

Gacha 1041

[Chapter 1041 - Get A Tattoo](#)

From that day on, Alex began sorting all the knowledge about Alchemy. To be honest, he felt he had covered a great deal of knowledge in just one year. First of all, he had knowledge about Alchemy, Array, and Forging. And in another inheritance, he got the information about Element Arts and Martial Arts.

Unfortunately, he never had time to learn all of them. Even though he was sure that most of the information would just go to the dump, he still learned a lot.

Alex promised himself to learn about Forging, Element Arts, and Martial Arts even if it took a few months to finish it. This would surely give him an advantage in the long run.

As soon as Alex completed his training, Alicia and Lilda quickly tested his understanding of array. They were shocked because Alex understood most of the questions and answered them pretty well.

Lilda even gave an acknowledgment as proof to be one of the masters in arrays. As long as he could use the arrays perfectly, Lilda believed that Alex wouldn't lose to a normal master.

In fact, he might become at Alicia's level in an instant.

They taught Alex the practical way to use an array and a few methods to create the symbols. There was also a way to draw an array in the ground, tree and other things. They covered all those environments in order to allow Alex to leave his array anywhere.

Alex was very eager to learn all this knowledge, especially after understanding the wonder of Alchemy from Firia. Arrays also held that kind of potential.

After that, he went to another topic which was the Array Plate. He even got a chance to draw some Array Plates to the fullest ability. However, Alex became more absurd at this point.

He showed Lilda his Simulation Room. She couldn't be more surprised because this was her first time to see an illusion world as complete as Alex's Simulation Room.

Lilda didn't forget to remind Alex not to show it to anyone else because that technique was far too monstrous than he could think. Alex said, "He understands."

Although a bit unwilling, Lilda agreed with him and let him use the array whenever he liked.

It took a while, but Lilda also decided to draw the tattoo despite having yet to reach the time limit.

Alex told her the five Arrays he wanted.

The first and most important was his Teleportation Array. However, the second one was a Barrier called Star Barrier Array.

This barrier used the power of the star, but when Alex took another look at it, he realized that his Pure Fire could replace the power of the sun, allowing him to release more power for this barrier.

The second Array was Sun Moon Reflection. The array he had been using this whole time to create a Special realm.

As for the third array, Alex chose a Bind Array called Ten Thousands Sword Formation Array. As the name implied, it summoned thousands of swords that could seal one's movement. Alex even tested it himself, and it was pretty effective when someone got trapped in the array.

But he also realized that with enough strength, you could break free easily. Even his Pure Fire burned all the swords before they could even touch him. That was why Alex believed that the charm of this technique was when the enemy had no way to escape anymore.

Since his main fighting style revolved around his Sword and Spear, he used this one for support instead. Besides, his Sword Qi would be of help in this area.

After taking a while to come up with the last array, the fifth array, which was supposed to be an elemental array, was the Hellfire Array. This array allowed him to create an undying fire with his Pure Fire.

Of course, it remained blazing as long as the array was still there. If it were taken out, the flame would naturally disappear.

After listening to what he wanted, Lilda offered a few solutions, but Alex seemed to have something in his mind when picking all those arrays. Understanding the reason behind them, Lilda gave her approval and continued to draw the tattoo.

The information was enough after all.

They arrived inside a white room with a chair in the middle along with weird equipment in all places. He looked around and asked, "Are you living here?"

"Of course not. I apologize if it's too messy...I don't have time to put the trash away."

"Why don't you ask someone to do it for you?"

"It's fine. I can do it later and it won't affect me." She waved her hand before shaking her head helplessly. She stored all the trash with her Space Ring, but the liquid remained.

Kai decided to use his Pure Fire to evaporate them and made the place clean.

"Thank you, Your Majesty." She hurriedly thanked Alex when she saw her room became clean again.

"It's fine." Alex nodded before looking at the chair in the middle. From the structure alone, the chair looked like the chair that the dentist used. He asked, "So, I should sit there?"

"Yes. But I would like to know where you are going to place the tattoo.."

"Hmm. I haven't thought about that." Alex glanced at Alicia.

"I am not sure. You can do it anywhere, but since you already have one on your back, I think it's better to do it elsewhere. Maybe your chest or something..."

Alex looked down, falling into deep thought. After a while, he decided. "I will go with the forearm, near the shoulder like Alicia."

"I understand. I shall draw it there. Do you prefer your left one or the right one?"

"Left."

She nodded. "Please sit on the chair."

Alex followed her instruction and sat down, but the chair soon changed its posture from sitting to lying down.

"Please turn around and lie on your belly. Also, it's better to take off your shirt, so it allows me to do it faster with more precision."

"How long do you take before?" Alex asked while unbuttoning his shirt. He took it off and handed the shirt to Alicia.

"It was two days. The symbols were very small, and I needed to carve three million symbols during the process. It was hard."

"I see." Alex nodded and laid down.

Instead of the usual way to draw like using a brush or something, Lilda brought a thin needle...A very thin one that even Alex had a hard time seeing.

"That's so thin..." Alex couldn't help but comment.

"I have this one with me." She brought glasses that seemed to have the effect of an amplifying glass. "Since I don't need to make a different tattoo's image, I don't need to redesign it to fit the image."

"I will leave everything in your care." Alex nodded.

"Yes." She then brought a bottle of Divine Monster Blood and opened the lid. The blood gradually floated to the air as it slowly filled up the needle in her hand.

"It won't hurt, but please don't move since it's easy to mess up."

"I will go outside then." Alicia thought it was better to leave these two alone since Lilda could concentrate more, and Alex didn't need to see her as it might distract him.

"You sure?" Lilda asked.

"Yes." Alicia put on a gentle smile and left the room.

Meanwhile, Alex nodded his head. "You may start."

Lilda took a few deep breaths and began drawing the symbols.

Just like Lilda said, he didn't feel pain. In fact, he didn't feel anything as if nothing touched him.

He glanced at Lilda's serious face and decided to close his eyes to avoid distracting her.

...

One day later, Alex felt power surging into him. The gears that were created finally began working. He felt the connection between him and the array. With only channeling his energy and creating a few more symbols, he could use an array in an instant. This would be the biggest advantage an Array Master could hope for.

"Your Majesty. I have finished." Lilda smiled and stepped back, looking at the tattoo.

Alex gradually opened his eyes and bowed his head to Lilda. "Thank you. How can I repay you?"

"Please don't think about it, Your Majesty. I am the one who can't repay you." She shook her head.

"No, no. Those who work deserve to be rewarded."

"Is that so?" Lilda looked down, falling into deep thought. "I don't know what I actually want. I am just happy to see that Your Majesty is fine."

Alex smiled. "Thank you. You can think of it in the meantime and tell me when you know what you want."

"I understand." Lilda nodded. "For now, I think Your Majesty should try it first."

"Yeah." Alex agreed and rose. He took a few steps back and channeled his Divine Energy to the tattoo. The information about what kind of layers he wanted to use flashed in his mind.

He only needed to direct the Divine Energy to use them. However, he couldn't use all of them since they would clash with each other.

Alex chose the first one, the Teleportation Array. His Holy Emblem appeared behind his back as he tried to draw the remaining symbols.

However, he also found a few problems during the test. First of all, he was required to know which symbols he lacked and where to put them. The Holy Emblem also needed to be adjusted to his position depending on their usage.

The Teleportation Array was usually beneath his feet, so he tried summoning the Holy Emblem again and drew the symbols...Albeit failed once again.

"This is hard."

"Yes. Alicia...I mean, Her Highness Alicia also needed a few months to get used to it."

"You are her mentor, right? It's fine to call her like how you usually did unless the person said otherwise." Alex smiled.

"I understand."

"I see...A few months. And I need to know what symbols you have drawn..." Alex narrowed his eyes.

"In that case, this is the book of the symbols I have drawn. You will find everything other than the Ten Thousand Sword Formation Array since I will be drawing it right now." She handed a book that Alicia used to read to help her get used to this.

"Do you have a plan to get yourself tattooed?" Alex asked while receiving the book.

"Not at the moment. No one has enough skill to make this tattoo, so..." She sighed.

"No wonder. But you have a desire, right?" Alex asked.

"Of course I have. This technique will revolutionize the entire job itself."

"In that case, try to find someone and teach him/her to do this. I will give you enough resources to do that." Alex smiled.

"Is that so?" Lilda's expression brightened. "Our budget has increased?"

"Hmm?" Alex tilted his head in confusion.

[They usually drew Array Plates and self-sustained with the money they got from selling the Array Plates. Of course, we have given them a portion of our income, but I think it's not enough.]

'Then how about adding the money I got from Encore? I will probably get more if I go to the Dungeon God's place.'

[Just don't give it too much. They will go crazy. Ten billion Spirit Crystals should be fine.]

Alex nodded and looked at her. "How about ten billion?"

"Are you God?" Lilda quickly hugged him and brushed her cheek against him. "Yes. You are God that was sent here to save this place."

"Oi, oi." Alex twitched his eyebrows and just let her do what she wanted since she was so happy. "Don't be crazy with the money, okay? Besides, this is reward money for the tattoo."

"I will use it wisely, Your Majesty. I will surely improve the Holy Emblem with this much money."

"Well, there is an option to sell the service for this, but it's only the plan for the future."

Lilda blinked a few times when she heard the idea.

"This is the biggest method to get money...Well, this is for an emergency, so I will only think about it in the future. For now, keep improving the Holy Emblem and train some people you trust. Okay?" Alex smiled.

"Understood."

"Time to go to Alicia then."

[Chapter 1042 - White Ash Pill](#)

As one would expect, Alex underwent the training to unleash the full ability of his Holy Emblem.

It only took one month for Alex to get used to the Holy Emblem. Alicia then changed her plan and asked Alex for sparrings so that they could use it normally when fighting against their opponent. Of course, the fight was only filled with Arrays.

After that training, Alicia brought him back to Firia and did the last stage of their training, which was the joint practice of Alchemy and Array.

They trained inside the Simulation Room. Alicia and Firia agreed to give him a demonstration first, and Alex sat down in front of them, who were getting prepared for the refining.

Firia then summoned her flame again before tossing all the ingredients into the fire. As soon as they were warm enough, Firia quickly turned the flame into a carp with all the ingredients in its belly.

"I am ready. The Dragon Breathing Refining Technique is ready." Firia nodded, telling Alicia to proceed to the next step.

"Sure." Alicia snapped her finger as an array slowly appeared in the air. "Dragon Gate Refining Array."

Alex narrowed his eyes and found that the array had twelve slots with one center that should be filled with the Divine Monster Core.

As he expected, the carp turned into a full-fledged dragon and circled on top of the array. Its head was stretching toward the center as the Divine Monster Core flew to its brain as the dragon rested its head on the center.

As for the other ingredients, they went inside each slot.

Alicia quickly activated the array and sealed every single ingredient inside the slot.

"I am done. You can proceed to the next step." Alicia nodded with a smile.

Firia acknowledged it and changed the temperature of the dragon according to what they needed. It was more precise than the one Firia showed him during the training.

For the first time in his life, he could see the harmony between the three big jobs. It turned out they were connected with each other. The Array Master used the array while the Forging Master built the Alchemy Furnace. They helped Alchemist to refine a pill.

Of course, if the Array Master was on the focus, the Forging Master could build the structure for the array while the Alchemy created the harmony from all ingredients needed.

This concept applied to the Forging Master as well.

It turned out that despite them being separated, they could form a symbiosis.

Alex was impressed by the sight before him and continued watching them in silence.

After a while, Firia signaled Alicia to get ready.

"The refining is done. No need to expel the impurities. We will proceed to create the pill," said Firia while awakening the dragon.

