

Gacha 1151

[Chapter 1151 - War Superiority](#)

Right on the gate of God of Destruction's territory, fifty spaceships were facing each other with the God of Destruction on the helm while Phoenix Goddess and Dragon God on the other side.

They looked at each other without any change of expression even though the war was about to start. They knew that the moment they started, the Spirit God would appear, so they didn't know when to start.

Since they had been staring for hours, Alex finally made his appearance. "God of Destruction, I have come!"

Alex was followed by Lin Xingzhi and Korzan appeared on top of the mothership with a smile as if he didn't feel any pressure from this war.

However, for the God of Destruction, who didn't have any information about Alex, he got pretty worried, considering that they needed to handle these two people. But he was still impressed by how Alex had become a Rank 2 God.

"Haha, Phoenix Goddess! I hope that you like my gift back then." Alex laughed.

The Phoenix Goddess gritted her teeth and couldn't contain her anger anymore. She waved her hand and shot out a fire.

Normally, Lin Xingzhi was required to make a move here, but Alex simply revealed his Sun God Fire and waved his hand as her attack disappeared.

"!!!" Even the Phoenix Goddess dropped her jaw, realizing that Alex's fire could suppress her fire. "You! You have absorbed the Sun Essence too."

Alex smirked and took out his weapons, pointing his sword at her. "I don't mind fighting you."

Before the Phoenix Goddess did another thing, the Dragon God stretched his hand and said, "Phoenix Goddess... Remember our purpose here."

Seeing him speak out, the Phoenix Goddess decided to stop and looked away.

"I will be handling this side and creating a distance between us, so his Pure Fire doesn't affect you and your kin. For now, you should try to kill that God of Destruction without suffering an injury. If you can't, just buy enough time for our force to handle the rest."

She then turned around, looking at a Rank 2 God near them. "What is the situation?"

"They are on schedule. The Holy God seems to understand the situation and sends the Saintess to help the Spirit God's army, while the Song Goddess sends out her troop only to remain in that place because they fear the incoming attack. As for the Palm God... He hasn't made a single move."

The two nodded as Alex smiled. "You two surely have planned so many things."

"Hahaha, do you think you are the only smart guy, Spirit God?" The Dragon God laughed.

"I'm not, but I only know that you two are not smarter than me." Alex shrugged.

"What did you say?!" The Dragon God took a deep breath while shouting. "You can keep that smug smile of yours as long as you want. Do you think Life and Death Goddess can handle two of us, Spirit God? You will know the true meaning of despair."

"Despair, huh. It's been a long time since I have tested despair. I have forgotten its taste and I don't think anyone can remind me of that." Alex snorted.

"Hmph! Your allies can't even move because they fear an ambush. You're truly foolish, Spirit God. And do you think they dare to arrive here by using their Teleportation? At that time, you all will be buried alive here."

Alex shook his head and laughed. "Yeah, yeah. I don't mind. How about you use one now? I'm afraid that we will have a party with lizard and bird meat. I'm sure they taste amazing."

"Wha—" Before the Dragon God rebuked him, another Rank 2 God appeared as he reported everything.

"There's an emergency, my king." He paused for a moment. "Our second army is stopped by three God Kings."

"What?! All three of them shouldn't move, right?"

"No. They are the God of Wrath and Spirit God's two wives."

Hearing that sentence, Alex couldn't help but shout, trying to enjoy his superiority. "Oi, oi! Did you mistake one of them as my wife?"

Ignoring Alex's remark, he continued. "They are the Dark Butterfly Goddess and Number one Eulja's torturer."

"What?! They are God Kings now? No! It shouldn't be possible. Even the Earth God won't be able to win against two God Kings!" The Dragon God suddenly realized the whole picture and asked, "Where is the Life and Death Goddess?"

"She... She..." The warrior gritted his teeth and ultimately informed him. "She is in our territory, trying to annihilate us with the help of the former Fire God's Ten God Beasts as well as the Blackwade Clan!"

"What?!" The Dragon God shouted on top of his lungs. "Spirit God!"

...

In the meantime, the Elemental Gods, Five Guardians, and Ten Commandants appeared on the edge of Eulja's territory, watching how many spaceships appeared out of nowhere.

On top of their ships, Battle God and Earth God looked at them and laughed.

"Eulja, oh, Eulja. As we expected, that technique took a toll on the Life and Death Goddess. She won't be able to fight us right now," the Earth God said while releasing his killing intent. "It seems that my wish in eliminating the Spirit God will be fulfilled soon."

"Do you think so?" The God of Wrath finally made his appearance with a serious expression.

"God of Wrath!" The Earth God clicked his tongue as if expecting this. "I know that you haven't died and joined Eulja. Unfortunately for you, your strength has yet to be enough to fight us."

"I know that. And who says that I'm going to fight you? I am just a sidekick in this battle." Marcus shook his head while laughing. He looked at the Battle God and released all his Wrath toward him. "Battle God... To think that a betrayer can still laugh like this."

"You don't know what it means to have power. You are just a foolish man, God of Wrath."

"Really? I only know that my master is far scarier than you all think." Marcus laughed out loud, not feeling ashamed to admit that he was a slave.

The two Gods were shocked when Marcus admitted his identity as a slave before realizing who his master was.

"Don't tell me... Is your master the Spirit God? Have you lost your mind, God of Wrath?!"

"I don't know what you are talking about... I only know that my anger to you is immeasurable. In addition, the fact that you have killed the Goddess of Destiny... I wonder if you can withstand the full brunt of my anger." Marcus released all of his power. It had traced everything, including killing intent.

Even normal people felt fear as if they were looking at the Wrath itself. No, Marcus might have gradually turned to Wrath itself by embracing it side by side. Unlike the way he used Wrath as his tool to kill people, he now fused with it and became a part of its body. Marcus' power wouldn't be the same as before.

Suddenly, Earth God's laughter resounded as he also released his killing intent. "It doesn't solve the problem, God of Wrath. You still need to stop me."

"Yeah, and we are planning to do that." A female's voice silenced everyone in the area as two God Kings made their presence known.

The Earth God opened his mouth in surprise as he saw Anna and Jeanne in their True Spirit Body.

...

Just like how the enemies tried to ambush Eulja to kill them all, in front of the Dragon God's territory, Alaya along with the Ten God Beasts appeared. Behind them were multiple spaceships ready for war.

Alaya turned to the Ten God Beasts and smiled. "I would have never thought that I would meet all ten of you again."

"We are more shocked than you, Life and Death Goddess. As the peer of our master, we would never think that you are still alive to this day," The red snake said while looking at the planets.

"Well, we don't have the time to chat since our job requires speed and time. You will go with me to their main world while the rest bring destruction to all the planets with Eulja's spirits. Is that okay?" Alaya smiled.

"Will there be a God King?"

"No. According to him, we should have an easy time. Only need to deal with one or two Rank 2 Gods."

"I see. In that case, let's go then." The snake nodded before feeling another presence coming to the battlefield. It turned out to be twenty spaceships. Each of them had a big mark on their ship.

"That mark..." The snake furrowed his eyebrows and found a giant sun mark on the ship with two hammers on top of it as if it tried to refine the sun. "Blackwade Clan."

Song Tao appeared along with seven other Rank 2 Gods of his Blackwade Clan. "It's my pleasure to see the legendary Ten God Beasts as well as the Life and Death Goddess. From the request of my benefactor, I, Song Tao, have brought my Blackwade Clan to assist."

Alaya smirked and asked, "You know about what happened, right?"

"Although I couldn't say anything due to the past oath, I know everything and have come to your aid. Please let us fight together with you."

"We have no time to fight." Alaya then raised her hand and shouted. "All force! March forward! Leave none alive!"

"Uoh!"

They began to march toward the Dragon God's territory.

...

Meanwhile, the same happened to the Phoenix's Goddess territory.

Rubia stood in front of her spaceship, staring at the entire territory. Behind her was the Rank 2 Gods who followed her during this war.

One of them asked, "Ehm, should we really do it? I mean, won't it be a problem if people classify as someone associated with the Spirit God?"

"It's a fact and I have no intention to hide it. From what I have seen so far, Eulja has at least four God Kings not including the Spirit God himself. The moment he ascends that throne, no one will have the opportunity again. I would rather make him my ally instead of enemies," she shrugged before continuing with a sad expression. "There is also one thing that you need to know. My father is actually a survivor of that war."

"Everyone who has seen that era forces a Universe Oath to bind them to not speak anything about the Dark Era. However, I have a good grasp of what kind of war it was and the reason we lost back then was because the God Kings didn't unite."

"That was why I agreed to him so quickly the moment he mentioned the dark era. And the Holy God had hinted at it too as well." Rubia then pointed her staff to the front. "I know that many are innocent, but the fact that one spy can disrupt the entire balance, I have no choice but to eliminate them right now. Who is with me?"

Another one stepped forward and asked with a serious expression. "Since everyone has been forbidden to say it, why could you know it? Depending on my lady's answer, I will choose to return or follow you until this life is gone."

Rubia smiled and took out a single book. "The Universe Oath is forbidden to speak of, but that oath doesn't affect the death. And after I confirmed everything from the Spirit God himself, I know that what my father had poured into this book is true."

"!!!" All Rank 2 Gods dropped their jaws, knowing that it was her father's diary. If it were like this, they had no doubt that Rubia possessed the information about them.

The one who asked earlier quickly kneeled on the ground and cupped his hand. "I shall lay my life down and follow you even if I need to sacrifice myself."

Rubia smiled and nodded. "Let's go then. From tomorrow onward, there's not a single planet in the Phoenix Goddess's territory that would stay alive."

All of them kneeled and cupped their hands. "We received the order."

[Chapter 1152 - Checkmate](#)

"Spirit God!" The Dragon God's voice resounded on the battlefield to the point along with his anger and frustration.

Yet, it didn't stop there. The messenger continued to inform them of the second bad news. "And the Magic Goddess is doing the same thing as the Life and Death Goddess along with all the Spirit God's allies, attacking the Phoenix Goddess's territory."

"!!!" This time, the Phoenix Goddess flared up as she couldn't contain her anger anymore. First, Alex had killed all her phoenixes and sent her the chopping parts of the Rank 2 God Phoenixes. And now the Spirit God wanted to annihilate every single of her people. Although she didn't care about them, she still needed them to forcefully turn them into a phoenix, becoming her asset.

Yet, everything would surely end because of this situation.

"You bastard! I'm going to kill you!"

Alex laughed and shouted, "Kill me?! Why don't you come here? I'm here, waiting for someone to kill me."

