Chapter 2961: Thunder Secret Technique, Thousand Thunder Flash (1)

2961 Thunder Secret Technique, Thousand Thunder Flash (1)

In the Hall of Gods, Han Fei walked straight to a stone door in the depths. This was the only way. He was also a little curious. Could it be that the Ancient God of Thunder Note had kept a group of ominous creatures captive?

When he pushed open the stone door, behind the door was a boundless Sea of Stars that seemed to have left the range of the Thunder Note Ancient Temple. However, in this boundless Sea of Stars, there was a lightning mark that stretched out without end. It seemed that as long as he followed this lightning mark, he should be able to reach the second level of the trial.

Then, he heard a voice in his ear. "The second level of the trial is about to begin. The trial-taker has to kill all the ominous creatures here before you can start the third level of the trial. There is no time limit for this level of the trial."

Han Fei didn't hesitate. He had an absolute advantage in the second level of the trial. If he couldn't even pass it, it was difficult for him to imagine how others would pass it.

As Han Fei stepped through the stone door, the stone door behind him disappeared, and so did the Thunder Note Ancient Temple. This made Han Fei suspect that he had entered some kind of illusionary space and wasn't experiencing a real battle.

However, he remembered that Senior Brother Lei Heng had instructed him to collect as many energy crystals as possible during the second level of the trial, which indirectly proved the authenticity of this trial.

In the Sea of Stars, suddenly, thunder rumbled, and the lightning mark that spanned a long distance suddenly shone. Then, the void cracked, and with a whoosh, a large number of ominous creatures rushed out of the void crack.

"Huh? Is this a void door that connects to the outside world?"

Han Fei understood. The Ancient God of Thunder Note had specifically let these ominous lifeforms in. He had never thought of escaping directly from this spatial rift. If it was really so simple, it was impossible for so many strong masters to die here in the history of the Void Temple. Senior Brother Lei Heng would probably ask Eldest Senior Brother to get him out.

Instead of running for his life in vain, he might as well think about how to kill these ominous creatures. Because in just a short while, tens of thousands of ominous creatures had rushed in.

None of these ominous lifeforms were at the level of the Sky Opening Realm. They were all terrifying-level Monarch-realm lifeforms, just like the ones he had killed earlier.

Before the void crack was closed, those ominous creatures had already rushed towards Han Fei. And when the battle began, Han Fei didn't escape immediately.

He formed seals with his hands.

“Lightning Arc Deceleration Domain.”

In the void, lightning arcs flashed, and Han Fei borrowed the Great Dao here to create a domain of speed reduction that spanned more than 300,000 kilometers.

Then, Han Fei formed seals again. “Lightning of Purification.”

Han Fei didn’t want to carry the rapid flow of the laws with his body. If he did that, just like before, after only killing 500 or 800 ominous creatures, his body would become numb.

As for the Twelve Thunder Seal Technique, it directly used the laws of lightning. In terms of consumption, if he could use the Twelve Thunder Seal Technique to directly kill a large number of ominous lifeforms, this would undoubtedly be a better choice.

In the lightning arc deceleration domain, because of the natural suppression of lightning on evil creatures, the Lightning of Purification had an unexpected effect.

Every lightning bolt of purification could take away a terrifying-level ominous lifeform.

At this moment, Han Fei truly realized the power of the Twelve Thunder Seal Technique. If it were an ordinary person, he could at most heavily injure a strong master of the same realm with a lightning strike. It was almost impossible to kill his enemy.

Even the weakest Monarch couldn’t be killed by a few lightning strikes in the Chaotic Thunder Domain.

But for ominous creatures, it was a natural counter. Every time the Lightning of Purification was used, an ominous lifeform could be killed. The only pity was that the Lightning of Purification needed to be combined with seal techniques, and the speed of seal techniques wasn’t that fast.

Han Fei didn’t know how many ominous creatures had entered. Anyway, the Lightning Arc Deceleration Domain that he had set up was almost surrounded by countless ominous creatures. He knew that he should retreat. Otherwise, once a large number of ominous creatures surrounded the domain, it would be impossible for him to escape.

In just ten seconds, Han Fei killed as many as 37 ominous creatures and took their energy crystals. Han Fei used the Lightning Jumping and broke out of the encirclement before the ominous creatures surrounded him.

At this time, the densely packed ominous creatures, like ghosts in hell, chased Han Fei like flying locusts.

Han Fei’s eyelids twitched crazily and he was speechless. This Ancient God of Thunder Note really thought highly of the trial-takers. How many ominous creatures had been let in?

Han Fei transformed into a body with three heads and six arms and performed six seal techniques at the same time, which were the Lightning Arc Deceleration Domain, Speed of Lightning, Lightning Jumping, Lightning Turning into Fire, Lightning Fusion Killing technique, and Lightning of Purification.

These seals gathered the lightning laws that filled the sky and bloomed in the army of ominous lifeforms chasing him.

Boom Boom Boom ~

Sizzle~

“Puff! Puff! Puff!”

For a moment, billowing black fog spewed out of the bodies of those ominous lifeforms. As soon as the six seals were released, lightning fire covered an area of 300,000 kilometers in the deceleration domain.

More than a thousand ominous creatures were enshrouded, but the lightning laws that Han Fei could gather through the seal techniques in such a short period of time was limited. Even if he made a big fuss, he didn't even kill 50 ominous creatures. Besides, he couldn't get the energy crystals of the dozens of ominous creatures. It was impossible for him to rush into the ominous army to get them.

[God of Fishing](#)

Chapter 2962: Thunder Secret Technique, Thousand Thunder Flash (2)

2962 Thunder Secret Technique, Thousand Thunder Flash (2)

“It's intentional. It's definitely intentional.”

Han Fei concluded that the Ancient God of Thunder Note intentionally designed the second level of the trial like this. He knew that even if someone mastered the Twelve Thunder Seal Technique in the first level of the trial, it wouldn't help.

The range attack of the thunder fire of the Twelve Thunder Seal Technique was very strong. If it were ominous creatures in the perfected Star Transformation Realm rushing at him at the moment, Han Fei might be able to burn thousands of them to death with a single thunder fire. But in the face of Monarch-realm ominous creatures, even if Han Fei used all the twelve seals, including the twelfth seal to summon the heavenly tribulation, it was impossible for him to cause such a large-scale instant kill.

Since he wasn't given a chance to kill these ominous creatures on a large scale, he could only fight and retreat. With his speed advantage, he could slowly exhaust these ominous creatures with lightning techniques.

