### [God of Fishing](#)

#### Chapter 2861: The Road of the Human Race (2)

##### 2861 The Road of the Human Race (2)

What kind of professional talent a person had, he was suitable for that profession.

If since the birth of the human race, which was the Chaotic Era, the human race would awaken spiritual beasts, then the existence of the five major professions could very well be traced back to the Chaotic Era.

If everything was as he thought, the human race might be able to restore its glory in the ancient times.

One of the reasons for the existence of the Time Temple was to trace back to the Chaotic Era. As for the human race, they had the five major professions inherited from the Chaotic Era. Didn't it mean that they had directly replicated the path of fighting and rising in the Chaotic Era?

Thinking of this, Han Fei's eyes flickered.

However, this battle was a fair battlefield that had been designed with great difficulty. Everyone was so determined to fight that they couldn't be stopped forcibly.

Han Fei shouted, "Human compatriots, I am Human Emperor Han Fei. Everyone who has walked the path of five major professions, immediately find your partners of the five major professions nearby and form a team to cooperate in battle. Form as many teams as you can. Execute it immediately."

"Huh? Five major professions? Isn't that a long time ago?"

"Five major professions? My team has been disbanded!"

"The team will definitely be imperfect if I just find partners nearby!"

"The most difficult thing about the five major professions is teamwork... Forget it, since Master Human Emperor has given the order, let's give it a try."

"My armor box hasn't been used for a long time. It's been sealed for a long time and the weapons haven't been updated. Fine, I'll just make do!"

Although Han Fei's decision was a little hasty, it was not difficult to implement.

At this moment, the battlefield was divided into different levels. The Sea Establishers were fighting on the Sea Establishment Realm battlefield, the Venerables on the Venerable Realm battlefield, and Explorers were fighting Explorers, so as long as they shouted, it wasn't difficult to find suitable partners of the five major professions.

It wasn't difficult to find teammates. What was difficult was teamwork. The combat ability of a team without good teamwork was definitely not as good as a team with good teamwork. However, this didn't mean that without good teamwork, a team couldn't improve the combat power of individuals, it was just a matter of how much.

The people in the City of Origin were dumbfounded. Five major professions? What five major professions?

As for the human powerhouses who were fighting them, they were all in a conservative combat state.

While fighting, someone shouted, "I used to be a soul warrior. My profession hasn't changed. Who will team up with me?"

Near this person, someone abandoned his opponent and rushed over. "I'm a spirit gatherer. I'm a little rusty in arrays, but my Spirit Concentration Art is not bad. Now I'm practicing Soul Killing Technique now. It should be able to replace arrays. It won't be a problem for me to act as a spirit gatherer."

Someone approached this side. "Fellow Daoist, my armor box has been sealed for a long time. Now, I just directly refine spiritual weapons into my body. But I can use myself as an armor box. Now that I've switched to body tempering, my defense is good. But I'm still lacking some armor techniques. Is it okay?"

"Okay! Cut the crap and come over. Let's team up first. Even if we have some shortcomings, we can hone our teamwork in battle."

Buzz!

Suddenly, a green vine extended out of the void and bloomed. A female cultivator walked out and came close to the combination. "Manipulator, spiritual beast, Thousand Leaf Vine. Although I'm now cultivating the Soul Killing Technique, my professional characteristics are fine."

The powerhouse from the City of Origin who was fighting the soul warrior retreated quickly. How could he fight four people alone?

However, at the moment when this person retreated, the void fluctuated, and a ghost-like figure instantly broke through the void. Facing the sneak attack of the saber, this person's expression changed drastically, but it was too late for him to dodge. With a puff, one of this person's arms was cut off, and his body lost balance.

"Soul Killing Technique."

The spirit gatherer and the manipulator activated the Soul Killing Technique at the same time. The man's mind went blank. In the next moment, the same dagger slashed across and cut him apart.

Before this person died, he didn't understand why these people were all running towards him! What were the five major professions?

The hunter said indifferently, "I still have my hunting talent. I didn't expect that after such a long time, I would still have a chance to fight in a team."

The soul warrior laughed. "Come on, Fellow Daoists, let's fight first and talk in detail after the battle."

...

On the various battlefields, there were many similar situations.

Cheers rose and fell on the battlefield.

"I'm a manipulator. Who will team up with me?"

"Brother, here I am."

"Fellow Daoist, I'm a soul warrior. I'll join your team."

...

"Spirit gatherer and hunter needed. Anyone who hears it, join the team quickly."

"Manipulator needed. Manipulator needed."

"Soul warrior seeking to join a team."

"Is there a manipulator captain?"

For a moment, this huge battlefield almost turned into a fair.

It was mainly Explorers, Law Enforcers and cultivators below the Law Enforcer realm forming teams. Among them, the efficiency of Law Enforcers and the cultivators below the Law Enforcer realm was not low at all.

This was because at this time, many of these people still retained the characteristics of their original professions.

As for those above the Venerable realm, their teaming efficiency was low. Many people seemed to have forgotten how to play the five major professions. They were used to being alone. It wasn't easy to suddenly let them form teams to fight.

More importantly, in the Venerable Realm, their range of battle was already huge. They might only receive one or two responses even if they called out.

### [God of Fishing](#)

#### **Chapter 2862: The Road of the Human Race (3)**

##### 2862 The Road of the Human Race (3)

However, the Venerables of the City of Origin weren't fools. After a brief observation, they discovered that on the battlefield of the Explorers, many temporary five-person teams had suddenly appeared, making their combat efficiency higher.

This was because when the five humans were combined, there would inevitably be a lot of people from the City of Origin who had no place to fight. They could have fought two or three alone, but when they found that the humans had run away, they naturally gathered together.

Although they didn't know what the five major professions were, the human race only formed five-person teams, but they could make up ten or fifteen- person teams.

Therefore, as far as the battlefield was concerned, the fighting crowd didn't change much, but the fighting style was clearly changing.

In just half an hour, about one-tenth of the explorers teamed up.

Furthermore, as time passed, more and more people formed teams.

At first, it didn't seem to have much effect.

However, after there was a certain number of five profession combinations, the combat effect was clearly different. For example, when a five-person team fought more than a dozen enemies from the City of Origin, although the team members were not so familiar with each other that they couldn't defeat them directly, the five-person team could hold out long.

In particular, when a spirit gatherer was completely responsible for healing and setting up arrays, and a manipulator was completely responsible for precise control, many fatal situations changed. And generally, when facing enemies less than ten, a team could basically kill one or two people in one round.

Unfortunately, after the five major profession combinations accounted for one-fifth of the population, it was difficult to form more profession combinations. Some people didn't have the concept of the five major profession combinations at all. Some people had no team to join in because others formed teams too quickly.

Furthermore, the people of the City of Origin clearly realized that something was wrong. Someone shouted, "Everyone, hold back the humans. Don't let them form teams. Don't let them form teams."

...

Han Fei and Luo Xiaobai quietly watched the battle change, and Han Fei frowned slightly and said, "It's much worse than I imagined."