However, the Dragon God noticed another important thing as his anger turned into a shock before his face turned pale.

"!!!" Dragon God gasped and pointed his finger at Alex. "You... You... Did you plan all this?"

Alex smirked and said, "You all have been checkmated."

What the Dragon God just realized was the fact that they were already hopeless. If they retreated here, Alex and the others would surely go toward the Earth God and Battle God, ending their lives.

And if they retreated accordingly, not only would they experience a heavy loss, but they couldn't return to their own territories as well because it would mean they would be surrounded from all sides, especially with Alaya and Rubia joining the fray. Alex wouldn't leave this chance and called the other three God Kings and killed them simultaneously.

The only way was to have reinforcement, albeit it meant that the Bats and Angel would need to help them. However, it was impossible because they had gone too deep. Alex and the others would intercept their messages first before reaching the two "weapons" and the soldiers would also fall into despair.

At the same time, if they fell here, it would mean that Alex only needed to destroy the Angel and Bats before killing their king. Unlike in the past, where Alex needed to fight him alone, this time, they had more than ten God Kings to handle him.

Even if their strength had yet to reach the previous generations, as long as Alex reached God King, they would surely kill their king.

This was the real trap Alex made the moment he asked Alaya and Rubia to fight against them. And this was why the other three God Kings decided to not make any move.

All of them were traps for Alex to invite them this deep. And with such confidence, they didn't set up a transmission or a code that could be sent to inform the other side to retreat.

Their current situation was truly hopeless. However, the Dragon God also noticed one single move that could save them from this.

"We need to go to the Bats and Angel's territories," the Dragon God whispered to the Phoenix Goddess but also noticed that Alex must have predicted this move. In other words, the moment they returned there, it would be their graves.

After all, Alex only needed to pinpoint those two areas and started suppressing them before eventually killing them.

The Dragon God gritted his teeth and looked at Alex. "For how long have you been planning this?"

Alex only smiled as he remembered the trial of the Dungeon God. He realized how to utilize the mind game to win the war. At the same time, Aria's art of war also became his inspiration.

The Dragon God thought for a moment and shouted. "I need one thousand God Rank Experts to escape from this encirclement and inform the Earth God and Battle God to return to Planet D. We are going to retreat to Planet Z. I don't care how many lives you need to sacrifice, make sure the two know about our intention."

"Ye-yes."

Alex also waved his hand as he spread all his army, making sure that there wasn't a single person slipping past them. The spaceships also had been using Arrays to create a temporary Special Realm, not allowing any teleportation to the outside.

"You bastard! Do you think you have won this war? No! Our Supreme King is the greatest!" The Dragon God snorted and raised his hands. "We are breaking through this encirclement."

Alex also ordered his army along with the God of Destruction. "God of Destruction! We need to keep them here as long as possible. Even if you can't kill those two, we need to hold them here and cripple their armies. With this, we will have an easier time in the future."

Listening to their conversations this whole time made him understand that he shouldn't make Alex his enemy. He shouted. "Do you hear it guys? Leave no one alive!"

"Uoh!"

The Dragon God gritted his teeth and said, "Phoenix Goddess... You will handle the God of Destruction with all of his Rank 2 Gods."

Noticing the severeness of this matter, the Phoenix Goddess suppressed her anger for a moment and nodded. "I understand. I will do it."

The Dragon God then turned around and summoned all the Rank 2 Gods under his influence. Considering this was just a distraction, there were some holding down the fort, but he truly regretted not bringing them here since they would soon die under Alaya's hand.

Eight Rank 2 Gods appeared and followed him, moving toward Alex to buy time, so Alex didn't suppress a single Fire Element User in the Phoenix Goddess's side.

"Unfortunately, you are still too confident, Spirit God. You should at least bring your Elemental Gods if you want to stop us here." The Dragon God's hands slowly turned to that of a dragon before his entire body became a dragon itself.

He revealed his true form that turned out to be a blue dragon. His appearance looked like that of a western dragon and a huge wing that spanned over one hundred meters.

A roar shook the battlefield, showing his anger toward Alex. "I'm going to kill you, Spirit God."

The Phoenix Goddess seemed to have the same intention and didn't bother to hide it anymore. She turned into a Phoenix.

The God of Destruction only smiled when he looked at her true form. He pointed to the left, saying, "All fire element users are to go to help the Spirit God. You're useless in front of that fire."

Without hesitation, they followed his instruction and went toward Alex.

Seeing that everyone had left, the God of Destruction raised his hand as a purple aura coming out of his body.

"This is the time I show the result of my practice... I hope that you can give me an insight, Phoenix Goddess." He smiled as his whole body was surrounded by the Power of Destruction. Just like the God of Wrath, he also began to understand his power even more and fused with it. "I'm the destruction itself. No matter where I go, the destruction shall follow."

He raised his middle finger and smirked. "Come, you parasite phoenix!"

Cry.

The Phoenix Goddess let out a loud cry as she flew toward him.

Seeing the other side had begun, Alex also noticed their movement where they tried to break through the encirclement. He looked at the blue dragon and said to Lin Xingzhi. "Can you handle the blue dragon for me?"

"Sure thing. I'm in the middle of training, so I don't have the confidence to kill him, but I should have enough power to last for days and he won't escape."

Alex nodded and smiled as he began to fly forward along with Korzan, looking at the eight Rank 2 Gods.

"No matter how powerful you are, you two won't be able to beat eight Rank 2 Gods. It's over." The Dragon God still tried to look down on Alex, so his soldiers were inspired and stayed strong since there was no guarantee they would lose yet.

Alex chuckled and took out his weapons while saying, "What a bold claim, right, Korzan?"

"I shall follow Your Majesty's order." Korzan pulled his long sleeves as he started releasing his Divine Energy.

"Can you handle four of them for me? I will handle the remaining four."

A smile suddenly appeared on Korzan's face as he took off his glasses. His body began to burn and turn into magma. "If they can't defeat the Elemental Gods, they won't be enough to stop me."

Alex smiled and released all his energy too. "So reassuring... Let's see who can kill them first, shall we?"

...

Just like that battlefield, on the other side, Alex also left a system, especially through his system.

Anya relayed the message to Anna.

[Anna... Alex wants you to encircle them and eliminate every single one of them. And there will be a messenger there. You need to kill them too. This way, those two will not know the other battlefield's situation. The moment we have gotten a hold of them, they will end up retreating to another place which is most likely where all the bears stay.]

[We will then attack there and eliminate every single Bear in that world. After this battle, Alex wants all the Dragons, Phoenixes, Bears to be eliminated. In other words, we will only need to face Bats, Angel, and the remaining Snakes along with their God Kings in the next war. Their strength will be exponentially reduced.]

Anna narrowed her eyes and nodded before looking to the sides, finding the Saintess had arrived with the reinforcement.

"You all are late!" Anna snorted.

The Saintess's eyebrows twitched, thinking that Anna had no manner, considering they were here to help them. However, another Rank 2 God under the Holy God patted her shoulder and shook his head. "If you take a closer look, Eulja has two more God Kings. And there is God of Wrath among them. Eulja's strength is not to be underestimated. Only now can I see why His Holiness said that the Spirit God is scary."

The Saintess widened her eyes and took another look, realizing what she almost did.

"This is why His Holiness asked me to go with you. Someone needs to calm you down. For now, forget about that pride of yours."

Anna didn't know about their conversation, but she already had the plan ready from Anya. Anna shouted, "The reinforcement from the Holy God is to hit from the left side."

Without waiting for their answer, Anna returned to her position and informed every single Rank 2 Gods on their side. "Elemental Gods! All of you are to attack them from this side. They can go up and down, so we will intercept them accordingly."

Agnis acknowledged it out loud. "Understood."

Anna then sent another order. "Ten Commandants, you all go to our left sides. We will need you to make sure not a single of them can escape."

"Understood." All of them shouted simultaneously.

"Marcus! Position yourself to protect the Ten Commandants from Battle God's power."

Listening to the order, Marcus showed his answer with his action by going around the Battle God to situate himself between them.

"Lastly, all five Guardians will surround them from behind. Your order is the same."

"Understood." William nodded and signaled Sullivan to help them as well.

While they were moving, Anna actually disappeared from the battlefield.

Suddenly, Carissa was stunned when she saw Anna appearing in front of her. She then heard a thought transmission.

'Carissa, can you spread the poison behind us? There will be messengers coming from the other battlefield. I want you to watch out for them. This is the most important mission from Alex.'

Carissa gulped down and took a deep breath. Her expression turned serious as she nodded. 'I understand. I will make sure none of them pass... I guarantee it with my life.'

Anna patted her shoulder before returning to the battlefield, preparing to help Jeanne again on the battlefield.

Raising her hands, she shouted. "His Majesty's decree! None of them shall escape from this place alive!"

"Uoh!"

[Chapter 1153 - Surpassing His Past Self?](#)

Alex looked at four Rank 2 God dragons with a serious expression. His Sun God Fire had been released along with his killing intent and Divine Energy.

Even though Alex only reached Rank 2 God not long ago, his strength alone was capable of killing every single Rank 2 God in his way.

The first dragon had blue skin reflecting the ice element it possessed. Meanwhile, the other two had a wind element and the last one had a lightning element.

Alex clenched his sword and spear tightly, wondering who would make the first move.

Suddenly, the Lightning Dragon disappeared, using her lightning element to increase her speed to reach Alex's position. In an instant, her right foot was already right in front of Alex's head, covering his eyes so the other three could approach him as well.

Unfortunately for her, Alex already saw through her leg with his Spirit Eyes, keeping track of every single movement. At the same time, she had yet to understand the true terror Alex possessed.

As if feeling something pressing her from above, she quickly stopped that kick and spun her body before raising both hands to stop whatever was coming from above.

The invisible thing from above was none other than Alex's Space Element that blew the woman downwards.

The three spread around, trying to attack him from three different directions.

The two Wind Dragons came for him from the left and right side while the Ice Dragon came from above.

Alex took a glance at them before spinning his body as the Wind Dragons released torrential wind that would hit him. He simply directed them to the side but realized that the Ice Dragon finally made his move. Even the Lightning Dragon had recovered and planned to attack him from below.

He expected this kind of attack and formed a plate to deflect a Laser like attack containing the Ice Element.

The moment it touched the plate, the ice element attack was directed to its comrade, the Lightning Dragon, and ended up hitting her instead.

Roar.

The Lightning Dragon screamed in pain while the Ice Dragon panicked. Using this type of confusion, Alex raised his finger as a huge translucent pink-colored sphere appeared, trapping all the four dragons and Alex inside.