Therefore, this second level of the trial was not only a test of the participants' lightning techniques, but also tested the comprehensive combat power of the participants. With a thought, Han Fei tentatively punched through some ominous life forms nearby with the Invincible Punch.

However, just as Han Fei killed two, two spatial cracks suddenly appeared where the two ominous creatures died. Then, four ominous creatures crawled in from the spatial cracks.

“What?!”

Han Fei's face turned green. So, the second level of the trial was actually to test the participants' mastery of the Twelve Thunder Seal Technique, right?

Once the trial-takers killed the ominous creatures in other ways, they would immediately release double the number of ominous creatures.

Han Fei's heart shivered. This kind of trial was too disgusting. Only the Twelve Thunder Seal Technique could be used. What if others hadn't learned it? But on second thought, it seemed that there was no time limit between the first and second level of the trials. This period of time should be the time given by the Ancient God of Thunder Note to the participants to practice the Twelve Thunder Seal Technique. If ordinary people got the Twelve Thunder Seal Technique, they would definitely learn it first. After all, this was a special Thunder Technique trial.

Now, if he had to solve these ominous lifeforms with the Twelve Thunder Seal Technique, this battle would become a real protracted battle. If he didn't have good footwork, he would probably be surrounded by these ominous lifeforms soon.

Han Fei imagined that if he was surrounded by tens of thousands of ominous creatures, he would have no choice but to rush out with his invincible state.

Furthermore, even if he rushed out in the invincible state of the Great Dao of Life Replacement, it didn't mean that he wouldn't be polluted by the ominous aura.

Therefore, it was best not to be surrounded by the ominous creatures.

Suddenly, Han Fei remembered that Senior Brother Lei Heng said that the third level of the trial was a speed trial. Could it be that this second level of the trial not only tested the participant's grasp of the Twelve Thunder Seal Technique, but also his grasp of speed and footwork? Only in this way would he have a chance to survive when entering the third level of the trial.

"That must be the case. The different levels of the trial created by the god must be related to each other. The Twelve Thunder Seal Technique has an impact on the second level of the trial. The movement technique and speed test and the collection of energy crystals in the second level of the trial will respectively affect the third and fourth levels of the trial. Then, the third level of the trial either has an impact on the fourth level of the trial, or has an impact on the trials that come after the fourth level. There must be a connection among them."

After confirming this idea, Han Fei no longer rejected it.

Although he hadn't mastered the Ten Thousand Law Sky Travelling Technique yet, it wasn't far off. The main reason was that he couldn't use it for a long time, or he might permanently transform into a law.

However, if it was used in conjunction with the Jumping Lightning and the Thunder Transformation Technique of the Twelve Thunder Seal Technique, it seemed to be an extension of movement techniques.

Han Fei immediately activated the Ten Thousand Law Sky Travelling Technique. As soon as this technique was used, every time Han Fei took a step in the void, he appeared tens of millions of kilometers away.

Every time Han Fei used a thunder technique, when he killed about twenty or thirty ominous creatures, he needed to quickly avoid the besieging ominous creatures with the Ten Thousand Law Sky Travelling Technique.

Seven or eight times in a row, just when Han Fei had adapted to this combat method, he suddenly found a thunder ball in the void.

The thunder ball suddenly appeared out of blue.

Han Fei was also curious. It was impossible for such meaningless things to exist in the second level of the trial.

Therefore, Han Fei arrived in a few steps.

Unfortunately, the Demon Purification Pot couldn't read what the thunder ball was. Han Fei thought for a moment and was about to reach out to grab it. He was already prepared to activate the Great Dao of Life Replacement.

However, when Han Fei's hand touched the thunder ball, his consciousness suddenly changed slightly. He felt that he had turned into a thunder ball, and tens of thousands of ominous creatures had rushed at him from all directions.

Han Fei's face slightly changed. He wanted to leave this weird state as soon as possible, but he was surprised to find that he couldn't get out of this state.

While Han Fei was burning with anxiety, he felt that he seemed to have split into thousands of clones at once, and his body suddenly appeared in thousands of directions.

As for the ominous creatures that surrounded him, they lost their target at the last moment. For a moment, they didn't know where to chase, because at this moment, there were only thousands of lightning arcs extending out in the sky.

[God of Fishing](#)

Chapter 2963: Thunder Secret Technique, Thousand Thunder Flash (3)

2963 Thunder Secret Technique, Thousand Thunder Flash (3)

Han Fei saw this scene himself. In an instant, he felt that he had turned into lightning, flashing in all directions and rushing in thousands of directions.

"Huh!"

Han Fei simply felt that there were few ominous creatures in a certain place. Then, he suddenly appeared there.

"A divine technique?"

Han Fei was certainly not stupid. Just now, he felt that any direction where the lightning arc struck out could be his foothold.

This meant that even if he was surrounded by thousands of soldiers and horses, if he used this technique, he could easily break through the siege unless all directions were sealed, or the space where he was now was sealed.

Was it a coincidence that he encountered this thunder ball? Of course, it couldn't be a coincidence. This was clearly a divine technique, and it seemed to be a one-time experience. The purpose of its existence was to make him marvel at how powerful this divine technique was.

Of course, it was impossible for Han Fei to master this divine technique with this experience. However, he didn't quite understand why the Ancient God of Thunder Note set up this divine-technique experience here.

The chase and counterattack weren't any different because of this sudden divine-technique experience.

This battle lasted for seven days, and the number of the terrifying-level ominous creatures killed by Han Fei amounted to a staggering 9231.

However, the ominous creatures were far from being completely killed off. They were still chasing.

But Han Fei didn't run anymore, because he had reached the end of the lightning mark in the void. And at the end of the lightning mark, there was a platform floating in the void.

It was a little similar to a Floating Stone, but the material shouldn't be comparable to a Floating Stone. This Floating Stone was protected by a barrier. In the barrier, on the platform, there was a circle of a hundred thunder balls floating.

"Is it the divine thunder ball from before?"

Han Fei immediately rushed onto the platform.

Sure enough, the barrier didn't stop him. This place was clearly prepared for the trial-takers.

"So the first seven days were just the basic test?"

Han Fei was lost for words. It wasn't hard for him to guess what the Ancient God of Thunder Note was thinking. He wanted the trial-takers to inherit the divine technique from the thunder ball.

He had only experienced it once just now. Now, it was obvious that the god wanted him to learn it. If he could learn it, he would be able to obtain this inheritance. If he couldn't, Han Fei seemed to be able to pass the second level of the trial with his own means.

However, he didn't know if it would affect the subsequent trials if he couldn't learn it.

Bang! Bang! Bang!

As soon as Han Fei landed on this platform, those ominous creatures had already arrived and surrounded this small floating platform. There were at least 20,000 of them!