Luo Xiaobai nodded slightly. "After all, they're just temporary teams. Their teamwork is very poor. But even so, it can still increase their overall combat power by more than 30%. It's already a huge breakthrough."

Han Fei shook his head. "Not enough. A 30% increase is too little. Look at Yi Xiyan and the others. Their comprehensive combat power has increased by more than several times. And the teams that persist in the five major profession combinations can even resist enemies five times stronger."

Luo Xiaobai said, "The requirements can't be too high. If the overall strength is increased by 30%, it will directly crush the City of Origin. Now, that's all we can do. Retreat!"

"Retreat?"

Han Fei frowned. "It wasn't easy for you to arrange for the battlefields. How can we retreat so easily?"

Luo Xiaobai said, "No need to delay. We don't expect to completely destroy the enemy in one go. The five major professions need to be reactivated. If we forcefully fight to the death with the City of Origin, we will only sacrifice some people in vain. As long as we surround them but don't attack, they won't be able to escape. Their destruction is still inevitable."

Han Fei said, "You promised that the human race would have 10,000 Sky Openers and a million Sea Establishers."

Luo Xiaobai said, "I don't care about that. Besides, it's a good thing to keep the City of Origin! If the five major professions can really flourish again, we'll definitely need enemies to polish our soldiers. Besides,

we've actually already gained a lot. Isn't the battle fierce now? After this battle, there must be many people making breakthroughs. In addition to the large amount of resources we have previously obtained, the next ten years will definitely be a period of high growth and breakthrough for the human race."

Han Fei paused and said, "Then let's restart the war in ten years."

Luo Xiaobai nodded. In the next moment, she said, "I'm Luo Xiaobai, the war commander of the human race. Now, I announce that the human race will retreat and temporarily stop the race war."

"Retreat?"

"Retreat now? They killed my brother."

"Why?"

"Why is it so sudden? The City of Origin clearly can't resist us!"

Someone shouted, "Everyone, listen to the command. Retreat."

"Retreat! Do you want to defy the war commander's order?"

The humans were all puzzled, but everyone knew that the Human Emperor and the War Commander were both here. Since they had announced a retreat, there should be a reason for the retreat, right?

The people who formed teams seemed to understand Luo Xiaobai's meaning, so they all shouted, "Everyone, stop fighting. There's a reason to retreat."

Someone echoed, "That's right. If my guess is correct, retreating this time will be of great benefit to our human race."

Someone agreed. "My fellow human beings, please trust the judgment of the Human Emperor and the War Commander."

For a moment, although everyone in the human race was unwilling to retreat, they still retreated.

The City of Origin, on the other hand, was pleasantly surprised. Some people even began to cheer.

For most ordinary people, they didn't commit any crimes. In a race war, there was no right or wrong. If someone rose, there would definitely be someone who was destroyed. The human race had borne the decline of countless years. When they rose, some other races would inevitably begin to decline. This was the price of growth.

Han Fei and Luo Xiaobai were commanding the retreat, unaware that a couple and a girl were watching quietly in the void in the distance. Who else could it be but Han Guanshu and Jiang Linxian?

### [God of Fishing](#)

#### **Chapter 2863: The Road of the Human Race (4)**

2863 The Road of the Human Race (4)

Jiang Linxian said, "This girl is very gutsy."

Han Guanshu nodded slightly. "Divine Manipulators are very atavistic, but they are a bit cold-hearted. But this is also in line with the characteristics of this lineage. If this girl can become a Great Monarch, she may even be able to control gods."

Han Yin'er asked, "Dad, is there anything special about Sister Xiaobai's identity as a Divine Manipulator?"

Han Guanshu smiled and said, "Yes, it's quite special. It's said that in the Chaotic Era, this bloodline could control one of the six innate lineages, the innate demon plants, but there are too few such people."

Jiang Linxian also said, "The ancestral land may be weak, but it has some extremely legendary bloodlines. When people with these bloodlines grow up, the rise of the human race is inevitable."

Han Yin'er asked, "Mom, are the five major professions of the human race very powerful? Brother and Sister Xiaobai even gave up this sure-win race war because of this."

Jiang Linxian said gently, "It's right to give up. Otherwise, even if they can win, even if they can filter out many outstanding talents, it will deviate the path of the human race. Furthermore, the sacrifice will be huge. Your brother didn't discover the potential of the five major professions before, but it's different now. If they reactivate the five major professions, the overall combat power of the human race will rise to another level in the short term. At that time, the City of Origin will be nothing to worry about."

Han Guanshu also nodded and said, "Human beings with the five major professions are the strongest human beings. It was too easy for Fei'er to destroy the Ten Thousand Scale Race, so he didn't realize the combat power and potential of the five major professions."

Han Yin'er asked, "Since Father and Mother know, why didn't you tell Brother earlier?"

Han Guanshu smiled. "What others say is different from what you comprehend on your own. Besides, the race war planned by him and Luo Xiaobai is actually very successful even without the five major professions. War makes people grow and make breakthroughs. A tragic war makes people reflect on themselves. If this war is really won, it's completely possible for the human race to have 10,000 Sky Openers and a million Sea Establishers in 50 years as Luo Xiaobai said. This can be referenced from the situation in the Sky Crater World. If you don't experience it, you won't know that a breakthrough is so simple and easy to make in battles."

Han Yin'er didn't understand, but this wasn't important. She felt that what Han Fei and Luo Xiaobai did was good enough.

Han Yin'er asked, "Are we going back to the human race now?"

Han Guanshu shook his head. "No. Now that they have discovered the secrets of the five major professions, this race war will become a protracted war, and the City of Origin will become a real training ground for soldiers. Luo Xiaobai won't sweep through the City of Origin so easily. In this case, the pressure of war on the human race has been relieved. Now that the City of Origin have almost lost all their Sky Openers, your brother will definitely no longer care about this sure-win war, so he will definitely cultivate in seclusion. It's meaningless for us to return to the human race. Let's go. Your mother and I will take you to the Sky Crater World to take a look..."

...

When Luo Xiaobai announced the retreat of the army, on the other side, An Yi who was fleeing crazily out of the Chaotic Wasteland were quite surprised.

This was because a group of elders had already appeared outside his Origin Star in advance.

When all these people came in, An Yi asked in surprise, "Didn't I say that you had to hold out at least half a day to a day? It's only been less than eight hours. Why are you all here?"

Someone said, "We have to come! The human race came too quickly and didn't give us any time to prepare. Even if we have left the remaining 10,000 Sky Openers behind, we still can't stop them. If we don't come now, we won't be able to come."

An Yi's face changed slightly. "Damn it. I hope you won't be discovered."

An Yi's running speed was extremely fast. He made up his mind and broke all his five Dao Lock, erupting with a speed comparable to the Dao Proving Level. Having no time to think, he quickly made the decision.

But at this moment, a spiral ripple appeared in the void. An Yi didn't have time to react and hurriedly released a sword light to slash out.

Rumble!

Perhaps because the speed was too fast, or perhaps because the spiral ripples were too strong, An Yi's blow failed to shatter the ripples. Even his godly weapon longsword and his arm were shattered into powder by the violent collision.

