

Flames 351

Chapter: 351: Silk and Porcelain created a sensation!

The noble housekeeper's words instantly aroused doubts in the surroundings.

"Is it true? A hundred thousand gold coins for a foot of this cloth, is this cloth made of gold?"

A commoner exclaimed.

A commoner's clothes were usually only four to six feet long. Some differences were depending on whether it was male, female, or body size, but it was roughly within this range.

Even in the Eternal Night Empire, the commoners only had a few tens of silver coins for each piece of thin clothing. The thick clothes for the winter only had a few gold coins for each piece. These thick clothes were usually worn for a long time, several years, or even more.

And silk was a very thin cloth at first glance.

Based on the clothes of the commoners, the cloth used for their clothes would not exceed 10 silver coins per foot.

100 silver coins were equal to only one gold coin.

But now, this noble housekeeper said that a foot was worth 100,000 gold coins!

Heavens!

Wouldn't a piece of clothing cost several hundred thousand gold coins?

No, there was also the processing fee.

The more expensive the fabric, the more expensive the processing cost.

No one needs to think to know that a piece of clothing made from this kind of silk would cost... millions of gold coins.

Some civilians felt suffocated when they thought of this number.

Heavens!

One million gold coins for a piece of clothing.

It was still very thin cloth!

These civilians did not dare to imagine it!

Subconsciously, they couldn't believe it!

—A million gold coins, which was 10 tons of gold, a total of 20,000 pounds!

Heavens!

"Even if this cloth was made of gold, it wouldn't be worth that much."

A commoner muttered.

“Look at the signs on those carriages. It looks like they’re the sign of the Great Laurent Family. This convoy belongs to the Great Laurent Family. Duke Laurent shouldn’t be lying, right? This kind of silk is Otherwise, Duke Laurent wouldn’t have dared to give it to the Emperor!”

At this moment, a small noble recognized the nobleman with silk on the carriage.

“It’s Duke Laurent. I remember. A while ago, I heard a count show off saying that he spent a million gold coins to buy a priceless piece of clothing. Could it be silk?”

Another noble recalled.

“I wonder if Duke Laurent’s daughter, Miss Annie, who is known as the most dazzling pearl in the Eastern Six Provinces, has come.”

After a noble and learned of Duke Laurent, the topic immediately changed.

There were two types of dukes in the Eternal Night Empire. One was a duke within the Eternal Night Empire who had not been conferred a title of the kingdom but also had a vast territory. Duke Laurent was such a duke. The other was the dukes of the Human Kingdom around the Eternal Night Empire. These dukes were the masters of a kingdom and enjoyed a kingdom alone.

“I also want to know that Duke Laurent is willing to give up. He pulled a whole truckload of silk with a foot of 100,000 gold coins.”

“That’s right, that’s right. I don’t know where this silk is made from, but it’s so expensive. It’s unbelievable.”

The onlookers immediately started discussing.

It didn’t take long for the crowd on the streets to find out that Duke Laurent had brought a cloth called silk to the emperor. It was a hundred thousand gold coins afoot!

Not long after, this news spread throughout the entire capital city and even the Eternal Night Empire.

In the Eternal Night Empire, the items pursued by the nobles would drive countless small and medium-sized nobles crazy.

That was why Duke Laurent’s display of silk had spread throughout the empire as quickly as possible after the emperor’s millennium birthday, attracting the attention of countless nobles.

From now on, the way the nobles compared was not more than who wore gold and silver jewelry, but who could wear a silk dress!

A large number of nobles holding large amounts of gold coins wanted to buy a few feet of silk.

Of course, this was later.

“Duke Laurent has made a big splash this time. I’ve long heard that a type of silk has appeared in the three provinces in the east. Not only is it beautiful, but it also has a

magical affinity effect on it. It's even more expensive than all of our fabrics. Unfortunately, I'm too late. I didn't buy it even twice the price."

The other duke felt a little jealous when he saw Grand Duke Laurent's reputation for a bunch of silk.

The duke's words revealed some information.

After the silk had arrived in this world, quite a several changes had taken place.

This was a world of magic.

Magic elements were everywhere.

The silk was not mixed with any artificial elements. It was a bit similar to the cloth made from the substances extracted from plants by the elves and had a good magical affinity.

It was exceptionally comfortable to wear.

This made silk more popular in this world.

Especially some nobles who were sorcerers.

In this world, nobles were noble.

Magisters were even nobler.

Things that were both sought after naturally attracted the attention of others!

Although most people simply couldn't afford it.

However, they did not need to be able to afford it.

All they needed to know was that this was a very expensive item, and the noble's vanity could be satisfied.

The Duke said:

"However, although there is no silk but I have another thing. Housekeeper, tell someone to open the carriage. We can't let Duke Laurent take all the limelight by himself."

"Yes, my Lord!"

Under the orders of the butler, a few soldiers began to remove the cloth from the carriage.

"Hey, that's Duke Victor's convoy. Look, Duke Victor's carriage is about to be uncovered. Let's see what kind of treasure Duke Victor will give this time!"

Some commoners saw the movements of the soldiers and looked over.

Then, they saw that after the cover was opened, what was placed on the carriage was neither gold jewelry nor silk.

It was bowls, plates, and other dishes.

, why did Duke Victor give the tableware to His Majesty? What kind of tableware is this? It looks so beautiful.”

A commoner was surprised.

Soon, he knew that there was more than tableware on the carriage.

There were vases, cups, and other utensils.

These things all had a common characteristic.

It was white, very white, and there were exquisite flowers on it. These flowers looked particularly bright, making these tools look exceptionally exquisite!

It was likely that the tools made of gold were not as exquisite as these tools!

“Porcelain! This is a kind of Porcelain from the three eastern provinces. It’s said that a set of tableware made of Porcelain is worth hundreds of thousands of gold coins, and it might not even be able to be bought. I’ve only heard of Porcelain, but I’ve never seen it before. I didn’t expect it to be so beautiful. I won’t be able to do it. When I get back, I’ll send someone to the eastern provinces to buy them even for a million gold coins!”

A middle-class noble shouted.

Porcelain!

This word was quite unfamiliar to the people from the Imperial City of the Eternal Night Empire.

But soon, the word was no longer unfamiliar. It became a word that the nobles kept muttering to themselves.

Every noble would dream of a set of Porcelain cutlery!

The beauty of Porcelain was visible.

The fetus was as thin as paper, transparent and dense. There were flower patterns in full bloom on it or lifelike divine bird patterns. It looked so exquisite!

Eating with this kind of Porcelain was probably more fragrant than using a bowl made of gold!

All of a sudden, countless people turned their gazes over.

Compared to silk, Porcelain was cheaper, but it was also an absolute luxury.

It was something only nobles could enjoy.

Of course, in the City of Miracles, Porcelain was more common.

But on the side of the Eternal Night Empire, this complete set of Porcelain was definitely out of print.

No one knew how much Duke Victor had spent to collect this set of Porcelain!

On the other hand, Duke Laurent did not mind.

But the things that the two dukes had brought out had opened the eyes of all the surrounding nobles.

The other Dukes, who still gave them gold jewelry were a lot more valuable but compared to the two of them, they were instantly reduced by a level.

If Lin Yan were to use the words of the world before he transmigrated, this would be called force!

Sending silk porcelain, it was instantly different.

It had nothing to do with value or price!

The other dukes continued to display the gold and jewels on their carriages.

However, regardless of whether it was the commoners or the nobles, although they were still looking, they were already talking about silk and porcelain.

Many nobles were asking how they could obtain these two items.

It could be said that silk and porcelain had already made a big splash in the Eternal Night Empire and caused a stir!

“Queen, the capital of the Eternal Night Empire has arrived.”

.

On the flying ship, the Eldest Princess pointed at a huge city.

Meng Ying nodded.

After flying for a day and a half they finally arrived at the Imperial City of the Eternal Night Empire!

Chapter 352: Flame Empire appeared! A huge fleet!

The Capital city of the Eternal Night Empire had been grounded for some time.

In other words, all flying ships, magisters, and Sky Knights were prohibited from flying.