"Huff!"

Han Fei couldn't help but smile bitterly. Is this really a trial?

However, after running and fighting for seven days in a row, Han Fei was also tired. Seeing that these ominous creatures were blocked by the barrier, he sat cross-legged and recovered for an hour.

Then he began to study these thunder balls. If he guessed right, this was a training ground, and these hundred thunder balls were his opportunity.

From what he had experienced before, it was very difficult for him to learn such a divine technique in one try.

But what if he increased the number of times he comprehended it to a hundred? Perhaps most people still couldn't comprehend it, and then they might not have a chance to comprehend it again.

Han Fei was lost for words. That's bulls*it! For this kind of divine technique, wouldn't it be better for you to keep a copy of the technique for others to learn it instead of insisting that others comprehend it?

The thoughts of the gods were always elusive, but Han Fei just complained and began his first attempt.

Swish ~

It was like thousands of lightning arcs that suddenly burst out. The landing point of each lightning arc could be used as his alternate path.

Then, to reach this path directly, the first ability was to master the Lightning Transformation Technique. Han Fei had already mastered it in the Twelve Thunder Seal Technique.

Secondly, this technique was released and retracted very quickly, faster than the Void Descending Art. The main meaning of Void Descending Art was to send a clone down, which was essentially different from this thunder ball.

This thunder ball divine technique didn't have a clone. Clones could be easily destroyed, but the original body couldn't. The thunder ball divine technique only greatly reduced the chances of the original body being found, which was only one in ten million.

Han Fei's first research had already made him ponder.

The next day, he used five thunder balls in one go. He didn't gain much insight, but the Demon Purification Pot directly showed this technique.

Thousand Thunder Flash (Monarch-level, Divine-quality)

Note: This is a lightning escape technique based on laws such as lightning marks, flash lightning, jumping lightning, lightning transformation, lightning speed, and space. This technique can turn a thousand into ten thousand, and ten thousand into infinite. If you learn this technique, you can gain a great advantage in group battles. In the face of an enemy no more than two realms above you, your chances of escape are as high as 90%. If you escape to the Sea of Thunder, even gods can't find you.

Comprehension degree: 1%

Effect: Turn one to a thousand, a thousand to ten thousand, and ten thousand to infinite.

Note: To learn the Thousand Thunder Flash, you have to integrate and comprehend all the laws, and only then can you start to use them effortlessly.

"Sure enough, none of the legacies of the Ancient God of Thunder Note are simple. This Thousand Thunder Flash is very difficult to grasp!"

Han Fei used six thunder balls, but the comprehension degree of the Thousand Thunder Flash was only 1%. Considering this level, after using up this batch of thunder balls, it was a question whether he could comprehend 20% of the technique.

However, the Demon Purification Pot should be able to help him comprehend more.

God of Fishing

Chapter 2964: Thunder Secret Technique, Thousand Thunder Flash (4)

2964 Thunder Secret Technique, Thousand Thunder Flash (4)

Twenty days passed.

Han Fei looked at the last thunder ball in front of him and fell into deep thought. With the help of the Demon Purification Pot, he had only comprehended 30% of the Thousand Thunder Flash.

And 30% could barely transform one into ten. However, from the parts he had already comprehended, transforming one into ten could only be considered a beginner.

At this moment, Han Fei knew that when the last thunder ball was used up, the spiritual barrier would be broken, and the prolonged chase would begin again.

Of course, Han Fei didn't use the last thunder ball on this floating platform.

Now there were nearly 20,000 Terrifying-level ominous creatures outside. After using up this thunder ball, he could only rush out. The part of the Thousand Thunder Flash that he had comprehended wasn't enough to deal with so many ominous creatures.

Buzz!

At that moment, the moment Han Fei crossed the barrier, he turned into more than a thousand lightning bolts, crossed tens of thousands of ominous life forms in an instant, and appeared thousands of kilometers away.

Roar!

A large wave of ominous creatures continued to chase him.

23 days later.

Han Fei let out a long sigh of relief when the last terrifying-level ominous creature perished. The second level of the trial was indeed not as difficult as he had imagined. At least it was okay for him, except that the battle dragged on. Besides, the Ancient God of Thunder Note had given him this inheritance.

In comparison, Han Fei still felt that the first level of the trial was more difficult.

During this period, Han Fei only harvested 6,012 energy crystals, which was all he could gather. But most of the time, these ominous creatures came in groups and never stopped. In order to pick up energy crystals, he had been in desperate situations time and time again. If Senior Brother Lei Heng hadn't said that he should try his best to collect energy crystals, Han Fei wouldn't have taken that risk at all.

After that, when he wanted to look for the energy crystals left behind after he killed the ominous creatures, he discovered that, to his surprise, these energy crystals had all disappeared.

Just as Han Fei was about to find where the third level of the trial would begin, suddenly, a big hole appeared in the void, and another ominous creature entered the hole.

This time, Han Fei's face changed. Wasn't this a f*cking destruction-level ominous creature?

Earlier, he cooperated with the Emperor Sparrow to kill one, but it couldn't be said that he killed it. The Emperor Sparrow's Hellfire Burning Technique played a key role. Otherwise, it would be difficult for him to kill an Immortal-level creature even if he used all his strength.

Now, just when Han Fei thought that he had passed the second level of the trial, an ominous creature of this level was suddenly released. What did it mean?

When the ominous creature saw Han Fei, it gnashed its sharp black teeth and said, "Anyone who enters the Thunder Note Ancient Temple shall die."

Perhaps the ominous creature thought that Han Fei accidentally broke the seal of the Ancient Thunder Temple, so as soon as it came in and saw him, it immediately shouted these words.

Han Fei sighed in his heart, thinking that the Ancient God of Thunder Note's trial was too abnormally difficult. Who would have the energy to deal with an ominous creature one level higher than him after killing 30,000 ominous creatures?

Swish ~

The destruction-level ominous creature had already jumped to Han Fei's side. At first, it released the demonic sound, trying to corrode Han Fei's soul.

Han Fei blocked it with the Thunder of Purification while turning into dozens of lightning marks and retreating.

Immediately, Han Fei summoned the Emperor Sparrow.

Seeing that it was another destruction-level ominous creature, the Emperor Sparrow was speechless. "Can you find something less difficult next time?"

Han Fei said angrily, "Do you think I want to? This is part of the trial. Come on, let's cooperate again and kill it in one go."

The Emperor Sparrow was helpless too. His eyes immediately turned red. "Hellfire Burning."

Han Fei said, "Thunder of Purification."

