

## Flames 241

### Chapter 241: Deity Transformations! All submitted!

“Ah, how is this possible?”

In the sky, the voice of the god’s incarnation lost its composure for the first time!

On the ground, in the Horton Kingdom, countless spectators opened their mouths wide.

God’s incarnation’s panicked voice made these ordinary people not afraid to believe their ears. They all thought that they had heard wrong!

Which was the voice of their God?

Their God, their invincible God, from their expression to their tone, how could they make such a sound?

No, no, they must have heard wrong!

“I must have heard wrong. It’s over. It’s cold and hot. I’m confused!”

On the ground, a citizen of Horton Kingdom muttered.

Under the strong self-suggestion, this person thought that he was wrong.

When he told the person beside him, the person beside him also felt that he must have heard wrong.

As a result, a magnificent spectacle appeared among the crowd watching the battle.

Tens of thousands of people felt that they had heard wrong.

“That must not be our God’s voice!”

Some people comforted themselves, even though they could hear it.

Some people even thought that it was the Lord of Flames’ trick. To disturb their minds, the Lord of Flames deliberately pretended to be their God’s voice.

When a person was in despair, to prevent their faith from collapsing, their imagination would explode!

On the battlefield, many soldiers from the Horton Kingdom also heard the voices of their gods.

The warriors who were still fighting could not help but pause when they heard the voice of a god.

The soldiers in the rear formation couldn’t help but look up into the sky.

Soon, they saw something they would never forget!

In the sky, the endless flames were still burning. In the endless flames, their God was filled with flames!

The color of the flame burning on his body was many times darker than the flame beside them.

When the flame was burning, the flame was hundreds of meters high in the sky. Even if it was so far away, it was still extremely terrifying!

“Ah, how could you be so strong? You can’t be so strong!”

In the sky, once again, the cry of god's incarnation sounded!

This cry was not a scream; it was more like something stimulated it!

The mentality of becoming a God was unbalanced!

Lin Yan's strength had completely exceeded his expectations.

God's incarnation could even fight against an ordinary Holy Flame!

Furthermore, ordinary Sanctuaries might not be willing to provoke him. Unless they never made a breakthrough, they would have to reach the Sky Realm to succeed. If they did, what would happen if they were to find them?

Although the Sky Realm was enormous, he was not afraid of everything. Furthermore, Holy Flame was not clear about the situation in the Sky Realm.

Of course, he still didn't dare to descend into a Saint-ranked incarnation. First, it consumed too much energy, and second, when the temptation became large enough, there would be many people who took the risk!

In his opinion, if the Lord of Flame had only lowered his power, he could never compete with God's incarnation.

Every god could calculate how weak the Heavenly Barrier was.

To the gods, lowering a legendary incarnation was already a risky act.

He took the risk, but once he succeeded, he would gain a lot. As long as he was able to successfully defeat the Lord of Flame and bring the Xi Ling Kingdom and the Yan Nation under his rule, he would be able to take the Hun River Principality; he would be able to make a huge profit.

In the eyes of this God, the Lord of Flame was a second-ranked God. As long as he did not reach the third rank, the Lord of Flame in the Heavenly Realm would not be able to do anything about his incarnation.

But now, the flame that the Lord of Flames had descended could easily be burned through even with his Ice Rule!

However, how did the Lord of Flames possess such Divine energy without his incarnation?

Could it be that the Lord of Flame was a third-ranked God!

But if it was a third-ranked God, why the hell was he staring at a small kingdom!

Furthermore, he had a certain understanding of the Lord of Flame. He knew that Lord of Flame's Kingdom was just a remote Orc Kingdom!

This made him very confused.

However, he did not need to understand.

After Lin Yan tried the power of the Rule of Flame, the flame had already burned onto him.

The incarnation of God was not a Divine Body, so it could not withstand the burning of Lin Yan's flame.

He did not give up on struggling. He continued to use the ice laws against him.

This was using the ice law on himself.

However, it was useless.

Lin Yan's flames soon turned him into a big Flame fighter!

"Boom!"

As the flames burned onto his body, Lin Yan's flame soared even higher!

The God incarnate let out an unwilling cry!

He was truly unwilling!

He had spent so much power and so much energy to bring down his incarnation. He had originally thought that he would be able to establish victory in one fell swoop and wipe out the few kingdoms east of the Eternal Night Empire.

However, right now, not only did his dreaming fail.

Even his incarnation would be lost!

To descend this God form, he had used up a fifth of his energy.

That was a tremendous amount of energy!

Damn it!

Damned Heavenly Barrier!

A fifth of his strength could easily kill countless ninth-ranked experts in the Heavenly Realm!

However, the Continent of God was only in the ninth rank.

Even if he could display his strength as a Saint Domain expert, he was only in the ninth rank!

Even so, he was defeated by the Lord of Flame!

God's incarnation would be lost!

The Lord of Flame's flame was too terrifying. He didn't even have a chance to escape, so he could only scream unwillingly!

.....

On the ground, countless people from the Horton Kingdom stared blankly at the sky.

At that moment, they could no longer deceive themselves.

Their faces were filled with disbelief.

Their God had lost!

No, it wasn't just that simple.

It seemed like their God was going to be burned to death by the Lord of Flame!

The god's incarnation naturally did not say that it was a god.

The Church also did not say anything.

Thus, in the eyes of these people, it was their Deity that had fallen.

Then he was burned to death!

How could these citizens know the rank of the gods? They didn't even know about Divine energy? or laws.

Of course, they didn't need to know that much.

They only needed to know that their God was going to be burned to death by the Lord of Flame!

Instantly, the faces of countless people were filled with shock, depression, despair, and other emotions.

Although everyone's faces were filled with sparks, they turned extremely pale.

Some people even forgot to breathe, causing them to faint!

Their faith was shattered!

At first, before their god's incarnation was descended, their faith could be considered pious.

However, after God's incarnation descended, the faith of the people who had not seen God in their entire lives had been magnified many times.

Their God had descended. What else could they not do?

However, today, they witnessed their deities being burned to death!

There was no need to say how big this battle was against them!

Some of them could even hear cracking sounds.

This was the sound of their faith breaking!

.....

The soldiers of the Horton Kingdom reacted even more quickly than the civilians.

“Clang!”

In a battle formation, the weapon in the hands of a Horton Kingdom warrior fell to the ground, followed by a shield.

His face was filled with a mournful expression.

His eyes were filled with deep despair.

His lips were trembling. Judging from his appearance, he seemed to want to say something, but he couldn't!

“Clang!”

Next to this warrior, the weapons and shields in the hands of many warriors had dropped.

This wasn't something they threw away.

It was because they were so shocked that they could no longer hold their weapons!

They didn't even know that their weapons and shields had dropped!

This sort of situation didn't just happen in one place, it was happening everywhere.

In every battle formation, the weapons and shields in the hands of many of the warriors fell to the ground.

After some of the soldiers' shields fell, they smashed into the back of their feet, unable to react.

### **Chapter 242: Deity Transformations! All submitted!**

It must be known that the shield was heavy. If it was smashed, it would not have jumped up!

But then, they seemed to be wooden men!

They only had one move left.

They raised their heads and stared blankly at the sky. They looked at the endless Lord of Flame, who kept screaming!

Their God!

Their invincible God!

How could a burned God be considered invincible?

However, they did not have any extra brain cells to think about this.

There was nothing in their heads but the raging flames.

The flame that burned their God to death became their unforgettable memory!

The invincibility and power of the Lord of Flame had left a deep mark in their hearts. Even if they were aged, they would still be worried about what they saw that day.

There were many people there. As they were dying, what they recalled was not the scene of their life.

On that day, the terrifying and endless flames burned a God to death!

.....

“Crash!”

Not only the soldiers in the battle formation, even the soldiers in the battle were shocked. In the battle, they even dropped their weapons!

Some of these soldiers were killed, and some survived.

The soldiers of the Xi Ling Kingdom raised their heads and looked at the scene in the sky.