"Understood." Alicia nodded and infused her Divine Energy to the array. "I can open the seal at your notice."

"Good. I will be done in 5...4...3...2...1...GO!" Firia shouted.

Alicia nodded and removed all the barriers that sealed them so the ingredients were connected again with each other.

Previously, all ingredients were only connected to the Divine Monster Core to harmonize the effect, but this time, they created a synergy with the other ingredients.

Firia's fire flared up, gradually turning the ingredients into droplets of liquid. The dragon then turned into a vortex with the Divine Monster Core as the center. The ingredients were absorbed into the array.

When she saw that it began to fuse, Firia quickly tossed the merged liquid into the furnace and sealed the lid. Alicia lowered the array and helped the refining process.

It took them ten minutes before the pill popped out.

Firia caught it and showed it to Alex. "This is the White Ash Pill. Pure Quality of course."

Alex checked it with his Spirit Eyes and nodded his head. "Well, we should have enough ingredients to make five pills. It will be for me, you, Evelyn, and Sherry. The last one...I am still not sure."

Firia furrowed her eyebrows. "Well, this is only the first harvest. We can harvest the ingredients again in the future, so we can save that one until you meet someone worthy of that pill. We have Stina, Kyle, and Ellen as the candidate. If you want to add Ragi to the selection, I don't really mind. However, I still can't trust him one hundred percent."

"I know what you mean..." Alex nodded. "Besides, I can give it to Fabio to increase his strength. Although killing is not possible to level him up, we can use Medicinal Ingredients and Pills to speed things up."

"Fair enough." Firia nodded. "The choice is yours."

"I will probably follow your idea and keep it for the time being. Maybe we can give the others later."

Firia shrugged and let him choose.

"Still, I believe you can reach Rank 7 God with the help of this pill. How about taking another one?" She smirked.

"You should know that I can't eat it for the second time..." Alex narrowed his eyes.

"It's only for ten years though. You can eat it later." Firia pouted.

"Well, I will think about it ten years later." Alex shrugged before summoning the ingredients. "Actually, I would like to consult something."

"What is it?"

Alex smiled and summoned his Fox Avatar. The fox glared at the two menacingly before lowering its head.

"This is the Fire Authority. I wonder if I can use it when refining. I mean, the earlier array makes me think something like this... If I turn the dragon into a fox, won't it be possible for me to use the universe's strongest fire technique to refine a pill?" Alex smirked.

"In a concept, it looks like we only need to change it, but there are more complex things you need to consider." Alicia shook her head and reprimanded him.

"Is that a no?" Alex sighed.

"I didn't say it is impossible. Maybe you can give it to Lilda and have her change something in the array. With her expertise, it should be possible." Alicia offered a solution. "And you just gave her ten billion Spirit Crystals, so I believed she would be pretty eager to help you."

"Now that you mention it, my personal wealth was a few hundred billion. I wonder how much Eulja's annual income..."

"Hmm?" Alicia furrowed her eyebrows, not knowing the answer. The same applied to Firia as she looked away.

Lin Xingzhi was the one who answered him.

[Don't ask those two. They always escaped when learning about this. Our gross income is about one hundred billion annually. Considering we need to give some for our developments, our net income is around one billion annually. Unless we have a new policy or something, we usually save it in our treasury.]

"I see. One hundred billion to one billion...One percent, huh." Alex fell into deep thought. "Well, we have a huge amount of soldiers along with the Six Elemental Gods, Five Guardians, and Ten Commandants. If we calculate the needs of the Military to keep improving... It should cost around fifty billion annually...Just a wild guess.

"Then there is Lilda. If we calculate all research and the cost for maintaining the castle, I guess it's a reasonable number." Alex nodded.

[Yep. You can use the income to cultivate. In fact, it's for all of us, including Alicia and Firia. It's not like we can use one billion in a year, right? Probably half of that and it gives us quite good progress.]

"Yep. I agree with you." Alex nodded. "For now, I will be giving the concept to Lilda. Maybe visit her again to show my Fire Authority."

Firia nodded. "In the meantime, we will be teaching you how to combine Array with Alchemy. You will be able to refine one by yourself since you are adept with both."

"Yes. Don't let me catch you slacking." Alicia repeatedly nodded.

"Okay, two madams. What are we going to do?" Alex smiled helplessly.

"We are..."

Alex began his training again.

...

A few months later, Alex stood in front of Alicia and Firia. This wasn't a Simulation Room anymore, but the real world.

He summoned his Godly Pure Fire and tossed all the ingredients inside his flame.

Since he would be the one doing all the refining process, he quickly summoned the Dragon Gate Array above his head while warming all the ingredients and turning his flame into a carp.

The moment the carp hit the array, it turned into a dragon. Alex repeated what Firia and Alicia did when demonstrating their skill in front of him.

Alicia and Firia observed his every movement to make sure nothing went wrong. Even though Alex had managed to increase his success chance to one hundred percent, they still needed to prepare for the worst.

Fortunately, the refining was done without any mishap.

"Done..." Alex let out a breath of relief, looking at the greyish white pill in his hand. "This is the White Ash Pill. It's a Perfect Quality one."

"That's good." Firia nodded. "Since it's done this way, how about we split the remaining four sets of ingredients for both of us? Alicia and I will refine two while you refine the other two."

"I am up for it. It will finish faster anyway." Alex nodded.

With that agreement, they began refining all the ingredients.

It took them a few hours, but the result was satisfactory. All pills produced were Perfect Quality Pills.

"We have finished our jobs. What are you planning after this?" Firia asked while handing the pills to him.

Alex received them and answered. "I am going to leave again after reaching Rank 7 God, but I don't know where I should go..."

[I have one place for you. It's a quite unique world where you will die if you speak.]

"What?" Alex widened his eyes. "You will die when you speak?"

[That world is filled with monsters sensitive to sound. When they speak, they will get noticed and killed. So, they don't speak.]

"Then, they can't speak?"

[No, no. It happened recently after a meteoroid struck that world. I will send you the information after this.]

"So, what do you expect me to learn from that world?" Alex asked.

[Not learn, but grab one thing.]

"Oh?" Alex's eyes brightened because he got one thing in his mind. "Undying Fire Body?"

[Yes. From what I know, they have a queen there that is attracted to Undying Blaze Root. Unfortunately, I don't know their exact location, so you might want to ask the locals there.]

"I understand. Anyone want to go together?" Alex smiled.

Alicia and Firia exchanged looks and shook their heads. "We will pass. Have something to do."

[I also can't do it this time.]

"Anna and Anya?"

[I asked them just now. They will pass as well.]

"Hmm..." Alex furrowed his eyebrows. "Letizia, Sherry, Rose, and Evelyn are not here. In that case... Should I go alone?"

[How about Silvia? It's been three years and a few months...But if you eat the pill first, it will be four years. I think it's better to solve it now, since the longer you wait, the harder it is for you to go to her.]

"Fair enough." Alex looked at the sky and nodded. "I will visit her now. After this world, I will go to another world with her...The one that I have promised to bring her."

[Yes. I will leave it to you.]

"Then, can you give Sherry the pill? And pass a message to her to take care of herself. I am waiting for our reunion."

[Will do.]

Alex then nodded and gave Firia the pill. "Now?"

Alicia saw that and smiled. "Do it in your room, alright? I will do my job now."

Alex and Firia agreed. Alicia then flew to the Ice Phoenix Tribe while Alex and Firia went to Firia's Room to cultivate together.

Meanwhile, in the Beast World, Sherry smiled when she received the message. She fixed her fancy purple dress and walked to the window, looking at the world from her room.

"It's been a while, Master. I also miss you. However, wait for me...I have reached Rank 8 God now. I will go back to you once I reach Rank 5 God. I love you..." Sherry smiled while looking at the pill in her hand.

[Chapter 1043 - Dungeon](#)

A few months later, Alex and Firia were still in the garden, refining the energy from the White Ash Pill.

Considering Alex had a superior Pure Fire, his aura was the first to increase.

Rank 7 God.

Alex cultivated the rest of the energy and gradually opened his eyes.

"Hmm..." Alex let out a small groan, looking at Firia in front of him. He smiled and thought, 'You almost reach Rank 8 God...Probably in one or two months since the energy is still there. It seems I can't really send my goodbye to you.'

[Congratulations on your cultivation.]

'Thanks. How are Anna and the others?' Alex asked.

[They have made good progress. Although only Sherry has reached Rank 8 God, the others are not really far from it. Maybe one or two years are enough.]

'I see. That's good.' Alex nodded. 'I will visit them to say goodbye since I will probably leave for a few months or so?'

[I think it will be a few years. Refining the Undying Blaze Root will take a lot of time, so...]

'Fair enough.' Alex nodded. 'Still, I don't know what to say to Silvia.'

[That's the only thing you can do. My only advice is to say everything honestly. Just like you said, what happens later is decided by fate.]

'I understand. I will just do that.' Alex rose from the bed silently to avoid waking Firia up and left the room.

Because they were separated from each other, it took him a few hours to greet the Five Guardians, the Elemental Gods, and his wives separately.

Even so, he felt that it was worth it...Even though they somehow forced a kind of "torture" for him to go through. Yes, the Elemental Gods and Guardians had yet to give up on him.

Alex could only shake his head helplessly.

After that, Alex wasted no time going to the castle to meet Lin Xingzhi.

In her room, Lin Xingzhi was still occupied with the system.

"You want to open the Gacha first?" She smiled.

Alex suddenly remembered that he planned to open it after his training was over. He scratched the back of his head and sighed. "Sure."

[Gacha Point: 33028]

[Gacha Coin: 437]

"Hmm...Four years and only four hundred?" Alex frowned. "I don't know if their luck is low or something, but this is just too horrible..."

"Haha... I can't argue with that, but I have set the chance accordingly, so it must be the former." Lin Xingzhi shrugged.

"So, I can't use the Gacha, no?"

"Not really. You can exchange the Gacha Points to Gacha Coin for a hundred to one exchange ration."

"I see. One hundred Gacha Points is equal to one Gacha Coin. In other words, a hundred Rare and Super Rare items are equal to one Ultimate Rare item. Not the best conversion, but I think it's good enough." Alex nodded in understanding. "I will exchange all of them then."

"Sure thing." Lin Xingzhi acknowledged the order and exchanged it.

"It feels weird to see that the system power you have is actually in front of you, but I can't do anything to it."

"Haha. The host can order me, but you can't interfere with the system. Everything has a cause and effect, so yeah, just don't think about it." Lin Xingzhi chuckled. "By the way, I have finished the exchange."

Alex took another look at his system.

[Gacha Point: 28]

[Gacha Coin: 767]

"Hmm...It has yet to reach one thousand. Ugh, I can't open anything. I need another world to get this kind of thing." Alex narrowed his eyes.

"I can't help it. I will only help you with the process, but I believe there is a need for a different approach." Lin Xingzhi offered a suggestion.

"What do you mean?" Alex tilted his head.

"First of all, you can use the world you are going to give them the strength to fight. The one that gets terrorized by unknown monsters..."

"Hmm...I don't really like changing the world too much, especially if they don't have a power system." Alex shook his head. He didn't like to interfere in the world of mortals. At the very least, he needed a world with a power system like the one he placed his system.

"It does have." Lin Xingzhi nodded her head. "Well, it's not as strong as Agar World...The world where Alicia and Firia were born, but it is definitely there. If I need an example, it's like the Earth's history. I mean...The one that says about Kung Fu and inner energy? Something like that. It's weak, but it's there."

Alex was still hesitant. If it were Earth, he might do it, especially since there were so many games or action stories out there. But this one...He wasn't sure.

"I want to mention this, but the monsters that terrorize them are numbered millions." Lin Xingzhi added one more thing to convince Alex.