Han Fei took this opportunity to grow three heads and six arms and use six lightning techniques at the same time. He thought to himself, This can't be considered cheating, right?

"Ahhh~"

The destruction-level ominous creature was being burned by the hellfire and wailing nonstop. Han Fei bombarded it with seal techniques crazily, not even using the God Sealing Spear. He was mainly afraid that if he used other powers to defeat this ominous creature, another destruction-level creature would be released.

When the Emperor Sparrow suffered another backlash, the two of them worked together to kill another destruction-level ominous creature.

"Huff!"

Han Fei heaved a sigh of relief. Fortunately, it was an ominous creature. If it were an ordinary Immortal-level powerhouse, it would be difficult for him and the Emperor Sparrow to kill it even if they worked together.

Just as Han Fei was casting the Heaven Enlightenment Divine Technique on the bird, suddenly, two big holes appeared in the void.

This time, two destruction-level ominous creatures appeared at one time.

“Huh? What happened?”

The Emperor Sparrow was dumbfounded and shouted, “Where did so many come from?”

Han Fei seemed to have thought of something. At this moment, a cold voice came from the void again. “The third level of the trial has begun. Trial taker, please use Thousand Thunder Flash.”

Han Fei: “...”

[God of Fishing](#)

Chapter 2965: Thunder Note Soul Refining (1)

2965 Thunder Note Soul Refining (1)

This was the third level of the trial?

Han Fei had thought that there would be a time gap between the second and third level of the trials for him to comprehend the Thousand Thunder Flash. But it turned out that the second and third level of the trials were connected.

Therefore, the destruction-level ominous lifeform that he and the Emperor Sparrow had killed just now was not the content of the second level of the trial at all. The Ancient God of Thunder Note had never meant the trial-takers to kill the destruction-level ominous creature.

Han Fei’s face turned green. So it was just his wishful thinking?

It seemed to make sense. If he didn’t have the help of the Emperor Sparrow, he probably wouldn’t have been able to kill a destruction-level ominous creature. If he couldn’t even kill it, the others shouldn’t be any better than him. Then how could this be the content of the second level of the trial?

As for the third level of the trial, Senior Brother Lei Heng’s answer was to run as fast as possible without stopping.

Although Senior Brother Lei Heng didn’t mention the Thousand Thunder Flash, it was probably because the cost of learning the Thousand Thunder Flash was too high. Once Han Fei encountered it, he would naturally understand and didn’t need him to remind him. If he reminded Han Fei too early, it would cause him pressure instead, so Senior Brother Lei Heng deliberately didn’t mention it.

The Emperor Sparrow said, “If there are only two of them, we might be able to fight them, but we have to kill them one by one.”

Han Fei shook his head. “No, we’re not going to kill them.”

The Emperor Sparrow was surprised. “No? Then what are you going to do?”

Han Fei shouted, “Run!”

Han Fei recalled the Emperor Sparrow. At the moment when the two destruction-level ominous creatures were almost in front of him, he turned into seven or eight lightning marks and flashed out.

At the moment when the Thousand Thunder Flash was used, the two destruction-level ominous creatures temporarily lost track of their target, or rather, they didn’t know which lightning mark to chase. This was because in their eyes, these lightning bolts all seemed to be Han Fei’s true body.

But the moment Han Fei appeared, they realized that Han Fei would only appear in one of the lightning marks. The speed of the destruction-level ominous creature was terrifying. They could cover tens of millions of kilometers of the void only in an instant. Therefore, when Han Fei appeared, he had no time to react at all but turned into seven or eight lightning marks and flashed out again.

After repeating it four or five times in a row, the two destruction-level ominous creatures learned their lesson and began to split into two groups, each chasing one of the lightning marks.

Of course, they couldn’t catch up with the lightning marks at all, because during the working time of the Thousand Thunder Flash, Han Fei could choose a foothold at will in his lightning mark state. Unless there were seven or eight destruction-level ominous creatures, it was actually very difficult to catch up with him.

However, no matter how fast the Thousand Thunder Flash was, the speed of the destruction-level ominous life form could almost reach a thousand times the speed of light, which still put a lot of pressure on Han Fei, because he had no time to think at all and could only keep using the Thousand Thunder Flash.

After using the Thousand Thunder Flash about a hundred times, another hole appeared in the void, and then, as expected, another destruction-level ominous creature appeared.

Seeing this scene, Han Fei’s heart turned cold. A third destruction-level creature came in so quickly? If there were seven or eight of them in the end, wouldn’t he have nowhere to escape?

“No, there can’t be seven or eight destruction-level ominous creatures.”

Han Fei hadn’t seen so many destruction-level creatures outside the Thunder Note Ancient Temple! Although he didn’t approach the Thunder Note Ancient Temple at that time, it was impossible for the destruction-level creatures to not notice him with their speed and perception.

Therefore, if there were really so many destruction-level creatures, he would have been surrounded by them long ago.

However, Han Fei didn’t dare to bet. It was possible that the destruction-level ominous creatures just didn’t attack back then.

At this moment, without the thunder balls to help him comprehend the Thousand Thunder Flash, Han Fei could only rely on his understanding of the Thunder Techniques, running and comprehending.

Two hours later, the fourth destruction-level ominous creature appeared.

Half a day later, the fifth destruction-level ominous creature appeared.

One day later, the sixth destruction-level ominous creature appeared.

Han Fei felt that he was about to explode. He could only turn into seven or eight lightning marks when he used the Thousand Thunder Flash. Now that six destruction-level creatures had appeared at the same time, he had very little room to escape. If there was one more, Han Fei might make a mistake with the Thousand Thunder Flash and be caught by one of the destruction-level ominous creatures. Once he was delayed for half a second, the other five destruction-level creatures would definitely arrive in an instant. Then he would have almost no room to escape.

However, Han Fei also discovered that the interval between the appearance of the destruction-level ominous creature was increasing. If a seventh destruction-level was about to appear, it would take at least half a day or a day.

This meant that he'd better comprehend more about the Thousand Thunder Flash within a day. Han Fei felt that it shouldn't be a problem to turn one into ten, but he also knew that it shouldn't be enough.

Sure enough, after more than half a day, because he had used the Thousand Thunder Flash too many times, Han Fei's comprehension of the Thousand Thunder Flash finally reached 34%. At the same time, he had also grasped the preliminary part of the Thousand Thunder Flash, reaching the point to turning one into ten.

After another half a day, holes appeared in the void again. However, this time, three ominous life forms appeared at once.

Han Fei was about to curse that this damn trial was too much, when he found that the three ominous creatures that came in later were only terrifying-level, which made him heave a long sigh of relief.