"You came quite quickly. However, it's impossible for you to leave the Chaotic Wasteland now."

"Who is it?"

An Yi's expression changed drastically. He didn't see the person coming, but he knew that the person wasn't simple.

A middle-aged man stepped out of the void with a smile. As he appeared, the Monarch Might descended.

An Yi was shocked. A Monarch! What a strong Monarch! He was much stronger than An Bailin.

"It's over."

If it were a Dao Prover, An Yi might be able to escape. But above the Dao Proving Level, it was completely beyond his reach. Unless he could borrow the combat power of a Monarch and reach the Carefree realm.

However, he didn't have such a treasure.

An Yi smiled bitterly. "The human race has more than one Monarch. An Bailin lied to us again."

Chu Hao smiled faintly. "Think about it. Your City of Origin's Monarchs have long been slaughtered. How can An Bailin be safe and sound? It's just that you want to clutch at straws and don't want to believe that the City of Origin has declined."

"Do I still have a chance to live? I brought a lot of resources from the City of Origin, and there are people..."

Chu Hao shook his head slightly.

An Yi heaved a sigh. In the next moment, with a cicada sound, An Yi's wings shattered, and a strange ripple appeared behind him.

However, before he could step in, he was grabbed by a big hand.

Chu Hao said indifferently, "Cross realms? This life-saving technique is not bad, but unfortunately, you are too weak. If you were in the Carefree Realm, I might not be able to stop you. Unfortunately, you are not."

Bang!

An Yi died...

### [God of Fishing](#)

#### **Chapter 2864: Secrets of the Soul Sea (1)**

##### 2864 Secrets of the Soul Sea (1)

Han Fei didn't know that Han Guanshu and Jiang Linxian had been here. As the human race withdrew, Luo Xiaobai was very busy.

As the Human Emperor, he had become a tool.

In addition to informing the entire human race and reactivating the five major professions, he should cultivate in seclusion. He had many things to do. For example, his strength hadn't returned to its peak yet, Little Black and Little White were about to break through to become Monarchs, and the Emperor Sparrow that had been sent to the primordial world where the Lava Giants were located might have to prove Dao at any time. There was also the hundred-year gathering of the Void Temple, as well as the most important method of creation...

Han Fei said, "Relaunching the five major professions is a hundred-year plan of the human race. There's no point for me to stay now."

Luo Xiaobai nodded. "OK, leave it to me, but remember to come out of seclusion every once in a while."

"Okay!"

After giving the reactivation of the five major professions to Luo Xiaobai, Han Fei calculated the date. The 100-year gathering was in three days. He had been busy consolidating his cultivation these years and didn't participate in the small gatherings. Besides, small gatherings weren't of much help to him for the time being, but this time, it was time for him to tell his senior brothers and sisters the good news.

Of course, reporting the good news was secondary. The senior brothers and sisters would probably be happy to give their junior brother some gifts to celebrate his Dao Proving, right?

Three days later.

As soon as he received a message from the Eldest Senior Brother, Han Fei immediately summoned the bronze door from the Sea of Stars and stepped in.

Void Temple.

As soon as Han Fei came in, he saw that the Eldest Senior Brother was already sitting there, with Senior Sister Shen Le standing on his shoulder.

“Greetings, Eldest Senior Brother and Senior Sister Shen Le.”

Han Fei was the third to come and was waiting to greet them one by one.

Senior Sister Shen Le chuckled. “Little Junior Brother, you’ve caused quite a stir in the East Sea Divine Realm! We’ve discussed it several times, but you didn’t come. Are you finally willing to come after proving your Dao?”

Han Fei grinned. “Senior Sister Shen Le, the human race has many things that need to be done, so I am very busy. But how can I miss this hundred-year gathering?”

Eldest Senior Brother said, “Good.”

“Who’s good?”

Han Fei was about to ask, when he heard Fifth Senior Brother’s carefree voice.

“Greetings, Fifth Senior Brother!”

“Hey! Little Junior Brother! Let’s not be strangers. You’ve been busy fighting battles recently, so I didn’t disturb you. Can you make me a few dishes later?”

Han Fei chuckled in his heart, but he said, “Senior Brother, I’ve taught you all the dishes I can make. There’s nothing more I can teach you!”

Fifth Senior Brother said, “Alas! Young people should have a sense of innovation. I’ve recently developed a few innovative dishes. You can try them later.”

Han Fei said, “Thank you for your kindness, Senior Brother, but I may not be in the mood for food recently. My realm is not stable yet. I have to cultivate in seclusion when I go back.”

At this moment, Senior Brother Azure Dragon’s voice sounded, “Huh! Little Junior Brother, your strength doesn’t seem to have improved much after you proved Dao!”

Senior Brother Undead appeared behind Han Fei and said indifferently, “Little Junior Brother, you cultivated an avatar, right?”

Han Fei hurriedly responded, “Senior Brother Undead, you have a keen eye. I’ve indeed slashed out too much soul power because I cultivated an avatar.”

Han Fei didn't bother to hide it. He wanted to ask for gifts. How could he ask for gifts if he didn't make himself sound miserable?

Sure enough, as soon as he said this, Senior Sister Green Lotus and Senior Sister Red Lotus, who had just arrived, exclaimed. Senior Sister Red Lotus said, "Little Junior Brother, it will affect you greatly if you cultivate an avatar as soon as you prove Dao. Fortunately, Fifth Senior Brother is with you. Otherwise, your identity would have been exposed and you would have been in danger. Let me find some fruits for you to nourish yourself."

Han Fei put on a brilliant smile. "Thank you, Senior Sister Red Lotus and Senior Sister Green Lotus."

Then, Senior Brother Six God, Senior Sister Dark Shadow, Senior Brother Lei Heng, and Feng Yu all arrived.

Senior Brother Six God said directly, "Little Junior Brother, now you are very famous for killing two Great Monarchs in a row. Your name has already reached my ears."

Han Fei smiled. "Senior Brother Six God, you've always been well-informed. It's normal that you know!"

Senior Brother Lei Heng said, "Your name is indeed resounding. I even heard your name in the West Wilderness. To be precise, you should be famous in the entire Sea Realm now."

Senior Sister Dark Shadow said, "Little Junior Brother, this is not a good thing. The Void Temple actually has a lot of enemies, especially those from the Central Sea Divine Realm. Many of their people were killed by our Void Temple. On the surface, they dare not conflict with our Void Temple, but it's certain that they will attack you as allowed by the rules. So, you have to be careful of the people from the Central Sea Divine Realm in the future."

Han Fei's heart skipped a beat. Knowing that he was from the Void Temple, they still dared to attack him. In addition to expressing their hatred for the Void Temple, they also showed their strength. Behind these forces, there must be very powerful existences. Otherwise, how could they dare to do this?

Han Fei nodded slightly. "Thank you for your reminder, Senior Sister Dark Shadow."

With that, Han Fei glanced at Feng Yu, only to see that the girl tilted her head and deliberately didn't look at him.

