

## Flames 411

Chapter 411:

### 1: Holy Daughter leveled up! Angst's transformation and belief!

Once they couldn't suppress their power, they would continue to grow stronger. The more dark power they grasped, the easier their souls would be eroded.

"Angie, what should we do? The Queen isn't here, I'm afraid we can't suppress our strength anymore."

A Fallen Elf said.

"Why don't we pray to the Lord of Flame?" Angie asked.

There were also Fallen Elves suggestions.

Angie thought for a while and finally decided to pray to the Lord of Flame.

Not long after she prayed, a new flame descended from Lin Yan.

Heart Flame!

This was a flame that Lin Yan had specially researched for the Fallen Elves.

As long as they ate the Heart Flame every few days, the Heart Flame would burn in their hearts. Even if they grasped more and more dark energy, they would not be in any danger of being completely invaded by the darkness.

In other words, the flames of the heart supported the bright side of their hearts!

They didn't have to suppress their power anymore. It didn't matter even if they became Sanctuary!

Once they became Sanctuary, Lin Yan would be able to give them the flame that was full of light and dark rules that Angie gave them.

Once they succeeded in comprehending, they could gather the power of light and darkness and walk freely in the light and darkness.

Of course, even Fallen Elves would not be easy to become Sanctuary.

"Heart Flame! What a magical flame! My God is truly powerful and benevolent!"

After obtaining the heart flame, Angie exclaimed.

After she and the other Fallen Elves ate that flame, they stopped suppressing their power.

The power of less than two thousand Fallen Elves exploded.

No matter how hard the suppression was, the rebound was as strong as possible.

The Fallen Elves that had been suppressed for more than a hundred years had risen by one or two ranks.

The Fallen Elves that had been suppressed for more than five hundred years had improved even more. They had all risen by two or even three ranks!

Angst suppression lasted for eight hundred years, and she directly broke through to the eighth rank and touched the threshold of the Holy Domain!

Another Fallen Elf, Judith, also broke through the legends!

After this wave of explosive increase in strength, among these Fallen Elves, there were several eighth ranked, a large pile of seventh ranked, and a large number of fifth and sixth ranked Fallen Elves.

Of course, what they grasped was still the power of darkness.

However, with the existence of the Heart Flame, the Dark Power would not drown the soul.

“That’s great; the matter that bothered us for hundreds of years has finally been resolved!

The Fallen Elves started cheering.

After Angie pondered for a while, she finally decided to become the Holy Maiden of Lord of Flame.

“Angie, are you ready? After becoming Holy Maiden, you will be completely tied to this God in the future. Even if you became a God, you would only be able to become a God in his Divine system. If you didn’t have a Divine system, you might even become a servant God.”

Judith advised.

Angie nodded and said, “Judith, I’ve already made up my mind. We’ve obtained so much from my God, but apart from our humble faith, there’s no way we can give anything back. That’s not right, so I’m willing to dedicate myself to repay the Lord of Flame!”

Seeing that Angie had made up her mind, Judith stopped persuading her.

Thus, Angie became Lin Yan’s Holy Maiden!

After becoming Lin Yan’s Holy Maiden, Lin Yan gave his blessings, leaving Angie with only a single piece of paper!

Angie built a simple Divine Hall beside the huge crack. She was no longer afraid of most Dark Creatures that crawled out of the crack.

She was watching over this huge crack while comprehending the secret of the Holy Domain.

“How is the Queen?”

From time to time, Angie would think of Angst in the Dark Abyss.

In the Dark Abyss, in a huge stone that grew in the air, Angst still comprehended the laws of light and darkness.

She had been in a state for a long time.

Of course, she still had a strong perception of the outside world.

“Tsk tsk, delicious food smell.”

Suddenly, a voice sounded.

Angst slightly raised her eyebrows, then extended her hand and grabbed into the air.

**Crack.**

Something was caught and shattered.

“Spare...”

Before he could say it, the Dark Creature that had some intentions towards Angstrom had been completely shattered.

Angst continued to sit there, comprehending the laws of light and darkness. Her aura gradually faded away.

This was not intentional.

Instead, she was trying to restrain her Dark power.

Once she released all of her aura, not many Dark Creatures would dare to attack her.

Time passed bit by bit.

Five days after the envoy of the Eternal Night Empire arrived at the Flame Empire, the Dark Aura on Angst's body was completely restrained by her.

The current her did not have the slightest bit of Dark Aura.

Of course, there was not the slightest aura of light.

Not to mention the sunlight, even if it was illuminated by the Holy Light, it would not affect Angst at all.

She had already completed the most crucial step of the light-dark transformation.

“Light, darkness, the end of darkness, is light.”

Angst once again thought of the scene where Lin Yan's flame had changed.

“Light and darkness are not absolute opposites.”

After Angst finished speaking, her Aura changed again.

Following that, a vast Aura of light emanated from her body!

At the same time, Angst's aura changed again!

She had gone from the second stage of the Saint Domain to the third stage of the Saint domain, and soon reached the peak of the third stage of the Saint domain!

In the origins of darkness, any existence with a light aura was a form of provocation towards Dark Creatures, unless this existence was strong enough.

As for Angst, she just so happened to belong to the especially powerful type!

Therefore, even though her body was filled with the aura of light, no Dark Creatures dared to provoke her.

“The Laws of Light and Darkness. I see.”

Angst whispered.

Soon after, the Aura on her body changed again, from the light to the darkness that could not be dissolved.

It was as if a moment ago, she was still an angel, the next moment, she would become a Demon!

Angst stood there quietly, sensing her changes.

Now, she could walk freely under the sunlight!

As long as she was willing, even the Queen of Light, Olivia, would not feel the slightest dark aura on her.

After more than ten minutes, Angst finally withdrew from the static state.

Then, she lowered her head slightly and prayed, “Great Master of Flame, my life teacher, please accept my faith, the Fallen Elven King, Angstrom!”

Yes, Angst had contributed her faith.

Chapter 412: Saintess Angst! Tina’s delegation!

## **2: Saintess Angst! Tina’s delegation!**

Angst’s timing was very interesting.

At that time, she had become a powerful Sanctuary at the peak of the third stage, if she took another step forward, she would become the fourth ranked Sanctuary.

There weren’t many stages in the Saint Realm, generally speaking, the fourth stage of Sanctuary was already in a state of strength and invincibility.

Even the talented Sanctuary usually chose to become a God in the second or third stage of Sanctuary. A few of them became gods in the fourth stage.

If someone became a God in the fourth stage of the Sanctuary, it would have at least an eighth-ranked godhead!

If Angst had chosen to fall into the darkness, once she became a God, she would probably have a third ranked godhead.

In short, if Angst advanced further, she could become a God herself.

Moreover, the God she would become would not be weak!

However, in this situation, Angst would choose to contribute his faith to Lin Yan.

Furthermore, Lin Yan quickly learned that the faith she would contribute would not be an ordinary faith.

She directly signed a contract with Lin Yan and became Lin Yan’s Holy Maiden!

This gave Lin Yan a Holy Maiden at the peak of the third stage of Sanctuary!

Such a Holy Maiden, the belief in contribution was quite terrifying.

One person could equal several kingdoms!

If anyone else saw Angst's operation, they would definitely be confused again!

After signing the Holy Maiden Contract, the Holy Maiden Contract would become more and more stable over time until it could never be destroyed.

In other words, even if Angst became a fourth rank God, she would still be firmly tied to Lin Yan.

If it was any other Sanctuary, it would be incomprehensible but she chose to do so.

If Olivia was here, she would understand that this was Angst!

She had always been like this!

If she felt that she could do it, she would do it. She would never think about gains and losses.

After being immersed in the darkness for a thousand years, it was the Lord of Flame who showed her hope of returning to light!

During the months of the Dark Abyss, she prayed to the Lord of Flame every day, occasionally telling her doubts, and the Lord of Flame also gave her answers from time to time.

This made Angst feel a special concern.

Just as she had said, the Lord of Flame was already the teacher of her life, and also the beacon for her to lead the way. During these few months of communication, Angst even had a special feeling towards the Lord of Flame.

So, she made a choice!

