!

She never heard of such a flame.

This kind of flame was actually the result of praying to the Lord of Flame!

"Lord of Flame must be a powerful God!"

This Elf Goddess thought so.

To cast so many Holy Flames at once, yet there was still a steady stream of Holy Flame. In the opinion of the Fairy Goddess, the Lord of Flame must be incomparably powerful!

She also found the reason for the decline in faith.

.....

Even though the Green Elves were praying, they did not say "I am your loyal believer" like the Night Elves.

However, the Green Elves prayed to the Lord of Flame every day and witnessed the magical methods of the Lord of Flame. In fact, their faith was already diverging...

Now, the Fairy Goddess knew why her faith power was much less!

The Lord of Flame separated it.

Even though she had contributed a lot of Faith's power to the Elves, she still had more.

But she was decreasing, and the Lord of Flame was increasing!

The increase was a little scary.

This time, this Elf Goddess was a little anxious.

The battle for faith was not a battle for faith.

The battle of faith was a war between the two kingdoms. It was a forced battle, and most of it happened in the Human Kingdoms.

In the Human Kingdoms, the commoners did not care which God they believed in, as long as they gave them enough benefits.

The King did not care, as long as he maintained his rule, he could also benefit from God.

Piety was based on strength. If God was not strong enough, no matter how devoted his believers were, they would no longer be pious.

Unless it was the Holy Maiden, the Holy Spirit, etc. that were bound to God.

.....

However, such a situation was not in the Elves' Empire.

If the Holy Spirits of any Elves tribe let their own Elves tribe wage war against other Elves tribes, this Elves tribe would probably not believe in that God.

The Elves were even stronger.

They were also freer and did not like disputes, especially with their kind!

Therefore, the beliefs of the Elves needed to be cultivated slowly.

When the Elves' Gods fought for faith, they used a subtle method. They didn't have too much conflict.

Like the Rocky Elven Empire, when it was established, there were more than twenty tribes that believed in about ten gods.

But now, many of the Elves were following the Goddess of Light. There were only three or four tribes that believed in other gods.

During this process, there was no conflict or war.

In fact, many Elves had dual beliefs.

For example, most elves believed in the Goddess of life.

She was a powerful Master Goddess, the creator of the Tree of Life.

.....

That was why the Elf Goddess did not think of the word "War" after she realized that her faith was diverted by the Lord of Flames.

She sent some power to help the Elves who believed in her.

However, she quickly realized that although the power she had sent down could make the Green Elf happy and increase her faith in her in a short period of time, the faith continued to diverge.

There was nothing she could do. Lord of Flame's Holy Flame was too big.

After trying for a week or so, the fairy goddess was about to cry.

Only three or four Elf tribes still believed in her.

She was about to lose one more.

"What to do."

The Elf Goddess was worried for several days.

“I don’t know if I’ll be able to contact the Lord of Flame. I only have a few tribes. It can take the big head, but it can’t leave me a little.”

This pitiful elf goddess thought.

## **Chapter 209: Military expansions! Open the Abyss!**

Time passed day by day.

The reclamation of the Dark Forest was still ongoing.

The Elven Goddess tried to contact the Lord of Flame through her followers, but the Lord of Flame didn’t respond.

Fortunately, the Greenland Elves still had faith in her. When the Lord of Flame got 55% of the faith from the Greenland Elves, her faith slowed down.

This made the Elven Goddess sigh in relief.

However, she was still trying to contact the Lord of Flame. She would often help the Elves and try to ease the fatigue!

“I only need 30%. No, I can’t be too greedy. I can accomplish two things.”

The Elven Goddess thought.

But from time to time, she felt that if she really couldn’t do it, he could do it.

Because the Lord of Flame did not respond, she felt that the Lord of Flame was exceptionally cold. Such a cold God was more powerful than she had guessed, strong enough to ignore her.

That was the reason she felt she could not be greedy

“Such a cold God, I wonder if he’s a male God or a Goddess.”

The Elven Goddess thought again.

.....

In the south, after a month, the Xi Ling Kingdom was still bustling with activity.

Those three decrees were too powerful.

As a result, a large area of land had been reclaimed in the entire Xi Ling Kingdom.

Before a civilian could reclaim land, they had to report to a nearby civilian. they had to get permission before they could reclaim the land.

The people sent by Queen Luo Ying roughly divided the land that could be reclaimed within the Xi Ling Kingdom, so there would not be excessive damage to the environment.

Within the Yan Nation, it was also being reclaimed.