Han Fei couldn't help but laugh. "Senior Sister Feng Yu, are you being bullied?"

Feng Yu snorted. "Because a certain someone secretly proved Dao, a certain senior sister was forced to give up her idea of slacking off and resting and went to a trial again."

Wow! She sounded quite aggrieved.

Han Fei grinned. "Good luck, Senior Sister."

"Humph ~"

In fact, Feng Yu was speechless. She knew that with Han Fei's talent, he would soon prove Dao, but it didn't make sense for him to do it so quickly. How many years had it been?

## [God of Fishing](#)

### **Chapter 2865: Secrets of the Soul Sea (2)**

#### 2865 Secrets of the Soul Sea (2)

When Han Fei joined the Void Temple, she was the one who tested him. Good lord, Han Fei was so weak back then, but in the blink of an eye, he could even kill Great Monarchs!

In six hundred years, he became from a Sea Establisher to a Dao Prover. His cultivation speed had been nearly three times faster than hers. Of course, she was depressed. In the past, she had always felt that she was a peerless genius, but now it seemed that those who could enter the Void Temple were all abnormal. Only she was relatively normal.

Senior Sister Green Lotus and Senior Sister Red Lotus giggled. “Haha, Little Junior Sister is under pressure.”

The Eldest Senior Brother said, “Alright, let’s catch up later.”

“Yes, Eldest Senior Brother.”

Everyone became serious. The lecture came first, and the gossip came second. Especially this hundred-year gathering class, it was much better than usual.

The Eldest Senior Brother said, “The Dao and the law are one. The law is the Dao. The Dao proves the law. The law is boundless...”

The Eldest Senior Brother seemed to have a lot of things to say. Han Fei’s ears buzzed and he heard it. He seemed to feel that many of his laws had derived many usages.

The most direct comprehension was that the Dao patterns actually had deeper patterns, which were finer and engraved with laws.

Han Fei suddenly found that many questions in his heart had got an answer. The shadow of the God Sealing Spear appeared in his mind. He felt that the God Sealing Spear could be even stronger now. It seemed that if he casually condensed a God Sealing Spear, he could seal at least 50% of the strength of Sky Openers, or even 20% or 30% of the strength of Monarchs.

Of course, the Monarchs who were too strong could break free with their own strength, such as those in the Immortal Realm or the Great Monarch Realm.

In addition, he felt that his comprehension of laws seemed to have deepened a little. His combat power had increased slightly, no more than 5%, but for a Dao Prover, a 50% increase in strength was already considerable.

After class, Han Fei felt that his head was buzzing. He felt that he still had to digest it when he went back.

Eldest Senior Brother said, “That’s all for today’s class. Is there anything else you need to communicate?”

Senior Sister Hong Lian said, "Little Junior Brother has proven Dao. It's not good if we don't give him something. Besides, Little Junior Brother has just proven Dao and has already cultivated an avatar. His realm fluctuates greatly now. I have a Soul Casting Fruit here. Little Junior Brother, quickly eat it when you go back."

"Thank you, Senior Sister Red Lotus and Senior Sister Green Lotus."

Han Fei couldn't help but exclaim in admiration. Senior Sister Red Lotus is so generous! She promised to give me spiritual fruits just now, and I got them so quickly.

A black fruit flew over. Han Fei took it and information appeared in his eyes:

<Name > Soul Casting Fruit

<Introduction > This is a strange fruit from the land of annihilation. It's usually born in the void left behind by the soul power battle of the strong in the Chaotic Sea. The Soul Casting Fruit contains a large number of ownerless souls. After taking it, cultivators can strengthen their soul and increase the visualization time. With the current soul power of the cultivator as the foundation, it can effectively increase the visualization time by up to 3,000 years.

<Level > Chaotic Spiritual Fruit

< Quality > Ultra-Quality

<Ownerless Souls Contained> 9,986,002 points

<Effect > It can increase the speed of soul cultivation if eaten directly. It's ineffective on creatures in the Great Monarch Realm or above. It can be eaten repeatedly.

The corners of Han Fei's mouth curled up slightly. Good stuff! This was really good stuff! It was equivalent to giving him ten Origins of ownerless souls. In 3,000 years, the speed of soul cultivation could increase by more than 50%. Just this one fruit could restore his original soul power to its previous state in decades.

However, he didn't really need this. With the Godfiend Formless Technique and the Supreme Divine Technique, he could restore his strength in fifty years without using this fruit.

Instead, this thing was quite suitable for Han Song's growth. Three thousand years was equivalent to five thousand years of cultivation. It could greatly relieve the pressure on Han Song.

Then, Senior Sister Shen Le said, "Little Junior Brother, your soul is unstable now, so I'll give you a drop of Soul Dew. A drop is equivalent to a hundred Origins of ownerless soul power, the kind that can directly fuse with your soul."

Senior Brother Undead said, "Little Junior Brother, I'll give you a divine bone. It can be refined and absorbed by your avatar and can conceal your fortune, making it impossible for others to detect. It can strengthen the body and soul too."

"Thank you, Senior Sister Shen Le. Thank you, Senior Brother Undead."

This divine bone Senior Brother Undead gave him sounded like a good thing. Treasures that could hide one's luck were quite rare.

Led by Senior Sister Red Lotus and Senior Sister Green Lotus, a flurry of gifts was inevitable.

Senior Brother Azure Dragon took out a Dragon Spiritual Fruit. It was said that it was born from the essence blood of a real dragon. It could strengthen one's blood and flesh and could help cultivate the Heavenly Dao Jade Marrow.

Fifth Senior Brother gave him a pot of wine, which was said to be brewed from some kind of soul spring. It had the dual effect of strengthening spiritual power and improving the power of the soul. Anyway, Han Fei was surprised to find that this thing could increase his spiritual strength by at least 50 Origins of ownerless chaotic energy and permanently increase his spiritual strength by 5%.

It seemed that Fifth Senior Brother knew Han Fei's current state very well, so the wine he gave out was very targeted. Han Fei had already decided that this thing would be used by his original body. It could restore his original body and save him half of the time.

Senior Brother Six God, Senior Sister Dark Shadow, Senior Brother Lei Heng, including Feng Yu, all gave him resources to consolidate his cultivation, improve his physical strength, and refine the Heavenly Dao Jade Marrow and his soul.

### [God of Fishing](#)

#### **Chapter 2866: Secrets of the Soul Sea (3)**

##### 2866 Secrets of the Soul Sea (3)

After Han Fei collected all the things, he felt that it was great to have senior brothers and sisters! He had planned to return to his peak state in fifty years, but now it wouldn't even take him twenty years.

Furthermore, he even felt that he could rush to the peak of the Dao Proving Level in one fell swoop.

When the gift-giving session was over, Senior Brother Six God said, "Junior Brother Lei Heng, I have some information about the West Sea Divine Realm. It's said that someone from the Primordial Divine Race has appeared and is planning something big. I don't know the details, but the West Wilderness is bound to be in turmoil and many people will die. Junior Brother, you are in the West Wilderness. Be careful not to be targeted."