After becoming Lin Yan's Holy Maiden, Angst was not in a hurry to leave the Dark Abyss.

The current here was no longer afraid of the power of darkness.

Therefore, Angst wanted to understand what kind of place this Dark Abyss was.

The Dark Abyss was very different from the Abyss.

However, there was no doubt that they were against the Heavenly Realm.

Up until now, Angst had seen the first stage dark creatures in the Dark Abyss, but no Dark Creatures from the second stage had appeared.

Could it be that Angst was far from reaching the core of the Dark Abyss?

In addition, Angst wanted to understand.

That was whether there were gods in the Dark Abyss!

Therefore, after Angst prayed to the Lord of Flame and received the enlightenment from Lin Yan, she seemed to be flying towards the depths of the Dark Abyss.

There, the darkness was even denser!

She did not need to think to know that there must be a big guy there!

In the north of the Continent of God, everything was as usual.

Life in the Holy Flame Empire was peaceful as compared to before and the Elves also had some changes.

That was because they had become more diligent.

In the past, the Elves did not like to practice magic.

Their strength increased naturally as their lifespan increased but now, many Elves started practicing magic from time to time.

The reason was simple, it was purely driven by the Night Elves.

During the twenty years that the Night Elves had been underground, they had experienced a lot of hardships and knew how precious their strength was.

Therefore, the Night Elves were very diligent.

The most diligent were Chen Xi and Lomina.

They all hoped to reach Sanctuary as soon as possible.

Right now, the two Elven empires in the north of the Continent of God did not have the combat power of the Sanctuary.

There were more than two million beautiful Elves gathered there.

With so many Elves and the presence of the Sanctuary, Chen Xi felt more at ease!

So, whether it was Chen Xi or Lomina, they were constantly spying on the secrets of the Sanctuary.

In the south of the Continent of God, the Flame Empire was still developing at a high speed.

Half a month passed quickly.

On the west side of the Flame Empire, a large team of people set off on a large number of flying ships.

This was Tina's mission.

This mission was quite large.

There were a large number of officials from the Eternal Night Empire and a large number of noble children.

These noble children were purely sent by the great nobles of the Eternal Night Empire. Most of them were women.

This was because the nobles of the Eternal Night Empire knew that the Emperor of the Flame Empire was the Empress, and the higher-ups were also a large number of women.

Therefore, these nobles were prepared to send them to contact the higher-ups of the Flame Empire, so they could win more rights for them.

Right now, in the Friendship City on the border between the Flame Empire and the Eternal Night Empire, there were too many nobles who came to purchase goods, so the Flame Empire limited the number of items that nobles with different titles could buy at once.

This was to avoid the monopoly of a few aristocrats.

However, after Annie became Lin Yan's Holy Maiden, Annie's father, Duke Lauren's caravan, received some preferential treatment to buy more goods.

This made some of the nobles jealous.

These big nobles had gained a lot of wealth in their trade with the Flame Empire, and each of them wanted to earn more.

That was why they had sent their daughters here this time. It was not necessarily because they wanted these women to learn from Annie.

However, Lin Yan's Saintess was not a cabbage, and not everyone had the right to become one.

The Godhead's assessment of the Holy Maiden was rather strict, the piety of faith, the purity of the soul, and so on.

Among the noble children, there were not many like Annie.

In short, Tina's delegation was huge.

There were several thousand people.

In addition, Tina had brought a thousand guards.

Seven to eight thousand people, a total of more than thirty small flying ships, formed a large-scale flight fleet, majestically flying towards the border of the Flame Empire.

The entire fleet formed a sharp cone in the sky.

At the front were three flying ships with many soldiers.

Behind them was Tina's flying ship.

Tina was standing at the bow of the ship and was looking down at the ground.

In the sky, from time to time, there were flying ships passing by. These were the flying ships that the nobles used to transport goods to the Flame Empire.

"From the looks of it, the trade seems to be very hot."

Tina said.

"Yes, Your Majesty, the products of the Flame Empire are particularly popular here. Silk and porcelain will be stolen by the nobles as soon as they appear. The products of the Flame Empire are also very popular. Other than that, the large amount of crops of the Flame Empire also sells well on our side."

Next to Tina, there was a female official.

Tina Empress looked interested. "What are they?"

The female official did her work and said, "The potatoes from the Flame Empire are very popular with the commoners. It is said that the production of potatoes is very high. After the commoners buy them, they can also plant them once and get a bigger profit. According to our statistics, if a commoner chooses potatoes as their staple food, they can save at least 30 gold coins a year."

Thirty gold coins weren't even worth mentioning to a noble, not to mention Tina but for civilians without land, it meant a few months of income.

Even in the Eternal Night Empire, a commoner who had no land would earn around a hundred gold coins a year.

More than half of the 100 gold coins were spent on food.

But if he ate potatoes, he could save thirty gold coins!

This was quite shocking!

Tina nodded and said, "Continue."

The female official added, "Other than that, the Flame Empire also has a sweet potato, which is also very popular. The sugar in it is very high, and both adults and children like to eat it. There is also a very good sugar, as well as a new type of rice. Not only does it taste very little, but the yield is also quite high. Unfortunately, there is a Divine imprint in the seed."

Empress Tina said, "Don't we have these crops?"

The female officer said, "Yes, we don't have these crops, and we don't know where the Lord of Flame found it."

Tina said, "It looks like we've made a lot of gold coins."

The female official said, "Yes, Your Majesty, but the Flame Empire bought a lot of minerals from us."

As she spoke, the border of the Flame Empire arrived.

"Order all airships to land. We will enter the Flame Empire from the ground. We can sense how the Flame Empire is different."

Tina gave the order.

Chapter 413: This empire was different (1)!

### **3: This empire was different (1)!**

The fleet of 30 small spaceships began to land.

Tina quickly realized that Meng Ying had come to greet her.

Meng Ying, long time no see.

Tina said.

Meng Ying said, Honorable Tina, welcome to the Flame Empire.

After the two women exchanged a few words, Tina said, Empress Meng Ying, I want to take a look at the Flame Empire, okay?

Meng Ying nodded and said, Of course.

The huge delegation began to move.

The number of people in this team quickly exceeded tens of thousands.

Tina had seven or eight thousand people, and Meng Ying had brought a few thousand to greet her.

Of course, Tina and Meng Ying were free to accompany the female officers and the Queens guards. They also formed a small team with a larger range of activities.

At Tinas suggestion, the team entered Friendship City.

It had expanded the City of Friendship to a large extent. Every day, there were a large number of airships and convoys hauling goods here, making it especially busy.

Even in the Eternal Night Empire, not every noble had a flying ship. Some small and medium-sized nobles wanted to join the trade, so they sent a large fleet over.

The speed of the convoy was naturally slow. It would take a month or two to make a round trip.

However, they were able to earn thousands of gold coins in one round trip, and all they had to pay was some labor costs. They didnt need to work on their own, so the small and medium-sized nobles were willing to pay.

When Tina entered Friendship City, she was shocked by what was happening inside.

There were too many convoys coming and going in Friendship City. As soon as each convoy was full of goods, they left in a hurry and headed towards the Eternal Night Empire.

Hundreds of thousands of coolies were constantly loading and unloading goods every day. From early to late, the number of people was still a little insufficient. One could imagine how big the trade between the two Empires was.

Such a scene was rare in the entire Continent of Gods. Even some of the most developed empires rarely saw such a busy scene!

To be able to be so popular, one thing could only be said: the goods of the Flame Empire were superb!

This time, Empress Tina was there to observe the Lord of Flames Empire, so she was very careful.

On the side, Meng Ying would occasionally explain to her.

Tina was getting more and more surprised because Meng Ying told her that they made many of the goods here under the inspiration of the Lord of Flame.

Empress Meng Ying, do you mean that silk and porcelain were also made under the inspiration of the Lord of Flame?

Tina asked.

Meng Ying nodded and said, Yes, Your Excellency Tina. Other things, such as wine, sorghum wine, fruit wine, tea, and so on, only appeared under the inspiration of my God. Otherwise, we would not know how to make them.

Tina looked surprised.

