**Chapter 2761: The Dao Proving Realm and Many Secrets (2)**

2761 The Dao Proving Realm and Many Secrets (2)

Number of Races in the Infinite Ocean: 2,962,1397

Bloodline Ranking of the Host in the Infinite Ocean: the 29,142nd

Bloodlines Nearby: Twin Yin-Yang Spirit Swallowing Fish, Emperor Sparrow

Recommended Bloodline: None

“Uh...”

After seeing this information, Han Fei didn't know whether to be surprised or distressed. He had thought that no matter how high the bloodline level of Little Black and Little White and Emperor Sparrow was, he wouldn't be unable to devour their bloodline even if he entered the top tens of thousands, right?

Now it seemed that his bloodline ranked among the top 30,000 in the entire Infinite Ocean, but he still didn't have the qualifications to devour the bloodlines of the Emperor Sparrow and Little Black and Little White.

However, Han Fei was only a little disappointed. On second thought, he felt that he should feel lucky. This meant that the true bloodline level of the three of them might be unimaginably high.

As for the lack of bloodline to devour, Han Fei didn't think it was a big problem at the moment. His bloodline level was already very high. It was actually very difficult to find a bloodline that could be devoured.

Since it was something that could only be chanced upon by luck, he didn't have to force it.

Then, Han Fei felt the power of the Dao Proving Level. In addition to the power of the Great Dao transforming into laws, Han Fei could now easily sense the power of laws from the void.

Of course, it was only limited to the part he cultivated. There were still many unknown laws, which were areas he was unfamiliar with.

In other words, the so-called laws had always existed between the heavens and earth. It was just a form of existence that had fused with the world. Without proving Dao, one couldn't sense their existence.

Buzz!

Han Fei finally moved. His face was reflected in the sky of his Origin Star. However, the billions of human beings were already in a carnival and had been in it for quite a while.

After all, the tribulation clouds were gone. How could there still be a heavenly tribulation?

Without the heavenly tribulation and Han Fei still alive, it meant that Han Fei must have become a Monarch!

Someone guessed, "I thought that there would definitely be the last tribulation, such as the inner demon tribulation. Otherwise, why would Master Human Emperor stand in the void for a long time?"

Someone was puzzled. "That's not right! The Heavenly Demon Tribulation and the Heart Demon Tribulation can't be invisible, right? When one establishes the sea, there is the Inner Demon Tribulation, but the heavenly tribulations won't be reduced!"

Someone sneered. "This is a Monarch Tribulation. Do you think it's the same as your tribulation? You don't know how terrifying Master Human Emperor's Monarch Tribulation is at all, so don't speculate. There must be a reason that there are eight Monarch Tribulations. Besides, we don't know if there are really eight."

Han Fei wanted to talk, but as soon as he returned to his Origin Star, he looked in the direction of the Demon Purification Pot, only to see that the sixth divine pill on the vine had grown up. It was blue and red and had been half grown.

"So, the sixth divine pill began to grow because of my Dao Proving? Does it mean that the sixth divine pill can grow without the return of the seventh vine?"

Han Fei was overjoyed. After he was finished with his matters, he would study the sixth Divine Pill carefully.

Han Fei came back to his senses, and his voice sounded in the sky. He said, "My fellow human beings, you should have seen it. I have done my best to live up to everyone's expectations and successfully transcended the nine monarch tribulations to prove Dao. However, my monarch tribulation might be different from yours in the future. Just because you haven't seen my ninth heavenly tribulation doesn't mean you can't see others' ninth. This matter varies from person to person."

Roar!

"Human Emperor, Human Emperor, Human Emperor..."

Someone shouted, "I told you there were nine Heavenly Tribulations in total, one of which we couldn't see at all."

Someone sighed. "It's really hard to imagine what kind of tribulation the ninth level is."

"It doesn't matter. What matters is that now, our human race has a Monarch. Haha..."

But before the humans could celebrate, Han Fei said, "My fellow human beings, now is not the time for us to be happy. We still have a lot of things to do. The human race is about to rise. Although the Ten Thousand Scale Race in the City of Scavengers of the Chaotic Wasteland have been wiped out, there's another race here called the Heavenly Cicada Family. They live in the City of Origin in the Chaotic Wasteland. Now, all their Monarchs have been killed. However, you need to finish the remaining fight to kill all their cultivators below the Sky Opening realm... If you ask me why I want to destroy the City of Origin, I'll tell you because they also want to enslave our human race. So they are also our enemies and should be eliminated..."

"Kill, kill, kill~"

"Kill through the City of Origin."

“Brothers, we must strive to get out this time and kill them all.”

“Everyone, there are treasures everywhere in the giant cities. Don’t blame me for not reminding you in advance. This battle to destroy the city is our opportunity.”

“ ... ”

For a time, everyone was talking at once. They were full of confidence in this battle.

The main reason was that they were too confident in Han Fei now. Han Fei had created an image of invincibility in their hearts. This was the power of a role model.

Before leaving the Raging Sea, the Great Dao here no longer restricted him, so Han Fei went to the place where the World Origin was.

At this moment, the World Origin lake here was only one kilometer long. He didn’t expect that because of his Dao Proving, the World Origin in the human race’s ancestral land was almost exhausted. As for the more than a thousand World Origin Fruits, Han Fei didn’t touch them. Perhaps they would slowly give birth to more World Origins!

### [God of Fishing](#)

#### **Chapter 2762: The Dao Proving Realm and Many Secrets (3)**

##### 2762 The Dao Proving Realm and Many Secrets (3)

After leaving the Raging Sea, Han Fei deliberately used the upper limit of his pure speed. As he ran, he found that his speed had reached nearly a hundred times the speed of light.

To be precise, it was now 92 times the speed of light. This made him sigh. Fortunately, the speed of the Dao Proving Level cultivators he had encountered wasn’t very fast. Otherwise, it would be difficult for him to defeat them.

This was his pure speed. If he used the spatial law, his speed could exceed a hundred times the speed of light.

Instead of using the teleportation array to return to the City of Scavengers, Han Fei stepped into the void and entered the Void World, which he had comprehended from the law of space.

After a directional test, Han Fei discovered that in the Void World, the highest speed he could achieve was more than 300 times the speed of light, three times faster than his normal speed.

This test stunned Han Fei. He couldn’t help but wonder if the Void Temple knew of the existence of the Void World. Was this a place where anyone who had comprehended the law of space could enter?

In the Void World, in addition to achieving faster speed, one could also see the outside world through the void. However, he didn’t know if he would be easily discovered.

Of course, after experimenting for several hours, Han Fei returned to the City of Scavengers through a teleportation array.

Although his speed in the Void World could be very fast, ten times that of a Perfected Star Transformation Realm cultivator, it would still take him half a day to get from the Raging Sea to the City of Scavengers.

After all, the Dao Proving Level was not the Carefree Level, let alone the Immortal Level. Back in the Chaotic Wasteland, he had been chased by a Carefree Level powerhouse when his fastest speed was easily caught up.