This prohibition was not only reflected in the law.

There was another aspect to this, which was that the Sanctuary of the Eternal Night Empire had set up an air barrier above the Imperial City.

Without the legend, even if they wanted to fly, they could not fly.

This was also the reason why so many nobles, including Duke-ranked nobles, chose to transfer their carriages outside the city.

These fleets were not brought by the big nobles themselves.

It was prepared by the Royal Family for the nobles.

Every noble could commandeer those convoys.

The nobles would choose to send their gifts to the Imperial City, and they would follow!

In any case, these carriages belonged to the Royal Family, so the nobles did not need to worry about them after the gifts were transported to the place.

Even in a large empire like the Eternal Night Empire, legendary existences weren't cabbages.

There were only one or two Dukes with Legendary-ranked powerhouses.

These Dukes were all from the Eternal Night Emperor.

They used the Holy Magic Academy in the Eternal Night Empire to build a legendary descendant.

However, most Duke Factions did not have Legendary-ranked existences.

From a certain point of view, the Duke of the Eternal Night Empire might not be inferior to the Kings of the kingdoms around the Eternal Night Empire.

After the kingdom was sealed, they had an independent kingdom, but everything depended on them. The Eternal Night Empire would not provide much help at all.

The advantage was that he had a kingdom that belonged to him. This kingdom was much larger than the territory of the Duke of the Eternal Night Empire. In that kingdom, he was everything!

The Duke of the Eternal Night Empire enjoyed a lot of resources and could keep up with the overall situation.

In the eyes of the Duke of the Eternal Night Empire, the Duke of the surrounding kingdom was an "earth buns".

Although there was a forbidden air barrier, a Legendary-ranked flying ship could fly directly into the city after this legendary-ranked existence opened the way with magic.

However, the other airships could not bring them into the city.

"Queen, let's head into the city to rest. Hearst will be in charge of sending the congratulatory gifts into the city. No one here dares to snatch the gifts."

The Eldest Princess suggested.

Meng Ying nodded.

Hurst, the Dwarf giantess.

Not only was she tough-looking, but her name was also the name of a man.

She was originally the leader of the Temple Knights, but this time, Meng Ying brought her over to lead the entire Queen's Guard.

Hurst had the strength of an eighth rank. With her around, most people wouldn't be able to come up with a congratulatory gift.

Moreover, this was the capital of the Eternal Night Empire, and it was the emperor's millennium birthday recently. Almost no one dared to stir up trouble.

The Eldest Princess gave Hearst a few instructions. The Dwarf Giant nodded and led the flying ship to a special port to unload the cargo. She then rented the Royal fleet and sent the congratulatory gift to the city.

Meng Ying and the Eldest Princess were left on a flying ship and flew directly into the Imperial City.

On this flying ship, there were only 100 members of the Queen's Honor Guard.

The Queen's Guards followed the convoy.

As a Sanctuary, the reason Meng Ying had the Queen's Guard was all she needed.

The airship flew directly into the sky above the Imperial City of the Eternal Night Empire. Although it could fly, its speed slowed considerably.

On the wide streets, the nobles were still showing off their wealth.

Duke Laurent, who had silk, and Duke Victor, who had porcelain, had already arrived.

Behind them, nobles of all sizes were still showing their congratulatory gifts.

Although they weren't as shocking as silk and porcelain, the sight of gold and silver still aroused the attention of many people, resulting in endless discussions.

At this moment, a huge convoy entered the city.

"Look, it's Duke Phoebe. Duke Phoebe is the king of the Fick Kingdom. A few years ago, he defeated Duke Richard and each of his two kingdoms. He is the wealthiest Duke of all the kingdoms. I wonder what gift the Grand Duke Phoebe will give to the Emperor."

At this moment, some nobles recognized Duke Phoebe.

Duke Phoebe was one of the most famous dukes in the empire in recent years. He was also the King of a kingdom to the north of the Eternal Night Empire.

The reason why he was in the limelight was that Duke Phoebe had defeated another kingdom a few years ago. Each of them had two kingdoms.

Duke Richard, the defeated King of the kingdom, escaped back to the Eternal Night Empire and brought the news back.

Duke Phoebe's convoy soon entered the city.

"Remove the cloth."

The butler gave the order.

As the Duke with the most famous in recent years, Duke Phoebe naturally wanted to use this opportunity to show his strength.

Soon, the carriage opened.

A large number of commoners and nobles looked over.

After that, they saw that in the long convoy, some carriages were filled with a large amount of gold and some with a large amount of silver. Nine carriages were filled with gold, silver, and jewelry.

But on the last carriage, there was only one thing.

It was a crystal clear stone!

If the orcs of Yan Province were here, they would recognize this thing.

Diamond!

The diamonds of the Continent of Gods were stronger in hardness than the ones before Lin Yan transmigrated.

Moreover, the diamonds here, after fusing with the magical elements everywhere, showed a strange feeling.

It was the most thorough, but from a different perspective, it seemed that there was a strange brilliance inside.

It could be called a magic diamond!

Magic Diamond!

The diamonds of the Continent of Gods were quite useful to magisters.

However, the nobles preferred to use it as an ornament.

“Wow, what is that?”

When a noble saw that there was only one diamond on the carriage, he could not help but exclaim.

When some women saw the diamond, their eyes immediately lit up.

“This is a diamond, a rather rare treasure. It’s said to come from a kingdom to the east of the Eternal Night Empire. This diamond is priceless. Duke Phobie spent several million gold coins to buy this diamond!”

Next to the carriage, the butler in luxurious clothes was introduced.

“It’s said that in the Eastern Kingdom of the Eternal Night Empire, there’s a very popular saying. It’s a diamond that lasts forever!”

The butler recalled the slogan of the Flame Empire Diamond.

A diamond will last forever!

These words caused the eyes of many women in the crowd to shine.

At this moment, a voice came in.

Flying ship!

These words caused the surrounding people to raise their heads.

Chapter 353: Flame Empire appeared! A huge fleet!

Then, they saw an exquisite flying ship flying over a hundred meters above the ground, led by a flying magical beast squad.

Due to the lack of visibility, they could not see anything on the flying ship.

However, on the hull and sails of the flame ship, the fiery red flame symbol was visible!

“The imperial capital is indeed empty, but it’s said that powerhouses can fly, and they can also fly with a flying ship.” A noble said.

“Wow, legendary powerhouse, so this flying ship belongs to a legendary powerhouse?”

A commoner exclaimed.

Legend had it that elite warriors were rarely seen.

Even in the Imperial City of the Eternal Night Empire.

Another problem was that a seventh-ranked Magister could fly.

Normally, the Imperial City of the Eternal Night Empire was not locked in the air. Magisters were flying in the sky from time to time, and there were even Sky Knights flying. Who knew who among these magisters was a legendary-ranked powerhouse?

But recently, the ones who could fly in the sky were legendary or even higher. But no one in Sanctuary dared to think about it.

“Flame symbol; is there any legendary powerhouse that uses this symbol?” Another noble asked.

“I’m not sure.”

Many people became curious.

The arrival of a legendary powerhouse instantly attracted the attention of the people on the street. Even some noble families stopped showing off their wealth. They all looked up at the sky, guessing the origin of the flying ship.

The flying ship was fast.

Not long after, the flying ship passed by and disappeared in front of them.

The fluctuation caused by the flying ship slowly subsided.

On the long streets, the nobles continued to display their wealth.

Even some of the nobles who liked to keep a low profile and were more reserved would come to the Imperial City and choose to uncover their carriage.

Everyone did it. If you didn’t do it alone, wouldn’t it seem like you couldn’t get in?

It wasn’t something to hide.

This time, the people invited were at least nobles above the Earl class.

Nobles above the Earl, even those with a weird temper, would not make themselves seem unsociable.

The nobles who didn’t fit in were basically all down-and-out nobles. After down and out, they wouldn’t fit in even if they wanted to!

Phoebe's convoy walked by, causing quite a stir.

At this moment, the team led by the female Dwarf Giant Hearst finally entered the Imperial City.

A total of forty carriages were loaded on the four small flying ships.

