Chapter 2721: Follow Me to Slaughter Everyone in the City (2)

2721 Follow Me to Slaughter Everyone in the City (2)

Seeing this scene, the guy who shouted that Yang Ke was full of lies and the village leader were dumbfounded.

“So strong.”

“How can a Sea Establisher have such terrifying combat power?”

“He said that this is a divine-quality technique?”

“Hiss, he’s the only one attacking. One against thirty?”

Stepping on a knife light, Yang Ke instantly appeared beside the person who had just said that he was lying and said indifferently, “This is the Heavenly Void Divine Movement Technique.”

“Puff ~”

A Sea Establisher was killed with a single slash without even having a chance to resist.

The other four people who came with Yang Ke didn’t take action. They just looked at everything and sighed. “Old Yang is too impulsive. After all, they are fellow humans. I’m afraid it’s not appropriate to kill them all! Should we stop him?”

The other person said, “Don’t. Old Yang is a human, but you and I are not, so you and I can’t sense his feelings. Since he is determined to attack, let him! But we can’t let him bear the blame alone. If Master Human Emperor blames him, we’ll take the blame together with him.”

Yang Ke went on a killing spree. No one here was his match. Faced with this one-sided massacre, the village leader simply shouted, “Stop! Yang Ke, stop! We are willing to go!”

The other guy who retorted Yang Ke was also scared out of his wits. If he had known that Yang Ke was so powerful, he wouldn’t have dared to confront him so arrogantly!

He said, “I’m willing to leave too.”

However, Yang Ke shook his head. “The village leader can, but you can’t.”

Yang Ke didn’t kill the village leader because the village leader had great influence in the village and was a representative of the entire village. If the village leader died, it might cause great dissatisfaction among the humans in the village. If they didn’t leave with him, it would be counterproductive.

The man was anxious and immediately shouted, “Why can’t I? You are so powerful. Why didn’t you show your strength at the beginning? If you had shown your strength earlier, I would have been willing to go with you!”

Yang Ke said indifferently, "I didn't want to attack my own kind, nor did I want to use my strength to subdue you. However, you can't tell right from wrong, so I think it was a mistake for Master Human Emperor to decide to save all human beings. Some people are not worth saving."

"Puff ~"

When Yang Ke killed this person, everyone in the Earth Dragon Village was shocked.

It was true that Yang Ke killed a Sea Establisher from his village, but what Yang Ke showed was a different human race, a powerful and unyielding human race.

"I'm leaving. Whether it's true or not, I don't want to live forever under the enslavement of the Ten Thousand Scale Race."

"Although I don't know if this decision is right or not, I at least know that some people are fighting hard. That's enough."

"Brothers, I'm going. If the Ten Thousand Scale Race is destroyed, it will be the blessing of our human race. Even if we fail and die, it's better than living under someone else's roof for the rest of our lives."

As for the village leader, after realizing Yang Ke's strength and knowing Yang Ke's determination, he also tried to prevent himself from being killed by Yang Ke, so he said, "Everyone, as you can see, there is still hope for our human race. There are still people fighting. Let's go. Let's go and see the counterattack of the human race..."

It wasn't until everyone entered Yang Ke's Origin Sea that he let out a long sigh of relief.

At this moment, someone asked, "Brother Yang, you've already started a fight. Why do they approve of you instead?"

Yang Ke said indifferently, "It's not that they approve of me. Some of them left with me. The rest of them were worried that they would be punished if we failed, so they simply left with us. In the end, they haven't completely trusted us. Many people don't believe that we will win. But that's not important. What's important is that they left with me. I may not be able to convince them, but Master Human Emperor definitely can."

The dozens of people from the City of Wanderers were also shocked. They had seen strong masters, but rarely had they seen such strong-willed and domineering human powerhouses.

Yang Ke came to them. "Let's go! Time to meet up with others."

The teleportation array was activated, and Yang Ke and the others crossed multiple directional teleportation arrays that had been drawn and came to the agreed meeting place.

Each city had a rendezvous point. Each city had hundreds of small villages under its jurisdiction. When Yang Ke and the others arrived at the rendezvous point, nearly a thousand people had successfully gathered here, which meant that nearly 200 villages had been rescued.

Because saving people was about efficiency, the Seven Kill Army that was sent out back then gathered very quickly with the help of the City of Scavengers.

And the more remote, the laggard, and the lower-ranked the cities were, the faster the Seven Kill Army gathered. This was because the people in these places hated the Ten Thousand Scale Race even more.

Every time there was a tidal wave, their entire village might be destroyed, and they lived in danger everyday and had to face the oppression of the Ten Thousand Scale Race. With their lives in such a state, when the human race launched a counterattack, even if this matter was fake, they would rather believe it was true, because many people didn't want to live such a life anymore.

The assembled Seven Kill Army was waiting for the Sky Opening Realm powerhouses who came to pick them up.

However, the Seven Kill Army didn't know if anyone would come to receive them. Their mission was to take away the humans in the village and gather them together.

Under such circumstances, ordinary people would guess that someone must be coming to receive them. Otherwise, it wouldn't be realistic for them, mere Sea Establishers, to cross the huge Chaotic Wasteland. In addition to the ominous creatures they encountered midway, they might not even be able to figure out the right direction, let alone escape.

[God of Fishing](#)

Chapter 2722: Follow Me to Slaughter Everyone in the City (3)

2722 Follow Me to Slaughter Everyone in the City (3)

Sure enough, they didn't wait long. In less than half an hour, a Sky Opening Realm powerhouse appeared at the rendezvous point.

...

Han Fei's plan was divided into two steps. The first step was to cause astronomical phenomena and have the Seven Kill Army and the City of Wanderers persuade the humans in the villages to leave with the Seven Kill Army.

However, it was easy to save people, but these villages were too scattered. It was definitely unrealistic to save so many people at once.

Therefore, the second safeguard arranged by Han Fei was to let Sky Openers pick them up. However, this premise was that the various cities would be in a war. Otherwise, with such a large number of humans gathering, it was easy to be discovered and targeted.

Most importantly, they had to prevent Monarch-level strong masters from interfering, so someone had to restrain the Monarchs of the City of Scavengers.

The City of Origin was always a variable. If they fought blindly, the City of Origin would definitely reap the benefits. Therefore, destroying the City of Origin was the best choice.

