

Flames 211

Chapter 211: Exclusive Abyss Passage! The fire on the Abyss!

“Chief, that’s the territory of the Abyss Lord, the one-armed sickle demon that I discovered last time.”

In the Red Earth Abyss, Yvette, who had gathered the fruits with Natasha, pointed at a highland. There were many rocks on the highlands. If someone looked carefully, one could see many cut marks on the rocks.

It was the work of the one-armed sickle Demon.

After becoming the Abyss Lord, she might have felt that she was different from ordinary Abyssal creatures. Therefore, she chose to polish its living environment.

“Wait for me here.”

Natasha flew to the highland.

Yvette looked at Natasha’s back with a respectful expression.

For the first half an hour, Natasha was still gathering fruits in the Red Pit with her. They were talking about things like their best friends, but after half an hour, their strength and status had changed dramatically.

If they were a real human friend, they wouldn’t know what jealousy was like.

But the respect on Yvette’s face was real.

Perhaps she had some feelings in her heart, but she would never reveal them.

The Abyss did not need too much emotion, nor did it need to be pretentious.

The more emotions there were, the more pretentious they were, and the faster they would die.

The life that did not understand this logic had long become the food of other Abyssal creatures!

In the Abyss, the one who could maintain the fear of the strong could live longer.

.....

Three minutes later, Natasha put a heart in a bag.

“Let’s go. Let’s go back.”

Natasha said indifferently.

“Yes, Chief.”

Yvette followed her respectfully.

When Natasha returned to the stronghold where the succubus lived, the altar had already been constructed.

This altar did not take two hours.

She hadn’t used it for an hour.

Under the efforts of a thousand Succubuses, the altar took only half an hour to build.

Natasha went straight to the altar and took out the beating heart from the bag. She wounded the heart with a sharp bone knife, and then she took a mouthful of blood from the heart and threw it to Yvette.

The Lord's heart was good food. The energy contained within was incomparably rich, so it naturally wouldn't be wasted!

Natasha stood on the altar and prayed.

To a certain extent, the function of the altar was equivalent to a signal amplifier.

It could make Natasha's prayers spread far and far, and her "penetrating power" was even stronger.

As for the blood in the Abyss Lord's heart, it contained an intense aura of the Abyss, which could make her senses more accurate.

As Natasha prayed, the invisible line between Lin Yan and her became clearer and stronger!

This line was not just the line of faith; it was also the line of the contract.

If the power of the contract was used well, it would be terrifying.

Back when the God of Darkness was dealing with the Night Elves, he had cleverly used the power of the contract.

She only needed to use a small amount of power to make the Night Elves' fifty thousand people be entangled by the curse and to sever all hope of the Night Elves. If it wasn't for Lin Yan, the Night Elves would have been underground for countless years!

As soon as the line became clear, Lin Yan once again activated his virtual godhood and quickly found the path through which the line passed.

This was the key.

Lin Yan wasn't prepared to come once, or he might not be able to return once he came.

He planned to enter and exit the Abyss freely.

The virtual godhood quickly circulated, and an enormous amount of Divine energy was consumed. Because it was consumed too quickly, Lin Yan had no choice but to use his faith energy to exchange for Divine energy!

The speed at which his Divine energy was consumed was within Lin Yan's expectations. When the Abyssal crack was closed, even the Abyssal Demon God couldn't come out or send his power-up. However, he wanted to find a path to enter and leave freely. If his Divine energy was consumed too little, Lin Yan wouldn't be at ease.

Lin Yan was already certain that the virtual godhood was indeed more powerful than real godhood.

The real godhood paid more attention to the growth rate and attack of a God.

The virtual godhood, on the other hand, focused on the ability of analysis. To put it simply, it was the ability to calculate.

Through it, Lin Yan could accomplish many things.

.....

“Alright!”

This time, because of the sufficient preparation of the preliminary work, just a dozen minutes later, Lin Yan had completed the fixed work of the passageway.

He had created a small hole in the barrier between the Abyss and the Continent of the Gods, that would allow him to enter and exit.

This was Lin Yan’s exclusive Abyss passageway.

This was because normally, Lin Yan would seal this small hole and would not let the other Abyssal and other Gods of the continent detect him.

The key to Lin Yan’s access was Natasha. Lin Yan needed the line between him and Natasha.

Lin Yan retracted his flame and entered the tunnel that opened up through that line. He passed through the barrier between the Continent of the Gods and the Abyss and entered the Abyss.

.....

Natasha was still praying on the altar.

According to her God’s revelation, as long as she didn’t receive a reply from her God, she would pray for at least three days.

Natasha did not know why her God had such enlightenment, nor did she know what her God was going to do.

However, she would not ask, or even think, or be curious.

She would do as her God said.

That was why she had been praying.

She finally sensed a change as she prayed.

“Boom!”

An intense flame started burning in the sky above her.

As soon as the flame appeared, the entire Succubus in the stockade jumped in fright.

This was because the flame contained an aura that made them feel terrified.

Natasha knew it was her God who had descended. She quickly knelt respectfully.

In the entire Succubus tribe, all the succubus knelt as well.

Following that, they saw the flames rushing into the sky. Then, they spread out and filled the bottom of the Abyss.

Then, the flame seemed to have found a path and disappeared into the horizon!

“My God is gone!”

After waiting for some time, Natasha stood up.

She looked into the sky, but she could no longer see the shadow of flames.

The other Succubus continued to stand up.

Natasha looked at all the succubus and said, "This layer of Red Earth?Abyss is no longer enough to feed us. I know that there is a layer of Dark Abyss with rich resources. There are a lot of scavengers there. If we kill them all, we can occupy that layer of the Dark Abyss."

.....

In the upper layer of the Red Earth?Abyss, the flames had started burning.

It had been a long time since the Abyssal Rift closed, the Abyssal Demonic God would not pay much attention to the upper level of the Abyss. Therefore, Lin Yan did not hold back at all.

His strategy was different in different depths.

This layer of Demon Bug Abyss, Lin Yan had directly set it on fire.

In many of the Abysses, if the flames consumed too much energy, then it would just focus on the Abysses Lord.

Chapter 212: Dark Faiths! Chaos God Power!

The Elves' reclamation was still ongoing on the Continent of God.

The expansion of the army in the Xi Ling Kingdom was going well.

The plan of Lin Yan and the other Holy Maidens?was also going very well.

The Hun River Principality didn't know that they had jumped into the vast pit?that Lin Yan and the other Holy Maidens?had dug for them. It was a nationwide tide of sorghum planting.

In the Hun River Principality, the area of ??sorghum cultivation had reached over 70%.

The gold coin?was more powerful than he had imagined

The entire Hun River Principality might have?discovered the intentions of the Xi Ling Kingdom, but those people were not the ones in power.

The five churches in the Hun River Principality were also vigorously promoting sorghum cultivation.

It was not because they needed gold coins.

There were?five Church's?Gods who discovered that their power of belief had increased by a lot!

The more prosperous a country was, the more faith power there was.

That was why the five Gods had issued their orders to expand the cultivation of the sorghum?and allowed the nobles to earn more gold coins.

Gold coins could bring faith.

However, they would never have thought that this kind of belief was short-lived.

Under the guidance of the Church, the Hun River Principality began to fall deeper into the pit.

.....

The Xi Ling Kingdom had to fight the Horton Kingdom.

In the Dark Forest, there was no sign of dark matter attacking the Elves.

However, in the Abyss, Natasha had already led a thousand Succubuses to the tunnel and reached the Dark Abyss she mentioned.

The Abyssal Passage was not connected to the upper or lower layer. Some hidden passages could pass through many layers of Abyss, but they needed to be carefully searched.

Under Natasha's leadership, that layer of the Abyss filled with scavengers had ignited a battle.

A thousand Succubus were twisted into one, smashed the scavengers one by one, and with Natasha's seventh rank strength, the war went on smoothly.

They soon knocked down a tenth of that Abyss.

In the upper Abyss, Lin Yan, who was still driving the flame to burn the Demon Bug Abyss, found something a little different.

There was something different in his virtual godhood.

God Name: Lord of Flame

Shrine: 15

Holy Maiden: 8

Power of Belief: 75KW

Dark Faith: 1258

Divine Energy: 18

Advanced Divine Energy: 10

Chaos Energy: 0

Skills: [Blessing, Analysis]

There were two more columns in the virtual Godhood.

Dark faith, Chaotic Divine energy.

The number of dark faiths was increasing.

"Is this the power of faith from Natasha?"

Lin Yan exclaimed.

He looked up the virtual Godhood's record and then looked at Natasha.

Lin Yan felt that he had figured out what the Dark Faith and Chaos God were.

Natasha's belief was a Dark belief, but there were very few of them.

How could an Abyssal creature without a soul contribute too much faith?

The Abyssal Demon God did not rely on the power of faith to eat.

But what did the Abyssal Demon God need?

Chaos!

War!

