Chapter 3621: Fight the Ominous-Level Powerhouse (1)

"Huh?"

The Heavenly Monarch and the other two were a little stunned. They had already obtained a massive amount of energy crystals just now. These energy crystals were enough to nurture countless strong masters. Even the Heavenly Monarch himself could directly benefit from the dominator-level energy crystals.

In this moment, Han Fei had conquered dozens of Star Rivers alone and obtained countless energy crystals, but he didn't take any at all as if he didn't care about them at all. This made them even more convinced that Han Fei was in a realm that they couldn't understand.

The Heavenly Monarch cupped his hands. "Senior, can you tell me... what's going on?"

In the Primordial Star Sea, their history might have long passed. And the Heavenly Monarch didn't have enough strength to resonate with Hongjun, who had turned into the Heavenly Dao, so he couldn't learn any useful information from Hongjun, let alone know what the real world was like.

Han Fei thought for a moment. There were indeed some things that he should tell. He couldn't let others be in the dark. He flicked his finger, and a wisp of spiritual consciousness gathered into a crystal and appeared in front of the Heavenly Monarch.

Han Fei said, "Go back and take a look! After all, this is not a place to stay for long. It won't be long before these dozens of Star Rivers are covered by the ominous mist again."

The Heavenly Monarch was overjoyed. He knew that there were definitely many unknown secrets in it.

However, the Heavenly Monarch was stunned. "Senior, aren't you going back to the Guardian Divine Realm?"

Han Fei shook his head. "I still have something to do, and the road ahead is not something you can participate in. If necessary, I will come to you later."

With that, Han Fei's body glowed with divine light. He walked further away into the ominous mist with a knife, until he disappeared into the ominous mist and turned into a light spot in the ominous mist.

The Heavenly Monarch held the spiritual consciousness crystal and issued an order in his heart, and the scattered energy crystals began to be collected.

The Nine Heavens Mystic Fairy and the Supreme Dao Monarch felt as if they were in a dream. The Supreme Dao Monarch's eyes flickered. "I wonder if I can reach such a realm in my life?"

The Nine Heavens Mystic Fairy sneered. "Don't even think about it. You don't even know what realm this is. However, in the conversation between Senior and the otherworldly sky fiends just now, you mentioned the Chaotic Star Sea. I wonder where that is? Previously, the otherworldly sky fiends also clamored outside the Guardian Divine Realm, saying that the first battlefield of the Chaotic Star Sea had been penetrated. Is there another pure land outside the Three Thousand Worlds?"

The Heavenly Monarch said leisurely, "That's for sure. This senior is clearly not from our side. Stop chatting. A collision of power at this level is too powerful for you and me to participate. The Star River I can control is limited. The two of you, quickly go to the neighboring Star River to collect these energy crystals and then return to the Guardian God Realm."

"Okay~"

...

In the ominous mist, Han Fei was walking alone. Along the way, no dominator-level ominous came to stop him. The ominous knew that at his level, it was no longer easy to stop him.

Only the ominous mist along the way had been trying to corrode Han Fei. However, the ominous aura alone clearly couldn't obliterate Han Fei.

Of course, in the vast Primordial Star Sea with billions of star rivers, it was almost impossible for Han Fei to purify this Primordial Mist. Even if he could, it would take countless years.

Han Fei's current strength had reached the theoretical limit of the Sea of Stars, so even though the entire Sea of Stars was enveloped by the ominous mist, he was still moving forward, but at a slightly slower speed.

One year.

Two years.

Three years.

Han Fei fought in the ominous mist and opened a path. He was already numb and didn't know how many ominous creatures he had killed.

Anything that blocked his way was destroyed. At the same time, he was sensing the changes in the luck of the divine vine in the Chaotic Star Sea.

He had already made up his mind that once the luck of the divine vine changed, he would immediately abandon this operation and return to the Chaotic Star Sea.

After all, compared to that opening of the Sea of Stars, the Chaotic Star Sea was more important. However, the reason why he listened to Hongjun's suggestion to go to the Sea of Stars first was naturally that if he could seal that place again, he could change the current predicament of the Chaotic Star Sea and the Primordial Star Sea in one fell swoop. At that time, when he returned to the Chaotic Star Sea, he could gradually take back the Chaotic Star Sea, even fight his way into the Primordial Star Sea, or even fight his way back to the opening in the Sea of Stars.

Along the way, Han Fei traveled and killed for 18 years. Finally, he saw a collapsing Star River.

Yes, this couldn't be considered a breach in the Sea of Stars anymore. What Han Fei saw was a collapsed Star River. In this Star River, all the stars had collapsed, forming a hole, but it was completely different from a black hole, as if a hole had been stabbed in the sky.

Here, Han Fei saw a massive number of ominous creatures, including more than 400 dominators.

Besides, at the core of the opening in the Sea of Stars, Han Fei saw a total of 1,203 big cocoons, all connected to the pipes of a twisted ominous vine.

It was impossible for Han Fei not to recognize the creatures in these big cocoons. They were dominator-level ominous creatures.

In other words, there were as many as 1,600 dominator-level ominous creatures that were going to be born here.

"Damn it."

Even though Han Fei's strength had reached the peak of the Sea of Stars, he couldn't help but curse at this moment. When had he ever seen so many dominators? If these dominators could enter the Chaotic Star Sea at the same time, they might only need once to penetrate the Chaotic Star Sea.

[God of Fishing](#)

Chapter 3622: Fight the Ominous-Level Powerhouse (2)

Besides, he saw as many as 12 passages to the Chaotic Star Sea here.

Yes, the passages were like huge wells. Dense runes flickered beside the wells, looking like countless super arrays.

Han Fei saw with his own eyes that groups of ominous creatures were pouring into some of the wells at all times.

However, the ominous creatures that surged into the well were not in a high realm. Most of them had no intelligence.

However, there were very few ominous creatures in the five of the wells. And these five wells corresponded to destruction-level, world-ending-level, doomsday-level, god-slaying-level, and dominator-level.

This could be seen at a glance. The number of destruction-level ominous creatures was relatively not small. There were hundreds of millions of ominous creatures queuing up. But at the world-ending level, there were only a million people queuing up. And at the doomsday level, which corresponded to the Divine Realm, there were only a few hundred people queuing up. As for the God Slaying-level, there were even only dozens of ominous creatures. As for the dominator level, only one was entangled by various runes and had been waiting here for a long time.