However, in stark contrast to the despair of the soldiers of the Horton Kingdom, the soldiers of the Xi Ling Kingdom would not despair!

Needless to say, the Yan Nation's orc army had long since taken root!

These orcs never doubted the power of the Lord of Flame.

However, even though the orcs had seen the Lord of Flame descended more than once, the scene still shocked them in the sky.

As for the soldiers of the Xi Ling Kingdom, none of the soldiers of the Xi Ling Kingdom saw the Lord of Flame attack.

The Seven Holy Spirits were killed too quickly.

On the southern highlands, everyone was concerned about surrender.

During the battle in the imperial city, the 200,000 soldiers were all armed by the nobles. They had long since disbanded.

That was why the soldiers of the Xi Ling Kingdom had only heard people talk about the fight in the capital. They knew that the Lord of Flame was very powerful.

However, these soldiers did not know exactly how powerful the Lord of Flame was.

Until now, they had seen it!

It was unmatched strength!

It was a power that even gods could slaughter!

Many of the soldiers of the Xi Ling Kingdom thought that the God of Horton Kingdom had arrived.

Meng Ying and the others did not deliberately talk about the god's incarnation.

There was no need to say it!

Therefore, the hearts of the soldiers of the Xi Ling Kingdom were also greatly affected.

However, the effect of this attack was exactly the opposite of the people of Horton Kingdom.

This shock was pleasant!

Many of the soldiers of the Xi Ling Kingdom had their souls upgraded!

Another way to put it: their faith in the Lord of Flame had reached an unprecedented rank!

It could be said that after this battle, the 500,000 soldiers of Xi Ling Kingdom had become the most loyal soldiers of the Lord of Flame!

The power and invincibility of the Lord of Flames were engraved deep in their hearts. It was unforgettable!

Therefore, on the battlefield, even though the soldiers of the Horton Kingdom lost their fighting spirit, the Xi Ling Kingdom and the Yan Nation did not attack. Instead, they cheered.

This was not a match!

There was no such thing as not being a fighter.

Even if the soldiers of Horton Kingdom had the highest morale, they were still crushed!

They were not in a hurry.

Now, the great Lord of Flame had won.

Their God had won.

The warriors who had been crushed by them were no longer important!

In the sky, the God of Horton Kingdom cried and subsided.

After the last drop of Divine energy was burned, the god's incarnation became Lin Yan's evolution point.

Lin Yan even took this opportunity to raise his first rank!

The power of god's incarnation of the ninth rank was different from the ordinary ninth-ranked legends.

All he carried was Divine energy.

Otherwise, why would he be able to use the power of Holy Flame!

In terms of strength, it was like an ordinary Holy Flame.

But for Lin Yan, who had the godhood, it was a huge supplement.

“Boom!”

The flames burned. A Holy Light appeared in the sky again, but the moment it appeared out.

That was the God of the Horton Kingdom, who was unwilling to accept it. He was descended from the Heavenly Realm to vent his anger.

This god's mentality must have collapsed.

If it was normal, he would not have been willing to lower his strength.

Did he have endless Divine energy?

In the Heavenly Realm, there was a constant battle between gods. Every energy was very important. If it wasn't for something as important as his kingdom, this god wouldn't have been willing to pay such an enormous price.

However, he lost his blood.

It was estimated that under the collapse of his state of mind; he had a broken state of mind.

Of course, even if he could use his strength, he could not threaten the people of the Xi Ling Kingdom and the Yan Nation.

Even if Lin Yan didn't have a line of belief, he wouldn't be able to cast his gaze or position.

There was no GPS on the Continent of gods!

The Xi Ling Kingdom and the Yan Nation did not have believers of the God of the Horton Kingdom, and no one would pray to him. There was no line of belief, so even if the God of Horton wanted to take revenge on the Xi Ling Kingdom and some of the cities of the Yan Nation, it was still impossible.

Moreover, under normal circumstances, the god of the Horton Kingdom would not do this. What was the use of killing some mortals if he was to drop their power from the Heavens?

Killing tens of thousands or even hundreds of thousands of mortals in one strike was useless except for wasting his Divine energy.

God's mentality differed from humans.

That day, after God's Incarnation was killed, it used its strength to strike. It was obvious that his mentality had collapsed.

When he was normal, he would probably regret it.

.....

Moreover, it was useless no matter how unwilling he was.

What else could he do if he had not even burned his god's incarnation?

Unless he summoned another Saint, but if he did, Lin Yan would probably laugh!

It could be said that the outcome of this battle was determined!

God of Horton Kingdom, lost!

Lord of Flame won!

In the sky, there were no more enemies. Lin Yan spread the flames with no hesitation.

Although he consumed a lot of energy points, Lin Yan didn't feel any heartache. The energy points he had now could be burned for decades.

This was not a berserk state.

Lin Yan's rank of indestructibility had increased after rising to the rank of the Destructive Flame. The consumption of burning in normal times was reduced further, and the consumption in a second was only a few hundred points.

This was a piece of cake for the current Lin Yan.

Seeing this, Meng Ying and the Eldest Princess exchanged a glance.

Meng Ying saluted Lin Yan in the sky and said:

"Your God is dead. All the people of Horton Kingdom, if you put down your weapons, you will be deemed to have submitted. Otherwise, you will be killed!"

"Crash!"

On the battlefield, countless soldiers who were still stunned dropped their weapons.

Some of the soldiers were not afraid of death under the impact.

However, they did not want to fight anymore.

Their God was dead. Why could they fight?

### **Chapter 243 Take Horton Kingdom down! Looking into the future!**

"We lost!"

The countless people of Horton Kingdom looked as if they were dead.

This world-shocking battle had finally ended!

On the southern highlands, a large number of magic messages had been sent back.

These magic letters said the same thing.

That was the result of that world-shocking battle!

The kingdom of the Lord of Flame won and the Horton Kingdom lost!

Even the God of the Horton Kingdom was burned to death!

After the magic secret letter was sent back, the person who received the magic secret letter naturally could distinguish. They would not think that the God of the Horton Kingdom had died.

These magic letters were sent to the Hun River Principality!

The Hun River Principality was not small, and it had a large population.

There were around 30 million people in the Hun River Principality, a little more than the Xi Ling Kingdom, and the area was even larger than the Xi Ling Kingdom.

The entire Hun River Principality was roughly divided into five regions. These five regions believed in five different gods.

The Royal Family believed in the most powerful God of the Hun River Principality.

According to the estimation of the Eldest Princess, God's estimation was at the late stage of the first rank.

As for the other four gods, they all were at the middle rank of the first rank!

Now that the battle had been decided so quickly, these five gods would probably panic!

However, Lin Yan's Holy Maidens had no time to pay attention to the Hun River Principality!

Although the Horton Kingdom had been beaten down, it had not been digested!

Well, after this battle, the nobles of the Horton Kingdom no longer could resist. Even if they wanted to resist, suppressing them was only a matter of minutes.

However, this was a battle of faith, not a war of destruction. It was believed that the nobles of the Horton Kingdom would not be ignorant of the situation.

Their capital had been completely defeated, and the most elite army of a million had been captured. They wanted to unite to gather the army, but they were just a bunch of rabble, so what?

....

In the sky, on the flying ship, Qing Ling, Luo Ying, and Meng Ying gathered together.

Although the Eldest Princess was not the Holy Maiden, due to her faith, she also joined the small circle.

However, most of the time, she focused on listening and occasionally offered some suggestions.

This flying ship naturally became their spoils of war.

During the battle, the god's incarnation pushed the ship far away, which allowed it to survive. It was a good thing for Lin Yan.

The Green Fox spirit prepared to take the ship back to the City of Miracles and let the dwarves try to build it.

Flying ships involved complicated alchemy, but if they would give the Dwarf Queen sometimes, she would be able to learn it.

The most complicated part was still the magic pattern.

All sorts of magic patterns interweaved that allowed the flying ship to fly finally.

However, for the dwarves with Lava Flames, magic patterns were not a problem at all.

This thing was not flying for anything. It had to consume magic crystals.