Therefore, the entire Abyss was filled with endless war and Chaos.

The upper level of the Abyss was already chaotic enough, but the upper rank of the Abyss might be because it was too weak, there were few Abyssal creatures, so the Abyssal Demons did not even look at it.

However, the lower layer of the abyss was filled with war.

In the Kingdom of the Abyssal Demon God, there was also endless war. Chaos was everywhere.

Countless Abyssal creatures were fighting.

The Abyss was simply too big. It was not as fast as it was born. Even though the creatures of the Abyss were constantly fighting, the total number of creatures in the Abyss was still flourishing.

This was especially true for the Demon Bug Abyss. Even after Lin Yan burned it once, after a year, it was filled with Demon Bugs again.

Like many Abyssal creatures, they would be transformed from Demonic Bugs.

It could be said that Demon Bug Abyss had given birth to over thirty percent of the Abyssal creatures.

“Does this mean that the Dark Faith was obtained through chaos and war? “As for the Chaotic Divine energy, is it the Divine energy of the Abyssal Fiends?”

Lin Yan couldn't help but think.

He felt that his guess was correct.

Chaotic Divine energy was one of the virtual godhoods. It was named to differentiate the gods of the Heavenly World.

The Divine energy possessed by the Abyssal Fiends was different from the Divine energy of the Heavenly World.

Thinking about it, he knew that if his Divine energy was the same, how could he have formed a confrontation?

The Gods of the Heavenly Realm had their differences in Divine energy. In terms of the nature of their Divine energy, it was different from the Divine energy of the Abyssal Fiend Gods.

One was the Faith energy.

One was based on the Dark Faith.

And Dark Faith meant chaos and war!

“No wonder the Abyssal Demons can't forget about the Continent of the Gods. If they can stir up chaos on the Continent of Gods, then the Abyssal Demons will benefit a lot, right?”

Lin Yan thought.

The chaos that the Abyssal Fiends wanted was completely different from the battle of faith that the gods of the Heavenly Realm were fighting over.

The battle of faith was a battle between the church and the Royal Family.

This kind of war was an orderly war!

The chaos that the Abyssal Demon God wanted was the chaos of countless lives on the entire continent.

Civilians attacked each other and nobles attacked each other.

Everyone was going crazy. Other than themselves, they were all enemies. They were just like the Abyss, with no rules. The only rule was chaos!

After understanding the source of the Dark Faith, Lin Yan discovered that the exchange rate between the Dark Faith and the Chaos God Power was higher.

It had reached a ratio of 200,000 to one.

“I wonder what the effects of Chaos Gods’ power are.”

Lin Yan couldn’t help but think.

He didn’t expect that the virtual godhood could produce darkness, faith, and Chaotic Divine energy.

Didn’t this mean that he was likely the only one who possessed Divine energy from the heavenly realm and the Abyss!

“I wonder if these two Divine energies can be mixed and added with other ingredients to form a new, more advanced Divine energy?”

Lin Yan couldn’t help but think again.

However, he only had over a thousand points of faith in the darkness, so he was unable to exchange it for Chaotic Divine energy.

After thinking about it for a while, Lin Yan gave Natasha another enlightenment to expand the war.

In any case, the Abyss was in a state of chaos. There were wars everywhere, so let this flame be even bigger. It was just for gathering the Dark Faith!

Therefore, Lin Yan didn’t hold back after enlightening Natasha. He raised Natasha to eighth rank with his changed Divine energy!

After that, Lin Yan asked Natasha to choose a few right-hand aides and instilled energy in them.

The Abyss Creature had improved quickly.

If it was Meng Ying and the others, Lin Yan would not dare to do that.

However, it hadn’t been long since the last upgrade. As expected, this upgrade caused Natasha’s body to become abnormal.

Natasha’s body was propped up for some changes.

Fortunately, this change was positive.

Natasha's rank had changed from seventh to eighth.

"The strength of the eighth rank should be enough. I'll increase it after a period. Otherwise, I won't be able to make any other terrible changes."

Lin Yan looked away from Natasha and said to her.

Next, he would continue to burn the Demonic Bug Abyss in the upper rank of the Abyss, getting energy points and evolution points to rank up.

After Natasha's strength improved, she decided to gather more Succubuses in the lower Abyss to expand the scale of the war!

Chapter 213: Burn everything! Rapid evolution!

The raging flames continued to burn in the Demon Bug Abyss.

This time, it took even less time.

Lin Yan completely burned this layer of Demon Bug Abyss in only five days.

After burning this layer of Demon Bug Abyss, the evolution points Lin Yan needed to upgrade to the first rank were quite large, Lin Yan managed to gather enough evolution points to upgrade to the first rank.

Then, Lin Yan used his Evolution Point to raise his rank.

"He's almost reached the sixth rank."

Lin Yan said to him.

Lin Yan had obtained an enormous amount of profit, rising to the Eternal God Flame last time when he was in Abyss.

During this period, Lin Yan's main benefit was the benefits of several wars.

In the battle with the Xi Ling Kingdom, Lin Yan completely burned the Divine Punishment of the Xi Ling Kingdom, getting an evolution point that was equivalent to a thousand drops of Divine energy.

Lin Yan had risen to the third rank!

The profits from burning the souls of the few Holy Spirits were equally abundant.

Thus, even though Lin Yan hadn't made much progress in the past period, his evolution wasn't slow at all.

Now that Lin Yan had entered the Abyss, he could enter a rapid evolution.

Thus, Lin Yan did not hold back. After burning the Demon Bug Abyss, he entered the upper layer.

Lin Yan was prepared to burn up the upper Abyss first.

.....

When Lin Yan left the Demon Bug Abyss, everything in the Demon Bug Abyss was completely burned.

Abyssal creatures and Abyssal plants were no longer there.

The flames had already disappeared, and the air was still burning.

However, it wouldn't be long before the Abyss' aura would once again spread over, taking over this place.

Then, new Abyssal plants would grow out of the ground quickly.

The Demon Bug egg in the Abyss would once again break through it.

In less than a year, this Demon Bug Abyss would return to its original state before it was ignited by Lin Yan.

There might not be so many powerful Demonic Bugs inside at once.

The wildfire couldn't be burned, as the flame blew.

This was the Abyss.

It was impossible to kill.

Unless Lin Yan would burn all the ground of that Abyss into magma and would burn all the Demon Bug eggs inside.

However, that was useless.

This place would become a new Lava Abyss, where many Lava Giants would be born.

The Lava Giants in the Abyss could be more powerful than the Lava Giants in the underground volcanoes of the Continent of Gods.

Lin Yan could use his Divine energy to destroy the entire Abyss. That was the correct way to destroy the roots.

Or he could burn through the entire Abyss with no energy points.

However, that was why Lin Yan was acting this way.

The Abyss was endless, and it was continuously destroyed and born. Lin Yan was like a wave of Divine energy to destroy a layer of Abyss that had nothing to do with him. That was the manifestation of his intelligence.

He could only take his profits.

.....

The upper layer of the Demon Bug Abyss was a Dark Abyss. This Dark Abyss was dominated by the Fallen Demon. The Fallen Devil and the Demons were also good at Elves' attacks.

They could allow other creatures to sink easily, and then be devoured by them.

In the Abyss, a Fallen Demon was hunting.

Its prey was a Demon Bug that was transforming.

Demonic Bugs weren't just present in the Demonic Bug Abyss, they were everywhere in the other Abyss.

Most of the Abyssal Creatures were transformed from Demon Bugs.

The transformed Demon Bug had no battle prowess at all. After being discovered by the Fallen Demon, it could only obediently enter its stomach.

It was precisely after the Demon Bug that the Fallen Demon, General?had successfully devoured that a flame shot up from the ground and instantly turned the Fallen Demon into ashes.

“This layer of Abyss isn't bad.”

Lin Yan said to himself.

He stirred up the flames.

The flames covered a radius of 10 Kilometers.

Within this area, all Abyssal Creatures could not escape a calamity.

As long as the energy points burning in the Abyss were balanced, Lin Yan would choose to burn this layer of Abyss.

This could maximize the benefits.

Looking around for the Abyss Lord still needed time.

It was better to burn the entire Abyss like this.

They were all chaotic creatures. Once they burned, they would die!

At this moment, if Lin Yan did not consider the energy points, he could instantly fill a large area of ??his flame.

However, Lin Yan was planning to fight for a long time. Although he had many energy points, he would never waste them.

Therefore, reaching an area of ??10 Kilometers was enough.

After that, he could quickly burn the Abyss.

The Abyssal creatures and plants inside could not escape the flames.

.....

Lin Yan left this layer of a Dark Abyss after five days, that he had completely burned. He continued to advance up the Abyss.

The upper rank of the Abyss was small, the advantage was that the Demonic God of the Abyss did not notice it.

Lin Yan was not prepared to waste his energy points to fight the Abyssal Fiend Gods.