"Oh, wow?" Alex blinked his eyes a few times.

"And if there is a queen, they will most likely give birth for more monsters...You know what I mean?"

Alex let out a long sigh. "I understand. You manage to convince me."

"Of course, I didn't say this just out of spite. I have prepared something for you." She smirked. "It's the dungeons."

"Dungeons? As in the one from the Dungeon God?" Alex widened his eyes.

"Exactly. After deciphering his concept, I have understood how he manages his dungeon." She smirked. "And after conducting several investigations, I have ascertained the possibility of dungeons in this world."

Alex narrowed his eyes. "Can you explain it to me in detail?"

Lin Xingzhi nodded with a smile. "First of all, you need a portal to another world. From what I can see, this world is attracted to one of the upper worlds near it."

"So, it's like the one where I placed my system?"

"Yes. Just reverse. So, this one is like the Agar World."

"I see. What to do?"

"First of all, you need to construct a dungeon which can easily be done with our technicians. In fact, I have asked a few people to create some since two years ago. And you need to find the portal to the other world there and unseal it. Of course, to prevent the other world from going to their world, you will need to link it to the dungeons while turning the portal into a one-way portal."

"I somehow understand..." Alex looked down, falling into deep thought. "After directing the portal to each dungeon, I will plant Rank 9 Teleportation Arrays...Maybe an Array Formation since the distance is too big. If I need to calculate, maybe tens of millions of symbols for one dungeon."

"Yes. After that, you need to establish the concept. We can use the Dungeon God's concept, which is to use all the things that the dead monsters can offer to teleport another monster from another world, supply the energy for the dungeon, and reap the benefit from the excess energy to get Spirit Crystals. This is another way for monetization." Lin Xingzhi explained.

"I see. That's a good concept. This way, I might not get Gacha Point and Coins, but I will get Spirit Crystals, boosting the revenue even further."

"Exactly. Of course, it's better to set multiple dungeons to maximize this effect. Besides, you need to make another array on the other side to kidnap those monsters and so much blood to create all of those things. Well, we will run the dungeons at a loss for a decade or two before starting to get the profit. If we calculate the time you will fight the beast, it's better to make this one as soon as possible."

Alex agreed. "I understand. I will make dungeons there after getting the Undying Blaze Root. Well, if we don't give the Gacha, the income will be reduced, but we don't need to supply them needlessly. It's not like our supply is infinite even if we buy things from merchant clans like Blackwade Clan."

"Yes. That's why the Dungeon God chose to be a Dungeon God instead of any other Gods. This one is the most profitable in the long run and can function automatically." Lin Xingzhi nodded with a smile.

"Alright. I will create several dungeons depending on the geography. Other than the dungeons, I should leave a teleportation array for them to take advantage of like the Dungeon God."

Lin Xingzhi nodded. "I will draw the concept and create the to do list. As for the details and addition, I will let you choose what you want. Is that okay?"

"Sounds good to me."

"Then, this matter is settled." Alex nodded.

"Alright. I'm done." Lin Xingzhi raised her hands. "Now go."

"Am I getting kicked out of the house?" Alex made a weird smile.

Lin Xingzhi chuckled and shrugged.

Alex kissed and hugged her before saying. "I am going then."

"Un." She nodded with a big smile.

Alex then turned around and disappeared.

...

Meanwhile, on another planet, a plain-looking grey-haired woman bent down on the ground, looking at the kid before her.

The kid was crying as his foot was grazed because he fell earlier.

"Don't cry. Let me treat your wound." The woman put on a gentle smile and began treating his wound.

"Wha—It's healed. It's like the wound never existed before. It's magic!" The boy looked at her with a star in his eyes. "Big Sister, you are so good."

"Thank you. You shouldn't cry, okay? You are a man after all." She smiled while patting his head.

"But why does Big Sister look so sad?" The boy tilted his head in confusion. Unknowingly, the boy seemed to be able to understand her emotion behind that gentle smile.

"Fufu, Big sister is not. Silly boy." The woman flicked his forehead and helped him up. "Let's go back then?"

"I am not a boy, I am already seven years old now. And I don't want to go back. I don't have a family and all the people in the village keep bullying me. Big Sister is the Forest Witch, right? The villagers called you like that. Can I follow you? I want to learn how to treat someone so their pain will be healed and they don't need to endure their pain anymore."

"Is that so? Hmm...Your eyes seem a bit special, but I can see that your heart is good. I won't easily accept a student, but I will consider it if I see your determination. First, how about you go back to your village and come to my place in the morning? If you can find my house, then I will consider taking you in. However, you should promise that you will use it for good. How about it?"

The boy's expression brightened. "Really? I will do it immediately."

"Good. Then, I will be waiting for you." She smiled and patted the boy's head before walking away.

"See you tomorrow, Big Sister." The boy waved his hand with a smile on his face.

When she reached a small hut in the middle of the forest, she entered her room with a complicated expression.

The boy's words just hit her hard. The boy's eyes were indeed special.

She subconsciously walked toward her bedroom, finding a picture frame on the table. She reached it and held it gently.

Tears began to swell up on her eyes before flowing down.

It was a picture of her with a golden-haired man.

"I wonder why...I have been here to forget the emotion and memory with you...But I just couldn't do it. Even though I haven't fallen too deep, the pain is this unbearable. Now that I think about it, how much pain did they need to suffer when you disappeared for five thousand years...Am I really qualified to be by your side?"

She stuttered. Her legs went limp. Dropping on her knees, she hugged the picture while crying. "No. The fact that I am like this...It's because I have fallen too deep."

She felt conflicted about whether to leave this world to fix the misunderstanding with Alex shamelessly or stay in this world and teach the boy here. At the very least, the boy could keep her busy enough to make sure she doesn't think about him again.

[Chapter 1044 - Solving The Misunderstanding](#)

As soon as Alex left the world, he broke the crystal that Silvia gave in their parting. He made sure to dust from the crystal inside his Divine Energy.

Suddenly, the dust had the urge to move to his right.

"It's this way?" Alex furrowed his eyebrows and summoned the Holy Emblem while creating the rest of the symbols for his Teleportation Array. It shortened the time he needed to create the Array, so his journey felt a lot faster.

Still, Alex kept using his Teleportation Array for one day already and the dust kept pointing in the same direction.

He believed in what Silvia gave and kept following the direction it pointed at until two days later, he finally arrived at the farthest world he had ever come. He never used his Teleportation Array for this long to barely reach the place. Other than Encore, who was significantly farther due to the existence of the Black Hole, this was his farthest trip.

Alex furrowed his eyebrows and found out that the world before him was also a Divine World, but the energy wasn't as powerful as Eulja.

"Maybe this world is like the Devil World...Yes, I believe it is. Rank 5 God is the limit, I guess?" Alex tilted his head and smiled. "She indeed has thought it through. Although she said she wants to live peacefully for a while, she has chosen the world carefully. In this world, no one can threaten her, and escaping is very possible if the need arises. Anyway, it's reassuring that she is doing just fine this whole time."

Alex used his Teleportation Array again to sneak inside the world after making sure that there wasn't any influence or whatsoever where he landed.

He appeared inside a forest and needed to shift his balance a bit because of the slope.

"Hmm...Where should I go now?" Alex muttered while looking at the dust, trying to see where to go.

Suddenly, he heard footsteps from behind.

"Mister. Who are you?"

Alex turned around and found a small boy walking with a basket filled with medicinal herbs. The boy had short black hair and quite rugged clothes after moving around the hill to grab the herbs.

"I am..." Alex fell silent and smiled. "I am searching for someone..."

The moment he said it, he felt the dust move as if pointing toward the top of the hill.

He didn't know whether it was really on top of the hill or somewhere else in the sky, he decided to answer him honestly. "I am searching for someone. Apparently, she is there."

He pointed at the top of the hill. Whether he was right or not, he didn't tell a lie.

"Hmm?" The boy tilted his head. "Are you searching for my teacher?"

"Teacher?" Alex widened his eyes.

Seeing Alex's surprised expression, the boy began to doubt Alex. However, he soon realized that he became her disciple only recently, so the people his teacher knew must have no idea.

"I..." The boy looked down.

"What is it?" Alex smiled before asking. "I am not sure whether the one I am searching for is your teacher or not, but looking at your basket, the possibility is quite high. She is a doctor after all."

"A doctor?" The boy gasped and blinked his eyes a few times.

Alex couldn't understand his surprised expression.

"You are the second person who calls her a doctor, Mister. Of course, the first one is me. It seems that you truly know my teacher. I should guide you to her." The boy volunteered himself to lead Alex to the top of the hill.

"Really? Thank you." Alex gently smiled. "What is your name? And how do you know I am your teacher's friend?"

"My name is Axis. Normally, people call my teacher with Shaman. They are the ones who can heal injuries. However, my teacher calls herself a doctor instead of a shaman. It was at that time I realized that my teacher is different." The boy answered him honestly.

"I see." Alex nodded with a smile. He patted the boy's head and gave him advice. "Just one thing you need to remember. Sometimes, it's better to hide the fact you have a teacher. What if I were your teacher's enemy? I would have kidnapped you and threatened your teacher, you know."

"Ah?!" The boy suddenly realized and looked at Alex fearfully.

"Haha...This is just a piece of advice." Alex smiled. "I am sure you can save your teacher in the future if you are a bit careful."

"I understand. Thank you for your teaching, Sen—"

"What kind of poison are you trying to insert into my student's brain?" Before Axis finished, a woman's voice resounded in both their ears.

They instinctively raised their vision, finding Silvia above.

When Alex and Silvia looked at each other, they fell silent for a while. There were so many things they wanted to say, but none of them came out of their mouth.

Noticing the strange atmosphere, the boy saw his teacher's emotion and gasped. He quickly ran to his teacher before turning around, pointing his finger toward Alex. "You are the bastard that keeps making my teacher sad this whole time."

Alex widened his eyes, shocked.

Meanwhile, Silvia quickly used her Divine Energy to grab the boy and pull him to the top. She looked at Alex and said, "How about coming in?"

Alex nodded and walked to the top.

"Teacher, let me go!" Axis struggled to free himself, but he couldn't do anything.

"You go bring the medicinal herbs to the storage and prepare some of them," Silvia ordered.

"But Teacher..." Axis wanted to say something, but Silvia only put on a gentle face and said, "Please."

He gritted his teeth and followed her instruction.

Meanwhile, Alex entered the house and looked at her with a weird face. He didn't know what to say and how he should face her at this point.

"Ehm...You look a bit thinner."

"Just a bit." She shrugged. "How are you these days?"

"I am good. Trained so hard in Eulja. How about you?"

"I just focused on my medical ability." She smiled. "And I will probably leave this world soon since my cultivation is on the bottleneck."

"I see. In that case, do you want to travel with me?" Alex asked. "I have wronged you that day, so I want—"

She quickly covered his mouth and shook her head. "That's my fault. If only I stopped my father, things would go better..."

"It was my fault. I tried to hide it for my own purpose."

"I agreed to it and understood the reason you did it, so it was my fault."

"No, no. It was my fault. If I—"

She covered his mouth again. "Let's stop this?"

Alex thought for a moment and nodded. "Alright."

"If we want to blame, let's blame my father. My mother has punished him dearly. It's like torture instead." She chuckled.

Alex put on a gentle smile.

Their eyes intertwined and Silvia came closer. She was a bit hesitant, but Alex didn't push her away and let her hug him.

"I have thought it through this time. Can I get the second chance?"

"But I am training my student..."

"We can bring him with us. You can teach him just fine. Besides, I haven't fulfilled our promise. There are still one and a half years..."

"Hehe, you are still thinking about it?" She chuckled while burying her face in his chest.

"Of course. I will fulfill the promise I made no matter how long it will take."