This fleet was also the largest.

There were many types of gifts that Meng Ying had given this time. The reason why she had given so many gifts was that she wanted to take this opportunity to open up completely the market of the Eternal Night Empire!

Ordinary Earl usually had three to five carriages.

After all, the gift to the Emperor, if there were no treasures, then only gold and silver could be used.

And it was not direct gold, but more expensive silver and gold. The price of silver and gold was much more expensive than pure gold and silver!

A carriage could hold several hundred kilograms. With an Earl's family background, five carriages were the limit.

Innread.com".

An Earl's gift was usually worth around a million gold coins.

Most of the Earls were three carriages.

A Marquise, on the other hand, was about five to ten carriages. The value of the gift was between a few million and a million gold coins.

The Duke had ten or more carriages, and the value of the gifts was almost ten million gold coins.

Duke was very rich, so it wasn't right to give him less.

But this time, the fleet of the Holy Flame Empire had forty carriages! This was too huge!

Therefore, the moment the convoy entered the city, it attracted everyone's attention.

"What a huge fleet."

Someone opened his mouth wide.

"Look, flame symbol!"

Someone recognized the flame symbol on the fleet flag.

"Yeah, this is the same as the flame symbol on the flying ship." Another person said.

"So it's a gift from that legendary existence. It's forty carriages. That's amazing!" A noble exclaimed.

Even if he was a middle-class noble, the gift of forty carriages was beyond his imagination.

This was many times more than his entire fortune!

How rich was that legendary existence?

This noble was unimaginable.

The female Dwarf Giant Hearst led a group of soldiers. In the middle was a carriage. Each carriage was covered in a thick red cloth, and on both sides of the carriage were the female soldiers of the Queen's Guard.

Some people became curious.

"I wonder what they're dragging in the carriage."

Another person was curious.

The Dwarf Giant ignored their discussion and led the convoy straight to the center of the city.

Its speed was fast, and the team was not slow either.

The other nobles' motorcade slowed down on purpose so that others could see his congratulatory gift and his flag and recognize his identity.

The Dwarf Giant Hearst did not have any consciousness, and neither did the Queen.

"Aren't you going to let us see what the gift is?"

At this moment, someone finally realized that the convoy might not stop at all.

And they wanted to know what was in this convoy.

Yes, that was what they came to see today.

People were taking the lead, and soon more people were cheering.

The Dwarf Giant Hearst remained unmoved.

"Dear warrior, I didn't mean to disturb you, but didn't the Eldest Princess tell you about today's customs?" At this moment, an old man walked up under the protection of a group of guards.

Hearing the words "Eldest Princess", Hearst stopped.

"You are?"

Hearst asked.

"Let me introduce myself. I'm Duke Laurent. My daughter Annie was once a student of the Eldest Princess."

Duke Laurent said politely.

Chapter 354: A real sensation! Holy Flame Empire!

"Excuse me; did the Elder Princess come to the Imperial City this time?"

After Duke Laurent finished speaking, a petite figure walked down from a carriage.

“Wow, Miss Annie!”

As soon as she came down, she attracted everyone’s attention.

She was Duke Laurent’s daughter.

It was known as the most dazzling pearl of the six provinces in the east, Annie.

In the name of the Eternal Night Empire.

If he was the Duke of a kingdom, he would be the King of a kingdom. His daughter would naturally be the princess.

For example, Princess Luo Ying, Eldest Princess.

If he was the Duke of Eternal Night Emperor, his daughter would be called a princess.

Annie wasn’t that old. She had just turned eighteen this year.

She was born beautiful. When she was 15 years old, she had shown herself to all the noble ladies.

That was why it attracted so much attention.

Annie did not care about the surrounding people. She looked at Hester.

Hester bowed slightly. This was a basic greeting gift.

“So you’re Annie. The Eldest Princess has also come to the capital, but she’s still on the airship. She’s gone with the Queen.” Hester said.

Duke Laurent and Annie had some understanding of the Holy Flame Empire, but they didn’t know much about it. Annie didn’t ask too much on this occasion. She said:

“So, this is the congratulatory gift that she sent this time? When the teacher was in the Holy Magic Academy, she was focused on her studies and rarely paid attention to the matters of the nobles. This is the case... ..”

Annie told the Dwarf Giant Hearst about her “custom “.

“Today is an opportunity to show the people of the Eternal Night Empire how prosperous and powerful they are.”

After saying that, Annie added softly.

Hearst understood.

However, he did not make his own decision. Instead, he took out a magic letter and wrote it to the Eldest Princess.

Yes, if it wasn’t something particularly important, Hearst wouldn’t have written directly to Meng Ying.

After all, Meng Ying was the Queen.

Not long after, he received a reply from the Eldest Princess.

The Eldest Princess allowed it.

The Dwarf Giant Hearst said, "Uncover the veil!"

Nobles and civilians already surrounded the streets.

Many of the early nobles turned their attention to him.

"Where did this force suddenly come from? It sent so many things. Could it be empty inside?"

Not far away, Grand Duke Phoebe, who sat in two kingdoms, thought.

The convoy of the Holy?Flame Empire had stolen his limelight.

In a situation like this, Phoebe was a Grand Duke. Naturally, he wouldn't show any dissatisfaction or disdain. However, this did not stop him from feeling sour.

Following Hearst's order, the cover on the first carriage was quickly removed. The onlookers quickly saw the things inside.

"Wow..."

Almost at the same time, the onlookers made a "wow" sound.

Because the first carriage was filled with exquisite silk!

After the Duke of Laurent's incident, many people already had a preliminary understanding of silk.

They also remembered the appearance of the silk.

"Heavens, are these all silk?"

Some people were still unsure.

"It should be. It looks the same as Duke Laurent's. No, it seems better."

Duke Laurent's convoy was not far away, and some people quickly made a comparison.

It was not only better, but the number was even higher!

"Sure enough, the best is mostly for me."

Looking at such a large carriage of silk, Duke Laurent smiled bitterly and shook his head.

His limelight was destined to be stolen. However, Duke Lauren had some understanding of the Holy?Flame Empire, and he knew in his heart that he could not steal the limelight from the Holy Flame Empire.

The Holy Flame Empire had brought so many congratulatory gifts this time, but it wasn't to steal the spotlight.

Instead, they wanted to use this opportunity to open up?the market of the Holy Flame Empire.

Therefore, this opportunity to enter the city was an excellent opportunity.

They could quickly let these people realize the power of the Holy Flame Empire and the benefits of these things.

This way, once the Holy Flame Empire sold a large amount of silk, porcelain, and other goods, it would instantly attract a lot of attention.

At the same time, they could sell it for a good price to earn more gold coins for the empire.

Otherwise, it was just a thousandth birthday, why did they send out so many expensive things?

En, the high value was only for the buyer, but for the seller, the production cost was not high.

However, whether it was silk or porcelain, the production cost was not high. The reason why it was sold at such a high price was pure because of the scarcity of goods.

Moreover, nobles' money was not earned for nothing.

The nobles of the Holy Flame Empire earned a lot of gold coins through trade, while Meng Ying and Fox Lady Qing Ling used expensive products like silk, porcelain, wine, and tea to collect their gold coins into the hands of the Royal Family.

After the gold coins were collected in the hands of the Royal Family, the Royal Family went through several livelihood projects and gave the gold coins to the commoners.

In the end, these civilians still had to spend a lot of gold coins to get a better life.

There would be no shortage of gold coins for the Royal Family. There would even be more gold coins for foreign trade.

However, the nobles would enjoy resources that they had not previously enjoyed. The commoners would become richer and richer, and the Holy Flame Empire would become more prosperous.

This was the economy!

Only through circulation could it prosper!

Material needed to circulate, the money needed to circulate.

Therefore, regardless of whether it was silk or porcelain, the output would not be too high. This was because Meng Ying would control the output and maintain a high profit!

Meng Ying and Qing Ling had already considered everything.

Even though they were young, they were already qualified queens. At the same time, both of them were also the most qualified Saintesses!

The first carriage of silk had already caused a stir.

Then, the second carriage's cover was opened.

Still silk!