Cattle, sheep, and horses had been raised on a large scale on the grassland where the werewolves used to live.

The number of horses was half that of cattle and sheep.

Cattle and sheep were naturally used for food, and they also produced a large number of dairy products. Magic played the most important role in keeping this place fresh!

Due to this, the Yan Nation's dairy products sold well in the Xi Ling Kingdom.

At the same time, teams of Lion warriors were sent to the Xi Ling Kingdom every day.

The number of Lion Warriors had reached 60,000.

The Fox Lady Qing Ling had brought a thousand dwarves from Miracle City of Gods.

The one thousand dwarves had to help the Royal Army and the Temple Army of the Xi Ling Kingdom rebuild their equipment.

It was not reinvented.

They were used to passing through the Lava Flame and to give that equipment a better magic defense.

After more than a month of reintegration, the Royal Army of the Xi Ling Kingdom basically became a devout believer in the Lord of Flame.

The Church's army was reorganized.

Among the original Temple Knights, they were willing to stay behind and were reorganized after their faith in the Lord of Flame reached the standard.

Those who didn't want to stay were not forced to do so. They could go to reclaim land or do business like the commoners.

After witnessing the changes in the Xi Ling Kingdom, the Knights realized that the Lord of Flame was not only stronger than their original God.

Some of Lord of Flame's ideas were probably much more advanced than their original God.

Everything their original gods had done was to gain faith.

Other than faith, the Lord of Flame was also helping the Xi Ling Kingdom develop better.

That was the reason 90% of the Temple Knights remained under the leadership of the Dwarf.

They didn't have to mention the Magisters.

After reorganization, the Temple Knights were still in the thousands.

The Temple Knights would keep five thousand men.

When their armor was forged and burned with special lava, they had a red flame symbol.

They were even better at magic defense.

Lin Yan also cracked the blessing of the Gods on their shields through his virtual godhood.

Then, Lin Yan added two blessings.

This meant that these thousands of Temple Knights could block two forbidden-level attacks or one legendary-level attack!

The Temple Knights could clearly sense the power of the Lord of Flame with that.

After Lin Yan's blessing, the Temple Knights believed in the Lord of Flame.

.....

When the nobles of the Xi Ling Kingdom received a large number of gold coins from the trade with the Hun River Principality, Queen Luo Ying used her trump card.

That was to deprive the nobles of their right to arm the army!

The nobles could still keep their own private armies.

The maximum number of Barons was 100.

The maximum number of Viscount Nobles was 500.

The maximum number of count-ranked nobles was 2,000.

The maximum number of Marquise-ranked nobles was 5000.

Apart from the private army, they no longer had the right to arm the redundant army!

This was to centralize power.

If this decree had been issued a month ago, it would have met a lot of resistance, but now, there were few nobles who opposed it.

Some of the small nobles even breathed a sigh of relief.

Having their own private army was good for small and medium-sized nobles.

Once the army would recruit during the war, they would get armor, weapons, and pay. Like the last time when they were recruited, every noble would pay a lot of money.

This would save them money.

Only some Nobles knew they were cutting off their conscription rights.

However, over the past month, these Nobles gained a lot of gold from their trade with the Hun River Principality, so they could cut it off. Lord of Flame was so strong that they were not qualified to oppose him.

Some Nobles even took the initiative to reduce the number of private armies and use the extra money to expand the merchant group.

.....

After the military power was fully concentrated, the Xi Ling Kingdom expanded its Royal Army.

In the past, the Royal Family couldn't raise too many soldiers, but now they could.

There was no shortage of food or gold coins.

The Royal Army was expanded to 400,000.

The local army had also increased considerably.

“The fighting strength of the Aristocratic Army isn’t strong, and there are many hidden dangers. Now, it’s better for these aristocrats to trade, so that business can flourish.”

In the Temple, Meng Ying analyzed.

Although Luo Ying was the Queen of the Xi Ling Kingdom, many of the decrees were created by the Holy Maiden.

Their goal was very simple, to make the Lord of Flame’s kingdom stronger and more prosperous.

That country was not large in territory, but its population was strong.

Its military strength was hard.

The strength of the economy was the foundation and inside information.

The more prosperous the kingdom was, the more faith in their Gods would receive under the same population. That was certain.

In the past, the God of the Xi Ling Kingdom had used this Kingdom too lightly.

Over 20 million people, if they were to make good use of it, that God had occupied for more than a hundred years, and wasn’t defeated by the God of Horton Kingdom.

“Luo Ying, let’s continue to expand the army. When my God’s enlightenment arrives, we will attack the Horton Kingdom.”

