Chapter 2871: A Strange Usage of the Green Jade Stone Bridge (4)

2871 A Strange Usage of the Green Jade Stone Bridge (4)

< Level > Spiritual Treasure of Heaven and Earth

< Quality > Ultra-Quality

< Contained > Unknown power

< Effect > Help you learn the Dao of Extreme Cold and increase your resistance to extreme cold. Taking it repeatedly can increase your resistance to extreme cold by up to 100%.

Gulp!

“A Spiritual Treasure of Heaven and Earth?”

Han Fei was dumbfounded. What kind of treasure was a Spiritual Treasure of Heaven and Earth? In the Sea Realm, it was a treasure that could only be chanced upon by luck. Its level was not comparable to ordinary spiritual plants at all. This thing was only slightly inferior to a Chaotic Spiritual Treasure!

This effect was also remarkable. It could directly help people comprehend the Dao of extreme cold. Han Fei was a little surprised. Wasn't the Dao on that path something I was born with? Why did I still have to comprehend it?

However, in any case, it was indeed a surprise for him to walk on the green jade stone bridge again. There were 7 more similar spiritual plants, which meant that he had eight more Spiritual Treasures of Heaven and Earth for no reason.

Every single one of them was priceless.

“Sh*t!”

Han Fei had seen a lot of big scenes, but he was still shocked at this moment.

Just because of some of the extremely cold power that escaped, he had gained 8 f*cking spiritual treasures. If he did it a few times, wouldn't he be rich?

This meant that from now on, he would obtain a steady stream of spiritual plants at the Spiritual Treasure of Heaven and Earth level.

“No, it can't be the power of extreme cold.”

Han Fei tried to calm himself down. He didn't know the Dao of extreme cold at all. This was definitely not his Original Great Dao. Although he had once condensed an Original Great Dao crystal on this path, it didn't seem to have such a powerful extreme cold attribute.

It was that unknown power. Although it was unbelievable, Han Fei was almost certain that it must have caused the mutation of the spiritual plants. And this unknown power was his Original Great Dao, a Great Dao that even the Demon Purification Pot couldn't recognize now.

If this was the case on this road, what about the other road?

Han Fei chose a place of volcanic lava and moved forward in the same way, resisting the baptism of the scorching fire essence until he couldn't resist it and returned to reality.

After a while, the same thing happened. Five mutated fiery red fruit trees were born here, all of which were Spiritual Treasures of Heaven and Earth.

<Name > Flame King (Newborn)

<Introduction > This is a mutated spiritual treasure after being swept by the scorching power of fire and an unknown power. Because it was corroded by the power of extreme yang in an extremely short period of time, it was destroyed too quickly and didn't have time to shatter. The unknown power spontaneously borrowed its body and life potential to create this Spiritual Treasure of Heaven and Earth. In essence, the Flame King and the Flame Needle Fruit are not the same kind of spiritual plant. Under the baptism of enough extreme yang and the unknown power, the Flame King can grow quickly. It produces three fruits. After maturity, it can be taken three times in three years. By taking them, one can master the Dao of Extreme Yang Fire Essence and increase resistance to Extreme Yang Fire Essence by ten percent.

< Level > Spiritual Treasure of Heaven and Earth

< Quality > Ultra-Quality

<Contained > Unknown power

<Effect > By comprehending the Dao of Extreme Yang Fire Essence, you can increase your resistance to Extreme Yang Fire Essence. Reusing it can increase your resistance to Extreme Yang Fire Essence by up to 100%.

"Huh! Can only these two types of Spiritual Treasures of Heaven and Earth be born?"

Han Fei thought for a moment and gathered almost all the different kinds of spiritual plants in his Origin Star, producing two, each occupying a thousand kilometers.

He tried again.

Han Fei swept with the power of extreme cold. This time, a total of 13 Spiritual Treasures of Heaven and Earth-level demon plants were born. Six of them were of the same type as the Mutated Ice Orchid, which meant that they had the same effect as the Mutated Ice Orchid. As for the remaining six, five were Spiritual Treasures of Heaven and Earth that had comprehended the extremely cold domain. Only a dark blue six-leaf flower attracted Han Fei's attention.

In his eyes, information emerged:

<Name > ???

<Introduction > Unknown. This space cannot bear the birth of this flower. It will wither in a hundred seconds.

<Level > ???

< Quality >???

<Contained > ???

<Effect > ???

“Well...”

After so many years, Han Fei saw a question mark-level treasure again, but even its name couldn't be recognized.

When he saw the information that this space couldn't bear the birth of this flower, Han Fei's first action was to pluck the flower. Then, with a thought, he took the flower onto the green jade stone bridge and came to the path of extreme cold.

Sure enough, the green jade stone bridge didn't reject the flower, and the power of extreme cold couldn't destroy the flower. When Han Fei planted the flower on the roadside and looked at it again, the introduction became a question mark.

But the good thing was that the flower was alive.

Using the same method, Han Fei tried three times with the power of Extreme Yang and finally got a question mark-level red grass. It couldn't survive in his Origin Star either, so Han Fei transplanted it to another path.

When Han Fei was about to create more Spiritual Treasures of Heaven and Earth, he discovered, to his surprise, that dozens of Spiritual Treasures of Heaven and Earth in his Origin Star had withered.

Yes, they had withered. These Spiritual Treasures of Heaven and Earth were competing for resources. The resources within 100,000 kilometers of Han Fei's experimental ground had been sucked up. It was as if the spiritual energy, Immortal Qi, Chaotic Qi, earth veins, spring water, and so on in his entire Origin Star were all surging towards here.

“Not good. I planted too many.”

[God of Fishing](#)

Chapter 2872: Creation (1)

2872 Creation (1)

Han Fei realized that too many Spiritual Treasures of Heaven and Earth had appeared at the same time. Because of their growing needs, they were crazily competing for resources. Those who couldn't gain enough resources died out.

There were nearly 60 Spiritual Treasures of Heaven and Earth just now, but in a moment, there were only 42 left. Han Fei didn't dare to be negligent. These were Spiritual Treasures of Heaven and Earth. It would be a waste if they withered just like that.

Therefore, Han Fei took out dozens of refined stars to feed them.