However, there were some differences in this train of silk.

Soon, these people knew the difference.

When weaving silk, the difference in weaving technology.

With different weaving techniques, the silk that was woven had different effects and looked unique.

The third carriage, the fourth carriage, the fifth carriage... all the way to the fourteenth carriage, it was all of the silk.

Fourteen carriages of silk!

All the 14 carriages of silk were completely different.

Some silks were suitable for making clothes for girls.

Some were suitable for men.

Some looked exquisite.

Some looked elegant.

There was also a bright color, which made many of the women watching the scene feel moved.

“How many gold coins does it take to buy it?”

Someone muttered.

One foot one hundred thousand gold coins!

As for the silk here, who knew how many feet it was!

Of course, these fourteen carriages of silk would not cause the silk to devalue.

Chapter 355: A real sensation! Holy Flame Empire!

The silk market was huge.

In the Eternal Night Empire, a Viscount's property usually had a few million gold coins or even tens of millions of gold coins. It was comparable to the Earl Snow coins of the Xi Ling Kingdom.

A noble from a large empire was so rich.

Usually, even a Baron would be able to afford a silk dress.

Of course, based on the production of silk, the Baron might not be able to buy it.

There were quite a few nobles in the Eternal Night Empire.

In the past, the Xi Ling Kingdom had thousands of nobles.

According to the population of Xi Ling Kingdom, there was only one noble among the three thousand people. This was basically the proportion of most human kingdoms.

This ratio was also a safe ratio.

The Eternal Night Empire was smaller, but how many people did it have?

There were quite a number of nobles in the Eternal Night Empire.

In addition, there were also some merchants and officials who were wealthy and potential consumers.

Therefore, the silk market was actually quite large.

Even if it was so expensive! Not to mention 14 carriages, even 140 carriages would not cause depreciation, because the market was always here!

However, the 14 carriages of silk had already knocked the surrounding crowd unconscious.

Immediately, the 15th carriage opened.

Inside, there was a large amount of porcelain!

This porcelain was a whole series.

In other words, the patterns and colors were the same. It didn't only look beautiful, but it also felt different when used because of the uniformity.

"Porcelain, a lot of porcelain!"

The surrounding people started shouting again.

"Look, this porcelain is even more exquisite than Duke Victor's. Porcelain, where did they come from?" Nobles were observing.

Then, the 16th carriage opened.

There was still porcelain inside, but there was another series.

The previous series was the Flower Language series.

This series was the famous blue and white porcelain series before Lin Yan transmigrated.

Porcelain Blue and White was elegant and generous. It looked extraordinary, and some nobles' eyes were wide open.

If they could have a set of porcelain-like this, it would be a matter of showing their identity.

Moreover, this kind of porcelain made people like it from the bottom of their hearts.

At this moment, the nobles suddenly felt that the gold-made tablewares in their houses were no longer fragrant.

Immediately, the 17th carriage opened. It was still porcelain, but it was another series. This was the ink painting series. Then, 18, 19, 20...

There were a total of ten carriages of porcelain, each of which was a different series.

The porcelain of these ten carriages made some nobles want to ask the price.

Fortunately, they remembered that this was a congratulatory gift to the Emperor. It was not for sale.

"It's so beautiful; I want to have a set. If I can buy such a set of porcelain, it would be worth a million gold coins."

A Viscount rubbed his hands.

This showed that he was extremely excited.

Because he finally found something that could show his identity, status, and dignity.

He bought such a set of porcelain and took it out when he was entertaining guests. How glorious was his face!

Duke Victor smiled bitterly.

He tried his best to get a set of porcelain.

But they took out ten series of porcelain.

It was even more exquisite than him.

His limelight was completely stolen.

Even though they had stolen the limelight, Duke Victor could only admit it.

Duke Victor did not know about the Holy Flame Empire.

But the flying ship with the flame symbol in the sky could tell the owner of the 40 carriages.

It was a gift from a legendary existence to the Emperor.

Although he was a Grand Duke, Victor's family did not have a legendary existence.

Some high-ranked sorcerers had titles, while others did not, because they might not care.

However, one thing was that most high-ranking magisters were richer than Duke.

"I wonder what else is going on."

The onlookers were especially excited as they looked forward to the carriage behind them.

Then, the twenty-fifth carriage opened.

"Wow!"

The surrounding people cried out in surprise again.

Because there was a huge diamond on the carriage!

This diamond was exceptionally large, almost the size of a fist.

"Is this a diamond? This is too big."

Many people cried out in alarm.

Compared to this diamond, the diamond of Grand Duke Phoebe, who had just taken over two kingdoms, was a child's play.

Some women's eyes were shining as they saw that.

"This... Where did they get such a big diamond?"

Phoebe was stunned.

He had just been jealous of her, but now, he could no longer be jealous.

Then, the carriages behind opened one after another.

However, what was installed at the back were some specialty products of the Holy Flame Empire.

Behind the diamond was a carriage of wine.

The wine was stored in barrels.

But at the top, there were also glass bottles.

"What is this?"

Some people asked curiously.

“Wine.”

A female warrior said indifferently.

“Wine?”

Some civilians had never heard of it.

“This is the wine that my king gave to the emperor. All the nobles attending the birthday party can drink it. ”

At this moment, the female Dwarf Giant Hearst said indifferently.

Hearing her words, the nobles who were eligible to participate in the emperor’s birthday could not help but look forward to it.

To be able to produce so much silk and porcelain, as well as so much diamond power, the amount of wine brewed should not be bad, right?

Apart from wine, there were tea leaves, sorghum wine, fruit wine, and some treasures from the forest! There was even a truckload of specialized agricultural products, such as some mushrooms, soybeans, potatoes, sweet sorghum sticks, and so on.

If these things were released alone, they would make people laugh.

However, with silk and porcelain as the bedding, it seemed like it would be natural.

.

The surrounding people were all enjoying it.

Finally, the forty carriages were all opened.

All the onlookers felt as if they were not satisfied.

Without a doubt, the things that the Holy Flame Empire had taken out this time had already caused an absolute sensation.

“Excuse me, what kind of power are you? Why haven’t I seen you before?”

At this moment, a bold civilian finally asked the crucial question.

The Dwarf Giant Hearst looked at the commoner and said in a calm but powerful voice:

“Holy Flame Empire!”

Chapter 356: The mysterious empress! Empress’ invitation!

“Holy Flame Empire?”

When the commoner heard these words, he was slightly stunned.

He had never heard of the Holy Flame Empire before.

It was not just him. Very few of the nobles around had heard of the Holy Flame Empire.

“It’s an empire, no wonder it’s so generous.”

A small noble said.

This millennium birthday of the Emperor of the Eternal Night Empire naturally invited not only the surrounding kingdoms but also some empires that were on good terms with the Empire.

This little noble considered the Holy Flame Empire as the other empires that already existed.

“They have so much silk and porcelain. It seems that the silk and porcelain are made by the Flame Empire. I wonder where the Holy Flame Empire is. Can we buy silk and porcelain from the Holy Flame Empire? This is a big business.”

Some of the nobles’ heads were already spinning.

The small nobles were more shocked.

The nobles, on the other hand, had already seen a new path of wealth.

However, the female Dwarf Giant, Hearst, was only the leader of the escort team. Moreover, it was not convenient for them to ask questions in such a situation. The nobles did not come up.

Instead, they were calculated to see if they could talk to the people of the Flame Empire at the Emperor’s birthday and get the right to purchase silk and porcelain.

The Dwarf Giant Hearst did not say anything after saying the words “Holy Flame Empire”.

As a Dwarf Giant, she usually did not speak much.

The number of dwarves was rare, and their lives were long. Most of their lives were spent in silence.

“Duke Lauren, Miss Annie, I still have a mission. After completing the mission, I need to return to the Queen’s side as soon as possible. I won’t have to accompany you.”

After thanking Duke Laurent for his reminder, the dwarf giant Hearst led the convoy on their way.

The convoy slowly drove towards the inner city.

Yes, the Imperial City of the Eternal Night Empire was divided into inner and outer cities.

