Chapter 3231: Stack Ten Thousand Laws (2)

In the end, a total of 391 queues appeared on the Path of Reincarnation, which meant that Han Fei had already stacked 391 laws.

Han Fei was overjoyed. This speed was not bad. At this speed, when these creatures stepped on the green jade stone bridge, walked to the Door of Rebirth, and began to reincarnate, in a year, it would be enough for more than ten billion creatures to enter the cycle of reincarnation.

However, Chen Lingsu shook her head. "Too few. How many creatures can enter the reincarnation cycle in ten thousand years with such few queues?"

Han Fei calculated with his fingers and frowned slightly. Chen Lingsu was right. Now there was a clear time flow on the Path of Reincarnation. At this speed, no more than ten billion creatures could enter the cycle of reincarnation in a year, and only a hundred trillion creatures could enter the cycle of reincarnation in ten thousand years.

This number sounded quite exaggerated. However, this was the reincarnation of all the creatures of all the races. In the Sea Realm, there were more than trillions of creatures. And this was only the Sea Realm. What about the Origin Grounds in the Sea of Stars or the various creatures that had been living in the Sea of Stars?

Therefore, Chen Lingsu's words were true.

Han Fei said, "For the time being, I can only broaden the Path of Reincarnation so much. Senior, I can let you stay here, but you can't cross the bridge. Once you cross the bridge, there's no turning back."

Chen Lingsu nodded slightly. "Thank you! Go about your business! I'll just wait here for a while. When no gods enter the cycle of reincarnation anymore, I will leave too."

Han Fei nodded slightly. With a thought from him, the river no longer absorbed divinity and laws from Chen Lingsu.

As for Han Fei, he didn't waste any more time. He jumped into the river, came to the bottom of the bridge, completely immersed in the water, and began to bathe and cultivate.

Since his law stacking could broaden the Path of Reincarnation, in order to release the souls of this massive number of creatures, he naturally began to stack laws.

Besides, his original law had been established. It was time for him to break through to the late-stage of the Immortal Level.

At the bottom of the water, Han Fei felt that infinite laws were surging into his body. There were so many of them that the number and kinds of the laws were far more than he expected.

"No wonder."

Han Fei immediately understood. No wonder Eldest Senior Brother said that after he established his original law, he could open the Path of Reincarnation. This was because once the Path of Reincarnation opened, he could stack the most laws in the shortest time.

Feng Yu had previously bragged to him that there were thousands of laws to stack. But now, there were more than thousands. As more and more people crossed the green jade stone bridge, the power of laws in the river became more and more intense.

Because of the clear flow of time, Han Fei could judge the speed at which he stacked laws. In just a month, the number of laws he stacked had reached 3,700.

Han Fei was confused. This law stacking speed was too unbelievable.

Just as Han Fei was about to continue stacking laws, he suddenly heard Chen Lingsu speak.

"How dare you, thieves of the Eternal Race? How dare you enter the Path of Reincarnation?"

On the Path of Reincarnation, Chen Lingsu's movements certainly couldn't escape his perception. Hearing Chen Lingsu mention the Eternal Race, Han Fei's heart trembled. The Path of Reincarnation had just opened, and someone from the Eternal Race had come over?

"God Slaying Arrow Chen Lingsu?"

"Is the opening of the Path of Reincarnation related to you?"

Chen Lingsu snorted. "Whether it has anything to do with me or not, since the two of you dare to enter the Path of Reincarnation, you're courting death."

The two of them looked at each other, and one of them said, "Chen Lingsu, on this Path of Reincarnation, you and I both don't have any strength left, but we only have spiritual treasures to protect ourselves. How can you stop us?"

Another person sneered. "Even if you're a god-slayer, you're just an ordinary person now. We have divine blood bestowed by the dominator on us. Even if you try your best, you won't be able to win. Therefore, I advise you to get out of the way."

"Interesting. Two gods, did you come here to die?"

At this moment, Han Fei's voice sounded leisurely.

Han Fei immediately jumped out of the river and appeared on the green jade bridge, his eyes slightly cold.

He saw that between the eyebrows of the two of them, a strange drop of blood was blooming, which could barely resist the suction power of the river.

The corners of Chen Lingsu's mouth curled up slightly as she said, "These two people are probably spies who want to enter the Path of Reincarnation to investigate. If they are left to their own devices, they will retain all their consciousness and enter the cycle of reincarnation. At that time, they might even lurk among the myriad races. At critical moments, they will definitely be traitors."

Seeing Han Fei jump out of the river, the two of them were immediately refreshed.

One of them's eyes flickered. "Did you open the Path of Reincarnation?"

The other person's body surged with divinity. They seemed to have plans to attack on the Path of Reincarnation.

Han Fei thought to himself, That's impossible! How can anyone who enters the Path of Reincarnation still have strength? If that's the case, wouldn't the dominator of the Eternal Race be able to kill me in an instant if he comes in person?

Besides, according to the rules he knew, on the Path of Reincarnation, their strength would be completely suppressed. At most, they could retain a trace of divinity. In other words, there was something wrong with the two drops of blood between their eyebrows.

With a thought from Han Fei, the river under the bridge surged and rolled towards the two of them.

However, under the scouring of the river, the two drops of blood actually erupted with dazzling light. It seemed to be a law, a law that could resist the rules of the Path of Reincarnation.

The two of them were shocked at first, but then overjoyed. One of them sneered. "Since you know our background, you should know that the Bloodline Divine Tree is comparable to the Path of Reincarnation. No matter who you are, you want to destroy us with the rules? Dream on. Let's go!"

[God of Fishing](#)

Chapter 3232: Stack Ten Thousand Laws (3)

The two of them ignored Han Fei's attack and rushed onto the green jade stone bridge.

Han Fei was puzzled. As the master of the Path of Reincarnation, doesn't he deserve some respect? When you were alive, you were gods. But don't you see what this place is? After you die, you still want to behave arrogantly and even attempt to break into the Path of Reincarnation? This is a little ridiculous.

Of course, he knew that the Bloodline Divine Tree was also quite extraordinary, but after all, the Bloodline Divine Tree was just a substitute for the Path of Reincarnation. Even if he couldn't completely control the Path of Reincarnation now, could the rules of a substitute really resist the basic rules of the Path of Reincarnation?

The moment the two of them stepped on the green jade stone bridge, their reflections were branded in the river. Han Fei could feel a large amount of the power of the law being washed by the river.

When they were halfway across the green jade stone bridge, the blood bead dimmed a little, but this thing didn't seem to be low-leveled.

Han Fei's face changed slightly. He really couldn't resist it? In that case, if that dominator-level powerhouse of the Eternal Race came, wouldn't he be unable to stop him at all?