Senior Brother Lei Heng was slightly surprised. "Primordial Divine Race? Is there anyone still alive in their race?"

Senior Brother Azure Dragon said, "There are still people alive from any superpower that you think has already gone extinct, just like our Dragon Clan. After the Primordial Era, many people said that our Dragon Clan had been extinct, but are we?"

Lei Heng smiled and said, "Got it. Thank you, Senior Brother Six God, and thank you, Senior Brother Azure Dragon. I'm actually quite low-key."

"Heh heh!"

Senior Brother Six God expressed his disdain with his actions, as if he thought what Lei Heng said was a bit ridiculous.

Han Fei's heart did a flip. The Primordial Divine Race? He had pretended to be from that race for quite a while.

Furthermore, Chu Hao was from the Primordial Divine Race. It had to be said that this guy came out at the right time! He might be able to make it in time for this wave of chaos.

Unfortunately, Chu Hao was still very weak and hadn't recovered his strength. If there was really a huge upheaval, involving a high-level battle, even if Chu Hao went back, he might be killed.

Han Fei decided not to tell Chu Hao about this matter in case he was implicated. After all, the human race couldn't even handle their own affairs now. How could they have the time to care about the Primordial Divine Race!

After talking about the Primordial Divine Race, Feng Yu said, "Senior Brother Azure Dragon, I'm in the Chaotic Fire Domain now! It's not far from the Dragon Hiding Place. You said you would take me to bathe in the dragon pool. You must keep your word!"

Senior Brother Azure Dragon said proudly, "Of course, but Junior Sister, you'd better finish the trial in the Chaotic Fire Domain first! Meals should be eaten one bite at a time. Don't be impatient just because Little Junior Brother has caught up with you."

"I am not."

Feng Yu quibbled loudly, "No, I am not impatient. I've accumulated a lot of experience, and my growth isn't slow. Even if Little Junior Brother wants to catch up with me, he has to be able to."

Han Fei said, "Don't involve me! I'm not competing with you... Hey, but where is the Chaotic Fire Domain? And Senior Brother Azure Dragon, bathe in the dragon pool? What benefits will it bring?"

Han Fei thought that it must be very beneficial. Otherwise, Feng Yu wouldn't have asked for it. Bathing in the dragon pool sounded extraordinary.

As for the Chaotic Fire Domain, it should be similar to the Chaotic Ice Domain. That kind of place must be an excellent cultivation place for the Phoenix Divine Race. He just didn't know what the so-called trial Feng Yu mentioned was.

Feng Yu said, "I'm not so easy to catch up with anyway."

"Yes, yes, Senior Sister's talent is unparalleled. I can't compare to you."

"It's good that you know. Don't worry. After I reach the Immortal Level, you can chase me."

Han Fei shook his head. "No, it's not good for others to know that I'm chasing Senior Sister."

"Pfft!"

Everyone: "???"

Feng Yu immediately laughed. "What are you talking about? I don't want to talk to you."

After teasing Feng Yu, Senior Brother Azure Dragon said, “Little Junior Brother, if you have the chance, you can also come to bathe in the dragon pool. The dragon pool is actually a place to temper the body. It’s the place where ten thousand dragons turned into blood in the past. A person can only bathe in it once. There aren’t many members of our race, so you can come to bathe in the dragon pool too. Of course, it’s only for trustworthy people. Others can’t come.”

Han Fei’s heart trembled. What a great place and opportunity! A place where ten thousand dragons turned into blood? That sounded awesome. And it was a body-refining opportunity. Wasn’t it perfect for him?

Han Fei immediately cupped his hands. “Thank you, Senior Brother Azure Dragon. I’ll definitely visit the dragon race when I’m free.”

Elders Senior Brother asked, “Is there anything else?”

Fifth Senior Brother smiled and said, “How could there always be something big happening? Maybe the biggest event recently was caused by Little Junior Brother. Tsk, tsk.”

Senior Sister Dark Shadow said, “It seems that every time the human race rises, there will be a storm of blood. Little Junior Brother, take note of this. With Fifth Senior Brother around, you’d better advance steadily. It won’t be too late for you to come out when your strength is consolidated or when you make further progress.”

Han Fei said, “Thank you for your reminder, Senior Sister Dark Shadow.”

Han Fei knew that the reminders of Senior Sister Dark Shadow and the others were good, but the human race had to come out as soon as possible. Otherwise, if they really stayed for hundreds or even thousands of years in the Chaotic Wasteland, they would be crippled. The morale of the human race that he and Luo Xiaobai had painstakingly aroused might be gone over time.

Feng Yu said, “Oh, right. There’s something I don’t know if it’s a big deal.”

Everyone couldn’t help but look at Feng Yu, and the latter said, “Before I entered the Chaotic Fire Domain, I had a brief contact with the Holy Lady of the Miracle Forest and even accidentally fought her... These aren’t the key. I just feel that that woman seems to have grown a little too fast. She can turn into a huge red flower with an extremely ancient aura, the kind that can swallow the law of the Heavenly Dao. For the first time, I feel that someone in the same realm as me can fight me head-on without being at a disadvantage.”

### [God of Fishing](#)

#### **Chapter 2867: Secrets of the Soul Sea (4)**

##### 2867 Secrets of the Soul Sea (4)

“Oh?”

Senior Sister Shen Le asked, “How big is the red flower? How did it appear?”

Feng Yu said, “It emerged from a gray void. Green vines, red flowers, devouring laws, and it can even swallow my fire technique.”

Han Fei couldn't help but think of such a huge flower. It seemed quite spectacular. It was rare to be able to draw a tie with Feng Yu.

Although he hadn't tested Feng Yu's strength, as a disciple of the Void Temple, she couldn't be weak. Then the Holy Lady of the Miracle Forest must be ridiculously strong.

Senior Sister Shen Le said, "It must be an innate demonic plant just like Green Lotus and Red Lotus. Interesting. It's a little strange that such a person doesn't enter our Void Temple. We have a selection trial in the South Sea Divine Realm, right?"

Senior Brother Azure Dragon said, "We can't expect all the most outstanding Heavenly Talents in the world to belong to our Void Temple. It's a pity to miss this talent, but it won't be a big problem."

Feng Yu nodded. "Yes, I don't want her to join us. Anyway, I don't like her. She's especially cold and aloof. She's a woman with no feelings."

Senior Sister Shen Le: "Forget it, let's not talk about it anymore. Is there anything else? If not, shall we disperse?"

"Wait a minute."

Han Fei shouted. Under everyone's gaze, Han Fei turned around and cupped his hands at Senior Brother Undead. "Senior Brother Undead, I have something to ask you."

Senior Brother Undead said, "Little Junior Brother, just tell me."

Han Fei asked, "Senior Brother Undead, is it a good thing or a bad thing if a cultivator becomes an undead creature after he dies?"

Senior Brother Undead asked, "Little Junior Brother, have you come into contact with the Immortal Temple?"

Han Fei didn't keep it a secret. There was no need to keep such a thing a secret. The people who knew the Three Temples best must be from the Three Temples.