The better the flying ship, the smaller the consumption of magic crystals. This kind of flying ship was more expensive.

On this flying ship, there was also defensive magic, and there was even a large defensive barrier.

The barrier was naturally a magic technique, but it was a very clever magic technique, just like a forbidden spell, so it was named after a proper noun.

This made the ship's defense quite good, even able to resist the forbidden spell.

In fact, in cities with Legendary-ranked existences, there were usually large-scale Legendary-rank barriers. It was not difficult to resist the forbidden spell after it was activated. Of course, it also required the consumption of magic crystals.

However, the top few kingdoms in the past were the Grand Magic Masters. They did not even have a forbidden spell, so how could they set up a barrier?

Even if it was a City of Miracles, it only had a decent magic defense, but there was no super-large legendary barrier.

According to the size of the City of Miracle, the huge legendary barrier could not cover all of them. However, it could at least protect a large number of important buildings from being ambushed!

Fortunately, now that Meng Ying and the Eldest Princess become Legendary-ranked magisters, they could set up a Legendary-ranked barrier.

On the ground, the Xi Ling Kingdom's soldiers were still reorganizing their captives.

These captives would not be mistreated.

The captives summoned by the nobles would be placed in the southern highlands after their weapons and equipment were collected.

Well, they wouldn't be idle. They would do something important.

They would cultivate the Southern Highlands and plant Divine beans.

The southern highlands were not small, and the land was not fertile, but it was good enough to plant Divine beans.

This was to prevent these captives from being recruited by the nobles who wanted to cause trouble again. At the same time, they could also play their role.

After they realized the magic of Divine beans, they could return to the Lord of Flame even faster.

The Royal Army was heavily guarded.

In addition, it was the Church's army. This was the main point.

They also released their weapons and equipment and then kept a close watch.

Under the leadership of the centaur tribe's leader, the centaurs carried out a wave of cleansing of the Church's bishops. The fact that these bishops could communicate with the gods was an unstable factor.

At the end of every war, that valiant Chief of the Centaurs took the initiative to do this and carried all the dark side on her back.

It would take a lot of time to clean up the battlefield and accommodate the captives.

### **Chapter 244: Take Horton Kingdom down! Looking into the future!**

During this period, Lin Yan's Holy Maidens were discussing things on the flying ship.

"Next, let's discuss how we can stabilize the Horton Kingdom as soon as possible."

Qing Ling raised the issue.

Meng Ying was the first to speak:

"Among the three laws of the Xi Ling Kingdom, we still apply to the Horton Kingdom."

Qing Ling nodded.

Those three laws were killing weapons.

The second rule was that after the reclamation order was activated, the commoners of the Horton Kingdom could be stabilized as quickly as possible.

Under the circumstances that their God had been defeated, and the Church had been purged, the faith of these civilians was simple.

Although they had been so enthusiastic before, once they had benefited from the reclamation order, they could live a good life that was unimaginable before. Their faith would change rapidly.

Piety was always based on a strong foundation.

Perhaps there should be an additional sentence: Based on benefits.

Especially for those civilians.

Meng Ying continued, "As for the nobles, there is only one king left in the Royal Family. There is no need to keep this king. What do you think?"

Qing Ling nodded and said, "Their king is dead."

"Dead?"

Qing Ling said, "Yes, Winnie did it. Their king has the strength of a sixth rank and was killed by Winnie on the battlefield."

Meng Ying said, "That's the best, then the ordinary nobles. The nobles enjoy the same treatment. Similarly, these nobles have the right to trade, but not with the Hun River Principality, but with us."

Oh, right, Eldest Princess, how's the situation with the Eternal Night Empire? If we want to trade with the Eternal Night Empire, is it possible?"

The Eldest Princess said, "The administrative system of the Eternal Night Empire is different from that of the kingdom. They also have nobles, but the Imperial Family's control is very strong, and the Imperial Family has great power. There are twenty-four provinces in the entire Eternal Night Empire, and the smallest one is half the size of the Xi Ling Kingdom. Four provinces are close to us. If we want to trade with them, it's best to trade with these four provinces first. We just need to apply for trade orders from these four provinces. It's not that complicated, I can do it."

"Wow, it's so big!"

Luo Ying couldn't help but sigh.

She was lamenting the size of the Eternal Night Empire.

The Eldest Princess nodded. "The Eternal Night Empire is in the top ten ranks in the empire of the Continent of Gods. Of course, it's big."

Luo Ying asked curiously, "Then they won't attack us, right?"

The Eldest Princess shook her head. "I don't think so. I've read a bit about the history of the Eternal Night Empire recently. The first king of the Human Kingdom around the Eternal Night Empire was the founder of the empire. They had an agreement with the Royal Family that the Eternal Night Empire would never attack these kingdoms or interfere in their internal affairs or beliefs. The Eternal Night Empire was very prosperous and had an unimaginable population. They might not care about the surrounding kingdoms. In addition, they also need these kingdoms as a buffer. After all, there are wars between empires."

Then Luo Ying relaxed. "By the time we integrate the four kingdoms, we'll be able to form a small empire. Although it's no match for the Eternal Night Empire, as long as we build it well and prosper, we can expand in other directions!"

"Ah, you're wrong." Sister Meng Ying continued.

Qing Ling smiled. "Luo Ying, you're not biased either. After all, the Eternal Night Empire is right next to us, so your question is very critical. It's good to look into the future."

A more beautiful smile appeared on her face as she said:

"You don't know. I feel like I'm dreaming. A year ago, I was starving in the forest, but now we're rebuilding a small empire!"

No matter how smart Qing Ling was, she was still a beautiful little Fox Lady.

Now, her heart was out.

Luo Ying looked at her with envy. "Holy Maiden, I envy you."

Qing Ling asked, "What do you envy me for?"

Luo Ying said, "I envy you for knowing my God for the first time. Your mentality is also the best among us."

Qing Ling said, "Luo Ying, the sisters who joined later also envy you~"

As the girls spoke, they could not help but look into the future.

Now, their strength was already very strong.

An empire was about to be born in their hands.

And all of this came from the great Lord of Flame.

Without the Lord of Flame, they could not achieve such an achievement!

Although this empire was small, a small empire was also an empire, not a kingdom!

And given some time, the small empire might grow into an extensive empire.

After half an hour, Meng Ying finally got back to business.

Meng Ying said, "We can now send people to explore the other three sides to see if there is room for expansion. Once we establish a small empire, we can start expanding. As for the Eternal Night Empire, it depends on our strength and our God's attitude."

"As for the trade, I'll have to trouble the Eldest Princess, but there's no need to be in such a hurry. Let's first stabilize the Horton Kingdom. The nobles of the Horton Kingdom will remain. Once we stabilize the Horton Kingdom, we can attack the Hun River Principality."

"En!"

The Holy Maidens quickly made up there so they could stabilize their marching speed!

....

When they made up their minds, they saw that the captives had almost been dealt with. Meng Ying asked Luo Ying to lead the half a million Royal Soldiers to place the captives while the Eldest Princess stayed behind to guard them.

Meanwhile, she had led the Chief of the beast tribe with a speed of over a hundred thousand and headed straight for the Horton Kingdom.

The beast army that she brought with her was only the centaurs, lions, and wolves.

These were three quick tribes, and their marching speed could be stabilized at over 80 kilometers per hour.

If it was a surprise attack, it would only be faster!

This was a terrifying speed.

In less than a day, Meng Ying and the 120,000 orcs had already arrived at the capital city of the Horton Kingdom. It took almost no effort to take down the capital city.

After that, the Centaur warriors began to clean up the Church.

A few days later, two thousand Winged Warriors began their airdrop campaign.

This time, the amount of magic paper used was not that much.

The content of the publicity was nothing more than the death of the God of the Horton Kingdom, followed by the three decrees.

This wave of publicity was quite effective.

Meng Ying led the Orc army to take down the key cities of Horton Kingdom in a few days.

In less than a week, the entire Horton Kingdom was under control.

There was no more resistance in the kingdom!