"Let's make this more interesting." Alex smirked and activated his technique. "Inverted Dimension."

Suddenly, everything turned upside down. Although it only affected the one inside and there wasn't a change in their position, it started making them sick when they saw everyone other than them was completely inverted.

Everything was inverted in this dimension. Since he had gotten used to this technique, Alex could immediately react and went straight to the Ice Dragon.

His sword was filled with so many powers as he jumped upward.

"!!!" The Ice Dragon opened his mouth as a huge ice barrier separated him and Alex, allowing him to get precious time to recover from this weird place, but Alex seemed to be one step ahead.

A string of blue light appeared and he soon realized it was a blade instead of a light when Alex tweaked it a bit. That blue light then came down and cut the huge chunk of ice, creating a way for him.

"One Inch Spear." Alex smirked and went straight to the dragon, swinging his blade.

Roar.

The Ice Dragon roared and raised both hands, controlling the two pieces of ice that had been cut and fusing them again to stomp Alex that was in the middle of the gap.

Bang.

Before it could even be closed, Alex's solidified Space Element stopped them as Alex freely closed their distance.

Not wanting to die, the Ice Dragon quickly blocked Alex's sword with his claw. Alex only smiled and revealed the true might of his strike.

"Five Purities Slash."

His sword clashed with his claws, but the winner soon appeared when Alex's sword cut through the claws. His sword went straight to the dragon's neck and sliced it without a single restriction.

"No way!" The three dragons gasped. No one could expect Alex to have the power to kill a Rank 2 God this easily.

The two Wind Dragons let out their breaths that turned into a sharp tornado, cutting everything on its way.

Alex snorted and used his Spatial Gate to teleport to one of them.

"Watch out!" The Lightning Dragon shouted as she appeared next to Alex to attack him while stopping his attack on the Wind Dragon.

Alex decided to halt his movement and raised his sword to block this kick. Unfortunately for him, his sword wasn't sharp enough to cut the Lightning Dragon's skin since there was no Five Purities Slash.

And the Wind Dragon that almost got attacked quickly recovered and punched Alex from below, sending him flying above.

The other Wind Dragon had prepared for this and went straight to him to punch him from his left.

Not wanting to get another hit, Alex used his Space Element to create an invisible wall behind him and stepped on it. He then channeled his Space Element to his right foot and spun his body, sending a straight kick to the Wind Dragon's fist.

The Wind Dragon obviously had his pride on his fist, so he tried to overpower Alex like the Lightning Dragon, only to find that was the stupidest mistake he could ever make in this battle.

Bam.

A huge shock wave shook the battlefield as Alex stopped the Wind Dragon's fist. On top of that, the Wind Dragon looked very shocked.

No one other than the Wind Dragon could actually see it since it was hard to notice but very painful for him. "What?! His foot... doesn't even touch me? Yet my hand is bending."

Alex just enveloped his fist with concentrated Space Element like how he fought the puppet in the Dungeon God's place and bent the Wind Dragon's fist as if all the bones and skins were forcefully dislocated in a weird way.

Using the momentum gained from the power behind that fist, Alex went away from him while slashing his sword upward.

"One Sword Kill, Blade of Extinction."

A Sword Wave flew toward the dragon and was about to kill him. Whether it was fortunate or unfortunate, the Wind Dragon managed to move slightly to the side, so the Sword Wave only cut his entire right arm that had become useless anyway.

The Lightning Dragon seemed to have no intention to give up by appearing behind Alex to stop Alex's madness.

Alex raised his spear and sword on top of his head, but the dragon seemed to have no care for her well-being and continued pushing Alex until she managed to blow him away.

It was at this time Alex used the momentum and went through a Spatial Gate.

"!!!" The Lightning Dragon widened her eyes and turned around, but it was too late.

"You have finally made a mistake." Alex smiled and slashed her body, only to find it was not deep enough to penetrate her heart.

Roar.

Still, the painful roar echoed because no one would be able to endure that pain. She gritted her teeth and chased after him, who had disappeared again through his Spatial Gate.

As if she felt the fluctuation of the enemy, the Lightning Dragon went quickly toward the injured dragon to help him from Alex, who suddenly appeared above him.

"Hmph! You won't be able to hit him." The Lightning Dragon even used her own life to protect her teammate. Unfortunately, Alex couldn't afford to waste so much time and used a smaller Spatial Gate to send his sword through the Space World to the injured Wind Dragon.

Alex smiled and extended the blade once again. "One Inch Spear."

The Dragon, who was occupied by the pain, was sliced into two in that single moment. However, Alex also couldn't stop the fact that he was a bit vulnerable and got kicked by the Lightning Dragon.

Alex was blown away and spat blood.

The Dragons obviously didn't want it to end just like that. Both of them released their breath at the same time, hitting Alex.

Boom.

Alex quickly slashed the smoke produced by the explosion, revealing his appearance. As expected, that one attack injured him as there were grazes on his body along with a trace of blood on his mouth and clothes.

"..." Alex shook his head and took a deep breath. The remaining two Dragons shouldn't be that hard, so he promised himself not to get any more injuries.

The Lightning Dragon and the Wind Dragon exchanged looks as if they got their plan ready and went in two different directions.

The Lightning Dragon covered her body with lightning before another pair of wings made of lightning appeared on her back.

"Lightning Wings."

"Gale Storm." The Wind Dragon, on the other hand, created a huge tornado, heading straight to Alex.

The Lightning Dragon flapped its wings before four lightning balls sparked around her wings and shot lightning bolts. Surprisingly, the lightning fused together with the wind, creating an even stronger attack.

Alex clicked his tongue and raised his hand, letting his spear float on the space.

"Black Hole."

A black-colored ball suddenly appeared before Alex threw it right at the tornado. The ball started expanding and absorbing everything nearby. Luckily, Alex already grabbed his spear back, so it didn't get absorbed.

The black hole clashed with the tornado and ended up swallowing it.

Alex then raised his other hand as a huge fireball appeared on top of their head. But when one took a closer look at it, they would realize that this ball was none other than a Fire Disturbance.

"Star God Divine Control."

The Fire Disturbance shrank in an instant as all the Fire Energy enveloped both his sword and spear, making them even stronger. In addition, Alex's Sun God Fire was also fused in that element.

The Wind Dragon felt danger when he looked at the weapons and flinched. Meanwhile, the Lightning Dragon gritted her teeth and faced him.

"Haha, you have finally dropped your guard." Alex smirked and used his Spatial Gate to send him to the Wind Dragon and slashed his sword.

"!!!" The Wind Dragon channeled all his wind power to his fist and punched straight to the front. A torrential wind blew out of his fist, trying to swipe Alex's power in that attack.

Alex actually didn't have a problem because the better way to defeat an attack like this relied on his spear technique instead of his sword technique.

He changed his grip a little and thrust his sword instead. "Twin Fusion Spear."

The Space Element deflected the wind, so Alex didn't get blown away, while his Sun God Fire and Fire Disturbance Power slipped past the Space World and hit the Wind Dragon's back, creating a hole in its body.

Since Alex didn't get a notification from his system, he hurriedly beheaded the Wind Dragon and received the kill message. The system was indeed a good way to know whether he had killed his enemy or not.

"How dare you!" The Lightning Dragon went toward him and tried to attack him again like last time, but Alex had seen this move once. The moment the Lightning Dragon struck him, Alex disappeared like a ghost before his presence was felt behind her.

His sword contained everything in the Seven Purities Slash, but there was one more in it. It was the power of the Fire Disturbance.

"You are the first to experience this attack." Alex smiled as he slashed his sword with all his might. "Eight Purities Slash."

The Lightning Dragon gritted her teeth and spun its body, covering all the lightning on her fist and threw a punch to stop it.

Once again, Alex shocked the entire battlefield like he did when he released the full power of the Seven Purities Slash for the first time.

"!!!" The Lightning Dragon widened her eyes and roared, albeit it was futile. If the Seven Purities Slash was at the same level as the previous Alex's strongest slash that could cut a small planet, this Eight Purities Slash had clearly surpassed it.

This was the gamble that the previous Alex won when he decided to have his reincarnation fight against the beast instead of him.

The slash was so powerful that it stunned almost every single person on the battlefield.

The Dragon God widened his eyes and gasped, stuttering. "He... Did he... He might be able to cut down our Supreme King..."

[Chapter 1154 - God Kings' Fights](#)

The Dragon God gritted his teeth as he realized how much he had underestimated the current generation of the Spirit God. Although Alex had won several times, they thought Alex wouldn't be able to surpass the Spirit God, but with the power he showed earlier, there was no doubt Alex had the potential to surpass the Spirit God.

When he reached God King Stage, Alex might be able to cut a planet into two already with that Eight Purities Slash.

The Dragon God let out a roar that was recognized by every single Dragon in the area.

Even if he wanted to kill Alex today, he knew he wouldn't succeed because of Lin Xingzhi. At the same time, he couldn't afford to die because everything would be over. Hence the only way to solve this problem was to order all the Dragons to break through even if they needed to sacrifice their lives.

The Dragons acknowledged the order and their movements began to become more ferocious.

Lin Xingzhi narrowed her eyes and looked at Alex who seemed to be in trouble. Every time he used the Spatial Gate, he would be blocked by a dragon even if it meant they needed to die.

Alex thought that by giving the God of Destruction some time alone with the Phoenix Goddess, he would gain enough experience to get stronger, but he regretted that decision. He should have killed the Phoenix Goddess first by teleporting to their side since he couldn't do it right now.

And if he tried to suppress her, she would certainly fight back since it wasn't like Alex's superiority was that high for her to handle. If the Phoenix joined their strength together, his suppression could be blocked and Korzan would end up in a bad state.

After considering all things, Alex decided to take care of the dragons first. No matter what, they should have completed the basic requirement to win this war.

Lin Xingzhi smiled and raised her hands. Two Disturbances appeared. Instead of a combination between Lightning Disturbance and Fire Disturbance, Lin Xingzhi already understood more of her power and created Space Disturbance and Fire Disturbance instead.

"Fire." Lin Xingzhi turned the Fire Disturbance into a fire dragon that went through the Space Disturbance and enhanced its attribute. The dragon went straight toward the Dragon God with the ability to bend space.

The Dragon God gritted his teeth and released another freezing breath, turning the dragon into ice, only to find it melt soon after. However, the fire dragon also disappeared.

The mist created from the clash became the perfect smokescreen for Lin Xingzhi, but the Dragon God read her move and released another breath.

However, three Disturbances appeared at once. The Space Disturbance in front of her deflected the breath to the side, giving a good opportunity to strike.