But in just three days, these Spiritual Treasures of Heaven and Earth had all grown up, and these refined stars had all dried up.

“Isn’t planting Spiritual Treasures of Heaven and Earth too costly?”

Dozens of refined stars were enough for a person to advance to the peak-level late-stage Star Transformation Realm, or even to break through to the perfected Star Transformation Realm cultivator. However, they were all sucked dry by these Spiritual Treasures of Heaven and Earth in three days.

More importantly, he couldn’t stop feeding them. Once he stopped, there would be competition for resources. Han Fei, who didn’t know much at the beginning, felt his heart ache when he saw the five Spiritual Treasures of Heaven and Earth wither.

In the end, there were only 37 Spiritual Treasures of Heaven and Earth left. Han Fei took out thousands of refined stars to nourish them.

However, Han Fei discovered that when the extreme cold subsided, these Spiritual Treasures of Heaven and Earth would wither too. Therefore, he had to travel back and forth between the two roads of the green jade stone bridge.

In the end, only 32 of the 37 Spiritual Treasures of Heaven and Earth were preserved.

Han Fei was also feeling his way. This was the first time he planted a Spiritual Treasure of Heaven and Earth, so he didn’t have much experience. This resulted in a lot of losses, but he wasn’t in a bad mood when he thought that he could continuously create Spiritual Treasures of Heaven and Earth.

After cultivating in his Origin Star for 30 years, Han Fei had comprehended both the Dao of extreme cold and the Dao of extreme Yang, and his resistances to extreme cold and Extreme Yang Fire Essence had both reached 100%.

Of course, this 100% was not a complete defense, but just relative.

At this moment, Han Fei was walking on the path of extreme cold on the green jade stone bridge. Because he cultivated the Dao of Extreme Cold and had high resistance to Extreme Cold, he had already walked an extremely long distance of 100,000 meters on this path.

“Huff!”

Every breath Han Fei took was accompanied by the burst of Dao runes.

“Can I only walk one-third of the way?”

Han Fei had tried countless times. He looked at the huge door that had become much clearer, but unfortunately, he couldn’t move forward anymore, even though he had refined nearly 30% of his Heavenly Dao Jade Marrow Bone.

Buzz!

Han Fei retreated from the green jade stone bridge. After releasing the power of extreme cold in an open space, he shook his head slightly. It seemed that he had to wait until he reached the Carefree Level or completely cultivated the BoneH.

With his current strength, he was definitely comparable to Carefree-Level Monarchs. But he could only walk one third of this path. In other words, if Han Fei were an ordinary Carefree-Level Monarch, he

might not be any better off on this path. After all, they didn't have such strong resistance to extreme cold and Extreme Yang Fire Essence.

Han Fei even felt that he might not be able to walk under the door and see it clearly until he reached the Immortal Level.

"Immortal Level?"

Han Fei smiled bitterly. He still had a long way to go!

Since he couldn't explore the green jade stone bridge, Han Fei was ready to start creating a world. The reason why he was only trying to create a world now was naturally that there were too many things to do in the early stages to study this path in peace.

Just as Han Fei was thinking this, he suddenly felt something wrong. He quickly looked at his information, only to see that it appeared:

Owner: Han Fei

Level: 112 (Dao Proving)

Bloodline Rank in the Infinite Ocean: the 29,142nd

Immortal Qi: 360,000

Soul: 324 Origins

Strength: 324 Star Powers

First Spiritual Heritage: Origin Spiritual Heritage

Second Spiritual Heritage: Eternal Darkness Spiritual Heritage

First spiritual beast: Twin Yin-Yang Sky Swallowing Fish (Level 109)

Second spiritual beast: The Emperor Sparrow (Level 110)

Main Art: Godfiend Formless Technique

"Eh! The Emperor Sparrow has proven Dao?"

Yes, back in the God Burying Ridge, the Emperor Sparrow had already had five Dao Locks. Now, the Emperor Sparrow was cultivating peacefully in the fragment of the Primordial World, so it was only natural for him to prove Dao.

However, Han Fei was not in a hurry to take him back. After proving Dao, he still needed to consolidate his foundation, which would take at least decades.

As for Little Black and Little White, they were still in a deep sleep. Over the years, they didn't have to participate in any battles except eating. This was the fifth time they had been in a deep sleep. After waking up this time, if nothing went wrong, it would be time for them to transcend the tribulation. He had already prepared countless resources for them.

Han Fei calmed himself down and sat cross-legged in the void.

At this moment, the power of faith he had accumulated had reached an unimaginable level.

Old Han didn't teach him how to use the power of faith, but he was not completely clueless about how to create a world.

What he wanted to create was the human race, but he didn't want to treat the human race he created as a test subject. Therefore, with his body as a sample, he looked at his meridians and acupoints and began to visualize and mold.

Different from shaping the ground veins back then, although the ground veins of the Origin Stars were also set according to the veins of the human body, they were only a stereotypical brand.

For a primate creature, Han Fei needed to give them life, intelligence, and bloodline... Life could be taken from his own long river of life. Intelligence could take his own soul as the base point and be created with the ownerless souls drifting between the heavens and earth. As for bloodline, Han Fei used a drop of his essence blood as a catalyst, diluted it to a certain extent, and bestowed it to these lives.

God of Fishing

Chapter 2873: Han Fei Creates Humans (2)

2873 Han Fei Creates Humans (2)

He decided to create a few people tentatively. After all, he couldn't waste the power of faith! He had to figure out how to use it first.

As for the usage of the power of faith, Han Fei only had a preliminary guess now.

Before that, Han Fei had to see how a new race lived on an Origin Star and how their intelligence grew before confirming some of his guesses.

Besides, he didn't know the potential of the people he created. He had to experiment and find it out.

Han Fei tentatively condensed a body, connected its life to his river of life, gave it a drop of diluted essence blood of his, and then put a bit of his soul into it.

Buzz!

When a figure appeared on the ground, he slowly opened his eyes and looked around blankly, his eyes filled with emptiness and confusion.

The figure subconsciously took two steps forward and then looked down at his legs and feet for a long time. Then, he raised his arm, looked at his hand, clenched his fist, turned around, raised his foot, and stepped on the spot...