Han Fei estimated that it was normal for the speed of the Carefree Level to be 100 times the speed of light. He had reached that speed with the Heaven-Defying Scales of the Azure Dragon. Although he couldn't comprehend the Great Dao of speed at that time, his speed could exceed 300 times the speed of light. Therefore, theoretically speaking, there was a huge difference in strength and speed between the Immortal Level and the Carefree Level.

As for the Great Monarch realm, needless to say, the difference was even greater. Although he didn't know how long it took Great Monarch East Martial to cross the wilderness to arrive in the Chaotic Wasteland, it had only been a few days since Han Fei started the war against the City of Scavengers. And the Chaotic Wasteland was at the edge of the East Sea Divine Realm, with a distance of eight light-years between them. Han Fei didn't know how Great Monarch East Martial could cross the wilderness in such a short time.

Therefore, although Han Fei's current speed could reach nearly a hundred times the speed of light, he wasn't arrogant. He knew that he wasn't fast enough.

...

City of Scavengers.

Gu Tingnan had led the army of the City of Wanderers to wipe out the remaining forces in the City of Scavengers.

This racial war ended with a complete victory for the human race. However, the Ten Thousand Scale Race wasn't completely wiped out. A small number of them escaped. Although they couldn't escape the Chaotic Wasteland, they would definitely be chased down.

Besides, on the way to the mysterious cultivation place in the Chaotic Wasteland, there were still a large number of Sky Opening Realm powerhouses. Han Fei and Gu Tingnan didn't know that place, but since Fifth Senior Brother was there, that place would definitely be swept.

What was left was the City of Origin. Although the Monarch-level powerhouses in the City of Origin had all died, there were still many Sky Opening Realm armies, which might be even more than the Ten Thousand Scale Race's Sky Opening Realm army. The human race and the City of Wanderers alone couldn't defeat them.

Therefore, Han Fei, Gu Tingnan, and the puppet army had to take action together in this battle.

As for those below the Sky Opening Realm, it would be a long and protracted war to finish them. Although Han Fei could wipe them out, there was no need. Human beings had just come to the Chaotic Wasteland and needed to adapt to this environment.

If nothing went wrong, in the next ten years, the people from the Raging Sea would welcome an unprecedented breakthrough tide.

At this moment, Han Guanshu and Jiang Linxian were chatting with Fifth Senior Brother. This scene was a little strange, making Han Fei feel that they knew each other.

Seeing Han Fei return, Jiang Linxian hurriedly greeted him, "Fei'er, I knew you could successfully transcend the tribulation. How do you feel now?"

Han Fei said, "My greatest feeling is that the power of laws turns out to be another form of power inherent in the world. It has existed for a long time and won't be annihilated. The meaning of proving Dao lies in being more intimate with the power of these laws, better adapting to them and borrowing them instead of completely mastering them. If I guess right, the corresponding level of the Carefree Level should be to master the power of laws."

Jiang Linxian smiled. "Yes! In the early stages of the Dao Proving Level, those with limited comprehension of laws can only borrow limited power. When you reach the Carefree Level, you can form your own origin of laws. Then you can use this as a foundation to continuously extract the power of laws in the world and use it for your own use. From the Dao Proving Level to the Carefree Level, some people can reach it in a short period of time, and some take a long time. You have to comprehend it yourself."

Han Fei nodded. "By the way, Mother, why are you chatting with my Fifth Senior Brother?"

As he spoke, Han Fei stared at Fifth Senior Brother, who didn't look guilty at all but smiled.

Jiang Linxian said, "It's just a simple chat. Fei'er, now that you've proven your Dao, the human race will be completely handed over to you. There are still some things for your father and me to do, so we may... be away for a while."

### [God of Fishing](#)

#### **Chapter 2763: The Dao Proving Realm and Many Secrets (4)**

##### **2763 The Dao Proving Realm and Many Secrets (4)**

"Huh?"

Han Fei had a strange feeling. "Are you hiding something from me? No, you must be hiding a lot of things from me. However, we've just met and Yin'er isn't familiar with you yet. Why are you leaving?"

Han Guanshu said, "All good things must come to an end. Son, you have your path to walk, so do we. The human race has just arrived in the Sea Realm and will welcome a grand breakthrough tsunami. In the Chaotic Wasteland, you will probably stay for at least decades or even a hundred years. As for your mother and me, we have been looking for a different path. With the ominous coming, we have to embark on our journey."

Han Fei's heart did a flip. "The ominous is coming?"

Fifth Senior Brother said leisurely, "Well, in the past 100,000 years, the ominous has indeed been ready to move. Conservatively speaking, in 30,000 years at the earliest and 100,000 years at the slowest, a

new ominous battle might come again. However, the current Sea Realm hasn't been well prepared to deal with the ominous yet. This time seems to be long, but it's actually very fast."

"Thirty thousand years?"

Of course, this time was long for Han Fei. However, the Demon God had waited for 1,800,000 years, so 30,000 years was indeed not long for those strong masters.

Jiang Linxian said, "Fei'er, your path is better than your father's back then. We have nothing to guide you with. As for Yin'er, let her go with us! Yin'er's talent is inferior to yours, so I can only try to let her walk the old path of the primordial human race. This can't be helped."

Han Fei nodded slightly. It could be seen that the Demon Purification Pot was with him, and Old Han had set up a far-reaching plan to pave the way for him. It meant that Old Han and Jiang Linxian were actually betting on him. Although Yin'er was his biological sister, her encounter wasn't as legendary as his, and no one paved the way for her.

Han Fei had personally witnessed the strength of the ancient human race. To be honest, if Yin'er could walk the path of the ancient human race again, she might not be able to create a path herself, but she might be able to become a god.

After all, her parents were both gods. Staying with them, how could she not become a god? Even if she couldn't become a god for the time being, she would definitely become a Great Monarch.

Therefore, it was definitely much better for Yin'er to follow Old Han and Jiang Linxian than him. After all, what he could give her was limited, and he had no time to take care of Yin'er most of the time.

Han Fei said, "Yin'er can go with you, but before you leave, I have a few more questions... Well, Fifth Senior Brother..."

"Ah! I'm going to take a walk. The bamboo pole you found is interesting. He's a little weak, but there's still room for improvement. I'll teach him to you."

"The bamboo pole?"

Fifth Senior Brother should be talking about Liu Qiansi. This guy was just a Monarch demon plant who hadn't seen much of the world. However, if he had Fifth Senior Brother's guidance, no one knew what would happen to him. Han Fei grinned and said, "Thank you, Fifth Senior Brother."

After Fifth Senior Brother left, Han Fei asked directly, "First question, the strong master of the ancient human race said that my bloodline was extracted. Was it for improving my spiritual heritage?"

Jiang Linxian said gently, "Fei'er, I hope you don't blame me for this. Your bloodline level is indeed very high, and it's even possible for you to have an atavism. However, after nine lives, we have deeply realized that even if you have the primordial bloodline, it's useless. Perhaps you can become a god, but your path may stop here. Therefore, I removed your bloodline because I wanted you to have a brand-new bloodline, a new bloodline that is different from the primordial bloodline. This path is difficult to walk, and the future is unknown, but because it's unknown, it might be the greatest variable."