It would still take some time for the Horton Kingdom to stabilize completely.

However, this time would be shorter than expected.

That was because the most important of the three laws, the second law, was not ordinary.

### **Chapter 245: Hard cores! Flight ship production line!**

Horton Kingdom's stability speed was faster than Meng Ying had imagined.

The civilians of the Horton Kingdom went crazy as soon as the second rank came out. They even welcomed the orc army!

The nobles were also stabilized quickly.

As long as the interests of these nobles were not damaged, which God they believed in was similar to them.

The main reason that they settled down so quickly was that the Horton Kingdom could no longer fight.

Their god had been defeated, and the army of a million had surrendered. Now, it would be difficult for them to arm several hundred people.

The armor was not endless.

The armors of these nobles were prepared long ago. The price of these armors was very high, and even the nobles would not store too much.

What could they do even if they were armed?

The big fist was always the hard truth.

However, there was still a lot of work to be done.

First, rebuild the Church!

The upper echelons of the Church had been cleaned up.

The Church's bottom layer was still the same method of disposal. Demotion to the rank of a commoner could also reclaim the land.

In the new church, a large number of people were transferred from the Xi Ling Kingdom. Now, the garrison of the Horton Kingdom was also transferred from the Xi Ling Kingdom.

The two hundred thousand orc warriors were also stationed in the Horton Kingdom. They had to wait for the Horton Kingdom to stabilize before they could leave.

The Horton Kingdom would not have its army until it was completely stable.

This was inevitable. The Horton Kingdom was different from the Xi Ling Kingdom, so their treatment was naturally different.

.....

Secondly, the Royal Family of the Horton Kingdom no longer existed, so the Horton Kingdom would be merged into the Xi Ling Kingdom and Luo Ying would become the Queen of the Two Kingdoms.

This was a temporary method.

After a short time, after taking down the Hun River Principality, it would become a small empire!

In short, everything had to be done.

Luo Ying stayed in the Horton Kingdom and presided over the work.

The Eldest Princess protected her.

After Lin Yan distributed the Divine energy of the three Holy Spirits, the Foxy Lady was able to reach eight ranks in a short amount of time,

It shouldn't be a problem to reach the peak of rank eight. After all, the Fox Lady had obtained the legendary Holy Spirit's Divine energy.

She had also obtained an energy ball last time. Otherwise, she would not have reached the seventh rank so quickly!

The other two Elf energy balls, one was divided equally between Luo Ying and Princess Lottie, the other was divided equally between the Dwarf Queen and Mia.

As for the Centaur girl White Spirit, she had already obtained one last time, but she was not a magister. One was already enough, the other one would be a waste.

The Dwarf Queen needed a higher rank to gain a better understanding of the world of magic so that she could craft a more powerful weapon.

Now, Lin Yan's Holy Maiden's strength was as follows:

The Green Spirit of the Foxy Lady was about to rise to the eighth rank, Meng Ying was ninth-ranked, Chen Xi was ninth-ranked, Dwarf Queen was seventh-ranked, Luo Ying was sixth-ranked, Princess Lottie was sixth-ranked, the Winged girl Mia was sixth-ranked, and the Centaur girl White Spirit was sixth-ranked.

His Holy Maiden was at least sixth-ranked!

And when they had completely digested these Divine energy balls, their strength would soar.

Well, the reason why Lin Yan didn't give Meng Ying the Divine energy ball this time was because Lin Yan had given the Divine energy ball of the god's incarnation to Meng Ying.

Deity incarnations naturally had Divine energy balls as well. They could not be compared to the Divine energy balls of the Holy Spirit in terms of quantity, but they were of a higher quality. It was perfect for Meng Ying!

Meng Ying and Qing Ling returned to the City of Miracle.

The two of them wanted to study it and build the flying ship.

The Continent of Gods was too big. If there was a flying ship, it would be very fast to travel. A ship could take many people! Some empires had teleportation arrays, but the number of them was very small. Furthermore, they required profound space magic to create it. That was already an energy that involved the Rule rank.

It needed a Sanctum to put it simply, and it could only be built by touching the rules of space!

Furthermore, the cost of construction and maintenance was high.

The coverage of the teleportation array was too small. It was usually a tool used by the Empire to control important strongholds, and it was not as flexible as a flying ship.

“Queen, I’ll leave it to you.”

The Fox Lady Qing Ling gave the flying ship to the Dwarf Queen Ivy!

The Dwarf Queen Ivy’s eyes lit up when she saw the flying ship.

This was a challenging job!

So, she spent the whole day pouncing on it.

Meanwhile, Meng Ying was studying the magic patterns of the flying ship.

These magic patterns contained a lot of magic principles, which were?a great supplement to Meng Ying’s knowledge.

After all, if Meng Ying wanted to reach the Sanctuary, her knowledge was crucial!

Every Sanctuary was well-read and could be said to learn from the rich.

The reason was simple.

Only with more knowledge could they?better understand this world.

Then, through some superficial knowledge, she could master the mysteries of this world!

That was the rule!

It was said that an eminent scholar with such profound knowledge had come into contact with some Rule Force before becoming a Sanctuary.

Without Legendary-ranked power, if one rashly touched the rules, something would happen!

Did he think that anyone could touch Rule Force?

However, most people didn’t even know what the rules were. They couldn’t understand what they couldn’t touch, so no one could touch it.

Meng Ying and the Dwarf Queen spent a lot of time on the spaceship.

The Dwarf Queen was a master at forging. Even though this was a product of alchemy, she quickly figured out the principle.

“Ho, it’s not that difficult.”

The Dwarf Queen said.

“However, it takes a lot of time to build a ship. According to my estimation, it will take at least a few hundred Dwarves to build it for more than half a year. The drawing of the magic runes will have to be handed over to the lava flame. However, there are no such magic runes in the lava flame?now. Sigh, I have to trouble my God again.”

It looked like a pure little Lori, the Dwarf Queen muttered to herself.

As Lin Yan’s Holy Maiden, no matter how busy she was, she would spend more than an hour praying to Lin Yan every day.

This time, she still prayed.

Not long after she prayed, she received a response from the Lord of Flame.

That was a revelation!

When the Dwarf Queen saw this revelation, her eyes widened.

Because the Lord of Flame’s revelation mentioned something called a “production line”!

To put it simply, the Dwarf Queen could design a large number of specialized machines. These machines were all powered by magic. Each machine was specifically responsible for creating a part of the flying ship, and they could be assembled in the end.

This way, as long as there was an endless supply of materials, they could build a flying ship? quickly.

No, the BUG of the production line was not just that.

More importantly, once the production line was designed, it could even achieve mass production of flying ships!

“This is a great idea!”

After the Dwarf Queen Ivy received Lin Yan’s revelation, her thoughts widened.

It was as if a new world was opening in her mind!

For the Continent of Gods, the design of the production line was simpler than expected.

Moreover, there were electric motors in the City of Miracle, which was excellent motivation.

As for the entire production line, Lin Yan had designed it through virtual godhood and then gave it to the Dwarf Queen Ivy through revelation.

As for the Lava required to draw the magic runes, Lin Yan had already planned it.

Recently, Lin Yan had been burning the Abyss.

To Lin Yan, burning the Abyss was not a technical task.

Therefore, Lin Yan spent some time every day listening to the prayers of the Holy Maidens, and then he used his virtual godhood to find solutions to their problems.

Yes, Lin Yan would occasionally listen to the prayers of other believers. When he was in a good mood, he would even send out miracles.

In the Xi Ling Kingdom and the Yan Nation, there were a few lucky ones who won the lottery. This matter became a popular topic in the region!

### **Chapter 246: Production lines! Mass production flying ship!**

After receiving Lin Yan's revelation, the Dwarf Queen gathered a large number of dwarves and started to build the production line.

At the same time, she also borrowed a large number of sorcerers from Qing Ling.

In the process of manufacturing the production line, many types of equipment had to be possessed.

After enchantment, the wear and tear of this equipment would be even smaller, and they would not rust. They would be easier to use.