As if finding it novel, the man began to trot.

The corners of Han Fei's mouth twitched. He had thought that he was careful enough, but this person turned out to be a Venerable the moment he was created.

"It seems that I've given him too much strength! Sure enough, it's quite difficult to create humans."

The No.1 test subject rushed far away with a swish. Because he was unsteady, he hit the ground head-on, leaving a gully mark on the ground. Then he directly smashed dozens of trees and plants.

A mess of fruits hit him, and juice splashed into his mouth.

The No.1 test subject's eyes lit up, and he grabbed the fruit and stuffed it into his mouth. As if he found it delicious, he ate dozens of fruits at once. After eating them, he ran to the other side and punched out. Without using much strength, he smashed hundreds of fruit trees and blew up the fruits.

Han Fei's face turned green. What a spendthrift! Should he kill him?

But soon, this person knew that he had used too much strength, so he retracted a lot of strength this time. However, even though he retracted a lot of his strength, he still broke more than a dozen fruit trees at once.

Naturally, he didn't feel distressed. He grabbed the fruit and ate it. While eating, he sat on the ground and plucked the weeds. Like a kid, he also put the weeds into his mouth and then felt that something was wrong, so he spat them out.

Then, when he saw stones, he also put them in his mouth, chewed them, and spat them out. When he saw minerals, he also put them in his mouth, and when he saw flowers, he did the same too. Coincidentally, it happened to be close to the crater of the volcano. He looked around for a while and actually jumped in. Then he opened his mouth and drank the lava. As if he didn't like it, he spat it out.

"Is he f*cking exploring the world with his mouth?"

Han Fei was speechless. But he had already created this human. If he killed him, it would be the same as killing a normal human being.

Han Fei endured it, but he felt that if he had to let such a person explore his Origin Star for a long time, god knew how many things he would destroy before he learned his lesson.

Therefore, Han Fei pointed at the air and instilled some simple thoughts into this person. In the eyes of others, this was something he was born with.

Test Subject No. 1 temporarily fell into a deep sleep. Han Fei ignored him. He felt that this person wasn't created successfully, so he changed to another place and continued to make people.

This time, Han Fei was more conservative and only bestowed 1% of the power of test subject No. 1. This time, he directly created two people, a man and a woman, respectively test subject No. 2 and test subject No. 3.

Fortunately, this time, their initial strength was only in the Law Enforcer realm. Han Fei frowned slightly. It still seemed too high. The power he gave them was actually very little.

Han Fei observed first, wondering what the two people would do.

When the second female lead and the third male lead woke up, they roughly repeated Number One's initial behavior. However, because the two of them had no language to communicate with, they slowly began to gesticulate and yell at each other.

Han Fei observed them for a few days in a row. Their situation was much more interesting than Number One's. At least, they would do everything together. Because they had just developed intelligence, they hadn't developed independent thoughts and were curious about everything.

They ate together and played around as if they had endless energy. This made Han Fei realize that although his Origin Star had day and night created by the Great Dao of Yin and Yang, these people were cultivators and didn't need to sleep.

Han Fei thought for a moment and decided that he'd better find something for them to do. He felt that it was too troublesome to let them invent and create words themselves. He might as well teach them the current language so that they could have a preliminary idea. This way, they wouldn't mess around in his Origin Star all day long.

After the two of them fell asleep.

Han Fei planned to create a few more people this time, but this time he must control his strength well. He even cut a bit of his soul into dozens of pieces, and his bloodline was diluted more.

This time, Han Fei created seven people.

He didn't have any special thoughts. He just wanted to see how they lived and what they would do when there were more people.

[God of Fishing](#)

Chapter 2874: Han Fei Creates Humans (3)

2874 Han Fei Creates Humans (3)

Among the seven people, there were five men and two women, and the weakest was a Hidden Fisher.

"Huh! No, I can't use my own soul to create humans. This is already my limit. If I continue to sever the soul, it will be incomplete and I can only create a fool. So that's the problem... Yes, my soul strength is at the Dao Proving Level, which is too high-leveled. If I use ownerless souls, then I should be able to control the strength of the created beings to around the Fishing master realm."

Han Fei thought that he should try their cultivation potential and use of weapons. After all, the people he created must know how to cultivate and fight. Otherwise, how could he see their development? Therefore, Han Fei left some incomplete cultivation techniques and some less powerful spiritual weapons on a certain cliff.

However, Han Fei discovered that they didn't look at the technique at all but were brandishing their weapons. In the middle of it, an accident happened. One of them swung his sword and accidentally killed one of the women.

Even Han Fei was stunned. Are you f*cking kidding me?

When a Hidden Fisher was dead, he was dead. There was no such thing as Blood Rebirth for Hidden Fishers.

Then Han Fei saw the group of six people holding the body of the woman who was accidentally hacked to death and crying heart-wrenchingly.

However, there was also a benefit to this, which was that this group of people didn't dare to play with weapons anymore. After a few days of sadness, they finally became interested in the technique patterns on the cliff.

Therefore, these people began to cultivate. This refreshed Han Fei. They had finally entered a cultivation state.

However, after a few days, Han Fei was lost for words.

"F*ck! Is their talent for cultivation so high? It seems that my essence blood is not diluted enough!"

Han Fei discovered that in just one day, this group of people had generally advanced by a small level, which was unreasonable. If they cultivated for years, wouldn't they reach the Sea Establishment Realm?

After observing for a few days, Han Fei found that the number of created beings was useless. They were seven fools. Together, they were still fools. They were only talented in cultivation but nothing else.

Therefore, Han Fei gathered the few people he had created in a place.

Number One could fly now. After all, he was a failed experiment and was given too much strength, which broke the balance. Fortunately, Han Fei patched up in time and gave him born wisdom.

Therefore, Number One was seriously exploring his strength and this world.

Soon, No.1 found No.2 and No.3. Han Fei also patched No.2 and No.3. They were creating words.

Seeing the arrival of Number One, they knelt down. Although they were Law Enforcers, how could they compare to a Venerable? People always worshiped miracles they couldn't explain.

Number One came to Number Two and Number Three and looked at the words engraved all over the ground. He danced with joy because he could recognize all these words. Han Fei was speechless. What's the big deal of recognizing these words? I gave the knowledge to you.