Meng Ying said.

Luo Ying nodded.

During this month, she spent a lot of time in the Xi Ling Kingdom, while Meng Ying was still moving towards a higher rank.

.....

As for their God, Lin Yan was in a Demonic Abyss.

“After analyzing this Abyss, we should be able to open a line.”

Lin Yan said to him.

During this period, Lin Yan was still locating the Abyss through the analysis of the Demonic Abyss.

After the Abyss crack closed, it was difficult to enter the Abyss because of the existence of the barrier, and another reason was that the Abyss could not be found.

Twenty years after the Abyss crack was closed, the Abyss was like a floating balloon, its relative position to the Continent of Gods seemed to be constantly changing.

After so much time had passed, the virtual Godhead roughly outlined the Abyss. It could be said that the barrier was no longer a problem.

What was left was to locate the Abyss.

Finally, on this day, Lin Yan revealed a look of joy.

“Found it.”

He used his Divine energy to drive the virtual godhead. With his contact with the Abyssal Succubus Natasha, he quickly opened a line.

Connected to the Abyss.

This line was not enough to support him, because it was too fragile. Once Lin Yan passed and this line broke, Lin Yan would fall to nowhere.

So, Lin Yan didn't take the risk. Instead, he followed a long-established plan.

He had to contact Succubus Natasha first!

### **Chapter 210: Abyssal Law! Natasha's methods!**

This was the Red Earth Abyss.

The Abyss was endless, and there were countless layers.

There was more than one Red Earth Abyss.

This was just one of the Red Earth Abyss.

Succubus Natasha was looking for something in the boundless Red Earth Abyss.

The Succubus race differed from the other Abyssal creatures.

They had a Human form.

They were different from humans. They also grasped the power from the Abyss.

In the eyes of the people of the Continent of Gods, it was an evil power.

From the human point of view, just like the demon creature in the Abyss, the demon was really evil!

This kind of evil didn't mean that they were subjective, but something that was shared by the creatures born in the Abyss and rooted in their bones.

For example, if a powerful Succubus arrived on the Continent of Gods, she wouldn't feel the slightest bit of guilt or reflection, even if she killed many people. This was because she didn't have such concepts in her subconscious.

What they believed in was the weak, the strong, and the heavy rain-eating small fish.

In the Abyss, the strong would take all, strength was everything!

.....

“Natasha, there are fewer resources in this layer of the Red Earth Abyss. Looks like we have to change places again.”

Another Abyssal Demon Path was next to Natasha.

The Red Earth Abyss was the last resource of the entire Abyss, and the Abyss Succubus was more special. They ate nothing like other Abyssal creatures.

Some of the bodies of the Abyssal creatures could not be taken down.

Their food was the fruits of plants or the flesh of some Abyssal creatures.

Their Human form had caused them trouble. The biggest problem was that they were too delicate and tender compared to other Abyssal creatures.

Abyssal creatures wouldn't have any interest in them. For many Abyssal creatures, they were delicious food.

They tasted as delicious as Humans!

To avoid trouble, many Succubuses chose to live in the Red Earth Abyss, which was not full of resources and had few powerful Abyssal creatures.

"It's difficult to find a suitable Abyss. There have been many Abyssal Creatures in the past hundred years. Our living space has been squeezed a lot. Let's go. Today, we only harvested. Let's go back."

Natasha said.

The two, Abyssal Succubus walked back with the fruits they had gathered.

After a long time, they returned to the place where the Succubus of the Abyss lived.

It was a stronghold in the forest. There was a large Succubus tribe!

They came to the entrance of the stronghold and handed over their fruits.

"Natasha, you've collected fewer fruits. If these kingdoms, you'll just have to wait to be expelled!"

At the entrance, an Abyssal Succubus, who was to collect fruits, spoke with no hesitation.

This Abyssal Succubus was an elder of this stronghold. It was powerful and had a fifth rank strength!

Natasha's face turned ugly. Just as she was about to say something, a look of joy appeared on her face.

Because Natasha's master, the powerful Abyssal Demon God had finally enlightened her!

.....

"Natasha, I'm talking to you, are you still laughing?"

The Succubus Elder had a displeased look on his face, showing signs of making a move.

Natasha didn't reply.

She was listening to her master's revelation.

"Master asked me to kill a sixth-ranked Abyss Lord, build an altar, drink a mouthful of its blood and pray!"

The master's revelation shocked Natasha.

Her face was filled with shock!