Obviously, even if it was the ominous, it wasn't easy to go to the Chaotic Star Sea from the Primordial Star Sea. This explained why the ominous was accumulating strength and waiting before launching a large-scale attack.

Obviously, it would take them a lot of time to send a dominator-level ominous into the Primordial Star Sea. However, he didn't know how long it would take unless he could stay here for a long time to observe.

But clearly, the ominous wouldn't give him this chance.

However, this trip was not in vain. At least he knew that ominous creatures were restricted from entering the Chaotic Star Sea.

He had only stayed in the Primordial Star Sea for more than 8,000 years. Even if the ominous was constantly sending dominator-level ominous to the Chaotic Star Sea, there couldn't be many of them.

If this matter was easy, the Chaotic Star Sea would have long been conquered.

However, Han Fei couldn't help being curious at this moment. If the efficiency of teleporting powerful ominous creatures through this passage was very low, how did the ominous body of the Primordial Dao Ancestor pass through? In the past eight thousand years, the other party had returned twice.

Logically speaking, the Primordial Dao Ancestor was an existence above the dominator level. It should be even more difficult for such a strong master to reach the Chaotic Star Sea.

However, not only had the ominous body of the Primordial Dao Ancestor passed, but he had also almost conquered the first battlefield. Therefore, the passages he saw were definitely not all of them.

Or rather, the ominous had other ways to enter the Chaotic Star Sea. However, the price of the other ways was definitely not small. Otherwise, as he said, the Chaotic Star Sea would have long been conquered.

At this moment, Han Fei had already come this far. He had to fight. Besides, the dominator-level ominous creatures had already noticed him. Or rather, they had been waiting for him.

Han Fei shouted, "Sorry to keep you waiting. You really think highly of me."

Swish swish swish!

From the four hundred dominator-level ominous creatures, four dominator-level ominous creatures that looked extremely strong appeared in a row. If he guessed right, these four should be on the same level as the ominous creature he had killed before that could increase its strength to 49 pieces of Star River Source Power.

At this moment, Han Fei was a little speechless. If it was such a quantitative confrontation, even if he had the Time Splitting Technique, he didn't dare to use it.

Although he could use nine of his old bodies, he could only use one Demon Purification Pot. And this place could be said to be the source of the ominous so far. Needless to say, there must be a large number of ominous substances.

With Han Fei's current strength, he couldn't obliterate much ominous matter. He had to cooperate with the Demon Purification Pot to block the invasion of the ominous matter.

Therefore, once he used the Time Splitting Technique, as long as one of his old bodies was contaminated by the ominous matter, his original body would still be contaminated by the ominous matter.

The ominous had been in contact with the Time Temple for a long time. It was impossible for them not to know the ability of the Time Splitting Technique.

When he was out of the Guardian Divine Realm, Han Fei had no scruples, but here, he would never use the Time Splitting Technique. This meant that he had to fight so many enemies himself.

Fortunately, Han Fei had comprehended the third level of the path of invincibility. Otherwise, he could have returned home immediately. It would be awesome if he could escape.

One of the four strong masters said, "Human Emperor, it seems that you have reached the ultimate realm in the Sea of Stars. Although it's unexpected, do you think it's possible for you to seal this place again even if you come with the Demon Purification Pot?"

Han Fei snorted. "How will I know if I don't try?"

Boom!

Han Fei turned into lightning marks that filled the sky and immediately rushed to the location of the 12 passages. If he couldn't seal this place with the Demon Purification Pot, destroying these passages could also prevent the ominous creatures in the Primordial Star Sea from continuously entering the Chaotic Star Sea.

Of course, the ominous creatures were not stupid. Since they had been waiting for Han Fei, they certainly wouldn't let Han Fei destroy the passage between the two worlds so easily.

Almost at the same time, the four dominator-level ominous creatures erupted at the same time, and they could completely keep up with Han Fei's speed.

The moment Han Fei appeared, the four of them all followed Han Fei. In an instant, Han Fei threw out the Demon Purification Pot and slashed at the passages between the two worlds with the Immortal Slaying Knife.

[God of Fishing](#)

Chapter 3623: Fight the Ominous-Level Powerhouse (3)

Unfortunately, among the four of them, except for one who managed to restrain the Demon Purification Pot, the other three attacked at the same time, using their unparalleled divine might to fight Han Fei. In an instant, ripples shook and the law collapsed, but Han Fei failed.

As for the four hundred dominator-level ominous creatures, they didn't help him immediately, but triggered a large amount of ominous mist at the same time, sweeping Han Fei.

The ominous mist couldn't be touched in the first place. In the Chaotic Star Sea, only Senior Brother Undead and the Emperor Sparrow could enter and leave the mist without any pressure. Although others could enter, they needed to disperse their strength to resist and purify the ominous mist. But Senior Brother Undead and the Emperor Sparrow were different. They could directly eat it.

Han Fei didn't know how the Emperor Sparrow was doing now, but Senior Brother Undead had even snatched the ominous coffin and carried it on his back, but he still didn't become ominous.

At this moment, Han Fei knew that these four people must have used the ominous matter in advance. Otherwise, how could they have reached the level of 49 pieces of Star River Source Power so easily?

Seeing this, Han Fei didn't flinch at all. He waved his hand and the Demon Purification Pot appeared in his hand as he continued to rush towards the passages. He didn't believe that these dominator-level ominous creatures would dare to resist the Demon Purification Pot head-on.

In the past, when the Demon Purification Pot's ten vines were not fully retracted, it was indeed not strong enough. Even if its nine vines were already unparallelled, it couldn't swallow and kill too many ominous creatures at once. However, after the tenth vine returned, even if it was a peak-level ominous dominator, it could still suck it to death with some time.

Sure enough, this time, the four dominators didn't fight Han Fei head-on, but bombarded him from a distance to stop him.

Han Fei saw hope and immediately continued to destroy a passage. In the sky, on the ground and on his left and right, a kind of gray thing suddenly appeared. What else could it be but the ominous matter?

Obviously, the ominous creatures knew that Han Fei would try to destroy the passages between the two worlds, so they had already set up an inescapable net with ominous matter.

Of course, they knew the ability of the Demon Purification Pot, so they didn't expect to take Han Fei down with this blow. The four of them stood proudly in all directions at the same time, setting up an ominous ball cage condensed from ominous mist.

Outside, the ominous mist tide triggered by more than four hundred dominator-level ominous creatures crazily poured into the cage.