Han Fei was still a little uncomfortable to see Number One dancing like a savage. It seemed that he had to give him some higher intelligence so that he wouldn't be so reckless and at least would know to wear clothes.

A few days later, after the second transformation, Number One became much more mature. He began to feel ashamed of not wearing clothes, so he used leaves or something as clothes.

Han Fei couldn't have felt more awful. Wasn't this still shameful?

Forget it. Han Fei made up his mind. Men were useless in detail. Women were needed to make clothes. So, Han Fei began to modify Number Three.

Several days later, Number Three began to master the way to weave clothes without being taught. She made a decent piece of linen clothes for Number One and Number Two.

Although they still looked like savages, it was enough as long as the clothes were made.

Sure enough, when Number One saw the clothes made by Number Three, he was astounded. Then, as a matter of course, he weaved a set of clothes for himself with spiritual energy.

Because these three people had mastered language, a few days later, they made huge progress in the modification of clothes and made a robe.

Number One didn't know that it was because Han Fei had given him the ability to think flexibly.

But the more Han Fei bestowed, the more distressed Number One became. When Han Fei saw Number One start to think about life and the world, Han Fei knew that he couldn't let Number One continue to think. After thinking for a long time, Han Fei decided to give Number One and the others the last patch.

This patch made them feel that they were born from the Chaos and the heavens and earth. Otherwise, with Number One's current high-level thinking, he might suspect that a mysterious powerhouse was controlling everything behind in a few days.

A few days later, the patch was applied, and No. 1 no longer suspected it. He took No. 2 and No. 3 to find the other six people cultivating on the cliff.

At this moment, the six of them had figured out the way to cultivate, but when they saw someone flying over from the sky, they immediately danced with joy and ended up kneeling.

Number One said, "You don't have to kneel to me. We're all spiritual bodies born from chaos. I'm just slightly stronger than you."

[God of Fishing](#)

Chapter 2875: Han Fei Creates Humans (4)

2875 Han Fei Creates Humans (4)

However, except for No. 2 and No. 3, when No. 1 found that these people were all shouting stupidly, he immediately realized that these people hadn't mastered words and language.

Therefore, he immediately taught these people words and languages. Yes, there was no need to teach them. At Number One's level, he could teach these people these with a tap of his finger between their eyebrows.

After Number One taught these people language and how to mold spiritual clothes with spiritual energy, they finally became the first batch of primitive humans Han Fei created.

The few people who had just learned the language were all curious at this moment.

Because there were too many people, Number One thought for a long time and finally gave himself a name, "Tai Chu".

Number Two and Number Three invented writing, and their strength was second only to Tai Chu, so Number Two named himself as Tai Er. Tai Chu instinctively felt that the name wasn't good and wanted to let Tai Er change it, but Tai Er felt it was good, so they didn't argue over this. When it was Number Three's turn, she just looked at Tai Chu eagerly. Tai Chu thought for a moment and said, "You invented clothes. Let's call you Tai Yi."

Then, because the others weren't born with knowledge, couldn't express themselves, and didn't have special abilities or time to learn more, they called themselves Tai Si, Tai Wu, all the way to Tai Jiu.

At this point, Tai Chu had become the absolute leader of these people.

Tai Liu asked, "Tai Chu, what is this?"

"This is a spiritual fruit. Eating it can improve your strength."

Tai Liu asked, "Tai Chu, why is there a spiritual fruit?"

Tai Chu: "It's born by the heavens and earth."

Tai Qi asked, "How was the world born?"

Tai Chu thought for a long time. "In the way that Heaven and Earth gave birth to us, flowers and trees were born. The flowers and trees absorbed the essence of Heaven and Earth and grew into spiritual fruits."

Tai Jiu asked, "Tai Chu, what is growth?"

Tai Chu: "..."

Tai Ba asked, "Tai Chu, what about these patterns engraved on the stone? We are all imitating the actions on these patterns."

Tai Chu said, "That's a cultivation method produced by the heavens and earth. By cultivating with it, we can become stronger and more powerful."

Tai Wu asked, "Tai Chu, why should we become stronger?"

Tai Chu: "..."

People who had just gained wisdom had too many questions. Even if Tai Chu was born with knowledge, it was difficult for him to answer these questions. Some things couldn't be said with a mouth.

Han Fei also realized this. He seemed to understand the direction of making beings.

But now was not the time. Now he had to create an ordinary person first. He couldn't just create cultivators!

Therefore, Han Fei added many restrictions to his Origin Star, such as sealing most of the area and setting up a misty state to prevent Tai Chu from running around with the others.

When he successfully created a normal person who he felt was perfect, he would let Tai Chu and the others discover it!

Normal people couldn't be molded with Han Fei's own soul. He chose ownerless souls. Fortunately, he could extract them through energy crystals.

This time, Han Fei carefully diluted the essence blood again and again, combined it with the ownerless souls, and controlled the connection between this person and his long river of life, allowing him to age naturally.

Besides, he didn't give him any patches, even if this person didn't know anything, couldn't read or wear clothes.

When this person was created, he was in a state of slumber and his strength was that of a fishing master. The birth of this person marked the birth of the first normal primitive man.

This person's strength was already the limit of what Han Fei could do. He didn't expect that as a Monarch, it would be so difficult for him to make an ordinary person.

"Strength is no longer a problem."

His physique was about the same as in reality.

Han Fei tried to soak this person in the Spirit Awakening Fluid, but he gave no reaction at all.

In the end, he concluded, "The people I created can't awaken their spirits or summon their spiritual beasts."

Han Fei decided to make a few hundred first.

Another moment later.

A 200-person savage tribe was born.

After observing this group of savages for a full month, Han Fei confirmed that they were ordinary savages in general, but their learning ability was very strong. Although he had already adjusted the spiritual energy concentration on his Origin Star, their strength was growing relatively fast.

These people picked fruits everywhere every day and ate them. They also explored a little further away, but they didn't dare to go too far away. Life was boring. After living in groups for more than half a month, when a man and a woman discovered a certain secret between men and women, Han Fei couldn't bear to watch the scene.

Han Fei thought to himself, This is f*cking shagging!