The two of them descended the steps, and the power of the blood bead was only reduced by about half.

Immediately, Han Fei couldn't sit still anymore. How could he let this happen? Although he didn't mind a god-level soul body walking through the Path of Reincarnation with complete memories, this definitely didn't include the Eternal Race.

When the two of them were only two or three steps away from the ground, Han Fei finally took action. On the Path of Reincarnation, the power of all creatures was suppressed, but he was an exception.

At that moment, Han Fei activated his Original Great Dao and the Ragnarok, trying to penetrate their souls.

However, Han Fei was shocked to find that his strength couldn't shake the two of them. His strength was completely blocked by the divinity in the two drops of blood.

"Huh?"

The two of them looked nervous at first, but after seeing Han Fei's attack, they were relieved.

One of them said, "So you've only barely reached the combat power of a Great Monarch. You don't even have any divinity, but you still want to penetrate the soul of a god. You're really stupid."

Han Fei punched thousands of times, but it was useless in the end. He couldn't even weaken the blood bead.

One of them said, "Don't waste your effort. This power is the power of a dominator. How can you, a half-baked Great Monarch, shake it?"

The two of them looked even more relaxed. Although they were forced to enter the cycle of reincarnation, a moment ago, they were worried that they would be killed by the guardian of the Path of Reincarnation. But now it seemed that this mission was unexpectedly easy.

Besides, they had already memorized Han Fei's appearance. Once their memories were awakened, it would be only a matter of time before they found him.

"Dominator?"

Han Fei said ferociously, "Even if your dominator comes in person, he'll have to die here today."

Han Fei waved his hand, and the Law Enforcement Divine Chain spiraled out.

When the Law Enforcement Divine Chain appeared, the two of them finally changed their expressions.

"Law Enforcement Divine Chain?"

A fierce look flashed across Han Fei's face. "It's good that you know. Since you can block the Path of Reincarnation, let's see if you can block the Law Enforcement Divine Chain."

"Confinement!"

Anyone who was imprisoned by the Law Enforcement Divine Chain couldn't break free unless they were found innocent. Their body and soul would be completely imprisoned.

On the Path of Reincarnation, even a god's combat power was basically suppressed. It was almost impossible to avoid the Law Enforcement Divine Chain.

Therefore, when the Law Enforcement Divine Chain appeared, their expressions changed drastically.

The Law Enforcement Divine Chain didn't care if they were gods or ordinary people. It directly rolled up, not allowing the two of them to resist at all.

Han Fei sneered. "So what if you're gods? Since you dare to mess around on my Path of Reincarnation, be prepared to die."

Buzz!

The Creation Divine Prison immediately appeared above their heads.

However, when Han Fei saw the verdict that was shown by the Creation Divine Prison, he couldn't help but gape slightly.

Han Fei's voice was majestic. "I am the guardian of the Divine Prison, Han Fei, the god Bei Mu, the god Qian Xi. The two of you are sinners of the Eternal Race. You stole the fruit of the divine tribulation of all races and betrayed and coerced all races. You shall be... sentenced to death."

Han Fei couldn't help but feel a little excited. As expected of the Creation Divine Prison. These people might have had other sins, but the Creation Divine Prison didn't elaborate. They were directly sentenced to death. This was its punishment for traitors.

Without giving the two gods a chance to object, two blood-colored pillars of light descended from the Creation Divine Prison and enveloped the two gods.

The remnant souls of these two people were disassembling at a visible speed until they completely disappeared from the bridge.

Han Fei was slightly relieved. Fortunately, the Creation Divine Prison was in his hands. Otherwise, he really couldn't do anything to the two gods. However, this greatly increased his confidence. At least on the Path of Reincarnation, he was absolutely invincible. Even a God Slaying-level powerhouse couldn't resist him.

But if it was a dominator, Han Fei wasn't sure. If his enemy was really at that level, he wouldn't know if the Creation Divine Prison could suppress them.

After the two gods' souls completely disappeared, Han Fei didn't take back the Law Enforcement Divine Chain but said to it, "Now, I haven't completely controlled the Path of Reincarnation. Please help me guard it here. Suppress anyone with a drop of blood between their eyebrows like those two just now. These are all traitors of the myriad races."

[God of Fishing](#)

Chapter 3233: Stack Ten Thousand Laws (4)

Han Fei believed that the Eternal Race wouldn't send god-level powerhouses to the Path of Reincarnation again and again. However, he had to be careful.

However, if the Eternal Race didn't use the blood bead but used the Dao robes, Dao scrolls, and butterfly treasures of the previous gods, he couldn't do anything. This was because he couldn't use the Law Enforcement Divine Chain to detain every god. After all, few gods were innocent in front of the Law Enforcement Divine Chain!

If the Law Enforcement Divine Chain imprisoned and sentenced all gods, what was the point of opening the Path of Reincarnation?

Therefore, Han Fei knew that he could only take precautions first and bet that the Eternal Race wouldn't send another god-level powerhouse over for the time being.

...

Under the bridge, Chen Lingsu was still standing there. Han Fei sighed in his heart. Seeing Chen Lingsu, he inexplicably felt that this goddess was very similar to Ximen Linglan.

If he had a chance in the future, he would definitely help her find Li Daoyi.

Han Fei asked, "He hasn't come, has him?"

Chen Lingsu shook her head slightly, looking calm.

Han Fei comforted her. "Since he hasn't come to the Path of Reincarnation, he might not have died at all. Didn't you say that he went to a place? Perhaps that place exceeded the coverage of the Path of Reincarnation."

Chen Lingsu nodded and immediately said, "Is it resolved?"

"It's resolved."

Chen Lingsu said, "It's good that it's resolved. Although you are not weak and your combat power is enough, you are still relatively weak. The owner of the Demon Purification Pot, the master of the Path of Reincarnation, the guardian of the Creation Divine Prison, and the emperor of the human race... These identities decide that you can't be so weak. Become stronger quickly, or I'm afraid it will be too late."

Han Fei nodded slightly, paused, and finally said, "If he still doesn't come, you might as well enter the reincarnation cycle first. Perhaps after the reincarnation cycle, he will come to you before your memories are completely awakened."

Chen Lingsu smiled. "I hope so! I'll wait a little longer."

Han Fei didn't persuade her anymore and sank to the bottom of the river again.

A year later, the number of laws Han Fei stacked had reached more than 36,800. Han Fei felt that he might have completely turned into a law.

It had been less than three years.

Han Fei didn't care how many laws he could stack. He just kept stacking them. Since he had the conditions to stack infinite laws, why not?

If it were anyone else, they wouldn't have dared to hope for such a law stacking speed.