"Sounds like you." She smiled. "If you don't mind me with you again, I agree."

"That's good." Alex smiled. "I have promised you to visit a certain world, right? Let's go there."

"Un. Are you here just to visit me?"

"Well, I also plan to visit another world."

"Is it urgent?"

"Not really."

"Then, we can go to your destination first. I can also teach my student while we are at it."

"Alright." Alex nodded. "Axis..."

"Yeah. That boy is a bit special, you see..." She paused for a moment. "His eyes are different from anyone else, including your Spirit Eyes."

"Oh?"

"Your Spirit Eyes allows you to look at energy while his eyes transmit people's emotions."

"Emotions?" Alex fell into deep thought.

"Yes. Anxiety, sadness, happiness, determination, killing intent, or even fear..." She smiled. "I agree to accept him as my student because of his eyes as well as his determination. He will surely become a good doctor with those eyes. Knowing what your patients feel will allow you to understand them and change your treatment accordingly."

"Sounds like powerful eyes." Alex nodded in agreement. "I don't really mind about him. When do you think you will leave?"

"I can follow your schedule."

"I see. Maybe in one or two days?"

"I don't have many things to pack up, so I don't mind."

"Then, let's ask him."

"Sure."

The two then walked toward Axis, who became vigilant when he saw Alex.

"You..."

"Axis." Silvia shook her head. "It's all misunderstanding. We have sorted it out."

Axis could see Silvia's emotion and notice the change. He finally looked down and bowed to Alex. "I am sorry."

Alex patted his head. "You did nothing wrong. It was fair for you to do something like that and I believed that you are an honest kid with how you want to protect your teacher. My name is Alexander Sirius; you can call me Alex. Nice to meet you, Axis."

Axis raised his head, seeing through Alex's emotion. Everything he said from earlier was genuine, so he felt a bit guilty for suspecting him. "Yes. It's my pleasure to meet you."

Silvia smiled. "This boy was too sad. Because of his unique eyes, he was tortured in his village. He is also an orphan, so I took him in."

"I see." Alex nodded and bent down. "We are going to travel to another world, do you want to follow us?"

"Travel to another world?" He tilted his head and looked at his teacher that was going to leave him like his parents.

Before he misunderstood, Silvia hurriedly explained. "You see...I am not from this world. I have come from another world. In the journey of medicine, you need to go to another world to gain their knowledge. Maybe you can treat anything here, but there will be a time you will face another challenge that no one has seen before.

"However, there is a high chance that this kind of sickness has happened in another world and it turns out to be a normal disease there. That's why I always hone myself in another world to gain more and more knowledge about this.

"At first, I wanted to teach you everything to know here, but I believe bringing you to another world will give you the experience needed to be a doctor. You will see different people and different treatments. That's why I want to ask you, would you like to follow your teacher?"

Axis looked down, contemplating the question. He glanced at Alex and asked. "Mister...Are you Teacher's husband?"

Alex and Silvia widened their eyes.

However, the former shook his head. "I am not. But it may or may not change in the future. At that time, you will have the answer."

Axis nodded. "I see. I will follow both of you then. It's not like I have someone in this world other than Teacher."

Alex patted his head. "Then, it's settled. Pack up your belongings. This journey will be fantastic."

"Yes." Axis quickly left the room to store his belongings.

"We will leave tomorrow or the day after. No need to rush!" Alex shouted.

Silvia chuckled when she saw him act like that. "He is earnest."

"I agree. There are so many things that I need to teach this kid. Despite having been bullied for a long time, his kindness only grows stronger and stronger. I am not against it, but I just feel that someone will take advantage of it sooner or later."

"Well, I do have a plan for that which revolves around his eyes, but he is afraid that he sees too much that he will scare the others... I mean, he will feel your fear, anxiety, or even your love, right?" Silvia explained.

"I understand. I will help you regarding this area."

[Chapter 1045 - Anatomy](#)

Alex spent the rest of the day in that small hut, watching how Silvia was living this whole time. It turned out that she remained in this hut for most of the time, only leaving when she felt like it. And one time, she got lucky and met Axis, who hurt himself.

Unlike Silvia, Axis had two jobs. The first was to study all the books Silvia gave before finding medicinal herbs in the forest. It would allow him to have more knowledge while having enough experience to discover the medicinal herbs they might accidentally pass by.

During the night, he spent his time cultivating because he needed to have enough strength, so no one bullied him. It was a pretty balanced training menu to be honest.

After getting Alex's permission, Silvia decided to begin the hellish training by training his body to surpass his current limit.

The sooner he started, the stronger he would become.

His current strength was still in the Foundation Rank, considering Silvia only took him in just a week ago.

Finally, the next day, they were ready to leave this place.

Alex snapped his finger and the Holy Emblem appeared behind him. Since Alex wanted to restart their relationship, he decided to trust her a bit more by letting her see the Holy Emblem.

Silvia was astonished by this technique because she could understand how valuable it was if he decided to sell the idea.

Meanwhile, Axis was more surprised by the sight of Outer Space instead of his Holy Emblem. This was the first time he went to Outer Space, so Silvia explained everything to him while Alex kept teleporting them.

It made him dizzy, but he somehow understood what Silvia taught him. After one day of continuous teleporting, he had grown accustomed to it and even began to take note of Silvia's lesson.

They only arrived at a certain planet two days later. The planet was like that of Earth, but he found a lot of light around the area. He thought they would probably stay there to get more information about the planet.

Alex sealed Silvia's cultivation and quickly entered the planet with both of them before hiding his cultivation.

"We have arrived, Mister?" Axis asked while looking at his surroundings. They arrived at the dark side or the night side, so it was kind of hard to see. They were in a grassy plain in the middle of a forest.

Before Alex answered him, he sensed something moving from the left and quickly used his Sound Insulation Array to block off the sound while swinging his sword.

Suddenly, a bat like creature fell down, split into two. He burned the blood, so no one got blood in their body.

"Wha—" Axis couldn't help but stutter and let out the voice again. Luckily, the Sound Insulation Array was already erected, so no one could find them for the time being.

When they took another look at the bat, the body looked like a baby.

"They look like a baby but with bat wings..." Silvia looked down while narrowing her eyes. "This is the first time I have seen this monster."

"Baby with wings? Baby Vampire?" Alex couldn't help but comment.

Silvia looked away before taking out her scalpel. "I am going to take a look at it first. You don't mind, right?"

Alex stretched his hand, telling her to go ahead.

"Your strength is only a Foundation Rank now, so be careful even if you have a Divine Body."

"I know." Silvia nodded and started moving her scalpel. She skinned the creature in just two seconds. "Axis. Come here."

"Yes, Teacher." Axis quickly bent down and looked at the creature. His hands were shaking to see the grotesque creature, but this would be his path in the future, so he couldn't look away from this no matter how hard it is. The only way for him to get rid of that fear was to get used to this sight.

"The Sound Insulation Array is there, so you don't need to worry," Alex added.

"Thanks. Do you mind getting rid of the blood for me?"

Alex waved his hand and used his fire to evaporate the blood. "You are not going to examine the blood?"

"It will take too long. I will just look at their anatomy." She shook her head. "Although it has been split into two, the cut is clean, so I can still understand all the parts here. This small canteen must have so much blood...No, most of the blood that it squirted when it got cut must come from here.

"The eyes are blind, the fangs are strong like that of a wolf, but with smaller size. This certainly doesn't look like bat's teeth..." She furrowed her eyebrows. "The ears are far stronger than humans. Assuming that it moves with its ears, we will find a small ball just behind the mouth. Exactly..."

She found what she wanted to see. "They really move according to the sound. From what I can see, they see the things in front of them from the reflection of a sound wave. For example, even if you don't make a sound, they will still recognize you like a bat.

"However, they are not aware whether you are a living creature or not. That's why if you don't make a sound, you should be fine even if you keep moving. But I am afraid that this creature moves in a group, so if you move around in front of a horde, they will still attack you."

"I see. In other words, we just need to kill them, right?" Alex concluded in a very simple way.

"You are the only one thinking like that." Silvia rolled her eyes. "Anyway, I think I can understand their weakness if I have around five dead bodies and five living beings."

"Do you want me to catch them?" Alex asked.

"Hmm, wait a minute..." Silvia paused and found something weird. "There is a kind of blast inside their body. I mean, it is not supposed to be here with their anatomy. Do they have something that explodes in their body?"

"Hmm?" Alex used his Spirit Eyes to check the bat and opened his mouth. "I believe it's Spiritual Energy."

"So, this bat can cultivate?" Silvia closed her eyes while pinching the bridge of her nose. "In that case, there is a possibility many of these creatures have evolved."

"Evolved?"

"Yeah. There might be a bigger version of this guy. Just like an ant, you know..."

"I see. According to my information, the queen is using the thing I am looking for."

"The thing you are looking for? Does this mean you have their information?"

"Not really. What I searched was Undying Blaze Root. When the scout saw this creature, they realized that they usually went toward a warmer area. Other than the bigger one, there must be a leader somewhere like a queen. In that case, the most powerful fire energy on this planet is not a volcano or something, but the Undying Blaze Root." Alex shook his head, explaining the entire thing.

"Hmm? In that case, it will be hard to know the location of your Undying Blaze Root."

"Actually, not. We can ask for information to see which one that gets hit the most. We can assume that the queen is well protected, so we will go there."

"Now I understand." Silvia nodded and looked at Axis. "How is it? Do you understand?"

"I don't." Axis shook his head. "I mean, I can see many organs like a possible heart or something, but the mispositioning or all the things Teacher talked about...I don't understand a single thing."

"That's good enough for now. At the very least, you can identify some of the organs." Silvia nodded with a smile. "Continue your work hard."

"Yes, Teacher." Axis repeatedly nodded, happy with the compliment.

"There should be a place to stay there..." Alex pointed at their right. "We can go there and search for a place to get information. I am not planning to kill all of them, so I will only erect a dungeon here and be done with it as soon as I get the thing I want."

"A dungeon?"

"My Space Element comes from the Dungeon God." Alex shrugged.

"..." Silvia twitched her eyebrows. "Should I call you Alex or Freak?"

"The former of course."

Axis chuckled when he watched them. His teacher finally let go of her sadness. She only had happiness during the past few days, which made him glad.

"Why are you giggling?" Silvia glanced at him. "Let's go. We are going to run this time."

"Nothing." Axis made a big smile before following them.

Alex continued erecting his Sound Insulation Room to make sure they didn't get into trouble along the way. Since they planned to go to a place, he had no desire to bring a horde or something by making noises.

Surprisingly, he found a carriage that seemed to be used recently. There was no monster around the carriage, but Alex could find one energy inside the carriage.

"Someone is in the carriage. We should go." Alex pointed his finger. "It looks like a male child."

Silvia nodded and opened the carriage, finding a sleeping boy. He was shivering due to the cold, but he stayed silent while struggling to sleep.

When he felt the cold wind brush his skin, he realized that the door was opened. He covered his mouth with his hand to avoid making any sound while glaring at the door.

Silvia smiled and asked, "Hello. What is your name?"

The boy became even more fearful. His tears began streaming down as if he thought he would die.

"Teacher. He is scared because you are talking." Axis tried to perceive his emotion and warned Silvia.

Silvia patted Axis's head and said, "Don't worry. You can talk for a while. Nothing will come to us. Look at me..."

The boy then realized. Usually, it would only take the monsters a few seconds to get to the source of the noises, but it seemed she was right.

Despite being hesitant, he slowly opened his mouth. "Who...Are you?"

"I am Silvia. I am traveling with my student and my boyfriend. What is your name? Can you tell me what happened?" She put on a gentle smile, trying to calm the boy down.