It wasn't until a person became stronger quickly, defeated many men, and became the leader of this tribe that this mess was slightly better. This was because women all wanted to do something with this leader.

Han Fei knew that he couldn't just let them go on like this! He moved all the spiritual fruits that these people hadn't explored away, trying to agitate them to explore further places.

However, after only a few attempts, they felt that they had gone too far and returned to live in groups. They would rather be hungry than try to find food. After a stalemate for more than half a month, someone starved to death.

Han Fei was speechless. He wanted to give them a patch again, but he held himself back, thinking that primitive people were not like this.

For three days in a row, after dozens of people starved to death, the leader still didn't take them further away to find food, but new fruits grew on the fruit trees they had finished eating earlier. Although the fruits were still small, these people were overjoyed.

Therefore, more than a hundred people were kneeling around the tree. It seemed that kneeling had become their instinct.

“Shoot ~”

Han Fei’s face turned black, but then a light flashed in his mind. He seemed to have missed something...

God of Fishing

Chapter 2876: Han Fei Creates A World (1)

2876 Han Fei Creates A World (1)

Yes, after a period of observation, it was not difficult for Han Fei to detect some problems.

That was, although the life demon plants in his Origin Star could grow naturally and have natural rules, it was far from enough.

Therefore, just a simple sign of growth was enough to make these people prostrate themselves in worship. This was supposed to be their instinct.

Thinking of the Origin Star of the Ten Thousand Scale Monarch, Han Fei could quickly summarize some basic questions. Although he was only in the test phase, these questions were equally important.

Its problems can be roughly classified as:

Most of the known rules were bestowed by his Great Dao. They were too powerful.

There were only people on his Origin Star, and that definitely wouldn’t do. Creation required a complicated ecological environment, not just people.

Spiritual plants were too monotonous. Most of them were auxiliary demon plants, but there were all kinds of spiritual plants in the real world. Some were good, and some were bad.

Everything was about competition. Not just humans, flowers, trees, birds, beasts, fish, insects, and everything else had to compete.

In the past, he didn’t care about this because his Origin Star was his backyard. He just needed to put things that were useful to him.

However, he was creating a world now! Creating all the rules of this world, which was the law of the Heavenly Dao of this world. Before the law of the Heavenly Dao was created, it was actually meaningless to just create a few people to observe their actions. Therefore, what he needed to do now was not just create humans.

This was the difficulty. If he wanted to be in line with the principle of creation, he had to create everything. But how much work would it take to create everything?

Han Fei realized that the difficulty of creating a world lay in creating everything, which was based on the rules of the Heavenly Dao.

“I see. No wonder Old Han asked me to save all my power of faith. It’s saved for this moment.”

The corners of Han Fei’s mouth curled up slightly. Earlier, he wanted to take a shortcut and observe people through people. But this idea was wrong. What he should observe was the relationship between humans and nature, between humans and the world.

This relationship hadn't been established yet. With a thought, Han Fei left the Origin Star. He didn't let the fruit trees where the small tribe was located produce fruits again because it would mislead them into thinking that they could receive gifts just by kneeling. This was clearly wrong.

However, he had opened this area so that Tai Chu and the others could find these people, which ensured that they wouldn't die.

After leaving the Origin Star, Han Fei immediately went to the Raging Sea. Although there was no one in the Raging Sea now, it didn't mean that humans had given up on it.

However, the Life Origin here needed to be restored. As long as the human race didn't go out, the Raging Sea couldn't be restored. After all, every breakthrough required resources and spiritual energy. With 180 billion people, it would be difficult for the Raging Sea to recover.

However, there were still a large number of low-level creatures in the Raging Sea, such as plants and animals in the sea and some plants on land.

In the Raging Sea, Han Fei kept stuffing things into his Origin Star, such as various fish, marine plants, algae, insects, coral reefs, shellfish, and even plankton, dust, and a small number of birds.

Of course, Han Fei didn't just stuff these things into his Origin Star.

These plants were the plants in the Raging Sea, so they enjoyed the law of the Heavenly Dao of the Raging Sea. However, his power actually came from the Raging Sea. Therefore, even if these things were in his Origin Star, they could also carry his law of the Heavenly Dao.

However, creation didn't just move these things over. Every creature had its own unique composition. Han Fei moved these creatures over because the time in his Origin Star was 256 times that of the outside world and he had time to study these creatures.

Several days later, Han Fei entered seclusion again. He began to analyze the composition of these creatures one by one. Disassembling them was much easier than disassembling spiritual energy.

Normal people couldn't see spiritual energy, not even cultivators. So, even with a microscope, it still couldn't be seen. And disassembling spiritual energy was even more difficult. To disassemble something so minute that it was almost invisible was naturally much more difficult than disassembling a creature. At least, cells could be seen.

Life was composed of cells, which Han Fei knew before he came to this world, but it was more complicated here. This was because in a world of cultivation, cells also had to carry the upper limit of cultivation.

Han Fei produced thousands of clones and was about to study different lives. Suddenly, a cry woke Han Fei up from his research.

He looked at the source of the sound, only to be shocked.

"How can that be?"

Han Fei was surprised because he saw that a baby was born.

Yes, he didn't see it wrong. A baby was born.

He hadn't established the Heavenly Dao law yet, but the influence of the Soul Sea had already descended on his Origin Star?

Aren't the Origin Stars independent? Yes, the Origin Stars exist in this vast Sea of Stars. Aren't the stars in the Sea of Stars all within the coverage of the Soul Sea?

[God of Fishing](#)

Chapter 2877: Han Fei Creates A World (2)

2877 Han Fei Creates A World (2)

Yes, the birth of a life meant the reincarnation of a soul body. The reincarnation of a soul body meant that they could summon their spiritual beast or companion spirit.

However, the people he created couldn't summon their spiritual beasts. Perhaps they were created humans, but this newborn baby wasn't. He was the first living creature in this world to be naturally born.

However, this episode only surprised Han Fei a little, but then he was overjoyed. This was because since the Soul Sea could affect here, it meant that there was no problem with the life reincarnation in his Origin Star.