Magic would be effective in these aspects.

Many of the products in the City of Miracles were magic technology. This technology had strong adaptability and popularity, and magic could make it more efficient and solve some key problems.

More than 10,000 dwarves were doing this job.

Many of them had great power.

With the efforts of the tens of thousands of dwarves, a large number of parts were created for the production line.

And hundreds of magisters were engaged in enchantment.

The Dwarf Queen Ivy was in charge of everything.

The Fox Lady Qing Ling would occasionally take a look.

"How's the progress, Queen?"

Qing Ling asked.

Many of Lin Yan's Holy Maidens were used to address them.

In the beginning, the Fox lady Qing Ling called the Dwarf Queen Ivy the queen, so it was almost the same now.

The number of dwarves was relatively small, similar to the elves. For example, the kingdom established by the Dwarves was only a few hundred thousand Dwarves.

However, these hundreds of thousands of Dwarves could be considered a kingdom.

They could also consider the king of this kingdom a Queen!

In the Continent of Gods, the Dwarves were naturally not the only place to gather, but hundreds of thousands of Dwarves were a huge number wherever they were.

It was just that the Dwarves had merged with the Yan Nation. Otherwise, Lin Yan's virtual godhood would have another kingdom!

Of course, the results were the same, but there were some differences between the numbers.

Ivy looked at the bustling Dwarves below and said:

“Soon, Holy Maiden. By the way, I still need a special place to produce flying ships. It’s better to be in a remote place, because the area is large, at least 10,000 mu!”

Qing Ling nodded and said, “Leave it to me, I’ll coordinate!”

The production line of the flying ship would naturally be placed in the City of Miracle.

The place was quickly marked out by the Fox Lady Qing Ling.

It was a corner in the north of the City of Miracles.

The city walls there could be moved, just to prevent the City of Miracle from not having enough space to expand.

That was why it had expanded tens of thousands of acres.

The Fox Lady Qing Ling had prepared 30,000 acres of land for Ivy. After the orcs had prepared the land as quickly as possible, under Ivy’s guidance, they began to build production lines.

As for Meng Ying, she also came there and started to set up a large-scale barrier.

Now, there were many barriers in the City of Miracle.

The barrier on the city wall had not been set up yet. Who could reach the city wall now?

The first thing Meng Ying set up was in the Temple.

The Temples were all protected by large barriers.

.

There were several layers of barriers outside the Temple.

The outermost barrier was purely for defense.

Then, there was a warning barrier inside. If a spirit like the Holy Spirit entered the Temple, it would be stopped.

After the barrier was set up, it was impossible to see with the naked eye. Only high-ranked magisters could sense it.

After the barrier in the Temple was set up, the second target to be protected was the Dwarves’ workshop.

These hundreds of thousands of Dwarves were also objects that needed to be protected.

The dwarves were treasures no matter where they put them.

There were few Dwarf craftsmen in the three Human Kingdoms, such as Xi Ling Kingdom, Horton Kingdom, and Hun River Principality.

The dwarves from different regions had very different personalities.

However, they had one thing in common. They were more paranoid, and a large number of dwarves did not like money.

Some Dwarves had lived in the Human Kingdoms for a long time, but that was just a small number.

Now, the production line of the flying ship was also the focus of protection.

These key areas had to be protected from sudden attacks.

The situation in the Yan Nation was special. Other than the opening of the Yan Nation, no humans were allowed to come from the east of the Yan Nation.

It wouldn't be practical for humans and orcs to live together in such a short period, and it would easily cause a lot of problems.

The orcs were unwilling to live with humans.

The scene of all the races being happy and harmonious only existed in fairy tales where even the villains could not die. It was not realistic to mix it forcefully.

Therefore, even if a small empire was established, the Yan Nation would not open its borders, but the economy would not be blocked.

In addition, some of the most devoted believers could also visit the City of Miracle.

The City of Miracles was constantly being perfected, and it was becoming even more beautiful.

In the entire City of Miracle, there was also an enormous amount of magic technology used, and there was even a bus system.

The entire public transport system did not use a car with exhaust fumes, but a magic car.

The structure of the magic vehicle was also very simple. It was powered by magic stones and electric scooters that were filled with electricity and it used magic to construct a fixed running track that made the transportation of the entire City of Miracle especially convenient.

Such a magic vehicle was truly zero pollution and high efficiency.

With the power of magic, even traffic accidents would not happen.

In fact, in the Miracle wasteland, there were many magic vehicles with fixed tracks to haul potatoes.

In the Fox Lady's plan, the Yan Nation was the core of the Lord of Flame Kingdom. Many hard-core products would be born there.

The orcs were relatively simple, and their faith in the Lord of Flame was the highest. It was not as complicated as the hearts of the people, which was why the Yan Nation had to remain relatively closed.

After they built the production line of the flying ship, the production line of the flying ship was almost finished.

Following that, the over 10,000 Dwarves started moving the parts of the production line to the production plant of the flying ship.

The assembly took a lot of time. After all, these dwarves had little experience.

During the assembly, Meng Ying could still be able to help. She enchanted these parts again.

Two days later, all the parts were assembled. Queen Ivy had already prepared the materials and put them in.

This production line was naturally not fully automatic.

It was semi-automatic. It still required the dwarves to control the time and heat, but the efficiency was much faster than manual forging.

It was fast and saved manpower, and it could be mass-produced.

Seeing the parts of a flying ship being produced as quickly as possible, whether it was Qing Ling, Meng Ying, or Ivy, they all smiled.

“At this rate, this production line can build an average of four flying ships a month. If we want to increase production, we need to build a new production line. Now that they are familiar with this process, I don’t need to monitor it.”

The Dwarf Queen Ivy said.

Four ships a month!

That was a terrifying speed!

It would take at least three months for an alchemist workshop to build one, but it was still under the condition of a large amount of manpower!

This production line not only saved manpower but also increased the speed by 12 times!

Qing Ling nodded and said, “The factory here is very large, so it can accommodate ten production lines.”

Ivy said: “However, the manufacturing of our flying ship still needs a lot of minerals, such as iron, copper, secret iron, and some rare earth. If you can, you’d better buy them from the Eternal Night Empire. Although our resource stock is very rich, it can be used as reserves.”

Qing Ling said, “Alright!”

As soon as the production line came out, the Yan Nation could be able to mass-produce the flying ships. Although a production line could only produce four in a month, don’t forget that the production line could continue to increase!

The Dwarf Queen Ivy was preparing to build five production lines of small flying ships, two production lines of medium flying ships, one production line of large flying ships, and two special flying ships, such as those with particularly large load capacity and a large number of people. The larger the flying ship, the more time it would take to produce it. The first production line of the flying ship was about 30 meters long and 10 meters wide.

It wasn’t too small!

Soon after, the Fox Lady Qing Ling was still on the highlands where the Winged people lived. She built a port for the airship. The port was also protected by a barrier, and stationed a thousand soldiers were to guard it.

**Chapter 247: Crossbows! Stable! Trade Order!**

For the sake of the flying ship, the Fox Lady Qing Ling had mobilized more than 100,000 orcs. After working for more than a month, it was finally done!

Although it had been a little hard in the past month, so it was quite significant.

The flying ship was almost a patent of the Empire because there was no alchemical workshop in the Human Kingdom that could build a flying ship.

Alchemist workshops like that were usually set up by alchemists. They were designed to receive orders from some of the top nobles.

The nobles there were not the nobles of the kingdom.

They were nobles of the Empire.

For example, the standard of the great nobility in the Xi Ling kingdom was the count. If the Count was placed in the Empire, it would also be regarded as great nobility, but generally speaking, no count in the Empire was rich.

The sum of the Slow Family's wealth was worth more than 20 million gold coins. They were already in the top ten richest families in the Xi Ling Kingdom.

It couldn't be thought it was less than 20 million gold coins!

According to the standard weight of a gold coin, 10g, this was 200 tons of gold!

Two hundred tons of gold, if they were sold before Lin Yan's teleportation; it would be over fifty billion!

