Chapter 2951: Trial in the Thunder Note Ancient Temple (3)

2951 Trial in the Thunder Note Ancient Temple (3)

The Eldest Senior Brother said, "Little Junior Brother, you have your own disaster, and the human race has its own disaster. The human race won't die because they don't have you around, and your path won't be broken because you lost the human race. Some people say that they've controlled the Heavenly Dao, but the Heavenly Dao always operates on its own. No one knows if they have mastered the Heavenly Dao, or if the Heavenly Dao has mastered them... But if necessary, I will help you once."

"Thank you, Eldest Senior Brother."

...

After the conversation, Han Fei calmed down. It was hard to say who would win this round. He had severed the Heavenly Race' door talent and unsealed the Primordial Star Tree, but the Heavenly Race' god had also successfully schemed against him and trapped him in the Thunder Note Ancient Temple.

Han Fei could even understand the thoughts of the Heavenly Race's god. From his attitude towards Yi Beige, it was obvious that he didn't care about the future of the Heavenly Race, so he wasn't afraid that Han Fei could leave the Thunder Note Ancient Temple.

If Han Fei could pass the trial of the Thunder Note Ancient Temple, at most, the Heavenly Race would be wiped out. But if Han Fei died, not only would the Heavenly Race survive, but he had also taken revenge on Han Fei.

As for whether the Void Temple would take revenge on him, he might not care. Anyway, his plan had been aborted. The survival of the Heavenly Race was meaningless to him.

Only when one had something to worry about would one have a weakness. Clearly, the Heavenly Race's god had no weakness now.

Han Fei calmed himself down. What he needed to do now was to complete the trial. When Hong Yue came to ask for help, Han Song would receive him.

Whether or not he would return was nothing more than having one more peak Carefree-level combat power who wasn't even at the Immortal level. With Han Song around, it wouldn't affect the overall situation.

Therefore, he had to abandon all distracting thoughts now.

Han Fei sat cross-legged on the spot. Lei Heng was the only one from the Void Temple who had completed the trial of the Thunder Note Ancient Temple. His words had to be strictly carried out. Han Fei was not arrogant enough to risk his life.

After recovering for a while, he began to study the Heaven Enlightenment Divine Technique. The reason why he studied the Heaven Enlightenment Divine Technique first was naturally for the second level of the trial.

He would take the Great Dao of Lightning, but the Heaven Enlightenment Divine Technique was very likely to be his guarantee of survival from the second level of the trial.

After all, the Heaven Enlightenment Divine Technique was not a pure purification-type Great Dao. He had entered the Dao from the technique. The Heaven Enlightenment Divine Technique was known as the Immortal Divine Technique. It was connected to the origin of the void and activated at the cost of lifespan, summoned infinite healing brilliance. Under the light of the Heaven Enlightenment, the evil spirits were purged and the wounds were healed.

Purifying evil was just one of its characteristics. The three true characteristics of the Heaven Enlightenment Divine Technique were firstly the healing divine light, secondly the extraordinary healing power exchanged for overdrafting one's lifespan, and thirdly, the doubling of one's lifespan.

These three abilities were the main focus of the Heaven Enlightenment Divine Technique. Although its power of purification was also strong, it consumed one's vitality.

Several months later.

Han Fei saw the divine brilliance dancing. He couldn't remember how many times he had separated the power of laws in the divine brilliance. The power of healing originated from the spirit gatherers of the human race. It was to summon the trace of recovery-type law Dao Pattern from spiritual energy. The power of purification should be the same. Han Fei separated a trace of the power of purification with difficulty.

After separating the power of purification, Han Fei began to disassemble it, just like how he disassembled spiritual energy in the past.

"Just like Spirit Concentration Art, the power of purification can also be gathered."

Three years later, Han Fei suddenly beamed with joy, because a new technique appeared in his mind, a new technique that he created himself.

Purification Technique (Spirit-Level, Ultra-Quality)

Introduction: Spiritual energy has a brilliance. The brilliance repels all evil, so it's called the Light of Purification. The Light of Purification, based on the quality of spiritual energy, has a small antidote effect. It can remove filth and cleanse the body.

Deduced Technique: Light of Purification

Deduction Cost: 100,000 points of spiritual energy.

Note: The Purification Technique is obscure and similar to the Healing Technique. You can cultivate them together.

Seeing the introduction of the Purification Technique, Han Fei put on a smile. Although it was only a spirit-level technique, so what? He had the Demon Purification Pot!

Several days later, after Han Fei used up more than three million points of Immortal Qi, he finally deduced the Purification Technique to a new level.

World Cleansing Divine Spell (MonarchRealm, High-Quality)

Introduction: The World Cleansing Divine Spell can cleanse evil and eliminate dark power. This curse can cleanse the mind, remove illusions, purify the soul, and relieve negative effects. The World Cleansing Divine Spell uses the chaotic spiritual brilliance of the world as a catalyst and summons infinite purifying brilliance. Under the cleansing light, it baptizes the evil in the world.

Deduced Art: Soul Cleansing Mantra

Deduction Cost: 5 million points of Immortal Qi.

Effect 1: The Soul Cleansing Mantra consumes a lot of spiritual energy, Chaotic Qi, and Immortal Qi to cleanse the evil spirits and purge illusions.

Effect 2: When a cultivator cultivates this Dao, his thoughts will be clear, and the effect will be doubled. This effect will gradually decrease as his strength grows.

Disadvantage: Those who practice this technique will have lower and lower desires. If they reach the state of no desire, they will have no feelings.

Note: Anyone who takes this path will be assimilated by nature in their final state.

Han Fei frowned slightly after seeing the information of the Soul Cleansing Mantra. It was a good technique, but its drawbacks were obvious. Luo Xiaobai, for example, became more and more indifferent as she grew stronger. If he would end up having no feelings or desires, Han Fei didn't think he would embark on this path even if he was struck to death by lightning.

Fortunately, the World Cleansing Divine Spell was still acceptable for now.

If his guess was correct, he should be able to manage the next deduced technique, the Soul Cleansing Mantra, but the problem was that it consumed too much Immortal Qi.

This was not the void of the Sea of Stars, and it was difficult for him to quickly condense the Immortal Qi. Therefore, at this point, Han Fei decisively gave up.

[God of Fishing](#)

Chapter 2952: Trial in the Thunder Note Ancient Temple (4)

2952 Trial in the Thunder Note Ancient Temple (4)

At least for now, the Soul Cleansing Mantra was enough.

Next was the comprehension of the Dao of Lightning.