Han Fei was not frightened by the ominous matter. The Demon Purification Pot was not a decoration. When the net pounced at him, the Demon Purification Pot had already drilled a hole in it.

Seeing this, Han Fei slashed out with all his strength with the Blood Sky Blade. Sacred brilliance enveloped him, and the Supreme Will triggered the world. He slashed open the ominous ball cage set up by the four of them.

In the next moment, Han Fei jumped and moved thousands of kilometers horizontally. He stomped, and a lightning ring instantly crushed the surrounding void billions of kilometers. At the same time, lightning fire grew and began to spread. Even though the ominous mist covered the sky and the earth, it couldn't quickly extinguish the fire. Instead, most of it was instantly annihilated by the lightning fire, and the ominous mist in the void billions of kilometers was cleared up.

Han Fei said, "You should know that these can't trap me. Although you have 49 pieces of Star River Source Power, you are not on the same level as me."

It wasn't that Han Fei despised a few dominator-level ominous creatures, but it was the truth. Did the ominous have a supreme will? Did the ominous have an invincible will? Was the ominous killing intent stronger than his? Could the ominous dominate the pure power of lightning? Could the ominous control the law of life?

Neither, which was why Han Fei dared to fight.

Although the ominous matter was difficult to deal with, the Demon Purification Pot was not a decoration. The dual immunity effect of the Invincible Body could also avoid this power. Unless he was

enveloped by this thing for a long time, just like when he was forcibly brought into the Primordial Star Sea, the ominous matter could forget about contaminating him.

After all, if the ominous matter could contaminate Han Fei at any time, the Chaotic Star Sea would have long been defeated.

Of course, Han Fei could guarantee that he wouldn't be contaminated, but he had to admit that these guys did have the strength to hold him back.

With this in mind, Han Fei didn't intend to continue fighting with the four of them. It didn't make much sense. Since the passages between the two worlds couldn't be destroyed, he could only try to kill the four hundred dominator-level ominous creatures first.

If he could successfully kill these dominator-level ominous creatures, it would be a good thing. Otherwise, when these things entered the Chaotic Star Sea, they would be another big threat.

When Han Fei charged at the four hundred dominator-level ominous creatures, the four peak-level dominator-level ominous creatures naturally joined the battlefield.

Bang! Bang! Bang!

Boom, Boom, Boom ~

In just a moment, within this Star River, a fierce battle erupted. Ripples shook and purifying brilliance shone, creating a truly earth-shattering spectacle.

However, not long after the battle began, Han Fei's heart became heavy. It wasn't that he was no match for them, but that he discovered that his River of Life was almost ineffective near this Sea of Stars void.

Most of the dominator-level ominous creatures were still far weaker than Han Fei. Under normal circumstances, Han Fei could easily cut off their river of life and purify or destroy them.

But this time, the law of life was distorted. Every time he activated the law of life, a dark power would touch the river of life and corrode the law of life.

This was the first time Han Fei had encountered such a situation.

After fighting for a full hour, Han Fei finally killed about 21 dominator-level ominous creatures under the siege of the four peak-level dominator-level ominous creatures. However, only three of them were really killed by him. And these three didn't die by Han Fei's own hands, but by the Demon Purification Pot.

[God of Fishing](#)

Chapter 3624: Fight the Ominous-Level Powerhouse (4)

At this moment, someone among the four leading ominous creatures sneered. "In this place, we are immortal. Even if you master the law of life, it's useless."

However, Han Fei didn't give up. Was it slow to kill three dominator-level ominous creatures in an hour? In fact, it wasn't slow at all. At this speed, he could kill thirty or forty in a day. It would only take him ten days to kill more than four hundred dominator-level ominous creatures.

And his invincible body could be maintained without stopping.

Han Fei didn't seem to hear the other party's mockery. His endless methods quickly changed and rotated. After only three hours of fierce fighting, the Demon Purification Pot had killed ten dominator-level ominous creatures.

These dominator-level ominous creatures also realized that Han Fei was difficult to deal with. Under the order of the four top powerhouses, they all retreated.

Seeing these dominator-level ominous creatures retreat to the center of the opening in the Sea of Stars, Han Fei was about to attack, when he saw that the bodies of these four hundred dominator-level ominous creatures all emitted a wisp of ominous matter.

When these ominous substances gathered more and more, they gradually gathered into a human shape.

At this moment, the four strong masters didn't continue to attack but stood behind the person.

At this moment, Han Fei had also stopped and confronted the ominous person who had condensed. This person was dressed ordinary and expressionless.

However, the moment he attacked, Han Fei seemed to feel that what he was facing was not a person at all, but a world, a Sea of Stars.

This was the second time Han Fei had this feeling. The previous time was when he and Ximen Linglan looked at the land of no return in the long river of the world and saw the ominous beyond the dominator rank fighting Eldest Senior Brother.

"Ominous level?"

This time, Han Fei didn't attack immediately but shouted.

He was shocked. How could there be so many ominous-level powerhouses? But if the other party still had such a powerhouse, why didn't he go to the Chaotic Star Sea?

If he went there, there would be two dominator-level ominous creatures attacking together, then how could the myriad races resist them?

Han Fei returned to his peak state in a few seconds, but from this moment, he knew that it was impossible to put the Demon Purification Pot back.

After all, he had just advanced to this realm and didn't have much experience fighting the ominous. In just a few rounds, he was almost beaten out of the Sea of Stars.

However, the ominous creature made of ominous matter appeared in front of Han Fei in an instant expressionlessly.

Swish! Swish! Swish!

The two of them flashed quickly in the Star River, and in a second, the two of them shuttled nearly a hundred times. Han Fei wrapped his body with his invincible will and activated the Draw Technique, but he was pressed down by the other party's palm.

The ominous slapped back at Han Fei, but Han Fei didn't retreat but advanced. His body was shining with divine brilliance, and he spewed out the supreme sword intent from his mouth. The other party didn't seem to care at all. He continued to slap, as if he wanted to break Han Fei's invincible body.

"Pfft!"

Boom ~

At that moment, with the protection of the Invincible Body, Han Fei took the blow forcibly. In exchange, he created a sword to break the situation and cut off the ominous arms.

Han Fei, on the other hand, was hit by his palm and pushed billions of kilometers away. His Invincible Body was a little dim. There was a palm mark left on his chest, which was filled with ominous matter that didn't dissipate for a long time. Even the Invincible Will couldn't purify this power. It was the Demon Purification Pot that extended from between his eyebrows and swallowed the remnants of this ominous matter.