Hearing Jiang Linxian's words, Han Fei realized that they wanted to create a new spiritual heritage for him with the Demon Purification Pot. With the Demon Purification Pot, it wouldn't be a problem even if his bloodline was bad at the beginning. It seemed that they had planned everything!

Han Fei nodded slightly. "So, it's not a coincidence that Chu Hao appeared in the Raging Sea with the Demon Purification Pot. Was it planned?"

Han Guanshu put on a faint smile. "Yes."

Han Fei didn't dwell on this question. With Old Han and Jiang Linxian's abilities, they would definitely be able to control Chu Hao.

Han Fei asked again, "What about the specific usage of the power of faith? In fact, when I was transcending the tribulation, I knew that as long as the power of faith was released, I could easily transcend the tribulation. But you suggest I don't, so what should I use it for?"

Han Guanshu smiled and said, "Son, the power of faith is a collection of the wishes of the human race. In the end, when this power accumulates to a certain extent, it contains thousands of things and has already been attributed to the power of the human world, the Dao of the human race. It's simple but unnecessary to use the power of the human world to resist the Monarch Tribulation. You can try integrating the power of the human world into your Origin Star to create the Heavenly Dao on your Origin Star."

"Heavenly Dao?"

Han Guanshu said, "It's a Heavenly Dao unique to the human race. It's similar to the ancestral land of the human race, protecting the growth of the human race. Whoever uses this Heavenly Dao can try to create a true world."

"Wait, I don't quite understand what you're talking about... Creating a world? A Sea Establisher can already do it, can't he?"

"It's different. The so-called world creation of Sea Establishers is just imitation. It's superficial. Oh no, it can't even imitate the surface. And after one enters the Star Transformation Realm, although he can mold the ground veins, as long as he tries to create a world, he'll find out that he can't create anything except farming. You should have seen other people's Origin Stars, right? Has anyone created a new race? Even if they did, they only created deformed inferior lifeforms."

Han Fei thought that it was true. He had indeed seen such a deformed life form in the Origin Star of Zhao Qinglong, the tenth place on the God Roll. Apart from that, most Sky Opening Realm powerhouses didn't even have a deformed life form.

Han Fei asked, "It can be done just with the power of faith of the human race?"

Han Guanshu said, "When the power of faith is accumulated to a certain point, it will no longer be the power of faith, but the Dao of a race, a fire seed. It can help you create a new human race, and you are equivalent to the master of creation. You can harvest the new human race's insights through their natural growth, because the characteristics of intelligent creatures are their creativity... You might be able to draw some ideas from it that you have never had..."

Han Fei couldn't help but think that if he created a new human race, without his interference, the development of civilization would definitely produce too many crystals of wisdom.

Although these new humans might be very weak, in the long run, it did seem to be more meaningful than directly consuming this power of faith.

Han Fei looked at Han Guanshu. "So, Old Han, have you already created a new human race?"

Han Guanshu chuckled. "Yes, it's thousands of times better than using the power of faith for cultivation."

Han Fei was convinced. He couldn't refuse the identity of a creator, nor could he refuse the joy of creation.

In the end, Han Fei asked, "Can the Raging Sea be restored? The World Origin lake there is almost dry."

Han Guanshu said, "Aren't you already half fused with the Raging Sea? So the stronger you become in the future, the easier it will be for the ancestral land to recover. One day, you will return to the Raging Sea. When you return, it will recover at an unbelievable speed."

### [God of Fishing](#)

#### **Chapter 2764: The Arrogant Supreme Nature Treasure (1)**

##### 2764 The Arrogant Supreme Nature Treasure (1)

Old Han and his mother had explained it in detail, and Han Fei learned a lot from them.

Han Fei suddenly asked, "Last question, what were you talking about with Fifth Senior Brother?"

"Pfft!"

Jiang Linxian chuckled and said, "Your father and your senior brother are arguing whether tea or wine is better. It's just a debate about whether tea or wine is better."

Han Fei tilted his head in disbelief. "That's it?"

Han Guanshu said leisurely, "Usually, it's better to drink tea than to drink wine."

"Nonsense!"

Swish!

Fifth Senior Brother popped up with a swish. "Nonsense, fish poop theory."

Instantly, Han Fei and the other two looked at Fifth Senior Brother, who blushed and quickly coughed. "Cough, cough. Well, I didn't eavesdrop! I just sensed that someone seemed to be talking about alcohol... You guys continue chatting..."

Han Guanshu chuckled. "That's it. Son, let Yin'er come out!"

Han Fei raised his eyebrows. "Are you leaving now?"

Han Guanshu shook his head. "No, we'll just take a walk in the Chaotic Wasteland. Go about your business."

After a while, when only Han Fei and Fifth Senior Brother were left, the latter touched his nose and began to search for the wine gourd.

Han Fei grinned. "Senior Brother! Let me make two dishes?"

Fifth Senior Brother smacked his lips and asked in disbelief, "Really?"

Han Fei looked at Fifth Senior Brother with a faint smile and said, "Of course it's true. However, you have the final say on where to have dinner."

The latter clicked his tongue and laughed. "Alright! It's really not easy for me to eat the dishes you cook, Little Junior Brother! Then follow me!"

Fifth Senior Brother rolled up his long sleeves, and a strange passage appeared in the void. Han Fei followed Fifth Senior Brother closely. After walking for less than ten seconds in the passage, Han Fei suddenly felt that the power of extreme cold appeared, but in the blink of an eye, it turned into scorching fire energy.

When he walked out of the teleportation passage, he saw a boundless sea of fire. Although the flames were hot, the energy was relatively gentle. Although it was not an ordinary fire, it didn't seem to be a particularly magical fire.

However, in the sky, there was extremely cold frost. And one of the four sides of the fire sea was an ice wall made of ice.

In the ice wall, there was a spiral ice cone vortex spinning extremely slowly.

Here, perception could be released. Now Han Fei's perception could see hundreds of millions of kilometers in the sky at a glance. If he desperately looked in one direction, the distance could be doubled.

However, even if Han Fei fully released his perception, he couldn't reach the edge of the sea of fire. And the ice wall isolated the sea of fire, preventing him from seeing what was on the other side of the ice wall.

Of course, Han Fei saw many people cultivating. Among them, there were about 20,000 people in the Sky Opening realm, three in the Dao Proving Level, and no one above the Carefree Level.

These people should be from the City of Scavengers. In the end, the City of Wanderers' heritage couldn't compare to the City of Scavengers or the City of Origin. Even with Fifth Senior Brother backing them, the number of Sky Opening Realm experts in the City of Wanderers was still relatively small.

Of course, the fact that there were nearly 20,000 people in the Sky Opening Realm in the City of Wanderers meant that Gu Tingnan had been working very hard over the years. This was much more than the number of people in his Seven Kill Army who were in the Sky Opening Realm.

Besides, this didn't include the people on the way to the Chaotic Ice Domain.

"Is this... Is this the mysterious place behind the Chaotic Wasteland?"