Senior Brother Six God said, "Little Junior Brother, you'd better not interact with these people from the Immortal Temple. They're quite annoying."

Senior Brother Undead said, "Six God, you can't deny them just because the Immortal Temple once declared war on your insect race. You know the reason for the war."

Senior Brother Six God said, "Senior Brother Undead, of course I know it, but I just don't like them."

Senior Brother Undead didn't say anything else but said to Han Fei, "It's difficult to define whether it's good to become an undead creature or not. When living people die, their souls return to the Soul Sea, but not all of them return at once. Most of them are still floating in the void. Only after seven days will the soul in their bodies completely dissipate. In these seven days, as long as they cultivate undead techniques, they can become an undead creature and live again. Of course, their soul can only stay in the original body, and they can't possess others or transfer into other bodies. The remaining soul of their body will be locked in that body. The benefit is that their memories won't disappear. It's equivalent to having a dead person live again."

“What’s the disadvantage?”

It was not difficult for Han Fei to accept this. After all, living people had Yang soul and Yin soul, but it was difficult for ordinary people to separate them. Perhaps only his father and mother could separate them so accurately.

Senior Brother Undead said, “The disadvantage is that if anyone who becomes an undead creature dies again, their soul will really shatter and disappear, which means that they won’t be able to reincarnate.”

“Huh!”

Feng Yu said, “Apart from the reincarnation wheel of our Phoenix Divine Race, for the myriad races in the Infinite Ocean, isn’t it true that when a person dies, they are completely dead?”

Lei Heng also said, “Yes! Can a person reincarnate after death?”

Han Fei was also puzzled. It seemed that he was not the only one who was puzzled.

Senior Brother Undead said, “That’s not true. Perhaps my choice of words isn’t appropriate. The Immortal Temple doesn’t resort to reincarnation, but soul capture. However, a long time ago, from the Chaotic Era to the early Prehistoric Era, it was called—reincarnation.”

“Reincarnation?”

Everyone was immediately interested. Senior Sister Dark Shadow, Senior Brother Six God, and the others, including Green Lotus and Red Lotus, didn’t seem to know either.

Senior Brother Undead slowly explained, “Legend has it that in the Chaotic Era, there was a path of reincarnation. After a person died, their souls entered the path of reincarnation before reincarnation. But for some reason, in the middle of the Primordial Era, the path of reincarnation disappeared and the Soul Sea appeared. After a person died, their souls no longer entered the path of reincarnation but the Soul Sea. There’s no reincarnation in this world anymore. Nowadays, the so-called reincarnation refers to the act of a powerhouse forcibly taking a strand of his soul, purifying it and reshaping it, resulting in the creation of an avatar or the transfer of his soul body.”

Han Fei couldn’t help but say, “That is to say, in the Chaotic Era, when people died, they could reincarnate. But now, when people die, they are really dead.”

Senior Brother Undead said, “Yes...”

Han Fei couldn’t help but think of the brocade sachet that he had opened. On it was written, “Death is not the end of life. It’s just that the door of reincarnation has not been opened.” Why did the mysterious person write this for him?

“Reincarnation? Reincarnation?”

Suddenly, Han Fei’s heart did a flip, and he couldn’t help but feel his scalp tingle. Is circulation considered reincarnation? From the surface of the lake, my green jade stone bridge seems to be circulating, but that doesn’t count as reincarnation, right?

Han Fei frowned. "What's the relationship between reincarnation and the Soul Sea? The Soul Sea is so big..."

Senior Brother Undead said, "When the path of reincarnation was still there, the soul body wouldn't perish after death. There was a place where souls circulated, which was equivalent to rebirth. At that time, it was called reincarnation. As long as a person's soul didn't dissipate, there might be countless reincarnations. But the path of reincarnation was gone, and a large number of people died, which meant that a large number of soul bodies couldn't find a place to go. So there was no reincarnation in the world, so no new life was born. It wasn't until the Soul Sea appeared that the Soul Sea purified the soul body and re-formed a brand-new soul body, throwing it into the vast Sea of Stars. Although there was no more reincarnation in the world, the birth of life could continue."

Han Fei and the others were all dumbfounded. Including Fifth Senior Brother, everyone was stunned.

Senior Brother Six God hurriedly said, "Senior Brother Undead, do you mean that the number of souls in this world is fixed? Every time a creature is born, the total amount of the Soul Sea will be consumed by one point?"

Senior Brother Undead said, "No."

Senior Brother Six God said, "That's not right! Then why is there no new life in this world when the Path of Reincarnation is gone?"

Senior Brother Undead said, "First of all, I don't know what a soul body really is, Eldest Senior Brother..."

Eldest Senior Brother shook his head slightly. "I don't know much about it, but it's certain that a soul body can only be called a soul body when it's symbiotic with a human. Otherwise, it's just a special power."

Senior Brother Undead continued, "That's right. This power is continuously born. It's said that there's no new life when the Path of Reincarnation is gone because this power could only be projected into the vast Sea of Stars through the Path of Reincarnation in the past. Without this entrance, there will naturally be no new life. And the Soul Sea opened this entrance again. In essence, it replaced the Path of Reincarnation. However, the Soul Sea doesn't have the power of reincarnation of the Path of Reincarnation..."

Senior Brother Undead said, "Therefore, Junior Brother, if an undead creature dies again, he will completely disappear and won't exist in this world anymore."

Han Fei said, "But the Path of Reincarnation is gone. Anyway, if one dies, he will return to the Soul Sea. Isn't it equivalent to Origin Returning?"

Senior Brother Undead shook his head again. "No, after a normal death, only part of the soul returned to the Soul Sea, and some parts drifted between the heavens and earth. In the end... it went missing."

### [God of Fishing](#)

#### **Chapter 2868: A Strange Usage of the Green Jade Stone Bridge (1)**

2868 A Strange Usage of the Green Jade Stone Bridge (1)

"Missing?"

At that time, Han Fei and the others asked in unison, "How can it be missing?"

Senior Sister Dark Shadow asked, "Could it have simply dissipated into the world, or transformed into normal energy?"

Senior Brother Undead: "No. Because of the disappearance of these soul fragments, we suspect that the path of reincarnation is actually still there, but the door to reincarnation has been closed for unknown reasons..."

Dong!

Han Fei was stunned.

Death was not the end of life. It was just that the door of reincarnation had not been opened.

Then why did the mysterious person send him such a message? Even if this message was very important, why did he reveal it to him?

Han Fei felt as if an invisible net was covering his head. This feeling was very uncomfortable. He kept trying to break out of the net, but after breaking through one layer after another, he was still in the f\*cking net.

Senior Brother Undead said, "So, Junior Brother, you asked whether it's a good thing or a bad thing to cultivate undead techniques after death, I think it varies from person to person. For most people, it's actually no different. Even if they experience reincarnation, very few people realize that they are in reincarnation."

Han Fei took a deep breath and tried to calm down. Then, he asked, "Then, can we cooperate with the Immortal Temple?"