...

Three months after Han Fei entered the state of cultivation again, Hong Yue arrived in a hurry outside Han Fei's Origin Star.

"Master Human Emperor, Master Human Emperor, the war has started..."

Sea Realm.

The training ground of the human race.

Almost all the 180 billion humans participated in the war.

After 48 years in the wilderness, the first real challenge came. The periphery of the Godfiend Sea where creatures were scarce saw an unprecedented tide of sea demons.

It was impossible to calculate the number of the sea demons. No matter how far the human battle line stretched, the sea demon tide would spread there.

The Seven Kill Army and the ten legions were guarding the battlefield and all participated in the battle.

Sky Openers faced the enemy in the void. There were more than 300 strong masters from the Central Sea Divine Realm, and two-thirds of them were at the Carefree Level.

These people didn't attack but were confronting Luo Xiaobai and the others.

Someone shouted, "Where is Han Fei?"

Luo Xiaobai looked at him indifferently. Behind her were Liu Qiansi, the God of War, and the two elders of the Lava Giants. In terms of number, they were far inferior to the people from the Central Sea Divine Realm.

However, Luo Xiaobai wasn't afraid at all. She replied coldly, "The Human Emperor isn't around. I, Luo Xiaobai, am the war commander of the human race. I can represent the human race. What's the meaning of this?"

"Hahaha!"

Someone couldn't help but laugh. "Is there no one left in the human race? Han Fei ran away and let a Sky Opener take charge of the human race. Does he think the human race hasn't been destroyed quickly enough?"

Luo Xiaobai looked at this person coldly and said indifferently, "I admire your courage to speak to me like this. Kill..."

Bang!

The person who spoke was a Carefree-Level cultivator, but he just wanted to steal the limelight in front of everyone, so he mocked.

He also didn't think that the human race could do anything to him without Han Fei around.

Therefore, when Luo Xiaobai said "kill", he was a little stunned. What made this little girl think she could speak to him like this?

Bang!

Unfortunately, he underestimated Luo Xiaobai's courage and courage, as well as her killing intent.

The person who spoke felt that his body suddenly expanded, and his soul was instantly crushed. Then with a bang, he exploded, his body and soul were destroyed, and no corpse remained.

Rumble!

The Great Dao crack in the sky stretched for millions of kilometers, and the people of the Central Sea Divine Realm were immediately in an uproar.

“How dare you!”

“Who is it?”

“Doesn’t the Void Temple follow rules? What’s the meaning of this?”

These people immediately realized that something was wrong. They didn’t even see the enemy, but a Carefree-level cultivator had died for no reason. With such strength, the other party had to be at least an Immortal-level cultivator!

However, if it was just an Immortal-level powerhouse, they also had Immortal-level powerhouses behind them. Therefore, they thought the person who dared to kill in such a situation could only be a Great Monarch-level powerhouses of the Void Temple.

This speculation made them all horrified. Did the human race have a Great Monarch protecting them?

As a partner who had been through life and death with Han Fei, Luo Xiaobai was not only an intelligent and talented leader, but also a decisive person.

She had already discussed it with Han Fei. Naturally, she knew that these people’s goal was not Han Fei at all, but the human race. They took advantage of Han Fei’s absence to accumulate enough power to attack the human race.

They didn’t dare to attack ordinary humans, so they had been accumulating their strength for decades in order to crush the human race at one go.

Luo Xiaobai and Han Fei both knew that this was a battle that the human race couldn’t avoid. Therefore, they accepted this danger.

However, if anyone dared to attack the strong cultivators of the human race, Luo Xiaobai wouldn’t be polite, especially when Chu Hao had completely recovered. Even if he had to fight to the death, no one on the other side could survive.

As the ones who actively sought trouble, targeting the human race was already an act of aggression. When Chu Hao took action and directly killed the opponent’s strong cultivator, it not only deterred the enemies but also served as a warning that if they engaged in any wrongdoing, the human race was also willing to fight back.

In the other party’s opinion, the person who attacked just now could only be from the Void Temple. This was Han Fei’s only and greatest trump card.

With such a trump card, they could launch a normal war against the human race, but they couldn’t go too far.

Luo Xiaobai’s voice resounded in the void. “The Human Emperor said that the Void Temple follows rules, but these rules are decided by the Void Temple, not you. As the war commander of the human race, if

you disrespect me, it's equivalent to disrespecting the human race. If I say he should be killed, he should be killed. He can only blame himself."

So tough? Countless human beings were shocked and a sense of heroism rose in their hearts. This was the leader of the human race! Just like the Human Emperor, she was as domineering as ever and killed a Monarch without any hesitation.

On the opposite side, the cultivators looked awful.

It wasn't that they hadn't thought of attacking first to kill the leaders of the human race. Someone had even secretly carried it out.

However, the perpetrator never returned. Now that Luo Xiaobai had shown her strength in front of them, they couldn't help but feel embarrassed.

The one who mocked Luo Xiaobai had already died.

If they really attacked now, the Void Temple would definitely not sit by. Once the Void Temple disobeyed the rules and attacked them, they would really have nowhere to run.

Therefore, the person just now died for nothing.

Luo Xiaobai didn't care about the existence of these people. She even cupped her hands at the void and said, "Senior, anyone who maliciously hinders the higher-ups of our human race from commanding the war can be killed."

[God of Fishing](#)

Chapter 2953: Trial Begins, Hall of Gods (1)

2953 Trial Begins, Hall of Gods (1)

The creatures in the wilderness of the Sea Realm were generally not weak. In the vast sea, the strength of sea demons had the structure of an inverted pyramid.

Although it was a Sea Realm, it was impossible for all sea demons to be strong. Strength always began from weakness. Therefore, in terms of the normal strength of ordinary creatures, they were actually between Hidden Fishers and Law Enforcers. Correspondingly, they were in the Sea Demon Realm and the Sea Spirit Realm.

However, in the trials of the human race, most people were only between Hanging Fishers and Hidden Fishers.

Although the human race was growing rapidly, many of the 180 billion people had wasted their golden time of life and thus missed the critical period of their cultivation. Most of them had a lifespan of between 500 and 800 years.

There were definitely a lot of people in this group, as many as 30 billion. Their upper limit was usually the Hanging Fisher realm, and they couldn't even become a Hidden Fisher.

This couldn't be helped. If they missed the best cultivation age, their aptitude couldn't be improved, their bodies had too many hidden injuries and too many impurities. It was not easy for this group of people to adapt to the Sea Realm wilderness.

At this moment, the war had fully begun.