"Haha, you didn't expect it, did you? In fact, if you really want to come, you should be able to find it!"

Han Fei said, "Senior Brother, at that time, I hadn't proved Dao yet. What if I can't go back? Senior Brother, you've been guarding this place all the time, but you haven't revealed anything about it during the several gatherings. You've really kept this secret well."

"Haha! It's boring to tell you in advance! Come, prepare two dishes for me first. Let's talk while eating."

Han Fei asked, "Do you have any ingredients, Senior Brother?"

"Of course. Come on, take your pick."

Fifth Senior Brother took out a calabash and shook the things in it out, and fresh corpses such as Gold-Armored Crabs, Blood Ice Phoenixes, and Single-Horned Flood Dragons fell out of the calabash, especially the twenty-thousand-meter-long flood dragon, which made Han Fei lost for words. "Senior Brother, are you serious?"

"Hahaha, Junior Brother, thank you..."

Han Fei's eyelids twitched crazily. What Fifth Senior Brother means is obvious. He won't tell me everything about this place until I make him delicious food.

It couldn't be helped. The twenty-thousand-foot-long flood dragon was a bit too big, but Han Fei had to make it! Fortunately, the garlic cloves in his Origin Star were bigger than bananas. Although it would consume a lot of energy, it shouldn't be a problem to roast a flood dragon.

Han Fei flicked his finger, and a knife light cut down from the flood dragon's lower jaw to the base of its tail. The internal organs in its stomach were annihilated by this knife light, and the black fish skin inside was purified.

Then, the Million Knife Art swept across the flood dragon. While removing all the scales on the flood dragon's body, the Million Knife Art cut the flood dragon in an orderly manner.

At the same time, Han Fei found a water dragon to wash the dragon, but at this moment, in the sea of fire, the used water instantly evaporated, turning into a large amount of steam.

### [God of Fishing](#)

#### **Chapter 2765: The Arrogant Supreme Nature Treasure (2)**

##### 2765 The Arrogant Supreme Nature Treasure (2)

Enveloped by the steam, Han Fei spared no effort. Hundreds of thousands of garlic cloves, red peppers, fish oil appeared in the air...

Han Fei took out more than a dozen seasonings in one go. Every time he took out one, Fifth Senior Brother secretly hid some of it.

In the end, Han Fei simply controlled the knife to cut the flood dragon with one hand and chopped the crab with the other. He also split a wisp of his spiritual power and poured one vat of soy sauce and seasonings after another into the void to roast the phoenix.

Gulp!

At that moment, Fifth Senior Brother licked the corners of his mouth from time to time, fearing that he would miss any details. Regarding the control of the fire and the strange seasonings, Fifth Senior Brother remembered them in his heart and planned to plant all these things later.

After separating from Le Renkuang and the others, Han Fei's interest in cooking was greatly reduced. Now, unless he was in a good mood, very few people could eat the food he made.

At this moment, the barbecue had to be roasted slowly, and it couldn't be roasted with the fire in the sea of fire, so Han Fei covered the flood dragon with a layer of power to block the fire energy of the sea of fire.

On the other side, a crab shell was peeled off, its meat was extracted and was chopped into pieces by Han Fei. A large amount of peppers flew in the air and were mixed and fried with the crab meat.

Finally, after half an hour, the crab meat and the braised phoenix pieces were out of the pot. As for the barbecue, it would take a while.

Han Fei casually flipped his hand and put the fragrant rice into the pot. Because this was a simple ingredient, it only took him dozens of seconds to make it.

When the two super cauldrons that were several kilometers long were filled with crab meat and braised phoenix pieces, Fifth Senior Brother was already drooling.

"Haha, Little Junior Brother is really good at eating! This fragrance..."

Then a piece of crab meat flew to Fifth Senior Brother's mouth.

"Gulp ~"

The sizzling sauce emanated from the crab meat, no more, no less. It was just enough to make the meat oily. When he took a bite, it was soft and juicy. The hot juice jumped on the tip of his tongue, and the tender crab meat exuded the original taste of the ingredients.

Astonished, Fifth Senior Brother finished the crab meat in two or three bites. Then, he immediately grabbed a piece of Red Braised Phoenix, chewed and swallowed it into his stomach.

Han Fei said with a smile, "Senior Brother, don't be hasty. Stir-fried crab meat should be served with rice."

"Oh, is that so?"

When the rice and the crab meat were eaten together, Fifth Brother hurriedly pulled off the calabash and took a dozen mouthfuls in a row.

"Hahaha! Junior Brother, your culinary skills are No.1 in our Void Temple! How many more dishes can you cook? Let's be honest. You must save these delicious little things for me."

Han Fei smiled and said, "Senior Brother, why don't we talk while eating? I still have many questions, such as what this place is? Why are you here?"

"Haha! That's easy. Come, let's sit down and eat slowly... Oh no, let's talk slowly..."

Since Fifth Senior Brother had brought Han Fei here, he didn't want to keep it a secret. He chewed the crab meat in his left hand, held the wine gourd in his right hand and said, "This place is called the Chaotic Ice Domain. The world above the Chaotic Wasteland is so cold because of the influence of the Chaotic Ice Domain."

Han Fei said, "This is clearly a sea of fire. Why is it an ice domain?"

Fifth Senior Brother said, "The Chaotic Ice Domain is too cold. Normal people will freeze to death when they come in, so such a sea of fire is needed to provide a living space for everyone. Without this sea of fire, only people above the Carefree Level can stay in this place. In that case, how boring would it be to guard such a huge place?"

"Wait, guard this place? Senior Brother, you're guarding this place?"

Han Fei's heart did a flip. Today, he finally knew that Fifth Senior Brother was also a Great Monarch, and he seemed to be a very strong one. Even Great Emperor East Martial had to call him Elder Zhang.

There must be a reason for Fifth Senior Brother to guard this Chaotic Ice Domain.

Fifth Senior Brother said, "The Chaotic Ice Domain is connected to the Chaotic Sea, and the Chaotic Sea is a very complicated place. In the Chaotic Sea, there are some places that belong to the ominous... Gulp, ah... Crunch... In the Sea of Stars, there will always be some races and creatures that are infected by the ominous and become external forces of the ominous... Crunch... This Chaotic Ice Domain is a battlefield. Because there has been an anomaly in the recent 100,000 years, I've been guarding here... Gulp..."

Han Fei only took a second bite at a piece of braised phoenix, but five or six bones had already been thrown in front of Fifth Senior Brother. Han Fei discovered that Fifth Senior Brother's teeth were sharp, which made him sure that he was not a human.

Hearing what Fifth Senior Brother said, Han Fei was even more puzzled. "Since it's an ominous battlefield, are the City of Scavengers and the City of Origin guardians of this place?"

"Oh! They mainly came to get some opportunities, train their soldiers, strengthen their race, and so on. Occasionally, they would participate in ominous battles, but ominous battles rarely happened, so they didn't take action very often."

"Opportunities? Here?"

