### [God of Fishing](#)

#### Chapter 3501: Battle of the Two Emperors (3)

"Oh! Nothing... It's just that the person who taught me this technique seems to call himself a Great Monarch. Well, that's it."

Cangtian snorted in disdain. "Listen to his nonsense. This old man is too much. Junior Brother, are you going to return to the human race with me?"

"Junior Brother?"

Cangtian said heroically, "You're the only one in the world who can reach this point. Your path of invincibility is clearly still lacking, and your strength hasn't reached the extreme. Obviously, you embarked on this path later than me. If you're not my junior brother, what are you?"

"Uh ~"

With a thought, Han Fei recognized the first Human Emperor as his senior brother. This was a little beyond his expectations.

However, this was good. He could take the opportunity to enter the human race. He didn't know anything about this Chaotic Era, not even the cultivation system of this era.

Besides, Cangtian was right. Just now, he couldn't completely block Cangtian's a single punch with three punches. The other party's path of invincibility was clearly one level higher than his.

Besides, Han Fei was sure that Cangtian didn't have double spiritual heritages. If he didn't have double spiritual heritages, they were both peak-level Great Monarchs, and the other party's combat power had surpassed his, what did this mean? It meant that as Cangtian said, he hadn't reached the peak of this path yet.

He had thought that 800,000 points of basic combat power was already the limit of the Great Monarch realm, but he never expected that there was still room for improvement.

However, he didn't know how to improve at all. However, Cangtian knew, so it seemed that this trip to the human race was imperative.

Cangtian was straightforward. As if he had completely forgotten the tit-for-tat just now, he turned around and said to the other strong masters of the human race, "Okay, as you can see, Wang Han and I are from the same sect and he is genuinely my junior brother. I can't be wrong about this. We will be family in the future."

The human powerhouses were all smiling again.

Since this person was the Human Emperor's junior brother, that was great.

A man laughed and said, "I was wondering why a person who can compete with our emperor suddenly appeared in this world. It turns out that we are all family."

A woman cupped her fists. "Master Wang Han, have you mastered the law of life?"

Han Fei nodded. "Yes."

Cangtian couldn't help but look at Han Fei. "I'm afraid you haven't just mastered the law of life. I also sensed the law of time just now. Obviously, you also cultivate your wife's Dao. What a pity! Although you're a genius, I've already taken the position of Human Emperor. There's nothing left for you. Hahaha... If you want, you can call yourself the Human King. If you don't, it's up to you. However, you are a human after all. You should return to the human race."

Han Fei smiled and said, "Since Senior Brother has already become the Human Emperor, why should I compete for it? As for the Human King, forget it! I'll just be an idle human. My wife and I haven't come out of seclusion for long, so there are many things here that we don't know yet. We still need some time to adapt."

In other words, Han Fei despised the identity of the Human King. He was the Human Emperor in the first place, so he was certainly not interested in this title a level lower.

Cangtian waved his hand. "It doesn't matter! Our human race is the number one race in the Chaos. Except for those that haven't been investigated, our human race has basically recorded everything else. If you want to know anything, just come back to the human race with me."

"Oh?"

Han Fei and Ximen Linglan looked at each other. Sure enough, what a coincidence. They didn't expect that they would start like this when they just entered the Chaotic Era.

Everyone immediately became harmonious.

Only then did Han Fei ask, "Why did you fight those demon plants, Senior Brothers?"

Cangtian waved his hand. "Speaking of which, I feel unlucky. I heard that nine peerless Dao Seeds were born in the demon plant race. I thought it wouldn't be a problem for me to ask for a few, right? However, those guys refused. When have I ever been disobeyed like this? While they didn't pay attention, I snatched a few back. Who knew that these b\*stards would be so stupid as to chase me all the way here? Heh, I just wanted to ask for something. How could I expect to encounter this? I clearly didn't bring enough people with me. When I return this time, I'll immediately send troops to wipe them out."

Han Fei: "..."

Ximen Linglan : "..."

Han Fei couldn't have felt worse. He didn't know how this guy had survived until now. Those Dao seeds didn't belong to you. Wasn't it normal for them to refuse to give them to you?

Now he had snatched their things and even wanted to wipe them out. Even he couldn't be so unreasonable!

The corners of Han Fei's mouth twitched. "Indeed. However, it's not necessary to wipe them out. I see that these people are not weak. Why don't we subdue them? Wouldn't it be better if we take these strong masters under our command?"

"Haha! I just said it in a fit of anger. How can I really kill them all? In fact, it's fake that I went to ask for things this time. I went over to ask them to surrender, but they refused. So of course, I can't give them face."

With that said, Cangtian took out a small tree the size of his palm, which was shining with green light.

Then he threw it to Han Fei.

Han Fei was puzzled. "What is this?"

Cangtian said carelessly, "This is the peerless Dao Seed I snatched from the demon plants! This thing doesn't have much use to our human race. I see that you have a lot of cultivation techniques. I'll give you one to play with as a gift."

### [God of Fishing](#)

#### **Chapter 3502: Battle of the Two Monarchs (4)**

"Uh! Thank you, Senior Brother."

Han Fei was lost for words. This was obviously a f\*cking treasure, but Cangtian threw it to him as if it were garbage. How could he refuse?

He couldn't help but think, Who said that the human race couldn't use this? If this thing was given to Luo Xiaobai, she would definitely be able to use it.

Seeing Han Fei put it away, Cangtian beckoned, "Let's go. Let's talk while walking."

After a while, everyone crossed the starry sky.

Cangtian said, "Hey, Junior Brother, I don't think you have any decent treasures! Did you not bring out the treasures, or do you not have any treasures at all?"

Han Fei thought to himself, I have many treasures. Who knows why I can't take them out now?

Han Fei smiled casually. "I have a knife! As for other treasures, I don't have any. I mainly focus on cultivation itself, so I didn't bother to find any treasures."

Cangtian said earnestly, "That won't do. You need treasures. At least you should have a decent weapon! It's not that your knife is bad, but in terms of quality, it's still much inferior to a real Supreme Nature Treasure. If you don't have one, I'll give you one later!"

"Ah, well! How can I accept this?"