The Lightning Disturbance and Fire Disturbance then fused. Surprisingly, they began to gather around her hand, allowing her to wield them for a few seconds. This was the technique that Lin Xingzhi had been practicing in order to reach her father's level in the past.

"Are you insane?" The Dragon God could see the power behind this attack, but it also meant that Lin Xingzhi prepared for a certain risk to perform it.

Ignoring his words, Lin Xingzhi smirked and pushed both palms to the Dragon God's chest. The lightning burst and spread all over the Dragon's skin while the fire flared up on the Dragon's back. "Great Fire Shock!"

Roar.

The Dragon God screamed in pain before slapping Lin Xingzhi, blowing her away.

"..." Lin Xingzhi took a deep breath as blood came out of her mouth and nose. What she did earlier was powerful, but also left her helpless since she hadn't mastered it. Yet, she couldn't help but smile, knowing that the potential she had been waiting for presented itself before her. This was the only time

she could do it because the Dragon God focused on escaping instead of fighting to the death, so she knew she would survive.

"This is the end, Dragon God." Lin Xingzhi smirked. "You're going to lose this way."

The Dragon God roared again before replying to Lin Xingzhi. "You can take pride in this messy win, but we are going to have the last laugh."

"We will see."

...

Meanwhile, on the other side of the battlefield, purple fire and red fire clashed. The red fire exploded and engulfed the purple fire, but the latter fought back and started the decaying process of its enemy.

The God of Destruction smirked as he raised both hands, creating two wisps of Power of Destruction that he launched after the explosion. "Twin Decay. Enla."

The Phoenix Goddess simply flapped her wing and went straight to the two wisps. The latter exploded and tried to decay her body, but her regeneration managed to keep up with it, so it was like nothing had changed.

"..." The God of Destruction took a deep breath. "As expected, you're strong. To think I have been proud this whole time... I'm not fit to be a God King."

"Just go die." The Phoenix Goddess let out a loud cry.

The God of Destruction shook his head with a smile on his face. Even though his body was full of bruises because of the fight, he still had enough energy to play for a few more hours. "If you want me to die, how about you accompany me here for another few hours? Unfortunately, you don't dare to do it because you are the one going to die."

The Phoenix Goddess opened her mouth and spat out a giant fireball toward him.

"Burn Everything."

"Tch. Do you think your spit is good enough to kill me?" he chuckled and struck it again with his fist until nothing remained. Meanwhile, the God of Destruction found the movement of the phoenixes where they started going to one area.

They seemed to be helping the Dragons to break through the weakest link before Alex killed all the dragons around him.

Unfortunately, he couldn't do anything and none of his followers had enough energy to help Alex. In other words, as long as Alex was trapped there, there was no way to push it even more. The only way to help him would be Korzan taking his place, so Alex's power could overturn the battlefield.

"Hmph! Let's continue." The God of Destruction made a little grin as he jumped forward.

As the two continued, there were two more fierce fights on the other battlefield.

"Blood Lightning Incursion." Jeanne thrust her sword toward the Earth God, but was stopped by the Earth God's giant bear hand that had been covered with rock. It completely neutralized Jeanne's lightning even though some sparks still cracked the rock.

The Earth God pushed her back while assessing the battlefield. "This is not going to work."

He realized Eulja's true objective was to kill their army. In addition, there was no information from the other side, so he couldn't decide anything at the moment.

Although he could buy more time, he was afraid that the Spirit God would call the other God Kings to help them and the situation would become even more hopeless. After all, this operation was to be a swift one.

Knowing that they had wasted too much time in this battle, the Earth God raised his hand. "All troops. Pummel all the people in the Saintess's side and retreat!"

"Do you think we will allow you?" Jeanne appeared and struck him again with her lightning sword, but stopped by his arms again. It was truly a frustrating opponent, considering that his bear paw alone was already so powerful. With the addition of the stone covering his hand, Jeanne couldn't see the path to victory.

Suddenly, Anna appeared next to the Earth God while swinging her scythe. "Darkness Sanctum."

A black-colored building appeared on her back. Its size was only three times her body, but it lent Anna enough power to crack Earth God's stone hand, forcing him to retreat a few meters.

"..." The Earth God narrowed his eyes. The most troubling enemy would surely be Anna. He then took a look at the Battle God that seemed to start getting overwhelmed by the God of Wrath despite having turned into a bear.

The situation truly didn't favor them. No, the reason why everything started falling apart was the fact they didn't have information about Anna and Jeanne. If they knew the Spirit God had two more God Kings hidden, they would have attacked the Holy God or Song Goddess instead to kill at least one of them.

The Earth God clicked his tongue and fully turned into a bear. He roared, "All troops are to escape from this place and return to our meeting place."

"..." Anna fell silent as she looked into his form. He knew that everything had gone according to Alex's plan. She sent a signal to the others and started killing all the enemies since they were running away.

The Saintess became the shield to prevent the enemies from escaping even though they would soon break through her ranks. In the end, the war turned into a chase from three God Kings, killing almost all of the enemy troops.

[Chapter 1155 - Just The Beginning](#)

"Oi, oi! Why are you running?" Lin Xingzhi's shouts echoed in everyone's ears, especially in the Dragon God's.

After breaking through Alex's formation, the Dragon God and Phoenix Goddess had begun retreating their army together with them. Meanwhile, Alex gradually became weaker and tried his best to handle the dragons that came to stop him.

Knowing he had lost too much power to the point he couldn't suppress the Phoenix Goddess anymore, he gave up on that idea and ordered Lin Xingzhi to pursue those two God Kings first to eliminate every single soldier on their side.

The Dragon God gritted his teeth when he looked behind, finding Lin Xingzhi and her soldiers killing the dragons one by one. At this rate, he and the Phoenix Goddess might have the power to escape from them, but they wouldn't have anything more.

"Lin Xingzhi, you b*tch!" The Dragon God roared but didn't stop in his tracks.

The Phoenix Goddess suddenly sent a thought transmission, asking, 'What are we going to do?'

'We will go to Angel's territory. No matter what everyone says, he is the only one holding our Supreme King's secret. Although this means that only five of us remain with only Bats, Angel, and Snake's armies surviving, this battle is still salvageable.'

'How about Bear?'

'I'm not sure. There is no telling whether our message reaches him or not, considering the Spirit God wouldn't let it happen. Just believe in them to not make any foolish choices.'

'Alright. We will pay them back once our Supreme King has woken up.'

Since the two began creating distance due to their speed, Lin Xingzhi finally stopped chasing and killed the rest of their soldiers instead.

Like how it went with the phoenixes, many corpses of Dragons and Phoenixes were scattered in outer space.

Alex and Lin Xingzhi regrouped. Their eyes intertwined for a while before they looked at each other's bodies, worrying about their injuries.

"Are you alright?" Alex asked.

"Yeah. I'm fine. I have gotten enough information as well to become a more powerful God King."

"Then I'm glad." Alex smiled and panted.

"Are you sure you are alright? You have been fighting a thousand dragons as well as four Rank 2 Gods. Let's take a breather, okay?"

Alex shook his head. "Ask the Song Goddess, Holy God, and Palm God to advance according to our second army, destroying all the bears alongside Anna and the others. After that, they are to march toward the Dragon God and Phoenix Goddess' territories and put an end to all this."

"I understand." Lin Xingzhi nodded with a sigh. "You should rest first."

"I will after handling a few more things." Alex agreed with a serious expression before asking Korzan, who was a bit far away from him. "Korzan! Are you alright?"

"Yes, Your Majesty."

"..."

Before he could reply, the God of Destruction appeared in front of him with a serious expression. "Spirit God."

"God of Destruction." Alex nodded. "How was your fight?"

"It was great and gave me insight."

"That's good."

"Anyway, I would like to thank you for coming to my rescue."

"The others would've come if I didn't ask them to remain in their world."

"Ahaha, it's all within your calculation." He chuckled and knew Alex's plan had crippled the enemy. Unless they had another reinforcement from the Bats and Angel, there was no way they could fight them.

"Still, I'm not sure whether they will stop just like this or not." Alex narrowed his eyes, contemplating this matter.

"What do you mean?"

"The seal should last for another few decades. They should also know about this, but they still feel confident even though the moment I reach God King means game over for them."

"Don't tell me... You're suspecting them to..." The God of Destruction widened his eyes and drew a gasp. If Alex's predictions were correct, it would mean all the efforts they put into this war would become vain.

"Yes. I'm assuming they have a way to accelerate the seal's time limit and unseal that beast before the time limit." He nodded with a tired expression. "I chose to eliminate their soldiers instead of the God Kings for this. I know that killing the Dragon God or anyone else with the concentrated power will give us a huge advantage..."

"Unfortunately, there are still Bats and Angel. I couldn't afford to just send all our forces to fight them because of the probability of them appearing on the battlefield. That's why I'm spreading all our troops while having the Holy God, Palm God, and Song Goddess to remain in their territories as our backup plan."

"I see." Raiju understood Alex's plan and had no qualms about it despite not ripping the huge benefit. After all, it would mean that he gambled everything in one instance. The moment the reinforcement appeared, they would be the ones suffering.

Hence, Alex chose the safest but got the most of it.

"So, what are you planning to do next?"

Alex fell silent before smiling. "There is only one option, right? Get stronger of course."

Raiju shook his head helplessly and turned around. "Well, I will also do that. If you need anything from me, just inform me first. I will try to help you to the best of my ability."

Lin Xingzhi returned to his side after settling everything with the soldiers. "Are you going to return to Eulja?"

"I'm planning to go to the Sword God's Pavilion after this to fuse my Sword Qi and Spear Qi together before returning to Eulja to try forming my law. I have a mentor such as you and Alaya, so I think this will be an important step before breaking through to God King in the sealed space."

"My Father's?"

"Yes. I'm planning to train there where I can take advantage of the time flow difference. Ten years inside are one year outside."

"But can you condense your law this fast?" Lin Xingzhi frowned, knowing how hard it was to become a God King.

"I'm not sure, but the enlightenment from before gave me something important to this process. I may be able to do it. No guarantee though."

"Hmm..." She thought for a moment. "I will continue pressuring them. Is that alright?"

"Yes. Just make sure you are present there. Assuming they have the same number as five thousand years ago, that means they have seven God Kings excluding the Supreme Beast. For now, we have killed the Phoenix's pet, so we may find six more God Kings.

"Meanwhile, we have four God Kings in the alliance, Alaya, God of Wrath, and three more God Kings on our side. If we add the Magic Goddess in the calculation, it means we have ten God Kings on our side. It's still not enough."