However, while stacking laws, Han Fei was also puzzled. What could he do with so many laws?

After stacking more than a hundred laws, the laws became incompatible. At this moment, Han Fei had stacked nearly a hundred thousand laws. If it weren't for the suppression of the law of life and the

power of death, he would have exploded long ago. Perhaps he would have transformed into the laws of the heavens and dissipated between the heavens and earth.

Buzz!

On this day, when Han Fei stacked as many as 100,000 laws, he suddenly felt that his body no longer absorbed laws. Even if the power of laws entered his body, it would immediately flow out of his body.

"Full?"

Han Fei was stunned. 100,000 laws was his limit?

At this moment, Han Fei felt that every cell and every drop of flesh in his body was fusing with the power of laws. It seemed that there were too many laws stacked, so many that any drop of his blood now contained infinite laws.

In fact, it could no longer be called blood, but the blood of laws.

"Not good! I'm going to make a breakthrough."

Han Fei felt that the energy in his body was rapidly consumed. Although the 100,000 laws were all suppressed, when the number of laws stacked reached 100,000, a new force seemed to be born. This power actually took the initiative to absorb the energy in his body.

Buzz!

Han Fei immediately stopped stacking laws. He knew that the opportunity had come, and he had stacked laws until he was about to make a breakthrough.

At this moment, Chen Lingsu was no longer in front of the green jade stone bridge, because no god-level powerhouses were reincarnating on the path anymore. Obviously, she couldn't meet the person she had been waiting for. In the end, she went to reincarnation with regret.

At this moment, there were as many as 100,000 queues on the Path of Reincarnation.

At this speed, about three trillion creatures would be reincarnated every year. This number was actually still not much. In the vast Sea of Stars, the birth of three trillion creatures every year was nothing.

However, Han Fei had no time to care about that now. The opportunity had come. He had to make a breakthrough now.

[God of Fishing](#)

Chapter 3234: Become a Great Monarch (1)

Han Fei left the Path of Reincarnation. When he reappeared in the Graveyard of Gods, it was already empty.

Suddenly, Han Fei's face changed slightly. Chen Lingsu and the others were really bold. They let him enter the Graveyard of Gods but didn't give him a way to leave it.

Did they know that he could use the Distanceless Gate?

He scanned around with his perception and found that Chen Lingsu's divine persona had disappeared, along with her bow. He couldn't help but wonder if one could take these treasures with them into the Path of Reincarnation.

He didn't want their treasures, but he was just curious.

After all, even if the bow was placed in front of him, he wouldn't take it. Chen Lingsu and the others had reincarnated. Once their memories were awakened or they weren't asleep, they would definitely find a way to get them back. They had already made a Creation Chessboard for him. He couldn't even dig out their roots.

Han Fei was about to summon the Distanceless Gate, but then he felt the summoning of the Creation Divine Prison.

With a thought, Han Fei entered the Creation Divine Prison.

As soon as Han Fei entered the Creation Divine Prison, he suddenly felt that a door appeared at the back of the Monarchs' Jail.

Suddenly, Han Fei thought of something.

Yes, when the Creation Divine Prison sentenced a god, he could enter the second level of the Creation Divine Prison.

Before Han Fei could walk to the second floor, he heard the old man's anxious voice.

"Han Fei, this door has been open for three years. Why didn't you come until now?"

Han Fei immediately said, "Senior, I'm at a critical period of breakthrough and very busy. I'm afraid I don't have time to chat at this moment. I'm going to make a breakthrough."

"A breakthrough? Didn't you just advance to the Immortal Level more than 300 years ago? How did you finish stacking laws so quickly?"

Han Fei said, "I got some opportunities. Senior, why are you in such a hurry to summon me?"

The old man's voice immediately buzzed. "Let me out! The door is open. Let me out quickly. I want to replenish the power of the bloodline for the divine descendants."

However, Han Fei didn't agree immediately. Instead, he said, "Senior, can you wait for me for a while longer?"

The old man asked, "What do you mean?"

Han Fei asked, "Senior, has your strength reached the God Slaying level?"

In the next moment, the ferocious old man's voice sounded, "He's just a god. Although he has reached the peak of the god level, he's still a little away from the God Slaying level."

The old man seemed a little angry. "After so many years in the Creation Divine Prison, I've already gained many insights about cultivation. Once I come out, fast as a hundred years, slow as a thousand years, I will definitely enter the God Slaying level."

Han Fei said, "Senior, then you haven't reached the God Slaying level yet, right? Think about it. If anything happens to you, who will restore the bloodline of the divine descendants?"

"Uh ~ Will anything happen to me? Who will know that I'm going to restore the bloodline of the divine descendants?"

Han Fei said, "Senior, the Creation Divine Prison has been exposed. No one is stupid. They know that the Creation Divine Prison has the ability to restore the bloodline of the divine descendants. After you come out, if you rush to the West Wilderness in a hurry, it's easy for others to intercept you. After all, times are different. After you go out now, you might not even be able to tell the directions. Therefore, once something happens to you, the divine descendants will really be doomed. So, Senior, why don't you wait a little longer? When I finish the breakthrough, I will go to the West Wilderness and help you solve the matter of the divine descendants."

The old man fell silent, and for once, Old Fierce didn't flare up. "This kid makes sense."

The old man seemed to understand the key. "I can wait, but Han Fei, since the Creation Divine Prison has appeared, aren't you afraid that you will be caught?"

Han Fei smiled. "Then I'll send two gods to accompany you."

After a casual chat with the old man, Han Fei left the Creation Divine Prison. Although he didn't know what the Sea Realm was like now, it had been three years since the opening of the Path of Reincarnation. He didn't know how many people had transcended the divine tribulation during this period, but he knew that there would definitely be many.

Therefore, it was meaningless for him to release a god now, and he couldn't control it.

After summoning the Distanceless Gate and leaving the Graveyard of Gods, Han Fei promised to kill 30,000 ominous creatures and then entered his own Origin Star.

As soon as Han Fei entered his Origin Star, with a crack, it seemed that some barrier had been cleared. At this moment, Han Fei knew that he had stepped into the late-stage of the Immortal Level.

However, the changes in his body didn't stop.

Endless energy from his Origin Star surged into his body crazily. The spiritual energy, Immortal Qi, and Chaotic Qi here drilled into his body as if they were free. As soon as this energy entered his body, most of it was absorbed by his flesh and blood, and some turned into power to strengthen his soul.

This absorption lasted for three years. On Han Fei's Origin Star, nearly half of the surging spiritual energy river had been exhausted, and the spiritual fruits here had all disappeared. At this moment, he was surrounded by more than ten thousand refined stars and hundreds of thousands of level-four energy crystals.