He had thought that only after the Heavenly Dao laws were established would there be a chance to connect them to the Soul Sea. He had even thought of asking the God of War or his Eldest Senior Brother how to connect the Heavenly Dao laws of his Origin Star to the Soul Sea.

Now it seemed that he didn't need to.

In this way, Han Fei was relieved and began to study attentively.

One year, two years, three years... Ten years...

It wasn't until Han Fei had studied in this place for more than five hundred years that his countless clones were combined and infinite information formed a huge net, that Han Fei knew that he still had a lot of things to study, but it didn't matter. For now, it was enough.

Due to the adjustment of time acceleration, except for where Han Fei was, other places returned to normal time flowing.

The barbarians back then had already begun to cultivate under the lead of Tai Chu. Now, they were all dressed in clothes. They didn't have to worry about food and drink anymore, and they could also cultivate. They couldn't be happier.

The corners of Han Fei's mouth curled up slightly. Tai Chu and company had explored many areas in his Origin Star. Now that the layout of this world had changed drastically, he had to let them watch it. Otherwise, it would be difficult for them to understand the future world.

On this day, these people were cultivating.

Tai Chu sat in an open space and looked up at the sky, but he couldn't see anything. He was lonely. He was the strongest person in this world. He was born with a lot of knowledge. He was incompatible with

these savages. This world seemed to only have these fruits all over the ground and some places that he couldn't explore. There was nothing new.

Over the years, he had tasted all the fruits he could eat, bathed in the river of spiritual energy, and soaked in hot springs at the mouth of the volcano, but he couldn't make a breakthrough or improve further. Something seemed to be restricting his growth and improvement.

It was the same for the others. No matter how they cultivated, once they reached the bottleneck of their current realm, they couldn't go further.

Boom!

Suddenly, there was an explosion in the sky. Tai Chu stepped into the void on the spot, but as soon as he stepped into the void, he was suppressed by a certain force and fell to the ground.

Tai Er, Tai Yi, and the others all ran towards Tai Chu.

Tai Er asked, "Tai Chu, what happened?"

Tai Yi said, "What a horrible sound."

Tai Chu: "I don't know yet, but we are safe..."

As they spoke, Tai Chu and the others were stunned, because they saw an extremely tall giant appear inexplicably where they could see with their naked eyes.

The giant was 330,000 feet tall, like a god. For them, this was an existence that they couldn't understand.

The group of people knelt on the ground in horror, trembling.

Han Fei watched all of this indifferently, but he didn't care about these people at all. At this moment, he was thinking that the foundation of the Heavenly Dao law in his Origin Star could only be the power of faith.

In other words, the power of faith was actually the power of the human world, a mature power of the human world.

After determining the direction of creation, Han Fei naturally understood what Old Han meant. He wanted him to transform the power of faith into the Great Dao of the human world, which was the law of the Heavenly Dao on his Origin Star.

Only with the operation of the Heavenly Dao could there be vicissitudes and all living beings in the world.

Up to now, there was no Heavenly Dao operating on Han Fei's Origin Star. Han Fei opened his mouth and a mass of golden light spewed out.

As Han Fei issued an order in his heart, the golden light suddenly dispersed, turning into billions of mystic lights in the sky that scattered between the heavens and earth. However, there was too much power of faith and it didn't completely dissipate. This was because Han Fei discovered that the law of

the heavens formed by the power of faith wasn't completely activated. Those mystic lights dissipated between the heavens and earth, but they only dissipated between the heavens and earth.

"Huh! They can't form the Heavenly Dao?"

Han Fei realized something.

Yes, man followed the laws of the Earth, the Earth followed the laws of the heavens, the heavens followed the laws of the Dao, and the Dao followed the laws of nature. Although everything on his Origin Star was also growing because of the basic law, it was the basic law of his Origin Star.

Now, the power of faith had turned into the Heavenly Dao, but it didn't operate. It was probably because the rules of everything in this world weren't perfect yet. At the same time, it was time to change the Yin and Yang produced by his Great Dao.

Han Fei's Origin Star was only 810,000 kilometers long, but it was wrapped in a thick defense layer like a small ball in a large ball. Therefore, his Origin Star was actually protected.

At present, Tai Chu and company were on the small ball inside. Now that he was going to create a world, he had to transfer these people to the outermost surface.

Tai Chu and the others disappeared in the blink of an eye. When they opened their eyes again, they found that they were in a desolate place. There were no flowers, trees, green mountains, water, sky, or anything else. The world was dark.

[God of Fishing](#)

Chapter 2878: Han Fei Creates A World (3)

2878 Han Fei Creates A World (3)

But the giant was still there, and they could only tremble and pray.

Han Fei blew out a cloud that covered the sky. Then, he saw stars flashing all over the sky.

"Let there be light."

Therefore, Han Fei reached out and grabbed, and a big burning star hung high in the sky. This was the sun.

Following that, a star with a dim luster was also placed on the other side of the Nine Heavens. This was the Dark Moon.

At that moment, light appeared. It was bright all over and radiated in all directions, like a golden flame piercing through the darkness. The flashing stars in the sky were replaced by blue sky and white clouds.

The mystic sound rose again.

"The earth is flat, the mountains are high, and water is falling from the sky..."

At that moment, the ground began to tremble violently. Some places were sunken deeply, showing an irregular state. In some places, there seemed to be mountains towering after the violent collision. And

between the heavens and the earth, there was a long celestial river sweeping past, falling from the nine heavens and turning into a sea.

For such a miracle, Tai Chu and the others could only kowtow crazily, instinctively in awe and fear, looking extremely pious.

“Let there be air, spiritual energy, and wind.”

At first, there was a strong wind, then a breeze. White clouds floated in the sky and the water rippled.

“Green grass shall grow on the ground, as well as plants with seeds and trees that can bloom and bear fruit. The fruit shall all have seeds inside.”

Han Fei waved his hand, and as if he had sprinkled a galaxy of stars, infinite spiritual energy flowed incessantly and scattered between the heavens and earth. Trees grew all over the land, and flowers and trees were lush and full of vitality. As the breeze blew, the strong fragrance of flowers and fruits wafted in the air.

“Let there be life in the water and birds in the sky!”

Various forms of life that Han Fei had studied for five hundred years were born in water in groups. Of course, there weren't many of them, and he couldn't create billions of creatures at once.