Axis witnessed the change of emotion, never expecting it could change this fast.

Meanwhile, the boy answered Silvia, stuttered. "I...am Karl. I came from the town and escaped alone. The monsters killed everyone in the city. Everything is burned down."

Alex quickly knew that the light he saw earlier turned out to be the fire that burned a whole town. No wonder it was so bright.

"Then, that town must have been surrounded by those creatures," Alex narrowed his eyes.

"Yes. The warm temperature huh..." Silvia looked down, falling into deep thought.

"Do you know anything about the creatures, kid?" Alex asked.

"I only know that there is a mountain pass on this road. There should be the place I go because it is the opposite way of the star that changes everything."

"Star? Oh, a meteorite. In that case, we know where to go next." Alex glanced at Silvia.

"How about taking this child with us?" Silvia asked.

"It will be dangerous. Well, I don't mind taking him to his destination, but that's it."

"In that case, let's do that. How about it, Kid?" Silvia glanced at the boy.

The boy was about to answer, but the sound of his grumbling stomach echoed in everyone's ears.

"Ah, how long have you stayed in this place?"

"I..." He looked down, embarrassed. "I have been walking for two days..."

"Hmm, this is unique. Your lips don't look like you are dehydrated." She narrowed her eyes. "Anyway, let's eat first. I have talked too long...I should let you eat first."

Alex nodded and magically took out food and drink while asking the boy to come out of the carriage.

The boy's eyes brightened.

"Go on and eat. It will be a long way for you." Alex smiled.

At the same time, Axis looked at the boy with a sad expression. Despite not having his parents or getting bullied, he was never hungry because he could find his own food. After watching the boy at the same age as him, he realized that strength is not less important than skills.

[Chapter 1046 - A Serious Problem](#)

"Wah?!" The boy couldn't contain his fear as he was carried by Alex like luggage. He never saw someone who could do something like this, only those in the legend. "Mister. Are you the people from the legend?"

"Hmm?!" Alex furrowed his eyebrows. "What legend?"

"The legend. In the past, there are many powerful warriors that have surpassed the power of humans. They can break a boulder, run very fast like you, or even do more amazing things." The boy explained.

"You can consider me as one." Alex shrugged. He didn't want to argue with the kid, and having some sort of identity, especially a mysterious one, would give him an easier life to ask something.

"Really? Can I become someone like you?" The boy's eyes brightened. "I want to kill those monsters who killed my parents and everyone in the city."

"There is a chance. But even I got my power because I dared to fight in a life and death battle, so if you want this power, you will keep facing problems which can determine whether you live tomorrow or not."

"I only have Grandfather, who I am about to visit, so I don't really mind." The boy looked at him with determination.

"And what if your Grandfather mind?" Alex posed a hard question.

The boy fell silent and looked down, imagining what he would do if his grandfather said no.

"As long as you can't answer it, you are still not qualified to search for your own power." Alex smiled. "It doesn't mean you need to answer me right now. There is never too late. As long as you start, anything can happen. That's why you need to think about it carefully."

"Uhn." The boy repeatedly nodded.

"Alright. That's the mountain. We will begin climbing the mountain. I want you to promise me something. Can you do that?"

"My parents told me that I need to repay someone for their benevolence. Since Mister has saved me, I will do anything you want."

"Good. I only want you to promise me something. Don't tell anyone that you met me."

"But why? I am sure that everyone will be happy if they know someone like Mister."

"It's not about feeling. I am more worried about you. If you tell anyone about me, they might believe you and kill you for the information. Or they might ignore you or even bully you because you are weird. That's why this meeting is our little secret. Okay?" Alex put on a gentle smile.

The boy's heart moved. No matter how harsh he said from the moment he saved her or his nonchalant attitude toward him, it turned out that Alex was a good person. He judged him wrong.

Even his excitement earlier still carried a trace of fear. Yet, the moment he realized this, that fear had disappeared.

"I understand. I won't speak anything about Mister." The boy repeatedly nodded.

"Good. We will arrive in a few seconds. Hang on." Alex said and finally reached the top, finding a small house, perfectly fine.

Alex activated his Spirit Eyes and found someone inside.

"There is someone in your house. It seems that your grandfather is still alive. But remember, you can't say anything after this because it will attract the monsters. Okay?"

The boy politely bowed, thanking Alex for bringing him here.

Alex then sent a thought transmission to the person in the house to come out while gently pushing the boy's back to walk toward the house.

The boy gulped down. He was still scared, but he chose to continue. Before arriving at the house, he looked back to see Alex and the others, but they were nowhere to be seen.

Alex was watching him from the sky, looking at a gentle old man slowly opening the door and hugging the boy.

"Teacher. The elder is happy." Even Axis confirmed that there wouldn't be something wrong.

Alex and Silvia exchanged looks and smiled at each other.

"Alright. Time to go to the source of the problem." Alex turned around and flew toward the meteorite.

Silvia brought Axis, following Alex from behind.

They crossed over the burning town with so many monsters flying around the place.

"Teacher..." Axis saw many monsters munching over corpses all around the town and felt sick just by seeing it.

"This is the reality. We will be in constant danger, so you shouldn't let your guard down." Silvia warned him.

Alex suddenly stopped above the town and waved his hand. As if obeying him, the flame rose and turned into a tornado, engulfing the town as a whole.

The monsters, the corpses, and even the buildings were reduced to ashes. Of course, Alex found no one alive anymore since he didn't want to murder someone who was still struggling to survive. However, since there was no one in the town, he could do it without worry.

"Rest in peace..." Alex muttered before continuing his journey.

Axis had another kind of respect for him. Despite not showing the attitude, Axis could see that Alex genuinely did it because he wanted them to rest in peace.

Alex, of course, didn't care about it. He simply continued flying in one direction while searching for any clue.

They could easily find one or two humans on the way, but all of them were already a corpse, so there was no point in stopping.

After three hours of flying, they finally saw a large crater with a quite big stone in the middle, perfectly cracked in the middle.

"Hmm?" Silvia found something weird in the meteorite and landed next to it. "This is..."

Axis recalled what he had learned and asked, "Is this an egg, Teacher?"

"Yes. There is a sign of life force in this stone." She nodded and bent down, getting the earth to smell it. "This weird smell is related to the one before us...It seems that this is not a meteorite, but an egg."

"Seriously?" Alex narrowed his eyes. "I mean, the only thing that can survive Outer Space..."

Silvia's expression darkened. "It seems the parent is a God Rank monster."

"Yes." Alex nodded. "Although there is none here, we still need to be careful and grab anything we can find. Maybe this monster is more unique than we thought."

"I agree." Silvia nodded. "I will study this egg a bit with Axis here."

"I will bring you a few samples." Alex handed a Sound Insulation Array Plate to her and disappeared, flying somewhere else.

Alex arrived at a forest not far from there. Without the Sound Insulation Array, the monsters should be able to hear him.

"Ha!" Alex shouted for a second, turning the silent forest into an uproar. Monsters began to fly to the air, finding Alex in the air.

After having learned the Spirit Crown in Eulja, he decided to test it in a real fight. Although this was not a genuine fight, he still could power the Spirit Crown.

The blue jeweled crown appeared above his head as the jewel shone brightly. He took out Eve and waved his hand without using energy. In other words, this attack only contained the energy supplied by the Spirit Crown.

That energy spread over the area like splashing water with a sword. The powerful shock wave decimated or even crushed the monsters in an instant.

"Not bad..." Alex smiled.

"Master. That energy is really delicious."

"You got used to it two years ago, and you still said it?" Alex shook his head helplessly.

"But the energy is truly delicious. I am being filled to the brim."

"Haha...Anyway, let's begin the hunt. There are so many around here, so I will catch fifty of them alive. The rest shall be annihilated."

"Understood."

Alex began killing the monsters with his Spirit Crown. It was truly a powerful technique despite he only mastered two of the four techniques. He could even fuse the energy with Divine Energy, Intent, or even Sword Qi.

It took him three hours just to kill all of them, creating a mountain in a forest. The mountain contained more than a million monsters. Despite that, he felt there were still so many monsters like this out there.

"Master. We are stopping?"

"Yes. There is something I feel weird about..." Alex narrowed his eyes.

"What is it?"

"With how big the egg is...This number doesn't match up. In other words, they are producing at an alarming rate."

"Ah?! Do you mean they are killing the people here to give births to millions?"

"Yes. They are their source of food. However, I don't know what they are aiming for..." Alex turned around. "Can you go back first?"

"Sure thing." Eve returned to the Inventory while Alex returned to Silvia and explained the entire situation.

"So you are saying they are trying to create chaos?"

"That is one thing, but I believe the real aim is to create an army."

Silvia widened his eyes. "An army? I am sorry, but I don't have an idea what kind of planet can host a creature like this... I have never met them before."

"Is that so?" Alex called someone to help. 'Xingzhi.'

[I have asked Nelson and the N Squad. They have no data about this.]

"This is troubling. To drop an egg this big, they will be a God Rank Expert first. However, I find something more disturbing."

[Hmm?]

"This planet is connected to an Upper World, right? And that Upper World is also connected to many Lower Worlds?"

[This is an emergency, isn't it?]

"Yes. Arrange an investigation regarding this matter. The Spiritual Energy Silvia pointed earlier might be related to it. For example, they could get stronger after eating the people. A low level one like them is not a problem, but even an Upper World will have trouble with them. First, they will get stronger by killing those who are weak before eliminating those strong people. When that happens, it will be too late."

[I understand. I will make this a top priority. This will surely create a problem for the other Divine Worlds.]

Alex nodded and looked at Silvia, explaining his thought.

When she heard it, she had the same reaction as Lin Xingzhi. "I will send a message to my father...No, I mean, my mother."

"Please." Alex nodded. "I don't want to fight thousands of God Rank monsters like this, you know."

"I have the same opinion." Silvia nodded.

"I have fifty samples here. You should research them." Alex presented her with fifty monsters trapped in his Spiritual Energy.

"Thanks. I will try to find anything about them. Besides, I can see that there is a trace of a powerful being, stronger than me, on this egg. In other words, the parent must be at least a Rank 4 God monster."

"This will surely become troublesome." Alex nodded.

"Yep. For now, I have calculated the direction they are going. However, I am not sure whether they are there or not."

"It's not like we have any clue?" Alex shrugged. "By the way, are you planning to carry them like this?"

"Is there a problem?" Silvia tilted her head in confusion while carrying the samples with her energy.

Alex facepalmed and took out a box. This was the Time Box, the one that sealed Alicia.

"Is that the legendary Time Box? The one that can store living beings and freeze its time?" Silvia drew a gasp and took a step back.

Alex shrugged and stored the sample inside the box. "It can't store anything beyond God Rank Expert though. And it's not mine."

[It's yours. You have gotten it from the Gacha.]

'But you purposely arranged it that way.' Alex sighed inwardly. 'Anyway, this matter is more important. I will borrow this Time Box, alright?'

[Just use it.]

Alex nodded and threw the Time Box inside the Inventory. "Tell me if you want to start researching. For now, we should be focusing on our objective."

"I understand." Silvia nodded with a serious expression before pointing to the west. "This way."

"Before that..." Alex touched the egg and stored it inside the Space Ring. This time, he handed the egg to her. "Take this as well."

Silvia received it before turning to Axis. "Sorry for being too focused on this matter, Axis."

"I am fine, Teacher. I have learned a lot as well just by watching you."

"Alright. Let's go then?"

The three nodded and flew to the sky.

[Chapter 1047 - Dungeons](#)

"Stop," Alex said as he saw so many life energy signs in front of them. As expected, they had evolved into something troublesome. Other than a normal bat type monster, there were a few bigger ones. As for the queen, he had yet to see it.

"What are we going to do?" Silvia asked.