This was already Han Fei's last resource to refine the stars. He didn't expect that his resources were almost used up.

After all, most of the resources he had were snatched from the Origin Stars of Great Monarchs. In the past, this was indeed a lot of resources. However, he was only one step away from the Great Monarch realm now, so it was normal that these resources were not enough.

[God of Fishing](#)

Chapter 3235: Become a Great Monarch (2)

Fortunately, he had a lot of reserves. When the last batch of refined stars was about to be exhausted, he finally stabilized the 100,000 laws.

Gradually, Han Fei discovered that the superimposed laws seemed to have undergone a qualitative change. Some power at the level of the World Origin appeared in his body. It was like a primitive land that was supported by World Origin. Now, original power was continuously appearing in his body.

Besides, his bone marrow seemed to have undergone a qualitative change. It could actually give birth to Chaotic Qi on its own. He didn't know what he was now. The Bone of Chaos?

As the law in his body continuously produced original power, Han Fei felt that the entire Origin Star was trembling slightly, and the original power in his body was dissipating out of his body.

"That's not right. How can original power be born in my body?"

With the birth of the original power, Han Fei felt that he seemed to have been strengthened in all aspects. He couldn't help but look at his information, only to be shocked.

Owner: Han Fei

Level: 118 (Immortal Level)

Bloodline Ranking among the Clans in the Infinite Ocean: the 7,001st

Immortal Qi: 129

Soul: 4,999 Origins

Strength: 4,999 star powers

First Spiritual Heritage: Origin Spiritual Heritage

Second Spiritual Heritage: Eternal Darkness Spiritual Heritage

First spiritual beast: Twin Yin-Yang Sky Swallowing Fish (Level 118)

Second spiritual beast: The Emperor Sparrow (Level 116)

Main Art: Godfiend Body

"Well..."

Even Han Fei was dumbfounded. His basic strength had soared by 2,000 points? Had he reached the end of the Immortal Level?

Han Fei knew that from this data, it could be known that it couldn't be as simple as him breaking through to the late-stage of the Immortal Level. The resources in his Origin Star had almost been exhausted by himself and even gave birth to a large amount of original power. How could it be possible that he had only broken through a small realm?

The Immortal Level cultivators would experience three changes. The first was that all laws would change. When the number of stacked laws exceeded a hundred, the laws would fuse but it would be difficult to control them. Therefore, they needed to establish their original laws and use their original laws to suppress the stacked laws.

Ever since he comprehended his original law, Han Fei had already known how to pass the late-stage of the Immortal Level, which was to explore and perfect his original law.

However, he was different from others. The original law established by others actually still had many gaps. However, he directly transformed the Dew of Origin into an original law. It was the most comprehensive original law from the beginning. This meant that he didn't have to be like the crown prince of the Divine Capital who kept his strength at the late-stage of the Immortal Level and slowly studied his original law.

Therefore, the moment he established his original law, it would already be no problem for him to pass at the late-stage of the Immortal Level.

However, why did his body produce original power when it was supposed to accumulate strength? If the birth of original power was related to the original law, his body should have produced original power long ago, not now.

Unless it was because of his cultivation technique.

Sea of Stars.

Han Fei took out the altar of the God of War.

The fire curtain soared into the sky, and the God of War sent a message first. "Han Fei, why haven't you gone to the West Wilderness yet? I heard that there have been several divine battles in the West Wilderness. Where have you been?"

Divine battles? Han Fei's heart stirred. "Who fought whom? Who won?"

God of War: "The gods of the Central Sea Divine Realm and the bandit god of the West Wilderness. I wasn't there, so I don't know the details. However, you seem to be targeted. Because I helped you, it led to the retaliation against the Wild Ancient Race in the West Wilderness, their own territory."

"Oh? Really?"

Han Fei frowned slightly. The outbreaks of divine battles meant that the Central Sea Divine Realm couldn't wait to harvest the Primordial Divine Race.

As for why they were targeting the Wild Ancient Race because of him, Han Fei's face turned cold. His identity had probably been exposed.

There was no doubt that there was only one person who could reveal his identity, Jiang Buyi.

Han Fei collected his thoughts. "Senior God of War, don't worry about these things for now. I'll take care of them. Let me ask you something first. After establishing the original law and stacking enough laws, my strength has entered the late-stage of the Immortal Level. But why is original power produced in my body?"

The God of War seemed to be stunned for a few seconds before he sent a message. "Can you produce original power now?"

Han Fei nodded. "Yes!"

God of War: "It seems that in the past three hundred years, you have stacked many laws! Do you think you shouldn't produce original power now?"

Han Fei asked, "Should I?"

God of War: "Under normal circumstances, only peak-level Great Monarchs or even gods can produce original power. The reason why you can produce original power now is naturally because of the Supreme Divine Technique. You came to ask me because you've actually guessed that it's the problem of the technique, right?"

Han Fei thought to himself, It's indeed because of the Supreme Divine Technique.

"So, late-stage Immortals shouldn't produce original power, right?"

The God of War replied, "Of course. In fact, there are no precise small realm divisions at the Immortal Level. It's because the laws you stacked are conflicting, so it requires the establishment of the original law to suppress them. The entire process is clear. How can it produce original power?"

Han Fei asked, "Then what's my situation now?"

God of War: "Your current situation is special, not because you're special, but because the Supreme Divine Technique is. You asked me before if the Supreme Divine Technique was as simple as constantly compressing the Star Core. In fact, of course, it's not that simple. Otherwise, how could this technique become the first cultivation technique on the God Roll of the human race? The Supreme Divine Technique can borrow ten thousand techniques and laws to help one cultivate. For others, only by fusing laws can they advance to the Great Monarch realm. However, for the Supreme Divine Technique, there is another path."

God of Fishing

Chapter 3236: Become a Great Monarch (3)

"Another way?"

Han Fei opened his mouth. This was the first time he had heard that one could advance to the Great Monarch realm without Law Fusion.

God of War: "Don't be surprised. The other path I mentioned actually contains the process of law fusion. Therefore, it doesn't abandon law fusion."

Han Fei raised his eyebrows. "Isn't that more difficult than law fusion?"

God of War: "No, it's simpler."

Han Fei was lost for words. "It contains law fusion and it's simpler?"

God of War: "Don't doubt it. The most difficult part of the Supreme Divine Technique is to become a god. I've been stuck here for countless years. This thing is a thousand times more difficult than law

fusion. So it's only natural that it's easier for you to break through to the Great Monarch realm with this technique!"

Han Fei asked, "Then what's the other path?"

God of War: "Hehe... We are different from others. Others borrow 100 million stars to provide power to their Origin Stars, but we constantly compress our Star Cores and strengthen our Origin Stars. Therefore, our Origin Stars are not comparable to other people's Origin Stars at all. Are you really not tempted by having such a powerful Origin Star?"