However, so what? The speed of a terrifying-level ominous life form was also very fast. Han Fei could roughly guess the reason. Perhaps the destruction-level ominous creatures were gone, so terrifying-level creatures were released.

[God of Fishing](#)

Chapter 2966: Thunder Note Soul Refining (2)

2966 Thunder Note Soul Refining (2)

But it made sense. If there were so many destruction-level ominous creatures, someone in the Chaotic Thunder Sea would probably deal with them. Although the Chaotic Thunder Domain was mysterious, it didn't mean that there were no strong masters here.

After the terrifying-level ominous creatures entered this place, as long as one of them blocked him for half a second, the outcome would be the same.

However, he had just grasped the preliminary part of the Thousand Thunder Flash and could turn one into ten, but there were already six destruction-level and three terrifying-level ominous creatures here. In other words, he had to appear at the lightning-mark route where he was most likely to escape every time, precisely and accurately.

However, to Han Fei's surprise, the six destruction-level ominous creatures seemed to have changed their strategy. When they chased after a lightning mark, they seemed to chase after it, but usually, after running for a while, they would suddenly change their direction and chase after another lightning mark. As a result, Han Fei couldn't completely predict their landing point every time.

Therefore, two or three times out of a hundred times, he would be caught up because of an error in judgment.

However, after being caught, Han Fei still had a chance, which was Lightning Jumping. He could dodge a second time with Lightning Jumping.

On the fifth day, Han Fei's comprehension of the Thousand Thunder Flash finally reached 40%. Every time he used the Thousand Thunder Flash, he could barely turn one into thirty.

However, although Han Fei was growing, there were now as many as 24 terrifying-level ominous creatures in addition to the six destruction-level ones.

In just five days, the third level of the trial blocked all Han Fei's paths.

When the 30th ominous creature appeared, Han Fei's first reaction was to kill one ominous creature first.

He did. The moment he landed, he used the Thunder Transformation Technique to penetrate a terrifying-level ominous creature. His speed was not affected, and the next second, he used the Thousand Thunder Flash again and escaped.

However, when this terrifying-level ominous creature died, a big hole immediately opened in the void again, and another terrifying-level ominous creature appeared.

Obviously, killing terrifying-level ominous creatures was not the right choice.

Han Fei couldn't help but think of what Senior Brother Lei Heng said. Just ignore everything else and run.

However, how could he run now? No matter which lightning mark he landed on, he would inevitably meet a terrifying-level ominous creature.

Even if he could make the Lightning Jumping and avoid the ominous creature again, the Lightning Jumping couldn't be activated so frequently. He could do it once or twice, but after three or five times, he couldn't take it anymore.

He could avoid being hunted with the Ten Thousand Law Sky Travelling Technique, but the Ancient God of Thunder Note didn't set up such a trial to allow people to use their movement techniques.

Therefore, it was either the Twelve Thunder Seal Technique or the Thousand Thunder Flash. There must be a way to break the situation.

When the lightning flashed, Han Fei seemed to have initiated sage thinking mode, and his mind was racing.

Senior Brother Lei Heng probably didn't fight at all during the whole process. He just ran to completely master of the Thousand Thunder Flash.

Although he had used the Thousand Thunder Flash countless times, it was still too far away for him to learn how to transform one into a thousand. He couldn't even transform one into a hundred.

When Lei Heng first came into contact with the Thousand Thunder Flash, could he transform one into a thousand? The disciples of the Void Temple might be strong, but they weren't that powerful.

Unless...

Han Fei was shocked. If Senior Brother Lei Heng had been running, he would have to continuously improve the effect of the Thousand Thunder Flash in order to pass the trial.

How did he do it?

Buzz!

The moment Han Fei appeared, a terrifying-level ominous creature had already arrived, but then the lightning leaped and disappeared. When the ominous creature came out, it turned into a lightning bolt again.

Han Fei continued to think. Could Lei Heng do it because he had a high understanding of lightning techniques due to his Thunder Spirit body?

If this was the case, Senior Brother Lei Heng should have reminded him to comprehend the technique properly instead of running crazily. Since he told him to run crazily, he would probably be able to comprehend the technique while running.

"Law Fusion?"

Han Fei came to a conclusion. In other words, the cultivation system in the era of the Ancient God of Thunder Note was different from the current one.

In that era, there was no such thing as the Carefree Level. And if one wanted to reach the Immortal Level, he had to achieve law fusion.

Starting the law fusion and completing the law fusion were two stages. One represented the Immortal level, and the other represented the Great Monarch realm.

Therefore, although he wasn't at the Immortal Level, he might still be able to start the law fusion. After all, many of the laws in the Thousand Thunder Flash were the laws of the Twelve Thunder Seal Technique.

When this idea popped up in Han Fei's mind, the Thousand Thunder Flash was slightly improved. When Han Fei used the Thousand Thunder Flash again, he turned into thirty-six lightning marks, buying himself some time.

"Huff!"

Han Fei knew that he was heading in the right direction. He had to be ahead of the trial. Only when the number of the lightning marks exceeded that of ominous creatures could he keep winning.

This time, Han Fei first tried to integrate the Law of Lightning Jumping into the already operating laws of the Thousand Thunder Flash. At first, it was quite difficult and couldn't be integrated at all.

However, after a hundred or a thousand times, the power of the law of Lighting Jumping greatly increased in the Thousand Thunder Flash, but it made the Thousand Thunder Flash seem to change from lightning marks to a combination of lightning marks and lightning jumping, and the number of lightning marks suddenly reached more than 80.

“No, half of the lightning marks can’t be used as a foothold.”

Han Fei began to try adding other lightning techniques.

However, during the process of repeated attempts, Han Fei forgot that he was still in the third level of the trial.

Chapter 2967: Thunder Note Soul Refining (3)

2967 Thunder Note Soul Refining (3)

By the time Han Fei came back to himself, there were more than three hundred lightning marks and more than three hundred ominous creatures chasing him.

Finally, after twenty-two days, when Han Fei used the Thousand Thunder Flash to turn to a thousand lightning marks for the first time, thunder rumbled in the sky.

Rumble!

The scene in the Chaotic Thunder Domain appeared again.

As soon as the lightning struck, the ominous creatures fled in all directions. But no matter how they ran, those terrifying-level ominous creatures couldn’t escape the bad luck of being struck by lightning. As long as they were struck by lightning, they were basically doomed.

“Puff! Puff! Puff!”

Han Fei took the opportunity to quickly pick up the energy crystals of the terrifying-level ominous creatures that had been killed.

When the lightning appeared, Han Fei knew that the third level of the trial had been completed.