Of course, there were still a group of Sea Establishers and Sky Openers in the City of Scavengers. They might be hiding in a training field or somewhere like that. But now, these people must have moved.

But this didn't affect Han Fei's plan. Even if these people moved, they were still a certain distance away from the battlefield of the cities under the jurisdiction of the City of Scavengers, so they could be ignored for the time being.

Furthermore, most of the Sky Opening Realm powerhouses in the Seven Kill Army weren't here to receive the humans from the cities, but to ambush these hidden powerhouses.

At this point, the war between the human race and the Ten Thousand Scale Race had become a battle between the the City of Scavengers and the City of Wanderers.

Now, what Han Fei needed to do was to take everyone into his Origin Star.

It was actually not difficult to achieve this.

At this moment, some of the Sky Opening Realm powerhouses in the Seven Kill Army had already gone to the gathering places outside the major cities. Because they had practiced the Heaven Deceiving Technique, the probability of being discovered in advance was very low. Besides, these people actually moved with the City of Wanderers, which was why Han Fei had to wait for seven days.

At this moment, outside each of the 132 cities under the jurisdiction of the City of Scavengers, the Sky Opening Realm powerhouses of the Seven Kill Army appeared.

These people had all entered the Star Transformation Realm. After these people received the Seven Kill Army, they immediately put them into their Origin Stars.

Then, the Sky Openers of the Seven Kill Army crossed the Star Sea Quagmire and stepped into the Sea of Stars.

In the Sea of Stars, there was a relatively dim star floating. Around this star, there were a total of 132 shining stars.

At this moment, the 132 Sky Opening Realm powerhouses all came to the periphery of this dim star and transmitted their voices to it.

"Master Human Emperor, we've returned safely."

"Enter!"

Yes, this dim star was Han Fei's Origin Star. And the surrounding 132 stars were the Origin Stars of the Sky Opening Realm powerhouses of the Seven Kill Army, who refined their stars and brought them here. In this way, they could teleport over an ultra-long distance.

Han Fei learned this trick from the Infinite Mining Area, which was quite useful.

Swish! Swish! Swish!

In Han Fei's Origin Star, strong masters arrived one after another.

The countless humans in the Raging Sea looked at these unfamiliar Sky Opening Realm powerhouses in confusion.

A strong master said in surprise, “Hey! Who are these people? They don’t seem to be from our Heaven Realm.”

Someone shook his head. “Definitely not. I haven’t seen any of these people, but their auras are very powerful.”

Someone said, “Isn’t it obvious? There aren’t so many Emperors in our Raging Sea! They must be subordinates of Master Human Emperor, right?”

Someone clicked his tongue. “Master Human Emperor must be preparing something. Didn’t Master Human Emperor say that he wanted us to witness the rise of the human race? He also said that the Ten Thousand Scale Race enslaved our human race in the outside world, and the human race might be going to war, so these strong masters came out.”

Someone nodded quickly. “That makes sense.”

However, while these people were discussing in secret, these Sky Opening Realm powerhouses all showed their world phantoms. At first, a group of Sea Establishers appeared out of thin air. Then these Sea Establishers also showed their Origin Sea phantoms. In the next moment, everyone was shocked.

Hundreds of thousands of people were released from the Origin Sea of every Sea Establisher.

...

The humans under the rule of the City of Scavengers didn’t know where they would be taken, but they knew that these people probably wouldn’t harm them.

First of all, they were all humans. In the Chaotic Wasteland, there was no reason for humans to harm humans.

Besides, the deaths of Monarchs had convinced many people of the existence of the Human Emperor, so they were not anxious but waiting.

However, after only a moment, they were released.

Buzz—

In terms of strength, although these humans from the Sea Realm were all enslaved, they were still much stronger than the people in the Raging Sea.

This couldn’t be helped. If they weren’t strong, they wouldn’t have been able to survive until now.

At this moment, when these people appeared in Han Fei’s Life Star City, they were all stunned.

[God of Fishing](#)

Chapter 2723: Follow Me to Slaughter Everyone in the City (4)

2723 Follow Me to Slaughter Everyone in the City (4)

“What rich spiritual energy. I didn’t know that there is a place with such rich spiritual energy in this world.”

“Heavens, we are not in the sea. This is... this is the legendary land, the land that only exists in primitive graveyards.”

“Heavens, is this a tree? Is this the true appearance of the rotten dead trees in the Chaotic Wasteland?”

“Hiss! Spiritual fruit, I see a spiritual orchard.”

There were even some elders among these people who were prostrating on the ground, kissing the mud under their feet. The smell of vitality seemed to be irresistible to them.

However, before these people had the time to sense the fairyland-like environment around, they felt countless perceptions sweep over. They naturally swept their perception over too. Then they saw many, many people. They had never seen so many people in their lives.

“Hiss!”

“How, how can there be so many humans? I can’t even count them with my perception range.”

“Look, their clothes are different from ours.”

“These people don’t look very strong. In fact, they seem a little weak!”

“No, there are strong masters among them, but not many.”

Immediately, someone boldly asked, “Human compatriots, which village are you from?”

However, a lot of voices immediately responded.

“We’re from the Raging Sea.”

“We are from the Thirty-Six Mystic World.”

“We are from the Heavenly Realm.”

“We are from the original Yin-Yang World. Are you from the Sea Realm?”

“Did Master Human Emperor save you?”

For a time, there was a hubbub of voices, chattering and asking all kinds of questions.

The humans in the Chaotic Wasteland were all dumbfounded.

Raging Sea?

Thirty-Six Mystic Worlds?

Heavenly realm?

Outside world?

For a moment, these people looked at each other in bewilderment. Could these be human beings from Origin Grounds?

At this moment, Han Fei’s huge face appeared in the sky.

For a moment, the people in the Raging Sea all shouted.

“Master Human Emperor.”

“Greetings, Master Human Emperor.”

“Your Majesty, have we already won?”

“Master Human Emperor, has the Ten Thousand Scale Race been destroyed?”

“Master Human Emperor, do you need us to help? We’re ready.”

Everyone in the Raging Sea knew Han Fei. His statues were erected everywhere in the Raging Sea, but no one under the rule of the Ten Thousand Scale Race had seen Han Fei’s appearance.