Chu Hao's disguise as a Great Monarch of the Void Temple didn't arouse suspicion but directly intimidated the invaders. However, on the ordinary human battlefield, because their realm was too low, the people from the Central Sea Divine Realm weren't worried that the people from the Void Temple would directly destroy these creatures to help the human race.

What they wanted was to reduce the number of human beings. As for whether the sea demon tide that they had spent 48 years launching would become a trial for human beings and help them grow,

The answer was yes. They knew this very well. But they didn't care. This was because in their opinion, the basic strength of the human race was too poor. Even if they had a short-term growth, it wouldn't affect the overall situation. And the loss of human members was real.

Bang! Bang! Bang!

On the human battlefield, Luo Xiaobai saw a large number of low-level human cultivators blowing themselves up.

Yes, in the two realms of Dangling Fisher and Hanging Fisher, many people knew that their strength couldn't go any further. Some older people, whose lives were about to end, became the first batch of people who died together with the enemies.

A large group of low-realm five-person teams suffered a lot of damage in the face of the surging sea demons.

A soul warrior tried to hold back three or five sea demons, but there were more than a dozen of them, which was completely beyond his endurance. In just three seconds, he was pierced through and died on the spot.

Upon seeing this, the other members of the team all had bloodshot eyes. Since the recovery of the five occupations of the human race, they had formed five-person teams. No matter who died, it was enough to drive the other members of the team crazy.

A spirit gatherer roared. Even though he had desperately tried to save his teammates with Spirit Concentration Art, he could only watch his teammates die.

"Old Liu..."

An armorist died in battle, and the spirit gatherer captain roared indignantly.

However, before he finished shouting, the armorist and his armor were trampled and his body was shattered.

The hunter appeared and only had time to kill two or three sea demons before his legs were cut off by a shrimp. Although the manipulator's reaction speed was fast enough, he failed to pull him back.

The manipulator roared, "Captain, it's not that we can't fight, but that there's a fundamental difference in strength. I know that Master War Commander has done well enough, so we have to weather through this battle no matter what. Let's be teammates in our next life."

"Sister Lin..."

The woman who spoke rushed forward without hesitation and was surrounded by the sea demons. Her body was immediately covered by dozens of sea demons.

Boom!

The power of the self-detonation blew up all the sea demons within dozens of meters.

The spirit gatherer captain watched his teammates die one after another, his eyes bleeding.

"Ah! Older generation, we are already old. We can't witness the great era of the human race, but we will definitely be one of the creators of this era. Brothers, wait for me..."

The spirit gatherer held an ultra-quality spiritual stone in each hand. Instead of retreating, he advanced without any defense.

Boom Boom Boom ~

Dozens of sea demons were destroyed again, but this level of power was dispersed by other sea demons in an instant. This team seemed to have never appeared.

This situation didn't only happen in one team. Many low-realm five-person teams were facing the same situation.

"Even if I die, I will become a wall of the human race. Explode..."

"Old brothers, Master Human Emperor has his enemy. Master War Commander has her enemy. And we also have our own battles. For the sake of the human race, bam..."

"Young people, step back. Let's defend the first line of defense."

Many five-person teams of the younger generation were fighting and crying.

Someone roared, "Why don't you retreat?! Who said you old people have to guard the front line?"

Someone laughed and scolded, "Disobedient brats, you weren't even born when I was fighting the sea demons back then. Even if I die, I'm still a charger of the human race."

"Everyone who thinks you don't have much time left, charge with me!"

"I'm going to die anyway. It's nothing more than a few decades earlier or a few decades later. I've lived enough in this life."

[God of Fishing](#)

Chapter 2954: Trial Begins, Hall of Gods (2)

2954 Trial Begins, Hall of Gods (2)

"I don't have anything to worry about anymore. I miss my wife a little. Haha, here I am..."

“We can’t improve our strength. We old generation have to pave the way for our next generation. Our path has been completed, but their path has just begun. If we don’t charge, are we going to wait for the young people to charge?”

“I thought I would die of old age in the Raging Sea, but we didn’t. We witnessed the rise of the human race. We rushed out of the Raging Sea, destroyed the Ten Thousand Scale Race, wiped out the City of Origin, and entered the wilderness of the Sea Realm. I’ve never been so glorious in my life. I’ve already had no regrets.”

“Kill!”

“Who the f*ck said that only sea demons can charge? Our human race also has human tides. Kill~”

For a moment, the shouts of the human race rose and fell on the entire battlefield. If the strong masters looked at the battlefield, they would find that at the forefront of the human race’s battle line, a tide of people was slowly forming.

Everyone who saw this scene was moved.

Luo Xiaobai clenched her fists. Although she had expected all of this to happen, when this scene really happened, she couldn’t help but feel a little sad.

Was the vast Sea Realm not big enough to accommodate one human race? Why couldn’t it accommodate the human race?

Luo Xiaobai gritted her teeth, her tears flowing. She glanced at the strong masters of the Central Sea Divine Realm. She must remember every face. When she rose to prominence in the future, she would kill them one by one.

Don’t you want to destroy the human race? Don’t you want to be enemies with the human race? Don’t you like fighting? Fine, I’ll definitely let you experience what war is. I’ll let you see with your own eyes the strong cultivators of your own faction die one by one.

Crack ~

An ancient seed bloomed between Luo Xiaobai’s eyebrows. With three consecutive explosions, three chains appeared and disappeared in the void.

Even though the other party was all top cultivators, they couldn’t help but be slightly shocked. In the blink of an eye, this girl condensed three Dao Locks in a row. What kind of crazy growth speed was this?

Behind Luo Xiaobai, Liu Qiansi was shocked. The Beast King said, “Girl, calm down. Now is not the time to prove Dao. You have to suppress yourself. Fury can’t help you prove Dao.”

Luo Xiaobai was surrounded by three refined stars, and billowing energy surged into her body. In the end, Luo Xiaobai’s expression became firm again.

The Beast King was right. A strong master couldn’t become stronger just by anger. A strong master had to have a strong heart.

On the opposite side, among the strong masters from the Central Sea Divine Realm.

Someone said, "I finally understand why no one wants the human race to rise. This race is simply crazy. I've never seen a race that regards self-detonation as a combat mode."

Someone sighed. "According to this fighting style, with tens of billions of people charging, if we can't beat their enemies, we'll just blow ourselves up. I'm afraid it won't be easy for us to win today's game!"