So far, Han Fei hadn't discovered that the Immortal Temple had any particularly bad intentions. They didn't want to destroy the myriad races in the Infinite Ocean. However, it was better to ask his senior brothers about this. What if there were some unspeakable secrets behind it?

This time, before Senior Brother Undead said anything, Eldest Senior Brother said, "Yes."

Hearing this, Han Fei realized something. Luo Xiaobai had previously said that since the Three Temples existed side by side and there was no hostility between them, it made sense that the three had the same goal. The Immortal Temple's invasion and killing were also tacitly approved by the other two temples.

Now, Eldest Senior Brother's answer confirmed this.

Han Fei couldn't help but sigh. It seemed that the cooperation with the Immortal Temple would be long-term.

Seeing that Han Fei was deep in thought, Senior Brother Undead said, "Little Junior Brother, is there anything else you want to ask?"

"Ah! Oh, no... Thank you for clearing my doubts, Senior Brother Undead and Eldest Senior Brother."

Eldest Senior Brother said, "In that case, let's disperse!"

...

When Han Fei returned to reality, he pondered for several hours above the Sea of Stars before returning to his Origin Star.

On his Origin Star, Han Fei took a deep look at the green jade stone bridge. He had a feeling that the green jade stone bridge might be related to the Path of Reincarnation.

Of course, he only felt that it had something to do with it. After all, the Path of Reincarnation was at the same level as the Soul Sea. It could melt the soul bodies of the entire Sea of Stars. It was not something such a small green jade stone bridge could compare to.

“Bear with it. Bear with it a little longer. Let me try again when my body returns to its peak.”

Han Fei waved his hand and lined up the gifts given by his senior brothers and sisters. He thought for a long time and decided to keep the divine bone and the Soul Casting Fruit for himself. He would give the rest to Han Song.

His original body only needed a small number of resources to assist in cultivation. Even if all these resources were spent on him, it would be useless. This was because his recovery was actually more related to time and the cultivation of the Godfiend Formless Technique.

Ten years later.

Han Fei had come out of seclusion again. Under Luo Xiaobai’s reform, almost half of the human race had begun to re-cultivate the five major professions, mostly looking for suitable people to join their teams.

The population of the human cities was maintained at about 170 billion. It was definitely not enough to rely on the City of Origin for trials. Wars didn’t happen every day. Therefore, at this moment, the arenas became popular. Hundreds of thousands of arenas popped up like mushrooms after a rain, and almost every arena was full.

In the arena, the figures of some powerhouses from City of Origin appeared. They were released from An Yi’s Origin Star by Chu Hao.

The frontline battlefield of the human race had already become the location of the City of Origin. The City of Origin had been surrounded and had completely become a training ground. It was just that Han Fei came back late. The new round of race war had been over. At the cost of 6 million human soldiers dying, the lives of 18.6 million people from the City of Origin were harvested.

This was the first battle after the reactivation of the five major professions. Luo Xiaobai was not satisfied, so she chose to retreat.

Han Fei didn’t disturb her but went back to cultivate in seclusion.

Twenty years later.

The resources given by the senior brothers and sisters of the Void Temple had all been consumed. Han Fei’s physical strength had returned to more than 90% of its peak state. Although Han Song had used so many treasures, the price of the early-stage cultivation of a loose life form was still too high. Those resources only increased the number of demon plants in the human cities.

Earlier, he had only thought that loose life forms were powerful, but he had neglected the fact that this was a big spender. No amount of resources was enough, especially soul-type resources.

If it weren't for the 256 times time acceleration on his Origin Star, Han Fei felt that the human race's demon plant planting plan could have been stopped because he really couldn't withstand it.

Even now, Han Fei wanted to give up the planting plan, wondering if he should do this after the seventh vine returned or when he obtained a new Origin Ground.

But Han Fei didn't come out this time. He continued to cultivate in seclusion for more than four years, cultivating his strength to the peak in one go before coming out again.

### [God of Fishing](#)

#### **Chapter 2869: A Strange Usage of the Green Jade Stone Bridge (2)**

##### 2869 A Strange Usage of the Green Jade Stone Bridge (2)

As he expected, another race war between the human race and the City of Origin broke out three years ago. But this time, the human race harvested 19.6 million people from the City of Origin at the cost of 4 million people. The five major professions were starting to work.

The City of Origin also clearly realized that something was wrong. This was because the five major professions of the human race cooperated too well and grew too fast. As a result, the City of Origin tried to break through the array several times and took the initiative to start a race war.

However, as soon as this kind of behavior happened, Luo Xiaobai had the Monarchs take action and directly stopped it.

Luo Xiaobai wasn't in a hurry to destroy the City of Origin now. The training wasn't over yet. How could she let these people escape so easily?

Han Fei was quite surprised when he came, because in the past decade or so, the number of human Sea Establishers had suddenly soared by nearly 300,000, and the number of Sky Openers had soared by nearly 2,800.

Han Fei was surprised. "Did I miss something? Why are there suddenly so many Sea Establishers?"

Luo Xiaobai said, "Seven reasons."

"Firstly, I added nine human armies similar to the Seven Kill Army. Each army has a total of 100,000 people until they are full.

Secondly, spend resources on them.

Thirdly, many Venerables made breakthroughs in the race wars.

"Fourthly, establish a cultivation warehouse. Everyone can submit their experience and obtain battlefield points. Everyone can spend battlefield points to exchange for the experience they want.

Fifthly, use energy crystals. Uncle Xuan had already discovered many usage methods of energy crystals.

"Sixthly, I sent many peak-level Sea Establishers to comprehend life. There used to be a large number of peak-level Sea Establishers in the Chaotic Wasteland. These people have already passed the extremely harsh screening of the City of Scavengers. They are all very talented. They don't lack talent, potential, or perseverance. What they lack is experience.

Seventh, points can be exchanged for refined stars.

Han Fei opened his mouth. It sounded simple, but he didn't expect that so many Sea Establishers could be created so easily.

Luo Xiaobai said, "There are actually many peak-level Venerables. All they need is one opportunity to break through to the Sea Establishment realm. Apart from the Sea Establishment realm, there are even more Explorers who have broken through to the Venerable realm... Unfortunately, just by comprehending life, thousands of Sky Openers can be created in a short period of time, but ten thousand is still a little difficult. Therefore, in order to fulfill my promise, I need you to lend me ten thousand puppets to train the soldiers."

"No problem."

Luo Xiaobai added, "I also need the help of the Lava Giants."

Han Fei said, "OK, I'll talk to the Grand Elder of the Lava Giants later."

Luo Xiaobai said, "There's no need. I've told Uncle Xuan. I'm just informing you."

"Uh ~"

Luo Xiaobai said, "In the end, I'm running out of resources. There are only 40 billion people resisting the tidal waves in the human cities, but 170 billion people need to cultivate, so there aren't enough energy crystals. Although the various mines are being dug, our human population is too large and it takes time to mine, so we don't have enough resources. Although we can trade with the City of Wanderers, their size is too small. The resources you once gave me are not enough at all. Therefore, we are short of resources now."

Han Fei's heart did a flip and he quickly said, "Oh, I forgot it. Don't worry about resources."