She was a powerful Saint ranked Sanctuary, and her sister was a powerful goddess of the Eternal Night Empire. Empress Tina had a much better understanding of the gods of the Heavenly Realm than an ordinary Saint realm.

The gods of the Heavenly Realm would occasionally spend some time improving crops and seeds. However, very few gods were like the Lord of Flame. In such a short time, they created so many things at once.

Dont underestimate these things. Other gods couldnt find them.

The Lord of Flame seems to be different from other gods.

Tina thought.

She continued to observe.

Whoops!

At this time, a long magic vehicle came over.

Empress Meng Ying, what is that?

Tina asked curiously.

This is a magic car. It has a fixed track, and its speed is very fast. It can also pull many things at once, Meng Ying said.

Tina walked over and looked curiously at the 200-meter-long magic vehicle.

Is this also the creation of the Lord of Flames revelation?

She asked.

Meng Ying nodded, Yes, Honorable Tina.

To Tina, the principle of the magic car was not complicated.

She only took a glance and understood the principle of the magic cart. Of course, she did not see the core of the magic cart.

However, this was when they saw the ready-made magic cart.

If she had not seen the magic cart, she would not have thought that it could be made.

Moreover, she would not waste time researching the magic vehicle.

For the Sanctuary, the most important thing was to increase his strength.

It was the same for gods.

That was why Lord of Flame had spent so much time and energy researching these things. Tina felt that she was special.

If Lord of Flame wasnt strong enough, then Tina would feel like she wasnt doing her job.

But Lord of Flame was now in Tinas heart. She must be on the fourth rank.

How could a fourth-rank God not be in charge?

It was impossible.

An hour later, Tina and Meng Ying finally walked out of Friendship City.

Tina felt like she had gained a lot.

They got into the exquisite carriage and drove along a wide road to the capital of the Flame Empire.

At this speed, it would take at least a month for this team to reach the capital of the Flame Empire but Tina didn't care about time at all. With Meng Ying's help, she looked at the Flame Empire.

From Friendship City to the east, it was a vast expanse of land, which was exceptionally flat.

It was covered with potatoes, corn, sweet potatoes, and other crops. On some small hills, there were many orchards.

All the crops were growing very well, growing exceptionally well.

These are God Beads?

Tina came to a piece of land and pulled out a bunch of potatoes.

It looked like a small bean sprout, but there were actually twenty potatoes!

Each one was bigger than an egg.

The potato that grew out of that bean sprout was over ten pounds!

What a high output!

Tina was surprised.

I didn't expect the Lord of Flame to produce such a sacred object.

Tina was surprised.

For the first time in more than two thousand years, she had walked into the field like she did today. That was why Tina was so curious.

She looked around and saw a patch of green everywhere,

Honorable Meng Ying, these crops are growing so luxuriantly, and there are no pests on them. The Church's sorcerers must have contributed a lot, right?

Tina asked.

Meng Ying shook her head and said, The Church's sorcerers are all focused on cultivation now. There are almost no sorcerers who are engaged in the work of expediting and eliminating evil.

Tina looked surprised, and she said, Why is the Flame Empire producing so many crops? I didn't see any pests on this land.

The entire Continent of Gods was still in an agricultural society. Of course, it was an agricultural society with magic power.

In the absence of pesticides, pests are quite terrible.

In some wild areas that were not blessed by the gods, half of the crops planted by the wild tribes were fed to pests.

On the other hand, in the kingdom and empire of the Continent of God, it was the affair of the Church's magisters.

Every magister in the Church would have their own magic.

However, the Flame Empire did not send any magicians from the Church to eliminate the damage, yet they could not see a single pest. This made Tina unable to understand.

Meng Ying said, I dont know the exact reason, but I think its because my God gave my blessing. Gods blessing?

Tina repeated herself and asked, Your Excellency, how big is the Flame Empire?

She could not be more curious.

The blessing of the gods could indeed have the effect of eliminating harm and promoting growth, but the biggest problem was the problem of covering the area.

Moreover, the blessings of the gods needed to be carried out regularly.

In an area as large as the Eternal Empire, separated by the barrier of the Heavenly Realm, even the goddess of Eternal Night was unwilling to send out her blessings.

The consumption was too great.

It would be better to let a large number of the Churchs sorcerers get rid of the damage and urge them to grow.

That was why Tina asked.

Hearing Tinas words, Meng Ying fell silent.

She and Qing Ling had already discussed it.

This time, there was no need for Tina to hide anything about the Flame Empire.

After all, the empire would not expand. Judging from Tinas attitude, she wasnt a threat to the empire.

So, after a moment of silence, Meng Ying said, Your Excellency Tina, I didnt tell you the truth last time. In fact, weve already conquered a small empire and three kingdoms in the northeast. The current Flame Empire has a total of eighteen provinces. The east is about thirty thousand miles long, and the south is nearly ten thousand miles long!

Hearing Meng Yings words, Tinas eyes widened.

Chapter 414: The Empire was too different! (2)

#### **4: The Empire was too different! (2)**

Tens of thousands of people marched towards the capital of the Flame Empire.

This group walked from the capital to the western border.

This road extended from the western border of the Flame Empire to Yan Province. In the future, it would connect to the Endless Desert and the 13 provinces in the northeast.

In order to cultivate this path, the Flame Empire mobilized a large number of magisters and many powerful Temple Knights.

In addition, many orcs joined in.

With the cooperation of these magisters and the Temple Knights, the Flame Empire would come across mountains and rivers to pave bridges. After the Flame Empire mobilized millions of civilians to build this straight road, it took only a few months to complete.

This speed was unbelievable even before Lin Yan transmigrated.

This was the power of magic.

For example, if it was before Lin Yan transmigrated, he would need to carry out a special explosion. However, here, he only needed sixth-ranked Knights to cut it into half and throw it away.

Some small hills were moved directly by earth magic or burned by Flame magic.

When they encountered some mountains, they needed to open a tunnel. It was Meng Ying who personally made her move. She used the flame to rush out of the tunnel.

That efficiency was simply not too fast.

Of course, the western part of the Flame Empire was relatively flat, so there were not many roads that needed special treatment.

This straight path was also very wide.

It was 60 meters wide.

On the road, there was an endless stream of caravans. This was a caravan set up by the nobles of the Flame Empire, a scene of prosperity.

In the beautiful carriage, Tina was still digesting Meng Ying's words.

What surprised her was not only the expansion speed of the Flame Empire.

There were also the Lord of Flame's methods.

Without relying on the Church's magisters to speed up the growth and eliminate the pests, the Lord of Flame's own blessing could allow the entire Flame Empire's crops to grow quickly, and there were no pests!

Even Tina's sister, the peak of the third level, the Eternal Night Goddess, could not do such a thing!

Along the way, Tina paid special attention.

There was indeed not a single magister casting spells in the endless land.

This meant that the Lord of Flame was more powerful than she had imagined.

What was more; the idea of Lord of Flame had made Tina look different.

For example, Tina had thought that the land belonged to the Royal Family or some noble families but only later did she know that a large number of civilians actually reclaimed these lands.

Every commoner of the Flame Empire had a large area of land, which made the commoners of the Flame Empire richer than the commoners of the Eternal Night Empire.

The civilians who worked in the fields would pray to the Lord of Flame every once in a while, praising the Lord of Flame's greatness and prudence.

This kind of scene was rare even in the Eternal Night Empire.

The Eternal Night Empire was still the standard empire on the Continent of Gods. Nobles were the cornerstone of the entire Empire. Under the request of the royal family and the Church, the nobles did not treat the civilians too harshly. The civilians were doing pretty well but as compared to the commoners of the Flame Empire, it was too far off.

The gap between civilians was already large enough.

On the noble level, there was also a gap.

Although the nobles of the Flame Empire weren't as wealthy as the nobles of the Eternal Night Empire on the entire plane, the spirits of these nobles were completely different.

On the straight path, Tina Empress had seen a lot of small and medium-sized nobles leading the way. From their conversation, there was no lack of praise for the Lord of Flame.

These nobles also had a devout faith in the Lord of Flame!

As the empress of a great empire, Tina knew the nobles well.

Nobles were not as easy to fool as civilians. Nobles' beliefs were not as pious as civilians.