Last time Han Fei fought the ominous body of the Primordial Dao Ancestor, he was mainly beaten and had almost no room to fight back.

This time, he really felt the horror of the ominous level.

"As expected of the ominous-level."

God of Fishing

Chapter 3625: A Reminder Across Eras (1)

After only fighting this ominous-level creature for a moment, Han Fei felt tremendous pressure. He couldn't imagine how his Eldest Senior Brother had fought this thing for thousands of years.

Of course, the situation he was facing now might be a little more complicated than Eldest Senior Brother's. Eldest Senior Brother only stopped one ominous level, and there were too many dominator-level ominous creatures here. There were also four dominator-level ominous creatures that had almost reached the extreme.

The battle between the two parties didn't stop. Although the ominous-level creature's arms were cut off, the recovery ability of the ominous matter exceeded his imagination. Even with the killing intent of the Dao of Slaughter God, the other party could still reconnect his arms in an instant.

The battle was still going on. The ominous-level creature tried to break Han Fei's Invincible Body by exchanging injuries. However, the Invincible Body controlled the power of the world and could fight continuously. In addition, Han Fei had the Supreme Will. Even if they fought for a day and a night, neither side could do anything to the other.

However, the other party didn't just have this ominous-level powerhouse. The other four strong masters and the four hundred dominator-level ominous also participated in the battle. Although only the four strong masters could keep up with Han Fei's speed, it still caused Han Fei to be outnumbered. In a day, he was bombarded tens of thousands of times.

Of course, on this day, Han Fei almost killed all the four strong masters, but the other party recovered in the blink of an eye.

Such a high-intensity battle gave Han Fei no chance to attack ordinary dominator-level ominous creatures.

Many times, Han Fei wanted to use the Time Splitting Technique, but he held himself back in the end. If he guessed right, the other party might be waiting for him to do that.

In the end, Han Fei retreated from this opening in the Sea of Stars. However, after he retreated, even the ominous-level powerhouse didn't chase him.

"Huh?"

Han Fei was slightly surprised. The other party was so strong. How could they not chase him?

Han Fei grinned and said to the ominous-level creature, "So, you actually don't dare to leave the protection of this opening in the Sea of Stars?"

One of the dominators said coldly, "You think too highly of yourself. I didn't chase you just because there's no need. Human Emperor, neither of us can do anything to the other. Although you are powerful, you are at most at the level of Void. However, strong masters like you are limited after all. You can only protect yourself at most. You can't do anything else."

Han Fei sneered. "You have no right to speak here. Hey, aren't you above the dominator level? Why aren't you speaking?"

From the moment this ominous-level creature was born, it had never opened its mouth. The other party was like a combat puppet without any expression.

The ominous-level creature still didn't speak but just looked at Han Fei quietly.

In fact, Han Fei was also full of doubts. Although he said that they didn't dare to leave the Sea of Stars, the ominous-level ominous creatures and the four dominator-level ominous creatures actually shouldn't be afraid of it. Anyway, he couldn't kill them.

In the next moment, he charged into the Sea of Stars again. This time, his goal was clear. He went straight for the four hundred dominator-level ominous creatures.

Of course, the ominous-level and the four strong masters wouldn't let Han Fei succeed easily. In this battle, the two sides fought fiercely for three days and three nights before Han Fei managed to catch a dominator-level ominous with the help of the Time Sky Sealing Lock and the Demon Purification Pot.

Yes, he grabbed the dominator-level ominous and dragged it out of the opening in the Sea of Stars.

However, the moment he tried to take the dominator-level ominous out of the area covered by the opening in the Sea of Stars, an extremely domineering power suddenly condensed. Immediately afterward, without Han Fei doing anything, the dominator-level ominous was swept by a sudden light of purification and instantly purified, leaving only an energy crystal.

"Huh?"

This was beyond Han Fei's expectations. The reason why he wanted to take a dominator-level ominous out to take a look was to test if the domain covered by the opening in the Sea of Stars suppressed his life law.

But who could have expected that there was an invisible barrier in this world, which didn't seem to allow them to walk out of this opening in the Sea of Stars at all?

"Hahaha! I see."

Han Fei realized why they gave up attacking him. No wonder so many strong masters of the ominous didn't attack the remaining Guardian God Realm in the Primordial Star Sea.

It turned out that they couldn't come out at all. This opening in the Sea of Stars was blocked by an invisible barrier, and it had the power to instantly kill them.

In that case, were the twelve well-liked passages in the opening of the Sea of Stars really leading to the Chaotic Star Sea? This time, Han Fei was a little uncertain.

These ominous creatures were clearly trapped. Their first thought should not be how to go to the Chaotic Star Sea, but how to leave this sealed space.

If the 12 passages didn't lead to the Chaotic Star Sea, they could only be passages to break through this invisible barrier, and the exit of the passages was very likely in the Primordial Star Sea.

Seeing that Han Fei had seen through the secret here, one of the dominators said coldly, "Human Emperor, don't think that you've discovered a shocking secret. This barrier is extremely unstable and may break at any time. Once we go out of here... no one can stop us. Not even you."

Han Fei sneered. "Who are you fooling? Come out if you have balls!"

Han Fei couldn't help but feel much more relaxed. His original purpose of going here was to use the Demon Purification Pot to seal this place again. But to his surprise, there was already some kind of seal barrier here. Although he didn't know who created this seal barrier, it was clearly the ominous' enemy. Otherwise, how could he enter and leave at will?

[God of Fishing](#)

Chapter 3626: A Reminder Across Eras (2)

Han Fei laughed. No wonder! Otherwise, with so many strong masters here, if they appeared at the same time, who could beat them?

Han Fei looked at the 12 passages again. Since he couldn't break them from the inside, he could break them from the outside. As it happened, he controlled the Vast Ocean Navigator. If the exit of these passages was in the Primordial Star Sea, he could quickly mince them. Even if their exit wasn't in the Primordial Star Sea but in the Chaotic Star Sea, he could still go back and easily find and mince it.

Han Fei immediately lost interest in the opening in the Sea of Stars. At least, he didn't have to worry about any big accidents here now. However, he didn't want to leave immediately, because he was also curious. Who had set up such a mysterious barrier here that even he didn't notice at all? Hongjun probably didn't know at all back then.

Immediately, the law of time surged in Han Fei's eyes and he began to trace back in time.

In Han Fei's eyes, the barrier of time was penetrated. In the blink of an eye, thousands of years passed like a gust of wind.