Han Fei didn't feel how strong the spiritual energy concentration here was. Although this sea of fire could temper one's body, it seemed impossible to cultivate such a group of Sky Opening Realm powerhouses here with the fire alone. As for opportunities, there weren't even trees in this place. There were only occasionally some fire-element demon plants or something. Han Fei really couldn't see anything special for cultivation here.

### [God of Fishing](#)

#### **Chapter 2766: The Arrogant Supreme Nature Treasure (3)**

##### 2766 The Arrogant Supreme Nature Treasure (3)

Fifth Senior Brother smiled faintly. "Of course the opportunity isn't here. The opportunity is in the Chaotic Sea! Look, the vortex on the wall is the passage to the Chaotic Sea. Outside the passage is the

Chaotic Battlefield. When there are no enemies, you can enter the Chaotic Sea to cultivate. When we finish eating, I'll take you to take a look."

"Okay!"

Han Fei had only heard of the Chaotic Sea but had never been there. He had thought that he would have to cross the endless Sea of Stars if he wanted to go to that place from the Sea Realm. Who would have expected that there was a passage directly to the Chaotic Sea in the Chaotic Wasteland? There was no telling how far apart the two places were.

Han Fei asked, "Senior Brother, are the tidal waves emitted from here?"

Fifth Senior Brother nodded. "That's right. The Chaotic Ice Wall is equivalent to a dam. When it blocks enough water, the water will be released. It's released once every 100 years, and the Chaotic Ice Domain will withstand most of the impact. Some of it will be transferred to the Chaotic Wasteland. In the past, the City of Origin and the City of Scavengers were the main resistance forces. After a hundred years of hunting, they can basically purify this ominous power. Now, since your human race is here, it naturally has to rely on your human race to purify this ominous power."

Han Fei couldn't help but frown. This was an opportunity, but it was also a challenge. Although the human race was about to face a tsunami of breakthroughs, the power of the tidal waves wasn't something a human race could handle at the moment.

"Don't worry. Now that the City of Scavengers and the City of Origin have been destroyed, these people from the City of Wanderers can be sent back."

"Okay!"

If there were this group of 20,000 people, plus those Sky Openers who hadn't reached this place, the power to deal with the tide waves should be enough for the time being.

Han Fei asked, "By the way, Senior Brother, why are you guarding here?"

After a pause, Fifth Senior Brother gulped down a few mouthfuls of wine and said, "Would you believe me if I said that I was punished by Eldest Senior Brother to guard here for 100,000 years because I was too lazy?"

Han Fei: "..."

Han Fei didn't believe it at first, but then he felt that something was wrong.

"Wait, when were you punished by Eldest Senior Brother?"

Fifth Senior Brother said, "A hundred thousand years ago! It's less than a thousand years before I'm released."

"A hundred thousand years ago?"

Han Fei immediately realized that something was wrong. He seemed to smell the familiar smell of a chess game. Why was it 100,000 years ago? Why was it 100,000 years ago again?

100,000 years ago, because Fifth Senior Brother was lazy, the Eldest Senior Brother punished him for guarding this place, and then he happened to be born at this time?

Han Fei asked, "Then who will guard the Chaotic Wasteland after you leave, Fifth Senior Brother?"

Fifth Senior Brother said, "Forget it. It just so happens that you destroyed the City of Scavengers and the City of Origin. I just need to guard it for you for a while longer. When the time is right, this mess will still be handed over to you."

"Leave it to me?"

Han Fei felt terrible and hurriedly said, "I'm still young. Senior Brother, how can you let me guard the Chaotic Sea?"

"Haha! Anyway, your cultivation speed is fast! Look, it's only been a few years, but you've already proved Dao. If you were given another eight hundred years, wouldn't you become a Great Monarch?"

Han Fei was lost for words. "Thank you for your compliment, Fifth Senior Brother. You make it sound like a breeze to become a Great Monarch... So, Fifth Senior Brother, are you and Eldest Senior Brother plotting something?"

Fifth Senior Brother shook his head. "No! What can we be plotting? It just so happens that you were the most suitable person for that. Don't think too much."

"Heh heh!"

Han Fei thought to himself, I don't believe you at all. There are only a dozen or so people in the dignified Void Temple. Logically speaking, each of them should have their own path to take. As the fifth senior brother of the Void Temple, you were arranged to guard the Chaotic Ice Domain here. It didn't seem like the style of the Void Temple.

However, no matter how Han Fei asked Fifth Senior Brother, he just said, "I don't know. I didn't. I didn't scheme anything." Han Fei couldn't do anything to him but watch him eat and drink happily in front of him.

As for why Fifth Senior Brother didn't interfere in his affairs, in fact, even if Fifth Senior Brother wanted to interfere, Han Fei might not let him. However, why didn't you inform me? Why did you suddenly appear without saying anything? This made Han Fei wonder whether it was really he who destroyed the Ten Thousand Scale Race. There is no black box operation here, right?

Han Fei rubbed his head, and then simply let go and began to eat and drink with Fifth Senior Brother.

After the two of them ate for a day and a night, Han Fei finally couldn't take it anymore. He had never seen anyone who could eat as much as Fifth Senior Brother. Even if his stomach was a bottomless hole, wouldn't he cloy by eating so much meat at once?

Finally, under Han Fei's repeated urging, Fifth Senior Brother reluctantly put away the remaining parts and then led Han Fei to the Chaotic Ice Wall.

"Fifth Senior Brother, how far is the Chaotic Sea from here?"

Fifth Senior Brother said drunkenly, "Little Junior Brother, you've stumped me. It's impossible to measure how far away it is. Anyway, it's very far away."

"Since it's so far away, why can this channel be set up in the Sea Realm? And one can pass merely via a teleportation portal. Is there really such a magical teleportation array in this world?"

Fifth Senior Brother said, "That's not an array. That's a Supreme Nature Treasure, the Distanceless Gate."

"A Supreme Nature Treasure?"

Han Fei was shocked. Wasn't that a treasure at the same level as the Chaotic Clock? This was a treasure above the level of the Chaotic Spiritual Treasures.

Han Fei asked, "No one came to steal it?"

Fifth Senior Brother smiled and said, "Who dares to steal it? Whoever dares to touch the Distanceless Gate will be taken as a traitor to all races. Whoever touches it will die, so no one dares to touch it!"

### God of Fishing

#### **Chapter 2767: The Arrogant Supreme Nature Treasure (4)**

##### 2767 The Arrogant Supreme Nature Treasure (4)

Han Fei asked, "Then who owns this Distanceless Gate?"

Fifth Senior Brother shook his head. "I don't know. You have to ask Eldest Senior Brother."

As they talked, they came to the gate.

This seemed to be a teleportation array. The Demon Purification Pot didn't show the information of the Distanceless Gate. This was not surprising. After all, the Demon Purification Pot was not in its full state, and the level of the Distanceless Gate was too high. It might have exceeded the Demon Purification Pot's current reading range.

Fifth Senior Brother took Han Fei to the gate. After waiting for a few seconds, seeing no response from the gate, Fifth Senior Brother simply said to the vortex, "Open the gate."

Han Fei asked, "Senior Brother, who are you talking to?"