Someone said calmly, "It's not that it's difficult for us to win, but we definitely can't win. However, we didn't intend to take them down in one go. The second wave of sea demons is already on their way. They will arrive in less than half a year. Even if the human race can withstand the sea demons once, can they withstand them three or four times? Unless these people are crazy and use self-detonation to block the sea demon tide every time."

Someone said, "If that's the case, we won't suffer a loss. The human race will lose a lot of people very quickly in such self-detonation battles."

Someone said, "But this time, we actually didn't gain much. Most of the people who detonated themselves had no hope of improvement. They weren't our target in the first place."

Someone disagreed. "I don't think so. This group of people will be eliminated sooner or later. Think about it, if these people are eliminated, can the human race still be so crazy? Will the younger generation of the human race choose this method of self-detonation too? If they choose this method, it will break the foundation of the human race. If all the low-level cultivators self-detonate, the further they go, the less fresh blood will be injected. Therefore, if the human race really dares to do this, it will be their way to death."

Someone agreed. "That's right. At most three tides of sea demons will force the human race into a dilemma."

In this battle, this sea turned into a sea of blood. The battle lasted for a full three days, and the dead humans and sea demons were everywhere in the wilderness.

After the war ended, the people from the Central Sea Divine Realm retreated first. They had come today mainly to see the battle situation. No one was naive enough to think that they could destroy the human race in one go.

Seven days Later.

The post-war statistics were finally reported.

Hong Yue was shivering when he reported.

"Commander... This time, the human race suffered 10.6 billion casualties..."

Luo Xiaobai felt that her head was buzzing. She couldn't hear what Hong Yue said clearly. 180 billion people. In just one battle, nearly 6% of the human race had died. This was the most tragic war in the history of the human race.

"Commander, Commander... Xiaobai, Xiaobai..."

After many reminders from Hong Yue, Luo Xiaobai finally spoke with difficulty, her voice full of fatigue. "Where is Han Fei?"

“I’m here.”

Behind Luo Xiaobai, a hand gently laid on her shoulder. Han Fei could clearly feel that Luo Xiaobai’s body was trembling slightly.

Tears flashed in her eyes. Seeing this, Hong Yue tactfully retreated.

Without looking back, Luo Xiaobai said in a helpless and low voice, “Did we make a wrong decision?”

God of Fishing

Chapter 2955: Trial Begins, Hall of Gods (3)

2955 Trial Begins, Hall of Gods (3)

Han Fei’s voice rang softly in her ear. “You know, someone has to bear the price of the rise of the human race. I’m sorry to let you bear such a huge pressure alone.”

Luo Xiaobai turned around and slowly hugged him without looking at Han Fei. Her body was trembling, and she gradually sobbed.

Han Fei’s face was cold, but his voice was gentle and slow. “Trust me. I’ll definitely make them pay back a hundred times over for what the human race suffered today.”

...

In the Thunder Note Ancient Temple.

Having completed the deduction and cultivation of the World Cleansing Mantra, Han Fei was ready to start comprehending the Dao of Lightning.

Before that, he wanted to see the difference between the so-called level-four and level-five energy crystals.

<Name > Level-Five Energy Crystal

<Introduction > This is the only pure energy crystal in the body of a destruction-level ominous creature. It contains a tremendous amount of Chaotic Qi, vitality, ownerless souls that can be directly absorbed, and a large amount of pure law of the heavens and can be directly used for cultivation.

<Quality > Destruction-level

<Contained Chaotic Energy> 3,680,000 wisps

<Contained ownerless souls> 13 Origins

<Contained vitality> 50,000 years

<Absorbable >

<Note 1> The ownerless souls in ominous creatures are completely attributeless and can be absorbed directly without side effects.

<Note 2> The pure Heavenly Dao laws can be applied to any law.

“Hiss!”

Han Fei was refreshed. No wonder Senior Brother Lei Heng said to collect as many energy crystals as possible. It turned out that high-quality energy crystals were unexpectedly powerful.

Just the fact that ownerless souls could be directly absorbed without side effects was enough to prove that the energy crystal was a treasure. More importantly, this thing contained a large number of pure Heavenly Dao laws.

For the first time, Han Fei knew that the Heavenly Dao laws could be obtained this way. Didn't this mean that he could inject more and more Heavenly Dao laws into his Great Dao, strengthen the comprehension of that kind of Great Dao, and produce more laws?

“Sure enough, this is good stuff!”

Han Fei couldn't help but grin. He now had more than five hundred such energy crystals. If he completely refined them, it seemed to be able to increase his Carefree-Level strength by a lot.

After a while, Han Fei decided to comprehend the Dao of Lightning first. After comprehending the Dao of Lightning, he could take his time to improve his strength.

Under normal circumstances, it would take a lot of time to comprehend lightning. He had been struck by lightning every day for 33 years in the Chaotic Thunder Domain and had some experience.

However, he certainly didn't expect to master the Great Dao of Lightning through these insights.

Therefore, Han Fei began to recall the lightning technique he had deduced.

“The Lightning Body is to attract lightning to temper the body. It's the foundation for one to finally comprehend the Great Dao of Lightning.”

“The Firmament Thunder Locking Technique is a refining technique. It gathers the power of the heavens into a lightning array, triggers the Nine Heavens Thunder to refine weapons, removes impurities, and obtains the energy essence. If I take ominous lifeforms as refining materials, I can also remove impurities, so I can practice it.”

“Treasure Form Thunder Hammer is a hammer technique. It requires a strong physique. This can be ruled out. I have many powerful hammer techniques, such as the Ultimate Hammer, which is much more powerful than this.”

In the end, Han Fei chose the Lightning Body and the Firmament Thunder Lock Technique to deduce and obtain two Monarch-level, Ultra-quality techniques respectively.

Wild Thunder Dao Body (Monarch-level, Ultra-quality)

Introduction: Enter the Dao with lightning, attract billions of lightning, condense the lightning pattern, imprint the lightning pattern into the bloodline mark, hide the Dao in the blood, and temper the body all year round. With the Wild Thunder Dao Body, as long as you attract lightning to your body, you can activate the bloodline lightning pattern. If you practice it well, you can resonate with lightning, and the effect of lightning resistance will be doubled.

Deduced Technique: Grand Void Lightning Body

Deduction consumption: 3 million points of Immortal Qi

Disadvantage: There will be lightning inheritance in the bloodline, which is not a good thing for those who pursue pure bloodlines.

Note: The sea of lightning is hard to find, and there are not many places suitable for cultivating the Wild Thunder Dao Body.