Finally, when Han Fei traced back to six eras ago, he saw the ominous mist emitting from here. Continuing to trace forward, Han Fei saw the brilliant river of stars flowing wantonly here. In the blink of an eye, he saw Hongjun arrive here. However, he knew all of this.

After another three eras, the picture in Han Fei's eyes finally froze.

This was because everything in front of him had turned into darkness. There was no Star River here, no sky full of stars, only infinite darkness.

"Is this what it looked like before the Primordial Star Sea was established?"

Han Fei was slightly stunned. This should be very similar to when the Chaotic Star Sea first opened. Although Han Fei had never experienced it, it was not difficult to guess.

Suddenly, the blurry figure of a three-eyed woman was bathed in rays of light and enveloped by a golden body. She seemed to step out of the endless void and appear in this darkness.

Han Fei tried his best to see the woman's appearance, but the law of time didn't seem to be able to reflect this person. He could only see a blurry figure in front of his eyes.

Han Fei could vaguely see that the woman's short hair reached her shoulders, and the battle suit on her body was dilapidated but shining. She sat cross-legged in this darkness, and purple Qi and blood suddenly erupted from her body, turning into a ripple that seemed to instantly ignite this darkness. The Qi and blood ripple kept spreading, quickly and crazily.

And there was more than one surging blood Qi. Nine blood Qi ripples spewed out of the woman's body, spreading infinitely far away before she stopped.

Han Fei couldn't help but be shocked. It was this Qi and blood that opened the world. Besides, unlike Hongjun transforming into the heavens, this woman was a real sky opener. She only opened the sky with the nine Qi and blood in her body. Although the price might not be small, it was better than Hongjun turning into the Chaotic Star Sea himself, right?

And this also meant that this woman's strength had definitely exceeded the dominator level, reaching an unknown level above the dominator level.

After releasing nine pieces of Qi and blood in a row, three strange objects appeared between the woman's eyebrows in a row. Yes, there were a total of three, and two of them were the Demon Purification Pot and the Creation Jade Plate.

As for the third strange object, it was a mirror. In the mirror, divine light bloomed, and then mysterious runes spread out, covering almost a swath of star rivers in a moment.

Crack~

Of course, Han Fei didn't hear anything, but he saw that after the mirror spewed out the runes, it suddenly shattered and turned into billions of mirror fragments, scattering in the range of this swath of Star Rivers. It wasn't until the mirror fragments completely melted in this void that the woman left the Demon Purification Pot and the Creation Jade Plate behind.

After doing all this, the woman didn't seem to be in a good state, but she still slowly got up and then... suddenly turned her head, her eyes seeming to penetrate the endless void as if she had discovered Han Fei who was prying.

Han Fei's eyelids twitched, and he felt that he had been seen through. And the woman did seem to be looking at Han Fei. When Han Fei was wondering if he should stop looking back in time, the woman nodded slightly at Han Fei and then spoke.

"#¥%..."

Han Fei was shocked. This woman could see him too? How strong was this woman?

He really wanted to hear what this woman said, but he couldn't hear it at all! There were as many as nine eras between the two of them for him to hear anything from her.

The woman seemed to be stunned for a moment too. As if realizing something, her expression strangely turned slightly ugly. The third eye between her eyebrows that symbolized the path of invincibility shone brightly. Then, the woman continued to speak.

This time, before he could hear anything, Han Fei saw a certain twisted power in the Time River, which seemed to be blocking the transmission of this sound.

Han Fei tried his best to maintain the operation of the law of time. There were even blood tears flowing in his eyes, but it didn't matter. And a vague voice seemed to appear in his ears, but it was incomplete.

"Don't... give up... There's no path... We... wait for you ...at the end of the sea ..."

The woman's voice vaguely came from the Time River. Wherever the voice passed, the Time River became unstable and even showed signs of collapse.

"Don't? Don't what?"

"Give up what?"

Han Fei could roughly feel that this sentence was definitely not "don't give up". There seemed to be a whole sentence in the middle that was hidden.

[God of Fishing](#)

Chapter 3627: A Reminder Across Eras (3)

"What path?"

"The end of the sea?"

"Sister, tell me again!"

This voice was very weak and distorted, even harder to distinguish than the ravings.

Han Fei listened hard and wanted to read the woman's lips, but the more he wanted to see, the more blurred the time became. And the woman on the other side of the Time River seemed to have discovered that the Time River was collapsing. Thinking that Han Fei might not be able to hear her at all, she stopped talking and raised her hand to draw four Dao Patterns in the void.

Bang!

The moment these four Dao Patterns appeared, the Time River here collapsed.

Han Fei's eyes were full of blood and tears as if he were blind.

However, this injury was obviously not a problem for Han Fei. The blood tears flowed back and recovered in the blink of an eye.

"Can't you just write?"

Han Fei was speechless. He immediately wanted to trace back in time, but when he opened the Time River again, he discovered that the parts of the Time River about this place were already chaotic.

Yes, the law of time at the opening in the Sea of Stars had completely turned into turbulence.

"Damn it!"

Han Fei's face changed slightly. He immediately copied and simulated the four Dao Patterns in his heart.

Among them, the first Dao Pattern was the simplest, and it was cracked by Han Fei in an instant, because this Dao Pattern seemed to correspond to the realm of a Monarch. As long as one was strong enough, it wasn't difficult to crack it. Even if one wasn't strong enough, it was possible to crack it slowly.

Han Fei was no longer a Monarch, so he could easily crack it. After cracking it, he learned that it meant "Monarch, no name".

It only took Han Fei ten seconds to crack the second sentence, which meant "God, no contribution".

The third sentence was not difficult. Han Fei spent a hundred seconds cracking it too, which meant "Supreme, no heavens".

Han Fei's heart trembled, because he discovered that the third Dao Pattern corresponded to the Supreme realm. In other words, if he wanted to comprehend this line, it meant that theoretically, he needed to reach the strength of a Supreme and comprehend the Supreme Heart. Or, as long as he understood this Dao Pattern, he could comprehend the Supreme Path.

Therefore, the first three sentences that Han Fei had decoded corresponded to the three levels of Monarch, God, and Supreme. This meant that the next sentence was very likely to correspond to the realm above the dominator.

However, when he tried to disassemble this Dao Pattern and comprehend the true meaning of them, he couldn't feel anything. It was as if the fourth Dao Pattern was empty and didn't say anything.

"Impossible!"