The outer city of the Imperial City was a commoner. Some officials lived with some small nobles.

The inner city of the Imperial City was the core of the empire. The center of the inner city was the palace.

The Imperial palace was the emperor’s residence, and it also occupied a large area.

The people living in the inner city were rich.

Many Grand Dukes and Marquises were far from the capital, but they also bought houses in the capital. They would come to the capital for some time every year.

This was to ensure that they were not excluded from the center of power.

“Look, look, they’re coming!”

Along the way, the fleet filled with precious treasures like silk, porcelain, diamonds, tea, wine, and so on caused a huge stir.

“That’s silk. It looks too exquisite. It would be great if I could get a piece of silk in my life.”

“Yeah, look, it’s porcelain. It’s too beautiful. It’s a hundred times more beautiful than even gold and silver bowls.”

“What kind of wine is that? Why is it dark red?”

All the people along the way were discussing this.

As the convoy passed by, millions of people in the Imperial City recognized silk, porcelain, diamonds, tea, wine, fruit wine, and other things from the Holy Flame Empire.

And through their mouths, the items sent by the Flame Empire quickly spread throughout the entire Imperial City, causing a huge stir!

Even the convoys sent by the other empires that had a good relationship with the Eternal Night Continent were far less sensational than the ones sent by the Holy Flame Empire.

As the female Dwarf led the convoy towards the inner city, Meng Ying’s flying ship was led by a group of flying magical beasts. It had already reached its destination, a manor.

This was also the residence the Eternal Night Empire had prepared for them.

There were quite a lot of manors in the inner city. Normally, there was no one to live in. The ones that were especially used to entertain guests were the larger ones in the Holy Flame Empire.

Of course, the flying magical beast team did not reach the legendary rank, but they had the barrier issued by the Royal Family, so they could fly in the sky.

“The birthday will officially begin tomorrow. Queen, we can rest here for a bit. I’ve already sent someone to send the list of gifts.”

The Eldest Princess said.

Meng Ying nodded and began to meditate in the room.

A few hours later, the Dwarf Giant Hearst returned.

“Reporting to the Queen, all the gifts have arrived.”

Hearst said.

Meng Ying nodded slightly.

Hester told the Eldest Princess about what she had seen and heard along the way. She said:

“This is an unexpected harvest. Queen, this time silk and porcelain have received such a huge amount of support in the Eternal Night Empire. Once we sell them, we can sell them for a good price.”

There was no shortage of silk and porcelain for sale. Every time there was a small supply of silk and porcelain in the three eastern provinces of the Eternal Night Empire, the nobles would fight for it.

However, after this trip to the capital made silk and porcelain famous, the Holy Flame Empire could raise the price and sell it at a very high price.

It was the same sentence: nobles' money was not earned for nothing.

At this moment, the imperial palace of the Eternal Night Empire was bustling with activity.

A large number of officials were walking in and out. It was a busy scene.

The millennium birthday began tomorrow. Even in the Continent of Gods, the significance of the millennium birthday was quite great.

There were very few people who could live for a thousand years. There were very few emperors who could live for a thousand years.

That was why everyone in the Eternal Night Empire attached great importance to it.

Everyone was busy.

Only one person was not busy.

That was the Emperor of the Eternal Night Empire.

The Emperor of the Eternal Night Empire was extremely mysterious.

The emperor rarely appeared in front of people, and she had not been in court for a thousand years.

However, the operation of the empire was unaffected.

At this moment, the Emperor was sitting in a deep palace, listening to the report of a female official through the curtain.

Under the heavy curtain, it was impossible to see the emperor's appearance.

"Your Majesty, the twenty-eight dukes of the kingdom have arrived. The fifteen kings of the kingdom have arrived. The three kingdoms on the east side have merged into a small empire called the Holy Flame Empire. The Queen of the Holy Flame Empire has arrived at the Imperial City. According to Purple Smoke Pavilion, the Holy Flame Empire has a legendary combat power."

The female official.

"Holy Flame Empire?"

At this moment, a cold voice came from behind the curtain.

However, this voice was a female voice!

The emperor of the Eternal Night Empire was a female emperor!

"Yes, you're Majesty. According to the Purple Smoke Pavilion's information, the Holy Flame Empire was established half a year ago."

Female Official?said.

“Cui Yan, send someone to invite the Queen of the Holy Flame Empire to the palace. I will host her myself.”

Chapter 357: Tina Empresses! Star God and God!

“Queen, the Emperor of the Eternal Night Empire has sent someone over to invite you to the banquet.”

In the manor, the Eldest Princess said to Meng Ying.

In the name of the Continent of God, a kingdom was called a King, and an empire was called a King. But it wasn't that absolute, especially when a woman was King.

After all, the King and the Emperor had the same meaning.

As for Meng Ying and Qing Ling, they were Queen and the Holy Maiden of the Lord of Flame. Meng Ying was used to calling her Queen.

After all, it was strange for someone familiar to call Queen. People who weren't familiar with her were usually called Her Majesty.

Of course, in terms of concept, Meng Ying was the standard emperor.

“A dinner party?”

After pondering for a moment, Meng Ying asked, “Eldest Princess, what do you think is the purpose of this banquet for the Emperor of the Eternal Night Empire?”

The Eldest Princess thought for a moment and said, “We are one of the three kingdoms on the east side, and the Eternal Night Empire doesn't know much about us. She probably wants to see our attitude towards the Empire.”

Meng Ying said, “Eldest Princess, come with me.”

The Eldest Princess nodded slightly, “Okay!”

Night soon fell.

On this day, the Imperial City of the Eternal Night Empire was especially lively.

The citizens of the Imperial City watched the whole day's liveliness. Everyone saw so much gold, silver, and jewelry they would never see in their entire lives.

Some even made a rough statistic.

The value of the gifts of the nobles who came to the banquet today would probably exceed 10 billion gold coins!

Among them, the most talked about was the silk and porcelain sent by the Holy Flame Empire.

It couldn't be helped. A hundred thousand gold coins per foot of silk were simply too eye-catching.

The exquisite porcelain was also very topical.

Some magisters even used magic to engrave the appearance of porcelain and then showed it to others.

It wasn't until nightfall that the discussion concluded.

Meng Ying and the Eldest Princess took the carriage to the palace.

After arriving at the palace, the Queen's guards could no longer enter. They would wait in a special place.

Meng Ying and the Eldest Princess led by the palace guards walked in.

Meng Ying noticed that these palace guards were all women.

However, their strength was not weak.

"Could it be that the Emperor of the Eternal Night Empire is a woman?"

Meng Ying thought.

Usually, only Empresses would choose female guards.

Soon, Meng Ying knew the answer to this question.

After entering a luxurious hall, Meng Ying saw a king wearing a beautiful dress and a crown!

"She really is."

Meng Ying and the Eldest Princess looked at each other.

The Emperor of the Eternal Night Empire was indeed mysterious, but that was for many people with insufficient status.

To be treated to a banquet by the Emperor, such qualifications could be said to be rare.

Her face was not covered with a veil, so Meng Ying and the Eldest Princess could see her face.

It was indeed a devastatingly beautiful face.

She looked to be in her twenties, but in reality, tomorrow was her millennium birthday.

The magic fluctuations on her body were very subtle, but from Meng Ying's feeling, she should be a Sanctuary!

"Queen of the Holy Flame Empire, please take a seat!"

After seeing Meng Ying and the Eldest Princess come in, the Empress stood up and made an invitation.

Meng Ying and the Eldest Princess sat down.

There weren't many people at the long dining table. Other than the Emperor of the Eternal Night Empire, there were only Meng Ying and the Eldest Princess.

The Empress of the Eternal Night Empire exchanged greetings with Meng Ying before exchanging names.

The name of the empress was simple: Tina.

"We are all from the same path. You don't have to be polite, you're Excellency Meng Ying. Just call me Your Excellency Tina."

Tina said.

She had sensed the strength of the Sanctuary of Dreams!

If the two Sanctuaries were too close together, even if they tried to hide, it would not be easy to hide.

Once they grasped the Rule Force, they would naturally possess traits that no one else had.

As they got closer, they could easily feel it.