At this moment, it was the first time they had seen the true appearance of this so-called Human Emperor. This made them finally confirm that the people of the Seven Kill Army weren’t lying to them. There was really a Human Emperor in this world. He was really saving them.

Han Fei said, “My fellow human beings in the Chaotic Wasteland, welcome back to the human race. My name is Han Fei, and I am the current Human Emperor. This place is my Origin Star. The people you see now all come from the ancestral land of the human race, the Raging Sea. A hundred thousand years ago, your ancestors arrived in the Sea Realm and were enslaved by the Ten Thousand Scale Race, so you had to live a life of enslavement by the Ten Thousand Scale Race. However, today, I’m here. Our human race’s counterattack has already begun...”

“Ah! Master Human Emperor, thank you, Human Emperor.”

Some people burst into tears and fell to their knees, especially some old people who had lived in the Raging Sea for too long. Here, they could only live desperately without any dignity or sense of security.

But now that the human race had an emperor, the sealed hope in their hearts was ignited again.

Someone shouted, “Thank you for saving our lives, Master Human Emperor.”

“Thank you, Master Human Emperor.”

However, Han Fei’s voice resounded between the heavens and earth. “As the Human Emperor, I don’t need your gratitude. The war isn’t over yet. It’s just the beginning. Now, be it the human race from the Raging Sea or the human race in the Chaotic Wasteland, anyone above the Explorer realm, soar into the sky. I’m going to lead you to counterattack the Ten Thousand Scale Race. I want you to know that whoever offends our human race will be executed no matter how far away they are...”

In the end, Han Fei shouted, “I want the Ten Thousand Scale Race to be wiped out... All of you, follow me to slaughter everyone in the City of Scavengers.”

[God of Fishing](#)

Chapter 2724: Human Race Crazily Slaughtering (1)

2724 Human Race Crazily Slaughtering (1)

“Slaughter, slaughter, slaughter...”

“Master Human Emperor, why are you only bringing Explorers or above? Are the enemies here so strong?”

“That’s right! Master Human Emperor, is there a battlefield for Law Enforcers? We want to fight too!”

An powerhouse above the Venerable realm laughed and flew across the sky, shouting, “Everyone, I will help you kill the people of the Ten Thousand Scale Race.”

Someone grinned and said, “Great, the Raging Sea has been too peaceful for hundreds of years, and the sea demons have disappeared without a trace. I’ve been itching for a fight.”

“Damn it, they bullied our human race. They deserve to be exterminated.”

“...”

Although the humans in the Raging Sea weren’t very strong, they were quite tough in terms of combat.

That was because they had been fighting sea demons all year round. The Raging Sea before was so dangerous that no one could guarantee that he would be safe when he went to sea. What they faced were real life-and-death battles.

Unlike them, although the people in the Chaotic Wasteland had strong combat power, their enemies were mainly ominous creatures, and to deal with ominous creatures, they mainly used Clean Stones. Those who could hold up half of the sky were old people who had been through battles. Furthermore, in terms of life-and-death battles, even if they were stronger, they might still be forcefully killed by the people in the same realm from the Raging Sea.

At this moment, the human powerhouses from the Raging Sea couldn’t wait to fly into the sky, all of them full of fighting spirit. It wasn’t that they really wanted to fight, but they needed resources. As Han Fei had said before, resources were everywhere in the Sea Realm.

There were still many Venerables among the people who had been rescued from the Chaotic Wastelands. They were so strong although they had been enslaved. What if they weren’t enslaved?

Now, Han Fei was going to take action. Many of the people above the Venerable realm from the Raging Sea had fought side by side with Han Fei and participated in the war against the sea demons. They had made a fortune.

They knew that going to war with Han Fei would definitely bring them a lot of benefits.

However, when this scene fell on the eyes of these people in the Chaotic Wasteland, their feelings were completely different. They had never seen such crazy humans. Billions of humans were shouting, roaring, and their voices shook the sky, even causing the ground to tremble.

The transmission of emotions made the blood of these humans in the Chaotic Wasteland boil.

Perhaps at first, they had doubts, fear, and anxiety, but the scene of tens of millions of people roaring was really unforgettable.

What made them most excited was Han Fei. What kind of person could make so many human powerhouses admire him so much?

But at this moment, they had no time to care about that. This person was here to help them. The hundreds of millions, billions, or tens of billions of fellow humans made them feel a sense of belonging that they had never felt before. Even if it was for this sense of belonging, they couldn't flinch.

When the human powerhouses gathered, Han Fei had already returned to a place not far away from the Raging Sea through the previous teleportation array. As soon as he came out, Han Fei burst out at his fastest speed.

As for the Ten Thousand Scale Monarch's side, although they were restricted to the City of Scavengers, all kinds of orders were issued. The big cities ranking in the top 50 had basically all received the signal to retreat.

As for those cities further away, he simply chose to give up.

The Ten Thousand Scale Monarch knew that Han Fei wouldn't take part in this kind of trial personally for the time being. Han Fei's plan to take the human race away wasn't as simple as saving people. What he wanted was the human race's counterattack. This was a war between races and the prerequisite for him to become the true Human Emperor.

Besides, Han Fei was very strong. Few people below the Monarch level could resist him. Therefore, Han Fei wouldn't attack unless he had to.

In that case, he would let the human race and the people in the City of Scavengers fight first! Anyway, outside the first 50 cities, there were only a limited number of strong masters of the Ten Thousand Scale Race guarding the cities. Most of the people were from the Blade Clan, the Frogmen Race, and other enslaved races. It wouldn't be a pity if they died.

As long as there was no problem with the core of the City of Scavengers, these giant cities could be rebuilt.

...

The 132nd City, Heavenly Wave City.

The guardian of the Heavenly Wave City was only a Sky Opening-realm Ten Thousand Scale Race powerhouse who hadn't even entered the Star Transformation Realm. There were no more than 23 Sea Establishment Realm powerhouses in the city, including less than 50 people from the Blade Clan, the Frogmen race, and other races. And in the city, half of the residents were from the human race.

At this moment, Crab Lingfei, a Sky Opening realm powerhouse from the City of Wanderers, was attacking the city with more than 60 Sea Establishment Realm powerhouses and more than 3,000 Venerables.

Because this was the weakest city under the City of Scavengers, although the combat power of the City of Wanderers was not enough, the temporary siege could be completely maintained.