"Hey! It's just a weapon. I don't like that weapon very much. It's not very handy to use and doesn't match my temperament. However, since you're not the Human Emperor, you shouldn't value image and temperament so much. That thing is suitable for you."

"Oh? Then I can take a look at it later."

Han Fei couldn't help but be overjoyed. Is this the f\*cking first Human Emperor? He's simply too rich!

He despised the Creation Blood Sky Blade and said that he would give him something better? Then it must at least be a Supreme Nature Treasure. After the Age of Doom... Oh, no, after the Primordial Era,

Supreme Nature Treasures could be counted on one hand. Here, according to Cangtian, they seemed to be quite worthless.

Of course, Han Fei knew that this was probably an illusion. After all, a Supreme Nature Treasure was a treasure comparable to a Sea Quelling God-level treasure. It was impossible for it to be worthless. Otherwise, if everyone mastered a Supreme Nature Treasure, wouldn't it be shocking?

After that, Cangtian said, "Unfortunately, there aren't many humans who have awakened the Great Dao of Time. It can be said that there are very few of them. This kind of Great Dao is too mysterious, so even our human race doesn't have any treasures suitable for your wife. However, this doesn't matter. In terms of finding treasures, no one in the world is better than me."

"Oh?"

As he spoke, he took out something that Han Fei was very familiar with.

"The Vast Ocean Navigator?"

The corner of Han Fei's mouth twitched, and Ximen Linglan almost cried out. What was his a moment ago had now become someone else's. Han Fei didn't know how to describe this feeling.

The needle of the Vast Ocean Navigator spun, and Cangtian didn't notice the abnormality of Han Fei and Ximen Linglan. Instead, he just said, "This way..."

...

In the Chaotic Era, because many places were still filled with chaotic mist, Han Fei and Ximen Linglan followed Cangtian and the others and ran purely on their legs. However, fortunately, they didn't run for long. It only took them less than an hour to come to a super black hole.

Han Fei quietly followed them into the black hole and in the blink of an eye, they appeared in another piece of Sea of Stars. Here, Cangtian finally took out a star map.

Stars flashed in the star chart, and then a teleportation channel was opened.

This was the first time Han Fei had used the Star Sea Boundary Map, but Cangtian seemed to be quite familiar with it. It seemed that in the Chaotic Era, using the Star Sea Boundary Map seemed to be very common.

Buzz!

Walking out of the passage, in front of Han Fei and Ximen Linglan, a huge super star finally appeared.

Outside this super-large star, there were even more huge super-large stars like the sun and moon.

Han Fei's heart stirred. Is this the original form of the Sea Realm?

Cangtian smiled and said, "Have you ever been to the Chaotic Vast Land?"

Han Fei shook his head slightly. "I had never been here before, but... these stars seem a little too big."

Cangtian laughed. "Of course. This is the only Chaotic Vast Land that floated out of the Chaotic Mist in the Sea of Stars. This piece alone is comparable to tens of millions of layers of Chaotic Mist. In order to

stay on the Chaotic Vast Land, billions of races are fighting fiercely. As for our human race, our entire lineage is rooted here. We can be said to be the first race on this vast land..."

Cangtian said proudly, "Let's go. I'll take you back to our race."

### [God of Fishing](#)

#### **Chapter 3503: Prophet of the Human Race (1)**

Although Han Fei really wanted to ask what the Chaotic Vast Land was, it would seem too ignorant if he asked it directly, so he didn't ask. Anyway, if he went to the human race, he should be able to obtain a lot of information about the Chaotic Vast Land.

Han Fei was also curious. What was the difference between the Sea Realm in the Chaotic Era and the Sea Realm in the future?

At this moment, the ominous hadn't appeared yet. Or perhaps it had appeared, but no one noticed it. Therefore, at this moment, there shouldn't be the Shattered Star Sea outside the Sea Realm.

After a while, when Han Fei and the others descended in the Sea Realm, which was the Chaotic Vast Land, Han Fei felt completely unfamiliar. He scanned around with his perception and found that there were dangerous ravines everywhere. As far as he could see, countless places were still enveloped by some mist, and almost half of the area he perceived had not been explored.

These places were either forbidden places or treasure troves. In some places, there was even divine light surrounding them, and strange phenomena were frequent.

As for the ocean, he had seen some, but not much, less than one-tenth of the land. However, he found an area completely made of ice and snow. There were countless ice mountains there. If they were all melted, they should cover a portion of the land.

At this moment, in Han Fei's perception, there were battles everywhere in the current Sea Realm. The creatures of all races, big and small, some were fighting, and some were exploring dangerous places. In short, it was extremely chaotic.

Han Fei couldn't help but ask, "The human race has been in the Chaotic Vast Land for so long. Haven't they explored these dangerous places?"

Cangtian said casually, "These places are not very meaningful to strong masters above the God of War level. Therefore, we might as well keep them as trial grounds for the little ones to explore slowly. As for those above the God of War level, they would certainly explore the Chaotic Star Sea!"

"I see."

Another moment later.

Han Fei roughly estimated that this was probably the location of the East Sea Divine Realm in the Sea Realm. This huge territory was mostly filled with human creatures.

And the number of humans was beyond imagination. With a causal perception, there were a huge group of more than a trillion. Han Fei didn't know how many there were.

In any case, in this territory, the number of creatures of the other races had clearly decreased, more than ten times less than elsewhere. Besides, in the territory of the human race, although there were many battles of various sizes, most of them were the human race's own battles. The outsiders were clearly very reserved here and didn't dare to attack randomly.

Buzz!

Suddenly, Han Fei had a strange feeling, as if he had been seen through.

"A dominator-level powerhouse?"

Han Fei's heart stirred. Anyone who could make him feel this way was at least a dominator. In other words, the human race at this moment had a dominator.

Since there was a dominator, how could Cangtian be the Human Emperor? Was it because of his potential?

This was the only possibility that Han Fei could guess. As a peak-level Great Monarch, Cangtian could already unleash the combat power of the Sea Quelling God level. If he transcended the Supreme Divine Technique, he could never be underestimated.

Besides, Han Fei believed that Cangtian definitely had transcended the Supreme Divine Technique. Otherwise, with his current strength, it was impossible for him to rule all races.

Swish! Swish! Swish!