Because of her strength, how could she kill a sixth-ranked Abyss Lord?

Natasha only had fourth-ranked strength. Because of the natural disadvantage of the Abyss Succubus, she could only deal with fourth-ranked creatures.

There was no way to deal with the sixth-ranked Abyss Lord.

When she was thinking about what to do, she suddenly felt a force coming from afar.

This power instantly entered her body, giving her a seventh-ranked ability!

In other words, this power made her seventh-ranked!

Now, she had the power of a Lord!

The sixth rank was considered an Abyssal Lord.

However, the Abyssal Lord was actually a vast category.

The seventh and eighth ranks were all Abyssal Lords. Sometimes the ninth rank was considered Abyssal Lords.

The reason was simple. The Lord of the Abyss was actually the name of status, not strength.

This meant that these Abyssal Lords had the ability to monopolize a large area.

The sixth rank was the threshold. Generally, sixth-ranked Abyss Lords were all small lords. In the upper layer of the Abyss, they could divide up a layer of Abyss with the other Abyss Lords that could not enter.

The seventh rank had a certain status in the lower Abyss!

.....

Natasha didn't expect that her master had instilled power into her!

She was a little delighted!

Although she had the form of a Human, in reality, she was a standard Abyssal creature, from the inside out.

She wasn't different from the other Abyssal Succubus.

The difference was that her figure was even more explosive, and she was lucky. She met Lin Yan, not the other Demon Gods of the Abyss, who could explode with their aura.

One of the characteristics of Abyssal creatures was that the risk of instilling power directly would be greatly reduced.

If an Abyssal Demon God had a good eye on one of his subordinates, he would be able to grant instantly to this subordinate's powerful strength.

The problem still existed

The biggest problem was that in order to adapt to the power that was given to them, their form of life would change greatly. Their bodies would basically be made ugly by the power and they would become existences born purely for battle.

That was why Lin Yan only sent Natasha seventh-ranked energy. This energy was not ordinary Divine energy. It was the energy of Heaven.

It was a combination of Divine energy and energy points, combined with a large amount of Abyssal aura, and transformed into power suitable for the Abyss.

Once Natasha's power attribute was changed, she would be suppressed in the Abyss and become a super light bulb. It would attract too much attention from the Abyssal creatures.

"I'm at seventh rank!"

Natasha pinched her palms. She could clearly feel that she had become stronger.

"Natasha, you dared to ignore the elder's words, you are expelled."

The Succubus Elder was finally angry when he saw that Natasha was indifferent to him.

"Pop!"

Natasha suddenly attacked and knocked the Succubus Elder to the ground.

"Natasha, you... you hit me... I... I will kill you!"

The Succubus Elder was enraged. He got up from the ground and rushed towards Natasha.

Natasha's expression did not change at all. A terrifying aura appeared on her body!

"Lord!"

The face of the succubus elder changed drastically. He crawled to the ground as fast as she could.

"Natasha, spare me, I shouldn't have collided with you!"

Natasha harrumphed, and her aura filled the air. Before long, the Succubus in the entire camp was alarmed.

There were thousands of Succubus's living in this camp.

The Succubus sensed Natasha's aura and could not help but feel terrified.

"It's Natasha. She's actually a Lord."

"Why do I feel like she's even stronger than the lord?"

The Succubus looked at Natasha from afar and didn't dare to step forward.

At this moment, a Succubus with a shocking aura rushed out.

"Natasha, are you ready to challenge my authority?"

The Succubus shouted.

Natasha didn't hesitate at all. A wave of spiritual energy hit her.

When the two spiritual waves met in the air, the Succubus' face turned pale.

She took a few steps back and spat out a mouthful of blood. However, she didn't have time to wipe the blood off her mouth. Instead, she lowered her head as quickly as she could:

“Natasha, from today on, you are our tribe leader.”

Natasha flew into the air and coldly said:

“In two hours, I want to see an altar. Yvette, take me to the Abyssal Lord you saw last time.”

The Succubus tribe was busy. An altar was being built quickly.

Everyone, including the leader of the tribe and the Succubus Elder, quickly adapted to Natasha’s transformation from a little Succubus to a new leader.

No one objected, including Natasha. Everyone felt that it was a matter of course.

If it was a Human who had suddenly changed from the fourth rank to the seventh rank, this Human’s performance would most likely be the same as a grand prize-winning nouveau riche.

But Natasha would not.

With the power of the seventh rank, she was already doing what the seventh-ranked Abyss Lord should do.

This was the Abyss!

This was the law of the Abyss!