Of course, the 3,000 Venerables were just bystanders, because the Heavenly Wave City had a population of nearly 2 million, including more than 300,000 Venerables.

If it weren't for the more than sixty Sea Establisher powerhouses from the City of Wanderers, they would have been killed long ago.

At this moment, Crab Lingfei shouted, “Humans in the Heavenly Wave City, your emperor is back! The day of your liberation has come. At this time, don’t help these b*stards of the Ten Thousand Scale Race anymore. Help us from the inside, and let’s kill these b*stards of the Ten Thousand Scale Race together.”

Someone roared, “Do you see the strange astronomical phenomena in the sky? That’s our human emperor counter-attacking and killing Monarchs. The end of the Ten Thousand Scale Race is coming. Please abandon this city and go with us to kill the enemy with us.”

God of Fishing

Chapter 2725: Human Race Crazily Slaughtering (2)

2725 Human Race Crazily Slaughtering (2)

“B*llshit.”

The mayor of the Heavenly Wave City shouted angrily, “This fart stinks! This so-called astronomical phenomenon is just an illusion created by the City of Wanderers. Dozens of Great Dao cracks have already appeared. How can there be so many Monarchs in the Chaotic Wasteland? Do you think anyone will believe you, silly crab?”

Crab Lingfei said, “You don’t even know that you’re about to die. If the strong masters of the human race come, you won’t even have a f*cking chance to run.”

Crab Lingfei and the mayor of the Heavenly Wave City were fighting and cursing each other, not giving in to each other at all.

The humans in the Heavenly Wave City were all puzzled. To be honest, they didn’t believe Crab Lingfei’s words at all, but it didn’t seem to be a bad thing for them that the people from the City of Wanderers were besieging the city. If they had a chance to follow the people from the City of Wanderers, they might be able to gain freedom.

Unfortunately, now that the city protection array was activated, they couldn’t go out. As for initiating internal strife, they really didn’t dare to. The City of Scavengers had absolute dominance in the territory of scavengers.

If they really rebelled, what would happen to them if they couldn’t escape, or if the people from the City of Wanderers ran away? What awaited them would be the fury of the Ten Thousand Scale Race.

Therefore, most humans in the city just fought passively and didn’t respond to the people of the City of Wanderers.

It was almost two hours after the battle began.

Suddenly, a figure broke out of the void.

The mayor frowned. Not good! Another Sky Opening Realm powerhouse has come! And I don’t feel anything when he shows up. His strength is probably above mine.

This person immediately wanted to escape, but when he wanted to escape, he found that this world was sealed by a Sky Hanging Shield Armor, and he couldn’t break through at all.

Buzz!

More than ten million people suddenly appeared beside that person. Among them, more than 90% were Explorers, and less than 5% were Venerables. There were only more than 300,000.

And there were actually more than 70,000 Sea Establishment Realm powerhouses.

This scene stunned the mayor of the Heavenly Wave City. How were they going to fight? Why were there so many Sea Establishers?

He could understand that there were more than 300,000 Venerables, but 70,000 Sea Establishers? Was that a dream? Also, why were there so many explorers? Where did they come from?

Was his lame city worth paying so much attention to?

In fact, although the mayor was shocked, he didn't know that these were all the strong masters from the various villages both in the Raging Sea and the Chaotic Wasteland.

Han Fei had once stayed in the Little Sea Village. There were 300,000 people in that village, but there weren't many Venerables, only about 300.

However, the Mountain City that ruled the Little Sea Village had 3 million people, but the number of Venerables reached 900,000.

The gap between the two was truly huge. It was conceivable that many venerable-level powerhouses in the villages had been absorbed into the cities, and only a small number of them who were old or couldn't advance would be left in the village.

This was why Han Fei only let the Seven Kill Army rescue people from villages at the beginning. This was because the cities under the City of Scavengers were very strong, but the strength of the villages was too weak. They couldn't resist the cities at all. Even if all the villages joined force, they wouldn't even be able to resist a single city.

It was precisely because of this that the human race had been enslaved and had no room to resist. Even though Han Fei had saved almost everyone in all the villages, there weren't many venerable-level powerhouses.

Plus the Venerables from the Raging Sea, they were only comparable to the Heavenly Wave City. However, now that the 70,000 Seven Kill Army soldiers had all returned, their combat power was completely incomparable to these cities.

Han Fei shouted, "My fellow human beings, this is the 132nd city under the rule of the City of Scavengers, the Heavenly Wave City. Charge in and kill all the non-human powerhouses. Whatever you can grab from the city is yours. Anyway, we're not taking any prisoners. We're here for revenge. Kill..."

"Kill!"

"Charge!"

"Ula~"

"For the rise of the human race."

“For the Human Emperor.”

“For the humans who were enslaved in the Chaotic Wasteland.”

“Those who offend our human race will be executed no matter how far away they are.”

“...”

The human army swarmed at the Heavenly Wave City like a tide, shouting all kinds of slogans.

The human guards in the Heavenly Wave City were dumbfounded. Are these guys humans?

“So, the people in the City of Wanderers aren’t lying?”

“Hiss! Our human race has an emperor?”

“Heavens, those people seem to be Sea Establishment Realm powerhouses.”

“Does our human race have so many Sea Establishers?”

“Has the human race really rebelled? And there are so many strong masters? Are we really going to be free?”

At this time, Han Fei’s voice resounded in the Heavenly Wave City, “My compatriots in the Heavenly Wave City, I am Human Emperor Han Fei. I’m here to liberate the human race and destroy the Ten Thousand Scale Race. As you can see, we are counterattacking. The Monarchs of the City of Scavengers have been executed. Now, turn the weapons in your hands and kill through the Heavenly Wave City...”

After that, Han Fei added, “My fellow humans, you have half an hour. After conquering the Heavenly Wave City, we’ll go to the next city.”

Then, Han Fei pointed his finger and shattered the barrier protecting the Heavenly Wave City. This kind of barrier was no longer meaningful to him.

[God of Fishing](#)

Chapter 2726: Human Race Crazily Slaughtering (3)

2726 Human Race Crazily Slaughtering (3)

As for the Sea Establishment Realm powerhouses at the forefront, they had already rushed into the sky in the blink of an eye. The Sea Establishment Realm powerhouses from the City of Wanderers who had come to attack the city were dumbfounded.