After seeing the disadvantage of the Wild Thunder Dao Body, Han Fei didn't mind at all. He had swallowed countless kinds of bloodlines. In his opinion, there were countless inheritances in everyone's bloodline, and very few of them could be awakened in the end.

Besides, his bloodline had been poor since he was young. Didn't he slowly reach his current bloodline level? His parents had even specially severed his ancient human bloodline, indicating that bloodline wasn't as important as people imagined. What was important was still humans.

The other technique was:

Supreme Divine Thunder Primordial Chaos Technique (Monarch-level, Ultra-quality)

Remarks: Enter the Dao with lightning arrays, fuse lightning with chaos, gather the Heavenly Dao to nurture lightning, and refine the Supreme Divine Lightning. With the body as the material and the Supreme Divine Lightning as the hammer, one can temper the law of lightning in the body. This technique can be used for combat or refining weapons. Only those with a strong physique can use it.

Deduced Technique: Supreme Divine Lightning God Transformation Technique

Deduction consumption: 3 million points of Immortal Qi

Shortcoming: Only those with a strong physique can cultivate it.

Note: When mastered, this technique can temper all laws and bodies.

Compared to the Supreme Divine Thunder Primordial Chaos Technique, Han Fei actually wanted to continue deducing the Supreme Divine Lightning God Transformation Technique. Needless to say, this must be a divine-quality lightning technique.

But in the end, two conditions restricted him. Firstly, he was now in the Thunder Note Ancient Temple, so it was not so fast for him to acquire the Chaotic Energy, and the Immortal Qi was refined from the Chaotic Qi, so it was naturally even slower. Just deducing these two, plus the World Cleansing Divine Spell, had taken Han Fei more than 130 years.

[God of Fishing](#)

Chapter 2956: Trial Begins, Hall of Gods (4)

2956 Trial Begins, Hall of Gods (4)

He knew that the human race's war must have started many times and might have been fought many times. Unfortunately, he couldn't leave. He could only hope that the contingency plan he left behind would work.

Logic told him that it was very difficult for him to guarantee that he could return alive. If he wanted to return alive, he couldn't be blind. The time he had to cultivate and wait couldn't be reduced at all.

He could only comfort himself that Han Song was still there and he should be able to control everything.

Han Fei hadn't started to practice these three techniques yet, but he already had an idea. He took out the Lightning Drawing Platform and sat cross-legged on it.

What Han Fei could use were the seven purple Dao Proving Level lightning strikes.

Although he was already a Carefree Level cultivator, seven purple Dao Proving Level lightning bolts were equivalent to seven monarch tribulation lightning bolts for a cultivator.

Han Fei released a purple Dao Proving Level lightning, and he could still feel the powerful destructive power and soul tempering power surging throughout his body. Of course, this purple Dao Proving Level lightning couldn't be compared to the Monarch Tribulation he had experienced. It should be Monarch Tribulation lightning for ordinary cultivators.

Han Fei needed to practice the Wild Thunder Dao Body first, not seeking to achieve mastery, but aiming to understand the basics.

Because he wasn't proving Dao, it took Han Fei half a year to slowly absorb the five lightning strikes before he finally made some progress in refining the Wild Thunder Dao Body.

After another two months, Han Fei could barely get the hang of the Supreme Divine Thunder Primordial Chaos Technique.

At this time, the power of lightning on the Lightning Drawing Platform had been exhausted by Han Fei.

But Han Fei didn't care. In addition to the Lightning Drawing Platform, he had more than 500 energy crystals. The pure Heavenly Dao power in them could also strengthen the cultivation of the Dao and law of Lightning.

Another 53 years later.

After all, it was not his Origin Star and there was no time acceleration, so Han Fei's cultivation speed naturally decreased greatly.

It took him 53 years to absorb less than 200 energy crystals. Unfortunately, due to the influence of the growth speed of his physique, his soul power cultivation couldn't be fast even if he wanted to.

However, in the past 53 years, his strength had improved significantly. Han Fei sighed. It was time to start the trial. Before that, he looked at his information:

Owner: Han Fei

Level: 114 (Carefree Level)

Bloodline Ranking among the Clans in the Infinite Ocean: the 10,086th

Immortal Qi: 1,020,000

Soul: 999 Origins

Strength: 999 Star Powers

First Spiritual Heritage: Origin Spiritual Heritage

Second Spiritual Heritage: Eternal Darkness Spiritual Heritage

First spiritual beast: Twin Yin-Yang Sky Swallowing Fish (Level 110)

Second spiritual beast: The Emperor Sparrow (Level 111)

Main Art: Godfiend Formless Technique

There was a small hurdle in his cultivation because he took Dual Extreme Dao. However, Han Fei knew that he was stuck here because he cultivated too fast and there was no pressure to push him to make a breakthrough.

As long as he fought a few more battles, he should be able to cross over and quickly advance to the mid-stage of the Carefree Level.

“Huff!”

When Han Fei looked at the 12 giant statues again, he entered the Hall of Gods fearlessly.

As a Monarch-realm cultivator, in the face of such a dangerous place, fear was useless. Thinking too much about life and death would only make him scared.

Buzz!

As soon as Han Fei stepped into the Hall of Gods, the statues trembled slightly. Immediately afterward, the scene in front of Han Fei began to change, and the Hall of Gods in front of him disappeared.

Instead, there were 12 Dharma-like giants scattered in the sky. They looked like 12 gods looking down on all living beings.

The twelve giants began to move as if they were summoning lightning.

Boom Boom Boom ~

In the blink of an eye, the vast sky was filled with lightning, turning into a sea of lightning.

Han Fei wanted to see what else the 12 giants would do, but after they turned this place into a sea of lightning, they disappeared, and there seemed to be no follow-up movement.

When the lightning struck down, Han Fei immediately felt that the intensity of the lightning was on the same level as the lightning in the Chaotic Thunder Domain.

Han Fei couldn't help but heave a sigh of relief. In this case, he didn't have to worry about being unable to withstand it at all. If he really couldn't withstand it, he could use the Turtle Shell Heaven Sealing Array to block it. Besides, he could use Little Black and Little White to purify the power of lightning.

Han Fei smiled. While he took out the Lightning Drawing Platform to absorb the lightning power, he turned Little Black and Little White into a Yin-Yang Millstone to cleanse the impurities in the lightning.

He had thought that it would be over if he slowly cultivated until he completely comprehended the Great Dao of Lightning and the law of lightning.

However, just one day later, the appearance of a giant shattered Han Fei's fantasy.