Fortunately, the natural reproduction of creatures could accelerate the process of life evolution. At least, they didn't have to slowly evolve from cells.

At this moment, a flock of birds flew across the sky, and many creatures in the water began to swim.

“Let there be living creatures on the ground, including livestock, demonic insects, and ferocious beasts.”

Some creatures that had been nurtured in Han Fei's 500-year research were released.

For a time, these animals rampaged on the ground.

At this time, Han Fei had already felt that the power of faith was being consumed crazily. They seemed to be connected to everything here and finally formed a magical rule.

“Huff!”

Had it finally been completed?

Han Fei knew that he couldn't be hasty. It took a lot of time for everything to grow and reproduce. Fortunately, his Origin Star didn't lack time at all.

Han Fei didn't have to wait for thousands of years. One year in the outside world, which was 256 years on his Origin Star, would be enough. Creatures actually reproduced very quickly. Reproduction certainly needed restraint. Therefore, except for the created humans, the ecological balance of all things made their reproduction steadily rise, but not to the point of being excessive.

As for Tai Chu and company, Han Fei gave them some time to sleep for a year. When they woke up, they found that the world had changed. Wouldn't that be interesting?

After doing all this, Han Fei quickly crushed many refined stars and gathered a huge amount of resources to replenish and modify his Origin Star.

Although he looked awesome just now, even if he used the power of faith to create the Heavenly Dao, the resources needed to be consumed were not reduced at all. This was only because he had created some creatures in the previous 500 years. Otherwise, the resources on his Origin Star might not be enough.

As for the modification of his Origin Star, Han Fei mainly wanted to set up some dangerous places, forbidden places, blessed places, and so on on the periphery.

Besides, although Han Fei cultivated the Supreme Divine Technique and didn't need other stars to assist his Origin Star, he felt that in order to create a reasonable environment, some things were needed, such as the Sun, the Moon, and a few refined stars to balance the Origin Star.

After hundreds of years of modification, Han Fei finally declared in satisfaction that it was done.

In the following hundreds of years, Han Fei still didn't idle. This was because after the power of faith turned into the Heavenly Dao, the Heavenly Dao law appeared, and the world origin of his Origin Stars was born.

The World Origin here was different from that of the Raging Sea and the Demon Domain.

Han Fei discovered that his World Origin lake was only a small lake less than a hundred meters long. The lake looked like it was about to dry up.

The World Origin lake was not big enough, but it was not important now, because the creatures he created, except for the small tribe, would generally be stuck at the peak of their current strength level.

When all the creatures on the Origin Star grew up, this place would evolve into a world similar to the Yin-Yang World.

In the end, after Han Fei felt that all creatures had taken shape, he created about 10,000 small tribes, each with a population ranging from dozens to hundreds.

At the same time, he also created some powerful demon plants and ferocious beasts. He arranged some treasures in certain dangerous places before stopping.

Creation couldn't be achieved overnight. He was only at the Dao Proving Level now. It wasn't realistic for him to draw inspiration from such a new world.

God of Fishing

Chapter 2879: Han Fei Creates A World (4)

2879 Han Fei Creates A World (4)

Han Fei decided to accelerate the time by 256 times and wait for tens of thousands of years.

...

On this day, Tai Chu and the others woke up.

For them, it was just a nap, but this world had already undergone earth-shaking changes.

Han Fei erased most of their memories, only retaining the memories of his creation of the world and these people's origin. The reason why he kept the memories of the creation of the world was to tell them the origin of this world.

However, Han Fei's creation of the world was still engraved in their minds. They would probably never forget it.

The awakened Tai Chu, Tai'er, and the others were still in shock. They looked around and found that the shocking giant had disappeared. At this time, birds flew past in the sky, and butterflies were playing around. Tai Yi pulled out a soft worm from the ground, her face full of curiosity.

The others all exclaimed, "What is this? This, and this..."

Everyone looked at the source of the sound and saw that someone was holding a bird and twisting its wings curiously. Someone took a snake from a tree trunk and let it bite him. Someone even got a few bird eggs but accidentally crushed them. Then, he licked them with his mouth, as if he had tasted something different and was even more surprised.

Tai Chu looked around, unable to contain the joy in his eyes. He raised his head and shouted, "A miracle, it's a miracle. In the beginning, the world was chaotic and darkness enveloped everything. We floated in the boundless chaos, and the entire world was dim and silent. It's god, the great god who created the world... God created all things, gave us light, gave us food... Thank you for the gift of god."

Tai Chu led everyone to kneel and mutter a bunch of strange words, and these people began to live in groups again.

This time was different from last time. Last time, their life was just eating fruits, lying flat, and studying the affairs of men and women.

But this time, it was obviously different, because the diversity of creatures and the complicated world made them feel unprecedented novelty.

There weren't so many fruits anymore, and they were no longer spiritual fruits. Besides, under the lead of Tai Chu, they discovered the secret of hunting. Tai Chu, who was born with knowledge, even ignited a spiritual fire, making them feel the pleasure of eating cooked food.

These people were undoubtedly happy. Han Fei didn't stop them at first, but it was impossible for him to let the Bugs like Tai Chu and company mingle with ordinary people all the time.

On the other hand, the lives of the other small tribes were not so optimistic. In just three days, there were different kinds of deaths.

Their living environment was relatively harsh. Except for their slightly stronger physique, they had no weapons and could barely fill their stomachs with fruits, but the fruits would always be eaten up. New fruits were not something that could be eaten in a day or two. Helpless, they began to choose to lie flat.

However, if lying flat was useful, why would he need to create those ferocious beasts?

When a ferocious beast invaded these tribes, their instincts made them escape. When they couldn't escape, their morale was aroused. Therefore, these people began to fight and found that they could kill ferocious beasts. Hunger made them live a life of eating raw meat and drinking blood.

Han Fei had expected this. It didn't matter to him whether he watched it or not.

However, only a few days after his ten-thousand-year plan began, Han Fei discovered something unexpected, which shocked Han Fei.

That was, Han Fei discovered that the souls of the people on his Origin Stars hadn't completely dissipated after they died, but were complete soul bodies.