In the Continent of Gods, if someone chose between the emperor of Sanctuary and the emperor of the empire.

Those who yearned for power would choose to become the emperor of a large empire.

Those who desired strength would choose to become Sanctuary.

However, more people chose to become saints than those who chose to become the emperor of a great empire!

In the Continent of God, Sanctuary represented the pinnacle of power!

The Sanctuary represented another possibility, a long lifespan, and, most importantly, the possibility of becoming a God!

Mortals, who didn't want to become gods?

Tina's expression didn't change much when she realized how strong Meng Ying was.

However, her attitude towards Meng Ying had changed.

Now, it's Empress versus Empress, and Sanctuary versus Sanctuary.

The way Tina and Meng Ying addressed each other was saint's way of addressing each other. That was how they addressed each other!

After chatting with Meng Ying, Tina looked at the Eldest Princess and asked:

"This must be the Grand Duke of Xi Ling Kingdom's eldest daughter, Your Excellency?"

The Eldest Princess nodded. "Yes, you're Majesty Tina. My father was Grand Duke of Xi Ling Kingdom."

Tina asked, "Is your father okay?"

The Eldest Princess looked sad, "Father is gone."

She explained the cause and process of Grand Duke Xi Ling's death.

The King of the Xi Ling Kingdom, Grand Duke Xi Ling, was killed by the God of the Xi Ling Kingdom. Back then, the God of the Xi Ling Kingdom was defeated in the battle of gods and was about to face the attack of the Horton Kingdom. The God of the Xi Ling Kingdom chose to lower the Holy Spirit.

In the Divine Will, the Eldest Princess was one of the Holy vessels chosen by the Church. However, Grand Duke Xi Ling chose to refuse and was possessed by the consciousness of God.

After a long time, Grand Duke Xi Ling's self-consciousness died. Even his soul no longer existed, leaving only his body, which was equivalent to death.

Tina looked regretful. She thought about it and asked:

“Is the God of the Xi Ling Kingdom the Star God Isaac?”

The Eldest Princess did not expect Tina to know about the God she believed in.

Star God Isaac!

Isaac was not the true name of the God that the Xi Ling Kingdom believed in. He was just a God, and Star God was a kind of God.

There were quite several?Star Gods, so the Star Gods had to be distinguished by the name of the Star God and this God.

The Eldest Princess said, “Yes, Your Majesty.”

Tina said, “A few months ago, the star that represented Isaac's kingdom disappeared. I guessed that Isaac was hiding his kingdom. I didn't expect Isaac to do something like this to your father to protect his faith.”

After she finished speaking, she looked at Meng Ying and asked, “Excellency Meng Ying, is the God the Holy Flame Empire currently believes in the Lord of Flame?”

Meng Ying nodded and said, “Yes, Excellency?Tina.”

Tina looked thoughtful and said:

“Lord of Flame, this is the first time I've heard of this God. Lord of Flame shouldn't be a Star God, right??I didn't read his Divine Kingdom in the star map.”

Meng Ying revealed a curious expression, “Excellency?Tina, what is the Star God?”

Tina waved her hand, and the lights in the hall dimmed.

Then, a star map appeared between her and Meng Ying.

This star map was not flat.

It was three-dimensional.

Of course, it was the compressed solid.

There were many bright stars inside.

The empress Tina gently clicked, and the stars suddenly became brighter.

Tina said, “The stars in the sky are the projection of a God's kingdom. Of course, their true location is not where you see it. When a God hides the kingdom, the star will go out and disappear.”

Tina continued to say, “This is Star God. He will be able to expose his kingdom to the light of the sun and moon day and night. He will be able to make the kingdom stronger and more indestructible. He won't have to use his power to maintain the kingdom, and it will become even more prosperous.

“In most of the gods are Star Gods there are also some powerful gods who built their Divine Kingdom in some special places. Only occasionally do they project out, so it's

hard to read about his Divine Kingdom in the star map. Such gods are often exceptionally powerful.”

Meng Ying stood up and looked at the star map.

Meng Ying did not know about this knowledge, even the Eldest Princess never studied about it at the Holy Magic Academy.

Tina tapped her finger again, and Meng Ying saw that many stars had formed a mysterious pattern.

At the center of the mysterious pattern was the brightest star.

Tina said, “Look, this is Fairy Galaxy. There are a total of 25 stars in the Fairy Galaxy. This represents 25 gods. These 25 gods form a Fairy God System.”

Celestial!

To Meng Ying, this was another new word.

Tina said, “Generally speaking, the brighter the starlight, the stronger the God will be. Of course, some of the gods have died, but their kingdoms are still floating in the sky. There are a lot of them in the sky. If we can find their kingdom, it will be a huge fortune.”

Chapter 358: Under the Divine light, all are Divine land!

Tina’s words gave Meng Ying and the Eldest Princess a sketch of Heaven.

Meng Ying and the Eldest Princess had a certain understanding of the Heavenly Realm.

The Eldest Princess asked, “Your Majesty Tina, then how did you read the identity of these gods?”

Tina said, “This is the privilege of Sanctuary. The projection of every God’s kingdom carries some of God’s characteristics and information. There isn’t much of it, and it’s very obscure, but it always reveals a little. When you reach Sanctuary, you’ll spend a lot of time reading some information. It’s also because some gods want to attract the followers of Sanctuary.”

The Eldest Princess understood.

The Eldest Princess asked again, “Your Majesty Tina, is the Divine system only established by the existence of the Sovereign?”

Tina shook her head and said, “A Master God doesn’t waste time building a God. Usually, a peak third-ranked God has a chance to break through to the fourth rank.”

The Eldest Princess asked curiously, “Your Majesty Tina, the Eternal Night Empire is so powerful. The God of the Eternal Night Empire must be the fourth-ranked God, right?”

The Eldest Princess’ previous speculation about the power of the Eternal Night Empire’s god was at the peak of the third-ranked.

The third rank refers to a God with godhood between an eleventh and fifteenth-ranked.

The difference between eleventh-ranked godhood and fifteenth-ranked godhood was only four ranks, but the difference in strength was huge.

Godhood from the eleventh rank to the fifteenth ranked would take a long time for a God!

That's thousands of years, or even longer.

As for the fourth-ranked God, the godhood would be at least sixteenth ranked godhood.

Godhoods weren't infinitely ranked up. A fourth-ranked God was already a real big shot in the Heavenly Realm.

The Eldest Princess didn't enter the core of the Holy Magic Academy, nor did she enter the core of the Eternal Night Empire, so the information she learned wasn't 100% accurate.

This was certain.

When a person was weak and strong, the information they learned must be very different.

When many people were weak, their understanding of this world was not only one-sided but also childish.

Once they became stronger, they would discover that this world was not what they had understood.

This was even true in the world before Lin Yan transmigrated.

After struggling, a person slowly became rich and entered the upper class. His vision and gaze were completely different, and the world he saw was completely different.

Naturally, he would not be like when he was still poor. He would complain about social injustice all day long and his temperament from inside to outside would become completely different.

Tina looked at the princess calmly and said:

"I'm not too sure about this either."

Tina waved her hand again, and the stars disappeared.

Tina decided to end the topic.

She took the initiative to chat with Meng Ying and the Eldest Princess about the gifts sent by the Holy Flame Empire, such as silk and porcelain.

Tina had seen those things in the afternoon.

"Silk is indeed a gift from the heavens. I also like the porcelain you gave me. Excellency Meng Ying, I've only recently heard that the Holy Flame Empire has only received the trade orders from the three eastern provinces?"

Tina asked.

Meng Ying nodded.

Tina said, "I'll get the Interior Minister to sign a new trade order to allow the Holy Flame Empire to trade with all of our provinces."

Meng Ying revealed a look of joy. This trip to the Eternal Night Empire was precisely for this purpose.

She didn't expect that Tina would take the initiative to solve the problem.

"Thank you, Honorable Tina."

Meng Ying said sincerely.

Tina nodded and said, "It's fine, you're Excellency."

The atmosphere of this banquet became more harmonious.