Right now, it was better for the Abyssal Fiend God to develop like this.

“If I rise to another heavenly?realm, I should be able to reach the God realm.”

Lin Yan said to himself.

After burning up this Dark Abyss, Lin Yan successfully rose to the sixth rank Immortal Divine Flame.

Lin Yan looked at his panel:

“Host: Lin Yan”

Flame Core Rank: Sixth rank Immortal Divine Flame

Number of layers of flame: 38

Maximum temperature: 10.2 W

Evolution point: 12W

Energy Points: 1,241MW

Current Revenue: 12.8W points/sec (floating)

Current consumption: 9.6W points/sec (floating)

Skills: Berserk Burning, Eye of Detection, Continuous Burning, Healing...

Heavenly Flames: Lava Flame, Cold Flames, White Flames, Explosive Flames, Ice Flames, Bone Cold Flames, Abyssal Demonic Flames, Black Flame, Annihilation Flames, Holy Flames

Resistance: 100% water resistance, 100% ice resistance, 100% lightning resistance

Title: Flame of Civilization

Item: Virtual Godhead

[Other: None]

After rising to the Eternal God Flame, Lin Yan’s pure temperature had increased rapidly.

Lin Yan roughly understood the reason.

Before the Eternal God Flame, the normal temperature was only a few thousand degrees. Every time it rose by one level, the normal temperature would only increase by a few hundred degrees. If Lin Yan wanted to increase the temperature, he could only activate a violent burning or burn his Divine energy.

The reason for this was very simple. The upgrade of the Immortal Divine Flame was more focused on upgrading the soul.

This was not reflected in the system’s interface.

But Lin Yan’s soul was already extremely strong!

“This is because, like a flame, it’s very difficult to kill with normal methods, so why do I want to prevent others from killing from the soul rank?”

Lin Yan said to himself.

Lin Yan’s flame was different from other flames.

Even special flames didn’t have any intelligence.

Not to mention the soul.

But Lin Yan did.

Like a flame, conventional means did not affect him.

Even when Lin Yan was weak, as long as Lin Yan had enough energy points, how would others kill him?

Watered out?

Use earth to cover it up?

However, Lin Yan could also burn in the water. He could also burn in a place where there was no air. As long as he had energy points, no one could destroy him.

After rising to the rank of indestructible, Lin Yan was practically indestructible.

Even if the energy points were zero, it could still burn. However, the temperature of the burning wasn't high, and the range wasn't large.

However, Lin Yan was aflame with a soul.

The soul was a weak point, so the upgrade of the Immortal Divine Flame had greatly improved the soul.

However, it was not displayed on the system interface.

It was precise, because of this that the increase in temperature was not obvious.

Ordinary people could never attack Lin Yan's soul.

Lin Yan's flames could even burn his Spirit and soul!

.....

After burning up the Dark Abyss, Lin Yan did not stop and continued to burn up the Dark Abyss.

Let this endless Abyss complete its rapid evolution!

Chapter 214: Submit or die!

When Lin Yan was burning, Natasha had gathered more Succubus's, expanding the scale of the war.

The Endless Abyss was like a pyramid.

The deeper they went, the larger the Abyss was. The aura of the Abyss grew stronger, and there were more Abyssal creatures inside.

In the upper rank of the Abyss, an ordinary person who entered the Abyss would become a Corpse Demon or a soulless place.

Normally, one would only be able to resist the aura of the Abyss after they had first-rank power.

In the lower level of the Abyss, there was third or fourth rank, it was difficult to guarantee that they would not be corroded by the Aura of the Abyss.

Natasha had left the Dark Abyss a long time ago.

With the power of the eighth rank and the power of her God, Natasha's target was no longer the little Dark Abyss.

Her goal was to fight at the bottom of the Abyss.

Few Abysses had a name.

The Dark Abyss, the Red Abyss, the Lava Abyss, and there were countless types of Abyss like these.

However, the Abyss with a name was specifically referred to as an Abyss. This kind of Abyss was huge, and there were countless Abyssal creatures inside!

"We don't have enough power. Everyone, go out to find the path to the Red Earth Abyss. We need to gather more Succubuses'."

Natasha flew in the air and gave orders to the thousands of Succubus below.

The Succubus began to move, looking for a path to the Red Earth Abyss.

Abyssal creatures were more familiar with the rules of the Abyss. They were extremely familiar with these things.

Natasha was very efficient.

In the layers of Red Earth Abyss, Succubus army of over ten thousand Succubus gathered around her.

At the same time, Natasha kept sending Succubus to start a massive war in the Abyss.

However, for Natasha, these wars were too small.

She wanted to start a bigger war to please her God.

The Demonic Abyss was her first target.

.....

While Lin Yan was burning the third abyss, over 30,000 Succubus had gathered around Natasha.

The army of Succubus controlled many Demon hunters.

The powerful Succubus tribe would control many servants. These servants were mostly Demon-hunting ants. This was a kind of Demon-hunting ant with strong fighting strength.

Natasha's war was getting bigger and bigger.

In Lin Yan's virtual godhood, the dark faith continued to gather.

Soon, Lin Yan had 200,000 dark beliefs, and he exchanged them for some chaotic Divine energy.

Then, Lin Yan studied this chaotic Divine energy.

The chaotic Divine energy, which was the Divine energy of the Abyssal Demon God, contained the typical features of the Abyss.

Compared to the Divine energy of Heaven, it had more evil powers and violated the taboo.

It was just like how a sacrifice could quickly gain evil power through it.

The destructive power of Chaotic Divine energy was stronger, especially to destroy the rules.

Of course, it was more than that. Lin Yan was still using his virtual godhood to analyze it.

Unlike what Lin Yan had imagined, the fusion between the Chaotic Divine energy and the Heavenly Divine energy was not very good.

These two types of Divine energies were conflicting.

There was a conflict between Divine energies.

The conflict between the Chaotic Divine energy and the Divine energy of the Heaven Realm was exceptionally big. These were two completely opposing forces from the inside out.

However, Lin Yan did not give up.

Studying the constitution of Divine energy was a pleasure. There was no need for Lin Yan to do anything. He could just drive the virtual godhood.

The outer layer of his flame had many special flames. Every special flame was a manifestation of Rule Force.

So, Lin Yan used the special flame on his outer layer to try to mix the two Divine energies again.

Lin Yan had a feeling that if he could effectively use the Chaotic Divine energy and the Heavenly Divine energy to form new Divine energy, this new Divine energy would most likely be quite advanced.

.....

A few more days later, Natasha found a layer of Red Earth Abyss full of Succubus.

Over 100,000 Succubus had occupied this layer of Red Earth Abyss.

The Succubus controlled many Demon hunters when they turned this layer of Red Earth Abyss into their world.

Although there were more than a million Abyssal Creatures in this layer of Red Earth Abyss, these Abyssal Creatures did not gather in groups. In this layer of Abyss, Succubus was the absolute master.

“100,000 Succubus, If we can get them, we can ignite even more war.”

After Natasha mentioned the report, she led the mighty Succubus army to attack the Red Earth Abyss.

“A Succubus Lord is dreaming. He wants to march towards the Abyss of Mobs, but he wants to integrate us. He’s overestimating himself.”

In the Red Earth Abyss, the Succubus tribe had also received the news. They had all gathered together to stand guard outside a castle.

.....

“Chief, this is the Abyss.”

In a passageway, Natasha and Yvette walked out.

Then, large numbers of Abyssal Succubus emerged from the tunnel and appeared in the deep Red Earth Abyss. Natasha sent many spies and soon got feedback from the spies.

The other party was already waiting for them.

“Chief, it seems that the other side won’t easily submit.”

Yvette said.

“Natasha’s expression changed little. She said indifferently, “Let’s go, let’s go.”

Natasha brought nearly 40,000 Abyss Succubus and many Demon hunters to the Succubus Castle.

A few hours later, the two Succubus armies looked at each other from afar.

On the other hand, there were over 100,000 Succubuses.

In the Abyss, it could be said that all of them were soldiers. These 100,000 Succubuses had extraordinary combat strength.

They controlled tens of thousands of Demon hunters.

On Natasha’s side, there were less than 40,000 succubuses, and there were only 10,000 Demon hunters.

The two sides’ strengths were quite different.

“You’re the Lord of the Abyss who’s planning to attack the Abyss?”

Outside the Succubus Castle, a powerful succubus wearing only a few clothes looked at Natasha and said.

“Natasha nodded and said, “That’s right, the Abyss is the birthplace of the Succubus. I’m going to start a war there, take back the Abyss, and turn that place into a Succubus.”

“Take back Mobs?”

The powerful Succubus seemed to have heard something especially funny and could not help but laugh:

“There are more than a dozen powerful demons in there. They are all evil. If you offer yourself to them, they might even praise your delicacy. Tell me, how are you going to take back Mobis?”

Natasha didn’t care about the strong Succubus’ ridicule. She said seriously:

“We are Demons too!”