The core of the human race was a place where tens of thousands of rivers converged against the Sunshine Mountains. This place gathered sea land and mountain courts, and was full of spiritual energy. Treasure medicine gardens could be seen everywhere, and there were countless strange beasts.

In the place where the river converged, a Nine-Headed Flood Dragon lay lazily, enjoying the impact of the water currents. In the mountain range, a divine roc stood proudly at the top of the mountain. In the sea, there were demonic octopus guarding the sea, and dragon turtles lying dormant on the coast. At the core, the goddess was sitting on the back of a tiger, holding a flute, looking at Han Fei and Ximen Linglan.

Here, Han Fei had seen at least three thousand gods. And this was only the core area. There were definitely many gods in other places of the human race. If these strong masters were gathered together, God knew how many there would be.

In addition to these gods, a massive number of peak-level Great Monarchs were cultivating in seclusion. Many of these peak-level Great Monarchs should be able to become gods. However, in this era, they didn't seem to have a clear concept of gods, so they were still cultivating in seclusion. Some were trying to break through to the peak of the Extreme Dao, and some were already at the peak of the Extreme Dao, pursuing a higher level.

In short, the humans Han Fei had seen were ridiculously strong.

"Welcome back, your majesty."

Some strong masters who were not cultivating shouted. However, they only shouted a few times and didn't continue. They didn't come up to ask questions.

Only a few people, such as the goddess holding the flute, slowly came over on the tiger.

The woman looked at Han Fei and Ximen Linglan and said indifferently, "Are there still our clansmen in the chaos?"

Cang Tian smiled and said, "Qingming, this is Wang Han, another successor of the First Supreme, my junior brother. This is his wife, Ximen Linglan. She has comprehended the Great Dao of Time and her strength is extraordinary. Fortunately, we had the help of the two of them on this trip to the demon plant race. Otherwise, I would have been the only one who returned."

"Oh? Does the First Supreme have other descendants?"

Qingming nodded at Han Fei and Ximen Linglan. "Thank you for your help. I am the Guardian of the human race. I am in charge of the luck of the human race. You can call me Qingming."

"Guardian of the human race? Does the human race have such a position?"

### [God of Fishing](#)

#### **Chapter 3504: Prophet of the Human Race (2)**

Han Fei nodded slightly. This woman was very strong. Not only was she at the Sea Quelling God level, but even her invisible suppressing pressure made Han Fei a little uncomfortable.

"Nice to meet you."

"Huh?"

Qingming was slightly surprised. Han Fei's strength was only so-so, but he was so calm and lacked respect when facing her?

Qingming looked at Ximen Linglan and found that Ximen Linglan seemed to be equally fearless. The way she looked at her was extremely indifferent and not special at all.

Qingming frowned slightly and secretly pinched her fingers. However, as soon as she did it, the sky buzzed. She couldn't help but be a little surprised. It was just a glance, but it could trigger an astronomical change.

However, Qingming still looked up, only to see that the brilliant luck was no weaker than Cangtian's.

At this moment, Qingming couldn't help but be surprised. With such a body of luck, shouldn't he be another Human Emperor? However, as soon as the astronomical phenomenon appeared, it was eliminated by a certain power. Even she couldn't see the situation clearly.

Cangtian said with a smile, "Qingming, there's no need to look. Just like me, Junior Brother walks the path of invincibility and cultivates the Supreme Technique. He can also unleash a combat power above the god level. I've already sparred with him. There's no problem with his identity. Beifeng and the others have witnessed it with their own eyes."

Immediately, the God Slaying-level powerhouses around Cangtian also nodded. One of them said, "Master Guardian, we did witness that battle. Lord Wang Han is only slightly inferior to our emperor on the path of invincibility. They are almost evenly matched on the other aspects."

"Oh?"

Qingming took a deep look at Han Fei. Although she felt that it didn't make sense, if Cangtian had really confirmed this in person, this was more accurate than her directly judging Han Fei's luck, so she didn't ask further.

Qingming said, "No wonder Master Prophet said that you would turn misfortune into auspiciousness on this trip, so we don't need reinforcements. In that case, please go see Master Prophet first! The human race has had another supreme powerhouse. You should meet him."

Han Fei and Ximen Linglan naturally didn't have much to say. They were just waiting to read the history of the human race. However, this Guardian seemed to have a lot of power in the human race. Even Cangtian talked to her almost as an equal. Then what about the prophet?

Han Fei had heard the term "prophet" more than once. He felt that the Prophet and the First Supreme seemed to be the top figures of the current human race!

Cangtian said, "Of course. I'm going to give those Dao Seeds to the Prophet. Junior Brother, follow me. Since you've returned to the human race, you have to meet the Prophet. Let's go!"

...

At the core of the human race, there was a divine tree. It wasn't that the tree was big, but it was actually only thousands of feet tall. Its leaves were shining and flowing with multicolored light. There were a lot of red fruits hanging on the tree. There was no telling what its use was.

At the top of the tree, there was a sealed wooden door. It seemed broken, but perception couldn't penetrate it at all.

Creak!

The three of them came to the door and Cangtian was about to knock when the wooden door opened automatically.

"Come in!"

An ancient and hoarse voice came from the room, sounding indescribably ancient.

Cangtian said casually, "Junior Brother, let's come in."

"Um!"

When Han Fei entered the wooden door, he thought that it was dark inside, but to his surprise, light shone through the top of the tree and illuminated the house, illuminating everything in the house clearly.

This was a space thousands of meters long. It was not a small world, but was indeed made of the body of this tree. Furthermore, it seemed that there was more than this floor.

As far as Han Fei could see, there were scrolls carved from divine wood. Some of these books floated in the air, and some were placed in the grids around the wall.

In addition to these books, there were also some larger paintings, some bones, some strange stones, spiritual herbs, and a purple mist, which was the Primordial Purple Qi.

In every corner of the room, there were some strange things. Han Fei couldn't help but glance at Ximen Linglan, thinking that this prophet's hobby was too similar to the people of the Time Temple. They all liked to study all kinds of strange things.

"Prophet, I brought back a few of the peerless Dao Seeds you wanted. Where do you think I should put them?"

Cangtian casually said and then kicked away a ball-like thing at his feet. Han Fei glanced at it, only to see that it was a divine persona.