The prices in the two worlds were not the same. Gold coin's purchasing power could not be compared to the gold before Lin Yan's teleportation.

But the price of a flying ship was at least a few million gold coins. Even though the Slow Family could afford it, they might not be willing to buy it.

Although they had spent two million gold coins to build the golden hall, they had to remember that the golden hall was made of gold. The hall was not just for decoration. If the Slow Family ran out of money one day, the gold in the golden hall would be valuable.

And flying ships were purely consumer goods.

He had to spend gold coins to maintain it.

The most important thing was that it was still hard to buy. There were too many orders for the alchemy workshop to build the flying ship, so it was impossible to build it. Naturally, it would not be given to the count of the kingdom!

However, now the Yan Nation had a production line for flying ships, they were able to mass-produce the airships that could only be produced in the Empire. In the future, the Yan Nation's army would be dispatched even faster.

After the establishment of the small empire, with the existence of flying ships, the control over the land would be even stronger.

When expanding to the outside world, it could also play an important role!

Therefore, all of Lin Yan's Holy Maidens felt that it was worth it to be busy for more than a month.

“By the way, Queen, this is a powerful crossbow from the Horton Kingdom. The Horton Kingdom also has a large-scale crossbow that has a range of over three miles. The range of the enchanted crossbow is over six miles. I’ve already obtained the manufacturing process of the crossbow. All the design drawings and technical parameters are here. If you can make it, you can install it on the flying ship—that will allow the flying ship to have some long-range attack ability.”

The Fox Lady Qing Ling handed another blueprint to the Dwarf Queen Ivy.

The Continent of Gods still had many long-range weapons.

They had catapults, crossbows, and magic bows.

And that bed crossbow.

That was a conventional attack weapon. Divine weapons used by some high-ranked magisters would have a wider attack range.

“They enchanted their crossbows by fourth or fifth-ranked magisters, right? After my god’s Lava Flame enchantment, my range is longer than theirs. Well, there’s a problem with the structure of this crossbow, and the materials used aren’t good either. If I change it, I should be able to increase the range by at least two times.”

The Dwarf Queen was a master at forging. She instantly saw the flaws in the crossbow.

“This kind of crossbow must be very heavy. I’m afraid it’ll take at least a fourth-ranked warrior to pull it. We’ll need a bear-man warrior to pull it. It’s too heavy. We need to have some magic patterns to make it possible for a first-ranked warrior to pull it.”

The Dwarf Queen muttered to herself.

She took the map and rushed off. She wanted to redesign the crossbow so that it was not cumbersome and could reach a greater range.

This was the meaning of enchantment.

Naturally, there was more than one magic pattern.

There was an additional shooting range.

It was helpful and allowed them to save energy.

There was an increase in inaccuracy.

In addition, the Horton Kingdom’s crossbow only had penetrative power and did not have any ranged damage.

This kind of crossbow looked ferocious, but in terms of range damage, it was not as good as the third- or fourth-ranked magisters. It could only attack a further target.

But the Yan Nation was different.

They had explosive flames!

When such a crossbow shot out an arrow with explosive flames, the damage would be greater.

With such a crossbow on the bow and side of the ship, the ship would have a very good long-range attack!

After being modified by the Dwarf Queen, the range of the crossbow was at least six to seven kilometers. If they fired it from the top to the bottom, the range would be greater. For the crossbow with the Burst Flame, as long as they could get the opponent, the Burst Flame would have the greatest effect.

Princess Lottie of the Cat Clan had been following the Dwarf Queen recently. This little cat-eared girl was about to become Ivy's assistant. However, Lottie's research direction was different. What she studied was not the process of manufacturing, but the principle of manufacturing, which was something deeper.

Mia, the young girl of the Winged Warriors, trained more Winged warriors so that these Winged warriors could have extraordinary combat power.

In short, Lin Yan's Holy Maidens were all busy.

After more than a month, the Horton Kingdom was already rapidly stabilizing.

The civilians received the benefit of the reclamation order and welcomed the new regime.

The beliefs of the commoners also rocketed.

In the eyes of these commoners, Lord of Flame had killed their original God, which meant that Lord of Flame was stronger than their God!

Especially the civilians who went to the battlefield to watch the battle, all of them had witnessed personally the scene of the monstrous flames burning their gods to death. The power of the Lord of Flame had already left them with an impression that they would never forget. Believing in the Lord of Flame was logical for these civilians who watched the battle!

As for ordinary civilians, although they believed in that God in the past, they would not foolishly take revenge after their God died.

Not to mention that now that they believed in the Lord of Flame, their lives were much better than before!

Each of these commoners could cultivate ten acres of land, and they could even get the seeds of the Divine beans from the Church. After planting these ten acres of land with the Divine beans, it was enough for these commoners to sell some of the Divine beans in exchange for money.

For them, that was a good life that they had never dreamed of before.

With their land, they could eat their fill, and without the war, these civilians were satisfied.

Their willingness was very simple.

As for the nobles, they also stabilized quickly.

The trade order had benefited them greatly.

There were also some restless nobles.

For example, some nobles had opinions about the reclamation order and wanted to reclaim more land, so they deliberately reclaimed more land and even robbed some commoners.

Some of the nobles were secretly plotting something.

However, these restless nobles were wiped out quickly by Luo Ying's orc army!

Luo Ying's methods were very tough.

She had already given these nobles enough benefits.

Once there were nobles who wanted more or deliberately caused trouble, what awaited these nobles were the iron hooves of the centaur warriors!

The centaur soldiers would not be lenient when they attacked.

After they wiped three nobles out in succession, the nobles of the Horton Kingdom finally settled down.

No one dared to jump again.

The nobles finally understood that they were not qualified to negotiate.

Then, Luo Ying held a meeting in the capital of the Horton Kingdom.

All the nobles of the Horton Kingdom were asked to attend this meeting.

"The Lord of Flame treats all people equally who believe in him. You can also obtain a large amount of wealth through trade like the nobles of the Xi Ling Kingdom, but on the premise that you contribute your faith to my Lord and obey our rule, we are about to open a trade channel with the Eternal Night Empire. Each of you can take part in the trade with the Eternal Night Empire!"

Luo Ying announced this important piece of news.

This was the original plan.

Nobles were a double-edged sword. The key was how to use them.

If someone used it, it would prosper a kingdom.

The nobles of the Xi Ling Kingdom had already taken part in the trade with the Hun River Principality and had benefited a lot.

When the nobles benefited, most of the coins were spat out.

After the commoners of the Xi Ling Kingdom had cleared their land and taken part in the kingdom's construction, they could also receive gold coins as a reward.

Gold coins were moving around like this.

But it was everyone who benefited.

Royal Family, nobles, civilians.

This was the economy!

Flowing was called the economy. A pool of stagnant water was called a dead end.

It was not bad for the nobles to trade. They had a large number of people, and they had the strength to trade internationally.

Therefore, according to the plans made by Lin Yan and the other Holy Maidens, the nobles of the Horton Kingdom would be mobilized to trade with the Eternal Night Empire.

At this stage, the main thing exported to the Eternal Night Empire was still potatoes!

The Eternal Night Empire had a large area, a large population, and a large amount of grain production. However, there would still be a large market for potatoes because they were cheap.

Other than that, the milk, horses, diamonds, sorghum wine, and some of the special products of the forest were also the primary products of the trade.

As for the items they wanted to buy from the Eternal Night Empire, they were mainly all kinds of ores, resources, and magic items.

In this meeting, Luo Ying drew a pie for the nobles.

This was a carrot and a stick.

The nobles rushed back to prepare the caravan.

“Aunt, the situation in the Horton Kingdom has stabilized generally. I’m already at the seventh rank, so there won’t be too much danger. Go to the four provinces of the Eternal Night Empire to get the business order.”

Princess Luo Ying said to the Eldest Princess.

The Eldest Princess nodded and left the Horton Kingdom the next day. She wanted to return to the Royal City to prepare a large amount of information before going to the Eternal Night Empire to obtain a trade order.