Fifth Senior Brother said, "The Distanceless Door! He can understand us!"

Fifth Senior Brother said again, "Open the door. This is my junior brother. Maybe he will guard this place in the future. My junior brother is very talented. When he kills ominous creatures in the future, it will be as easy as cutting melons and vegetables. Open the damn door quickly."

However, on the ice wall above the Distanceless Door, a line of words appeared. It said, "90% of the guardians here were killed by him. Not a single one of the two Great Monarchs was left."

Fifth Senior Brother was amused and said bluntly, "Those two are nothing. How many times have those two fought against the ominous? They just came here to train their soldiers, but you still opened the door for them. Look at my junior brother's luck and physique. He can kill Carefree-Level Monarchs when

he's only in the Sky Opening realm. Now that he has proved Dao, once his realm is stabilized, no cultivators under the Immortal Level can beat him. He can crush Immortal Level cultivators in a thousand years and sweep Great Monarchs in ten thousand years. You should curry favor with him now. When the time comes, he'll be your gatekeeper."

Han Fei blushed when he heard that., but it was really possible that he could crush Immortal Level cultivators in a thousand years.

It was not that Han Fei was narcissistic, but his cultivation speed was very fast because of the Supreme Divine Technique. Besides, he had also cultivated the Godfiend Formless Technique. Even if he could not reach the Immortal Level in a thousand years, his strength should not be weaker than Immortal-level cultivators.

However, this Distanceless Gate didn't seem to like him very much. It seemed that he had angered him by destroying the City of Scavengers and the City of Origin.

The Distanceless Gate allowed the City of Scavengers and City of Origin to come out to train their soldiers in the hope that they could guard this place in the future to resist the ominous. Now that Han Fei had killed the door's guardians, he was naturally unhappy. It was equivalent to him opening the gate so many times for nothing.

Han Fei watched quietly. Fifth Senior Brother was still nagging. "Open the door quickly. Your future guardian is going out to take a walk and see the Chaotic Sea. Don't be stingy."

In the end, the gate still gave some face to Fifth Senior Brother. Although he was reluctant, he couldn't stand Fifth Senior Brother's continuous knocking.

So, he wrote, "This time I made an exception. I won't open the door for him next time."

Fifth Senior Brother said, "Nonsense, you'll have to count on my Junior Brother in the future."

The Distanceless Door began to operate. Fifth Senior Brother was about to walk in, but Han Fei didn't move.

Fifth Senior Brother shouted, "Hey, let's go, Little Junior Brother!"

Han Fei shook his head slightly and smiled faintly. "Senior Brother, I won't go. Since he is unwilling, I, the dignified Human Emperor, can't bring myself to do that. I'll go to the Chaotic Sea sooner or later. I'm not in a haste."

Fifth Senior Brother asked, "Uh! Are you really not going? It's good to feel it in advance."

Han Fei shook his head. "No, I won't."

With that, two scimitars suddenly appeared in Han Fei's hands. It was none other than the Blades of Hope. The law of time was activated, and the timeline was broken heavily. As the Vast Ocean Navigator pointed to a spot, Han Fei suddenly stopped in a certain timeline.

Han Fei stopped at the moment when the Distanceless Gate was once opened. At that moment, a fish hook was thrown out, and a figure was suddenly hooked out and pulled over by Han Fei.

It was a Sky Opening Realm cultivator of the Ten Thousand Scale Race. He was unconscious after being dragged over.

Han Fei clasped his head with one hand and activated the Soul Searching Technique.

Everything happened smoothly. Fifth Senior Brother smacked his lips and looked at the Distanceless Door. "Stupid door, you've offended my little junior brother. Do you think everyone in the Void Temple is as easy-going as me? Have you forgotten the scene of our Void Temple on a killing spree?"

As for the Distanceless Door, he slightly was trembling, not because Han Fei was a disciple of the Void Temple, but because Han Fei took out two treasures of no lower quality than him.

He was sure that the Vast Ocean Navigator was a treasure of the same level as him. Although it hadn't fully grown up, it was definitely a Supreme Nature Treasure too.

And the double knives were what made him tremble. For some reason, he felt that the quality of these double knives seemed to surpass his own.

The Distanceless Gate couldn't figure out how this person could have two treasures of this level.

After a while, Han Fei put on a smile and chuckled. "I see."

Han Fei crushed the puppet of the Ten Thousand Scale Race and said to Fifth Senior Brother, "Senior Brother, I'm going back. I've been to the Chaotic Sea. Next, I'm going to lead the human race to rise."

Fifth Senior Brother said, "Ah! Why don't you stay for two days for fun?"

Han Fei was lost for words. You just want me to stay here to cook for you, don't you?

Han Fei shook his head. "No, the human race has just entered the Sea Realm and the breakthrough tide is coming. I need to guard the human race. As for this Chaotic Ice Domain, heh, I'll wait for this door to beg me in the future..."

Han Fei paused and looked at the Distanceless Gate. "Well, even if you beg me, I won't necessarily agree with you. So, you'd better think carefully about how to beg me."

"Fifth Senior Brother."

"Haha! Little Junior Brother, you are really... Fine, go ahead. I won't go with you."

Fifth Senior Brother opened a channel for Han Fei and shook his head helplessly, thinking that his Little Junior Brother was quite interesting.

Han Fei nodded and said, "Senior Brother, since you've helped the City of Wanderers, I hope you can still help them in the future."

Fifth Senior Brother said in surprise, "Don't you humans stay in the Chaotic Wasteland? It's absolutely safe here now."

Han Fei shook his head. "Humans have their own path. Without challenges, how can there be a powerful human race?"

Han Fei bid farewell to Fifth Senior Brother and entered the teleportation portal without looking back.

When the portal disappeared, Fifth Senior Brother leaned against the Chaotic Ice Wall and said indifferently, “Distanceless! Do you think you just rejected a person? You f\*cking rejected the entire human race, a race who once dominated the Chaotic Era...”

The Distanceless Gate: “...”

After a long time, a line of words appeared beside Fifth Senior Brother. “Then what should we do now?”

Fifth Senior Brother laughed. “Do whatever you want. I’m going to eat. Little Junior Brother left me so many recipes. I have to try them one by one...”

### God of Fishing

#### **Chapter 2768: Booming of the Human Race (1)**

##### 2768 Booming of the Human Race (1)

When Han Fei returned to the Chaotic Wasteland, the first thing he did was to release all the humans. Anyway, they couldn’t stay in his Origin Star all the time.

Buzz—

When all the human beings appeared in the old site of the City of Scavengers, the scene was quite spectacular. How could a City of Scavengers accommodate tens of billions of people?

Now, there were still nearly fifty years before the next tidal wave, so Han Fei didn’t have to be too anxious to prepare to defend it.

Many people had appeared in the Chaotic Wasteland for the first time, so they were full of curiosity.

“Is this the Sea Realm? The spiritual energy density is indeed high, nearly twice as high as the Raging Sea.”

“This is just the Chaotic Wasteland. Didn’t you hear what the humans here said? The Chaotic Wasteland isn’t the real Sea Realm. It’s said that outside the Chaotic Wasteland, it’s more suitable for cultivation than here.”