Although Empress Tina had the majesty of an emperor, the aura she exudes when facing Meng Ying, who was also an empress, was very calm.

Of course, if Meng Ying was just the Queen of a small empire, the topic of Tina's conversation would be different.

But Meng Ying was a Sanctuary!

From the looks of it, Tina did not know much about the expansion of the Holy Flame Empire.

The Holy Flame Empire entered the eyes of the Eternal Night Empire, which was also the latest incident.

In the Continent of Gods, the transmission of information was not as fast as expected.

Otherwise, the Purple Gold Empire wouldn't have been able to find any information about the Holy Flame Empire after several months of investigation.

"Honorable? Meng Ying, before I saw you, I didn't expect you to be in the Sanctuary. The Lord of Flame was so lucky to find you to guard the empire for him."

Empress Tina could not help but say in an envious tone.

Meng Ying's face was filled with piety, "No, Honorable Tina I am lucky enough to meet my God. To be honest, I am the Holy Maiden of my God!"

Holy Maiden!

These two words made Empress Tina's complexion move!

Tina didn't know that Meng Ying's Holy Land was directly promoted by Lin Yan with taboo power.

To Tina, Meng Ying was a saint, but she was willing to be the Holy Maiden of the Lord of Flame!

In the Continent of Gods, perhaps no female Sanctuary was willing to do this!

Unless it was a Saintess who was directly nurtured by a weak God!

Or maybe that God was strong enough.

On the other hand, only the third-ranked gods could attract the presence of the Sanctuary!

Yes, it was only possible.

If it was the second stage of Sanctuary, it would be even harder to attract!

"The Lord of Flame seems to be a very powerful God. With the power of the Lord of Flame, it's enough to support your expansive territory. Your north side is the Snowy Mountain, and the southeast side crosses a swamp. There are several kingdoms, and the east side is an Endless Desert. Have you decided on the direction to expand?"

Tina asked.

The content of her words made Meng Ying and the Eldest Princess' hearts skip a beat.

Meng Ying pondered for a while and finally decided not to reveal the news that the Purple Gold Empire had been defeated by the Holy Flame Empire.

Even though Tina was very good-natured and had a good conversation with Meng Ying, she was the Empress of the empire.

The Holy Flame Empire was still far weaker than the Eternal Night Empire.

But what if the Eternal Night Empire felt threatened by the Holy Flame Empire?

So Meng Ying gave a simple "yes" and changed the topic:

"Honorable Tina, according to what you said, the expansion of the Empire?seems to be more specific?"

Tina nodded and said, "Honorable Meng Ying, have you heard anything?"

Meng Ying looked at Tina.

Tina said softly, "Under the light, everything is sacred."

Then, she began to explain:

"The kingdom of a God can be expanded indefinitely. However, when a God casts Divine light from the Heavenly Realm, the range of the Divine light of each God is limited. Outside the range of the Divine Light, this God cannot collect the beliefs of those regions. Therefore, to?avoid unlimited war, this God will not expand randomly. It is better to manage the kingdom within the range of the Divine Light."

"Therefore, the size of a God's kingdom can often reflect the strength of this God."

"God is a little stronger every day, but normally, only when the power of this God reaches a qualitative change will he choose to expand his kingdom. That means the war between Gods and the war between Kingdoms. Without absolute certainty, a God will not move."

Tina continued.

Under the illumination of the Divine Light, it was all Divine Land!

Tina's words reminded Meng Ying of the gods of the Horton Kingdom and the Xi Ling Kingdom.

The Battle of Gods?back then should have been picked by the God of the Horton Kingdom.

The?gods of these two kingdoms should be able to shine on a larger kingdom. Otherwise, the gods of Xi Ling Kingdom would not have such ambition.

If a God continued to grow stronger, it?would need to expand its?Kingdom. However, if they were not strong enough, they would not rashly expand.

Then, Meng Ying thought of her God again.

The Lord of Flame!

Before attacking the Purple Gold Empire, Meng Ying had specifically prayed and received a simple reply from the Lord of Flame.

That was one word: Battle!

According to Tina, if she were to attack the Purple Gold Empire and expand her territory, she wouldn't let the light shine on the Purple Gold Empire. The Lord of Flame wouldn't choose to expand.

And choosing to expand meant that the Lord of Flame's Divine Light could cover that area.

Apart from that, there were also the three kingdoms and the Endless Desert!

The current Holy Flame Empire was not small.

As for, the Holy Flame Empire should be illuminated by the light of the Lord of Flame.

In addition, Meng Ying also knew that the Lord of Flame was in the north of the Continent of God? because?there was also an Elven Empire.

The Elven Empire was not small, and it had the possibility of expansion.

All of this explained a fact to Meng Ying:

Her God, the Lord of Flame was truly powerful!

Such a large Empire?and it was still expanding. Under the illumination of the Divine Light, the power of the Lord of Flame was beyond Meng Ying's imagination.

However, the more powerful the Lord of Flame was.

The happier Meng Ying was.

She wished that the stronger her God was the better and that she would become the Queen?of her? God!

Chapter 359: ?Meng Ying's step-by-step speculation! Tina's mirror!

This banquet had been held for quite some time.

Tina took out her wine and started tasting it.

"Not bad wine. The nobles will be happy to use this wine at the banquet. Honorable Meng Ying, do you mind if I use wine to entertain the guests tomorrow?"

Tina said.

Meng Ying smiled. "Of course, I don't mind, this is exactly what I need!"

She took out a magic bag and handed it to Tina.

"The amount of wine given to you, Honorable Tina is simply not enough to entertain the guests. There are 100 barrels of wine here, so it should?be enough. In addition, there are also a large number of wine glasses dedicated to drinking wine!"

Meng Ying said.

These wines were prepared by the Eldest Princess for the banquet.

One had to taste something like wine before they knew its benefits.

If the wine could be used on Tina's thousandth birthday, with its unique taste and its beautiful color, it would conquer all the nobles!

The nobles who could attend the 1000th birthday party were all nobles above the Count rank.

Once the wine's name was spread through their mouths, it was easy to imagine what kind of pursuit wine would receive in the Eternal Night Empire!

The Holy Flame Empire was prepared to treat wine as a product of quantity.

Of course, wine was expensive as well, but it wasn't as expensive as porcelain but the profits were extremely high. Moreover, the area of grapes planted in Yan Province was quite large, and the production of wine was extremely high. It could be transported into the Eternal Night Empire continuously, earning a large number of gold coins.

Moreover, these things were consumable. Consumables were the most suitable for walking.

At the banquet, Tina was very kind.

The banquet lasted for more than three hours.

By the time Meng Ying and the Eldest Princess returned to the manor, the sky was already filled with stars.

Meng Ying raised her head and looked at the stars in the sky.

The Eldest Princess also looked up.

"So the stars here each one represents a God's Kingdom." Meng Ying whispered.

When she was young, whenever she looked up at the starry sky, she always wondered what was on the stars and what kind of story there would be. There was no one living there.

But now, she knew.

That was the residence of the gods.

Starlight filled the sky. How many gods were there?

Of course, many gods had fallen.

These stars were only projections of the Divine Kingdom. Their true location was far from easy to find.

Especially the fallen gods. Once the gods fell, the Divine Kingdom would be completely sealed. Although it was still projected, it was difficult to find their location. If such a Divine Kingdom could be found, it would also be a fortune.

"I wonder where my Divine Kingdom will be."

The Eldest Princess looked forward to it.

Meng Ying also looked up at the sky with her face full of yearning.

As the Holy Maiden of the Lord of Flame, Meng Ying wanted to go to the Lord of Flame's Divine kingdom and serve the Lord of Flame every day.

Of course, Meng Ying knew that the kingdom of the Lord of Flame needed her now.

"We must lay down a larger kingdom for God until the entire range of my Divine Light is filled!" Meng Ying thought.

Right now, she had no idea how terrifying Lin Yan's Divine Light was.

Yes, she had no idea what was happening in the Abyss.

If she knew that Lord of Flame was in the Abyss, there was a Demon Dynasty that was many times larger than Holy Flame Empire, and even larger than the Eternal Night Empire, Meng Ying's mouth would probably open into a cute "O" shape.