And Princess Luo Ying would continue to guard the Horton Kingdom for a while!

She, who was already seven ranked, could no longer be found in the Horton Kingdom to threaten her!

Crossbow Encyclopedia: There was a three-bow crossbow in the Song Dynasty. It had a range of 1500 meters. Only 30 people could pull it. The power of the arrow was astonishing. It was quite powerful!

## **Chapter 248: Gulf Banshees! The Holy Flame Forest was shaped!**

While Lin Yan’s Holy Maidens stabilized the Horton Kingdom, the cultivation of Holy Flame Forest continued in the north.

More than a month had passed since the Skeleton monster’s massive attack.

In the past month or so, due to the threat of Skeleton monsters being removed, the Elves had used the method of clearing the border first. The speed of clearing the border had become extremely fast.

There were not only forests in the Dark Forest, there were rivers.

There were many rivers and even lakes in the Dark Forest.

There were dark creatures in these rivers and lakes, but under the banishment of the Holy Light, all the dark creatures in the water were banished.

Holy Flames could burn deep into the water!

There was no need to worry about the dark creatures coming from the rivers in the west because the rivers in the dark forest were formed from the Rocky Mountains.

The terrain of the entire Dark Forest was high in the south and low in the north.

There?the east and low in the west.

.

There?was another river that flowed from?the Rocky Forest to the Holy Flame Forest that the Elves had just cleared. It flowed for thousands of kilometers before turning a corner and heading north.

To the north, it was the endless sea.

....

At the westernmost boundary of the Holy Flame Forest, Lomina, Chen Xi, and two other seventh-ranked?Elves were setting up barriers.

The function of this barrier was quite simple. It only had the effect of preventing the dark matter from spreading, so it was arranged very quickly.

Although only Lomina and Chen Xi could set up the barrier, the other two seventh-ranked Elves could do some basic work to make them more efficient.

“Chen Xi, how far are we to the north?”

On the boundary line, Lomina asked.

Chen Xi said, “It should be at least three thousand kilometers long. We should be able to reclaim a few hundred kilometers to the north. Let’s stop. Two thousand kilometers wide and several hundred kilometers long should be enough for us to use.”

Lomina nodded and said, “Well!”

“Queen, there’s a situation in the north. We see the sea!”

At this moment, a Winged Elf flew over to report.

Right now, the Winged Elves were not in charge of reclamation but were in charge of guarding the sky.

In fact, in the past month or so, another Winged Elf Tribe joined the Holy Flame Forest.

This Winged Elf Tribe came from the other forests of the Continent of Gods. They originally lived in a hidden forest, but this forest was at risk of being exposed at any time.

After receiving the invitation letter sent by Chen Xi through the Elves’ special methods, the Winged Elf Tribe first sent a few people to check the situation from the sky.

That was a month ago.

When they saw how quickly the Holy Flame Forest was being reclaimed, the Winged Elves who came to explore the forest were even more shocked than the Elves who joined them!

The Winged Elves who explored the way reported the situation one after another with magic letters. The Winged Elves Tribe, with only two or three thousand people, immediately dispatched the entire family and spent nearly 20 days before flying to the Holy Flame Forest.

They had traveled through many Human Kingdoms.

The long-distance flight speed of the Winged Elves was not particularly fast, but with the rest of time in one day, how could they fly more than a thousand kilometers? It was a good example of how big the Continent of Gods was!

The Winged Elves behind also joined the guard.

There were many Winged Elves in the north and west, and some powerful Winged Elves would fly to the north!

“Let’s go take a look.”

Lomina and Chen Xi flew into the sky at the same time, following the Winged Elf to the north.

After a short time, they arrived near the line of reclamation of the Elves.

Further north, it still looked like an endless dark forest.

However, Lomina and Chen Xi flew about two hundred kilometers north before they saw a vast sea.

“Huh, why are we reaching the sea so quickly?”

Lomina exclaimed.

“Someone flew to the north of the Rocky Forest. There is no sea two thousand kilometers north of the Rocky Forest.”

Lomina added. She was puzzled about that.

But as the distance got closer and closer, Lomina understood the reason.

This should be an enormous bay!

This bay was huge.

It had to be known that this place was more than two thousand kilometers to the west of the Rocky Forest.

The sea then bulged from the north of the Rocky Forest to the Dark Forest!

It formed a huge bay.

And the location where Lomina and Chen Xi were currently was at the top of the ocean.

If one did not look at it from the perspective of the sea and the perspective of the land, one could see that a large part of the complete land was sunken!

The area that had sunk was several thousand kilometers.

This bay was indeed a super gulf of the sea!

“Mother, look.”

Chen Xi reached out her hand and pointed at the area near the sea.

There were cliffs!

On the sea, there were a large number of towering stone pillars!

The dark matter in the Dark Forest did not extend to the sea.

Even if they wanted to extend, they could not. The wind of the sea continued to rush towards the Dark Forest. The aura of the sea collided with the dark matter, reaching a perfect balance outside the Dark Forest.

Therefore, the Dark Forest was perfectly separated from the sea.

On the cliff outside, there were a large number of caves. In these caves, there were many creatures with wings that looked naked, but in fact, there were important parts that were hiding.

These creatures would fly into the sea from time to time. They could be able to fish out a large number of fish with just a small grab.

### **Chapter 249: Gulf Banshees! The Holy Flame Forest was shaped!**

Some creatures would fly to the edge of the Dark Forest to collect dark matter.

Chen Xi asked.

Because those creatures looked like human beings, but they were different from human beings.

The biggest difference was that their bodies exuded a strange aura.

If they listened carefully, they could hear some very nice songs in the sea breeze.

These songs were not spoken in the common language. There was a mysterious feeling in one's ears. It was mysterious and strange, but it was also quite wonderful. When one heard it, one could not help but listen to it.

However, if the people who heard these songs weren't powerful Elves, but ordinary humans, the moment these ordinary humans heard these songs, they would be lost!

This kind of ecstasy was even more terrifying than being hit by an illusion, and it was even harder to escape.

“This is the banshee.”

Lomina looked at the creatures that looked like Winged humans.

“The banshees live on the sea. There aren't many of them. There are also some banshees in the huge inner seas of the Continent of Gods. They are the nightmare of passing ships. I didn't expect there to be so many banshees here.”

Lomina added.

“So this is the female demon!”

It was not that Chen Xi had never heard of the banshee, but she had never seen it before.

Lomina’s experience was much greater.

During her twenty years in the underground city, she had studied many creatures on the Continent of Gods, Abyssal creatures, and even some dark creatures.

To find a way out of the curse, Lomina could read enough books to fill a study room!

Lomina nodded and said, “The banshees aren’t dark creatures. They shouldn’t be coming to the Dark Forest. They shouldn’t be too aggressive towards the Elves, but to avoid the other creatures from the sea from rushing over, tell them to leave a 200 km area to buffer them. If they need to come into contact with the sea in the future, just open a tunnel.”

Chen Xi said, “Okay!”

After saying that, she had the Winged Elves beside her send a message to the Elves who were cultivating, telling them to stop cultivating north.

On the other side of the channel, the banshee on the cliff also noticed them.

A few banshees flapped their wings and flew into the sky.

“Let’s go, let’s go.”

Lomina said.

The two girls flew towards the female demon.

As the distance got closer, Chen Xi saw more details.

For example, these banshees were all female, not a single male.

Perhaps it was because they had lived in the sea for a long time. Their skin was very white.

It wasn’t only white, but it also looked rather delicate.

In addition, their bodies were generally very good, especially their long legs, which were perfectly straight and almost devoid of fat.

This was probably related to the way they flew.

When they were flying, they liked to fly along with the wind. After years of flying, their bodies were naturally made perfect by the wind.

However, they were evil creatures on the Continent of Gods.

Especially in the huge inner seas of the Continent of Gods.

They had very few clothes on them, but the important parts were covered very well.

The clothes they were wearing were not ordinary fabrics, just like the Elves. They were made from ingredients extracted from plants by magic.

Perhaps it was because their skin was too white, and the dark forest beneath them made them look strange.