The Succubus rolled its eyes. “Yeah, we’re demons, but we’re the weakest demons. You’ve brought a hundred thousand of your kind into the Demonic Bees, and you have no choice but to become their food or playthings. You know how many they are.”

Natasha said, “Yes, but I’ll gather more Succubus.”

The powerful Demon said, "More? How many? 100,000? There were hundreds of millions of Demons in the Abyss of Mobis, haha!"

She waved her hand. "Since you remind me of my hometown, you can go. I can pretend you haven't come."

Natasha stopped talking.

The aura on her body began to lift.

The strong Succubus raised its eyebrows, and its aura rose.

Behind her, 100,000 Succubus were ready to move.

Behind?Natasha, nearly 40,000 Succubus were ready to fight.

Natasha suddenly flew into the sky and pressed her hands together. Green?energy poured out from her hand and rushed towards the powerful Succubus.

The face of the Succubus changed. She raised her?hands to block, but it was useless.

"Boom!"

The powerful Succubus smashed into the ground.

Natasha flew up to her, her slender body was standing out of thin air. There was a green flame on her right hand.

"Then let's change it."

Natasha's cold voice sounded:

"Submit, or die!"

Chapter 215: Snowballs are?getting bigger and bigger! Natasha?was as firm as a rock!

"Submit, or die!"

Hearing Natasha's words, the demon's head finally lowered.

"I am willing to submit!"

This powerful Succubus Demon said.

Natasha threw the Green Flame from?her hand into the sky. The Green Flame exploded instantly, and an enormous amount of Evil Power fell.

Some Succubuses were?caught up in the Green flame. Just as they were feeling a little terrified, they suddenly realized that the Green Flame would not harm them at all.

Rather, it would increase their strength!

Suddenly, these Succubus Demons revealed looks of joy!

Natasha's voice sounded above the castle:

“I have become the great Abyss Demon God and the servant of the Lord of Flame. The Lord of fire will give us strength to help us recapture Mobs. I’ll give all of you three hours to pack up. In three hours, we will go to the next Abyss!”

Many, Abyssal Succubus looked shocked.

It was not shameful for the Abyssal Creatures to become a servant of Abyssal Demons.

Countless Abyssal Creatures were crying to become servants of the Abyssal Demonic God, yet they could not even touch the Abyssal Demonic God.

It was the same for those demons who were proud of their nobility in the lower Abyss.

Therefore, the Abyssal Succubuses were all confident when they heard Natasha.

The 100,000 Abyss Succubus packed their things.

The leader of the 100,000 succubuses was the powerful succubus who stood beside Natasha respectfully. She adapted to the new character quickly.

“The Succubus here is still under your command. What is your name?”

Natasha asked calmly.

“Chief, my name is Chris.”

The powerful Succubus said.

Natasha said, “Very well, Chris, do a good job. God will reward you.”

Chris lowered her head. “Yes!”

.....

The 100,000 Succubuses departed once again.

They were carrying over 50,000 Demon hunters.

“There are countless demons in the Demonic Bug Abyss, and every single demon clan has more servants. Chris, you’ll be in charge of going to the Demonic Bug Abyss and controlling more Demon Hunting Ants. Yvette continues searching for the Red Earth Abyss. We need more of our kind.”

Natasha said.

The Abyss Succubus split into several groups.

Chris led over ten thousand people to search for the path to the Demon Bug Abyss and the Demon Hunter Ants.

Every time she found enough Demon hunting ants, she would send the Abyss Succubus and these Demon Hunting Ants to catch up to the dominant group.

As for Yvette, she continued to search for the Red Earth Abyss.

Natasha also sent a few Troops to fight in the Abyss.

Countless Abyssal creatures were killed, and many Abyssal Lords were turned into corpses. The flames summoned by Natasha then burned them.

It was a new type of special flame that Lin Yan got after obtaining the Chaotic Divine energy.

The Evil Flame.

The Evil Flames were typical Abyssal Flames. If Lin Yan allowed the Evil Flames to appear in the Continent of the Gods, the humans who were burned by the Evil Flames would instantly fall into chaos.

However, it was quite useful in the Abyss.

The Evil Flames turned into flames. The flames were Green, like Demonic Flames.

This way, Lin Yan could deceive the Abyss, causing him to burn less in the Abyss.

In addition, with many energy points in it, the Evil Flames could grant the Abyssal Creature's Evil energy, just as Natasha did earlier.

Quickly, Lin Yan realized that in Natasha's war, he could not reap the benefits of the Dark Faith.

There were many energy points and evolution points!

The Abyss Creature that the Succubus had killed had its energy points and evolution points after the corpse was burned.

The people were strong, and this was a magnificent display.

Moreover, Lin Yan could harvest the evolution points even more secretly.

Therefore, Lin Yan increased his power to the Abyssal Succubus near Natasha.

Natasha must be at the top of the pyramid.

The next time there would not be the time to increase her strength safely, but now she had the power of the eighth rank. She could still get power from Lin Yan's prayers at any time to gather Abyss Succubuses.

By the time she gathered enough Succubuses from the Abyss, Lin Yan would be able to increase her strength once again.

.....

The further down they went, the more Abyssal Succubuses could be encountered.

The overall strength of the Abyssal Succubus tribe was growing stronger.

In comparison, Natasha was a tiny succubus.

A thousand succubus.

But that didn't matter. She had enough strength to eat an Elephant!

"I admit that you've gathered many Succubuses, but you want to enter the Abyss just because of this?"

In another Red Earth Abyss, a leader of tens of thousands of Succubus looked at Natasha, his face was full of suspicion.

However, as soon as she finished speaking, Natasha knocked her to the ground.

“Submit, or die!”

Natasha said.

“I submit!”

The Succubus leader quickly expressed his submission.

With Chris’ example, Natasha stopped trying to talk nonsense with the other succubuses.

Just follow the rules of the Abyss.

Just like now.

The Abyssal Law was simple and straightforward.

Any unnecessary actions would be a waste of time, and the effect was not good!

.....

Fighting in the Abyss was the most unwise thing to do.

Especially for the cunning Abyssal Succubus.

There were more and more succubuses around Natasha.

It rolled bigger and bigger like a snowball.

Natasha had fifth-ranked seven right-hand men beside her.

Natasha sent out the five right-hand men. They could gather some of the small Succubus tribes.

Natasha was only in charge of the big Succubus tribe. In addition, she was in charge of the war in the Abyss along the way.

The current war was just training for these Abyssal Succubuses.

After every war, these Abyssal Succubuses could receive the power given by the Great Lord of Flame.

Their strength was growing, and the scale of the war was growing.

But now, these were all appetizers!

.....

“Submit, or die!”

In another red pit, Natasha’s right-hand man, Yvette, said coldly.

In front of her, the Abyssal Succubus, who only had thousands of people, quickly submitted.

Yes, under Natasha’s influence, several of her right-hand men had a straightforward style. When they gathered the Succubuses of the Abyss, they stopped talking nonsense. As soon as they went up, they directly subdued them with powerful strength.

They handled thousands of Succubus tribes, and their seventh rank strength was enough.

Even if they met someone stronger than them, they could still pray for power from the Lord of Flame.

With the help of these right-hand men, Natasha gathered the Succubus of the Abyss even faster.

In her body, the number of Succubuses in the Abyss quickly exceeded 500,000 and the number of succubuses and Demon Hunters were?even greater.

The Succubus army swept through the upper Abyss, and the lower Abyss was determined to advance.

To Natasha, 500,000 Succubus was not enough.

They placed 500,000 Succubus in the Abyss of Demonic Bugs, and not even a single wave could make it. A powerful Demon Lord had more than that.

It should be known that Demons were the same as human "Royal" beings in the Abyss.

In a situation of the same level, a demon could kill other Abyssal Creatures of the same level, even beyond that level.

Although the Demon was so outstanding, unfortunately, the Succubuses were?the weakest Demon.

However, to Natasha, with the power given by her God, her determination to conquer the Abyss was as firm as a rock.

Chapter 216: Dark Creatures appeared, Skeleton Monsters attacked!

Lin Yan ignited a flame in the Abyss. When Natasha fought in the Abyss, the reclamation continued in the Dark Forest.

In the blink of an eye, the Elves had been in the Dark Forest for more than a month.

Until now, the Holy Flame Forest had been reclaimed.

It was reclaimed to the?depth of 1,000 kilometers.

The north and south were over a thousand kilometers wide.

Chen Xi had already reclaimed two-thirds of the area she had originally envisioned.

However, after discussing with Lomina, Chen Xi decided to expand the reclamation area.

The Elves would not feel that the forest they lived in was too large.

The larger?the forest, the more energy the Tree of Life in the forest would receive, and the faster it could be able to breed new Elves.

On the Continent of Gods, many Elves were living in small forests. Many Elves tribes were living there.?When?they had reclaimed the Holy Flame Forest, more Elves could be there.