Han Fei had dug countless refined stars, especially those modified stars, which were made of resources. Although the resources disassembled were a little mixed, they were still usable.

Luo Xiaobai nodded slightly. "Also, if you have the ability, prepare more refined stars. Not for the present, but for the future. When more and more people open the sky, the demand will be huge. Although more than 160,000 Sky Openers have been killed, it's still too little compared to the population of the human race."

Han Fei nodded. The fact that points could be exchanged for refined stars could indeed motivate people to cultivate, especially for Sky Openers. Refined stars were very important for people who had just entered the Sky Opening Realm. In the wilderness, many people couldn't enter the Star Transformation Realm just because they lacked a Star Core. A refined star was more than just a Star Core. There were also many resources on it.

If ten thousand Sky Openers wanted to enter the Star Transformation Realm, the refined stars they needed were not just one or two. Furthermore, refined stars weren't just for Sky Openers to use.

They could also be disassembled. The Star Core could provide energy to the human race, and the other parts could power the Spirit Gathering Arrays in the cities to transform spiritual energy.

Han Fei thought for a moment and said, "Alright, but you can't completely rely on me to supply refined stars to solve this problem. The growth of the human race still depends on the human race itself. However, after we completely solve the City of Origin, we'll have to leave the Chaotic Wasteland as soon as possible."

"Um!"

Luo Xiaobai nodded slightly. "After the next race war, come out and replace me for a year. I need to cultivate in your Origin Star for a year."

...

After a short conversation with Luo Xiaobai, Han Fei continued to cultivate in seclusion, and Luo Xiaobai continued to guard the front line.

In this seclusion, Han Fei's focus was not on the growth of his strength. In such a short period of time, it was already very good for his strength to return to its previous peak. After all, he had severed nearly half of his strength and created Han Song. This was equivalent to spending more than 20 years to cultivate a Dao Proving Level avatar. This speed was extremely rare.

### [God of Fishing](#)

#### **Chapter 2870: A Strange Usage of the Green Jade Stone Bridge (3)**

##### 2870 A Strange Usage of the Green Jade Stone Bridge (3)

Of course, there must have been such a person in history. Otherwise, how could "All Things Three" have been passed down? Old Han had said that one of the two cultivation techniques of Yin-Yang World was the Great Dream Heavenly Book, and the other was the All Things Three.

Combined with Old Han's current strength, it wasn't unreasonable that All Things Three was comparable to the Great Dream Heavenly Book.

Finally free, Han Fei came to the green jade stone bridge.

Han Fei couldn't figure out whether this green jade stone bridge or the Great Dao on the two roads behind it was his original Great Dao.

Logically speaking, after becoming a Monarch, one's Great Dao would transform into the power of laws. However, this Great Dao hadn't changed at all, and he hadn't gained any insights.

Buzz!

Han Fei stepped onto the green jade stone bridge. The front and back roads were actually the same for him. In the past, he took the front road. This time, Han Fei turned around and walked towards the road with the power of extreme cold.

Crossing the 10,000-meter smooth road, Han Fei looked at the snowy road in front of him and the looming huge gate in the distance. He took a slight breath and stepped on it.

“Cold!”

The bone-piercing coldness penetrated into his body. Although theoretically this was his original Great Dao, it was freezing him. Around Han Fei, there were ice crystals condensing. If he didn’t move, these condensed ice crystals would soon freeze the space around him, and then Han Fei would be trapped in the ice of this space.

Han Fei didn’t hesitate. Since he was already here, he naturally had to take a walk and give it a try. At this moment, he had just entered this place, and the power of ice wasn’t that strong. A junior Sky Opener should be able to hold out for two or three seconds.

However, as Han Fei crossed a hundred meters on this road, even a peak-level late-stage Star Transformation Realm cultivator couldn’t hold on for more than five seconds.

Less than a kilometer, the extreme cold power here was completely comparable to the ice world in the Chaotic Wasteland. The last time Han Fei walked this road, he could only make it this far and couldn’t go any further because he couldn’t bear the cold.

This time, Han Fei felt fine. With his strength at the Dao Proving Level, it wouldn’t be a problem for him to hold out here for half a day.

Holding his breath, Han Fei quickly moved forward on the ice road. Surprisingly, every time he took a step, he left a footprint on the ice.

Three thousand meters, five thousand meters, ten thousand meters...

When Han Fei had walked 30,000 meters on this road, his body finally began to tremble.

With every step he took, there would be the sound of ice crystals shattering around him. Once he stopped, these ice crystals would freeze the space around him in a few seconds, and then he would have to retreat from the green jade stone bridge.

“I can’t even walk one tenth of this path with the strength of the Dao Proving Level?”

Han Fei was shocked. Although he didn’t know how far he had gone, it was definitely less than one-tenth. The huge door looked quite far away from him and didn’t seem to have changed much from the beginning.

Han Fei was helpless. He knew that he couldn’t pass the road. The green jade stone bridge was probably much more mysterious than he thought.

However, it wasn’t that Han Fei didn’t gain anything. He discovered that the longer he walked on this path and the farther he went, the better his bones, flesh, and spiritual power adapted to his Original Great Dao.

More importantly, Han Fei found that his Dao bone that was transforming into the Heavenly Dao Jade Marrow bone had an ice-blue color. Even the Dao patterns had undergone a slight change.

“This is my limit...”

Buzz!

Han Fei retreated from the green jade stone bridge and immediately felt his body cracking. Because he had to frantically resist the power of extreme cold, his body had been in a tense state, absorbing and locking a lot of the power of extreme cold.

Therefore, when this crackling sound sounded, the thousands of kilometers around Han Fei were instantly frozen, turning into a world of ice.

Han Fei was about to curse, thinking that the resources and spiritual plants within a thousand kilometers were going to suffer.

But in the next moment, something unexpected happened. In this world of ice, a few spiritual plants unexpectedly didn't shatter but mutated.

“Huh?”

“How is that possible?”

Even Han Fei himself was shocked. One of the mutated spiritual plants was an orchid.

This orchid was one of the many seeds that Han Fei obtained from the Infinite Mining Area. He didn't find it special before, but this thing could produce a small mutation in this extreme cold. It seemed that this orchid seed was underestimated!

Logically speaking, these ordinary spiritual plants couldn't withstand the extreme cold power, even if it was just a small amount of the power that escaped from his body!

Han Fei came to the orchid and information popped up in his eyes.

<Name > Mutant Ice Orchid (Newborn)

<Introduction > This is a mutated spiritual treasure that was eroded by the extreme cold power and an unknown power. Because it was corroded by the extreme cold power in a very short period of time and couldn't shatter in time, the unknown power spontaneously borrowed its body and life potential to mutate it. In essence, the mutated Ice Orchid is not the same spiritual plant as ordinary water orchids. The mutated Ice Orchid can grow quickly under the baptism of enough chaotic extreme cold power and the unknown power. After its leaves mature, one can pick some to eat. After swallowing its leaves for 90 days in a row, one can master the Dao of extreme cold and increase his resistance to extreme cold by 10%.