“This is the previous battlefield, right? The smell of blood is so strong.”

“Of course. The Ten Thousand Scale Race was wiped out, which means hundreds of millions of people died. How can the smell of blood not be strong?”

A Sea Establisher said, “It’s not a bad thing that the smell of blood is strong here. So many people have died, and their lost power is drifting in this world. This is the best opportunity for our human race to cultivate.”

“My fellow humans.”

At this moment, Han Fei’s voice sounded above everyone’s heads, and Han Fei’s Dharma Idol stood high in the void.

“Look, it’s Master Human Emperor.”

“All of you, be quiet. Master Human Emperor has something to say.”

“Be quiet. If you have anything, let’s discuss it later.”

“Put away your curiosity.”

After the scene calmed down a little, Han Fei slowly said, “My fellow human beings, we are now in the Chaotic Wasteland of the Sea Realm. I’ll give you a simple introduction of the Sea Realm. The Sea Realm is divided into five Divine Realms, which are respectively the North Sea, South Sea, East Sea, and Central Sea Divine Realm. And we are in the most remote corner of the East Sea Divine Realm, called the Chaotic Wasteland. Compared to other places in the East Sea Divine Realm, the resources, spiritual energy, and environment in the Chaotic Wasteland are quite harsh. However, compared to the Raging Sea, it’s several times stronger. At present, most of you are not strong enough. Even if you are sent to the outside of the Chaotic Wasteland, it might be difficult for you to adapt to the environment there. It’s not a good thing for you if the spiritual energy is too rich. Therefore, our human race will temporarily stay in the Chaotic Wasteland to cultivate for hundreds of years. At most in ten days or half a month, because you will adapt to the environment in the Chaotic Wasteland, you will welcome a tide of breakthroughs. This will be a grand event for everyone. Please be prepared. Rest well and be prepared for a breakthrough at any time...”

Han Fei said a lot, but in fact, it didn’t need to take half a month. At this moment, Han Fei had just released all the human beings, and many people had already felt a coming breakthrough.

Especially the people who had followed Han Fei to siege the cities. They had obtained a lot of resources and treasures in those cities. As early as in Han Fei’s Origin Star, some of them were already about to make a breakthrough.

However, Han Fei had suppressed their breakthroughs. Otherwise, once these people began to make a breakthrough, he would have to continuously supply them with energy and spiritual energy.

Han Fei added, “Now, if you really can’t suppress and need to make a breakthrough immediately, spread out in the middle of the ruins and prepare to make a breakthrough. Now that the Ten Thousand Scale Race has been wiped out, there is a tremendous amount of energy and spiritual energy left here, enough for you to consume and make a breakthrough. However, I have to tell everyone one thing. Although the energy crystals you have obtained in the Sea Realm contain a large amount of ownerless soul and spiritual energy, don’t use them randomly. Only use a little bit when you have no choice. If you use too much, it will affect your foundation...”

“Yes, Master Human Emperor.”

“Huh?”

Someone asked in surprise, “Then didn’t we snatch them for nothing?”

Someone was almost crying. “I grabbed a lot of them. I was so excited when I felt so many ownerless souls inside. Why are there side effects?”

Someone heaved a long sigh. “Sure enough, nothing can be accomplished overnight. Even such a good thing can only be used in small amounts. What a pity.”

Someone shouted, “Pity? Even if you can’t use it, others can use it. There are so many people here. Not everyone has such a treasure. Therefore, if you can’t use it up, you can make an exchange with others.”

As soon as Han Fei said this, figures soared into the air or ran away one after another. There were nearly ten million of them.

They were all people who had suppressed their strength for a long time and were about to make a breakthrough. Most of them were Explorers.

This was because there weren't many Law Enforcers who had followed Han Fei to fight in the early stages. As everyone was in position, Han Fei beckoned, "All powerhouses above the Venerable realm in the Chaotic Wasteland, since you're stronger, you have to protect the human race from the Raging Sea. Those below the Venerable realm have to quickly integrate into the human race from the Raging Sea. Our human race is now one and indistinguishable. Next, we will implement a series of measures, so don't be too far away for the time being so as to facilitate personnel deployment..."

### [God of Fishing](#)

#### **Chapter 2769: Booming of the Human Race (2)**

2769 Booming of the Human Race (2)

"Yes, Master Human Emperor."

"Yes, Master Human Emperor."

"..."

Because there were too many people, after speaking these words, Han Fei went straight to Han Xuan.

"Uncle Xuan, now that the human race is united, there are too many people to manage and too many things to deal with. I might need you to help me mix the humans from the Raging Sea and the humans from the Chaotic Wasteland."

Han Xuan rolled his eyes. "You really think too highly of me. So many people..."

Han Fei said, "Uncle Xuan, all the 70,000 Seven Kill Army soldiers under me will be under your command. So will all the Sea Establishers and Venerables of the human race."

Han Xuan rubbed his head. "Being too smart doesn't seem to be a good thing!"

Han Fei smiled and said, "Able people should do more work. By the way, you know Hong Yue, right? His strength isn't weak now and he's familiar with the Chaotic Wasteland. I'll get him to cooperate with you. It's a little difficult during this period of time, but it'll be fine as long as we weather through it. The comprehensive strength of our human race will definitely grow exponentially. In a few decades, everyone will break through at least one major realm or even more. This is the true rise of the human race..."

"Alright, alright. You don't have to try so hard to persuade me. I'll agree to this matter. By the way, your father and mother ran away with Yin'er just like that?"

Han Fei looked puzzled. "They didn't run away. They said that they went for a stroll."

"Heh, a stroll? I think they're just afraid of trouble, so they left this mess to you, but you left it to me. So I'm the busiest person in this family."

Although Han Xuan was complaining, after complaining to Han Fei, he shouted, “Hong Yue, all the Sea Establisher-level powerhouses of Seven Kill Army, the human race and undersea human race, come here.”

Han Xuan didn’t call the Merman Royal Family, because they were no longer a race. The Merman Royal Family was naturally led by Xia Hongzhu, and he didn’t need to interfere.

In the past, in the Raging Sea, although Han Xuan had been guarding the Nine Palace World, he had a wide coverage of information. The Nine Palace World was best governed in the Thirty-Six Mystic Worlds.

Those Han Xuan called over were all cultivators above the Sea Establishment realm. This was because only Sea Establishers had absolute authority in the current human race. Furthermore, most of the Venerables were from the Chaotic Wasteland, so they weren’t easy to command.

When Hong Yue and the others arrived, Han Xuan just nodded gently at Hong Yue and then said, “Hong Yue, choose ten Sky Opening Realm cultivators you are familiar with. In the future, you and these Sky Openers need to cooperate with me to deal with the affairs of the human race. As for all the other Sky Opening Realm cultivators, distribute the Sea Establishers here evenly. Remember their names and faces. In ten years, they will be your right-hand men.”