Lin Xingzhi pinched the bridge of her nose and sighed. "Indeed. When we take another look at the condition, it's still not enough to fight them. Luckily, we have killed all the Dragons, Phoenixes, and Bears. We may be able to exhaust them before killing them with our overwhelming numbers."

"I'm not sure." Alex shook his head. "Well, I need to get stronger as soon as possible."

"There is also Leoz. I hope he can become a God King soon."

"Yeah. He will become a strong one." Alex agreed and continued, "For now, have our N Squads keep track of the enemy's movement. The Dragon God and Phoenix Goddess would surely come to their allies. The same applies to the Earth God and Battle God. We will be able to get their location this time and start pressuring them."

"Should we attack them as soon as we know their exact location?"

"You mean to pressure them? No need. The moment they retaliate, it will become a big problem for us. As long as they don't go anywhere, it's fine for me."

"How about inciting the universe? We can kill them by using more people."

"No. The only reason I gave the information back in the Pill World was to pressure them to make this kind of move. After accomplishing it, I'm afraid there may be some spies in the mix, making the battlefield more complicated than before. I don't want a potential threat coming on my back, so let's wait without doing anything. Let me become a God King first."

"I understand." Lin Xingzhi nodded.

Suddenly, the God of Destruction appeared again and asked, "Oi, do you want to celebrate this victory with lizard and chicken meat?"

Alex's eyebrows twitched as he took a closer look at the dragon's body. According to the Spirit Eyes, the parasite had died the moment the host died. However, Alex still had no intention to eat the meat.

"Instead of eating them, I have another solution. How about we harass them by using their own people?" He smirked as if his head was filled with evil ideas.

"Ho? Let me hear this brilliant idea of yours."

"We should cut all these dragons and phoenixes into pieces and throw them to their planets. Don't people like shooting stars?"

"I have never thought you are this evil, Spirit God. I'm impressed and admired you at the same time. Alright. Let my people do it." Raiju had a big smirk, feeling excited just by imagining it in his head.

Alex's strategy was simple. The Phoenixes and Dragons' bodies were strong and big, so even if they cut them into pieces, they wouldn't easily disappear even if they needed to cross the atmosphere.

If the soldiers threw them from outer space to their planet, they would surely have meteor rain for days. It would be a good spectacle to behold. And if they threw them fast enough, it would create an impact in their world.

Not only would it infuriate the people inside, but they also would be able to kill them and cause mass destruction as well.

"Sure. I will leave everything to you. Just make sure to not destroy them so much since we can't afford to have them retaliate for the time being. You only need to harass them enough to lower their morale. We can wait other than that."

"Alright. I'm fired up." Raiju smiled and raised both hands before leaving again. "See you later, Spirit God. You should rest your body too."

Alex waved his hand and took out a pill to recover from his injury. He also gathered a bit of Divine Energy, so he could reach the Sword God Pavilion from this place.

Before they returned, Alex gathered all the people again.

He looked at their faces. Some were filled with sadness, some contained joy, and some spread anticipation and adoration.

The first thing he did was not opening his mouth but lowering his head.

"Your Majesty?!" The Spirits were stunned by Alex's action. They thought they would hear the shout of joy for their win, but this bow... They didn't know whether they had the right to accept it or not.

However, Alex continued before the silence turned into an uproar. "Before anything else, I would like to show my deepest gratitude for all of you who participated in this war, especially those who had fallen. I couldn't show how grateful I'm to have all of you here as your Leader despite not being a Spirit. Let us take a moment to remember the warriors who once fought together with us."

The Spirits couldn't contain their tears as some of them dropped to their knees.

After two minutes, Alex finally raised his head and said, "Even so, we need to keep walking forward because this war has yet to end. Stronger enemies will appear before us, and even I can't fight them without you all. I hope that you still fight together with me."

The Spirits fell silent for a second before cheering. Their shouts were in the form of praises, admirations, and so on.

"Long Live His Majesty."

"We will follow you until the end."

"Let's destroy the bastards that come to ruin this Universe."

Alex simply smiled and raised his hand again, asking them to be silent. "Before that, we all deserve to rest. All troops, we shall return while holding our heads high!"

"Uoh!"

[Chapter 1156 - Answer](#)

After watching them go back, Alex turned around and used his Teleportation Array to send him to the Sword God Pavilion.

It took him another day to reach there.

As he expected, the pavilion remained the same as ever. While using his Spatial Gate to transfer him inside, Alex activated the token to tell her that he had returned here.

He didn't even bother with all the visible changes in surroundings and quickly reached the top floor with his Spatial Gate, finding Zera waiting for him right in front of the house.

"You have truly surprised me, Spirit God. Not only have you reached Rank 2 God this fast, but you also want to come back to this place. For what reason do you return to this place?" She narrowed her eyes, observing Alex's expression.

Alex shook his head and explained. "I have come to gain a bit more insight from you. Also, I wish to use this place to fuse my Sword Qi and Spear Qi. Will that be alright with you?"

Zera contemplated for a moment. Before agreeing to his request, Zera asked, "Has the war started?"

"The big war is coming soon. I'm afraid I have less than a decade to become a strong God King."

"Do you need my help?"

"In a fight? No. The battle will become too horrible sooner or later and I still need to fulfill the promise I have with you and the Sword God. Besides, with more than twenty God Kings involved in this war, do you believe you have the strength to change the course of this war? I don't mean to look down on you, but this is the fact."

Zera closed her eyes and sighed. "Well, I have no words to say. Even the strongest people on this planet were only a mere Rank 3 God. I understand. I shall believe in you, Spirit God. Doing my best to assist you in this training is also considered a contribution."

Alex remained silent, but a smile appeared on his face.

"I have a question for you to be honest."

"What is it?"

"What do you think about my sword intent?"

"Your Sword Intent has a different quality than the norm. For example, I can say that it's the sharpest, but it's not at the same time. Why? Due to your Spear Intent in the mix, your Sword Intent can be seen as the sharpest. Yet, when it also means that it's not a true Sword Intent, so I can't say your Sword Intent is the sharpest."

"The combination is the sharpest." Alex nodded in agreement.

"Yeah. The same applies to your Spear Intent. Normally, spears are used for one main purpose. Stab your opponent. However, everything changes because of your Sword Intent, it has the power of slashing your enemy. The explanation is similar to the one earlier, but what I want to take note of is your extraordinary perception that can fuse them.

"Like Ice and Fire, these two normally can't be fused. No, even cultivating both of them at the same time alone is already torturous enough to the point it can potentially ruin one's future. Yet, the Spirit God managed to do it in the past... Why?

"Even I don't know the answer. I once asked my master, the Sword God, and he told me one thing. Humans are like a bowl. Insert the Sword Intent in the form of liquid and you are full. If you pour the liquid, it means you are abandoning your Sword.

"However, the Spirit God was different. Instead of pouring it half to fill it again with the spear, the Spirit God turned himself into a vessel that could absorb everything. Six Elements and Two Intents, he was a monster capable of absorbing them at the same time, giving him immeasurable power that could rival those who mastered one thing to its peak.

"Everything was the result of his weakness. He turned his weakness to the strongest strength he could ever hope for. That Elementless body of his had grown into a bottomless pit that could swallow everything. In other words, that body was not a vessel anymore but was like that of a black hole."

"..." Alex narrowed his eyes and looked down, falling into deep thought. "I see. Unfortunately, my body is not Elementless anymore."

"Well, the Spirit God has that elementless body to hold all that power. But in my perspective, your power is far stronger than the Spirit God from the very foundation. I don't know why you can wield a

Pure Fire and a Space Element alongside your two Intents. Your two elements alone are powerful enough to rival Spirit God's six or seven elements."

"What do you think the reason is?" Alex asked with a hesitant tone. Even though he knew Zera didn't have the answer, he just felt the need to ask.

"Well, that's the answer you need to seek. Why can your body host two Elements, two Intents, and so on? What do you think the reason is?"

Alex closed his eyes and covered his face with his hands. It wasn't easy to get this answer.

Since he started searching for the answer to fuse both his weapon qi, Zera smiled and turned around, leaving him alone.

Alex, on the contrary, began to recount his journey from the beginning, wondering if this was actually the Spirit God's power or the power he acquired in his journey.

When he first knew he had the ability to become stronger, the first thing he found was his system. There was nothing wrong with the system other than its mysterious items, such as the Elemental Orbs or Mastery Cards.

But what rubbed him the wrong way was the next big thing that happened to him. After receiving the acknowledgment of his Pure Fire, his body evolved, allowing him to host two elements. In addition, both elements were very powerful on their own.

This type of power had an ego, like when the Pure Fire showed its dominance over other types of fire. Yet, he never experienced such a clash in his body.

At first, he thought the answer was due to his Space Element started weak, so it just gave in to the Pure Fire, but it would still appear sooner or later. That was why Alex couldn't comprehend why he never experienced such a problem.

"Wait a minute... Black Hole?" Alex was stupefied as he seemed to find something absurd in his story. Although it was just a technique, he had no knowledge about the Black Hole being a Divine Technique. At least, there was no memory about it in his head despite having so much knowledge in the inheritance.

The strings began to connect with each other, turning this type of mystery to another level. "Don't tell me... Don't tell me... Ahahahaha..."

Alex facepalmed as he started feeling headache, wondering why he couldn't notice this earlier. He realized why there were Dungeon God, Fire God, Time God, and Spirit God who stretched their hands on his current self.

Everything was an arrangement. Yeah, it was an arrangement from the Spirit God. To help him connect everything and turn his body into something that could withstand all this power, the Spirit God requested the Dungeon God's system before he died and somehow sent it to Lin Xingzhi, knowing she would use it to power up his reincarnation.

The Dungeon God had instilled the Black Hole and Subjective Reality in the system automatically to shape his body to contain all the power that would come in the near future. After receiving the system,

his body began to adjust itself until it became perfect when he gained the Space Element from the system.

That was why Lin Xingzhi said his body seemed to have mutated because of the Space Element inside the system in the past. Everything started to connect. All the stories in his life were all for this.

Knowing that the Unique Space Element and Alex's Sword and Spear Skill were not enough to kill the Supreme Beast, the Spirit God asked the Fire God to bestow his Godly Pure Fire since his reincarnation would have the Pure Fire.

The Spirit God then tweaked a bit of the Upper World where Alex would grow up, so he ended up going to Stina's World where he met Phitrus's soul, learning everything from him.

The Time God maintained everything to make sure what he had set up for his reincarnation wouldn't mess everything up while giving two precious rooms that had the Power of Time.

Although there was no guarantee that he would reach everything, there was still Lin Xingzhi, who would do her best to give him everything he needed. As long as he provided a bit of information, Lin Xingzhi would surely inform him and have him go for it.