With the experience of the seamless connection between the second and third level of the trials, Han Fei was already prepared for the worst. It didn’t matter if there was no time for him to take a rest. As long as he passed the fourth trial, he had a high chance of survival.

At this moment, only the destruction-level ominous creatures were still trying to make their last struggle, recklessly chasing Han Fei.

However, this place had turned into a sea of lightning again. How could they still find Han Fei?

When Han Fei used the Thousand Thunder Flash again, the destruction-level ominous lifeforms completely lost track of Han Fei. Where could they find the thousand lightning marks in the vast sea of lightning?

Even if they found them, what could the six of them do?

In the lightning sea, Han Fei formed seals one after another, giving the six destruction-level ominous creatures no chance at all.

In less than half an hour, the six destruction-level ominous creatures were all killed.

A voice immediately sounded. "Congratulations to the trial-taker for completing the third level of the trial. Please go to the Lightning Pool and begin the fourth level of the trial."

"No rest time?"

Han Fei was slightly relieved. By specifying where to complete the trial, he was obviously given a chance to rest.

However, the sky was full of lightning. Although he had mastered many lightning techniques, how could he rest in such an environment?

Having no choice, Han Fei could only activate the Turtle Shell Sky Sealing Array.

Rest was necessary. The third level of the trial had exhausted him both physically and mentally.

In fact, the third level of the trial not only helped Han Fei complete the Thousand Thunder Flash, but also greatly improved Han Fei's control of speed.

He was sure that his fastest speed was no longer as simple as 300 times the speed of light. He even felt that he could reach 400 times the speed of light.

As for the Thousand Thunder Flash, there was still a long way to go. There were actually three hidden realms of the Thousand Thunder Flash. One was to transform from one into a thousand, one from a thousand into ten thousand, and the other was to transform from ten thousand into infinite.

Transforming one into a thousand could only be considered a small achievement. Han Fei clearly knew that his current understanding of the Thousand Thunder Flash was only 60%.

Transforming ten thousand into infinite was definitely the most difficult, but he wasn't in the mood or energy to think about it now.

Han Fei propped up the Turtle Shell Sky Sealing Array, stuffed a few balls of liquid divine light into the mouth in a row, and lay down for half a day to recuperate before removing the Turtle Shell Sky Sealing Array.

This time, he obtained a total of 7,012 energy crystals, including 7 level-five energy crystals and 7,005 level-four energy crystals.

According to Senior Brother Lei Heng, energy crystals were very important in the fourth level of the trial.

Was the Thunder Note Soul Refining a way to temper the soul?

Although the voice didn't specify the direction of the Lightning Pool, Han Fei, who had mastered enough lightning techniques, could feel the intensity of the lightning.

The Lightning Pool should be in a place where lightning was dense. And Han Fei, who had mastered the lightning techniques, no longer needed to rely on the Ten Thousand Law Sky Travelling Technique to

dodge the lightning like he did in the Chaotic Thunder Domain, nor did he need to rely on the Turtle Shell Sky Sealing Technique to provide himself with breathing space.

Whether it was the Thunder Transformation Technique, Lightning Jumping, or Thousand Thunder Flash, he could easily move forward in this sea of lightning.

Half a day later, Han Fei came to a place where the lightning was ten times denser than before.

However, no matter how dense the lightning was, if the intensity remained the same, he could transform into a lightning technique and couldn't be hurt.

For a moment, Han Fei even felt a little worried, because he felt that the lightning could no longer temper his body.

Soon, Han Fei found a place surrounded by lightning in the void. The power of lightning there was extremely pure and couldn't be compared to ordinary lightning.

Upon closer inspection, it was actually a small river floating in the sea of lightning. Naturally, it was not water in the river, but liquid lightning.

"Is this the Lightning Pool?"

For the first time, Han Fei realized that he could take a bath with lightning. God knew how uncomfortable it would be if he lay in it.

But Han Fei only stood still and thought for a moment before jumping into the Lightning Pool.

Sizzle!

"Uh, uh, uh!"

Han Fei felt that a tremendous amount of lightning power was crazily pouring into his body.

Crack!

At the moment when the power of lightning surged in, Han Fei entered the mid-stage of the Carefree Level. It should have taken him some time to stabilize his cultivation base because he grew up too quickly, but in just a few months, he had steadily entered the mid-stage of the Carefree Level. His foundation couldn't have been more solid.

"Is this a trial?"

Han Fei trembled, but he felt that every wisp of his skin, every wisp of flesh, and every inch of his bone seemed to be polished. Even his soul seemed to be undergoing some kind of baptism.

Han Fei was certain that with this level of baptism, it would take him a few months or even a few days to enter the late-stage of the Carefree Level.

[God of Fishing](#)

Chapter 2968: Thunder Note Soul Refining (4)

2968 Thunder Note Soul Refining (4)

Therefore, he was a little suspicious. Was this really a trial? Senior Brother Lei Heng almost died here. Why?

The good times didn't last long. After enjoying the baptism of the Lightning Pool for about a hundred seconds, what should come still came.

Han Fei was taking a bath when he suddenly found that he had lost his sight. Yes, he couldn't see anything, and everything became dark.

If this was just the beginning, Han Fei felt that the baptism of the Lightning Pool was gradually weakening his sense of touch.

Han Fei wanted to get up, but at that moment, he had completely lost his sense of touch. Needless to say, his nose and mouth had failed one after another.

Han Fei knew that the trial had begun, because he could only hear now. The dense thunder rumbled into his ears, unusually loud.

But as he lost his inner vision, his control over his body and bones also disappeared. Han Fei quickly tried to operate the technique to prove the existence of his body.

But in the next moment, Han Fei even lost his perception of whether or not the technique was working. The law of the Great Dao still existed, but after losing all control of his body, the law wouldn't circulate according to his will.

At this point, Han Fei was horrified. If he were in this state, he would probably be killed easily!

Han Fei was still conscious, but his soul seemed to be imprisoned in his body. His only remaining perception was hearing.

Han Fei knew that this was the Thunder Note Soul Refining Trial, but he didn't expect it to be like this. This trial didn't test combat or law, but one's Dao heart.

Boom!

Rumble!

The roars of lightning kept entering Han Fei's ears. Because he had lost all other senses, his hearing was now exceptionally sensitive.

He heard that from the birth to the end of thunder, within the interweaving and rumbling of thunder in the void, too many sounds were contained. For example, a random thunderbolt that seemed ordinary produced as many as 3,648 syllable changes from beginning to end.

When countless thunderbolts exploded in all directions, every time, the syllables changed differently. This made Han Fei understand that there was no identical sound in this world. In the subtleties, there were too many changes to the sound, almost infinite.