"Holy Flame Forest will be bigger than Rocky Forest!"

In the sky, Chen Xi looked at the Dark Forest below and whispered.

Under Lin Yan's care, Chen Xi successfully became an eighth-ranked Elf. She did not take part in the reclamation but flew in the air to ensure the Elves' safety.

In front of the Elves' reclamation line, there was Chen Xi, Lomina, and another seventh-ranked Elf.

As the cultivation progressed, the number of Dark Creatures increased and became more concentrated.

This was normal.

Dark Creatures on the edge of the Dark Forest were rushing.

These Dark Creatures gathered into a pile.

However, because of the existence of the Holy Light, these Dark Creatures did not dare to step forward.

However, it was undeniable that in the darkness, many Dark Creatures were spying on the Elves that were reclaiming land, and they were ready to move!

When the Elves were reclaiming land, they could also hear all sorts of low roars, as well as especially strange sounds.

These sounds were exceptionally strange. If a human heard it, he would probably feel a chill run down his spine.

The use of sound as a means of influencing emotions had excellent results many times.

Unfortunately, they encountered powerful Elves.

When the Elves heard these voices, they had to be more careful and not fall for them.

.....

After watching for a while, Chen Xi continued to fly a distance.

Down below, the Dark Forest was exceptionally dark. The sun could not shine through.

Chen Xi thought for a moment and prayed. A larger flame appeared in her hand and she threw it down.

After the Holy Flame landed in the Dark Forest, it exploded and illuminated the entire Dark Forest.

Many Dark Creatures inside screamed in pain. Some of them were stronger than others, so they couldn't escape in time. They were purified by the Holy Light, and not even their bones remained.

"It's getting more and more concentrated."

Chen Xi muttered to herself.

Then, the Holy Flame appeared in her hand. She threw it every few hundred meters and blew up the Dark Creatures.

This was the way to eliminate the danger ahead.

This method did not waste energy points, because when the Dark Creatures inside were purified by the Holy Light emitted by the Holy Flame; Lin Yan could also harvest energy points and evolution points.

On the other side of the Elves' reclamation team, Lomina and another seventh-ranked Elf were also doing this.

In the sky, there were some Elves. Although these Elves had not reached the seventh rank, they could still fly.

Because their backs had wings.

These were the Winged Elves. Their wings were transparent, but under the sunlight, they would reveal beautiful colors.

As compared to the Night Elves tribe, there were fewer Winged Elves. There were only a few thousand of them.

They were responsible for the horizontal elimination that was the northward elimination.

As for Chen Xi, Lomina, and the other seventh-ranked Elf, they were in charge of the vertical that was facing the west.

Few Dark Creatures were heading north, and more Dark Creatures were heading west.

Further, they went west, denser the dark substance was. It even filled the sky.

The Elves had no choice but to put a Holy flame on the treetops and disperse the dark matter in the sky.

The rate of reclamation slowed down, but it did not slow much.

At the same time, three hundred thousand Elves were reclaiming their land, the other fifty thousand Elves were growing slowly.

A large number of ancient trees were planted. Under the magic of the Elves, these ancient trees grew quickly.

These trees would be the first line of defense for the Holy Flame Elves.

Magic plants were planted, and the entire Holy Flame Forest developed into the ideal home of the Elves.

.....

However, after another week, Chen Xi and Lomina both noticed something strange.

Many Dark Creatures began to gather in the Dark Forest.

The Dark Creatures that had gathered in the past were all kinds of creatures. They were not strong enough.

But now, a Skeleton monster that looked like it had only bones and no flesh started to grow.

These Skeleton monsters were also afraid of the Holy Light. However, under the illumination of the Holy Light, they escaped quickly.

Moreover, they had been illuminated by the Holy Light in a second or two, and the damage they suffered was minimum.

The Elves would often hear the sounds of these skeletons in the Dark Forest.

That sounded like a strange cry from someone's throat.

"Maggie, send all of your fourth and above ranked Winged Elves."

By the Elves' special methods in the forest, Chen Xi contacted Maggie, the leader of the Winged Elves.

Hundreds of Winged Elves flew over instantly.

Under Chen Xi's arrangement, the several hundred Winged Elves used the Holy Flame to reclaim the front of the forest. They "bombed" the Dark Forest on a large scale and drove the Skeleton monsters away.

These Skeleton monsters could last for a second or two under the illumination of the Holy Light. If they were stronger, it would probably last even longer, and they would be a threat to the Elves.

That was why they had to "bomb" ahead.

"Mother, there are more and more Skeleton monsters. Their nests likely exist in front of us. Let's split up and look ahead."

Chen Xi contacted Lomina.

Lomina was dozens of kilometers away from Chen Xi, headed deep into the Dark Forest.

In the sky, there was nothing but darkness in the Dark Forest.

But as long as Chen Xi threw down a single Holy Flame, she would be able to blow up the pot inside.

As Chen Xi flew, she kept throwing down the Holy Flame.

With this method, Chen Xi could observe the density of these Skeleton monsters.

Skeleton's density continued to be higher.

When Chen Xi flew dozens of kilometers away, she once again threw a Holy Flame down and found something strange.

When the Holy Flame exploded in the Dark Forest, Chen Xi could see that a Skeleton monster with a particularly large body did not run away. Instead, it stood there and looked up at Chen Xi for a few seconds before it plunged into the darkness!

The Holy Light still burned its body.

The thin layer of skin on the bone seemed to boil.

The skull caught Chen Xi's attention.

This must be a powerful Skeleton monster.

Chen Xi chased after it toward its escape and occasionally took out the Holy Flame to blow it up.

Chen Xi did not rashly enter the Dark Forest alone. Before the dark matter in the Dark Forest was dispelled, magic could not be used. Moreover, the field of vision inside was very poor, and the skull was too fast to catch up to it.

If not, why was the Dark Forest the forest of life?

“Mother, I encountered a powerful Skeleton monster.”

Chen Xi chased after him while contacting Lomina.

“I’ve also encountered one. I’m afraid it’s at least an eighth-ranked Skeleton monster.”

Lomina replied immediately.

Chapter 217: Mad Skeleton Monsters! Legendary Skeleton Monster!

Chen Xi and Lomina were chasing a Skeleton monster above the Dark Forest.

Chen Xi and Lomina quickly realized through their communication that the two Skeleton monsters were heading in the same direction.

“That might be their nest.”

Chen Xi speculated.

“Yes, it is possible. If we can find their nest, we can catch them all in one fell swoop.”

Lomina had the same speculations.

This was also why Lomina did not kill the Skeleton monster below.

If they could find the nest of the Skeleton monster and get rid of it in one fell swoop, the danger in reclaiming the Dark Forest would be greatly reduced.

Now the two of them had gone hundreds of kilometers into the Dark Forest, Lomina had a bad feeling for no reason.

The two Skeleton monsters looked like they were running in the same direction, if they were calculated by angle; they should have already met up.

But they were far from meeting.

“Chen Xi, you go back first, in case they have any plans, I can chase after them alone.”

Lomina said.

After Lomina’s reminder, Chen Xi’s heart trembled, and she turned around and flew back.

.....

Lomina quickly knew that her intuition was accurate.

When Chen Xi turned around, many Skeleton monsters suddenly appeared in front of the Elves that were in charge of reclamation!

“Skeleton monsters!”

One of the Elves hurriedly reminded her. She pinched the Holy Flame in her hand, and the light from the Holy Flame instantly became 20 times stronger. It turned the fastest Skeleton monster into ashes.

The Skeleton monsters behind him were also screaming from the Holy Light.

The Elves reacted quickly.

There were three hundred thousand Elves, and the 150,000 Elves were divided into several rows and formed a line of fifty kilometers long.

There were 3,000 Elves per kilometer.

The density of the Elves was not low. They had such a high density because they had to hang the Holy Flame on the tree now. Moreover, this was just for safety.

When Skeleton attacked a large scale, many Elves exploded their Holy Flames at the same time in the 50km long reclamation battlefield. A Holy Light battlefield appeared in the entire Dark Forest!

At that moment, the Holy Light killed countless Skeleton monsters.

However, Skeleton monsters had been preparing for this attack for a long time.

As soon as the Holy Flame exploded, many Dark Creatures rushed over under the control of Skeleton monsters.

These Dark Creatures couldn't withstand the Holy Flame, but their momentum was too strong. Many of them used their bodies to extinguish the Holy Flame in the tree.

After that, more Skeleton monsters appeared and began to attack the Elves from a long distance.

A large number of pitch-black bone arrows were shot out by them.

"Be careful!"

The Elves did not carry shields, but their strength and combat ability were not low. Some of the Elves continued to use the Holy Flame to build a defense line. At the same time, they used the trees to dodge the bone arrows, while others used magical plants to create many shields in a short time.

Many Elves were fighting back with arrows.

.....

"Attach the Holy Flame to the arrow while you pray."