"Huh? What do you mean?"

There seemed to be a hint of playfulness in the God of War's tone, which gave Han Fei a strange feeling.

The God of War replied, "Have you ever thought of fusing your Origin Star?"

Han Fei: "..."

Han Fei seemed to think of something but wasn't sure. "Do you mean refine?"

"Refine my ass. Fuse it."

Buzz!

Han Fei felt his scalp tingle. It was such a crazy idea to fuse his Origin Star that he had been building all his life.

Han Fei fell silent and didn't respond until a long time later. "Is it too late for me to switch to other techniques now?"

God of War: "I knew you were thinking too much. When I say fuse your Origin Star, I don't mean shatter it and completely fuse it. Instead, I mean refining it into a part of your body, yet making it independent of your body."

Han Fei asked, "Isn't that refining a star?"

God of War: "That's bulls * it. Refining a star is directly refining your Origin Star into a bead. From then on, it'll lose contact with your original body and can only provide a certain amount of strength to your original body. However, fusing your Origin Star won't affect the subsequent strengthening of your Origin Star. The two are fundamentally different."

Han Fei asked, "So, what's the benefit of fusing it?"

The God of War instantly replied, "Hehe, when you transformed your Origin Star into a star, what form did the ground veins created by your Origin Star take?"

Han Fei said, "With the Star Core as the core and the ground veins as the meridians."

God of War: "What if the ground veins and your spiritual heritage fuse, the Star Core and your heart fuse, your flesh and blood fuse with the star land, and your laws fuse with the Heavenly Dao rules of the Origin Star... What do you think will happen?"

Han Fei felt his heart skip a beat, and his tone couldn't help but accelerate. "The star is me, and I am the star. I can easily unleash the power of a Star Bead strike. I can completely mobilize all the power of my Origin Star, and my strength will soar. Therefore, the original power I produce can also be used to promote the growth of all things in my Origin Star, and my laws... fuse into all things in my Origin Star..."

The God of War asked again, "Look, you're not stupid. Isn't this also a way to fuse laws? And it's stronger than pure law fusion."

Han Fei's eyelids twitched. "So... once I fuse my Origin Star, I'll directly cross the late-stage of the Immortal Level and advance to the Great Monarch realm?"

"No, you only need to fuse a part of your Origin Star to advance to the Great Monarch realm."

Han Fei was shocked. "Doesn't that mean that everyone can do this?"

God of War: "Are their Origin Stars as strong as ours? Their path is to constantly mold stars and provide power to their Origin Stars. We are different. Our Origin Stars are countless times stronger than theirs."

Hearing what the God of War said, Han Fei understood. There was nothing wrong with what he said.

The God of War put on a praising smile and said, "However, in my opinion, this doesn't mean much to you. Even if you advance to the peak of the Great Monarch realm, so what? The bottleneck of the Supreme Divine Technique isn't here in the first place, but how to become a god."

Han Fei said, "I'll consider becoming a god only after I become a peak-level Great Monarch. It's meaningless to think about this now. Then how should I fuse my Origin Star, Senior God of War?"

"Do you want me to feed rice into your mouth?"

Han Fei said, "When I become a god, I'll feed it back to you, Senior God of War."

God of War: "..."

The God of War was silent for a few seconds. "Everyone has different ways of fusing their Origin Stars. Mine is to mold the ground veins into a weapon and fuse it with myself as a tool, but this might not be the best way. You can study it yourself."

Han Fei frowned slightly. He didn't really want to ask the God of War about the way to fuse with his Origin Star. In fact, he already had an idea in his heart. He just wanted to learn some experience from the God of War.

However, the God of War's answer was completely different from his train of thought.

Seeing that Han Fei was silent, the God of War changed the topic. "Why don't you go to the West Wilderness first? Fusing your Origin Star can't be done overnight. It took me more than 30,000 years."

Han Fei said, "Senior, don't worry. I know what's going on in the West Wilderness. By the way, Senior God of War, do you know if there are any standards for the soul or strength of a Great Monarch?"

The God of War's response was equally fast. "5,000 Star Powers, or 5,000 Origins of Soul Power, is the minimum standard for a Great Monarch."

[God of Fishing](#)

Chapter 3237: Become a Great Monarch (4)

Han Fei raised his eyebrows. "Basic combat power?"

"Of course. If a Great Monarch needs a secret method to improve his strength to this level, what kind of Great Monarch is he?"

"What about the upper limit?"

God of War: "100,000 star powers, or 100,000 Origins of soul power."

"How much?"

Han Fei was dumbfounded. Was 5,000 and 100,000 on the same level?

God of War: "Generally speaking, the lowest limit is only for people who have just entered the Great Monarch realm and have reached the limit of their potential. After advancing to the Great Monarch realm and stabilizing their foundation, one can probably reach 10,000 star powers or 10,000 Origins of soul power."

Han Fei frowned, thinking that ten thousand was not a lot!

The God of War continued, "According to the degree of law stacking, the degree of law fusion is different. Most Great Monarchs' basic combat power will be between 10,000 and 30,000. If they unleash a secret technique, it can reach between 30,000 and 80,000. I'm talking about most people. When these people cultivate to the peak of the Great Monarch realm, their basic combat power can at most reach 50,000. It's almost impossible for them to exceed this number."

Han Fei asked, "What about a small number of people? For example, Extreme Dao cultivators."

God of War: "Extreme Dao Great Monarchs, just double it. The limit of the basic combat power of an Extreme Dao Great Monarch is at most 100,000. So far, no one has exceeded 100,000. Anyway, I've never encountered one. However, the tolerance of an Extreme Dao Great Monarch is much higher than that of ordinary Great Monarchs. They can carry a powerful secret technique and unleash 200,000 or even 300,000 points of power. However, to be honest, very few people can reach the peak of the Extreme Dao."

Han Fei's eyelids twitched crazily, and he immediately felt that his 5,000-level combat power was simply trash!

Han Fei couldn't help but ask, "Senior God of War, then you should have reached 100,000 basic combat power, right?"

God of War: "Hehe, you'll find out when you become a Great Monarch."

Han Fei thought to himself, Is there a need to keep me in suspense?

However, he didn't care. The strongest Great Monarch had two or three hundred thousand combat power. What about the gods? Han Fei immediately asked.

The God of War replied, "A minimum of 400,000, with no upper limit. However, you can't calculate real combat power with this alone. The strength has to be related to your Great Dao, your laws, your cultivation techniques, and so on."

The corners of Han Fei's mouth twitched. He had to have the basic combat power first. Otherwise, with his 5,000 combat power, even if he could unleash ten times his combat power, it would only be 50,000. Compared to an Extreme Dao Great Monarch, he was much weaker.