At first, Han Fei could still analyze the sound of the lightning and count the number of lightning strikes. But after three days of silent calculation, he felt that he was hallucinating. The concept of time became blurred in his mind, and the noisy lightning around penetrated his calculation of time.

In such a case, once the concept of time was lost, the consequences would be terrible. He tried to re-establish the concept of time, but countless ravings immediately appeared in his mind.

Xia Xiaochan's voice was miserable. "Help me, Han Fei, help me and our baby..."

Luo Xiaobai's voice was cold. "I'm sorry. I fail to protect the human race. The human race was destroyed..."

Ximen Linglan: "Do you know where I am? I have waited for you for 100,000 years, and now I have to wait again... Sorry, I can't wait anymore. I have to go to a very distant place. We may not see each other again."

The divine son: "Wang Han, in the end, I still can't resist the invasion of time. I'll take my leave first."

The patriarch of the War Giants said, "Little Wang Han, men should eat more meat! How can you be so small?"

Tianqing said, "My disciple..."

"Boohoo... Daddy... I'm so lonely..."

"Damn you, Human Emperor! Why do we have to let you lead the human race?"

"Hahaha, Human Emperor, you will embark on that path one day. I'll wait for you on the way."

"Death is not the end of life, because the door of reincarnation has not yet opened..."

"The ominous is coming! Help!"

"Han Fei, Wang Han, Little Junior Brother, Senior Brother, Master Human Emperor, Master..."

In an instant, countless voices appeared in Han Fei's heart. There were too many of them. It was as if all the voices he had heard in this life had appeared in his ears at this moment.

Han Fei's soul trembled as he shouted in a low voice, "My Dao heart is firm. How dare you disturb my mind?"

Unfortunately, Han Fei didn't know that at that moment, he was already lost. If he could see his current situation clearly, he would know that his hand was waving in the Lightning Pool, as if he wanted to cut off all illusions.

He didn't know how long had passed. It might have been a day, a month, or a year.

Han Fei suddenly sobered up for a moment. "Senior Brother Lei Heng asked me to collect energy crystals. What's the use of them? Let's see."

Crack ~

Han Fei's soul hadn't been destroyed, so he could naturally activate the energy crystals.

With a crisp crack, amidst the billions of murmuring voices, it was like a thunderclap. Suddenly, Han Fei felt that pure Heavenly Dao laws and pure ownerless souls entered his body.

Because of their purity, as soon as the laws entered his body, Han Fei felt that the murmuring in his ears suddenly weakened.

At that moment, Han Fei came back to his senses. "What am I doing?"

God of Fishing

Chapter 2969: Master of Time Temple, I'm Going to Chop You Off (1)

2969 Master of Time Temple, I'm Going to Chop You Off (1)

When a person's five senses were almost completely gone, he was actually no different from a dead person, because he had lost all his senses of the outside world, leaving only his own world.

When a certain feeling was infinitely magnified and specially guided, it was possible that even one's unique spiritual world would collapse.

After all the perceptions and spiritual worlds collapsed, this person was equivalent to dead.

The appearance of the pure Heavenly Dao laws and ownerless souls in the energy crystals injected new perception into Han Fei's spiritual world.

Suddenly, Han Fei understood what Senior Brother Lei Heng meant when he said to collect as many energy crystals as possible. These energy crystals were not used for cultivation, but to impact his law of the Great Dao and soul with the continuous injection of the Heavenly Dao laws and ownerless souls from the energy crystals to strengthen his perception.

Gradually, the Heavenly Dao laws and the soul began to fuse. This seemed to be an inevitable process, because the only things Han Fei could feel now were these two perceptions.

He didn't know how long it had been. It felt very fast but also very slow. When Han Fei felt that the fusion of the Heavenly Dao law and the soul began to decrease significantly, he knew that the energy crystals must have been exhausted.

So Han Fei continued to activate the energy crystals. Although he couldn't feel the energy crystals at the moment, it didn't mean that he couldn't do anything now. The things were there, and his strength hadn't weakened, nor was his movement restricted. It was just that his mind was trapped.

Therefore, he only needed to confirm if his body had finished absorbing the energy crystals through the injection of the pure power of the Heavenly Dao and the ownerless souls.

The good news was that the two powers became stronger again, which reassured Han Fei.

He didn't know how many times this process had repeated, nor did he know how much time had passed. In any case, Han Fei felt that the strength of his soul seemed to have changed.

Finally, at a certain moment, Han Fei felt that his soul seemed to have sublimated. Like a butterfly breaking out of a cocoon, he saw a sea. In the sea, there was a divine tree with blood of various colors flowing all over. This tree was extremely high. The leaves on the tree were colorful, and blood was flowing in the roots and veins of every leaf.

"Is this... the Bloodline Divine Tree?"

Han Fei was shocked. This tree was extremely similar to the Bloodline Divine Tree recorded in the history books of the Lava Giants.

Legend had it that at the end of the primordial era, the flames of chaos swept across. In order to pass down their bloodlines, all the races once combined their power to create the Bloodline Divine Tree and transplanted it into the Soul Sea to prevent it from being destroyed.

If this was the Bloodline Divine Tree, was this the Spiritual Sea?

Han Fei looked around, but unfortunately, he didn't see any creatures like spiritual beasts or Companion Spirits.

Just as Han Fei curiously wanted to continue watching for a while, a faint voice sounded in Han Fei's ear. "Welcome, Eternal."

Han Fei suddenly turned around and saw a young man standing on a tree trunk looking at him with a smile.

Han Fei couldn't see through the other party's strength, but his strength couldn't be bad.

Han Fei asked, "An Eternal? I've never heard of them. Are they very powerful?"

The young man smiled faintly. "Powerful or not powerful, this is a very ambiguous description. According to the current strength standards in the Sea Realm or the Sea of Stars, the Eternal Clan is indeed quite powerful. Do you want to become an Eternal?"

Han Fei asked, "What's the benefit of becoming an Eternal?"

The young man smiled and said, "You will never die and live as long as the world."

It wasn't that Han Fei didn't believe this young man, but he directly asked a question. "Under the invasion of the ominous, all races will be destroyed. How can the Eternal Clan be spared?"

The young man said indifferently, "The ominous can never touch the Eternals."

B*llshit.

Han Fei sneered in his heart. He didn't believe this nonsense. Even the Three Temples, including the Eldest Senior Brother, didn't dare to say that they could defeat the ominous. The Eternals actually said that the ominous could never touch them.

Han Fei asked, "What are the conditions for joining the Eternals?"