But according to Senior Brother Undead, after they died, some of their souls would directly return to the Soul Sea! But these people on his Origin Star, including those creatures who accidentally died for various reasons, didn't return to the Soul Sea. Instead... they converged towards the green jade stone bridge.

Yes, this was what shocked Han Fei the most. Their soul bodies penetrated the outer surface where they were and were sucked into his true 810,000-kilometer Origin Star.

Furthermore, these soul bodies numbly crawled into the green jade stone bridge.

Han Fei's imagination was racing, so he followed these soul bodies into the green jade stone bridge.

Then, Han Fei discovered that these soul bodies were all gone.

Yes, he had thought that these soul bodies would appear on the path of the green jade stone bridge. But when he stood on the green jade stone bridge, or walked on the path of Extreme Cold, or the path of Extreme Yang Fire Essence, he didn't see any soul bodies. Those soul bodies disappeared into thin air, disappearing without a trace.

Gulp!

At this moment, Han Fei couldn't help swallowing and muttering, "Road of Reincarnation?"

[God of Fishing](#)

Chapter 2880: Divine Manipulator Bloodline (1)

2880 Divine Manipulator Bloodline (1)

Finally, Han Fei's guess came true. He was at a loss for what to do.

After seeing the brocade sash of the mysterious man in black, Han Fei felt that something was wrong. After hearing Senior Brother Undead mention the relationship between the Road of Reincarnation and the Soul Sea, Han Fei thought of the green jade stone bridge.

The green jade stone bridge was mysterious. He had thought that it was just a manifestation of his Original Great Dao. Perhaps his Original Great Dao was too strong and mysterious.

But now it seemed that this was not the case. Those two doors should be the gates of reincarnation that the black-clothed man and Senior Brother Undead mentioned.

However, why were there two gates to reincarnation?

Why was the Reincarnation Road in his body?

How could he open these two doors?

What would happen if he opened these two doors?

Han Fei didn't know any of this, but did he need to ask? At least so far, he didn't need to.

Since he could take the path of reincarnation, it meant that this path would eventually be completed by him. Han Fei was confident that perhaps when he was at the Carefree Level or the Immortal Level, he could finish walking them.

As for whether or not he could open these two gates, what would happen after he opened them, he would have to finish these two paths first.

Anyway, the current situation didn't seem to affect him much.

After those people died, the Soul Sea would still be projected over, which didn't affect the death and birth of everything in the world he created.

However, the secret of the Road of Reincarnation made Han Fei feel very pressured.

He wanted to ask Old Han and his mother about it, but then he realized that the age of Old Han and his mother was actually quite different from the time when the Road of Reincarnation disappeared. They probably didn't know why the Road of Reincarnation had come to his body.

Even if they knew, so what? The path of reincarnation was already in his body and he had already embarked on this path. It was impossible to take it away because Han Fei was sure that his Original Great Dao was the mysterious power on the path of reincarnation.

Therefore, the path of reincarnation couldn't leave him. In that case, there was no need to ask them. He could only wait until he could open the door of reincarnation before asking for their opinion. That would be more meaningful.

After thinking it through, Han Fei stopped observing this new world.

He began to cultivate in seclusion. Except for the two times he came out of seclusion and let Luo Xiaobai come in to cultivate for 512 years, Han Fei had been devoted to cultivation.

If the human race wanted to walk out of the Chaotic Wasteland, they couldn't just rely on Dao Provers. Chu Hao's strength hadn't completely recovered. In fact, he didn't even have the strength of the Immortal Level and could only be considered a Carefree-Level Monarch.

In this way, as long as they encountered some powerful enemies, the 180 billion humans would actually be in danger.

Therefore, when he was free, Han Fei had to improve himself as much as possible. After all, he couldn't count on outsiders completely.

...

In the outside world, 26 years had passed.

Han Fei's return happened to coincide with the race war between the human race and the City of Origin. And it seemed to have been going on for a day.

Luo Xiaobai was guarding the front line. She was a little surprised by Han Fei's sudden arrival.

Luo Xiaobai said, "You're out of seclusion? What's your current strength?"

Han Fei said, "The peak of the Dao Proving Level."

Luo Xiaobai wasn't surprised. After all, not everyone had Han Fei's time acceleration ability. She had only stayed in his Origin Star for two years, but it was equivalent to more than 500 years of cultivation. At this moment, her strength was already in the Perfected Star Transformation Realm.

Han Fei asked, "What's going on?"

Luo Xiaobai said, "After 50 years of development, the cultivation methods of the five major professions have become the instinctive combat method of the human race. This combat method is more suitable for the Sea Realm. In this battle today, the race war between the human race and the City of Origin has already been the sixth. This time, it has already become a one-sided massacre. If nothing goes wrong, at most next time, the City of Origin will be completely powerless to resist unless I change the front line soldiers. But in fact, this method isn't good, because there are too many human beings. If we take turns to take the City of Origin for trial, a large portion of the other people will definitely have nothing to do."

Han Fei pondered for a moment. "What about the plan of making some people become strong first?"

Luo Xiaobai said, "Not bad. At present, the human race has 9,812 Sky Openers, 1,012,203 Sea Establisher experts, and 500 million Venerables..."

"So many?"

Han Fei raised his eyebrows. "Last time I came back, there were only 6,000 people in the Sky Opening Realm. In just ten years, the number increased by nearly 4,000?"

Luo Xiaobai said, "There are already many peak-level Sea Establishers and Venerables. As time goes by, more and more people will make breakthroughs. If you have been to the Sky Crater World, you will find that as long as a reasonable battlefield system is established, breakthroughs are a matter of course."

Han Fei stroked his chin. He had been worried that Luo Xiaobai wouldn't fulfill her previous promise, but now it seemed that she didn't panic at all! The number of Sea Establishers had even exceeded a million.

"Since the human race has more high-end combatants now... I don't think there's a need to delay any longer."

"Huh?"

Luo Xiaobai looked at Han Fei in surprise. "What do you mean?"

Han Fei said, "I'm temporarily stuck at the peak of the Dao Proving Level. I probably need an opportunity to break through to the Carefree Level. Since the human race no longer has any opponents in the Chaotic Wasteland, let's... change places!"