Han Fei knew that it was impossible for the woman not to see through his strength. To be able to trace back to this era, she was at least at the level of a Sea Quelling God.

Therefore, the latter two of the four Dao Patterns left by the woman were obviously for Han Fei to see.

"Monarch, no name; God, no contribution; Supreme, no heavens..."

With Han Fei's current understanding, it was actually not difficult to understand. To explain it, if a Monarch wanted to enter the God Realm, he shouldn't be in the mood to make a name, which meant that he could put down what he was sticking to and enter the God Realm.

"God, no contribution" clearly meant that the gods didn't do anything intentionally, nor did they have any intention of seeking merit in the world. A god was a god, pure and powerful, not fighting for anyone or cultivating for anyone. Therefore, this purity should mean holding on to one's original heart and firming one's Dao.

"Supreme, no heavens" clearly meant that there was no heavens or earth in the eyes of a Supreme. Walking the Supreme Path was lawless, unrestrained, and uncontrollable.

These three sentences corresponded to the three realms of cultivation: Monarch, God, and Supreme. Then the fourth sentence could only refer to the breakthroughs and cultivation methods above the dominator realm.

Unfortunately, Han Fei stood still for a day but still couldn't crack the true meaning of this Dao Pattern.

Han Fei couldn't help but feel a little regretful. She could write, but she drew four Dao Patterns for him to crack.

Han Fei sighed in his heart, although he was really curious about the fourth sentence. He was also curious about who the woman was and why she carried the Demon Purification Pot, the Creation Jade Plate, and the mirror that had probably been destroyed.

Unfortunately, he had no chance to ask her now.

However, Han Fei wasn't discouraged. Although he couldn't crack the fourth line of the Dao Patterns yet, it didn't mean that he couldn't in the future.

After all, this was only condensed from Dao Patterns. As long as he cracked this Dao Pattern, it was only a matter of time before he deciphered it.

At this moment, Han Fei looked at the opening in the Sea of Stars again. The ominous-level creature and a large group of dominator-level ominous creatures were still staring at him.

Han Fei sneered and the Vast Ocean Navigator appeared in his hand. As he issued an order in his heart, he seemed to be asking something. After a few seconds, the Vast Ocean Navigator finally turned. Golden light flashed in Han Fei's eyes, and a smile appeared on his lips.

Although there were some out of his expectations, his guess was generally correct. Some of the 12 well-shaped passages led straight to the Chaotic Star Sea, and some led to other areas of the Primordial Star Sea.

Han Fei was about to turn around and leave when the ominous-level creature suddenly spoke.

"Human Emperor."

Han Fei suddenly looked at the man sharply. "Can you speak?"

For a moment, Han Fei had a bad feeling. This ominous creature was different from the ominous body of the Primordial Dao Ancestor he had seen. This one was formed by ominous matter right under his nose.

Although Hongjun and he both guessed that the ominous matter was active and conscious, when he really saw that the ominous matter had consciousness, he couldn't help but still feel surprised.

[God of Fishing](#)

Chapter 3628: A Reminder Across Eras (4)

The ominous creature slowly said, "This barrier is not unbreakable. Otherwise, the ominous wouldn't have spread throughout the Sea of Stars. Even if you destroy these passages, it's useless. You should be able to guess that in addition to these passages, the ominous has other ways to enter the Chaotic Star Sea."

Han Fei sneered. "No matter what you have, there are always restrictions. Otherwise, why would you have to fight for several eras? As for these passages, I'm going to destroy them. Come out and bite me if you have the ability!"

The ominous creature said in a low voice, "I'll give you two choices."

Han Fei was about to sneer, when something suddenly cracked in the depths of the Sea of Stars. Then, Han Fei's face gradually turned dark.

In the opening of the Sea of Stars, two boundless cracks slowly appeared, like two huge eyes that contained a river of stars. It was weird and creepy.

Just by looking at the two huge eyes, Han Fei felt that his blood was not flowing smoothly, and his heart was blocked.

At that moment, Han Fei seemed to be caught in some kind of illusion.

He saw war, billions of stars were collapsing, all creatures were dying, and the Sea of Stars was collapsing. It was as if there was an invincible power gradually swallowing the Sea of Stars. And he seemed to be caught in endless battles, fighting desperately in the darkness, unable to see the end of the war.

"Divine Path?"

Han Fei had seen such a scene before. He had vaguely seen it when he saw his divine path in the past. War and killing were the main theme of this divine path.

However, when he saw it again today, it became different. In the endless war, he seemed to feel tired.

He seemed to understand in a daze that he was walking on this divine path, and this path had no end. This was what the ominous wanted to tell him. It seemed to be telling him that no matter how he

fought, in the end, he would be the only one left on this path, fighting alone in the darkness, and everything would collapse.

The ominous said again, "No one can stop me, but if you are willing to hand over the Primordial Star Sea, I can promise you that I won't attack the Chaotic Star Sea for a great era."

"Heh ~"

Han Fei sneered, but he didn't refute immediately. Instead, he continued to look at the depths of the crack in the Sea of Stars. After a long time, he suddenly said, "If you are willing to tell me what you are, I can consider it."

The ominous replied without any emotion, "I am the home, I am the end, and I am the beginning. I am the end of the Dao."

Han Fei was a little irritable. "What bullsh*t? Tell me clearly what you are."

The ominous was still calm. "You can't understand. If I pay a certain price, I can still descend into the Chaotic Star Sea."

Han Fei sneered. "Then please pay the price. I'm not Jiang Taichu. I won't reach any agreement with the ominous. Since you want to fight, let's fight."

Seeing that Han Fei was about to leave again, the ominous couldn't help but laugh dryly.

In the next moment, he said, "Human Emperor, you are the second person to come here after Hongjun. You are also the first person who can force me to pay the price. Do you want to know how I descended into the Chaotic Star Sea?"

Han Fei wanted to leave for the second time, but he was stopped by this thing. It would be a lie to say that he wasn't curious. At this moment, the dominator-level ominous wrapped in 1,203 big cocoons began to move.

Bang!

Suddenly, one of the big cocoons exploded, and even the dominator-level ominous creature inside was annihilated, turning into an ominous matter that surged into the sky and began to circle.

Then, big cocoons exploded one after another, and the dominator-level ominous inside was all annihilated.

Han Fei's pupils were constricted. "Are you crazy?"

The ominous slowly said, "If you want to descend, you have to pay a price. Otherwise, I would have taken down the Chaotic Star Sea long ago, right? They're merely dominator-level ominous. They were born just for my descent."