However, in the Flame Empire, the nobles were as devout as the commoners.

This was a little shocking.

It was only in the bottom of one's heart that one could completely identify with a God, rather than believing in it because of external factors such as the majesty and power of the God. Only then would faith be as pious as the nobility and commoners of the Flame Empire.

Even Empress Tina rarely saw such devotion.

At the very least, the commoners and nobles of the Eternal Night Empire couldn't be so devout!

"This Lord of Flame is indeed not ordinary."

Tina thought.

In the next half month, the huge delegation continued to go deep into the territory of the Flame Empire.

Tina Empress, accompanied by Meng Ying, visited every city.

The cities of the four provinces in the west of the Flame Empire had been renovated, and it did well the sewer system and sanitation system. Every city was clean and tidy!

Even civilians would not litter the streets of the city and that's true for more than one city.

This was the case in most cities.

Such self-consciousness was rare in the Eternal Night Empire.

In addition, there was also something called a newspaper in the city. The sales of these newspapers were very large, and many nobles and literate civilians liked to read it. On it were many things that happened recently in the Flame Empire.

In every newspaper, at least a quarter of the pages were devoted to the strange stories of devout believers.

These were actually all disguised soft articles.

Empress Tina had people gather a lot of newspapers and read them with relish.

Aside from that, Tina also noticed something.

There were schools in every city of the Flame Empire.

These schools did not teach profound knowledge.

It was the simplest thing.

Literacy!

Most importantly, these schools were completely free!

No matter if it was a commoner or a noble, they could enter these schools for free.

At the same time, the rapidly expanding Flame Empire required a large number of officials, and unlike other empires, the Flame Empire did not directly select officials from among the talents recommended by the nobles, instead, it used a special evaluation system.

The content of the exam involved many aspects. It was not limited to whether or not the person was literate. Instead, the person's ability was more important.

Under the encouragement of such a system, the people of insight from the Flame Empire came out one after another. A large number of talented officials emerged from all walks of life.

“Interesting!”

Tina became more and more interested in the Flame Empire.

In many ways, the Flame Empire was different from the Empires on the Continent of God.

The other empires on the Continent of God did not value basic education as much as the Flame Empire did. Basic education was simple, but it would require a lot of investment.

Even the Eternal Night Empire didn't invest too much in this.

In the Eternal Night Empire, a large number of civilians were also illiterate.

In addition, the Flame Empire also selected officials from the civilian population on a large scale and formed a special system. This set a precedent for the Continent of God.

Ordinary empires would not dare to do this because they would lose the support of the nobles and shake the foundations of the empire but the Flame Empire dared, and no noble dared to say anything.

That was true. The nobles were all busy earning gold coins, and after the Flame Empire withdrew their conscription rights, the nobles could no longer jump up.

If they really wanted to jump up and down, they could be able to solve all the problems with just a token of gratitude.

During this period, Empress Tina would travel with Meng Ying during the day, chatting all the way, and resting in the palace at night.

Empress Tina knew that the Flame Empire started from a small orc tribe.

Why did a fourth ranked god start from a small orc tribe?

Tina wasn't surprised, because she thought the Lord of Flame had other Kingdoms and Empires and the Lord of Flame must have become even stronger, so he needed to expand his Empire.

It was only then that Meng Ying was sent to develop the Flame Empire.

"In less than two years, such a huge and prosperous empire has been built. I'm afraid only the gods of the fourth rank can do so, right?"

Tina thought.

She no longer doubted the power of the Lord of Flame but in her heart, she was even more curious about the Lord of Flame.

As one of the top ten emperors in the Continent of God, Tina's vision was very high.

However, even with her high standards, it was still a miracle that the Flame Empire could achieve this in less than two years.

Everything in the Flame Empire made her feel very curious.

This was unbelievable.

One must know that she had lived for two thousand years. She was knowledgeable, but in the Flame Empire, she had seen a lot of different things. The most important thing was her philosophy!

The idea of the Lord of Flame gave her a sense of identity.

If it weren't for the fact that the Eternal Night Empress was about to break through to the fourth rank, the empire would probably be facing an unprecedented war. Tina was even prepared to follow Flame Empire's example when she would return.

"I wonder where the other Empires of the Lord of Flames are? The Elven Empire? Will there be other kingdoms outside of the Elven Empire?"

Tina thought.

"The Lord of Flame isn't an elf, is he?"

Occasionally, Tina Empress wouldn't think about it.

The huge team continued forward.

Finally, after another five days, it took a total of 20 days for this mission to reach the new capital of the Flame Empire!

In the past 20 days, Tina felt like she had gained a lot.

She could not help but think.

Chapter 415: Recognize the Empress Tina who has been refreshed again and again!

**5: Recognize the Empress Tina who has been refreshed again and again!**

Look, that magic car is like a box. There are so many people in a car; its much more convenient than our carriage.

In the capital of the Flame Empire, the noble girls were pointing at a magic lane.

This capital city was called the Yan Capital. In the Yan Capital, the transportation system was all solved by fixed rail magic vehicles like buses.

In fact, this magic vehicle was similar to the 19th-century tram before Lin Yan was transmigrated.

The difference was that there was no need to lay electric cables, instead the space magic stone was filled in with electric energy and then used as a drive.

A large space magic stone was divided into dozens of parts. The space magic stone inside was filled with electricity, which was enough for the magic vehicle to travel for several months.

The effect of using magic items for civilian use was not ordinary.

Of course, electrical energy was not produced out of thin air.

There was more than one hydropower station in the Flame Empire.

However, electric power was not widely available. It was only widely used in some large cities.

The benefits of electrical energy were widespread and affordable. Unlike magic, it had a very high threshold for entry.

When combined with magic, the electric energy would shine even more brightly. All the electric energy in the power station would not be transported by wires at all. Instead, it would be directly stored in empty magic crystals and sent to other cities for use.

That was why the Lord of Flame wasnt everywhere in the Empire.

There was no loss of long-distance electricity.

There are really a lot of good things in the Flame Empire. I heard that these things were invented by the Lord of Flame. The Lord of Flame is really amazing.

Among the noble girls, a noble girl spoke.

The arrival of the delegation from the Eternal Night Empire attracted the attention of many people in the Yan capital.

Honorable Tina, you have to rest for a long time. I will host a banquet with Queen Qing Ling tonight.

Meng Ying arranged Tina behind the national guest stage.

Sorry to trouble you these days, Honorable Meng Ying.

Tina said.

After a few more words, Meng Ying left the guest of honor.

This national guest platform was located on the side of a river. Its view was very good, and the decoration inside was quite luxurious.

A new type of material was used on the ground, which were the ceramic tiles.

The difficulty of making ceramic tiles was not less than porcelain, especially when the Flame Empire had a large number of Flame magisters.

Of course, the current production of ceramic tiles was not large. Basically, they were used to supply a small number of buildings in the palace.

The tiled floor could be seen everywhere before Lin Yan transmigrated but at this time, the effect was astonishing.

Wow, the floor here is actually made of porcelain. This is too extravagant!

A noble girl's exclamation came from the guest platform.

Yeah, I don't even dare to kick.

Another noble girl said.

A noble girl reminded the noble girls to shut their mouths.

However, everyone's faces were still filled with shock.

They could not tell the difference between ceramic tiles and porcelain. In their eyes, the Flame Empire actually had porcelain on the ground. That was not an ordinary luxury!

In front of everyone, Empress Tina also froze slightly and then she stepped in.

The guest platform was huge and Tina would occupy a building alone.

The noble girls would each have a room.

Some of the high-ranked officials that Tina had brought with her would be well placed.

As for the other thousands of people, they were placed somewhere else.

When the noble girls entered the stage, they could not help but wake up.

Not only were there tiles on the floor, but the walls were also bright tiles. In the hall, there was a pretty crystal chandelier!

There was no candlestick on this crystal chandelier, but a standard electric lamp. When it was turned on, it looked exceptionally beautiful.

Above the crystal chandelier, on the round ceiling, there were some brightly colored walls, which told the story of the Lord of Flame.

This kind of modern style, simple but luxurious decoration, instantly conquered these noble girls.