No wonder the god didn't even need to attack him. With a casual wave of his hand, he could force him to use the Great Dao of Life Replacement.

After chatting with the God of War for a while, Han Fei returned to his Origin Star but didn't go to the West Wilderness immediately. The Path of Reincarnation had opened, and the Great Monarchs of the Sea Realm should have discovered it by now. Therefore, in the past hundred years, the capable Great Monarchs would probably lie low and survive the divine tribulation before reappearing.

Therefore, the people who were causing trouble in the West Wilderness were either Great Monarchs who were not at the peak or gods.

He couldn't control the battles at the level of gods for the time being. He could control the Great Monarchs who weren't at the peak, but he wasn't a Great Monarch after all. Even if his strength had soared, he had to activate his Original Great Dao to resist an ordinary Great Monarch.

Therefore, his current limit of combat power was that of an ordinary Great Monarch. With this strength, he would probably suffer a loss if he participated in the matters of the divine descendants.

Therefore, as soon as he entered his Origin Star, Han Fei immediately sat cross-legged and began to fuse with his Origin Star.

As for how to fuse them, Han Fei certainly wouldn't learn from the God of War. The God of War had refined the ground veins into weapons. Although they were powerful, weapons were external objects after all, as if he was wearing a battle suit. If he was very strong in a battle suit, what if the battle suit was gone? Wouldn't his strength plummet?

The best way was to really fuse with his Origin Star. As for how to fuse with it, he had mastered the law of life, so he could actually give this star life.

At that time, he could use his Origin Spiritual Heritage to interweave the life power of the star ground veins and achieve a life resonance, which was equivalent to slowly transforming into this star itself.

If Han Fei guessed right, the God of War should want to do the same, but he hadn't mastered the Great Dao of Life, so he couldn't do it at all.

Han Fei didn't delay. He had left the Sea Realm for too long and was extremely short of resources. He had to improve his strength and leave his Origin Star quickly.

However, Han Fei didn't dare to fuse with the Star Core at first. The Star Core of his Origin Star had been compressed for countless years, and its power was already extremely terrifying. With his current physical state, he definitely couldn't withstand it.

Therefore, he could only start from the ground veins first. When he was in the star transformation stage, the ground veins were molded based on his spiritual heritages.

Therefore, when Han Fei injected a tremendous amount of vitality into the ground veins, in a moment, the ground veins of his Origin Star seemed to come back to life.

It was also at that moment that Han Fei could feel that his life was converging and interweaving with the river of life in his Origin Star.

At that moment, Han Fei's consciousness fused with his Origin Star and turned into the law of the Heavenly Dao. And the original power born in his body began to dissipate from his body.

In the blink of an eye, everything grew. His Origin Star seemed to be active and began to automatically absorb the power of chaos from the Sea of Stars.

Fusion was a relatively long process. While fusing with the ground veins, Han Fei was the first to feel the effect of the Great Dao of Strength and the law of strength. This was one of the basic laws of the stars.

It was precisely because the law of strength was everywhere that Han Fei entered the Immortal Level with the law of strength. He didn't expect to advance to the Great Monarch realm with the law of strength too.

However, this was a star after all. It was not easy for him to give life to such a huge star.

...

A thousand years later.

When the river of life of the last ground vein converged with the river of life of his original body.

Crack~

A crisp voice sounded.

Han Fei felt refreshed. The power of his soul seemed to explode and turn into a soul sea. Laws seemed to be penetrating his body. He no longer needed to deliberately operate the laws, but laws would be born with a raise of his hand.

Clatter ~

In his Origin Star, the Chaotic Qi absorbed in the past thousand years, the nearly half-depleted spiritual energy river flowing on the star, and the remaining more than 10,000 refined stars and level-four energy crystals were all injecting a large amount of energy into his body at this moment.

In the past year, on his Origin Star, the spiritual energy river had dried up.

Another five years later, the Chaotic Qi was drained.

Another thirteen years later, tens of thousands of refined stars were all dead, and the energy crystals were exhausted.

However, this was far from enough. With a thought from Han Fei, he immediately appeared in the Sea of Stars, held the token, and shouted, "Old Distanceless, open the door."

[God of Fishing](#)

Chapter 3238: West Wilderness, Here I Come (1)

The Distanceless Gate appeared and wrote, "Where are we going? The Sea of Stars is in chaos. I'm very busy now. Can you kill more ominous creatures at a time?"

Han Fei raised his eyebrows. "The Sea of Stars is in chaos?"

Han Fei said, "I called you here to kill the ominous. I'll increase the number to 50,000, but no more."

Han Fei didn't mind raising the number for the Distanceless Gate, because he desperately needed energy crystals. After this breakthrough, all his resources had been squeezed dry. Only then did he know that resources were never enough.

Now, he had consumed so many resources just to break through to the Great Monarch realm. What if he broke through to the god realm? The resources needed would probably be astronomical.

Now was the time when he needed the Distanceless Gate. If he had another conflict with it, it wouldn't do him any good. Even if he couldn't kill so many ominous creatures, he could put it on credit, right? Anyway, he would have to kill many ominous creatures in the future.

Hearing that Han Fei was going to kill the ominous, the Distanceless Gate immediately opened.

Swish ~

When Han Fei appeared in this Sea of Stars, he was dumbfounded. This was not any place he knew, but an ominous battlefield somewhere in the Sea of Stars.

At this moment, on this battlefield, there were as many as 30,000 Monarchs and more than 500,000 Sky Openers. In addition, Han Fei saw more than 500,000 prehistoric ancient creatures surrounding the law of time, including as many as 30,000 Monarchs.

"60,000 Monarchs and a million Sky Openers."

However, opposite them, on this battlefield, there were as many as two or even three million ominous creatures. Anyway, at a glance, countless ominous creatures were withering, but this scene was really huge.

Yes, this was already a large-scale battlefield. Although the scale was not as large as the place guarded by the Hidden Monarch City, it was not much worse.

At this moment, the creatures wrapped in the law of time were at the forefront, and all kinds of purification techniques bloomed in the Sea of Stars. These ancient creatures were quite strong and fearless of death. With them at the front, they shared the huge pressure on the normal front line army.

If the scene of millions of soldiers fighting fiercely was shocking, then in the distance, Han Fei saw a huge figure hundreds of thousands of feet tall, with eight huge hands in front of him, each holding a blade that looked like a starlight.

In front of him, Han Fei saw two doomsday-level ominous creatures.

Yes, Han Fei was sure that it was a doomsday-level ominous creature. He had seen doomsday-level ominous creatures on the battlefield in the Hidden Monarch City.