Are you really here to fight? They only have fifty Sea Establishers in total, but you have sent seventy thousand Sea Establishers. Are you serious?

Among the fifty or so Sea Establishment Realm powerhouses, there were four human beings. At this moment, they had already turned around and charged at the Ten Thousand Scale Race Sea Establishers.

Unfortunately, their speed was still not fast enough. Before the people of the Seven Kill Army could completely rush over, those who were fast had already killed more than 50 Sea Establishers.

All this happened in the blink of an eye. How long would it take for 70,000 to fight 50? The latter were wiped out in less than half a second.

The Sea Establishers of the Ten Thousand Scale Race, the Blade Clan, and the Frogmen Race didn't even have time to react before they died. They didn't even have time to feel despair.

The Venerables' battlefield was also in the sky. At this moment, because the humans in the Heavenly Wave City rebelled, the number of the human Venerables on Han Fei's side soared to more than 500,000, while the Heavenly Wave City's Venerable army only had less than 200,000 left. This was almost a three-on-one battle. In addition, Han Fei had left many inherited great techniques to the Raging Sea, so the situation was also one-sided.

"Puff! Puff! Puff!"

One after another, blood color bloomed in the sky above the Heavenly Wave City.

"F*ck, slow down. That's my opponent."

"At a time like this, what's the difference between your opponent and mine? This is our common opponent."

"F*ck, who can save one for me? I haven't fought with these guys yet. Are they strong?"

"It's your fault for being so slow. There are so few people here. You have to be quick to get one to fight."

"Don't touch him! He is mine... Puff..."

"Damn, I told you not to touch him..."

On the battlefield of the Venerables, the situation was one-sided.

As for the battlefields for Explorers, they were mostly held at the low altitude above the Heavenly Wave City. This was even crazier than the battles in the Sea Establishment realm and the Venerable realm.

There were only less than 2 million people in the Heavenly Wave City. After deducting the more than 300,000 Venerables, there were only 1.7 million people left. Even if half of the more than 1.7 million people were human beings, there were less than a million from the Ten Thousand Scale Race, the Blade Clan, and the Frogmen Race.

Ten million people fighting a million people had made this battle a ten against one fight. It was even difficult for the humans to find someone to fight.

Someone shouted angrily, "Stop it! Can't you leave me an opponent?"

"Are you crazy? There's still the next city. What are you scrambling for?"

"Heh, you're the one who scrambles most fiercely. How can you blame others?"

In the Heavenly Wave City, in addition to Explorers, there were also people below Explorers. These people were actually not very interested.

Someone was even hesitant. "These people aren't even Explorers. Wouldn't I be bullying them if I attack?"

“You’re too soft-hearted. This is a war between races. These things have enslaved our human race for 100,000 years. Do you know how long that was? Do you still sympathize with them?”

“But the humans weren’t enslaved by these people!”

“That’s bulls*it. Under the tide, no drop of water is innocent. Didn’t you hear what Master Human Emperor said? Exterminate the Ten Thousand Scale Race and spare no one. Is it the right time for you to show compassion? If you can’t make it, get lost.”

...

The humans were slaughtering crazily, and the Ten Thousand Scale Race, the frogmen, and the Blade Clan people in the Heavenly Wave City were all stunned. They didn’t know how to fight back at all.

Someone even scolded angrily, “Villain, you are all villains.”

“All of you are murderers. How dare you slaughter the weak?”

“You even killed children below the Law Enforcement Realm. Are you still human?”

However, the enslaved humans in the Chaotic Wasteland had already been on a killing spree. “How dare you mention slaughtering the weak to us? Do you know how to care about children? Why don’t you care about the children of our human race? Our human race has been enslaved for 100,000 years. Countless humans have died in battles year after year. Have you ever sympathized with us? Now, you say we are villains. Are you qualified?”

“Kill ~”

“Puff! Puff! Puff!”

Han Fei looked at all of this indifferently. What he wanted was to slaughter everyone in the city except for the humans. In this kind of race war, there was no mercy to speak of. The humans in the Chaotic Wasteland had been suppressed for too long.

They hated the Ten Thousand Scale Race, hated everything about the Ten Thousand Scale Race, and the torture they had once suffered must be repaid today.

Only in this way could the fire in their hearts be ignited, their hope be ignited, the knots in their hearts be resolved, their Dao heart be strengthened, their value be fulfilled, and this trial of the entire human race be finished.

As for the human powerhouses in the Heavenly Wave City, someone killed their enemy with his own hands and said with tears in his eyes, “Dad, Mom, I’ve finally avenged you.”

“My son, your father is finally not weak anymore.”

“...”

In less than half an hour, the Heavenly Wave City had turned into ruins. There was no complete wall here. Everything that could be taken here had disappeared without a trace. Not a blade of grass grew as if locusts had passed through this city.

Someone picked up a pile of Clean Stones and pondered, wondering what they were for.

Someone got energy crystals and was overjoyed to sense a large amount of ownerless soul power.

Someone found some weapons and happily replaced his old weapons with them.

Chapter 2727: Human Race Crazily Slaughtering (4)

2727 Human Race Crazily Slaughtering (4)

Han Fei didn't pay attention to what they were doing anymore. At this time, Crab Lingfei had come to Han Fei respectfully.

"My lord, Lady Duan Qingsi has ordered us to go with you if you show up."

Han Fei nodded slightly. "Enter my Origin Star later."

Han Fei shouted, "My fellow human beings, time is pressing. There may still be some resources left here, but it's not important. We still have the next city to conquer. There are a total of 132 cities like this one. The one you've just conquered is the weakest one, and the next one will only be stronger. Now, open your mind and enter my Origin Star. Let's go to the next city."

"Master Human Emperor, we are ready."

"Haha, there are 131 more. How many treasures are there?"

"I hope the next city can be stronger. Otherwise, it won't be a challenge at all."

"I feel that I must make a breakthrough after this race war."

Of course, some were aggressive, and some were conservative.

Some people felt that Han Fei had gone too far. After all, there were millions of people here, and he had slaughtered them without leaving a single survivor. Wasn't this too cruel?

However, Han Fei couldn't consider everyone's emotions. If these people lived in the former Chaotic Wasteland for a period of time, they might want to destroy the Ten Thousand Scale Race more than anyone else.