After they entered their room, they felt like they had become kingdom bumpkins.

They were amazed by the tap water. With the help of the maids specially equipped on the guest table, they learned to use it.

There was also a bright electric light in the room. Some noble girls seemed to have obtained some novel toys and they kept switching on and off. They were all shocked.

Tina was the emperor, so she didn't have to do it herself. The guest station sent a maid to follow her. She was responsible for using all the equipment in the room.

Tina stood on the balcony and looked down at Yan Tu. Her curiosity was growing.

There were many things on this small stage. In Tina's eyes, the principles were not complicated.

However, it was very, very difficult for a person to invent something out of thin air.

However, these innovative things were almost all inspired by the Lord of Flame and the popularity of these things was high. Once they became popular, one would discover that life could be so convenient.

The water flowed when the tap was twisted. There was cold water when it was twisted to one side and hot water when it was twisted to the other side. Such a device couldnt be done without magic. This was simply unbelievable.

The people of the Continent of God had to slowly boil a bucket of hot water to take a bath.

However, in the Flame Empire, it was so convenient.

Of course, this kind of equipment did not reach thousands of households, but it had already become popular among the big nobles and merchants.

Another example was the electric light that could be switched on and off with the push of a button.

There were some new things, such as toothbrushes and toothpaste.

Tina was a saint, so she didnt have to worry about personal hygiene. Magic could solve everything.

However, for countless commoners and nobles who did not know how to use magic, these things would bring great convenience after being popularized.

No one could underestimate these gadgets.

A combination of all kinds of gadgets could make a persons quality of life completely different, as well as the prosperity of an empire completely different.

All of this was reflected in one thing and that was the power of faith!

So, after staying on the guest platform, Tinas speculation about Lord of Flames strength increased.

The curiosity towards the Flame Empire grew stronger and stronger.

She felt that her knowledge had been refreshed.

The lantern was on.

Tina led a few noble girls and other female officials to the banquet.

The banquet was held in the palace.

Although she had heard from Meng Ying that the other Queen of the Flame Empire was a Fox Lady Qing Ling, when Tina saw her Green Spirit, she was surprised.

What surprised her, even more, was the strength of the Fox Lady Qing Ling!

The Fox Lady Qing Ling was already a legendary existence!

In the story of the Lord of Flame, the Fox Lady Qing Ling was mentioned more than once.

Now, the children of the Flame Empire knew that the fox spirit was the first to receive the Lord of Flames favor. When she met the Lord of Flame, the Fox Lady Qing Ling was a 15-year-old Fox girl and the time was almost two years ago!

In other words, the Fox Spirit should be 17 years old.

However, the 17-year-old Qing Ling was already a legendary existence!

Even if the Fox Lady Qing Ling was the Holy Maiden of a god, it was still inconceivable to reach the legend in two years.

Although there was no mention of the Fox Lady's strength, the description of the story showed that the Fox Lady was almost killed by a first-ranked bear.

In other words, at that time, the Fox Lady had not reached first rank.

This meant that she only took less than two years to become a legendary existence!

It was still a legend of 17 years old!

This matter, no matter how one looked at it, did not seem real!

It was so much that Empress Tina froze slightly.

Then, she felt that the Fox Lady was indeed legendary!

It was hard to know the true strength of the strong.

However, the strong side could easily know the strength of the weak side!

In two years, she had never reached the first rank to become a legend!

It did not look real, but it was real!

The Lord of Flame has most likely helped her.

Tina thought.

That was the only way to make sense but two years to help a Fox Lady who was less first rank to the legend, even her sister could not do it!

In fact, no one in the kingdom of the fourth-ranked gods had such speed.

Tina's knowledge was refreshed again.

Honorable Tina, welcome, please have a seat!

Although she wasn't a Sanctuary, she still followed Meng Ying's name.

As Queen, she did not call Tina Empress too polite.

Tina put away her surprise and sat down in the VIP seat.

Soon, the banquet began.

A large amount of exquisite food was served.

The food was exceptionally rich and the method of production was different from the one on the Continent of God.

Honorable Tina, please don't be polite.

Qing Ling said.

Tina picked up a dish and ate it. It tasted delicious.

She had never eaten such a dish before.

Seeing this, Qing Ling and Meng Ying reduced the content of their conversation.

After the meal, Tina felt like she was pregnant.

Honorable Tina, how are these dishes?

Meng Ying asked.

Everything is delicious.

When Empress Tina finished, she couldn't help but ask, Who made these dishes? Is it okay if I send my imperial chef to come and learn?

Meng Ying and Qing Ling looked at each other, and then Meng Ying said, These dishes were made by one of our cooks. However, she learned to make these dishes only after receiving the enlightenment of my God.

It was the Lord of Flame again!

Tina Empress has been surprised to the point of numbness.

The Lord of Flame knew how to cook food!

Heavens!

What kind of God was the Lord of Flame? Why did he have so much time to study this!

#### **Chapter 416: The third rank of Vera! Three blessings!**

After the meal, Tina felt like her knowledge had been refreshed.

It was not only her but also the noble girls and high-ranking female officials she had brought with her.

The food of the Flame Empire was too magical.

One had to know that these delicacies were the ones that Lin Yan had conquered before he transmigrated!

Before he transmigrated, Lin Yan was very particular about eating. He invited more than ten top chefs from different cuisines to cook for him.

In his spare time, Lin Yan himself would pour out some delicious food.

The beautiful chef in the palace of the Flame Empire was a world-famous gourmet. After receiving Lin Yan's revelation, she cooked the food of another world. Even Meng Ying and Qing Ling were full of praise.

Of course, not many people were qualified to eat these delicacies.

Now, these people from the Eternal Night Empire had become the second batch to taste the wine.

Not surprisingly, their taste buds were conquered!

It's so delicious. It would be great if I could eat such delicious food every day.

After a noble girl cleaned up the dishes, she, who used to eat very little, gave off the feeling that I can still eat ten more .

Its over, its over. What are we going to do when we go back? I feel that the food I ate before is boring.

Another noble girl whispered.

Above the banquet, Meng Ying looked at them and smiled.

At the same time, she was slightly moved.

If they were to train more chefs and open large restaurants in the Flame Empire and Eternal Night Empire, it would be a pretty good way to make money.

On the national rank, Meng Ying might not be interested in the gold coins earned by restaurants, but the food in these restaurants was invented by the Lord of Flame.

Once these delicacies were popularized and sought after by hundreds of millions of people, just like the currency war, the reputation of the Lord of Flame would spread more and more.

The people who would eat these delicacies that were invented by the Lord of Flame for a long time, and their faith in the Lord of Flame would become more and more devout.

This was what Meng Ying saw.

As long as it was beneficial to her God, she would be happy to do it.

Moreover, she could earn a steady stream of gold coins.

Gold coins purpose was to make an Empire more prosperous.

It was not that Meng Ying was eager for gold coins.

In fact, even if someone put a golden mountain in front of her, she would not be tempted. Instead, she would think about what kind of benefits this golden mountain could bring to her God.

After dinner, there were some performances.

Meng Ying and Qing Ling chatted with Tina.

Tina did not say what she wanted to do. It was a simple state visit.

However, she hoped to stay in the Flame Empire for a while.

Meng Ying and Qing Ling naturally agreed.

In the Flame Empire, the core secrets were all in the Miracle City of Yan Province. That place had already been protected by the barrier set up by Meng Ying. There was no need to worry about what Tina would steal if she stayed for too long.

Plus, Tina didnt look like she was going to do that.

It wasnt until 10 pm that Tina returned to the guest platform to rest.

Tina did not rest, instead, she thought about what she had seen in Yan Province.

The kingdom of the Lord of Flame gave her a lot of surprises.

This Empire was not as big as the Eternal Night Empire but in many ways, the Eternal Night Empire was even better!

She decided to stay here for a while longer.

At least, stay for another half month.

In Sky Realm, her sister, Eternal Night Empress, was still preparing. She wouldn't be able to launch her attack for half a month.

For the gods of the Heavenly Realm, breaking from the peak of the third rank to the fourth rank was not easy.

Once she reached the fourth rank, she would become a powerful figure who could dominate the entire God Realm or even several God Realm existences.