“Everyone!”

A banshee saw Lomina and spoke.

The language she used was quite special.

However, Lomina used this language.

As the two of them spoke, she started chatting.

Chen Xi listened quietly as she tried to decipher the language.

For Chen Xi, this was not difficult to accomplish.

She could analyze the other person’s pronunciation, mouth shape, expression, and changes in airflow for every word they spoke.

A powerful Elf was in a completely unfamiliar environment. Without any contact with the other party’s language, it would only take a few days to understand the other party’s language.

This was one of the reasons why the Night Elves could survive underground.

“Let’s go, Chen Xi.”

Lomina chatted with the witch for a while before she spoke to Chen Xi.

The opponent also flew down.

“What is she saying?”

Chen Xi asked.

Lomina said, “They aren’t interested in the other side. They hope to coexist peacefully with us and not interfere with each other.”

Chen Xi nodded, looking pleased. “Yes, that’s what we want.”

Lomina said, “Well, let’s first fix the barrier to the north.”

By the time they flew back, the Elves had stopped cultivating north and started to cultivate from west to east.

The north was about 200 kilometers away from the coast. Although the banshees did not have any malicious intent, it was hard to guarantee that there would be some creatures on the sea.

Therefore, it was better to keep this Dark Forest.

Ordinary beings of the Continent of Gods would not want to enter the Dark Forest, be it on land or in the sea.

It was just a buffer.

And then, the boundary to the west had been set.

The northern boundary had also been set.

The boundary to the east had long been determined.

The Holy Flame Forest was more than a thousand kilometers north of the Rocky Forest. In other words, to the north of the Rocky Forest, there was a large Dark Forest.

Chen Xi could also choose to reclaim land to the east and reclaim the area to the north of the Rocky Forest. However, the Holy Flame Forest would have an irregular shape.

Chen Xi was not prepared to do that.

The eastern boundary would be a straight line.

This was more conducive to defense.

At this point, the entire Holy Flame Forest had already taken shape.

It was a rectangle that was 2,300 kilometers wide from east to west and 3,100 kilometers long from north to south.

### **Chapter 250: Successes! Divine Dew! Elven Goddess!**

The total area of the Holy Flame Forest finally stopped at 7.13 million square kilometers.

Chen Xi would create a new Elven empire in this forest!

This area was incomparable to the size of the human empire on the Continent of Gods.

Even the small empire that Qing Ling and Meng Ying were about to open could not compare.

The size of the Elven Empire was not big.

The area of the Rocky Empire was smaller, only half the size of the Holy Flame Forest.

Although the relative area was not large, after thinking about it, the absolute area was not small!

Such a large area, it was all forest!

Seven million square kilometers of the forest!

This was a huge forest!

There were even more dark forests to the west. The endless Dark Forest was not something to be trifled with!

In other words, if the Holy Flame Forest was not enough in the future, it could expand to the west.

However, the more it expanded to the west, the more dangerous it was. This required the Elven race's strength to rise. It could only be realized after the emergence of powerhouses!

.....

According to Chen Xi's estimation, this forest should be able to hold two million Elves!

Once the number of Elves in the Holy Flame Forest reached two million, plus the million Elves in the Rocky Forest, the northern area of the Rocky Mountains would have more than half of the Elves in the Continent of Gods.

The number of Elves was just that small, even less than the orcs!

Unlike humans, there were tens of millions of people in any kingdom. The number of people in an empire was hundreds of millions, and the number of humans in a slightly larger empire was even more terrifying.

After the boundary was finalized, the speed of reclamation became faster.

On that day, another Elven Tribe that was relatively close came to the north of the Rocky Mountains through the underground passage and joined in the cultivation.

This was also an Elven Tribe that had moved over after Chen Xi's invitation.

This Elf Tribe had more than 30,000 Elves, and their strength could be considered powerful.

When they joined, the speed of reclamation increased a lot.

However, the Continent of Gods was too big, and the migration of Elves was not as simple as that.

When the Rocky Forest was being reclaimed, it lasted for several decades. Every few years, an Elf Tribe would join.

The biggest problem was still the traffic.

The Elven Tribes that were familiar with the underground could choose to walk underground, much safer.

If it was an Elf Tribe that was unfamiliar with the underground, they would have to venture through the Human Kingdom.

To avoid attracting the attention of humans, they would split into small groups, rest during the day, and travel at night.

The plant coverage in the Continent of Gods was generally high. There were still many forests in the Human Kingdoms, and they were connected in pieces. This gave them a chance, but once they were discovered, it was still more dangerous.

And the entire migration would take a long time.

For an Elf Tribe with tens of thousands of people, if they were to migrate in batches, it would take a few months for the ones that were near to migrate, and many years for those that were far away.

However, thousands of years ago, to reach the Rocky Forest, quite many Elves had traveled thousands of miles, even a million miles, regardless of the hardships!

This was also the reason why Chen Xi had prayed to seal the Rocky Mountain Range.

To the north of the Rocky Mountains was a rare pure land for the Elves. They could not allow the war to spread!

When the Night Elves migrated, they were not familiar with the underground situation. They had no choice but to walk from the ground. They had spent many years, and they knew that it was difficult!

It was precisely because of that they had to protect this pure land!

.....

"Mother, my God has just revealed to me that my God is producing a large flying ship that can hold many people in the south. When that kind of flying ship is produced in large numbers, we can use it to help other Elven tribes migrate!"

On that day, after Chen Xi's daily prayer, she said to Lomina with joy.

Lomina was also very happy to hear this news!

The biggest problem with the migration of the Elves was transportation.

Walking from the ground was quite dangerous.

But walking from the sky was safer.

Although a seventh-ranked Magister and an eighth-ranked Knight could fly.

But no one would fly into the sky.

Even if there was a flying ship, there would still be strong people on board!

“Now that the border has been set, there are still some areas in the middle that haven’t been cleared. The Winged Elves have already seen it. There aren’t many skull monsters in the middle, and there’s also not too much danger. Let them open up the front lines and quickly clear the area.”

Lomina suggested.

Chen Xi nodded and said, “Mother, I sent a message to the other Elven tribes through the tree of life seeds and told them not to migrate for now. When the number of flying ships in the Southern Divine Kingdom is high, we will come back to pick them up.”

Lomina said, “Well!”

The Tree of Life Seed was very rare, and every Elf Tribe only had one.

The Night Elves’ Tree of Life seed was a seed formed when the Tree of Life shrunk the essence in its body.

There were Green-Elves, Wind Elves, and Winged Elves with such seeds.

After the formation of the Holy Flame Forest, when they were planting the Tree of Life, these seeds could be combined, and they could grow together into a giant Tree of Life.

Of course, they could also keep their Tree of Life seeds and plant them in their respective tribes.

There was a rumor that there was only one Tree of Life on the Continent of Gods. It could be separated or gathered!

Even the Elves did not know if this rumor was true.

The Elven Tribe with the Tree of Life could communicate through the Tree of Life no matter how far away they were.

Positioning was fine, but the other Elven Tribe was willing.

This was the reason why Chen Xi was able to extend invitations to other distant Elven tribes.

As for the Elven tribes around the Rocky Forest, the reason she had come here was to show her sincerity!

.....

With the revelation of the Lord of Flame, the migration of the Elven tribes was resolved.

Then, the Elves changed their conservative cultivation methods.

They chose a single line of cultivation.

In this cultivation mode, the speed was not too fast!

Three hundred thousand Elves. There were only two Elves every 100 meters.

One Elf was responsible for the ground, while the other was responsible for the trees.

They formed a line of thousands of kilometers and advanced from north to south.

Every day, they could advance hundreds of kilometers.

Under this cultivation mode, in less than half a month, the dark areas in the middle of the Holy Flame Forest were eliminated.

Then, the Elves continued to fill in the gaps and walked through the remaining dark substance areas once again!

At that point, in less than four months, such a large Dark Forest was completely lit up!

From the Dark Forest to the Holy Flame Forest!

The sun shone down.