Han Fei was speechless. Good lord, how could he throw away a divine persona so easily?

"Shut up. You're making a fuss and making me irritable."

"Alas..."

This was the first time Han Fei had seen Cangtian so obedient. He accepted the scolding as if he was already used to it.

Clatter ~

Behind a stack of books, a tall, white-haired old man with a long beard and in a plain robe stood up.

The old man glanced at Han Fei and Ximen Linglan and then looked at the sky. "Where are the Dao Seeds?"

Cangtian casually took out four extraordinary peerless Dao Seeds that were full of charm. Some looked like flowers, some looked like vines, and one of them even looked like a human... Faced with these peerless treasures, Cangtian threw them to the old man indifferently and said lazily, "I gave one of them to my junior brother. After all, this is the first time we've met! However, this doesn't seem to be useful. Those demon plants were so mad at me when I snatched them. Why do you want them?"

### [God of Fishing](#)

#### **Chapter 3505: Prophet of the Human Race (3)**

The old man took the Dao Seeds and looked at it for dozens of seconds. "What do you know? Go away. It's none of your business here. If the demon plant race comes to ask for them..."

"How dare they come to my territory to ask for something? I'll kill them."

Before the old man finished speaking, he was interrupted by Cangtian. The old man was so angry that he couldn't help but blow his beard. "Do you think only you can fight? If anyone really comes to ask for these Dao Seeds, just tell them to wait until I finish my research on them."

"Are we really not going to fight? Then wouldn't our human race lose face?"

The old man said angrily, "Get lost. You snatched their peerless Dao Seeds. You already won!"

Cangtian muttered, "You asked me to take them."

"Get lost ~"

Cangtian patted Han Fei's shoulder and said, "Junior Brother, Sister-in-law, just talk to this old man! When we're done, let's have a drink."

"Okay, Senior Brother."

...

After Cangtian left, only Han Fei and Ximen Linglan were left here. Although this prophet didn't seem to have any airs, Han Fei and Ximen Linglan both knew that this prophet was definitely a terrifying powerhouse. Here, they didn't even have any thought of attacking.

The old man casually threw the Dao Seeds to the ground and waved his hand. The countless divine wood books in the house began to automatically return to their positions. In the blink of an eye, the house was more than twice as clean. Of course, it was only relative that the house was still in chaos.

The Prophet, on the other hand, slowly walked to Han Fei and Ximen Linglan with his hands behind his back. He walked around the two of them a few times and then gradually became solemn.

Finally, the Prophet stopped wandering. He waved her hand, and a wooden mat appeared under Han Fei and Ximen Linglan's feet. A futon appeared in front of them. The old man had already sat down, and a long table automatically appeared in front of him. A teapot automatically poured out a five-colored light, which fell into the cup and turned into misty tea.

"Alas! Take a seat!"

The Prophet seemed to be sighing.

Han Fei nodded and sat cross-legged. Two cups that were emitting five-colored light appeared in front of them.

"Drink!"

Han Fei didn't think it necessary for this old man to frame him and Ximen Linglan, so without hesitation, he picked up the cup and drank it in one gulp. Ximen Linglan wanted to take a small sip, but the tea in the cup completely turned into rays of light and disappeared into Ximen Linglan's body.

Ximen Linglan's face changed slightly. She was about to speak, when she heard him say, "It's okay. It's just something that cleanses the spiritual heritage, nourishes the flesh and soul, and improves one's basic talent. Your basic talent is a little low, so your strength is slightly weaker than the people of this era."

Buzz!

Han Fei and Ximen Linglan were both shocked and looked at the old man in front of them.

The old man smiled. "You don't have to be so surprised. It's impossible for two Human Emperors to appear at the same time in this world, but it can't be fake that the brilliant luck and the power of faith of the human race can enter your flesh and blood. Qingming can't tell because she hasn't broken through to the Supreme realm yet. Otherwise, the two of you would have been seen through just now."

Han Fei took a deep breath. "Master Prophet, you do have sharp eyes."

The Prophet looked at Han Fei with a smile and said, "Master Human Emperor, I should praise your good methods. Not everyone can break through the Time River and enter our era. It can even be said that no one has succeeded so far. But now, two of them have appeared here at once. Therefore, I should be the one who is surprised. However, I wonder why Master Human Emperor has spent so much effort to come to our era?"

Seeing that his identity had been seen through, Han Fei no longer hid it and said bluntly, "Senior Prophet, to be honest, the two of us came from an era ten thousand years later. At that time, all the races in the Sea of Stars would probably be wiped out."

"Oh?"

The Prophet narrowed her eyes slightly. "I already know the strength of the two of you. You are both super powerhouses above the god level, which means that in your era, there are still top powerhouses. There should also be Supreme-realm powerhouses, right?"

Han Fei was puzzled. "Senior Prophet, what is a Supreme?"

The Prophet was also briefly stunned. "You cultivate the Supreme Technique, but you don't know what a Supreme is?"

Han Fei shook his head. "Is there a connection between the Supreme Technique and the Supreme Technique?"

The prophet said, "Supreme is the realm above the god level, which is your current realm. If you go one step further, you can reach the Supreme realm."

Han Fei and Ximen Linglan looked at each other and breathed a sigh of relief. Then, they said, "In our era, the names might be slightly different. We call a Supreme a dominator. However, our enemy is an existence stronger than a dominator."

"Oh?"

This time, it was the Prophet's turn to be shocked. "A creature stronger than a Supreme? Is there really such a realm?"

Han Fei looked solemn and then nodded heavily. "There's only one such person, but that person is an enemy. And from the current Chaotic Era to our era, there has never been an existence above the dominator level, which is to say, above the Supreme level."

"It seems that the old guy's guess is true!"

The Prophet couldn't help but sigh, and Han Fei's face changed slightly. Han Fei couldn't help but ask, "Has someone already discovered the existence of the ominous?"

"The ominous?"

The Prophet looked at Han Fei and Xia Xiaochan. "Is this the existence you mentioned?"

"Um!"

The Prophet smiled faintly. "I'm not talking about him, but the First Supreme, the guy who created the human race's Supreme Technique. After that old guy reached the peak, he said that there was still a layer of mist above the Supreme level, so he gave up and embarked on a path of no return alone. As for the First Supreme, you can read his book yourselves later! Now tell me about the ominous."