"You said you need samples, right? I will catch them. This may lead us to something big."

Silvia thought for a moment and nodded. "I understand."

"Besides, I can see a powerful Spiritual Energy in there. That's my objective, I guess." Alex narrowed his eyes and calculated the route to take the Undying Blaze Root. He also needed to catch a couple of the bigger ones and, most importantly, the queen.

"You two can retreat first." Alex waved his hand and flew forward.

Not far from him was that of a tornado, but if one took a closer look, they would find so many small monsters circling around.

"Should I burn them all? From the look of it, there are at least one hundred thousand monsters there..." Alex thought for a moment and penetrated it with his Spirit Crown without creating a sound.

Boom.

The explosion surprised and made them quite disarray, allowing Alex to sneak inside. He found out that the ground was already dug up, leaving only a tree, one weird monster, and ten bigger bats.

'Let me see, the tree is the Undying Blaze Tree, but the tree itself is not that good of an item, so I will only take the root. And that weird one, I think that's the queen. Time to hunt, I guess?' Alex thought before the queen suddenly roared.

A series of shrieks followed suit before they turned toward Alex as if knowing his existence.

"Seriously?" Alex twitched his eyebrows while using his Pure Fire to cover his body. The monsters that tried to get closer would find themselves burned by the Godly Pure Fire.

At the same time, Alex flew down to the ground, trying to grab the queen.

The ten bigger monsters didn't like it and quickly protected the queen, but Alex had no time to spare. He quickly used his Spiritual Energy to suppress them before capturing them with the Time Box.

He looked at the queen. Unlike the baby body, the queen had an insect body. No, it was the original bat body. Even the bigger ones had a baby body, only a bit older. Thus, he came to a ridiculous conclusion.

"The queen is the original one? There is a possibility that the only monster coming out of the egg was the queen, but this meant there would be many queens on this planet already. It seemed my choice to give this planet power was right. They can develop themselves and fight back. If they win, they will live like where Alicia and Firia were born. It's pretty good. Unfortunately, I can't interfere more than this or else, it will be detrimental for them in the long run as a planet." Alex muttered while storing the queen in the Time Box.

Suddenly, the bats around him let out another series of shrieks before it flew away.

"As expected, there must be another queen elsewhere. Calculating the egg size and the queen's size, there should be at least ten queens. By getting food, which happened to be a human, they gained an army of millions if not tens of millions. This is the fastest but inhuman way to grow." Alex's expression darkened.

[We are on it. Please trust us.]

"I understand." Alex nodded. He then looked at the three and waved his hand, lifting the entire tree, including the root, into the air. Without hesitation, Alex stored it inside his Inventory first because he shouldn't be here for a long time."

After seeing how the monsters had left, Silvia and Axis came to him.

"Mister, are they gone?"

"Yeah. There should be another queen elsewhere..." Alex began explaining about the hypothesis he found.

Silvia later confirmed that there was a possibility about it.

"Anyway, I have done my job. The rest will depend on the strength of the people in this world. For now, I will create dungeons first." Alex shrugged.

"By the way, where are you going to refine your body? If I am not wrong, your body cultivation technique is Undying Fire Body, right?"

"Yes. It's only a body refining, I will probably refine it here before going to the world I promised you." Alex smiled.

"Right? That world is good and has advanced technology. Axis should know about this kind of world because they had so much knowledge."

"I understand, Teacher. I will do everything according to your order." Axis bowed his head.

"I will do it here since the place is empty now. However, I will need to search for the portal all over the planet to plant my dungeon. You don't mind, right?" Alex smiled.

"Of course. I don't have a problem."

Alex then tossed the Time Box to her. "This is to fill your boredom. You should be able to find many things about them."

Silvia widened her eyes, never expecting Alex to hand her the Time Box instead of the sample. This showed the difference of trust Alex put on after the misunderstanding or they got back. "Thank you."

Alex waved his hand and flew outside the world, using his Spirit Eyes to check where he could find the hidden portal.

It should have an enormous amount of energy, so he thought he could easily find it if he took a look at it from Outer Space. And it turned out he was right.

After two hours of searching, Alex saw Space Energy. It was a bit small, so he failed to spot it a few times, but in the end, he could find the fluctuation of the Space Energy and quickly went there.

He arrived in a plain without any living beings. However, he could find so many skeletons around.

"This area has been devastated by those creatures. I don't know if that is a bad omen or something, but that creature is dangerous. If it happens in Eulja and can't be controlled, it will surely turn the world

upside down. Regardless, I should continue my job." Alex shook his head and used his Spirit Eyes, finding the portal a bit farther from his location.

It hid inside a forest, covering itself with so many trees to camouflage it.

"I wonder if they have gone to this world or not?" Alex narrowed his eyes. "If the humans have done it, they can survive for a little bit longer and get stronger there. However, if the monsters have gone through this portal, it will be a disaster."

Alex thought for a moment and took out many bottles filled with blood.

He leveled up the entire area as if he tried to dig it down. Although the energy was not enough, his physical ability alone could do the job.

"This is the first time I hold something this big..." Alex couldn't help comment when looking at the giant boulder on his hand. In fact, he should call it a small island instead of a boulder because its length alone was five hundred meters.

Alex paid no heed and began using his Spiritual Energy to help him draw the symbols. At the same time, he made sure to branch out a few things in other directions, so he could spread the Space Energy from this portal to another place.

This would allow him to build several dungeons connected with another world.

It took him ten hours just to draw the arrays and did more than he expected in terraforming, making sure that no one would notice this secret.

After that, he created a four hundred meters hole inside the first platform and planted the man-made dungeon inside.

The dungeon wasn't like the Dungeon God's. It only had fifty levels upward and ten levels underground.

"Let's see..." Alex took out the note Lin Xingzhi gave him about the tower. "This dungeon has fifty levels and ten floors underground. The ten floors are used to connect the entire tower with Spiritual Energy and the other world, allowing them to automatically bring another world's monster to this dungeon.

"This was the smallest dungeon that the Dungeon God had ever created. Well, his reason was to practice this dungeon because he never had the confidence in building this up. He tested it with this small dungeon for a few years. "Do you want to change it to a bigger dungeon?" If yes, send me a message.

"If you don't, you can proceed now."

Seeing that the dungeon was pretty safe, he quickly entered the secret underground layer with his Teleportation Magic and started drawing arrays to set everything up. He already knew what arrays he needed to make, so his job was pretty easy.

After drawing for about ten million symbols, he gradually understood how the Dungeon God created the dungeon. It was a pain to create these many symbols, especially doing it alone.

Activating most of the array, he ran another check to see nothing went wrong.

He then went toward the Portal and went to another world. As he would expect, the portal in this world was in a hidden location or the people from this world would have invaded them.

He didn't want to disturb the people in this world too much nor had the intention to confirm whether the monsters had gone to this world. He simply created millions of symbols underground like his Arrays on the other side before coming back.

Unlike the first dungeon, it didn't take too long for him to finish the array.

It was only after all those he activated all the arrays. The dungeon then began to get surrounded by energy.

"I need to wait a bit." Alex narrowed his eyes, watching the dungeon to see how the monsters got transported to this world.

After an hour or so, he found the first monster, followed by more and more monsters. This meant the dungeon had successfully created.

After that, he went to another place, specifically on the other side of the planet. In this world, he planned to build six dungeons: West, North, East, South, Top, and Bottom.

Since he had understood how to build it, the next five dungeons took faster than the first one. However, he ended up using two whole days just to finish the entire construction.

Luckily, the world population had been reduced, so no one found him building this dungeon, making his work simple.

The moment he completed his task, he stepped on a plain with nothing but rock.

"It's time to call it again." Alex smiled and released his seal, showing his Divine Power.

Suddenly, a Lightning Tribulation was formed on top of his head. The World's Will manifested itself by using this Lightning and asked him, "How are you here, Human?"

'Here it is...' Alex smiled.

[Chapter 1048 - Body Refining](#)

'Here it is.' Alex had been waiting for him. Unlike the first world where he planted his system, this one only had a Rank 8 God's power just like a normal Lower World. In fact, it was already powerful enough because it had gotten the influence from the real Upper World.

Facing Alex, whose strength was higher, the World's Will needed to be respectful.

"I am here not to destroy your world or something. I simply want to offer you a proposal where the inhabitants of this world can survive. I am sure that you have been watching over them, right?"

"Yes. However, I couldn't help them because I was just a world. I didn't have the jurisdiction to help them because life comes and goes every single day."

"That's when you have no invaders. With invaders, which are that monster, I am sure that the situation has become too complicated. To that end, my proposal is to plant my power in you to allow the others to get stronger to fight back. How about it?"

"That is an interesting proposal. Although I would like to believe you, I couldn't find the reason..."

"We can use Universe Oath for this agreement. And the terms won't be forever. I have done this with another planet, which is an Upper World. What do you think?" Alex asked with a serious expression.

The World's Will was pretty convinced with the Universe Oath, but when it heard he had a deal with an Upper World, the hesitation disappeared.

"I understand. I shall agree to your proposal."

Just like the first Universe Oath, those two agreed to not do something detrimental to each other. Alex finally could plant his System Seal in the World's Will and painted this world with his Gacha System.

"May I ask something, God Alex?"

Alex nodded.

"When will you leave this world? I don't mean to be rude, but to maintain the environment, I can't allow you to stay in this world."

"I understand that." Alex quickly sealed his power again as if he was just a mortal. "I will be staying in this world for a few months because of a few things. I also want to conduct research about the invaders, so I hope you can give me permission to do all that. Of course, I promise not to disrupt the balance and stay in this sealed state since I will only be refining my body, which doesn't require my energy. Is this explanation satisfactory?"

"Why would you cultivate in this place? It is not beneficial for you?"

"I am planning to visit another world because I have a business there. Of course, different from the agreement with you. Unfortunately, that world is a bit more complicated, so I can't really use my power there. You can say it's more sensitive than you."

"I see. I shall allow you then. However, if I may, I want to set a time limit."

"A year?" Alex asked. "I don't need more than that. In fact, I should have finished in a few months, but I don't know the exact date."

"I understand. Let's set it to a year. And thank you...For giving all my children the power to fight back."

Alex nodded with a smile. "It's my pleasure. I get benefits from this agreement as well, so yeah."

The World's Will nodded its head, turned around, and dispersed.

"Fu. I have finally finished the agreement with the second world. And it's a different type of agreement. It's like selling a house."

[Agreed. The first was a kind of renting a house while this one was buying a house.]

"Yes. When the time limit ends, the two parties can discuss whether to prolong the contract or not. This is the one changing everything." Alex nodded and looked at the sky. "I should go back."

[Sure. Good luck with your body refining.]

Alex smiled and used his Teleportation Array to head back to Silvia.

As expected, Silvia and Axis still remained at the same spot as they were too focused on their job.

"How is it?" Alex asked while walking toward them.

"I have found a few clues, but I am still not sure." Silvia only glanced at Alex and returned to the corpse.

"I see. We have at most a year here, so I will spend the remaining time refining my body. What about you?"

"Teaching Axis and researching this monster. This is really a mysterious monster...The type that I have never seen." She let out a long sigh. "This might be an artificial monster, but I need more time to discern it. Don't worry. I will search for another one if I am out of sample."

"Alright." Alex nodded and handed her a token. "This is my token. I will visit you when I am done."

"Sure." She received the token and slipped it inside her clothes.

Alex never thought that Silvia would be this focused on her job to the point he got ignored. Well, to be honest, he preferred someone like that because they were independent women. Alicia and Firia had grown up like her, so he left with a smile.

He just found a random cave not long after and sealed the entrance. After drawing the Star Barrier Array, Gathering Array, and Special Realm, he went to the deepest part of the cave while checking his surroundings to ensure that he was the only one in this place.