However, every peak third rank God would face more or less sniping when they broke through.

The situation of the Eternal Night Goddess was even more dangerous because she had always disguised herself as a fourth rank. With the help of Tina Empress, she had a top ten Eternal Night Empire.

It was precise because of the existence of the Eternal Night Empire that the goddess had reached the peak of the third rank so quickly.

Otherwise, she would have to spend at least ten thousand years but now, once the goddess of the eternal night started to break through, her true and false identity would be exposed.

Not only would she be targeted by a large number of snipers, but the Eternal Night Empire would also become a piece of fat meat and be bitten by many gods.

In order to successfully take down the empire, the gods would definitely attack the goddess.

That was why Empress Tina had advised the Eternal Night Goddess to wait. That was why she had said that the Eternal Night Goddess would die.

Tina stayed in the Flame Empire, accompanied by a few people, she started to travel in the western provinces of the Flame Empire. Meng Ying also sent someone to accompany her.

Meng Ying was prepared to accompany her, but Tina felt that she had been with her for a long time, so she didn't want her to.

At the same time, in the heavenly realm, Vera spent several days cracking the advanced Divine energy given by Lin Yan to completely fuse.

She also understood the mystery of higher Divine energy.

Then, Vera started to breakthrough.

The entire breakthrough took her fifteen days.

Five days ago, within her godhead, she finally relied on her strength to generate a drop of high-ranked Divine energy that belonged to her!

Well, it could also be described as an eleventh ranked Divine energy.

This meant that Vera had reached the threshold of the third rank, but she had yet to become a Goddess of the third rank.

In the middle five days, Vera continued to condense an eleventh-ranked advanced Divine energy.

She condensed her original Divine energy into eleventh-ranked advanced Divine energy,

However, her Divine energy was not enough to condense eleventh-ranked advanced Divine energy.

Vera absorbed a lot of the power of faith from the high-ranked sacred stones and converted it into Divine energy.

She spent a total of two hundred high-ranked sacred stones to absorb all the power of faith from the stones and then make them into the high-ranked Divine energy she needed.

This process lasted for five days.

Five days later, in Veras godhead, the content of an eleventh-ranked advanced Divine energy reached the standard.

From this, it could be seen that Veras accumulation was still far from the third rank.

The power of faith contained in the more than 200 high-ranked sacred stones was terrifying. If Vera had accumulated it herself, it would have taken her at least ten years to gather it.

It would also take her many years to develop an eleventh-ranked Divine energy but at that time, with Lin Yans help, she had succeeded in less than a month!

The last five days would be the process of ranking up.

After the first two steps, Vera began to upgrade her godhead.

After five days, Vera finally raised her godhead to an eleventh rank!

An eleventh rank godhead was much higher than a tenth-ranked godhead.

This was a standard, third-rank godhead!

This meant that Vera had become a third-rank Goddess and two months ago, she was not even on the second floor!

Next, what Vera needed to do was to build a Divine body.

Compared to godhead, a Divine body was relatively easy. She only needed resources.

Thats great; Ive finally reached the third rank. I have to tell my Lord that the Lord is still in the sun, right?

Vera thought.

Her heart was filled with gratitude towards Lin Yan but it was not just gratitude.

It was only a small part of gratitude, but it was more about love.

I wonder how the Lords Flaming Divine Body is doing.

Vera was concerned.

Vera was concerned about Lin Yan, who was absorbing special energy from the sun.

This was a necessary step to build the Flaming Divine Body but not every God could succeed.

Gods that did not come into contact with the rules of Flame would not choose to forge the Flame God Body.

Furthermore, to forge the Flaming Divine Body, he needed this god to dive deeper into the sun.

That was the current layer of the Sun of the Heavenly Realm.

The temperature in the ocean was terrifying but what was scary was not only the temperature but also the explosive currents and energy reactions. There were even some substances that were harmful to the gods.

Chapter 418: Tina was shocked! Evil nonsense!

### **8: Tina was shocked! Evil nonsense!**

Tina wasn't the first-ranked Saint, but a second-rank Saint but she also valued the birth of a Sanctuary and at that time someone in the Flame Empire was breaking through to Sanctuary and it only took a few minutes to become a Sanctuary!

In Tina's eyes, this was a little too shocking.

This meant that the Sanctuary's accumulation was very strong!

Otherwise, he or she wouldn't have broken through so quickly!

She also recognized the other aura.

That was the aura of Meng Ying.

I didn't expect the Flame Empire to have such a strong Sanctuary!

Tina thought.

Let's go see who it is.

She flew into the sky and flew in the direction she sensed.

The birth of a Sanctuary was a major event in the Emperor's land.

If some of the older emperors had created a Sanctuary, and that one was willing to stay in the empire, the empire would send invitations to host a big celebration.

Tina found the direction of the aura.

That was the Imperial Palace.

In the Flame Empire's palace, there were only a few maids and female guards.

The entire palace was still divided between inside and outside.

In the inner palace, there were no males.

There were only special discussion halls in the outer palace. During large-scale meetings, male officials or nobles would enter.

In addition, there was actually a temple in the palace.

Fox Lady Qing Ling and Meng Ying usually used to spend a lot of time in the temple.

After all, they were both Queen and Holy Maiden!

Tina hesitated for a moment, but she couldn't suppress her curiosity and flew over.

However, after flying out of the palace, she took the initiative to find the female winged men patrolling in the air and let them report on her behalf.

The winged woman quickly went to report.

The protection of the palace was naturally trinity.

The people above the palace were of course all female. There were three hundred of them, and they were divided into three shifts to guard the sky of the palace.

Did Tina come? She should have sensed the movement.

Meng Ying said.

Sister Meng Ying, let her come. Its fine. Qing Ling nodded.

Meng Ying said, Okay.

After receiving Meng Yings reply, the winged woman came into the air and said to Tina, Honorable Queen, please!

Tina flew in.

She landed on the building in the middle of the palace. It was brightly lit and many female soldiers were guarding it.

In addition, Meng Ying was also there.

Meng Ying, I sensed a commotion. Someone from your Empire has advanced to Sanctuary. Congratulations!

Tina said.

Thank you, Honorable Tina. Meng Ying said.

Tina said, I wonder who broke through to Sanctuary? She broke through in such a short period; her accumulation must be very strong, right?

Meng Ying did not hide it and said:

Its Fox Lady Qing Ling.

The Fox Lady Qing Ling?

When Tina heard these words, her calm face was filled with shock!

It was not her fault!

To begin with, it was already shocking enough to sense that the fox lady was a legend during the banquet.

Seventeen years old legend!

In Lord of Flames story, there was almost no description of Meng Yings age, so Tina didnt know that she was young. She didnt use magic to keep her young.

Otherwise, she would have been even more surprised.

But now that she knew that the one who had broken through to Sanctuary was Qing Ling, Tina was shocked!

The legend of seventeen years old was extremely rare in the Continent of Gods.

Now, the seventeen-year-old Fox Lady Qing Ling had directly advanced to Sanctuary!

It doesn't matter how one looked at it, it did not seem real!

Tina even suspected that the story of the Lord of Flame had been modified.

She deliberately said that she was young.

In order to achieve such an effect, she could highlight the greatness of the Lord of Flame!

In many Empires, the deeds of the gods were modified.

This kind of modification was usually exaggerated!

It was deliberately exaggerated to highlight the greatness of the gods.

As compared to the seventeen-year-old Sanctuary, this possibility was more reasonable!

Seeing Tina's expression, Meng Ying knew she was shocked.

In fact, the power and wonder of her God, the Lord of Flame, shocked even Meng Ying.

There seemed to be nothing that her God could not do.

This was also the reason why Meng Ying was so confident in the Lord of Flame.

The flame had hosted even such an impossible thing.

Then what else could he not do?

Meng Ying responded to Tina's question. She said, Yes, Tina. She is indeed Qing Ling.

Tina looked at Meng Ying and wanted to stop.

In the end, she couldn't help but ask, Meng Ying, is Qing Ling only seventeen?

Tina took a deep breath.

She did not think that Meng Ying was lying to her.

Moreover, the Fox Lady Qing Ling gave her a very young feeling.