### God of Fishing

#### **Chapter 3506: Prophet of the Human Race (4)**

With that said, the Prophet summoned the Primordial Purple Qi and enveloped this place, using it as a barrier.

Seeing that Han Fei and Ximen Linglan were puzzled, the Prophet said indifferently, "There are some things that are not allowed by the Heavenly Dao. Logically speaking, after you enter this era, you should forget the memories of the future. But you haven't forgotten, which represents that this era has recognized you. But even if it recognizes you, it doesn't mean that you can say anything you want. Therefore, I have to hide it from the Heavenly Dao of this era. But remember, except for me, don't mention what will happen in the future to anyone, or it will definitely cause a backlash of this era. Even if you are the Human Emperor, you can't resist it."

Han Fei and Ximen Linglan couldn't help but exclaim in their hearts. How could he hide it from the Heavenly Dao of this era? Reminded by the Prophet, Han Fei did remember that when he returned to the Age of Doom where Ximen Linglan was, he couldn't even remember the Floating Stone.

Therefore, what the Prophet said was completely trustworthy.

At this moment, although Han Fei had many questions, the ominous was the top priority.

From the unification of the six lineages of the human race, to the appearance of the ominous, the collapse of the Chaotic Era, to the ominous return of the Primordial Era, to the Age of Gods, the Age of Doom, the Age of Sea, the Doomsday Era...

The Prophet listened quietly without any change in his expression. After Han Fei finished speaking, the Prophet finally nodded slightly. "I didn't expect that I would be lucky enough to know the future. So, are you back to find a way to kill the ominous?"

Han Fei nodded. "That's right. In the Chaotic Era, there were the most spiritual treasures in the world, and strong masters were everywhere. Here, we might be able to find a way to deal with the ominous."

However, the Prophet shook her head slightly. "Master Human Emperor, the history that has happened can't be changed. No matter how you entered this era, even if the era acknowledges you, you are not a participant in this era unless you should have existed in this era. Now, you can only do two things in this era."

"Which two?"

The Prophet said calmly, "As a spectator, you can observe the current Chaotic Sea of Stars and read any records to increase your understanding of this era."

Han Fei's heart sank. "What else?"

The Prophet continued, "Cultivation! You can cultivate or even make a breakthrough in this era, but you can't steal the important things of this era, let alone participate in the battles of this era."

Han Fei frowned. "But we've already participated. Also, Senior Prophet, there's a history that I want to tell you."

"Oh? Tell me first."

Han Fei immediately told her what happened after he returned to Yu City and met Ximen Linglan. At that time, he could be said to have changed the entire Yu City, Ximen Linglan, and countless people.

However, after hearing this, the Prophet just said calmly, "Because you should have been from that era in the first place. Secondly, even without you, Yu City would have changed. You said that you had become a fool, but have you ever thought that there might have been such a talented fool in that era, but you replaced him?"

Buzz!

Han Fei and Ximen Linglan were both shocked, feeling a sense of fear and shock.

Han Fei's heart trembled. If that was really the case, didn't it mean that Ximen Linglan should have fallen in love with another person, a person he replaced?

Ximen Linglan didn't dare to imagine. If it weren't for Han Fei in the Great Wilderness Village, would there be her now?

Ximen Linglan asked, "So we can't do anything here?"

The Prophet smiled and said, "You can get to know this era and cultivate. Of course, if you really want to participate, it's not impossible."

Han Fei's eyes glittered. "What way?"

The Prophet sighed slightly. "Parasitize. Parasitize two living people and then cut off your own consciousness and memories, making part of you a part of this era, and when you leave this era, take them back. In this way, you can participate in this era the entire time."

Han Fei smiled bitterly. "Such participation doesn't seem to mean much."

However, the Prophet shook her head and said, "Not necessarily. What if you parasitize Cangtian?"

At that moment, Han Fei suddenly raised his head.

[God of Fishing](#)

**Chapter 3507: Path of Invincibility · Supreme Technique (1)**

The Prophet's words stunned Han Fei.

The Prophet said with a smile, "Since I dare to say it, it means that this matter is feasible and the heavens will agree. After all, a soul body without memories or consciousness won't affect him at all. Of course, parasitizing Cangtian, you are essentially a bystander."

"Okay!"

Han Fei didn't care if the Prophet was testing him or not. Anyway, he had long been seen through. What else could he test him with?

Besides, as the Prophet said, even if he parasitized Cangtian, he was essentially a bystander.

However, this could be considered indirect participation in this era. Furthermore, this way of participation could avoid the greatest problem.

Because according to the process of time, there was not much time left in the Doomsday Era. There were only ten thousand years left at most. Therefore, Han Fei knew that he couldn't stay in this era for long.

Different from when he entered the Age of Doom, that period of time was intercepted by Jiang Linxian. It was a cycle of time. Therefore, that period of time had time acceleration, which was different from the normal flow of time.

However, this time, he had returned to the Chaotic Era purely from the Time River, so the flow of time hadn't changed.

This also meant that staying in the Chaotic Era for 10,000 years didn't affect the flow of time in the Doomsday Era, so 10,000 years would also pass in the future.

And once he could parasitize Cangtian, he could leave the current time and step back into the Chaotic Era from another time. There was no need to stay long here.

Therefore, Han Fei chose to agree immediately. This was his best choice.

As if knowing that Han Fei would definitely agree, the Prophet just nodded slightly. "As a human prophet, this is the only thing I can help you with. But I have to remind you that even if you parasitize Cangtian, his path might not be suitable for you. Even if you walk the same path, you have to be careful."

Han Fei cupped his hands. "Thank you, Senior Prophet. I understand. In that case, when should we start?"

The Prophet smiled. "When you leave! I think you still have a lot of things to learn."

Han Fei nodded. Although he didn't have much time, he did need to know a lot of things. The most important thing was the way to continue to practice the Supreme Divine Technique.

Han Fei said, "Senior Prophet, in our era, the path after the peak of the Great Monarch realm, which is the peak of the war general level in your current era, was cut off. May I know how to make a breakthrough in the Supreme Divine Technique?"