"Oh, Spirit God, my past self. You were this awesome, and you're expecting me to beat you?" Alex facepalmed and shook his head. Although Sherry, Alicia, Firia, or even Kyle were not part of his plan, it ended up turning nicely. Yes, he achieved all this and how he could fuse his Sword Qi and Spear Qi was his Space Element. This was the answer.

When he found the answer, Alex couldn't help but laugh. Yes, all he did was laugh. His face contained the trace of longing and hope, conveying his hidden desire.

Tears of joy couldn't help but come out after laughing so hard. He dropped to the ground and looked at the tower ceiling, which had become a sky due to the array.

"Seriously, Alex, my past self... There are so many things I want to talk about with you, but one thing that I really want to say right now.... I wish I lived in the same era as you, even though you're my past self. I'm sure we will be a good buddy."

[Chapter 1157 - Pure Absolute Blade Qi](#)

After getting his answer, he started channeling his Space Element to the outside while releasing both his Sword Qi and Spear Qi at the same time.

He took a deep breath and used the Subjective Reality not to fool anyone else but the Sword Qi and Spear Qi.

For the Sword Qi, the Spear Qi before it turned into another Sword Qi, making it feel like it was looking itself in the mirror. The same applied to the Spear Qi, so both of them thought they only needed to fuse together since they were the same.

When the two touched each other, a clash occurred because of the two different attributes. However, Alex managed to completely fool them.

If the Sword Qi were a human, he would have been confused to see himself in the mirror. He would then try to reach the Sword Qi and shake his body, finding that the other half did the same thing.

In the end, the Sword Qi didn't punch or do anything other than trying to fuse to the other guy.

This concept also helped him mellow down the Spear Qi, advancing the Sword Qi's advance as they slowly fused together.

The Space Element and Absolute Blade Intent began to act like that of a cupid, trying to mend the "relationship" of these two. The Absolute Blade Intent specifically used its sharp intent to permeate the entire process with the fusion of the two, making them know what it felt like to fuse.

Meanwhile, the Space Element acted as a needle that stitched those two, preventing them from falling apart. Alex also used the Space Element to help him absorb the fused Qi.

When Zera came out of her house again and found Alex had started creating this new powerful energy, she couldn't help but shake her head. "It seems the universe will be in his palm for the next tens of thousands of years. Well, it's not like he is an evil person... He is only an overprotective one.

"It will depend on the people to take this matter. If they don't like it because their pride is smeared when the Spirit God doesn't even do anything, it's their fault for being stupid. Just like Master said, Spirit God is a sleeping tiger, don't expect to say that it's a misunderstanding when you have been warned to not step on the tiger's tail."

Zera facepalmed and sighed. "Well, another Sword God will be born within one thousand years or so. After fulfilling my promise to Master, I will just travel to many worlds since I haven't been able to. Spirit God... May fortune be with you."

Alex, on the contrary, still maintained his focus on his Qi.

Every time a clash occurred, Alex quickly sent his Divine Energy to suppress it before harmonizing them with his Absolute Blade Intent. The process could be said to be slow, but considering this was something that only the previous Spirit God ever achieved, this process could be seen as fast.

Alex also faced another problem. It was the amount of Divine Energy that started depleting. Sensing the fluctuation of the Spiritual Energy in the area, Zera came out of her house and felt that Alex took too much Divine Energy that he had converted from the Spiritual Energy for the past few years.

Since it would be bad if he found it lacking, Zera sat on the ground and poured all Spirit Crystals she had and began converting the Spiritual Energy contained in them to Divine Energy to help Alex.

This process continued for weeks.

...

Meanwhile, on the Bear's Territory, the Earth God truly didn't know what to do anymore. Next to him was the Battle God, furrowing his eyebrows in this hopeless situation.

Their world had been surrounded by six God Kings, three from Eulja and the other three were the Holy God, Palm God, and Song Goddess.

"What are we going to do, Master?" the Battle God asked while gritting his teeth.

"We are going to escape. We don't have any information from the Dragon God and Phoenix Goddess. I don't even know whether they have died or not. Hence, it's better we go to our safest rendezvous point."

"Where is that?"

"Bats." The Earth God's expression turned serious.

"!!!" The Battle God never expected him to go there. Yet, when they saw the whole situation, he thought it was normal. "Are we going to break through from this place?"

"Yes. We will use all the people here to pave the way for us." Earth God's expression was cold and ruthless. There wasn't a single thought in his mind believing that using all of his people was bad.

"..." The Battle God contemplated for a moment and nodded. "Alright. Let's go then."

Having no other way out, he chose to believe in the Earth God's Choice. Well, he couldn't disobey his master, so there was no point in arguing with him.

And since they were going to the Bats, they would have so many soldiers to spend since the Bats kept reproducing like crazy.

After reaching an agreement, the two nodded at each other as the Earth God began to move all the people in this world to attack Eulja in one direction, trying to escape with their strength. Even if they were injured in this battle, they would only need some rest. It might take a few years, but they couldn't afford to die just yet.

...

They were not the only ones facing such a troublesome situation. The Dragon God and the Phoenix Goddess finally arrived at the Angel territory. Obviously, what they got was a cold gaze from the Angel since they couldn't even hold the fort.

The Angel, who was known to be the God of Virtue, narrowed his eyes and looked at them. His silver hair fluttered due to the little amount of aura he naturally released due to this anger.

"You all are useless." The Angel snorted and said, "You couldn't even handle the Spirit God..."

The Dragon God felt his pride had been stepped upon and shouted. "Do you think you can do something about this? Let me tell you one thing. Do you think you are in charge of everything?"

"I'm not, but I'm also not foolish enough to fail this miserably."

"You should say that after meeting the Spirit God in person. His technique... It's even stronger than the past him. I'm afraid our King will face trouble handling him."

The Angel frowned and walked forward with a cold expression. "You must be coming here because you have failed and all of your people have gotten butchered by the Spirit God."

The Dragon God and Phoenix Goddess remained silent, but it already gave enough explanation to the Angel. The latter simply closed his eyes, pondering how to solve this matter. After a while, he only sighed for a long time. "It seems we can't afford to save everything and let our King stay in that state for too long. The Spirit God will become unstoppable before we know it."

"You... Why do you sound so confident you can break the seal? That seal is the combination between Space and Time along with all the life force of the Spirit God. It's impossible to break." The Phoenix Goddess tried to get information from her own colleague.

"This is why our King didn't give you any information, Phoenix. You, Snake, and Bears were too foolish to even know this. The whole plan will be ruined, so he only leaves this plan for me, Dragon, and Bats. Unfortunately, even the Dragon is useless to face the Spirit God." The Angel shook his head helplessly.

"What did you say?!"

"I literally conveyed our King's intention." The Angel snorted and shrugged his shoulders. "This is why the Dragon God keeps an eye on you while the Bats and I are hiding. The Bear seems to be smarter than the previous one, so I let him deal with the other bear along with all this farce until he calls you."

"Enough, Angel. If you're only planning to mock her, I will rip that mouth of yours. I'm not sympathizing with her or something... I just want to know the real plan to see what we can do even in this situation." The Dragon God stopped him with a serious expression.

"My King's words will come true. Alexander Sirius will seriously win this war if he is not present in the future. And look at us now... Hence, my King left me for one last job. I will fulfill this job with my pet. You two are to call the Bats to migrate here because we can't afford to be surrounded since the Spirit God must have followed you from behind, knowing about our location.

"We need the Bats to handle the overall situation, so yeah, I'm sure that the Bats will move to a planet around us. How about the Earth God and Battle God? Are they still alive?"

The Phoenix Goddess and the Dragon God exchanged looks with a dumbfounded expression. The Dragon God could only shake his head and explain. "We're not sure. Because of the encirclement, I'm afraid that they are in the worst-case scenario. If I were them, I would go to the Bats to get a bigger reinforcement. That way, the Spirit God won't dare to touch them just yet while maintaining the status quo with us."

The Angel thought for a moment and nodded. "Alright. You go to the Bats and tell them to come here to prepare for the last war. I need a few more years to release our King's seal. If we can hold this long, the victory will be ours."

The Dragon God agreed without hesitation. Since they had this kind of loss, they truly had no more dignity in front of the Angel. Rather than waiting for their deaths, they should get going already.

"I understand. We will depart right now." The Dragon God turned around and brought the Phoenix Goddess to leave the planet with the help of the Angel's Teleportation Formation that sent them so far away.

Meanwhile, Alex, in the Sword God Pavilion, gradually opened his eyes after finishing his training. It had been nine months since he got his answer.

The Sword Qi and the Spear Qi had fused completely, turning it into a stronger form.

"I will name this like my Absolute Blade Divine Intent... From now on, this powerful qi is called Pure Absolute Blade Qi." A smile appeared on his face as he managed to complete the reason he came here.

The Blade Qi was sharp like that of a sword but precise like his spear's intent. Coating his right hand with this new Qi, Alex raised it to see the appearance with his Spirit Eyes.

There wasn't any different color among them, meaning that the Spear Qi fused perfectly with the Sword Qi.

Suddenly, a female voice resounded behind him, saying, "Don't release that energy in this tower please... It won't hold. That Qi of yours is stronger than my imagination. Pure Absolute Blade Qi is it... Not a good name, but not a bad name either."

Alex nodded with a smile. "I know. I'm truly grateful to be allowed here. You even gave me the biggest clue to my current problem."

"Ahaha, I didn't do anything. Even without me saying what my Lord said in the past, you would have done it too, albeit in a different way."

"Well, I'm going to prepare you the best disciple to be the next Sword God after this war is over. I will make sure to spend one year fully going around this world and checking their talent as well as personality." Alex promised her again.

"Spirit God's promise is worth a planet."

"Haha." Alex laughed and looked at the ceiling. "I think it's time for me to go back to Eulja."

"I understand. Have a safe trip."

Alex waved his hand and tossed a Space Ring to Zera before using his Spatial Gate to escape from this place. "There are ten Billion Spirit Crystals there. Thank you for using your own Spirit Crystals and time to supply more Divine Energy for me. Take care of yourself, okay? I will be back soon."

[Chapter 1158 - Law](#)

"It seems you have succeeded in fusing the two..." said Lin Xingzhi while crossing her arms. She looked happy to know that Alex was one step away from the God King Stage.

"Yeah. All I need right now is to form my Law. I am planning to stay here for three years to understand my Law before beginning to stir it up to reach God King Stage in your father's sealed space." Alex nodded with a serious expression.