He took out the Undying Blaze Tree and cut the root while throwing the tree. He looked at this brown-colored root that appeared to be a normal root. Only experts or Spirit Eyes could discern the powerful Fire Energy inside it.

Alex took a deep breath and swallowed the root without hesitation.

His Pure Fire began revolving, burning the root until it was reduced to ashes. After that, the Fire Energy contained inside the root burst out, flowing directly to his heart.

The heat stimulated his Godly Pure Fire and burned himself.

"Kh!" Alex widened his eyes and let out a small groan.

He never felt hot this whole time due to his Pure Fire. However, Alex could feel the heat for the first time.

No, he could finally learn what the others felt when fighting against his Godly Pure Fire. The unbearable heat that would melt them was more painful than he expected.

Even Alex couldn't contain it and started shouting out loud.

His body all went limp as Alex dropped to the ground. He couldn't really sense his body. The only thing in his mind was the pain.

This might be the most ridiculous refinement he had gone through.

As the name suggested, the sixth refinement of the Undying Fire Body was Flesh. It wanted to turn Alex's flesh into a Pure Fire itself. Of course, it was just a metaphor. The real benefit of this sixth refinement came in the form of self-healing.

In other words, Alex's regeneration would become far more powerful. This way, Alex's wound would close sooner or later even without him doing anything. In fact, his opponent needed to kill him in an instant because Alex would just recover during the fight.

This was the most dangerous stage but the most beneficial one.

As for his strength, Alex didn't pay attention to it anymore. The gap between each rank in God Rank was too big, so he doubted he could have enough brute force to surpass his own rank. Even Lin Xingzhi supported that idea.

Only a few people could reach that kind of strength, and all of them had one thing in common. They all focused on cultivating their body instead of Spiritual Energy.

Alex had no intention to change his path, so he ultimately ignored everything about his strength. As long as it was enough to handle the opponent of the same level, he had no complaint.

Still, the torture he needed to face during this refinement was far more difficult than the previous five combined.

It even took him nine months just to stop screaming.

However, Alex noticed one thing during this refinement. His energy could recover faster. In an instant, this refinement turned into the best Body Refining of all time.

After approximately eleven months, the flame surrounding his body gradually died down as Alex opened his eyes.

"Ugh. How long have I been tortured?" Alex twitched his eyebrows.

[Screaming? Nine months. As for the total, it's about eleven months and two weeks.]

"I feel like I have become a step closer to a masochist."

[Haha. We will love you even after that.]

"Don't say it. I don't want to have that kind of preference."

[Yes, yes. Don't ask to be our pet in the future, alright?]

"Oi!" Alex wanted to fight it out but realized that he took too long. "Anyway, let's stop. I need to go back."

[Sure.]

Alex quickly followed the direction of his token and found Axis walking outside a small hut.

"Hmm?"

"Mister!" Axis was surprised to see him again. "You have been out for too long."

"Haha...Sorry. It took longer than I expected." Alex scratched the back of his head. "How is your Teacher?"

"Teacher has found several things. She tried to find some more, but there was no progress in the last two months."

"I see. How about you?" Alex smiled. "Now that I look at you, you can become a Martial Master, right?"

"Yes. I am suppressing my cultivation right now to wait for Mister."

"Well, you will be expelled from this world if you break through right now. And since I am back, you can now undergo your tribulation. We are going to another world again." Alex smiled.

"Teacher said it a while ago." Axis nodded.

"How about your study?"

"Teacher made me read books the whole time ever since the operation became more complicated."

"Haha...You have a long way to go, so it's better to read more books." Alex patted his head.

"Well, I don't have a problem since Teacher promised to involve me every time something happened. This way, I can get experience while learning under her."

"Good. Follow your teacher, alright?" Alex smiled.

"Un." He nodded.

"I will visit your teacher first. If she gives a "go" sign, you may undergo your tribulation." Alex then walked toward the small hut, finding Silvia in her operation room.

"You are back?" Silvia stopped what she was doing and turned to him.

"Yes. It seems you have found many things." Alex smiled.

"I have, but there are still many things that confuse me." Silvia sighed.

"Take your time. For now, let's go out first and talk about it while watching Axis undergoing his tribulation."

Silvia agreed. "It's already past the time anyway."

Alex and Silvia came out.

The moment he saw a thumb up from Alex, a smile appeared on his face as he bowed to both of them.

"Don't be too excited. Be careful." Alex nonchalantly shouted.

Axis nodded and began cultivating to trigger the tribulation.

Meanwhile, Alex asked, "So, what have you found?"

"First of all, the bat seems to be an artificial being."

"An artificial being?" Alex tilted his head in confusion. "Like robots?"

"No, no. The gene has been modified. When I looked at the queens, including the one I captured myself, they both had the same characteristics. Most of their genes were bats, but I noticed that some of them were not genuine. You could say that the gene was planted by something...Not planted, but forced to evolve into such a thing."

"Hmm?" Alex narrowed his eyes. "So, is it really a bat or not?"

"Fifty-fifty. Fifty percent is a bat; the rest is bat but not genuine."

"It's a bit complicated, but I understand what you mean. And were they created or born?"

"Born. If I want to find more clues, I need to find their mother, a Rank 3 God. I have calculated it and arrived at that conclusion."

Alex pinched the bridge of his nose while closing his eyes. "Ah, this is going to be troublesome."

"Yes. But this is not the most important thing. The thing is... The bats will evolve according to what they fed. If they ate a human, the bat would have a human baby's body. If they ate a pig, they would have a piglet's body."

"!!!"

[Chapter 1049 - Earth V2](#)

"Doesn't this mean they can simply create an army of anything?" Alex asked.

"Yes. If they consume a God Rank Expert, I am afraid that this guy will be very powerful." Silvia nodded with a serious expression. "Considering we haven't heard any news about them, there are only two possibilities."

"They are either powerful enough to keep this a secret or just start doing this recently." Alex understood her meaning. He thought for a moment. "I think it's the latter. If they are that powerful to keep their tracks a secret, it doesn't reflect how the weaker ones behave. With how they are consuming those people mercilessly, it's easier to get caught."

"You have a point. I guess this is only happening recently because not many people know about it yet." She nodded. "What are you going to do then?"

"I will arrange an investigation team to this world and the upper world connected to it."

"I will also inform my mother about this to help you. Maybe we can have an information exchange."

"We will see." Alex nodded. Because of the previous misunderstanding, Eulja had yet to recover the relationship with the Palm God, so he knew where her hesitation came from.

"Anyway, it's time to leave this place." She pointed at the front, signaling him that her student just finished the tribulation.

"We will wait until he finishes consolidating his cultivation." Alex nodded. "I wonder what kind of change these bats will bring to the world. I hope it won't be too big."

"Haha, it's nice to see the universe peaceful. But because of the conflict, the people begin to increase their strength desperately. Such an ironic concept..." Silvia closed her eyes.

"Indeed." Alex waited for one more hour until Axis was in front of them.

"I have become a Martial Master."

"Good." Alex patted his head while smiling.

Suddenly, he felt Alex's energy inside him as his Martial Master's strength left his body.

"I am sorry, but the world we are about to visit can only accept Foundation Rank."

Axis looked at his teacher and found that her cultivation was also Foundation Rank. He nodded and didn't comment on what he did.

Meanwhile, Alex released his God Rank strength and brought them to another world according to Silvia's instruction.

They arrived at a very familiar blue planet.

Alex couldn't help but have a nostalgic feeling in his heart.

"Alex?" Silvia tilted her head in confusion.

"It feels nostalgic to see a planet like this." Alex smiled. "This is the closest one I can find that is similar to my hometown."

Silvia's interest was piqued when she heard Alex's hometown. Although she knew that Alex didn't come from Eulja or Agar World, she didn't know anything about Alex's hometown.

"Never mind. It's something in the past. I don't have a desire to return there at the moment. Besides, with how old I am...My parents should have passed away or too old to do anything. In other words, I will probably only have my sister as a family. Either way, it's not really a pleasant memory." Alex shook his head.

Axis could see that Alex was missing his hometown and family, but he told the truth about it being not a pleasant memory. It seemed that even if there were bad blood, the family would always be family for this guy.

"So, let's come in?" Alex shrugged and summoned his Array.

After Silvia and Axis nodded their head, Alex brought them inside the planet.

"Where is this?" Silvia looked around after arriving here. Not a single person could be found here, so they didn't need to worry about anyone finding their existence.

When he saw the cool looking environment and the tall building outside the area, he simply understood what kind of clothes they needed to wear.

It was the same as him. Alex wore a simple white shirt with black pants. It was nothing special, but he could be blended in.

However, Silvia's clothes, although universal, couldn't really fit in with this type of environment.

"Silvia, do you have another type of clothes with you?" Alex asked.

"Clothes are a must when traveling, so I have a special storage ring just for that. It can help me if I want to blend in." Silvia nodded.

"How about Axis?"

"Now that I think about it, I haven't bought anything for Axis. Maybe I should go somewhere to buy clothes..." Silvia looked at Axis. His clothes were decent, but it certainly looked like a country bumpkin.

Alex thought for a moment and opened his Inventory. After searching for five minutes, he finally found it.

"Take this." Alex waved his hand as a pair of clothes appeared on his hand. He handed the clothes to Axis. "It is a bit bigger, but it should be fine for a while. That's my clothes when I was young. After this, we can go to a shopping center to buy the clothes."

"How about money?" Silvia asked.

"Let's trade something first. Maybe gold or something. It's not like they are important to us, no?"

"I don't have gold."

"I have. Don't worry." Alex waved his hand. He had many gold coins from the Agar world as a memory of the life he had with Alicia's and Firia's families along with his teacher.

Even if he couldn't prove the gold identity, it should be enough for him to get enough money for clothing. After that, they could start planning to do whatever they wanted.

"In that case, I will bring Axis to change."

Alex nodded and pointed at the public restroom. "You can change there. They have a symbol in front of them, differentiating woman and man. Woman restroom is the one with a skirt."

Silvia's vision followed Alex's movement and found the restroom. "Alright. I can do that. Axis, can you do that alone?"

"It's just like the restroom we have back on the hut, right? The one we never used before?" Axis asked innocently.

"Yes. However, you need to close the door first before changing."

"Exactly. That's the norm here." Alex nodded in agreement. "Or should I accompany you?"

"I think I will be fine. Even if I can't do it, I will go back here and ask for Mister's help." Axis politely declined, wanting to be independent.

"Is that so?" Alex smiled and let him go.

Axis widened his eyes and quickly went to the restroom.

"Before I change, I want to ask one thing. Do you have a plan for this world?"

Alex shook his head. "I don't know. Probably travels around the world? It's not like I am going to steal someone's possession."

"True enough. Our main priority is the resources that no one possesses."

"It's hard though, so we will end up stealing." Alex shrugged. "I mean, this place should have a country and everything inside it is the country's possession despite them having no desire to take it."

"Oh? Someone's trash is another man's treasure. Since they don't want it, why can't we get them? Even those who follow the teaching of "Good" will grab it if the timing is perfect."

"That's why we will end up taking it." Alex shrugged.

"In that case, I don't have anything to say." Silvia nodded. "And do you have an idea for how long we are going to stay in this world?"

"Let me see... I have trained for more than three years, so it's time to fulfill another promise. However, I still have you, so we can stay here for one year or so."

"I have another idea. How about I follow you?" Silvia asked.

"Ahem, my promise is to get my disciple and wives back before going to our honeymoon."

"Then, am I a bother? I don't really mind being the third party, since this way I can learn more about them." Silvia shook her head.

Alex paused for a second and let out a long sigh. "You are strong."