After the giant appeared, he began to attack Han Fei. The giant formed a strange seal, and instantly, lightning gathered all over the sky. Multiple lightning combined, and the speed doubled as it struck at Han Fei.

God of Fishing

Chapter 2957: Twelve Thunder Seal Technique (1)

2957 Twelve Thunder Seal Technique (1)

"Seal technique?"

This strange seal technique could fuse with all kinds of lightning. With this technique, in the lightning domain, his strength would increase by at least one level.

Han Fei quickly assessed the power this seal technique might cause. The first thing he did was not dodge, but steal. After staying in the Chaotic Thunder Domain for decades, he was already familiar with the power of lightning here.

Perhaps the lightning in the Chaotic Thunder Domain was dangerous, but it wasn't to the point where he couldn't withstand it. Since he could withstand the lightning, he could use it after stealing it.

The only thing he wanted to bet on was whether he would suffer a backlash, so he was already prepared to use the Great Dao of Life Replacement. If this giant was some kind of clone of a god, he would definitely suffer a backlash to death, and he wouldn't be able to steal it.

On the contrary, if this giant was just a puppet mechanism, he would have a chance to steal this seal.

Although he had also deduced the Wild Thunder Dao Body and the Supreme Divine Thunder Primordial Chaos Technique, neither of them were lightning techniques used in combat, but this seal technique was.

"Puff~"

Han Fei was vomiting blood and bleeding from his eyes, nose and mouth. However, when the fused lightning was about to hit Han Fei, it suddenly dispersed. Han Fei's sturdy body weathered through the dispersed lightning without suffering any additional damage.

As for the giant, it seemed to have suddenly been sealed and stayed in midair without attacking again.

"Sure enough, the giant has no direct relationship with gods. It's just a passive trial mechanism."

"Huff!"

Han Fei was immediately relieved. As for the backlash injury, he casually stuffed a mass of liquid divine light into his mouth and resolved it. At this moment, a part of the sealing technique appeared in his mind.

Yes, there was only this move. Combined with the fact that the giant was still, Han Fei was certain that this was the only move this giant had. If this seal was his only move, there should be eleven more seals.

It was precisely because this giant only knew this move that it meant that this seal technique would be terrifying. This seal technique must have killed countless trial-takers.

After stealing the giant's seal technique, some lightning law immediately appeared in Han Fei's mind. The seal technique and the operation of the law seemed simple, but in fact, this simple seal contained many laws. Han Fei hadn't mastered the power of the lightning law to this extent, but he could understand it by analogy. With a little research, it might only take him a few years or at most decades to master it.

Of course, if this giant could continue to use this seal technique, he could quickly master it through multiple thefts.

If he could get out alive, this seal technique could be said to be one of his killing techniques.

Three seconds after Han Fei stole the seal technique, the giant broke free from the Void Stealing Technique. The giant attacked again, which was still this move, and Han Fei continued to steal.

But this time, Han Fei not only stole the seal technique, but also the fused lightning. With his physique, he could completely withstand such power of lightning in the short term.

After all, his years in the Chaotic Thunder Sea weren't for nothing. His overall strength had increased by nearly 30%, and his physique had improved a lot.

While stealing the seal technique and the lightning, Han Fei smashed the fused lightning back.

Rumble!

To Han Fei's surprise, the giant was shattered after only one attack, but then it recombined as if it wasn't him who was shattered just now.

However, Han Fei still noticed something.

Huh! This giant is not as strong as I imagined. Its strength is actually in the same realm as mine. This giant is made completely based on my realm. However, why can it recombine after shattering?

He did the same thing more than ten times in a row. As he used the seal technique proficiently and gained insight into the lightning law, the time it took for the giant to recombine slowly increased.

"So that's it. To pass this first trial, one needs to have a certain level of comprehension of the Dao and law of lightning. Senior Brother Lei Heng is right. This kind of trial mainly tests the participants' ability to comprehend the Dao and law of lightning."

Bang!

When Han Fei realized this, he saw another giant appear in the void with a buzz.

This giant statue was different from the first one, but it also formed a seal. However, this seal technique was of a different type. This giant actually accelerated the operation of the lightning law here, causing the density of the lightning to suddenly double.

“Huh?”

What did the doubling of the lightning density in a world mean? In a sense, what was the difference between this and doubling of strength?

“Also, why didn’t the first giant disappear?”

Han Fei’s face suddenly changed. He had thought that these giants would come out one by one, but they came out in a row. Didn’t this mean that if he held on to the end, a total of 12 giants would appear.

The lightning here increased, but fortunately, the second giant didn’t use any offensive seal techniques. Han Fei used the Ten Thousand Law Sky Travelling Technique with all his strength while taking the opportunity to steal the attack method of the first giant.

He had a bold idea. This might be an opportunity. If the first giant formed seals so frequently, he could also steal frequently. Stealing the other party’s seal technique was equivalent to stealing the other party’s Great Dao of Lightning and the way the lightning law operated.

God of Fishing

Chapter 2958: Twelve Thunder Seal Technique (2)

2958 Twelve Thunder Seal Technique (2)

As for stealing the giant’s Great Dao, Han Fei tried it once, but he was immediately counterattacked and had to rely on the Great Dao of Life Replacement to survive.

Han Fei realized that although the giant was created based on his own strength, what bestowed the other party with the Great Dao was not the giant itself, but a god.

However, Han Fei also discovered that the first test didn’t necessarily mean there was no way out. The giants frequently formed seals, which was strange in itself. If a person specialized in the Thunder Law, after repeatedly watching the other party making seals, he would be able to learn it or at least imitate it.

Therefore, the real meaning of this first trial was to give the participant a seal technique. It was meant to teach the trial-taker a seal technique, but some people couldn’t withstand it at all.

Han Fei summarized the conditions for learning this seal technique. First of all, one had to be fast, or they would be struck to death. Secondly, one had to have a strong physique and strong lightning resistance. This was the foundation to survive the Chaotic Thunder Domain. If one didn’t even have the ability to survive, what was the point of teaching you this seal technique? Finally, it was a test and a screening on the participant’s mastery of the lightning law. Only if the test results met the Ancient God of Thunder Note’s expectations could one be qualified to inherit his legacy.

Therefore, the Thunder Note Ancient Temple was never meant for others to undergo trials, but was solely meant for those who cultivated the Thunder Law to undergo trials.

But why was he caught here? This puzzled Han Fei.

Perhaps because the two giants couldn’t suppress Han Fei at all, it only took less than half an hour for a third giant to appear.