On another battlefield, Han Fei saw a female Monarch standing on an ancient phoenix. But in front of her, in the endless time chains and time cage, there were two doomsday-level ominous creatures trapped.

A divine battle?

Even the Time Temple participated in the front line battlefield?

Han Fei couldn't help being shocked. This was also a battlefield guarded by gods.

He couldn't help but want to take a look at the Distanceless Gate, thinking to himself, I only need to kill 50,000 ominous creatures, but you sent me straight to the front line battlefield.

Buzz!

Few people noticed Han Fei's sudden appearance.

However, the god-level powerhouse and the female monarch of the Time Temple both noticed him, including some Great Monarchs in the battle.

"The Distanceless Gate?"

The god was puzzled. Although the pressure on his front line had increased greatly recently, he didn't ask for reinforcements! Besides, even if you guys sent strong masters to help, at least send a few more, okay? There was only one Great Monarch, and his aura was so unstable. He seemed to have just broken through to the Great Monarch realm.

The god shouted, "You've just made a breakthrough and haven't stabilized your strength yet. Why are you here?"

Han Fei cupped his hands slightly. "Senior, I've just made a breakthrough and didn't have enough resources, so I asked the Distanceless Gate to send me to an ominous battlefield. I need to obtain some energy crystals. Sorry to disturb you..."

The god, the other Great Monarchs here, and even the female monarch of the Time Temple were speechless.

You came to the battlefield to obtain energy crystals at the critical moment when you had just broken through to the Great Monarch realm and were stabilizing your cultivation? How many ominous creatures could you kill? How could a hundred or a thousand energy crystals be enough?

The god frowned slightly, thinking that at least he was a Great Monarch. He was about to give out some energy crystals, but in the next moment, the pupils of this god and the female Monarch were constricted in shock.

The moment Han Fei finished speaking, he had already entered the battlefield. Not only did he enter the battlefield, but he also crossed the front line of the resurrected ancient creatures and went straight to the ominous army.

The female monarch shouted, "Are you crazy?"

However, the god didn't say anything, because he found that Han Fei seemed a little abnormal. His speed was too fast. He had just broken through to the Great Monarch realm and hadn't had the time to consolidate his strength, but in terms of speed, he had already surpassed many Great Monarchs. This clearly didn't make sense.

Sure enough, in the next moment, a dense army of ominous creatures rushed over. Eight small vines extended from between Han Fei's eyebrows.

Swish! Swish! Swish!

The Demon Purification Pot's divine vines were like chains. Any ominous nailed through by them would definitely die.

"Demon Purification Pot?"

The god's heart trembled. He had heard that the Demon Purification Pot had appeared, but he didn't expect to see it here.

[God of Fishing](#)

Chapter 3239: West Wilderness, Here I Come (2)

As for the female Monarch of the Time Temple, her eyes lit up. "Human Emperor Han Fei?"

She didn't know why Han Fei suddenly appeared here, but she knew that more than 800 years ago, Han Fei hadn't proved Dao yet. But in just 800 years, he had become a Great Monarch?

"No wonder. No wonder Ximen Linglan took a fancy to this person and waited for him for her entire life. Such talent is indeed extraordinary."

As for the others on the battlefield, they were dumbfounded. They were not in the Sea Realm, so they didn't know Han Fei's legend. They were just horrified. Why did someone take the initiative to enter the ominous pile?

Some Monarchs recognized the Demon Purification Pot and were shocked. Those who didn't recognize the Demon Purification Pot were even more shocked.

Han Fei sat cross-legged. In the blink of an eye, hundreds of energy crystals were sucked to his side.

"Huff~"

When the Chaotic Qi and ownerless souls in the energy crystals surged into his body crazily, Han Fei finally took a breath of relief.

Energy crystals surrounded Han Fei one after another.

Roar!

"Kill him."

The two doomsday-level ominous creatures that were fighting the god roared in succession.

Doomsday-level ominous creatures were already gods in terms of strength. They were no longer unconscious ominous creatures. They might even know the secrets behind the ominous.

Therefore, when they saw the Demon Purification Pot appear, they desperately sent a large number of ominous creatures to pounce at Han Fei.

This was because they knew that the Demon Purification Pot was not complete yet. With the advantage in number, it was completely possible for them to crush Han Fei.

However, the two doomsday-level ominous creatures, including the world-ending-level ominous creatures equivalent to Great Monarchs, had no intention of charging at Han Fei in person.

At least, when the Demon Purification Pot was at its strongest, they were not stupid and knew that they would be courting death if they went there.

A large number of corruption-level, terrifying-level, and destruction-level ominous creatures rushed at Han Fei as if they were not afraid of death.

"Puff! Puff! Puff!"

Ominous creatures were pierced and turned into energy crystals one after another.

At that moment, there were probably hundreds of thousands of ominous creatures surrounding Han Fei on this battlefield. Ordinary people couldn't see Han Fei at all. They only knew that he had been drowned and were utterly shocked.

In just an hour, as many as 50,000 ominous creatures had turned into energy crystals. Because not all the ominous creatures besieging Han Fei were destruction-level, including a large number of corruption-level and terrifying-level ominous creatures, the Demon Purification Pot didn't stop killing.

It wasn't until nearly 80,000 ominous creatures died under the Demon Purification Pot that the Demon Purification Pot finally couldn't continue to kill the ominous creatures. At this time, with swishes, a large number of world-ending level ominous creatures rushed at Han Fei.

Seeing this, the expressions of the god-level powerhouses and the female monarch of the Time Temple changed. The Demon Purification Pot hadn't been fully restored. Although its combat power was powerful, there would always be a time when its strength was exhausted. Han Fei was surrounded by so many ominous creatures, so they certainly couldn't sit idle.

Although Han Fei accidentally broke into this place, as the owner of the Demon Purification Pot, he was destined to be extraordinary. It would be a pity if such a person died here before he grew up.

Immediately, the god exerted his strength and slashed out a flashing knife net with the Star Long Knife. The divinity in his body spewed out, and the laws of the heavens flowed parallel, directly turning this place into a God's Knife Domain.

Instantly, a doomsday-level ominous creature was shattered by the interweaving purification knife light.

The Female Monarch of the Time Temple also began to reel in the net. Behind her, a time tide rolled. From the tide, an abyss opened its mouth and covered the Time Cage.

Two doomsday-level ominous creatures disappeared under this huge abyssal mouth.

The female monarch said to Han Fei via voice transmission at the same time, "Hold on."

In fact, both this god and the Female Monarch of the Time Temple had the means to kill doomsday-level ominous creatures. However, they were unwilling to kill them.

This was because this was a protracted war. If one was killed, another would appear from the ominous to maintain the balance of this battlefield.