The Night Elves' defense line was the most outstanding counterattack. They prayed and attached the Holy Flame to the arrows. Then they shot the arrow when the Holy flame exploded, these arrows killed all the Dark Creatures.

However, many Skeleton monsters still managed to escape the attack with the help of the trees.

This battle between the Elves and the Skeleton monster had become extremely intense from the start.

There were too many Skeleton monsters.

When the Elves had reclaimed such a large area, the Dark Creatures in this area had been squeezed into Skeleton monsters' territory.

Now, the Dark Creatures were all used as cannon fodder by the Skeleton monsters. Because of the large number of them, they were too fierce. As a result, the defense line of the Elves was constantly compressed.

Many Skeleton monsters were climbing up the trees. After putting out the Holy Flame in the tree, many Skeleton monsters descended from the sky, posing a threat to the Elves.

They were afraid of the Holy Light because if they pounced on the Holy Flame, the Holy Flame would soon burn them to ashes. However, the Holy Flame would also exhaust its energy and extinguish it. After all, there were only 10 energy points in it.

To deal with the Skeleton monsters that fell from the sky, the Elves had to break the Holy Flame from time to time and pray for a new Holy Flame.

Fortunately, the Holy Flame was powerful. By now, no Elves had been injured, but the Dark Creatures and Skeleton Monster had died countless times!

.....

“There are too many Skeleton monsters. My Divine energy cannot be able to keep up.”

In the area where the Elves tribes were in charge, there was a Japanese Elf.

“Yeah, I’m losing my Elf power.”

Immediately, another Day Elf said.

They were not believers of the Lord of Flame. Although they prayed to the Lord of Flame every day after a month of reclamation, they were still not formal believers.

This led them to pray that although they could get the Holy Flame, the price for obtaining the Holy Flame was higher.

The Divine energy needed was several times greater than the Night Elves.

Since the Holy Flame could be used repeatedly while reclaiming the land, nothing would happen. But now, the Holy Flame needed to be used frequently in battle, so the problem appeared.

“Not good! Skeleton monster has appeared behind us!”

Then, the members of the Day Elf Tribe realized that they were surrounded.....

They were not the only ones who discovered it, but many Elves discovered it.

This wave of Skeleton monsters’ attacks had been planned for a long time. They were not ordinary ferocious!

“Mother, the Skeleton monsters launched a sneak attack. There are too many of them. I’m still rushing back!”

In the sky, Chen Xi flew towards the Elf’s defense line.

While she was flying, she would occasionally throw a Holy Flame downwards. Then, she noticed that the Skeleton monsters below were still charging at the Elves.

Heavens!

There would be many Skeleton monsters!

The danger of reclamation this time was much greater than the Rocky Elven Empire.

When the Rocky Elven Empire was reclaiming the land, they did not encounter any Skeleton monsters!

Without the Holy Flame of the Lord of Flame, this wave of attacks from the Skeleton monsters could have caused a lot of casualties to the Elves and could have driven them out of the Dark Forest!

“That Skeleton monster is a legendary monster; it can escape from the Dark Forest in a short time. I’m delayed. Chen Xi, I’ll leave it to you.”

Lomina’s voice was heard.

Legendary Skeleton Monster!

Chen Xi was shocked!

These Skeleton monsters were? Legendary Skeleton monsters!

This proved that this Skeleton monster was definitely not simple!

The rumor about the Forest of Darkness’s forbidden zone of life was not just a casual remark.

.

Chen Xi continued to fly towards the Elf defense line. Soon, she saw the Holy Light exploding in the Dark Forest.

“If this continues, their Divine energy won’t be able to withstand it.”

Chen Xi thought.

That was because there were too many Skeleton monsters behind her. They were like a tide.

Then, Chen Xi discovered that a tribe of Elves had been surrounded at the edge. The entire defensive line of the Elves had been cut off.

However, the Elves had the power to suppress them, and they also had a weapon like the Holy Flame. These Skeleton monsters could not be able to harm the Elves for some time.

However, their strategy couldn’t bring damage in a short time, it was to waste.

With a steady stream of Skeleton monsters, the Elves’ abilities were drained.

So far, there were few powerful Skeleton monsters. However, once the Elves showed their weakness, the powerful Skeleton monsters would probably appear.

“Maggie, there’s no need to keep your line of defense. Send your clansmen into the sky.”

Chen Xi spoke to the leader of the Winged Elves.

Thousands of Winged Elves flew over.

Under Chen Xi’s command, the Winged Elves formed a line and bombed the dense Skeleton monsters in front of the line of defense.

Skeleton’s attack rhythm was instantly disrupted. Many Elves were relieved!

Chapter 218: Winged Elves' faith! Little depression of the Elven?Goddess!

“Queen Chen Xi, we need too much Divine?energy to pray for the Holy Flame. I wonder if we need less Divine?energy after becoming believers of the Lord of Flame.”

In the sky, Maggie, the leader of the Winged Elves, asked.

The Winged Elves were?only a few thousand. They only believed in the Goddess of Life.

However, the Elven?Goddess was a powerful Goddess.

The Elven Goddess?did not rely heavily on the power of belief, so the Elven?Goddess?would not have any response. When she believed in the Elven?Goddess, if she believed in another God and treated the Elven?Goddess as a background, the Elven?Goddess would not care at all.

That was the confidence of an Elven?God.

The Elven?Goddess's?love for the Elves was still visible. It was said that when every Tree of Life fell, she would receive her blessing, which was why almost every Elf loved her.

It was not too late for the Winged Elves to join the reclamation. They had been reclaimed?for nearly a month.

During this month, the Winged Elves had seen the magic of the Holy Flame. After nearly a month of prayers, many Winged Elf?had already contributed their faith to the Lord of Flame.

Seeing that the war was so fierce, the Winged Elf leader finally gave her?faith to the Lord of Flame.

That was a matter of course, and it was also conducive to this battle against Skeleton monsters!

At this moment, hearing the winged Elf leader's words, Chen Xi said:

“After believing in my God, my God will need less energy to pass the Holy Flame over.”

Maggie nodded and flew over?and gave?a new order to all the Winged Elves.

That order was so simple.

As she prayed, she added, “I will be your faithful believer!”

As long as the Lord of Flame accepted and established a line of faith, the amount of Divine?energy they would need to consume to obtain the Holy Flame was?greatly reduced.

However, the current situation was urgent. When she officially contributed her?faith, she could only make up for the altar, temple, and so on.

When?the Winged Elves prayed, a few thousand Winged Elves received a response.

This response was very simple. There was only one word:

But!

This word was not a sound, but a tremendous revelation.

Immediately, the thousands of winged Elves understood something and prayed.

Cold flames appeared in their hands one after another. After eating the cold flames, they replenished their Divine energy.

Then, the thousands of Winged Elves were pleasantly surprised when they prayed for the Holy Flame, they needed ten times less Elven power!

The thousands of Winged Elves were in high spirits. Under Maggie's command, they began to bombard with Holy flames and disrupted the rhythm of the Skeleton monsters.

However, the battlefield was too long. The thousands of Winged Elves could not cover the entire area, but the Elves still breathed a sigh of relief.

Maggie organized hundreds of winged Elves to support some of the most intense areas of the battle.

.....

Chen Xi also threw down a huge Holy Flame from time to time to support some intense areas. The Holy Flame she threw down was more powerful, and a single Holy Flame could kill thousands of Skeleton monsters.

The small Holy flame that the Elves prayed for could only penetrate the trees in a short time. Skeleton monsters could use the trees to cover it up, but by the large Holy flame of Chen Xi, they could only survive if they were hidden behind the trees.

Chen Xi was looking for a powerful Skeleton monster. That was the most threatening existence to the Elves.

At this time, Chen Xi saw the Holy Light erupting at the most frequent speed ten kilometers away.

"Not good, there should be powerful Skeleton monsters! It seems to be the area of the Elves."

Chen Xi sped up and flew over.

"This Skeleton monster is at least eighth-ranked. Everyone, take turns to crush the Holy Flame. Don't give it a chance!" In the defense line of the Green Elves, the tribe's leader Anna shouted.

The eighth-ranked Skeleton monster kept moving through the Dark Forest. The more terrifying thing was that wherever it passed, the dark substance would become thick again.

Its speed was too fast. It was everywhere outside the Elves' defense line.

Under its lead, countless Skeleton monsters launched a crazy attack.

These Skeleton monsters were strong and weak.

But there were too many of them.

A large number of Skeleton monsters had not even reached the first rank yet. The Holy Light was enough to kill them, but the bone arrows they shot were still a threat if any of the Elves was accidentally hit.

Fortunately, the Elves were quite careful. With the shelter of the trees, they were not injured.

Their strength was at least second-ranked, or above, and they were strong.

More than 40,000 of the Elves had already shrunk. They had gathered within a radius of a kilometer and formed a large circle. They took turns to crush the Holy Flame, not giving the eighth-ranked Skeleton monster a chance.