"No, I am weak, but I know that if I stay weak, I can't achieve anything."

"Fine, fine. You win. You can follow me. In that case, we will stay here for a month or so. It should be enough to discover many resources." Alex shrugged. "The problem is...I wonder whether this world has a Divine Item or not. I don't mind getting a Divine Herb as well."

"Didn't you see it from Outer Space?"

"No. I could see the portal because it caused huge disruption while a Divine Herb will become weaker when staying here until they die, so I need to get closer to them to find the Divine Energy."

"That's a shame. In that case, you can fly all over the world. I am going to bring Axis to find the knowledge of this world, especially the medicinal equipment and treatment. That's my real aim."

"I can help you, but we will see. We first need money since I can't trade too much gold here unless we find a bad guy to smuggle them." Alex furrowed his eyebrows, contemplating their plan.

"We can discuss it again after getting Axis's clothes. I should be getting changed soon." Silvia waved her hand and headed straight to the restroom. "Wait for me, okay?"

Alex waved his hand while nodding.

"Wait a minute..." Alex suddenly remembered something. He looked around. There were trees every now and then, planted on a small slot on the ground. The ground he stepped on was built with bricks. If he took another look at his surroundings, everything was perfect to call this a park.

On his left, he found a quite big tree, perfect for leaning on it to feel the breeze, but that also convinced him about his current predicament.

"Ugh... Don't tell me." Alex facepalmed. "I need to scan this area and leave as quickly as possible—"

"Wait, Young Man." An aged voice resounded in his ears.

'Ah, I was too late.' Alex sighed and turned around, finding three people.

The first one was an old man in his retirement, wearing a clean white martial uniform. There was a certain trace of energy in this old man's body aside from his own. He even used a staff to support him.

Next to him was a green-haired woman wearing the same uniform, following everywhere he walked. She appeared to be young, not even in her twenties, so Alex concluded that this girl was his granddaughter.

Last but not least was a middle-aged man next to them. He had a muscular body, signifying his own strength.

'Ah yes, I really was too late.' Alex sighed in defeat.

"May I know your name?" The old man politely asked.

However, Alex had no intention to get close to them, so it was better to leave right away. After all, they might be wealthy that could satisfy his current plan, but everything would become annoying after that. He could already see trouble coming from the arrogant face that the woman showed on her face.

"Redna," Alex said before walking to the restroom.

And as he predicted, the woman quickly berated him when he paid no attention. "Hey, you. How dare you ignore my grandpa?"

"..."

[Chapter 1050 - Regret](#)

"..." Alex was speechless. Even Axis, a seven years old kid, was more sensible than her.

Alex looked at the old man and asked with a calm expression. "Let me ask you. If random people came to you, would you stop and ask them what they needed?"

"..." The old man closed his eyes and sighed.

"What?! How dare you?" The woman was raring to beat Alex.

"Just like you, there will be a time where you are on the bottom. If you can't even do it, don't expect people to do the same. Or what? Is it due to your influence or whatsoever are you qualified to do it? That's something insignificant in my eyes." Alex shrugged.

"It seems I have disturbed you. I would like to apologize for that action."

"And it's better to not spoil her too much. Learn some humility because it might become the biggest downfall one can have." Alex shook his head in disappointment and turned around, planning to move.

"You Bastard!" The woman gritted her teeth.

When she was about to attack Alex, Alex added. "If you choose to act, don't regret it later. I am not someone who will give you a face or treat you better just because of gender difference."

"Wait, An. Stop." The grandfather stopped his granddaughter.

"Wha—Grandpa? Why? This guy just disrespected you. If he knows who you are, he will lick your shoes."

"..." Suddenly, a kid with oversized clothes walked toward Alex and asked, "Mister...What are you doing? Are you going to lick his shoes?"

"You are taking the matter too seriously." Alex patted his head while smiling.

"But isn't this a serious matter? The other party is ganging up on you. They are just like the bullies in my village?"

"Heh! Country bumpkin. I see now why you have no manner." The woman kept spouting a bunch of nonsense.

Alex let out a long sigh and looked at the old man. "If you don't shut up your granddaughter soon, I am afraid that you will regret it deeply. And I don't understand what do you mean by country bumpkin...At the very least, what I know is this kid more sensible than your granddaughter."

Axis tilted his head. "Mister. The old man seems to have no intention to stop her. That woman is harboring hatred while the guy seems to want to release his killing intent. I don't know why the old man doesn't stop her despite having only three months to live?"

"You shouldn't say something about someone's lifespan unless they want to know, it's rude. Apologize to them."

"It's rude?" Axis became even more confused. "I am just stating the fact. The wound inside his stomach is going to deteriorate even further and his health will collapse soon. Besides, I am not rude. The one who is really rude is her."

"Don't be a smartass. Apologize first." Alex smiled and patted his head.

Axis hesitated and bowed to the old man. "I am sorry. I was rude."

Meanwhile, the old man was in complete shock. He just couldn't believe that a kid actually diagnosed his health with just a glance.

"What did you say? How dare you curse my grandfather?! I will be teaching a kid like you a manner." The woman finally jumped forward as she couldn't endure the humiliation anymore.

When Axis saw the incoming slap, he simply moved to the side before taking out a few needles, stabbing a few spots on her hand.

The next moment, the woman lost the feeling of her arm as she couldn't move her arm anymore.

"Ah! I can't move my arms."

Alex only took a glance at it and asked. "Your Teacher taught you that technique in the past year?"

"Yes. She taught me how to diagnose with pulse and appearance along with some basic acupuncture techniques." Axis nodded.

"That's good. Let's go now." Alex nodded and took his hand.

However, it didn't stop there. The middle-aged man shouted. "What did you do to our Young Miss? Return her to the normal state or Xi Family won't let you off."

Alex facepalmed and ignored him.

"Mister. I think I have a dream now."

"What is it?"

"I want to create a technique to cure idiocy."

"That's a good dream. I don't know about the direct approach, but there are several ways of doing it like wiping one's memory and something like that. So, I guess you want the direct approach?"

"Yes. I will be focusing on the brain." He nodded with a smile.

These two kept ignoring whatever they spouted until the old man opened his mouth. "I am sorry, Young Man. This old man is in the wrong. I didn't teach my granddaughter well, but she is still young. How about treating her back and using this experience to teach her? I think this will be enough."

"And what? After that you are going to ask us to treat you?" Alex snorted. "After I told you all that, why did you not stop her? And as I said, I am not someone who will give someone's face, so regret your whole life. Kill me? You are welcomed, but don't just beg for your lives in the future."

"I have it enough!" The middle-aged man was the one charging at him.

Alex shook his head in disappointment, especially after sensing his killing intent.

"I am wondering what you are showing to me is your killing intent?" Alex turned around and released his killing intent. "This is the real killing intent."

The middle-aged man froze when he sensed his killing intent.

'What is this? Why can a young man like him generate this killing intent? How many people has he killed? One hundred? One thousand? No!' He thought as if he was drunk into the madness. His feet went limp as he began to gasp for breath.

He fell to the ground as foam came out of his mouth.

Alex finally retracted his killing intent with a calm expression, making the grandfather and his granddaughter confused.

"Young Man...What did you do?!" The old man tried to stop him again.

"It's better to stop, old man. My patience has its limit." Alex narrowed his eyes.

The old man didn't know why but words stuck in his lung. Even when he tried to stop him with his body, it refused to move.

Alex finally found Silvia who had finished changing. When the two saw her, they couldn't believe how pretty Silvia was. Even the grandfather couldn't compare his granddaughter with such a person.

"What are you doing?" Silvia tilted her head in confusion when looking at the trio who obviously had their own problems. The moment she found the needles she gave Axis on the woman's hand, she understood what was going on. "I see. You don't need to explain."

"You are not going to treat them, right?"

"It's true that I am a doctor. However, just like the patients can choose which doctor they will visit, I can choose which person I want to treat." Silvia shrugged. "Besides, I know that you are not an aggressive person, so they must have done something bad."

"Thanks for the trust." Alex smiled.

Silvia then patted Axis's head. "You are so good now you can use it, albeit one of the most important needles hit slightly out of the spot. It should be recoverable. Want me to teach her a lesson? After all, my student is not easy to bully."

Axis tugged her hand and shook his head. "Please, don't. This just means that I don't have enough skill to do this basic thing. Besides, our main job is to save people, not bully people."

"Right?" Silvia smiled. "You are so sensible. If it were me, they all wouldn't be able to talk or move anymore. They wouldn't be able to spread another chain of hate that way since no one can tell the tale despite seeing anything."

"Anyway, I don't think I need to do anything. The reason for that old man taking a walk in the morning is because this is the only thing that can lessen his pain. I bet he has begun coughing up blood every night."

Alex flicked her forehead. "Alright. That's enough. We need to find clothes for Axis."

"Fine."

The three then headed straight to the city.

...

Meanwhile, the old man dropped on his butt as he began coughing. His face turned pale, and he began to regret what he did.

He simply wanted to test Alex's strength by letting his granddaughter strike him, but it seemed that it was his biggest blunder that he committed right on his deathbed.

He looked at his granddaughter, who was still glaring at their back as if she wanted to kill them.

"Granddaughter. It's better to stop. You are simply going to die if you try to do anything." He finally stopped her. At the very least, his granddaughter could still recover from what happened no matter how long it took. And they could check in a big hospital, so he decided to not offend Alex.

That guy was a mystery. He reduced his bodyguard into something like that with a single glare. His granddaughter would have died if that man really made his move.

"But..."

"Enough. I said it's enough. I am the one who is at fault. At least, you have the chance to recover." He sighed.

She only lowered her head while thinking about how to kill Alex.

...

On the contrary, Silvia posed a question to him. "Why did you teleport us here? I mean, there should be many places you can teleport us, right?"

"I don't know...Maybe because this world resembles my hometown so much that I miss this kind of feeling?" Alex let out a long sigh. "To think it influences my course of action. I made a blunder."

Axis saw the sadness in Alex while Silvia comforted him. "It's fine. Even if they know about our appearance, it doesn't make any difference other than you wearing your mask. If they are facing Lin Xingzhi or any other people from Eulja, I bet they have destroyed the entire area."

Alex shrugged. "I am not here for creating chaos."

"Fair enough. It's a shame that I can't ask for money from them by treating that old man since it is the basic necessities for us."

"Well, it's not like we need money to travel." Alex looked at the sky. "Have you traveled in the sky without involving Spiritual Energy?"

Silvia narrowed her eyes and shook her head. "No."

"The reason I want to get money is to show you that. I want you to enjoy this world while searching for treasures." Alex put on a gentle smile. "Well, there should be many opportunities in the near future. We can take one of them."

Silvia agreed. "So, where are we going?"

"Before that, I want to know the technique you use to talk with someone," Alex asked.

"No, no. I should be the one asking that. You should know that we have a common tongue, right?"

"Yes."

"We have been communicating with the common tongue. However, I often heard you are talking in another language. After a few investigations, I couldn't find any trace you are using that array."

"That array?" Alex tilted his head in confusion.

"Yes. The array that can allow you to understand someone's language. The concept is a bit complicated, but it's pretty useful for traveling. But you...You don't have anything like that as if you know about their language."

"Ah..." Alex remembered when someone told him how useful the ability he got from the Lower World was. It allowed him to speak and understand any language.

"Look at this earring." She pointed at her green-colored earring. If he took another look at it, he found an array instilled inside it.

"This is the array to understand one language. Basically, it translates everything to your brain and uses the word you speak into another world's language. Don't ask me the details, I don't understand." She shrugged. "Axis also has one."

"No wonder." Alex smiled. He never thought about asking this type of question, but now that it was clear, he felt better.

The trio then went to the city for Axis's clothes.