The Prophet didn't speak either. Instead, he waved her hand and summoned two divine wood books. "Read them first, and then read all the books in this room. If you have any questions, you can ask me."

Han Fei nodded slightly. He was not in a hurry. It was already beyond his expectations that the human prophets of this era were willing to help him.

Han Fei immediately opened a Divine Wood Book, which contained some information recorded in Dao Patterns.

As Han Fei was immersed in it, the contents of the Divine Wood Book were revealed to him one by one.

This was just an ordinary book that recorded the various stages of cultivation and simple understanding of the Chaotic Era. It detailed the cultivation levels of the Chaotic Era.

In the Chaotic Era, cultivators' strength was divided into three realms in mortal body, three realms in spiritual body, and three realms in divine body.

Compared to the cultivation system he had experienced, cultivators in the Chaotic Era started from the Law Enforcer realm, which was also called the First Realm in Mortal Body.

Yes, Han Fei didn't see it wrong. In the Chaotic Era, there was no realm below the Law Enforcer realm at all. And only the people whose talent was extremely poor would be reduced into the First Realm in Mortal Body, which was equivalent to the Law Enforcer realm.

Therefore, strictly speaking, Explorers were the real starting point of cultivation in the Chaotic Era. In other words, they didn't have a Four Nine Minor Heavenly Tribulation.

Explorers and Venerables were respectively called the Second Realm in Mortal Body and the Third Realm in Mortal Body. Cultivators in the Mortal Body Realm were collectively called mortals or mortal meridians. There were more and more such people, which meant that the Chaotic Era was transforming from an era of birth to an era of self-reproduction.

The King Realm, the Sky Opening Realm, and the Monarch Realm were called the Three Realms in Spiritual Body. Among them, the King Realm was called the Spiritual Body Soldier, the Sky Opening Realm was called the Spiritual Body Warrior, and the Monarch Realm was called the Spiritual Body War General.

The gods, the God Slaying level, and the Sea Quelling God level corresponded to the three realms of the divine body. They were respectively called the War God level, the Heavenly God level, and the Super God level.

And above the super god-level was the Supreme-level.

The human race had two Supremes before. One was the First Supreme, who was the person who laid the foundation of the human race. He was known as the First Supreme because he had never met a worthy opponent. He had defeated all kinds of divine races born in the Chaos. Naturally, he was the strongest in the Chaotic Sea of Stars. No one could challenge his dignity.

It wasn't until the First Supreme found a path of no return in the Sea of Stars that he embarked on this path. Before he embarked on this path, he had once crossed it with his spiritual will, only to fail. And this

was the first defeat in his life. Therefore, he saw new hope and resolutely embarked on that path of no return.

Furthermore, there were more than 30 people with him, all of whom were Supremes.

### [God of Fishing](#)

#### **Chapter 3508: Path of Invincibility, Supreme Technique (2)**

The other Supreme of the human race was the Prophet.

The Prophet had the ability to see through the Heavenly Secrets. As for the strength of the Prophet, it was recorded in the Divine Wood Scroll that he had once suppressed the three Supreme-level powerhouses of the lineage of strange beasts, demon plants, and ferocious beasts.

Seeing this, Han Fei couldn't help but look up at the Prophet, who just smiled.

Han Fei couldn't help but suspect that this book was probably written by the Prophet himself. If it were an arrogant person, he might have exaggerated his strength. However, the Prophet was very steady and liked to study, so Han Fei felt that the records might have covered up his real combat power.

So far, the human race hadn't had a third Supreme.

The human race had two Supremes, and as for the six lineages, only the stillborn hadn't appeared. The remaining lineages all had Supremes.

As for the other races, there were more than a hundred known Supremes.

However, nearly 30% of them followed the First Supreme to embark on the path of no return and never returned.

This was the end of the book.

Han Fei couldn't help but sigh. There were a shocking number of dominators in the Chaotic Era.

He had thought that Cangtian was already strong enough as the first Human Emperor, but he didn't expect that there were many strong masters stronger than him.

Han Fei couldn't help but open the second Divine Wood Book.

This book completely depicted the First Supreme.

According to the book, when the First Supreme was born, the world was still chaotic, and the Chaos dominated the Sea of Stars. After three eras, a large number of divine races and a massive number of strong masters gradually appeared in the Chaos. The First Supreme fought from the Chaos and never lost...

Three eras later, the First Supreme drew the power of the world to activate the divine vine. From then on, the other five lineages were born one after another.

Seeing this, Han Fei paused, because he found a shocking thing, which was that a Great Era had existed for billions of years.

F\*ck, the First Supreme had lived for so long?

Besides, the other five lineages were actually nurtured by him. It felt like a person was too bored, so he nurtured five siblings.

In the following 30 million years, purple light came from the east in the chaos. The various divine races discovered that such mist could evolve into creatures. Therefore, they all competed for the Primordial Purple Light, so their respective lineages appeared.

Because of the strength of the First Supreme, the birth and development of the human race were extremely rapid.

As for the Supreme Divine Technique, it was a Supreme-level cultivation technique comprehended by the first Supreme-level cultivator with his own strength and the Chaotic Heavenly Secrets. However, this technique was difficult. Since the day he created this technique, no one could complete the cultivation of the Supreme Technique. Most of them stopped at the war general level and exploded in the end.

After countless years, countless people were still exploring this path.

Han Fei even saw that there was no shortage of super god-level powerhouses, namely, Sea Quelling Gods. They crippled their cultivation or reincarnated to re-cultivate. Starting from the mortal body realm, they moved forward step by step, trying to reach the peak in every realm.

It was also during such exploration that people discovered that to reach the extreme of every realm, not only did it require potential, but also luck. One had to have great luck to reach the extreme of every realm.

However, even if someone reached the peak of every realm, they still failed at the peak of the war general level in the end. This was because they discovered that there were infinite possibilities in the war general level. Many people thought that they could reach the peak, but in the end, they stopped and couldn't advance further. In the end, because the Supreme Divine Technique was too powerful, their bodies exploded and they died.

After countless attempts, no one could break through the realm of the Supreme Divine Technique, so fewer and fewer people began to practice this technique.