If this eighth-ranked Skeleton monster got close to it, even if it was attacked by the holy light, it would still be able to take many lives away.

After circling for a while, the Skeleton monster finally decided to attack.

It charged over with the Holy Light. It was clear how powerful it was.

Just as it was about to arrive, a stronger beam of Holy Light descended from the sky, vaporizing the eighth-ranked Skeletons monster.

“The Lord of the Flame is the main shot of the flame!”

The Elves cheered.

.....

“Oh, I’m dead!”

In the Heavenly Realm, the Elven Goddess muttered.

The battle in the Dark Forest was so intense. As she was the Goddess of the Green Elves, over forty thousand Green Elves and some other Elves prayed to her.

Then the Elven Goddess noticed.

The amount of faith that the Green Elf had contributed to her was decreasing, she had decided to make a move if the Green Elf was in danger. Otherwise, she would not have any sense of existence!

One had to know that the Elves were able to endure until now with no casualties. 80% of them were thanks to the Holy Flame of the Lord of Flame.

These Elves only had one prayer, and the Lord of Flame would descend the Holy Flame. It was equivalent to the Lord of Flame descending power.

She had expressed nothing yet.

“Is the Lord of Flame’s Divine energy endless?”

The Elven Goddess looked down and couldn’t help thinking.

There was no need to talk about reclaiming the forest. At that time, the Holy Flames could be recycled. Every day, an Elf could only pray a few times.

However, the consumption of Holy Flame had increased dozens of times during the frequent battles.

However, the Lord of Flame did not hesitate to descend.

As a Goddess, the Elven Goddess naturally knew that the Lord of Flame must have used the mechanism of godhood to lower his power.

However, such a high-frequency drop of power didn’t stop at all. This meant that the Lord of Flame didn’t set an upper limit for godhood, rather; the upper limit was very high.

If the Lord of Flames had less Divine energy, he probably wouldn’t dare to do that!

That was why the Elven Goddess was filled with shock.

Lord of Flames was already powerful in her heart.

“No wonder he ignored me.”

The Elven Goddess couldn't help but think this way.

Then, the Elven Goddess saw that the Eighth-ranked Skeleton monster was about to charge into the group of Green-Elves.

Her spirit couldn't help but rise. This meant that she had a chance to show off.

As a result, she used her Divine energy to kill the Skeleton monster.

Of course, the best way to deal with Dark Creatures was to send down Holy Light, which was less energy than other forces.

If it was any other power, she might not be able to kill this eighth-ranked Skeleton monster with a single strike even if she descended through the Heavenly Barrier, unless she was willing to consume even more Divine energy.

However, when the Elven Goddess lowered her Holy Light to kill the eighth-ranked Skeleton monster, she was thought to have been attacked by the Lord of Flame.

The Elven Goddess was a little depressed!

Chapter 219: Too powerful, too desperate! It was just hard work!

As a Goddess and a more reserved Goddess, the Elven Goddess felt that even if she was misunderstood, it would not be good to expose her!

“Ah, forget about it. Let's just help the Green-Elves.”

The Elven Goddess had a good mentality and suppressed her depression.

Then she observed again. Soon, the Elven Goddess noticed that the Skeleton monsters' attacks were even more ferocious.

The Elves of the other tribes were also in danger.

“Hey, why are they lowering their strength? They are giving up because they feel that they can't compete with the Lord of Flame?”

The Elven Goddess exclaimed.

Among the Skeleton monsters, many sixth-ranked and seventh-ranked Skeleton monsters appeared.

These sixth-ranked and seventh-ranked Skeleton monsters were still a great threat to the Elves. Although they were not as powerful as the eighth-ranked Skeleton monsters, they still gave rise to a few Elves, such as the Wind Elves.

Fortunately, at every critical moment, there were always Wind Elves praying for a greater Holy Flame to kill or chase away these sixth and seventh-ranked Skeleton monsters.

However, the gods that the Wind Elves used to believe in did not have any power even in the most dangerous times.

This Elven Goddess felt that the Skeleton monsters had given up.

Just like her, even though the Holy Light had descended, it was still mistaken as the Lord of Flame.

Furthermore, even if there was no misunderstanding, she couldn't do anything like that.

In this battle, all the Elves were safe and sound because of the Lord of Flame's Holy Flame. After this battle, their faith in the Lord of Flame would probably reach a top rank.

"After this wave of Skeleton monster's attack, the faith of the Elves in the Lord of Flame will become stronger. The Green Elves are no exception. Oh, I'm worried to death."

The Elven Goddess kept worrying.

At this moment, she saw a seventh-ranked Skeleton attack the Green Elves with a large number of stronger Skeleton monsters.

After the continuous battle between the Green Elves, the burden of Divine energy was already quite large. It seemed that the seventh-ranked Skeleton monster had broken through.

The Elves could quickly kill the Skeleton monsters with the Holy Flame after breaking through, inevitably, they would suffer casualties.

The Elven Goddess was so nervous that she couldn't help but lower her power once again, killing all the Skeleton monsters in one fell swoop.

"The Lord of Flame has attacked again."

The Elves cheered again.

"Oh! Again!"

The Elven Goddess's depression came back.

The Green Elves had a lot of faith in the Lord of Flame.

But now, she had attacked twice in succession, which was equivalent to giving Lord of Flame an assist.

She had used up a lot of power during these two attacks.

After all, when power descended from the Heavenly Realm, it would increase the power loss. There was no way to use Divine energy.

.....

The Elven Goddess felt that she had to keep watching if the Green Elf was in danger, she would most likely make a move. Moreover, when she made a move, she would subconsciously choose Holy Light.

But if she didn't continue watching, she couldn't do it.

She was curious about why the Lord of Flame had so much power!

One must know that on this battlefield, hundreds of thousands of Elves were praying incessantly to get the Holy Flame.

Of course, she did not know that to Lin Yan, a small Holy Flame only meant ten energy points.

The Elven?Goddess calculated it according to her consumption. She felt?terrible!

She killed an eighth-ranked?Skeleton monster with a single strike from her Holy Light.

However, the power of the Holy Light was at most equivalent to the combined explosion of 10,000 Holy Flames.

However, there were hundreds of thousands of Elves who were continuously getting Holy Flames!

It could be said that?over 100,000 Holy Flames appeared every second.

This was too shocking.

If it was calculated according to the strength of the Elven?Goddess, the power she descended was 10 times lesser than?the?power that the Lord of Flame had released.

She was aware of the amount of energy she consumed when she attacked.

That kind of consumption caused?her heartache.

However, the Lord of Flame had attacked them?ten times every second.

A minute was equivalent to 600 attacks like her attack!

Now the war had begun, the Lord of Flame had acted thousands of times like her!

However, the power of the Lord of Flame did not slow down at all.

It was equivalent to saying that after this battle, the Lord of Flame would send down more power than the sum of her powers!

After calculating this, the Elven?Goddess instantly understood the reason why the few of them lowered their strength.

“The power of the Lord of Flame has frightened them. They feel?that the Lord of Flame is?too powerful, so they were in despair.”

The Elven?Goddess thought.

Then she thought of herself.

“Oh, what should I do?”

The Elven?Goddess was worried again.

Her heart was not?big. She just wanted to keep 10% of her faith.

The accumulation of the spirits of the Elves was good. After all, the Elves were powerful and long-lived. Although there were only a few of them in a tribe, they were?still able to survive.

Moreover, they were aloof from the world. Unlike the gods of the Human Kingdoms, they were willing to wage a war of faith and fight to the death.

That was why the Elven Goddess might look pitiful, but compared to many of the gods of the Human Kingdoms, she could be considered a hidden rich woman.

Her lifespan was endless. As long as a few tribes believed in her, she would be satisfied.

Now, the Lord of Flame had started to occupy her faith, but she had no way to do so. It was not easy for her to make some effort. She wanted to show off, but in the end, she gave the Lord of Flame an assist.

The Elven Goddess decided to find a way to contact the Lord of Flame. With such a powerful God, she only needed over 40,000 people to believe in 10% of the Green Elves tribe, and she would be in charge of defending the Greenland Elves tribe. It was equivalent to only earning hard work.

.....

In the Dark Forest, the battle became more intense.

There were too many Skeleton monsters. They were endless.

This place was simply the Skeleton Kingdom!

It was normal to think about it.

The length and width of the Dark Forest had reached over 1,000 km.

If they were humans, they would be able to live over ten million lives in such a large area. How many Dark Creatures and Skeleton monsters would there be in the past?

Moreover, there were even more Skeleton monsters in the west!

The ordinary Dark Creatures that the Skeleton monster had driven had all been killed.

The mission of these Dark Creatures had been completed.

That was to consume the power of the Elves.

After a series of battles, the Elves had consumed a lot of their Divine energy.

Gradually, more and more Elves realized that the Elven Goddess they had believed in had no power to descend.