...

Han Fei didn't care what the humans were thinking now. He only knew that his power of faith was soaring crazily. This power of faith was so rich that it had formed a drop of liquid in his body and even showed signs of condensing into a bead. Han Fei didn't know what it was, but it could actually materialize.

But now was not the time for him to study this. It only took Han Fei less than half an hour to take everyone to the 131st city, Mystic Ice City.

The situation in the Mystic Ice City was similar to that in the Heavenly Wave City. This city had a population of three or four hundred thousand more.

One city.

Two cities.

Three cities.

...

In just one day, Han Fei destroyed a total of 21 cities.

The people of the Ten Thousand Scale Race and its affiliated races who had died at the hands of the human army numbered as many as 30 million.

And this was the result after the destruction of only 21 cities. There were still more than a hundred cities behind.

In just one day, the number of human Venerables had increased from only 300,000 to more than 400,000. There were countless human powerhouses below the Explorer level.

On this day, 21 Sky Opening Realm powerhouses died, but they weren't killed by Han Fei, but by the powerhouses of the Seven Kill Army.

Although Sky Openers were strong, how could the top powerhouse of the Seven Kill Army not be strong?

Therefore, the next day, Han Fei destroyed 27 cities.

On the third day, the human race destroyed 17 cities.

On the fourth day, the human race destroyed 15 cities.

During this period, there were only two cities that were exceptions. One was the 80th-ranked Mountain City, whose lord was Xue Fei, and the other was the 68th city, whose lord was Feng Tianyi.

These two people were both Han Fei's puppets. They had escaped with some people.

On the fifth day, Han Fei had just arrived at the Dual Polarity City ranked 50th, but it seemed that the city lord had already evacuated with his people.

But at this moment, Han Fei hadn't saved the entire human race yet.

Han Fei knew that the Ten Thousand Scale Monarch wasn't really giving in. He seemed to be trying to force him to surrender with the humans in his hands.

When he arrived at the Dual Polarity City and saw the huge empty city, he already had an answer in his heart.

The Ten Thousand Scale Monarch didn't give up fighting. He just gave up the cities ranking below the fiftieth.

This meant that the people in the top 50 cities should have all gone to the main city of the City of Scavengers or other places, but they definitely had been gathered.

The Ten Thousand Scale Monarch knew that he couldn't attack casually, so he gathered all his men to start a large-scale ethnic war against the human race.

Although Han Fei had conquered 82 cities in a row, so what? All the non-human beings had been killed. Among the humans rescued, there were only 989 human Sea Establishers.

There were 24 million Venerables, but not many compared to the number of Venerables in the main city or the top ten cities of the City of Scavengers.

In the top 50 cities of City of Scavengers, there were nearly 50 million Venerables, and there were still at least 30 million Venerables deducting the human Venerables.

Earlier, the human race had swept through the 82 cities with absolute numerical superiority. However, in the next cities, they would no longer have a numerical superiority. It was very likely that they would be crushed by the other party.

Therefore, the slaughtering carnival had come to an end.

What was next would only be bloody battles.

Chapter 2728: Put Ten Thousand Scale Monarch on the Spot (1)

2728 Put Ten Thousand Scale Monarch on the Spot (1)

In the battle of race extermination, Han Fei showed absolute ruthlessness and coldness. He showed his attitude to everyone. Those who offended the human race had to pay with their lives. There was no humanitarianism to speak of.

In just five days, actually more than four days, the human powerhouses from the Raging Sea and the humans in the Chaotic Wasteland that Han Fei rescued had participated in battles 82 times.

For the humans from the Raging Sea, the Ten Thousand Scale Race, the Blade Clan, and the frogmen didn't look like humans. So they were dealt with as sea demons.

The humans didn't have the heart to slaughter everyone in a city if the other party was humans. But sea demons were different! They had been fighting sea demons for 100,000 years, so they wouldn't show any mercy to sea demons.

As for the people in the Chaotic Wasteland, they were completing the trial of their souls. As long as the human race was liberated in this battle, their future achievements were hard to say.

Therefore, in the past four days, everyone had been fighting crazily.

Wherever the human army passed, even the walls were torn apart. At this moment, killing intent soared in Han Fei's Origin Star.

This killing intent came from the death of hundreds of millions of enemies. With this will, many people even made a breakthrough.

In fact, Han Fei had a headache too, because too many people had made breakthroughs in the past four days.

There were nearly eighty Venerables who broke through to Sea Establishers. Most of them were originally from the Chaotic Wasteland. After being rescued by Han Fei, their hope was rekindled, so they naturally made a breakthrough.

Of course, Han Fei didn't let them make a breakthrough in his Origin Star but threw them all into the Sea of Stars.

"Huff!"

Han Fei took out dozens of star cores and fused them into his Origin Star. There were too many people in his Origin Star. With so many people consuming energy crazily, Han Fei had to consume at least dozens of star cores every day and pour a huge amount of spiritual energy into his Origin Star to meet the basic expenses of these people.

Of course, he had to maintain the spiritual energy concentration in his Origin Star. After all, he was the dignified Human Emperor.

Otherwise, wouldn't it be awkward if these people found that there was no spiritual energy here after staying in his Origin Star for two or three days?

Almost all the people in the Dual Polarity City had gone and all the supplies had been taken away. What was left here was a Sky Opening realm powerhouse from the City of Wanderers, as well as nearly 90 Sea Establishment Realm powerhouses. There were no Venerables here.

In the cities ranking among the top 50, no matter how many Venerables came, it didn't make much sense. Therefore, the City of Wanderers simply didn't send any Venerables.

At this moment, when the Sky Opener saw Han Fei, he hurried over and cupped his hands. "Are you Master Han Fei?"

Han Fei glanced at him casually. "I am the Human Emperor."

The man's heart skipped a beat, and cold sweat broke out on his forehead. He thought that this person's aura was really terrifying, but he really didn't want to acknowledge the Human Emperor in front of him. Although he knew that this person was very strong and had launched the human race's counterattack, he felt that their City of Wanderers had also made great contributions, and the Master of Silence was still very great.

Besides, they had always regarded the Master of Silence as the Human Emperor. How could they easily acknowledge Han Fei as the Human Emperor?

Therefore, this person didn't mention this but said, "All the strong masters of the Dual Polarity City have left by force. After all, our number is limited. Although I want to stop them, if they really want to escape, I can't stop them."