The Mobis Abyss was not an ordinary size.

It was much larger than the Eternal Night Empire.

It had to be known that when Yvette was at an eighth rank, she flew from the middle of the Bat Demon Dynasty for an entire day before flying to the edge of the battlefield. Yvette's flying speed was not slow, she was even faster than a flying ship.

From the middle of the Bat Demon Dynasty to the edge of the battlefield, the distance was less than one-tenth of the length of the Abyss of Mankind.

After all, it was an entire Abyss!

It was an Abyss with a name!

And now, Natasha was still expanding the scale of the war to take down the nearby Abyss.

The attack on the nearby Abyss was just Natasha's preheating before the official start of the race!

The range of Lin Yan's Divine Light was unimaginably large.

Well, the light of other gods was the light of civilization brought by the title of the flame of civilization.

This thing... There was no concept of scope at all.

If they wanted to delimit a range, then this range could only be described in a word. That was: Infinite!

"The Eldest Princess, what are your observations for today's banquet?"

After returning to her room, Meng Ying used a barrier to discuss with the Eldest Princess.

At today's banquet, Tina's attitude was unexpected.

She was kind to Meng Ying and the Eldest Princess.

However, Meng Ying was not a child.

If others treated her well, they would be able to coax her.

She wanted to think about the reason behind it, and the reason why Tina was acting this way.

That was what a queen should think about.

After all, Meng Ying was representing the Holy Flame Empire, and her body was tied to the interests of the entire Empire.

Most importantly, she also represented the Lord of Flame, so she had to think about the pros and cons of this matter to the Lord of Flame!

The Eldest Princess thought for a moment and said, “Do you remember what I asked? It’s about the rank of the gods of the Eternal Night Empire.”

Meng Ying nodded.

The Eldest Princess asked, “What rank do you think the Eternal Night Empire’s god is?”

Meng Ying thought for a moment and said, “Since the Eternal Night Empire is one of the top ten empires in the Continent of Gods, the god of the Eternal Night Empire should be the fourth-ranked God!”

The princess nodded and said, “Yes, that’s what I was thinking. But after I asked, didn’t you find Tina’s reaction strange?”

Meng Ying thought about it for a moment and said, “It’s indeed strange. She was originally very interested in talking, but after you asked that question, she directly ended the topic.”

At this point, Meng Ying turned her head. “However, if the Eternal Night Empire’s God is the third-ranked God, then that shouldn’t make sense.”

It did not make sense.

In the past, the Eldest Princess had always felt that the God of the Eternal Night Empire was the most profound of the third-ranked gods. But after the conversation with Tina, the Eldest Princess found out more about the situation in Heaven.

Chapter 360: Meng Ying’s step-by-step speculation! Tina’s mirror!

If the God of the Eternal Night Empire was only the third-ranked God, how could he be able to defend one of the top ten empires on the Continent of Gods?

This matter was unreasonable no matter how someone looked at it!

Unless Tina was lying from the start!

It was because the situation she was talking about in the Heavenly Realm was false.

But both Meng Ying and the Eldest Princess had their judgment.

One of them was a Sanctuary, while the other was a legend. They could see through many things.

Meng Ying had already tried to read some information from the stars in the sky.

Tina was telling the truth about Heavenly Realm!

After Meng Ying finished speaking, she thought of something and said, “According to that, the God of the Eternal Night Empire should have his Divine System.”

The Eldest Princess nodded and said, "According to Tina, the God at the peak of the third rank has to create its system. The fourth-ranked God must have a complete system, just like the Elven system."

In the Heavenly Realm, gods cast their Divine Light. The range of illumination was related to their strength.

Those gods could gather their faith only within the range of this Divine Light.

This led to the fact that a God could not expand the Kingdom without limits.

This could also explain why the Eternal Night Empire kept the surrounding kingdoms and tolerated these kingdoms that believed in different gods.

Otherwise, with the strength of the Eternal Night Empire, why not annex these kingdoms? Even annexing the Purple Gold Empire would be as easy as flipping a hand! But the Eternal Night Empire did not!

Therefore, when they reached a certain bottleneck, these gods would set out to build their pantheon and gain from it.

The establishment of the Divine System was also a God at the peak of the third rank, and the key to breaking through to the fourth rank.

Therefore, the key question soon came.

Meng Ying pointed out this crucial point. "Then, where is the Divine System of the Eternal Night Empire?"

Meng Ying and the Eldest Princess looked at each other.

This question was indeed crucial!

Meng Ying said, "According to the conventional understanding, the gods of the ten or so kingdoms around the Eternal Night Empire must be the gods of the Divine systems of the Eternal Night Empire, right?"

The Eldest Princess nodded. "According to common sense, how could the gods of the Eternal Night Empire allow non-gods to occupy the faith of these kingdoms? After all, these kingdoms were built by the dukes of the Eternal Night Empire."

Meng Ying continued, "The question is, will a large-scale Divine Battle break out between gods of the same Divine Family? And it's the kind that lives to the death."

She was talking about the two gods of the Xi Ling Kingdom and the Horton Kingdom.

The Eldest Princess shook her head. "I'm not sure."

Meng Ying pointed out the key point once again. "I'm sure that my God isn't one of the gods of the Eternal Night Empire. Here comes the problem again. We've taken over several kingdoms of gods under the inspiration of my God. If these gods are all gods of the Eternal Night Empire, how could the gods of the Eternal Night Empire tolerate us?"

"With Eternal Night Empire's strength, Empress Tina doesn't need to pretend to be in love with us. I'm afraid that she would attack the Holy Flame Empire a few months

ago. The gods of the pantheon would seek help from the gods of Eternal Night Empire! But this didn't happen!"

Meng Ying's long list of questions made the Eldest Princess fall into deep thought.

A light shone in Meng Ying's eyes. "That's not why I boldly guessed that the god of the Eternal Night Empire is probably not at the fourth rank, nor have he established his Divine System."

She turned to the Eldest Princess and asked, "Why did Tina mention the pantheon? I guess that the God of the Eternal Night Continent is probably at the threshold of breaking through and preparing to establish his Divine System. The gods of the surrounding human kingdoms are the first targets for this god to establish his Divine System. After all, if they don't join this God's Divine System, it would be as easy for the Eternal Night Continent to take down these kingdoms!"

"But!"

Meng Ying changed her tone and said, "There's an unsolvable problem with this conjecture: if the Eternal Night Empire's God is really at the third rank, how can a third-ranked God build one of the top ten empires? If he did not reach the fourth rank, he would not be able to protect such a large empire! Although the Heavenly Realm is relatively peaceful, wars between gods are also extremely frequent!"

"Therefore, there must be a key point in this. This key point may be on the empress? Tina!"

Meng Ying finally concluded!

Tina wasn't going to know that Meng Ying had come up with so many things in just three to four hours.

Under Lin Yan's guidance, Meng Ying's intelligence was indeed terrifying.

She was Lin Yan's, Holy Maiden.

It was equivalent to Lin Yan's students.

At the same time, it could be equivalent to a woman like Lin Yan.

The night was like water.

The huge palace was empty.

There were no guards around.

There was no light in the palace.

However, the starlight that filled the sky fell, passing through the courtyard and shining on the ground, giving the empty palace a glimmer.

In the palace, Tina was wearing a long queen's robe. She walked slowly to the depths of the palace.

She was the only one in this palace!

She was the only one in the inner palace of the whole palace.

For her, as a Sanctuary-ranked existence, those female guards were not more than just her row.

Even if the Holy Land rank?exists, she has been extremely detached from the mainland of God, but she was still a female emperor after all.

Moreover, she was also the empress?of a great empire.

That was the majesty of an emperor.

Tina slowly walked into the palace.

Then, she stretched out her hand and gently touched it in the air.

A black door appeared out of nowhere.

Tina walked into the black door.

Inside that door, there was an even more spacious palace.

There was nothing in that palace. Except...

A mirror!

Empress Tina walked to the mirror which illuminated her unparalleled face.

“Magic Mirror.”

Empress Tina spoke up.

“Help me contact her!”