Throughout the entire battle, it was all the Lord of Flame who came down to help them.

Otherwise, no matter how strong they were, they would not be able to withstand the relentless attacks of Skeleton monsters. Their casualties would increase.

Of course, they could leave the Dark Forest, but they would not be willing.

It was difficult to build a new home. How could they be willing to hand it over to the Dark Creatures?

If they all found out, it would probably be after the war.

At that time, their faith in the Lord of Flame would probably soar.

“My Divine energy is running out.”

“Me, too.”

The Elves were tired.

Once their Divine energy ran out, they could only rely on their bows and arrows to fight.

Ordinary Skeleton monsters were not their opponents, but even those powerful Skeleton monsters that did not attack could still exhaust their energy.

In the sky, thousands of Winged Elves were still bombarding the Dark Forest in front of the defense line.

Skeleton monsters were still flooding in like a tide, unable to see the end.

Even if Chen Xi used the Holy Flames from time to time, it would not help.

This battle line was too long, and there were too many Skeleton monsters.

“Chen Xi, please ask the Lord of Flame for help. If this continues, you won’t be able to hold on. Even if I come back, I won’t be able to kill so many Skeleton monsters. This ninth-ranked Skeleton monster is so cunning; I still can’t get rid of it.”

Lomina said to Chen Xi from afar.

Lomina was still hundreds of kilometers away.

The battlefield was too big, and there were too many Skeleton monsters. Even if Lomina returned, it was not a good thing to bring a ninth-ranked Skeleton monster.

If the ninth-ranked Skeleton monster charged into the Elves and killed them, it would be bad.

Chen Xi stopped. At this moment, if she wanted to protect the Dark Forest, she had to ask her God for help.

Chen Xi couldn’t help but feel a sense of guilt when she frequently asked her God for help.

At this moment, this beautiful Elven queen decided. In the future, she must repay the Lord of Flame’s favor.

Then she put her hands together and prayed.

This time, it was not a prayer for the Holy Flame.

The Lord of Flame would not have noticed that the godhood automatically processed it.

And now, Chen Xi’s prayers were prayers that the Lord of Flame could hear!

Chapter 220: Holy Light Purifies Everything! The stunned Elven Goddess!

In the Abyss, flames were burning everywhere.

Lin Yan burned another layer of Abyss.

As Chen Xi prayed, Lin Yan finally cast his gaze over.

In the processing mechanism that Lin Yan had set up for the virtual godhood, the upper limit of the Holy Flame that the Elves who cultivated in the Dark Forest got was high.

The distribution of flames had long been the work of the virtual godhood, so Lin Yan couldn't hear it even though many people were praying.

In fact, in the war of the Elves, there were still a lot of evolutionary points.

However, Lin Yan didn't have the time to check the accounts of the evolution points. This was because the system had warned him too often.

Natasha was also contributing evolution points to Lin Yan's battle in the Abyss.

Lin Yan himself burned the Abyss, and the evolution point was constantly earned.

So Lin Yan turned off the remainder of the system's evolution point.

He only needed to look at his evolution points now and then. When he had enough evolution points, he could just run up.

The evolution points Lin Yan needed to rank up were getting bigger and bigger.

This was certain. The later one reached, the more evolution points one needed to rank up.

Fortunately, Lin Yan's evolution points were quick. He had already risen to the eighth rank. He was very close to the ninth rank, so he could be able to develop to the next rank.

"Skeleton attack?"

Through the line of belief, Lin Yan found multiple perspectives and quickly understood the situation.

Lomina was fighting a Legendary Skeleton monster.

The Legendary Skeleton monster was difficult to deal with. Its speed was not ordinary, and its defense was high. Its body had a good magic resistance, and many magic spells were useless against it.

It was as if the Dark Creatures were difficult to deal with.

However, Lomina was also a Legendary-ranked existence, so she wouldn't suffer too much. Moreover, her attacks were mainly based on an entity like a bow and arrow, not normal magic. This allowed her to suppress the Legendary-ranked Skeleton monster greatly.

The main reason she was at a disadvantage was that every time the Legendary Skeleton monster fell into a disadvantage, it would hide in the Dark Forest at any time, using the Dark Forest to hide its aura, and then launch a sneak attack.

Fortunately, Lomina had the Holy Flame. As long as the legendary Skeleton monster hid in the Forest of Darkness, Lomina would have a huge Holy Flame. It would have destroyed the Legendary Skeleton monster.

However, two legendary-ranked battles couldn't be decided so quickly.

Strictly speaking, the monster was more powerful, because Lomina was the new legend.

.....

As for the defense line of the Elves, they had been fighting for so long. Even with their Divine energy, they couldn't hold on any longer.

Many of the Elves no longer prayed for Holy Flames. Instead, they chose to use their bows and arrows to fight. Holy Flames could only be used when powerful Skeleton monsters arrived.

However, such a battle style would not last long, because their stamina was not endless.

Of course, some of them, such as sixth and seventh-ranked?Elves, were powerful. They were a? major force that was blocking Skeleton monsters. Otherwise, they would have already suffered casualties.

After taking everything into account, Lin Yan realized that the power of belief he had obtained from these Elves had indeed experienced a surge!

There were only 300,000 Elves there.

However, if they all believed in one god, they would contribute more faith than the 20 million people in the Xi Ling Kingdom.

That's right, it was terrifying!

They were so powerful.

"There are several Skeleton monsters. There are even many Skeleton monsters in the forest behind us, it's?not suitable to use other flames in the Dark Forest. Let's just use the Holy Flame."

Lin Yan had already decided to make a move.

Moreover, this time, Lin Yan was prepared to solve the problem at once.

.....

Soon after Chen Xi finished her prayers, she received a message from the Lord of Flame.

Chen Xi followed the Lord of Flame's instructions and immediately activated a sound amplification spell.

This amplification spell could make her voice spread throughout the entire Elf defense line.

"Everyone, listen to my count of 1,2,3 and close your eyes!"

Chen Xi shouted.

In the Dark Forest, all the Elves heard what Chen Xi said.

Although they did not know why Chen Xi said that, every Elf was prepared to do so.

Among the three hundred thousand Elves, Chen Xi's prestige was already quite high.

After all, the reclamation of the Dark Forest was led by Chen Xi, and Chen Xi was the Holy Maiden?of the Lord of Flame. She was also the most powerful queen of the Night Elves tribe among the three hundred thousand Elves!

One must know that even though the Skeleton monster's attack was so fierce, after fighting for so long, not only did the Night Elves show signs of weakness like the other Elves, they even sent many Night Elves to help the other Elves.

The power of the Night Elves was clear.

If nothing unexpected happened, after the Dark Forest was reclaimed and the Holy Flame Forest was formed, after the new Elven Empire was established, Chen Xi would naturally become the queen of the Elven Empire.

So, Chen Xi's words instantly made the Elves pay attention.....

.....

"Eh, look at this; did the major force of the flame directly descend?"

In the Heavenly Realm, the Elven Goddess could not help but show an interesting expression.

Now, all the Elves were fighting while listening to Chen Xi's orders. No one prayed to her.

However, the line of belief was still there. She needed to spend more energy to cast her gaze down.

However, to not miss the scene where the Lord of Flame had directly descended, the Elven Goddess decided to continue watching.

"They should be watching as well."

The Elven Goddess thought.

Chen Xi started counting.

"1,"

"2,"

"3,"

Chen Xi counted 3 times.

Then, she closed her eyes first.

In the Dark Forest, all the Elves closed their eyes at the same time.

Then, in front of the Elf defense line, in the sky, an incomparably huge Holy Flame exploded.

When the Holy Flame exploded, it emitted a Holy Light that was even brighter than the sun. It covered everything.

The sun in the sky was overshadowed by it.

In less than a second, the Holy Light had entered the Dark Forest. The dense forest in the Dark Forest could stop the Holy Light at all. It didn't sweep away all the dark matter inside, but all the Skeleton monsters inside, regardless of their rank or strength, all were completely evaporated!

This Holy Light was so strong that even the three hundred thousand Elves with their eyes closed still felt it.

Fortunately, the Holy Light did not hurt their eyes.

The penetrability of the Holy Light was also astonishing. If someone was tens of meters away from the ground, they would probably be shocked to find that the ground was full of Holy Light! Even the thick soil could not stop the spread of the Holy Light.

The Holy Light came and went faster.

When the Holy Light disappeared, all the Elves noticed that there was no Skeleton monster around them.

No, it's not around them.

In the Dark Forest, all the Skeleton monsters had disappeared.

This terrifying Holy Light swept out a blank area over 50 kilometers in diameter in the Dark Forest!

In this area, whether it was the dark matter or the Skeleton monster, they were all purified and evaporated from the world!

The Holy Light killed some of the seventh and eighth-ranked Skeleton monsters, not even leaving a corpse behind!

This scene stunned the Elven Goddess who had cast her gaze down!