If the two parties fought too fiercely and the myriad races killed the doomsday-level ominous creatures in a row, it was very likely to turn this ordinary battlefield into a super-large battlefield.

Then, they would have to ask for reinforcements from other battlefields.

Therefore, unless it was absolutely necessary, the god here was unwilling to break the balance here.

However, Han Fei said leisurely, "Don't worry about me."

"Huh?"

The eight small vines of the Demon Purification Pot pierced through many world-ending level ominous creatures again with puffs. And these penetrating ominous creatures miraculously failed to regenerate.

"Can the Demon Purification Pot still work?"

"No, the law of life there has disappeared."

The god was the first to react. It seemed that the area where Han Fei was couldn't be connected to the River of Life. Therefore, as long as these ominous creatures were pierced by the Demon Purification Pot, they couldn't revive.

"The law of life?"

The god was shocked. This was the first time in his life that he had seen someone walk this law. Could the River of Life be related to laws?

As for the Water Monarch of the Time Temple, she was shocked. The law of life? How did this guy do it?

It wasn't that no one in the Time Temple tried to master the law of life, but no one could reach the River of Origin, so they felt that the law of life was a law that was impossible to master.

[God of Fishing](#)

Chapter 3240: West Wilderness, Here I Come (3)

However, today, she was shocked. No wonder this person could become a disciple of the Void Temple. Sure enough, everyone who became a disciple of the Void Temple was extraordinary.

"Puff! Puff! Puff!"

In a moment, thousands of ominous creatures were penetrated and turned into energy crystals.

Han Fei thought that he could continue to fight for three days and three nights. However, at that moment, in the ominous mist, several huge sharp claws extended out.

The expression of the god here changed. "Not good. In the mist, a higher-level ominous creature has noticed the changes here."

The female monarch of the Time Temple shouted, "Everyone, retreat within the front line."

Then, the huge mouth in time spewed out a terrifying power dozens of times stronger than Star Explosion, which went straight at the terrifying claw and blew up tens of thousands of ominous creatures along the way.

As for the god, he slashed eight times in a row, directly piercing through the circle of ominous creatures that wrapped Han Fei.

He shouted, "Boy, leave immediately. Your existence will only attract more and stronger ominous creatures. I'll give you the energy crystals you want."

The god threw a small world to Han Fei.

Han Fei took the small world. Before he had the time to thank him, he heard the female monarch say via voice transmission, "Human Emperor, the ominous is counte-rattacking now. It seems to be powerful, but it's actually still at the level of testing. They are testing the combat power of the defense line on the battlefield of the myriad races. Your appearance broke this balance. The ominous also has intelligence. With you around, the ominous' attention will be on you. Therefore, you have achieved your goal. You can leave now."

"Uh ~"

Han Fei was stunned. In the past, he had killed nearly 200,000 ominous creatures in the Chaotic Ice Domain one after another, but no powerful ominous creatures came to cause trouble for him.

Now, just appearing here had attracted an extremely terrifying existence.

Although Han Fei was unwilling to give up, he still stopped. With a few flashes, he left the battlefield. In the next moment, the Distanceless Gate appeared in front of him.

Han Fei cupped his fists. "Thank you for your generosity, Senior. I'll repay you when I have a chance in the future."

Without hesitation, Han Fei stepped into the Distanceless Gate.

"Send me to the West Wilderness."

...

Swish ~

When Han Fei appeared again, he felt a sandstorm, which made Han Fei immediately experience the feeling of the Storm Quicksand Sea in the Infinite Mining Area.

However, this place was different from the Storm Quicksand Sea. There were laws of wind and strength wreaking havoc in the Storm Quicksand Sea, and there were all kinds of laws in the sandstorm here.

Han Fei was lost for words. Aren't the living conditions in the West Wilderness too f*cking difficult?

God knew where in the West Sea Divine Realm the Distanceless Gate had teleported him to. Anyway, however, there was no danger here.

Han Fei had thought of going straight to the Primordial Divine Race or the Wild Ancient Race. However, the West Wilderness was in chaos now. Who knew how fierce the battle between the Central Sea Divine Realm and the West Wilderness was?

The Central Sea Divine Realm knew that he would definitely go to the Primordial Divine Race, and he didn't know the current situation of the Primordial Divine Race. If he suddenly appeared and found that something had already happened to the Primordial Divine Race, or that the Central Sea Divine Realm had already set up an ambush, it wouldn't be worth it.

As for the Wild Ancient Race, they were a race that he was relatively unfamiliar with. Although he knew that they were the descendants of the God of War, there were too many people in their race, who had different thoughts. His sudden appearance would probably cause a commotion. Therefore, the best way was to come to the West Wilderness first to understand the current situation in the West Wilderness.

However, before understanding the West Wilderness, he still needed some time to stabilize his current realm. His breakthrough was not over yet.

In his Origin Star, twenty years passed in a flash, and only half a month had passed in the outside world.

Unfortunately, he didn't have enough resources to upgrade the Time Chain. Otherwise, it would only take him seven days to stabilize the Great Monarch realm.

The god gave him 100,000 energy crystals, plus the ones he hunted, a total of 180,000. In terms of the energy provided by the energy crystals, it was completely enough for him to stabilize his realm as a Great Monarch.

However, the Chaotic Qi and ownerless souls in the energy crystals were not completely used for his absorption. Most of them were consumed in the transformation of his body.

At this moment, there were only 30,000 energy crystals left.

And Han Fei finally successfully advanced to the Great Monarch realm.

Sitting in his Origin Star, Han Fei was a little absent-minded. He used to yearn for the Great Monarch realm, but today, when he had finally reached this realm, he had mixed feelings.

Unfortunately, when he came to the Great Monarch realm, the Sea Realm was already in chaos. The gods had already appeared, the ominous had returned, and they would appear forever...

At this moment, Han Fei knew that the Great Monarch realm was just a hurdle on the path of cultivation. The God of War couldn't jump over it, but he had to.

At this moment, Han Fei's body was not very stable. He wanted to get up, but the moment he got up, a deep pit was left on the ground.

He could even feel that his body was emitting the runes of many intertwined laws at all times.

When he looked at his information, his pupils were constricted slightly.

Owner: Han Fei

Level: 119 (Great Monarch)

Bloodline Ranking among the Clans in the Infinite Ocean: the 4213th

Immortal Qi: 13

Soul: 20,001 Origins

Strength: 20,001 Star Powers

First Spiritual Heritage: Origin Spiritual Heritage

Second Spiritual Heritage: Eternal Darkness Spiritual Heritage

First spiritual beast: Twin Yin-Yang Sky Swallowing Fish (Level 118)