As for the seal technique of this giant, Han Fei saw the lightning law between the heavens and earth appear in the form of Dao patterns. These Dao patterns fused into all the lightning here and immediately gave these lightning the power to kill souls.

“This is only the third seal technique!”

Han Fei didn't dare to be negligent. He had just embarked on the path of lightning, so he had to steal the seal techniques of these giants as quickly as possible to grasp more usages of Lightning Great Dao and Law. Otherwise, if all the 12 giants came out and each seal technique could give these lightning a new ability, he probably wouldn't be able to withstand it sooner or later.

Han Fei didn't dare to be negligent. At this moment, he had been trying for nearly six hours. He was deliberately making the giants feel that he could barely resist them. He wanted to stall for time until he completely mastered the three seal techniques and the operation and usage of the lightning law.

In fact, as Han Fei expected, as long as he didn't show the strength to crush or surpass these three giants, the fourth giant wouldn't appear.

If Han Fei just kept procrastinating like this, it seemed that the current difficulty was not that great for now. Of course, this was only for him. He had a strong physique, sufficient speed, and the Void Stealing Technique that could quickly deprive his opponent of their attacks and techniques, so it would be extremely difficult for another person to stall for time.

It was almost impossible to avoid such dense lightning. Even if that person had such speed and physique, was his spiritual power enough to support him for such a long time?

Therefore, it was impossible for others to copy Han Fei's trial method. He knew this himself, but he didn't dare to be negligent. He didn't know what would happen if too many giants were released at once. Anyway, these three were already quite dangerous.

After three days of delay, Han Fei had used the Void Stealing Technique countless times. His understanding of the Great Dao of Lightning and the law was improving at an unbelievable speed.

This speed of improvement was like a primary school student reading the entire junior high school curriculum in three days, making rapid progress.

Finally, Han Fei had completely mastered the three seal techniques. This time, he stole the fusion lightning of the first giant and controlled the lightning law to gather one. As two lightning bolts shot into the sky, he shattered the first and second lightning bolts.

In the next moment, two new giants appeared.

As Han Fei expected, the first three giants were dispersed because Han Fei had almost completely mastered their seal technique, so it took them longer and longer to regather.

This was because they were no longer challenges to Han Fei, but they would inevitably appear again. Clearly, there were twelve seal techniques in total.

At this moment, the fourth giant made a seal, and in this sea of lightning, there were suddenly radioactive electric arcs, densely packed and covering millions of kilometers.

Han Fei's face changed drastically. Did it have a deceleration function?

Han Fei couldn't have felt worse. This was a domain-type law. If he hadn't comprehended the first three seal techniques, with such a domain, his speed would be greatly reduced and he would definitely be heavily injured.

Then, the fifth giant made a seal, and Han Fei saw dancing lightning bolts that had ignored the void and instantly appeared in front of Han Fei.

Boom! Boom! Boom!

After being hit seven or eight times in a row, Han Fei couldn't dodge it and could only steal it.

Then, the giants that were shattered by Han Fei appeared again. For a moment, the five giants attacked at the same time, and Han Fei's face turned green.

...

One month Later.

In this sea of lightning, Han Fei's figure flashed quickly. The lightning filled the sky, and he was struck by lightning multiple times every second.

[God of Fishing](#)

Chapter 2959: Twelve Thunder Seal Technique (3)

2959 Twelve Thunder Seal Technique (3)

Some lightning was flashing.

Some lightning was illusory and didn't exist at all, but if you didn't think it existed, it suddenly appeared again.

Also, under Han Fei's feet, lightning rings made of thunder arcs burst out from time to time. Whether Han Fei was willing or not, he would inevitably be hit.

Even after he broke through the lightning ring, the lightning in all directions suddenly turned into blue thunder and fire. The thunder and fire spread, and the flames carried lightning that jumped. It was impossible to guard against.

More importantly, a twisted lightning shadow was chasing Han Fei.

In addition to the physical destruction, there was also the lightning impact on the soul.

At this moment, Han Fei roared and suddenly turned around. He used the Void Stealing Technique three times, respectively stealing a fused lightning bolt, a lightning jump, and a lightning ring, shattering the first, second, and third giant.

After doing all this, Han Fei suddenly turned back and ran into the lightning shadow chasing him.

The two fought fiercely. The lightning shadow penetrated Han Fei, and Han Fei shattered the other party with a punch.

The difference was that Han Fei's body emitted a dazzling golden light. He had used the Great Dao of Life Replacement. So far, a total of four giants had shattered.

Han Fei roared, "The last one, come out!"

Boom!

More and more giants appeared, and Han Fei felt that his body was almost numb. Once his body was completely numb and collapsed, it would be extremely difficult for him to escape from these giants.

During this period of time, he had used the Great Dao of Life Replacement a total of six times. If his mastery of the Great Dao of Lightning and the law was only at the level of primary school graduation at first, he could almost be said to have graduated from a university now.

He knew that he didn't have to wait anymore, nor did he have time to waste slowly with the 11 giants.

At this moment, when Han Fei killed four giants in a row in the blink of an eye, a thundercloud suddenly appeared in the sky. The last giant appeared from the thundercloud, but at the moment that giant came out, it turned into a purple lightning that carried the might of the heavens and seemed to have the power to destroy the world.

"Shoot! A Heavenly Tribulation?"

Han Fei couldn't have felt worse. In the past month, he had felt and learned eleven Thunder Techniques in total.

These lightning techniques were fused lightning, lightning acceleration, soul slaying lightning, lightning arc deceleration domain, jumping lightning, strange transformation lightning, seamless lightning ring, sea of lightning and fire, turning one's body into lightning, Dao Heart-crushing lightning, and cleansing lightning.

This seal technique included the infinite changes of the lightning law, including regular killing techniques, soul killing techniques, assassination techniques, domain killing techniques, inescapable killing techniques, mental demon techniques, area-of-effect attacks, purification techniques...

Han Fei couldn't imagine that this technique could contain so many changes. He had stolen seal techniques one by one, so he could clearly sense that each seal technique used different lightning laws.

Han Fei was almost certain that even the cultivators who walked the Dao of Lightning wouldn't use so many strange lightning laws at once.

Therefore, when Senior Brother Lei Heng said that only three people had passed this trial in history, he believed him. Although he didn't know who these three people were, they were definitely peerless Heavenly Talents with great opportunities.

But if the lightning laws were still laws, what the hell was the twelfth seal? The scene of tribulation clouds suddenly appearing and transforming into divine lightning was exactly the same as the heavenly tribulation.

The Ancient God of Thunder Note was so strong that he could even create a heavenly tribulation?