"That's good." Lin Xingzhi smiled and hugged him. "Welcome back."

"Yeah. I'm back. Let me greet the others first before continuing my practice."

She nodded and released him before helping him call the others. The day passed just like that, meeting each other to rest a bit of his tiredness.

The next day, Alex proceeded to form his own law with caution. He wanted to grasp the Law by using the knowledge he'd got from the previous enlightenment. It was a precious incident that became one of the rarest ones, especially since the enlightenment itself was regarding the number one power in the Universe, the Law.

'What is Law? Does it have a form? What is the relation between Law and its User? Will they become a tool like that of a sword? Will they become a partner and fight together with their master? Will they turn into a form that only the user can see?' Alex kept thinking about these questions along with many others regarding Law in his practice.

Even Lin Xingzhi didn't dare to advise him that much since her knowledge wasn't on par with Alaya. At the same time, she knew that the Law could only be grasped by the person itself. Hence, she would rather keep her silent instead of dictating or teaching the Law to Alex.

There was a thought of calling Alaya to get advice, but she decided to put that thought away for now.

After one year of perceiving the Law, Alex suddenly came out of his room, meeting Lin Xingzhi, who seemed to be worried about his well-being.

"Alex!"

"Ah, hi." Alex's face looked pale. "This is the first time I'm using my brain for a whole year without resting. To think Law is this hard... Well, if a muscle brain like the Palm God can do it, I should be able to do it too..."

"How is your progress?" Lin Xingzhi asked carefully as if telling him not to say too much. "I just want to know your condition. If two people have the same knowledge about Law, their understanding will clash. The winner will become a God King while the loser will be reduced to Rank 2 God..."

Alex nodded in understanding before making a tired smile. "I know. Don't worry. For now, I think I make a little progress? But in this case, I'm afraid we will be too late. I can only reach God King Stage in one hundred years. That's something I can't afford. Do you know any advice?"

"I am not too sure. My knowledge isn't that deep regarding Law even though I'm one of the strongest God Kings... You can see the condition of the current God Kings, right?" Lin Xingzhi looked down as she was disappointed in herself.

"No need to beat yourself for something like this." Alex smiled before remembering a certain person. "That's right. Alaya is in Eulja, right? Can you call her for me along with the other God Kings? I just want to see what kind of view you have for your Law. It's not about your Law itself of course. I think that's fine to be told to others, right?"

Lin Xingzhi pondered for a moment before agreeing to his request. "I understand. The topic itself is not forbidden, but we will see whether Alaya gives us a warning or not. You should walk around first to refresh your mind. I will call you when I have gathered them."

"Alright. Thanks."

Lin Xingzhi then went outside, visiting all the God Kings in Eulja.

A few minutes later.

While Alex went around, Anna, Jeanne, and some others had arrived in the garden, wondering about Alex's improvement. Since some of them were God Kings, they wanted to see what kind of Law he had.

After all, they had grown more accustomed to the Law to the point they could somehow feel the Law around them. For example, Korzan seemed to understand the Law of Magma. Although it wasn't strong enough to allow him to break through to the God King Stage, it was the most amazing one among the Spirits... As one would expect from the strongest Rank 2 God in Eulja.

"Queen Anna, what do you think Master's Law is? Now that I have gotten good enough, I'm curious to see the different types of Law," said Jeanne while furrowing her eyebrows, feeling pretty eager to meet Alex.

"I am not sure." Anna shook her head and looked at Jeanne. "I can feel that your Law is a kind of the one attracting the Element Energy around you, right?"

"Yes. Because my understanding has increased, I have formed a small Law inside my body. Its only purpose is to attract the nearby Lightning Element to my body to increase my strength continuously." Jeanne admitted.

"Well, we are more or less the same type. I'm the one that attracts elements as well, specifically my Dark Element and its energy." Anna contemplated for a moment. "That's right. I'm wondering what type of Law you have, God of Wrath? It's not a problem to share this, right?"

Seeing Alaya nod her head, Marcus decided to explain it to them. "I'm the Wrath itself or you can say it's the personification of anger. It does affect the surroundings, turning their emotion or cause a chaotic reaction because of this anger, but the effect will be amplified if it's to my own body. Well, I am currently working on how to balance both of them. If I can do that, I am sure I can handle a single God King from their side alone."

Alaya nodded in agreement, feeling proud that she managed to train this God King. She then glanced at Leoz and asked, "So, when are you going to do it, Leoz?"

"Ahaha, I'm trying." Leoz scratched the back of his head. "I promise to become a God King soon."

"Yeah, yeah. I'm going to believe you." Alaya shrugged before explaining. "Actually, there are two different things you need to consider to become a God King. The first thing will be your Law. What kind of Law do you wish to achieve? This is a simple solution to some God Kings.

"For example, you two... Since your element is fixed and you have been relying on it for a long time, your opinion will be leaning to that particular element to your Law. However, there are different types like me and this Marcus here.

"Marcus himself is related to his character. Because he is angry all the time... Even though he doesn't show it, the thought itself influences him for a long time and eventually turns him into one itself.

"Meanwhile, my Life and Death Law is a combination of my experience, existence, and understanding. My Element is Light and Dark, but I didn't become a Light and Dark Goddess... Why? The elements are suppressed by those three.

"Understanding the meaning of Life and Death turns into a belief of mine. My existence has also slowly turned into one that is between Life and Death, so you can say I'm half alive at this point. That's why I can fake my own death for thousands of years. Last but not least, my experience... Have you experienced dying and reincarnating a few times? I have. My understanding about Life and Death turns everything into my power and gradually wields that power myself." Alaya explained with a sad smile.

The others could feel the hardship she had gone through in her younger days.

Changing the topic, she continued her explanation. "The second thing is about the type of law. There are limitless types of Law... What do you think Law is?"

The others narrowed their eyes and looked down. This was a question they never asked themselves, so they ended up shaking their heads in disappointment.

"Law is a wish. What is your wish when you wield that Law? Your wish will affect your surroundings, whether it's the people around you, the environment, or even the Universe itself. Look at yourself, you have been manipulating the energy around you... I don't know if the Spirit has a similar vision, but you all are focused on Manipulation... Element Manipulation.

"Your Law is to govern the Element around you. Well, you are still greenhorns, so I'm going to take another man as an example... Hmm, who should I choose..." Alaya thought for a moment and remembered a certain person. "That's right. Let's say it's Phitrus. His Godly Pure Fire has allowed him to make Fire Element Users kneel, but his Law has the ability to govern the flame.

"In other words, he can force the people who have Fire Elements in their bodies to explode... Many had suffered from that and no one dared to fight him anymore. His wish to influence the flame has controlled all the Fire Energy to do something like this. This is the closest type to you three.

"We can see Lin Xingzhi. It's a different type of Manipulation. Instead of people, she aims at the Universe itself, allowing her to control the Element Energy as a part of Nature. Of course, each type has its own advantages and disadvantages, so I'm not saying Lin Xingzhi is inferior to Phitrus, but her level of control is lacking currently.

"As for me... My wish is to govern the Samsara. I don't know if you have heard about it, but those who have been put in my Life and Death Coffin will be in a trial where their future will be judged. They can be reincarnated, punished in "Hell", or simply erased from this Universe. This is my type. That Life and Death Coffin is my own personification that has a tangible form, unlike Marcus. That's how it is, I hope you understand a bit more about Law."

"Thank you for your lesson." This should be showing gratitude for such an important lesson, but the one who said it wasn't among them.

Even Alaya widened her eyes as she turned around, finding the real figure who said it, accompanied by Lin Xingzhi.

"Well, I'm planning to exchange some information about Law, but this is truly great." Alex made a big smile as he couldn't help but hug Alaya, raising her to the sky since her figure was even smaller than Jeanne.

"What are you doing, Spirit God? Release me right now. Five thousand years ago, everyone who treated me like a child would be dead the next day!" Alaya struggled to break free, but Alex held her tightly, expressing his gratitude. "Alright, alright. I know you're happy, but can you release me? Pretty please."

"Hahaha... After listening to you, I was like... so that's how it is... Law is like air. It's there but can't be seen. It keeps us alive but can only be sensed. It affects our daily life in a way we don't even know about. In other words, I have been thinking it wrong this whole time. The essence of my Law is how everything it's related to others.

"Unlike Xingzhi's Nature Law, where it can take a form in the real world such as the Spiritual Energy or even the elements. Unlike God of Wrath's personification of a character... My Law is not that." Alex put her down, smirked and turned around. "I'm leaving right now."

"What?!" Lin Xingzhi and the others were baffled by his sudden burst and decision, but they knew everything would be alright. Lin Xingzhi believed that Alex had received another enlightenment. The only thing they needed to do was to believe in him.

Alaya only shook her head and said while trying to calm down. "It seems he has found the perfect Law for him. I mean, the Law itself has been found long ago. This time, it's the type."

"Yeah."

"I wonder what his Law is..."

[Chapter 1159 - Bad Situation](#)

In a white-colored space without anything in it, Alex sat down on the floor with his eyes closed. This was the special space his father-in-law had prepared for him and he planned to use the best of it to reach God King.

After listening to Alaya, he gained another form of understanding about his own Law. Unlike those he had seen so far, his ability itself was too powerful to the point they could be considered a trademark of himself.

If he received the Space Law, he would be able to gain in-depth knowledge about Space Element and control them like the previous Space God known as Dungeon God. If he were to master his Fire Element, he would become another Phitrus.

The same applied to his Sword and Spear. But unlike the Spirit God, he didn't have all six elements or could be considered seven elements. Instead, he only had two powerful elements like this.

In other words, if he were to take one identity, he needed to let it go to the others. That wasn't what he wanted because his past self had predicted that he would lose without all this power. Even he had witnessed what kind of monstrous strength did the beast possess in his inherited memory.

However, getting a connection between all his power was easier said than done. Even though he had already chosen his Law, he couldn't comprehend more of it because he found one major problem. There was no connection between his Law to his power as well as the world.

This Law might be the one that made the biggest impact in his life. And he believed he possessed it this entire time. It was just... He truly needed to do it to the extreme. At the same time, he had been taking care of his karma this whole time, not to make it turn that bad.

Unfortunately, the journey didn't sail smoothly. After knowing his Law, he doubted himself whether this could become his trademark.

This Law was related to his biggest secret, the System. Then he realized this was the best Law he could get because he realized there was no way that someone actually stopped his reincarnation for a while.

He figured out that he had been reincarnating this whole time, but only him five thousand years later would finally carry on the hope that the Spirit God left it to this Universe.

He received the Law and tried to figure it out, only to find him stuck in the hole without any help on how to figure things out.