Although Qing Ling's ability was very strong and she seemed to be very experienced in many things, whether she was young was actually very easy to feel.

Her unintentional movements and expressions were standard and belonged to a little girl!

Honorable Tina, I'm sorry to disturb you.

At this moment, the Fox Lady walked out.

After breaking through to Sanctuary, her temperament had changed.

Her entire body was filled with a charm.

It could also be said to be a sacred temperament.

Tina looked at Qing Ling.

The Fox Lady Qing Ling was indeed a Sanctuary!

She could not fake the sense of presence between Sanctuaries.

The Fox Lady Qing Lings face-to-face feelings made Tina feel young again!

Even if the story of Lord of Flame was modified, and you didnt want to hide it, Qing Ling wouldnt be over 30 years old.

Tina thought.

This was just a hypothesis.

In fact, she did not think that Meng Ying would hide it.

She congratulated Qing Ling.

After chatting with the two women for a while, she took the initiative to take her leave.

Qing Ling, you just broke through. You need to stabilize yourself, so I wont disturb you.

Tina said.

After parting ways with the two women, Tina returned to the guest room and fell into deep thought.

She did not sleep the entire night.

Her mind was filled with only three words: Lord of Flame!

The next day, Tina became more interested in the Flame Empire. She took a special airship, and with Meng Yings permission, she decided to visit the 14 provinces in the northeast.

Most importantly, she wanted to take a look at what she had just learned, the Endless Desert that had turned into an oasis after the Lord of Flame showed off his miracle!

This time, Meng Ying was accompanying her!

Tina and Meng Ying went to the 13 provinces in the Northeast.

In the Dark Abyss, Angst had been flying towards the densest part of the darkness for over twenty days.

The denser the darkness was, the stronger the dark creatures would be.

Angsts body was still filled with darkness.

No matter how she looked at it, she was an authentic Dark Creature but in reality, she could completely make her aura extremely bright.

This was the rule of light and darkness!

Angst was preparing to attack the Light and Dark Rules!

Any gods did not grasp the light and dark rules in the Heavenly Realm.

Other than the Lord of Flame, there were no gods who had ever come into contact with this rare rule.

Some gods did not even know of this rule.

Angst did not know if there was another Law of Light and Darkness above the Law of Light and Darkness.

However, the matter of law was too far away for her.

In the darkness, Angst flew into the depths of the Dark Abyss without a word.

At this moment, her ears moved because she heard a strange sleep talk.

It was as if someone was whispering in her ear.

It was that gentle, but it sounded extremely evil.

It was evil and strange, making ones hair stand on end.

Pretending to play tricks.

Angsts body surged with power, and immediately after, she began to look for the source of this nonsense.

But very quickly, her brows furrowed slightly because this evil nonsense seemed to come from all directions and it wasnt against her.

It was aimed at this area.

As long as she entered this area, she would be able to hear this kind of evil nonsense.

Angst pondered for a moment and flew in the direction where she was most likely to be mumbling.

She wanted to see, what kind of thing was this evil nonsense!

Chapter 419: Sanctuary fourth rank! The dark sun!

**: Sanctuary fourth rank! The dark sun!**

In the darkness that was so dense that it could not be dissolved, Angst flew quickly.

In this area of the Dark Abyss, the rocks in the air became especially large.

Rocks were as big as a mountain.

The largest was even bigger than the smaller planets before Lin Yan transmigrated.

The entire Dark Abyss looked like the space before Lin Yan transmigrated.

Great, it was too big.

With Angsts speed, she had flown for more than twenty days, but she was still far from reaching the core of the Dark Abyss.

One must know that when Lin Yan was burning, he used the space where the strange stones grew to expand his flame. He had burned for several months, but Angst, who was in the Dark Abyss, could not even sense it.

The size of the Dark Abyss was evident.

This place was not lower than the space.

However, although it was similar to space, the difference between the Dark Abyss and space was that planets in space could move.

The stone in the Dark Abyss grew from space and could not move at all.

Not only could it not move, but the entire Dark Abyss was also completely dark except for some of the burning Flame on the rocks.

No light could be seen there.

This kind of darkness was not only reflected in her vision.

The dark matter in space was also quite dense.

If an ordinary person came and if this ordinary person was not infected with a Dark Creature in the first, second, he could not move in the Dark Abyss.

The dark matter in the dimension was enough to make him feel as if he had fallen into a swamp. It was difficult for him to even walk.

Of course, this assumption was not true because when an ordinary person was thrown into the Dark Abyss, the dark aura would instantly contaminate the ordinary person and he would become an authentic dark creature.

In short, if the Dark Abyss was simply a universe, it was also known as a dark universe!

In Angsts senses, she was still far from the core of the Dark Abyss.

However, the dark aura was also terrifying in this area.

Angst kept searching for the source of the evil nonsense.

That kind of evil nonsense was filled with a mysterious taste. If one listened for too long, it would even bring about a strong brainwashing effect.

After leaving this area, this kind of nonsense would also entangle someone. Someone would always hear this kind of nonsense.

This mumbling was not like what ordinary people imagined. It carried a strong temptation.

It was more like a simple and repetitive syllable.

It was as if the other party was just repeating a certain sound.

However, this syllable had already touched the power of some rules.

Therefore, in her ears, she naturally had some magic power.

This meant that it was at least a Sanctuary-ranked Dark Creature that uttered this syllable.

It could be even higher!

In this area, there were many strange stones in the air.

At this moment, a huge stone appeared in front of her.

This stone was as big as an asteroid.

However, its appearance was much more sinister than an asteroid.

Under the attack of the dark aura, the stone was pitching black.

The stone was filled with sharp spikes, each of which was dozens of kilometers long.

Angst landed on a spike, sensing something.

Sanctuary!

She whispered.

She flew towards the bottom of the spike.

There was a cave that led to the depths of the stone.

Yes, there were very few solid stones in the Dark Abyss. They were basically hollow, but the secret of the stones there was that they were quite big.

Angst went deep into the stone.

Finally, the dark creature she sensed was approaching.

Angst quickly saw the appearance of the Sanctuary-ranked dark creature.

It was a dark creature with endless resentment!

The dark creature's body was empty, which meant that it did not have a real body, but a strange energy body.

In the Dark Abyss, there were quite a number of dark creatures.

The ones with and without entities took up about half of the total.

If this thing were to reach the Continent of Gods, it would be a standard specter.

They could also be called vengeful spirits and evil spirits.

Formless, rather powerful existence.

However, this Saint-ranked vengeful spirit did not move at all when she saw Angst enter. She just lowered her head and stared blankly at her heart.

There was a hole!

Angst stepped on the air and walked over slowly.

With her strength, she could naturally tell that this Saint Domain vengeful spirit wasn't the source of that evil nonsense.

This vengeful spirit was far from qualified!

However, the state of the vengeful spirit also aroused Angst's curiosity.

The vengeful spirit did not have any entity.

Even if they made a hole in their bodies, they could quickly recover.

However, there was a hole in the heart of the vengeful spirit.

Of course, that was only the location of his heart.

Would a vengeful spirit have an organ like a heart?

Angst might have stayed in the Dark Abyss for quite some time, but her understanding of the vengeful spirits was not particularly deep.

Soon, Angst arrived in front of the vengeful spirit.

The vengeful spirit finally sensed her arrival.

After that, the vengeful spirit opened its mouth and let out an ear-piercing scream.

Such screams were not as simple as ear-piercing.

This was a saint-ranked soul attack.

This was a Saint-ranked vengeful spirit. Even a Legendary-ranked existence wouldnt be able to withstand this move.

However, there was nothing wrong with Angst.

Angsts expression did not change much.

She didnt seem to be affected by this scream. She stretched out her hand and grabbed the vengeful spirit.

After capturing the vengeful spirit, Angst began to study it.

Something seems to be missing.

Angst thought.

The cave that the vengeful spirit had destroyed was indeed missing something crucial and this crucial thing was most likely the heart!

The heart of the vengeful spirit!

However, it wasnt a physical heart!

Angst tried to ask the vengeful spirit something, but it was obvious that the vengeful spirit could not communicate at all.