Immediately, Han Fei's face changed drastically. The annihilated ominous creatures turned into ominous matter, corroded the sky, pierced through the endless void, and finally formed a mysterious array. Even this invisible barrier couldn't resist them.

This was indeed the destruction of the dominator-level ominous. Han Fei had thought that if he could kill one more, the threat of picking up the Chaotic Star Sea would be reduced. But now it seemed that his pitiful kill number didn't seem to be meaningful at all. The ominous level didn't care about the death of the dominator-level ominous at all. These more than a thousand dominator-level ominous creatures sucked by the big cocoons and straws were just his tools to descend into the Chaotic Star Sea.

The ominous-level creature looked at Han Fei with a weird smile. "Why don't we compete and see who will reach the Chaotic Star Sea first?"

At this moment, Han Fei seemed to understand why the ominous wouldn't descend on the Chaotic Star Sea until several great eras later. It was because he needed to accumulate dominator-level ominous as his nutrients to pave the way for himself.

However, he was still a little puzzled. Why could the ominous body of the Primordial Dao Ancestor return? It seemed that he didn't have to pay such a price at all.

This question instantly appeared in Han Fei's mind. They were all above the dominator level. The ominous body of the Primordial Dao Ancestor seemed to be able to easily enter the Chaotic Star Sea.

After all, in the past 8,600 years, that guy seemed to have returned twice. Could it be that the one who returned wasn't the real Primordial Dao Ancestor's ominous body?

But something was still wrong. The real ominous needed to pay such a huge price to enter the Chaotic Star Sea. How could the Primordial Dao Ancestor's ominous body enter the Chaotic Star Sea not long after he met him?

If he had a way, why didn't he go to the Chaotic Star Sea earlier? After all, when Eldest Senior Brother stalled the ominous, he had full time to take action. Furthermore, Senior Sister Shen Le and the others at that time shouldn't be a match for him at all.

In fact, if the Primordial Dao Ancestor's ominous body attacked together with this ominous creature formed by the ominous matter, even Eldest Senior Brother probably wouldn't be able to resist it, right? Why didn't they attack together?

Suddenly, Han Fei had a bold guess. "The intentions of the ominous body of the Primordial Dao Ancestor and the real ominous are not aligned."

[God of Fishing](#)

Chapter 3629: Crisis of the Two Worlds (1)

Han Fei's guess was not unfounded.

In an instant, he understood something.

The most important thing was that the difficulty of entering the Chaotic Star Sea was too great.

The real ominous in front of him needed to sacrifice 1,203 dominator-level ominous to pave the way for him, and this shouldn't be the first time he had done this.

However, the ominous body of the Primordial Dao Ancestor seemed to only need to sacrifice a peak-level dominator-level ominous to build a passage between the two worlds. This was beyond doubt. After all, Han Fei was dragged into the Primordial Star Sea like this.

They were both ominous-level powerhouses. Why was it so difficult for the one in front of him to descend into the Chaotic Star Sea? But why did the ominous body of the Primordial Dao Ancestor descend so easily?

More importantly, as long as the Primordial Dao Ancestor wanted, he had almost countless chances to descend, but he didn't do so. Why did he have to wait until now? Not only had he descended into the Chaotic Star Sea, but he had also conquered the first battlefield?

He instinctively felt that the water was too deep, and there seemed to be a layer of mist between him and the truth. At this moment, Han Fei felt a sense of déjà vu. Wasn't this how those chess games Old Han set up back then made him feel? He seemed to see the truth, but there were always hidden secrets waiting for him.

"Is Hongjun really trustworthy?"

Han Fei couldn't help but ask himself.

At this moment, Han Fei frowned. Although Hongjun and his ominous body should be completely irrelevant, it was Hongjun's suggestion for him to come to the Sea of Stars.

He also felt that this trip was meaningful, so he accepted it and came alone.

However, he didn't expect to see the ominous being sealed all the way here. They even had to pay a huge price to walk out of the seal.

Obviously, unless it was absolutely necessary, the ominous didn't want to sacrifice so many dominator-level ominous for nothing. However, because of his arrival, his unwillingness to compromise, and his strength, this ominous chose to descend into the Chaotic Star Sea.

"Wait..."

Thinking that this ominous person chose to descend into the Chaotic Star Sea, Han Fei sensed something strange.

Han Fei immediately shouted, "Aren't you afraid that once you leave, I will destroy your nest? Don't forget, I can enter this invisible barrier at will."

However, this ominous person looked at Han Fei with pity. "Hongjun thinks that giving you the Creation Jade Plate can increase your luck and luck. What a joke. He has been in charge of the Creation Jade Plate for so long, but he's just a turtle in a jar. What's the use of giving it to you? In the end, the two of you know nothing about me or this place."

Han Fei was too lazy to care about the ominous mockery. Instead, he said coldly, "Why didn't you go to the Chaotic Star Sea the moment I fell into it, but today?"

The ominous asked, "Why do you think I'm eager to enter the Chaotic Star Sea?"

"Aren't you? Isn't swallowing the Heavenly Dao of the entire Chaotic Star Sea your pursuit all this time?"

However, the ominous sneered. "From the Chaotic Era to the Primordial Era and to this day, the Star Rivers that the myriad races can still control are probably not as good as the Three Thousand Star Rivers guarded by Hongjun. How long do you think the strong masters of the myriad races can last? Why should I be anxious? As long as I descend again, even if you can resist me, the Chaotic Star Sea can no longer withstand long-term battles. So, why do you think I need to be anxious?"

Hearing this, Han Fei couldn't help but have a strange feeling, because he found that there was nothing wrong with what the ominous said.

Although in the history of the Chaotic Star Sea, the ominous had never won, it was indisputable that the living space of the myriad races in the Chaotic Star Sea had been extremely compressed.

From the moment the Chaotic Star Sea was divided, the Chaotic Star Sea was actually gradually falling. Apart from the number of strong masters, the Chaotic Star Sea was indeed not much better than the Primordial Star Sea.

At the very least, the Primordial Star Sea had the Guardian Divine Realm, but in the Chaotic Star Sea, only the strong masters like Senior Sister Shen Le could protect the myriad races. The only way was to fight.

Han Fei sneered. "It seems that you were forced to descend into the Chaotic Star Sea this time?"