Just like before, Han Fei tried to steal this seal technique and the power of this so-called heavenly tribulation.

When the tribulation lightning surged, Han Fei stole it, but in the next moment, his body exploded into a bloody mist. In the next moment, not far away, Han Fei appeared in his invincible state.

He was dumbfounded. These giants were set according to his strength, but this one was different.

At this moment, the heavenly tribulation struck down, but Han Fei was not affected because he was in his invincible state. He was just shocked that he couldn't steal this thing.

He had clearly sensed the seal technique just now...

“Wait!”

Han Fei was shocked. Yes, he had indeed just stolen the seal technique. This meant that this giant's seal technique could be stolen, and he could also perceive the use of the lightning law.

However, this tribulation lightning was different. This was a real heavenly tribulation. It wasn't a Monarch Tribulation, but a specific heavenly tribulation targeted at a certain stage, a heavenly tribulation that shouldn't exist at all.

Therefore, when he tried to steal the heavenly tribulation, what he stole was the operation of the fundamental law of the Heavenly Dao. He could steal the Heavenly Dao, transform into the Heavenly Dao, and obtain the law of the Heavenly Dao, but no one could touch the fundamental operation law of the Heavenly Dao. Just now, Han Fei felt that he had touched it, so he exploded instantly.

Logically speaking, how could this kind of law be artificially created? But this seal technique had made it. Han Fei felt the power of a complicated law circulating in his mind. He couldn't understand it, but he could feel that many lightning laws were injecting into it.

“Dao Fusion?”

“No, this is Law Fusion.”

Han Fei suddenly thought of something.

Back then, the corpse of the ancient human race in the Lava Giant Tribe had thought Ten Thousand Scale Monarch as an Immortal-level cultivator and scolded him that as he hadn't begun to fuse laws, he wasn't worthy of being called an Immortal-level cultivator.

[God of Fishing](#)

Chapter 2960: Twelve Thunder Seal Technique (4)

2960 Twelve Thunder Seal Technique (4)

Therefore, in ancient times, at least in the age of the Ancient God of Thunder Note, only after Law Fusion could one be called a Great Monarch.

And now, from the seal techniques he stole, Han Fei could clearly sense that the laws used by the first eleven giants were all fused into this last seal technique.

The twelfth seal, the Lightning of Heavenly Tribulation, was born after the continuous fusion.

This meant that if an ordinary person wanted to launch an attack of this level, they had to be at least a Great Monarch.

Then he remembered that the ancient human cultivator made a law fusion on the spot and bestowed a divine tribulation on the Ten Thousand Scale Monarch. Was that equivalent to creating a heavenly tribulation? However, the heavenly tribulation had already reached the level of a divine tribulation.

Yes, powerhouses at their level could indeed create heavenly tribulations. However, after the ancient human finished the Law Fusion, he had to transcend a divine tribulation, and after the divine tribulation, he would become a god.

Therefore, the twelfth seal technique of the Ancient God of Thunder Note corresponded to the use of the power of a peak-level Great Monarch, right?

Han Fei didn't know whether to laugh or cry. Ancient God of Thunder Note, are you serious? I'm only at the Carefree Level, but you want me to learn how to use the laws of the Great Monarch realm, or even the peak of the Great Monarch realm?

Han Fei felt terrible. Just as he was thinking about how to learn the twelfth seal, the twelve giants all retracted their laws and stood in twelve different directions, all looking at Han Fei.

Then, the sea of lightning disappeared, and Han Fei reappeared in the Hall of Gods.

These giants said in unison, "Trial-taker, congratulations on passing the first level of the trial. This is my inheritance, the Twelve Thunder Seal Technique. I used to use this art to kill a god when I was only a Great Monarch..."

"A Great Monarch killed a god?"

Han Fei couldn't help but sigh. He had always heard that Great Monarchs could shake gods. Even the God of War had always bragged that the Supreme Divine Technique was extremely powerful, and could be used to fight a god.

However, the Ancient God of Thunder Note was the only one who claimed that he could KILL a god as a Great Monarch.

In the next moment, Han Fei saw blue ancient characters formed by Dao Patterns of laws not far away.

The technique was popping up in Han Fei's head.

Twelve Thunder Seal Technique (Monarch-realm, Divine-quality)

Note: The Twelve Thunder Seal Technique contains eleven different thunder laws, as well as the magical Heavenly Tribulation Killing Seal Technique. The specific laws include the Thunder Fusion Killing Technique, speed of lightning, soul slaying lightning, lightning arc deceleration domain, jumping lightning, strange transformation lightning, lightning ring covering technique, sea of lightning and fire, lightning in one, Dao Heart-crushing lightning, and cleansing lightning. There are a total of eleven laws. Remember, the ultimate seal technique, the Heavenly Tribulation Killing Technique, can only be used by those who have mastered it. Otherwise, you will suffer a backlash.

Deduced Art: None

Effect: Each seal technique can be used independently. The twelve techniques are comparable to twelve Monarchs.

Note: Only when you master this technique can you use the Heavenly Tribulation Killing Technique.

“The Ancient God of Thunder Note actually gave me this technique.”

Han Fei was lost for words. Using the Void Stealing Technique, he stole the seal techniques one by one and managed to deduce the Twelve Thunder Seal Technique with the Demon Purification Pot, but the Ancient God of Thunder Note directly gave this technique to him.

“It’s indeed an inheritance, which was given to me without hesitation...”

Without hesitation, Han Fei absorbed these laws, then sat cross-legged, and took the liquid divine light.

He sat cross-legged for three months before slowly opening his eyes.

He sorted out the Twelve Thunder Seal Technique and restored himself to his peak state. He had mixed feelings. This was only the first level of the trial. It wasn’t too difficult for him to solve it with luck and cheating. However, the last seal was only used on him once. Perhaps this was the requirement to pass. As long as he could endure until the last giant appeared and withstand a heavenly tribulation, he would pass the test.

With this in mind, Han Fei didn’t know whether to laugh or cry. No wonder Senior Brother Lei Heng didn’t mention the first level of the trial. Maybe he thought he would pass it quickly, instead of spending a month secretly learning the Twelve Thunder Seal Technique.

Han Fei tried to think about it. If he just tried to fight the giants, it might only take him one or two days to pass the first level of the trial, and then he could also get the Twelve Thunder Seal Technique. However, from the beginning, he had made it extremely difficult for himself.

The second level of the trial was about to begin!

Han Fei couldn’t help but smile. He felt that the second level of the trial might be the easiest one for him.