Han Fei nodded slightly. "Enter my Origin Star."

After a while, when Han Fei came to the next city, there was still no one here. He still accepted a group of strong masters from the City of Wanderers.

Originally, Han Fei's plan was that the people from the City of Wanderers dispersed to the various cities to restrain the power of this city, so they were mostly in the Sky Opening realm and Sea Establishment realm.

However, it was almost impossible for them to take down a city.

The next ten, twenty, thirty, and forty cities were all empty.

When Han Fei finally entered the area where the top ten cities were, it was still empty. And this place was not far from where the Ten Thousand Scale Monarch was confronting the Queen of Horror, Li Luoluo and the others.

Anyway, Han Fei went out and brought back hundreds of millions of people, which was actually quite a victory.

After Han Fei entered this area, a voice rang in his ears, "Have you vented your anger? You slaughtered the people of 82 cities in a row and killed hundreds of millions of Ten Thousand Scale Race people. I wonder if you can sit down and talk nicely now?"

Han Fei didn't look for the source of the voice. He just sneered. "Which eye of yours saw hundreds of millions of casualties of the Ten Thousand Scale Race? In the cities, the number of the Ten Thousand Scale Race people is usually less than one tenth. The rest are mostly the human race, the Blade Clan, and the frogmen race. I slaughtered hundreds of millions of people of the Ten Thousand Scale Race? How do you have the cheek to say this?"

The Ten Thousand Scale Monarch said, "The current Human Emperor, don't forget that the truly densely populated places are not those cities you destroyed. Now, a large number of your human race's population is still in my hands. If the Ten Thousand Scale Race is wiped out, what's the point for me to keep the lives of these humans?"

The Ten Thousand Scale Monarch was fearless now. He believed that he had given in enough. If Han Fei hadn't summoned the god and destroyed the City of Origin, he wouldn't have let Han Fei slaughter the 82 cities.

[God of Fishing](#)

Chapter 2729: Put Ten Thousand Scale Monarch on the Spot (2)

2729 Put Ten Thousand Scale Monarch on the Spot (2)

Now, since the god didn't take action, even if Han Fei still had the trump card of Great Monarch Mystic Martial, he wasn't afraid. No one could kill him but a god.

Besides, Han Fei's Human Emperor path was to save the human race. He believed that Han Fei would eventually agree with his choice.

At that time, although he would lose the resources of the human race, the City of Origin had been wiped out. Without a Monarch, the remaining people in the City of Origin would naturally become his new slaves.

Furthermore, in his opinion, the potential of these slaves far exceeded that of the human race.

Therefore, at this moment, The Ten Thousand Scale Monarch was negotiating with Han Fei again. He felt that Han Fei had no choice but to agree.

Han Fei hurried along without speaking, his face solemn, as if he was considering the proposal of the Ten Thousand Scale Monarch.

Seeing this, The Ten Thousand Scale Monarch didn't rush him. After a long while, he said, "As I said before, I'll set your human race free. We'll stop fighting and mind our own business from now on. You can walk your Human Emperor path, and we'll still live in the Chaotic Wasteland. I can even share the Chaotic Wasteland with your human race and share the secrets behind it."

Han Fei still didn't speak. In the end, several hours later, he returned to the confrontation place tens of millions of kilometers away from the City of Scavengers.

At this moment, the army of Puppet City was still fighting the Sky Opening Realm army of the Ten Thousand Scale Race.

The battle between the two sides had already lasted for the fourth day. The result of the battle surprised Han Fei. About 80,000 of the 200,000 puppet army had died, while only about 50,000 of the Ten Thousand Scale Race's Sky Opening Realm army had died. This was because the puppet army's bodies were made of minerals and their physique was very powerful. Furthermore, the puppet army was generally in the peak-level late-stage Star Transformation Realm, and their true combat power was comparable to that of Perfected Star Transformation Realm cultivators. Otherwise, they might have suffered much more casualties.

It could be seen that the Ten Thousand Scale Race Army did gain an advantage in cultivation from that secret place in the Chaotic Wasteland, which made them extremely good at fighting.

At this moment, the Ten Thousand Scale Race's Sky Opening Realm army had gradually equalized the numerical gap between the two sides. If the battle continued, the puppet army would definitely be at a disadvantage in no more than two days. And once they were at a disadvantage, the subsequent battle process would be very fast, which meant that the puppet army would be quickly defeated.

Therefore, Han Fei knew that he couldn't delay any longer. He knew the intention of the Ten Thousand Scale Monarch. He could accept it even if only 50,000 of the Ten Thousand Scale Race's Sky Opening Realm powerhouses survived, because there was still the City of Origin. As long as he won this time, he would drive the human race away, and the City of Origin would fall into his hands. The Sky Opening Realm combat power of the City of Origin would all belong to him, and it would bring huge hidden dangers to the human race in the future.

The Ten Thousand Scale Monarch knew this very well, so he threw out the last card the moment he saw Han Fei.

He said, "The current Human Emperor, if you are willing to stop now, I can give up the City of Origin. Whether you exterminate or enslave the people of the City of Origin, the City of Scavengers will never interfere. This is my greatest sincerity. Otherwise, if this battle continues for another two days and the City of Scavengers suffers heavy losses, it will be another story."

At this moment, everyone was looking at Han Fei. The Queen of Horror, Li Luoluo, Old Han, his mother, and Gu Tingnan were all waiting for Han Fei's response.

Although Gu Tingnan wanted to destroy the Ten Thousand Scale Race, he knew that he was powerless. And Han Fei had already shown great potential. He had really stalled the Ten Thousand Scale Emperor and destroyed all the Monarchs in the City of Origin. In his opinion, it was already incredible that Han Fei could do this.

He said telepathically, It's already a huge victory to save the human race. Now you've even destroyed the City of Origin. You've done enough.

It was no wonder that Gu Tingnan thought so, because most of the humans that the Ten Thousand Scale Race enslaved were still under his control. This forced Han Fei to be cautious. Even if Han Fei had the strength comparable to the Ten Thousand Scale Monarch, could he snatch people from the Origin Stars of the Sky Openers?