The ominous smiled contemptuously. "Look, didn't you guess it? Why do you think you fell into the Primordial Star Sea? It's just that Hongjun's ominous body deliberately did it. Your appearance changed the unchanging layout of the Primordial Star Sea and broke the peace of the Primordial Star Sea. With your strength as a peak-level dominator, the only meaning for you to appear here with the Demon Purification Pot is to force me to leave the Primordial Star Sea."

Han Fei thought about a lot of things in an instant. One thing he was sure of was that Hongjun's ominous body had different intentions from this ominous. At this moment, the ominous meant that he was forced to leave. In other words, it was Hongjun's ominous body that pulled him into the Primordial Star Sea with the purpose of forcing this ominous to descend into the Chaotic Star Sea.

However, what was the purpose of Hongjun's ominous body?

The ominous' purpose was to destroy all races and control and devour the Chaotic Star Sea. Hongjun's ominous body had no intention to help this real ominous, so he shouldn't let the real ominous obtain the Chaotic Star Sea at this moment.

Suddenly, Han Fei thought of something.

Yes, the current ominous had been trapped in the opening of the Sea of Stars. Then was the ominous mist and ominous creatures that covered the entire Primordial Star Sea really controlled by him? Would the Hongjun Ominous Body, which was also above the dominator level, allow the real ominous to control all of this? The answer was clearly no.

[God of Fishing](#)

Chapter 3630: Crisis of the Two Worlds (2)

"He wants the Primordial Star Sea?"

At this moment, he seemed to understand. Hongjun's ominous body had always wanted the Primordial Star Sea. The reason why he forced the ominous to leave was that he had already controlled all the Primordial Star Sea except the Guardian Divine Realm and the opening in the Sea of Stars.

Contrary to the layout of the Primordial Star Sea, the real ominous was the one who kept descending into the Chaotic Star Sea. Therefore, the real ominous was the one who controlled the Chaotic Star Sea. Even if the ominous body of Hongjun conquered the Chaotic Star Sea, he couldn't swallow the Heavenly Dao of the Chaotic Star Sea.

Therefore, the two had different goals.

Hongjun's ominous body had helped the real ominous fight for more than 8,000 years and even conquered the first battlefield. And the price to pay for the real ominous was to leave and give up the cake of the Primordial Star Sea.

Seeing the change in Han Fei's expression, the ominous couldn't help but say mockingly, "It seems that you've figured it out?"

Han Fei said coldly, "In the Chaotic Star Sea, the Three Temples are still there. Senior Sister Shen Le is in the same realm as me at this moment. Why do you think you can conquer the Chaotic Star Sea?"

The ominous voice said leisurely, "You've underestimated me... I should go. You'll figure it out sooner or later. Take it as a reminder. It's not that you don't have a chance now. If you can stay in the Primordial Star Sea, Hongjun's ominous body can't beat you, and you might be able to control the Primordial Star Sea again, but I'll definitely conquer the Chaotic Star Sea."

In the opening of the Sea of Stars, the dominator-level ominous that was wrapped in more than a thousand big cocoons had all exploded, and the entire opening of the Sea of Stars was filled with a vortex made of ominous matter.

Han Fei roared and slashed with all his strength, but the knife was corroded by the ominous matter in midair and couldn't hit the ominous vortex at all.

Han Fei made up his mind and stepped into the opening of the Sea of Stars again. However, this time, when he stepped in, he immediately felt an infinite suction force, and this place was filled with ominous matter.

After only one step, Han Fei had to retreat. The passage formed by sacrificing more than a thousand dominator-level ominous creatures was too terrifying. Even he was no match for it.

The ominous chuckled. "You can also descend into the Chaotic Star Sea with me."

"Bah ~"

Han Fei was not stupid. He could indeed be teleported with them, but during the teleportation, he would definitely be corroded by the ominous again and have nowhere to escape.

If he was corroded again, he wouldn't even know how to transform into the Heavenly Dao.

"Damn."

Han Fei could only watch helplessly as the four strong masters and more than four hundred dominator-level ominous creatures entered the ominous vortex at the same time.

At that moment, Han Fei also saw that a large amount of gray powder from the depths of the hole in the Sea of Stars was also absorbed into the vortex. The gray powder surrounded the ominous and slowly melted into his body.

In the end, a pair of pupils appeared from the depths.

Just now, Han Fei met these eyes. What he saw was his divine path, which indicated endless killing.

At this moment, he looked at it again, but what he saw was infinite darkness.

Han Fei had thought that it was some kind of ominous power. However, the ominous that was about to leave on the ominous vortex put on a strange smile at Han Fei. "Human Emperor, this is the Eye of the Heavenly Dao, representing the Heavenly Dao of this Primordial Star Sea. Why don't you take a look? Perhaps you still have a chance to control the Primordial Star Sea again. Otherwise, if Hongjun's ominous body controls this place, you won't be able to see it again."

"Eye of the Heavenly Dao?"

Wasn't this something ominous?

Of course, Han Fei knew the ominous intentions. The other party wanted to use him to restrain Hongjun's ominous body, and he said it very frankly. But if he was really entangled with Hongjun's ominous body in the Primordial Star Sea, it would be in line with the ominous intentions.

However, the ominous didn't know that he could indeed see some differences from the Heavenly Dao Eye.

Han Fei's mind fell silent at that moment. As if he had fallen into a dark chaos, a strange light suddenly flickered in the darkness. In the next moment, he seemed to see all creatures growing at a visible speed. In the starry sky, a divine fetus was born...

Han Fei was immersed in an inexplicable feeling. He felt that he seemed to have turned into a divine fetus. One moment, he was still a fetus, and the next moment, he was already above the heavens. In the next moment, his body crossed the infinite darkness and walked onto a black river.

Buzz!

Han Fei suddenly came back to his senses. The moment he sobered up, the Heavenly Dao Eye was already fading, as if it had been exhausted after showing him this.

"Is this the second divine path?"

Han Fei had three divine paths. He had thought that the three divine paths corresponded to his original body, Han Song, and Zhang Daqian.

However, it wasn't until this moment that he realized that it didn't seem to be the case. The three divine paths only corresponded to him. Recently, the Heavenly Dao Eye had demonstrated two divine paths for him, but he didn't understand them!

What did the divine fetus that was born mean?

Unfortunately, the Heavenly Dao Eye was the Heavenly Dao after all, not a human. It couldn't tell him the details, so it could only give him some inexplicable inspiration.

At that moment, Han Fei seemed to see a river of black water flowing out of the eyes.

"Do the heavens cry too?"