Angst gave up and destroyed the vengeful spirit.

This time, Angst didnt hesitate and directly stripped the laws of darkness that the vengeful spirit carried.

This was a shortcut for dark creatures to grow quickly.

In the past, Angst did not dare to take such a shortcut.

Her strength had increased too quickly, and she couldnt even suppress it. How could she still use this method to increase her strength?

However, Angst was no longer worried.

With the laws of light and darkness, the power of darkness was only pure power to her, and would not corrode her soul.

She needed to further increase her strength so that she could come into contact with more dark secrets.

Angst was still different from pure dark creatures.

If it was a battle between two dark race creatures, the victorious side would completely eat the defeated side.

In comparison, Angst had merely stripped him of the laws of darkness.

Even so, Angsts power increased rapidly.

She was already very close to the Fourth Order Saint realm and this time, after taking the shortcut of a dark race creature, Angst successfully arrived at the fourth stage of the Saint realm!

In the Continent of gods, this was an invincible stage.

Usually, even the most talented Sanctuary would choose to become a God in the fourth phase of Sanctuary and it would not drag on.

It was difficult to reach the fifth stage of the Sanctuary.

It looked like the fifth stage of Sanctuary only needed to comprehend one more rule than the fourth stage.

However, the difficulty lay in.

The current knowledge would greatly interfere with the comprehension of new knowledge.

Comprehension, or in other words, contact with the rules, was not something that one could touch with strength.

As for your original rules, in fact, it would disturb your comprehension of new rules, this was certain.

Therefore, breaking through to Sanctuary was easier than breaking through to Sanctuary.

At a legendary rank, you were a blank sheet of paper.

In the first phase of Sanctuary, you made the first move on this piece of paper.

In the second phase of Sanctuary, you made a second move on this piece of paper.

The more you go to the back, the more you write on this piece of paper.

But you cannot write at will because what you draw is yourself. What you draw in front will determine what you draw in the back. You cant draw blindly, can you?

Therefore, the cultivation of Sanctuary would take longer and longer to complete.

On the Continent of gods, the most talented Sanctuary would only choose to become a god in the fourth stage of Sanctuary. It would take too long to drag on.

The gains did not make up for the losses.

.

The fourth stage.

Angst stood there, experiencing the changes in her strength.

She had no intention of becoming a God.

As an Elf, it only took a thousand years for her to become the fourth stage of Sanctuary. It was evident how talented she was.

Of course, this also meant that there were shortcuts in the darkness.

An hour later, Angst set off again.

After becoming the fourth stage of the Sanctuary, Angsts speed increased by a lot.

She continued to search for the source of the nonsense.

This search lasted for a few days.

In the past few days, Angst had encountered two dark creatures at the Sanctuary rank.

Whether it was physical or non-physical, they all had one thing in common. The heart was gone.

Strange!

This matter was somewhat strange.

Angst went deeper.

Another day passed and she stopped. She looked forward with a frown.

There, within Angsts senses, there was an enormous creature.

The giant seemed to be one wellspring of darkness.

From its body, endless dark matter gushed out, making the darkness in the Dark Abyss even denser.

That monster was not life.

If it was easy to understand, it was a small sun.

It wasnt particularly large, but it was only a few hundred kilometers in diameter.

The sun of the Heavenly Realm emitted light but it was emitting darkness!

Chapter 420: Great harvest! Deep in the dark sun!

**: Great harvest! Deep in the dark sun!**

This giant was like a dark sun!

Inside it, the dark aura kept gushing out endlessly.

Angst had never thought that there would be such an existence in the Dark Abyss!

A black sun!

Could it be that all the darkness in the Dark Abyss originated from this thing?

However, the dark aura from the black sun could not fill the entire Dark Abyss, it was just a small sun with a diameter of several hundred kilometers.

Angst stared at the dark sun.

In this dark sun, Angst saw a lot of mysteries related to dark energy.

Under the wash of darkness, Angsts long hair fluttered.

The boots under her feet had already turned pitch-black under the influence of darkness.

Angst stood there on her boots and began to observe.

After observing for a long time, Angst finally moved and walked into the dark sun.

As soon as she entered, she was surrounded by darkness that was so dense that it could not be dissolved.

The pressure of the darkness was too terrifying.

Even if it was a legendary magister on the Continent of God, if he dared to enter this dark sun, all the powers of this legendary magister would be instantly contaminated.

With Angsts strength, it would not be a problem.

However, she did not go deeper, instead, she stayed on the surface of the dark sun.

In her ears, there was still that evil nonsense that seemed to be everywhere.

However, Angst temporarily gave up on the search for such evil nonsense and decided to study the secret of this dark sun first.

In the Dark Abyss, Angst was quite interested.

She quickly broke the secret of the dark sun.

Without any worries, this former genius elf was truly reborn.

This allowed her to study all the secrets of this world without worry!

The sun of the Dark Abyss had Angst.

In the sun of the Heavenly Realm, Lin Yan had gained a lot in those days.

He was getting closer and closer to the twelfth rank.

In addition, Lin Yan also collected a lot of Divine substances.

In the sun of the Heavenly Realm, Divine substances would appear from time to time. Whether or not they could find them would require patience and time, and it would depend on luck.

Obviously, Lin Yan had always been the type with good luck.

In the blink of an eye, another few days passed.

Lin Yans Divine body had finally reached twelfth rank.

However, to reach thirteenth rank, the resources in his hands were not enough.

After the Flame Physique was successfully forged, not only did he need the energy of the sun, but he also needed other resources to nourish the flesh of the Divine Physique.

These resources needed to be purchased in the Divine Domains.

Then lets collect more Divine substances.

Lin Yan thought.

He was still in the current layer of the Heavenly Realm Sun.

In the ocean current layer, the material flow in the sun was very large. Although there were Divine substances inside, the amount was already quite rare.

After all, the second and third-level gods usually searched for the Divine matter at this location.

After thinking about it, Lin Yan decided to change back to his flame form and then go collect the Divine substance.

His Divine body was only twelfth ranked. Even if it was a blazing body, it could not go too deep into the sun of the Heavenly Realm but the form of the flame did not matter because like a flame, Lin Yans temperature was not low in the form of a flame.

He was not afraid of the heat.

He was not afraid of high pressure.

He was not afraid of the substances that were harmful to the gods.

Therefore, Lin Yan turned into flames.

After turning into flames, Lin Yan spread his flames.

Soon, Lin Yan spread the flames into a large net with a diameter of several hundred kilometers.

With Lin Yans current strength, even if he spread the flame so wide, as long as Lin Yan didnt maintain too high a temperature, he basically didnt consume it.

Such a large area was beneficial for searching for Divine substances.

After all, common deities could only sense around 100 to 200 km in the sun of the Heavenly Realm.

The further down they went, the narrower the sensing range became!

Not enough.

Lin Yan muttered to himself.

Thats right. A large network of hundreds of kilometers was still too small for such a huge heavenly sun.

Therefore, Lin Yan began to inject energy points and spread the flame even wider.

Lin Yan took the initiative to lower the temperature by quite a bit. This way, he could use the minimum number of energy points to spread the flame wider.

Right at that time, Lin Yans energy points had already reached several tens of digits.

Who knows how long it would take to consume all of them.

Furthermore, due to Natashas war in the abyss, Lin Yan had a lot of energy points every day.

It could be said that Lin Yan did not need to worry about using up his energy points.

With Lin Yan continuously injecting energy points, his flame continued to expand.

Soon, Lin Yans flames expanded into a net of fire that was over ten thousand kilometers in diameter!

The thickness of this net of flame was not very thick.

The temperature wasnt too high.

The terrifying energy within the sun of the Heavenly Realm did not affect Lin Yans flame at all. Instead, it could save quite a bit of strength for Lin Yan.

Almost there.

Lin Yan thought.

Then, Lin Yan moved.

This fire net with a diameter of tens of thousands of kilometers quickly entered the depths of the sun.

As long as there was a Divine substance on the path of this net of fire, Lin Yan would throw it into his storage space.

This method was many times faster than the Heavenly Realm gods!

The gods of the Heavenly Realm did not dare to go too deep into the sun.