However, because of the cultivation of the Supreme Technique, some people of the human race began to study the theory of luck, and a magical inheritance was born, which was the Guardian of the human race. The Guardian was said to be able to control the lives and luck of the human race.

The position of the Human Emperor was proposed by the Guardian. Sure enough, after the Human Emperor appeared, he had overcome all obstacles along the way. And Cangtian didn't let them down. Although he hadn't broken through to the war general realm, he could already unleash super god-level combat power. This made many people see hope again, and Cangtian was also taken in as a disciple by the First Supreme.

However, at this critical moment, the First Supreme actually led a group of Supremes into the path of no return.

Seeing this, Han Fei couldn't help but wonder. Since Cangtian had the highest chance of breaking the taboo of the Supreme Technique, why didn't the First Supreme leave before he made a breakthrough?

Although Han Fei was puzzled, he still continued to read.

On the day the First Supreme left, the Chaotic Vast Land appeared. On it, purple gas soared like dragons, purple dragons circled, colorful streams of light, and myriad scenes appeared.

People discovered that the Chaotic Vast Land was simply perfect for the habitat of all creatures. It wasn't that there were no habitable stars in the vast Sea of Stars.

However, not only was the Chaotic Vast Land abnormally suitable for habitation, but it also had many resources, and the power of the Vast Land could regenerate many resources.

As for the human race, they were the first race to live on the vast land of Chaos. As the human race's call to share the Chaotic Vast Land with other races spread throughout the Sea of Stars, countless people came to find them.

Now, on this Chaotic Vast Land, there were tens of millions of creatures.

Han Fei instinctively felt that there seemed to be something wrong with this part of history. After the First Supreme left, the Chaotic Vast Land came out, attracting many forces. Although everything seemed normal, Han Fei felt that something was wrong.

For example, why did the First Supreme leave?

### [God of Fishing](#)

#### **Chapter 3509: Path of Invincibility, Supreme Technique (3)**

For example, why did the Chaotic Vast Land appear at this moment?

For example, why was the human race willing to share the Chaotic Vast Land with the myriad races?

Suddenly, Han Fei realized something. "Senior Prophet, is the human race's plan to rule all races already underway?"

At some point, the Prophet had already begun to study the peerless Dao Seed that he had thrown to the ground. Hearing Han Fei's words, he just nodded.

Seeing this, Han Fei didn't disturb the Prophet. Instead, he checked the time recorded. It turned out that this unified plan had been quietly going on for hundreds of thousands of years.

It turned out that the ancient human race ruled all races in this way.

However, these things were recorded in the Divine Wood Book of the First Supreme. Obviously, it was intentional. In other words, the appearance of the Chaotic Vast Land must be related to the departure of the First Supreme.

What was it that made the First Supreme abandon his disciple and secretly let the human race rule the myriad races in the Sea of Stars? Could it be that the First Supreme knew that the ominous was coming?

Unfortunately, there were no further records about this part.

The last part of this volume was the First Supreme's elaboration and understanding of the Supreme Technique. These elaborations and understanding were all cultivation methods, such as swallowing stars and fusing with Origin Stars.

However, Han Fei suddenly saw on one of the pages that the First Supreme once said, "The mastery of the Supreme Divine Technique requires a cultivator to completely comprehend the profound meaning of the Supreme Divine Technique."

Han Fei could understand that, because the Prophet had also said that the Supreme Technique was a Supreme-level technique.

However, there was another sentence recorded by the First Supreme, which was the parting words of the First Supreme to the Prophet. "No one knows my loneliness. In the world, I am the only Supreme."

Han Fei was stunned to see this. When the First Supreme left, he took away more than 30 Supremes. How could he be the only Supreme?

Han Fei raised his head and wanted to ask the Prophet, but the old man seemed to be studying the peerless Dao Seed attentively at the moment. Han Fei thought to himself, Forget it, I'd better finish reading this room of books first!

Ximen Linglan looked at Han Fei as if asking what he had seen that could surprise him so many times.

Han Fei handed over the Divine Wood Book and said, "Read it first! With so many books, you might have gained a lot."

Three years later.

When Han Fei closed the last book, he was finally relieved. He couldn't help rubbing his eyes. He had finally seen how terrifying the current Chaotic Era was.

The current number of races exceeded hundreds of millions. These were only the known races. No one dared to say if there were still a lot of unknown races, but Han Fei thought there probably were.

In the past three years, in addition to the development of the Chaotic Era and the battles of countless divine races, what Han Fei saw most was the so-called fundamental talent, the path of invincibility, and the history of the human race, such as the exploration of the Supreme Divine Technique by countless people.

Among them, the fundamental talent that the Prophet mentioned was not the bloodline, but the way this person was born. The reason why so many Supremes could be born in this era was mainly that these people were mostly born from the Chaotic Origin. They were creatures born naturally by the heavens and earth. These creatures often called themselves the divine race.

Han Fei's bloodline was indeed very powerful, and his upper limit was actually extremely high. It could be said that in the future, almost no one could resist him. However, this was the Chaotic Era. There was a large group of creatures born from the Chaos. Perhaps their bloodline level was not high enough, but they were born by the Chaotic World. It could be said that they were born as extraordinary divine fetuses.

However, Han Fei also discovered that because his bloodline was too strong, his basic talent was actually not much worse than the creatures born in the chaos. If there was a difference, one had an innate perfected talent, and the other had a postnatal perfected talent.

It was not difficult to make up for this lack. He just needed to absorb enough Chaotic Origin Energy.

...

The research records of the path of invincibility were what really attracted Han Fei.

The path of invincibility was essentially not a law, but a state of mind.

In the middle of the Chaotic Era, many strong masters who walked the path of invincibility appeared, but without exception, these strong masters were all taught a lesson by the First Supreme.

However, their path of invincibility didn't collapse. The First Supreme didn't kill these people and deprive them of their path of invincibility. This was different from later generations, until Han Fei saw the records of the Prophet's research on the path of invincibility.

In the records, the path of invincibility was divided into three realms.

The first was called Fearless Body. In this realm, one would seek invincibility in killing.