The young man smiled. "Cut off all your ties to the world, get rid of the shackles of the body, and embrace eternity with your soul."

There seemed to be a great magic in the young man's words. Even Han Fei was a little moved by his impassioned words.

Han Fei sneered. "Get rid of the shackles of the body? Heh, without the body, what's the point of the soul?"

"Superficial."

The young man was not angry but said calmly, "An eternal soul can simulate a body with a thought. The physical body is nothing more than an appendage that can be summoned and dismissed at will."

"Heh!"

Han Fei couldn't help but roll his eyes. "Since you are so strong, why do you want me to join you? I'm afraid I'm too weak for your illustrious race."

The more this young man talked, the more ridiculous he became. He was simply a lunatic. Simulate all races with a thought? Who the hell did he think he was?! With billions of bloodlines and billions of body structures, how could he simulate so easily?

However, the young man smiled casually. "It's not that we want you to join us, but that a wisp of your consciousness appeared here. You can consider it. Not everyone can come here."

Han Fei said, "Thank you for your kindness, but forget about joining the Eternal Clan. My six senses are not yet exhausted, my worldly desires are not yet fulfilled, and I'm too vulgar." ... Well, this is the Soul Sea, right?"

God of Fishing

Chapter 2970: Master of Time Temple, I'm Going to Chop You Off (2)

2970 Master of Time Temple, I'm Going to Chop You Off (2)

The young man said, "Yes, it's the Soul Sea."

Han Fei said, "Bye bye! I wish you eternal life in the form of the soul..."

In the Soul Sea, Han Fei had the experience of leaving. He wasn't worried that this young man would attack him, because this young man didn't have any killing intent. He seemed to just chat with Han Fei casually. If he didn't mention the Eternal Race, Han Fei really wanted to talk to him more.

However, Han Fei was still in the trial of the Thunder Note Ancient Temple. Although he didn't know how he came here, the trial was more important.

Sure enough, the young man didn't stop him. He just nodded casually. "If you regret it, you can come to the Bloodline Divine Tree to find me."

Buzz!

Han Fei drew a soul array and left decisively. Although the Eternal Clan was mysterious, he wasn't interested in it and was extremely disgusted at it.

He had long surpassed the stage of cultivating solely for the sake of seeking longevity. In his view, reaching the Immortal Level was only a matter of time, but could one really live forever by reaching the Immortal Level? Obviously not.

No matter how powerful an existence was, even the mysterious teacher from the Void Temple couldn't escape worldly affairs.. Furthermore, the Eternal Race actually asked to him abandon his body and embrace eternity with his soul. What a joke.

When Han Fei's soul left the Soul Sea, he appeared in a vast lightning bolt the next moment. He saw that his body was sitting cross-legged in the Lightning Pool. The thunder rumbled in the sky and kept striking at the Lightning Pool. However, no lightning struck his body.

However, he could clearly see that half of his body was almost covered in a blue lightning law.

"Not good. This lightning law is assimilating my body."

At this moment, Han Fei moved. The Lightning Pool was a good place, and the lightning liquid was also good. But no matter what, anything in excess was harmful. This lightning liquid was the essence of countless chaotic lightning. If one took away some of them, they were treasures, but if one bathed in the lightning liquid for a long time, his body would be assimilated by the law of lightning. When his body completely turned into the law of lightning, even gods wouldn't be able to save him. This was a thorough law transformation and he had become part of the heavens and earth.

However, compared to his body being almost assimilated by the lightning law, Han Fei discovered something else in shock. Here, the chaotic lightning rumbled nonstop. Although the target was all the Lightning Pools, logically speaking, it was impossible for his soul to leave his body in a place dense with lightning laws, right?

"My soul has finished the Law Fusion?"

"No! That's impossible. Even if one starts the Law Fusion, it has to be during the early stage of the Great Monarch realm. How could it be possible at the Carefree Level?"

However, at this moment, he had indeed developed an unknown level of immunity to the lightning law. If this wasn't Law Fusion, what was it?

Although Han Fei had doubts, he didn't dare to think too much. He hurriedly rushed into his body.

In the next moment, Han Fei suddenly opened his eyes in the Lightning Pool. His five senses returned, and the murmuring in his ears all disappeared.

Bang!

Breaking out of the Lightning Pool, Han Fei looked down. Below his waist, the law of lightning was densely packed.

"I can fuse laws, but the laws can't devour me. Green Jade Stone Bridge."

Han Fei was betting that the green jade stone bridge was not controlled by the Ancient God of Thunder Note's trial.

Then, a green jade stone bridge appeared. Han Fei stepped onto the bridge, jumped it off, and landed in the lake. On the entire lake under the green jade stone bridge, electric arcs flashed and lightning law spread.

However, these laws were dissipating at a visible speed, as if they were being absorbed by the river.

After a long time, Han Fei finally regained control of his body and let out a sigh of relief. It was too dangerous. No wonder Senior Brother Lei Heng said that he almost died here. If I had come to my senses a little later, or if I hadn't prepared enough energy crystals, I might have died here too.

Han Fei checked the remaining energy crystals and found that there were only 306 pieces left.

Gulp!

Even Han Fei couldn't help but feel a little scared. Fortunately, he had collected as many energy crystals as possible.

Buzz!

Han Fei reappeared. His heart did a flip. He didn't know if it was because the green jade stone bridge was his Original Great Dao or because the level of the green jade stone bridge was too high, so it exceeded the trial itself.

Without the green jade stone bridge, it would be difficult for him to disperse these lightning laws. After all, the power of the lightning laws had already exceeded the tolerance of his body and was beginning to melt it.

Only ten seconds after Han Fei came out, the lightning suddenly dissipated, and the Lightning Pool gradually turned incorporeal, leaving only a silent void.

"Trial-taker, congratulations on passing the fourth level of the trial, Thunder Note Soul Refining. Please go to the Thunder Abyss and complete the ultimate trial."

"The ultimate trial?"

The corners of Han Fei's mouth twitched. In the first four levels of the trial, Senior Brother Lei Heng had given clear guidelines for passing. However, he didn't mention the ultimate trial at all. There must be a reason why he didn't mention it.

As for the Thunder Abyss, a stone door had already appeared in front of Han Fei, which had just appeared out of thin air.

At this point, Han Fei had to go in no matter what. Since the first four levels of the trial didn't kill him, he had to try the ultimate trial.

Han Fei pushed the door open and entered, and dry, murderous, and ferocious vibes of ancient times hit him in the face.

Han Fei wasn't surprised at all. The inheritance of the Ancient God of Thunder Note was ancient and belonged to the primeval era.