Although these people were not in the hands of the Ten Thousand Scale Monarch, they were in the hands of the city lords of the Ten Thousand Scale Race, which made no difference. The city lords could kill those humans in their Origin Stars with a single thought. If that happened, Han Fei's Human Emperor path might even be severed.

There was silence here. Han Fei pondered for a long time and suddenly grinned. "Someone from the City of Origin once threatened me. What did I say back then? Oh, I said that I hate being threatened the most, even if you are a Great Monarch."

Then Han Fei looked at Li Luoluo.

Receiving Han Fei's gaze, Li Luoluo giggled and a jade slip shattered.

At that moment, in the main city of the City of Scavengers, the bodies of the former city lord of the 80th city, Feng Tianyi, and the city lord of the 68th city, Xue Fei, suddenly cracked.

In an instant, a white light enveloped the City of Scavengers. More than 130 Sky Opening Realm powerhouses in the city were pierced by this light at the same time.

How dare you!

Ten Thousand Scale Monarch's expression changed drastically. The moment the white light appeared, he tore through the sky with a claw, and as if ignoring the void, he went straight to the City of Scavengers thousands of kilometers away.

Roar!

With a tiger's howl, a huge tiger-head phantom that could cover half of the city appeared in the sky above the City of Scavengers.

[God of Fishing](#)

Chapter 2730: Put Ten Thousand Scale Monarch on the Spot (3)

2730 Put Ten Thousand Scale Monarch on the Spot (3)

A mouthful of white smoke collided with the hand of Ten Thousand Scale Monarch, producing terrifying ripples that directly blew up the super protective barrier of the City of Scavengers, causing half of the city to collapse.

With just this blow, the hundreds of thousands of people closest to the attack range of the Ten Thousand Scale Race were directly shaken into ashes.

Fortunately, the tiger roar blocked this blow. Otherwise, half of the City of Scavengers would have been destroyed by the Ten Thousand Scale Monarch himself.

Roar!

In the City of Scavengers, the smoke dissipated, and an iron tower giant with a tiger head and a human body stood in place without moving at all. On his shoulder sat a woman who had almost completely transformed into a human. The woman was wearing a long slit dress, and her slender long legs were crossed. Half of her body was stuck to the tiger demon's head, and two furry little ears were erected on her head. She looked gentle and charming. And behind her, there was even a furry tail.

"A fox?"

From the shape of the tail, Han Fei confirmed that it was a fox demon. Since it could participate in such a battlefield, its strength couldn't be weak.

The tiger demon spat softly in human language. "We've waited so long and finally made an appearance... Master of the Emperor Sparrow, we've fulfilled your request. With me here, no one in your human race will die."

The fox demon giggled and said in a charming voice, "I didn't expect this trip to be so free of challenges. I didn't expect that you only want me to charm a few weaklings in the Sky Opening Realm. It's boring."

The tiger demon said, "OK! Let's just take it as a tour."

The Ten Thousand Scale Monarch gnashed his teeth and said, "Great Monarch-level powerhouses from the divine beast lineage? You should be incompatible with the ferocious beasts. Why did you interfere in the war between the Ten Thousand Scale Race and the human race?"

The fox smiled sweetly. "Well, there are no absolutes. It's just a deal. Besides, are we interfering? We're just passing by and worried that you'll bully the weak. Yes, that's it."

Han Fei didn't know if the fox was infuriating the Ten Thousand Scale Monarch, but it didn't matter. Anyway, the human race had been saved, and Han Fei had nothing to worry about anymore.

Han Fei cupped his hands at the tiger demon and the fox demon. "Seniors, please fetch our human race out."

The tiger demon reached for the void, and void nodes opened one after another. Then, a large number of human powerhouses in the Chaotic Wasteland appeared. There were more than 98 million of them in total, nearly a hundred million.

The fox demon smiled and said, "According to our deal, we'll just help you save the humans. We won't help you fight. Because you haven't proven your value yet."

Han Fei said, "Don't worry. You don't need to fight."

The humans who appeared in the sky above the City of Scavengers all looked at each other in bewilderment. They could still feel the terrifying pressure around them and the power wreaking havoc here. In addition to this pressure, in the sky, because more than 130 Sky Opening Realm powerhouses had just died, the sky was filled with blood at this moment, like colorful neon lights floating.

Han Fei crossed thousands of kilometers in one second and came to the City of Scavengers.

While these humans were still confused and stunned, he said, "My fellow humans, I am Human Emperor Han Fei. Under your feet is the City of Scavengers, which has now become a ruin. Today, I'm here to help you escape the misery and the enslavement of the Ten Thousand Scale Race. Now, except for you, I have saved all the humans in the entire Chaotic Wasteland..."

"Uh ~"

"Yes, this is the City of Scavengers. I'm sure I've been here before."

"Wow, the City of Scavengers is really destroyed?"

"Human Emperor? Our human race has an emperor?"

The nearly 100 million people were all dumbfounded. A few days ago, they were taken into the city lord's Origin Star. They had all guessed that something bad would happen.

But now, they were all shocked. The Human Emperor? He came to save the human race? That was too sudden!

It was like when a person was about to be sent to the execution ground, someone suddenly came to him and said, "You are my long-lost family. In order to make it up to you, I'll give you a billion."

That was what most people felt. Apart from that, it was the three questions from their hearts. Am I free? Am I really free? Am I suddenly free?

Of course, most people were still skeptical. Such a good thing had never happened to humans once in 100,000 years. How could it happen this time?

But Han Fei didn't bother to explain anything to them.

Around Han Fei, world phantoms appeared one after another, and hundreds of millions of human beings appeared like dark clouds covering the sun.

This time, Han Fei released many people.

Not only had he released the Sea Establishers, Venerables, and Explorers in the Chaotic Wasteland along the way, but there were also hundreds of millions of Explorers from the Raging Sea.

Of course, there was no need to release so many at once. After all, the battle of the strong could easily affect them.

Therefore, he only released 100 million Explorers.

In the end, a total of 277 Sky Openers came out of Han Fei's Origin Star, including those from the City of Wanderers. Among them, there were 132 from the Seven Kill Army, 132 from the City of Wanderers, and 13 from the Raging Sea.

Han Fei didn't use the Lava Giant Tribe or Wang Xiaojia and the others. Because he released too many humans, the situation was completely reversed. What if the Ten Thousand Scale Monarch felt that his race was going to be exterminated and fought to the death?