This was Han Fei's current realm. This realm could be broken. The reason why there was a saying that one could defeat a cultivator walking the path of invincibility and snatch his path was that once the path of invincibility was lost, the will of invincibility would be lost. And if he defeated a strong master walking the path of invincibility in the same realm, the winner would absorb the other party's invincible aura and strengthen the outburst of his invincible will. This would make the winner feel more and more invincible. Therefore, it created a feeling that the other party's path of invincibility could be absorbed.

Therefore, the understanding of future generations of the path of invincibility was still at the first level.

And the second realm was called the Invincible Body. This realm had to be built on the foundation of invincibility in the first realm. It meant that in the first realm, you couldn't be defeated by other cultivators on the path of invincibility. If you were defeated, it was impossible for you to reach the second realm.

As for this realm, it meant that the enemy couldn't hit it at all, or couldn't hurt it. The second realm wouldn't increase one's strength, but this state of invincibility would make the enemy tremble in fear.

### [God of Fishing](#)

#### **Chapter 3510: Path of Invincibility · Supreme Technique (4)**

Those who didn't know this Dao would only think that he was immune to both body and soul injuries.

But in fact, this state was to use his invincible will to borrow the power of the world to comprehend a "momentum". However, this "momentum" couldn't be maintained for long. After all, you weren't the world.

Therefore, on the basis of the second realm, the third realm appeared.

The path of invincibility in the third realm referred to swallowing the sky and absorbing the earth, controlling the power of the heavens and earth, and refining a star domain. With a thought, one could obtain the power of a domain, maintain the invincible momentum, and greatly increase their strength.

This was the realm reached by the First Supreme, and also the highest realm known to be on the path of invincibility, but it might not be the highest realm on the path of invincibility.

The First Supreme had once guessed that if he could control the Chaos, he would obtain the power of all Daos. Only then would he be truly invincible.

Unfortunately, even the First Supreme couldn't do this, so it only existed as a guess.

After understanding the path of invincibility, Han Fei also understood the true meaning of the Great Dao of Life Replacement. The so-called three-second invincibility of the Great Dao of Life Replacement was actually that in those three seconds, he had reached the second realm of the path of invincibility, the Invincible Body.

And the way to comprehend power was to observe the world and comprehend the power of the world. It was simple to say, but not many people could do it.

However, those who could still maintain the path of invincibility after being beaten by the First Supreme had all done it. Cangtian had done it.

As for the third level, it was not something Han Fei could master at the moment. Not to mention mastering it, his current perception couldn't even spread to a star domain.

Therefore, all he could do now was to obtain the Chaotic Origin and comprehend the second level of the path of invincibility, borrowing the power of the world.

It had to be said that too many things in the Chaotic Era had been lost. If no one guided him to comprehend the second level of the path of invincibility, God knew when he would be able to comprehend it.

Han Fei had also learned something about the advancement of the Supreme Divine Technique, but he needed to confirm it.

Han Fei finally interrupted the Prophet's research and said, "Senior Prophet, did the First Supreme leave because of Cangtian?"

The Prophet slowly put down the flower Dao Seed in her hand, looked up at Han Fei, and said with a smile, "You found it?"

Han Fei said, "From all the records, I found that the First Supreme seems to have a different view of Supremes from others. He feels that Supremes are unique. Only the strongest are worthy of being called Supremes. Therefore, when he left, the Chaotic Vast Land appeared, and all races came to submit to the human race. The purpose was to let Cangtian rule all races and cultivate the Supreme Heart. Therefore... in an era, only one person can transcend the Supreme Technique, right?"

Hearing this, Ximen Linglan couldn't help but put down the book in her hand. "Directly from the Great Monarch realm to the strongest?"

"Yes and no."

The Prophet said leisurely, "Your thinking is too narrow. Even if you comprehend the true profound meaning of the Supreme Technique, you might not be the strongest. Even if the First Supreme leaves, his legend is still there. Just this legend is the inner demon of countless people. Whether he is there or not doesn't affect Cangtian from making breakthroughs. That's all I have to say. The rest is up to you to comprehend."

Han Fei frowned. "Then why did the First Supreme leave?"

"Because of me."

"Ah?"

Han Fei and Ximen Linglan couldn't help but look at the Prophet in shock. They never expected that the First Supreme would leave because of this old man.

The Prophet sighed and said, "I'm not surprised by your arrival and the ominous you mentioned. A long time ago, I foresaw the collapse of the Chaos, a collapse that even the First Supreme couldn't stop. I think it should be the ominous you mentioned. That old guy felt that the collapse of the Chaos must be because he wasn't strong enough, so he handed the human race to the heavens and created this Chaotic Vast Land to attract all races to join him. And he went to find a way to save the world. Now it seems that he didn't come back in the end."

Han Fei's heart stirred. "How did he know that Cangtian could transcend the Supreme Technique..."

Suddenly, Han Fei shut up and looked at the Prophet deeply. Yes, this person was known as the Prophet. He had even foreseen the arrival of the ominous. He had probably foreseen the future of the sky. That was why the First Supreme chose to leave.

Ximen Linglan couldn't help but ask, "Senior Prophet, can you foresee Wang Han's future?"

Han Fei's heart skipped a beat. He couldn't help but want to hear the prophecy.

However, the Prophet shook her head slightly. "It's too vague. After all, you are not from this era. However..."

"Please go on."

Han Fei and Ximen Linglan said in unison.

The Prophet looked at Han Fei. "However, I can see that you carry the great luck of an era. A person like you has too many choices to make. You have to firm your choice, which is the best choice."

"That's it?"

Han Fei was stunned.

The Prophet smiled. "That's it."

Han Fei thought to himself, This is no different from not saying anything.

The Prophet asked, "Are you leaving after reading the book?"

Han Fei asked, "Senior Prophet, I have one last question... Do you know the Demon Purification Pot?"

The Prophet took a deep look at Han Fei. "No."

Sure enough.

Han Fei thought to himself, At this time, the Demon Purification Pot shouldn't have appeared yet. Otherwise, with the ability of the prophet, he should have known.

Besides, in this era, not only was there no Demon Purification Pot, but there were also no Three Temples. Or rather, the Three Temples hadn't been established yet, and the human race didn't know about billions of races, so Han Fei didn't need to ask about these things.

All in all, Han Fei had learned enough information.

Han Fei cupped his fists. "Senior Prophet, I have no more questions."