Han Xuan said these words in front of all the Sea Establishment Realm cultivators. Then he continued, “All Sea Establishers, after chaos, there must be great order. The human race has just come to the Sea Realm, so there are a lot of things waiting to be done. I need ten years of your time. In these ten years, you might not have much time to cultivate. Because you are Sea Establishment Realm cultivators, you are the top power of the current human race. Since you are human, you should bear corresponding responsibilities. Therefore, I need you to spend ten years helping me govern the current human race. Does anyone have any objections?”

“No objection.”

How could anyone have any objections at this moment? Han Xuan was the human race’s governor selected by Han Fei. Since they were Sea Establishers, they knew that there were too many human beings, and it would be very troublesome to manage them.

However, someone raised a question. “Master Han Xuan, if we govern the human race now, what about the City of Origin? If we start a war against them, we will definitely suffer losses...”

Han Xuan said calmly, “The City of Origin doesn’t have any Monarchs guarding it at the moment. All we need to do is to have strong masters to check them for the time being. Our human race’s breakthrough tide is about to arrive. If we immediately start a war, it won’t be conducive to the stability of the human race. Therefore, the war against the City of Origin must be after the human race’s breakthrough tide. During this period of time, you need to pick at least ten or more candidates from your subordinates as your helpers. Even if you die in the battle against the City of Origin, these people can replace you at any time.”

Han Xuan paused for a moment and continued, “Now, your mission is to distribute the people below the Venerable realm equally in the same way. The people below the Dangling Fisher realm will be distributed roughly evenly. By equal distribution, I mean to include the people from the Chaotic Wasteland and the undersea human race. I don’t want to see anyone discriminate against the undersea

humans, nor do I want the humans from the Chaotic Wasteland to feel superior because they are stronger. What I need is a harmonious human race. I'll give you three days to complete the distribution of people. Then I'll start arranging the construction of the city..."

After Hong Yue chose ten people to stay, Han Xuan said, "Old Hong, as the former master of the Mad Corpse World, cooperate with me to draft the human race's law. Where there are people, there will be trouble. The law has the most basic binding power. It must be issued in time."

Hong Yue gladly accepted the order. He knew that his status was completely incomparable to Han Xuan's. This was Han Fei's biological uncle.

### God of Fishing

#### **Chapter 2770: Booming of the Human Race (3)**

##### 2770 Booming of the Human Race (3)

After that, Han Xuan looked at Han Fei. "The simplest way is the most effective. I'll deal with this. As the Human Emperor, you don't need to deal with these things, but you need to restrain the City of Origin. If I've guessed right, the leaderless city is already in a mess, but you still have a trump card."

Han Fei raised his eyebrows. "An Bailin?"

Han Xuan said, "That's right. I know that you were going to torture this person or leave him to Xia Xiaochan. In fact, it's completely unnecessary. Xia Xiaochan has already been reincarnated. Even if she returns and fuses her memories, if she finds that the City of Origin is gone, she won't have much hatred left. Old Hong is the master of the Mad Corpse World. If he has a way to refine An Bailin into a corpse puppet..."

Han Fei said, "I have a way to refine him into a puppet."

"Oh?"

Han Xuan nodded. "That's good! Now that the City of Origin has no leader, An Bailin's return must be their lifesaver. Once An Bailin returns, he will definitely be their absolute leader and can reassure those people."

Han Fei hadn't thought of that. His hatred for An Bailin made him forget that this person could be used.

Han Fei's eyes lit up. "With An Bailin controlling the City of Origin, we can control this race at will."

Han Xuan shook his head. "No, all the Sky Opening cultivators in the City of Origin must die. This is negotiable. However, it's meaningless to use our own strength to fight. It will only increase consumption. I've learned in the past few days that there will be a tidal wave every 100 years in the Chaotic Wasteland. When the time comes, as long as there's a problem with the array protecting the City of Origin, a round of tidal waves can help us clear up the high-end combat power of the City of Origin. As for those below the Sky Opening realm, let them be used by the human race to train soldiers! With a population of tens of billions, how can we not train ourselves?"

Han Fei was suddenly enlightened. His original plan was to destroy the City of Origin immediately after the breakthrough tide passed, so that the human race could grow quickly from wars.

However, by making minor changes, Han Xuan's proposal could greatly reduce the losses of the human race, achieve the same goal, and even achieve better results. So why not?

Han Fei nodded in agreement. "Okay! Leave An Bailin to me."

Han Xuan said, "Of course I'll leave him to you. Although you don't have to govern the human race, you have a lot of things to do. You said that the side effects of the energy crystals are quite huge, so resources have become a big problem. The human race has so many people. Although I've asked around, there are also many mining areas here, but the former City of Scavengers only had a small population, not even one percent of our current human race. Therefore, the resources are definitely not enough. I can only leave this problem to you."

Han Fei remembered that there were so many Sky Opening Realm and Dao Proving Level cultivators killed, and even the Ten Thousand Scale Monarch had died here. Their Origin Stars were all there. Even if he used the Vast Ocean Navigator to explore three times a day, it would take at least 136 years to sweep through all these Origin Stars.

Therefore, in terms of resources, it should be barely enough. This was the reason why he chose to build a city in the old site of the City of Scavengers. Although millions of kilometers away was the place where the Ten Thousand Scale Monarch died, which would inevitably become a perilous place and spread here after a certain period of time, the resources here were abundant. If he harvested the Origin Stars of three people a day, it should be able to support the growth of the current human race.

Han Fei responded, "Resources are not a problem."

Han Xuan nodded. "That's good. Since resources are not a problem, I need you to cooperate with me on one more thing."

"What is it?"

Han Xuan said, "As the breakthrough tide continues, the consumption of spiritual energy in this place will inevitably increase sharply. I know the purpose of you building a city here, but the spiritual energy drifting in the world is definitely not enough. For example, after most strong masters die, their spiritual energy will dissipate, and after dissipating, they can only stay here for a short time. Therefore, I need you to help me build a city and a transcendent spirit gathering array composed of many small cities. So in the next few years, don't even think about escaping."

"Hiss ~"

Han Fei's eyelids twitched. "A Spirit Gathering Array that can accommodate the entire human race?"

Han Xuan nodded. "Yes, it's difficult, but as an array master, you should know the benefits of doing this. Even if the human race only stays in this place for decades, it's worth it."

Han Fei took a deep breath. "Okay!"

Han Fei sighed inwardly. He was too optimistic. He thought that if the human race won, he would have a lot of time to consolidate his realm and continue cultivating.

But now it seemed that as the Human Emperor, he had to bear some obligations. To put it bluntly, if Han Xuan was the only one who took care of the super Spirit Gathering Array, it might take him at least ten years to completely set it up because the area was too large and involved too many details.

However, with someone like Han Xuan who was good at calculation and could even make the Thousand Opportunities Divine Ghost Compass himself, it might not take him that much time to set up such a big array.

Han Fei said, "Okay, I'll arrange An Bailin's matter first."

...

City of Origin.

The city had been closed for several days, and the city protection array had been open.

Two days ago, the Monarchs died one after another. Some of them even heard the cicada sound from the Great Monarch, as if it was narrating his sorrow.