It turned out he had been thinking fundamentally wrong this whole time. He had been focusing on how to have an impact on his life and questioned it.

Instead of doing something useless, he better changed the topic to the type of Law.

His wish? Alex thought of it for a long time. Although he was a selfish person, he still thought about unrelated people in his life and how his actions would influence them.

Other than people, he needed to consider the impact on the environment, the world, and the Universe. But more importantly, he needed to relate all those to his abilities.

The solution suddenly struck his heart when Alaya explained this matter. He had a wish to protect his loved one by using his power. He had another wish that he didn't need to kill indiscriminately. He also wished that his power didn't influence the Universe too much because this one was unprecedented.

Still, his biggest wish was to have a quiet life in Eulja without needing to take arms again.

To do that, he combined all his power into one and also dispersed their purposes at the same time. He bound his Space Element to his Law in order to protect this Universe from getting influenced by this overwhelming power.

His Law and Space Element would become the bridge to connect both his power and this Universe. Just like Lin Xingzhi's ability to manipulate the energy to create Elemental Disturbances, he could use his Space Element to do the same thing regarding his Law. With this power, he managed to fulfill one of his wishes.

Whether it was intentional or unintentional, this power influenced his ability to create an Array as well. It would be another power up for him.

Then, the Law approached his Sun God Fire. This had become the personality of his that came to light like God of Wrath. This power would influence him and his surroundings to create an almighty power that would be able to protect his loved one or even unrelated people.

His Sun God Fire and Law turned into another bridge between him and people. The God of Wrath could channel that anger of his to influence people's emotions. This could be called Blessing for normal people.

The same applied to his Sun God Fire. That power would connect him and allow him to channel his own Law to other people. This was the relationship he thought about. This way, he didn't use his hand just to spill more blood but also increased the people around him related or unrelated.

At the same time, this power could influence his Alchemy as well in a good way. The Sun God Fire might become the best fire in the universe, especially for the Alchemist.

Last but not least, his Sword and Spear became his weapons to fulfill his first wish to protect his loved one and slew his enemies.

When he processed this in his training, it became something even more amazing than his imagination.

In the middle of the training, he couldn't help but smile, waking up for a few seconds. "The Foundation has been established. I'm going to start the next process in consolidating the Law and increasing my power and understanding.

"My cultivation seems to be increasing exponentially as well... Maybe this is the reason why no one can reach God King Stage... In order to increase their cultivation, they need to comprehend Law as the Universe will give you benefit in the form of cultivation.

"Anyway, I need to finish this as soon as possible because I'm sure the enemies won't stay silent for too long."

Alex continued studying this Law as his cultivation began increasing as if the Universe acknowledged this Law of his.

Unfortunately, they were in a time of war. There was no way they could predict what could happen in the near future.

In Eulja, Korzan visited Lin Xingzhi with a grim expression while holding a paper.

"Korzan? Something big happens?"

"Yes. As you know, we have stationed our army between two worlds, preparing to strike them at any moment possible. However, our troops noticed a sudden huge movement."

"And that is?" Lin Xingzhi stood up, preparing to leave.

"The Bats and the Bear are moving toward Angel's territories. We're assuming that they are going to regroup together. We have been stationing Anna and Jeanne there to watch out for their movements. There are also many other God Kings, including the newest ally, Magic Goddess, and they all said the same thing. They seem to be preparing for a huge war. What are we going to do now?"

"I'm going to head to the battlefield as well. How about Leoz?"

"He is still a Rank 2 God."

"Anyway, tell him to head to the battlefield as soon as he reaches God King Stage together with Alaya and Marcus. Anya and Aria will keep making our battle plans according to the situation. Other than that, I want Rose to replace my position here to keep track of Alex's situation. Tell all our allies to move to the battlefield as well with all their force because once we are caught off guard, we will lose this battle."

"Understood."

Lin Xingzhi then stood up. "Call Zark... We are going there right now. All Elemental Gods and Five Guardians to head to the battlefield right now."

"Yes." Korzan suddenly looked down, wondering what he should tell her about this.

"Is there something wrong?" Lin Xingzhi asked.

Korzan clenched his teeth and sighed. "I'm afraid. We won't be able to win against them."

"Why?" Lin Xingzhi obviously didn't understand this statement since everything looked amazing. But at the same time, she realized they didn't have Alex in this war. "Don't tell me..."

"According to our scouts, there are ten God Kings coming out of the planet. In other words, there are two Bears and eight Bats."

"What?!" Lin Xingzhi gasped and widened her eyes. "They have ten God Kings from there?"

"There is a possibility of the Dragon having a pet too, so we should expect the worst."

"How about their armies?"

"Luckily, their numbers are a third of our numbers. As long as we can pressure them with our number, we will be able to buy some time since they won't be able to destroy us that easily. However, in the end, our only choice may be retreating..."

"No. We can't afford to do that because it means they are going to have an aggressive invasion, creating chaos everywhere. Even Eulja might disappear the next day." Lin Xingzhi shook her head. "I will be there to handle the situation until Alex returns."

Korzan grasped his hand. "May fortune be with you... I shall go there after finishing all the tasks needed to be done here."

...

Finally, a few months later, Alex gradually opened his eyes with a grim expression. His strength had finally reached the God King Stage.

"I have become a God King." Alex smiled and raised his hand, feeling amazing. He never thought that he would feel connected to the Universe through the Law like this. "No wonder only a small portion of people can reach this stage..."

[Ah, Master. I'm glad that you have woken up right now. This is Rose.]

"Rose?" Alex narrowed his eyes. "Where is Xingzhi?"

[She is on the battlefield. Just an hour ago, the war finally started. Our side is overwhelmed. Despite having so many people, we only have ten God Kings. Meanwhile, our enemies have fifteen God Kings.]

"Ten?" Alex furrowed his eyebrows. "Someone is missing?"

[Miss Alaya can't use the technique again, so she can't participate in this fight. In other words, God of Wrath, Sister Xingzhi, God of Destruction, and Magic Goddess need to take care of two God Kings by themselves with the help of numerous soldiers. Because the combined armies are far too big compared to the enemy, we have thirty Rank 2 Gods holding back the Rank 1 God. Right now, they are fine, but they are pretty injured at this point. At this rate, someone will die in another hour. We need Master there.]

"Alright. I'm going to go there right now. This place is not that far from the battlefield... With my current power, I can reach that place within fifteen minutes. Tell everyone not to give up and maintain their status." Alex nodded.

[I'm glad. What do you think about this war, Master?]

"We will win." Alex smiled and said, "Anyway, I have one thing to do before going there."

Without waiting for an answer, he quickly opened his system.

[Gacha Point: 236743]

[Gacha Coin: 996]

[Spirit Crystal Harvested: 2,431,978,124]

"That's great. I can still open Gacha Coin three times... Lucky."

[This is not the time for that!]

[Chapter 1160 - Lucky](#)

[This is not the time for that!]

"No, no. It's because we are in this situation that I need to open those three. Do you know how to do it? If not, quickly ask Lin Xingzhi about it and tell her I'm on my way," said Alex while creating a Teleportation Array to go out of this space.

Since this was her master's request, Rose ended up asking Lin Xingzhi. After several minutes, Alex finally got an answer.

[Do you wish to exchange all the Gacha Points to Gacha Coin?]

"Yes," answered Alex without hesitation.

[Gacha Point: 43]

[Gacha Coin: 3363]

[Spirit Crystal Harvested: 2,431,978,124]

"Use all three coins to open the Gacha."

[Confirming.]

"Yes."

[Processing.]

[Fire Elemental Orb Acquired.]

[Space Elemental Orb Acquired.]

[Space Elemental Orb Acquired.]

[Wait, what?! How can Master acquire all these three?]

"Haha, I'm pretty lucky, no?" Alex laughed while taking out his sword and spear. He used the Space Elemental Orb to strengthen his sword while the other two on his spear. This way, both of them had become perfect for him to wield.

Still, Rose couldn't comprehend this type of luck. No matter his luck of the day, there was a time that someone lucky was too lucky unless...

[Master... Don't tell me... You have been studying your Law to reach God King Stage and your Law is...]

Alex laughed again and asked with a smile. "It suits me perfectly, right?"

...

Meanwhile, on the battlefield, the moment Lin Xingzhi received the message that Alex was coming while knowing he had successfully reached God King Stage, she felt blissful and gained hope again. Despite facing Dragon God and his pet at the same time that came out of nowhere, she managed to hold on.

Her body was filled with injuries, but it was still manageable because it hadn't decreased her performance yet.

However, it was different for the other guys and the armies. Their morale had become pretty low because the God Kings kept slaughtering their armies one by one, slowly decreasing the gap between their force.

When all hopes were about to lose, Lin Xingzhi shouted. "I know this is too much to ask, but I need everyone to still hold the hope! The Spirit God has officially become a God King and is on the way. Unfortunately, he still needs one hour to arrive. As long as we can hold on until then, we will be able to overturn this war."

All the God Kings and soldiers who heard it widened their eyes. Even the enemies couldn't help but panic because they knew how atrocious the Spirit God was to the opponent of the same levels.

The Dragon God noticed it as well as he shouted. "One hour?! I can wipe all of you out within one hour. I wonder what kind of face he will make when he finds all your corpses? Hahahaha!"

The shout truly fought against their morale, but Lin Xingzhi had no choice other than to lie. The moment they knew about Alex's real time arrival, they would release all their strength and do all kinds of reckless things to kill them. That wasn't something she wanted to see.

Hence, she deliberately increased the length four times, saying it in an hour even though Alex would arrive fifteen minutes later. All this to buy a bit more time since the other parties would surely like to see some despair.

"No! I will make all of you fall into despair first before killing you. Hahahahaha!" The Dragon continuously laughed to lower their morale.

However, all people from Eulja took Lin Xingzhi's words seriously, fully knowing Alex's personality.

"Kill them!"

"No need to care about what happens to us!"

"Our King will arrive no matter the result. It's our time to show our might!"

"All Eulja's Soldiers, Attack!"

What they didn't know was the mentality of Alex's soldiers. They had been shaped so much during the past few thousand years, especially when the past Spirit God was still alive.

All of them knew Alex couldn't bear to see his people dying. Even when they were surrounded by so many Divine Worlds, Alex would become even more ferocious. No matter how tattered his body was, he kept challenging the enemies, holding on to the little willpower he had left to drive off the enemies.

That was why the people from Eulja knew Alex would become a demon the moment he entered this battlefield.

For such a person, they didn't mind sacrificing their lives, knowing their families in Eulja would be protected by him.

"Lay down your life. We are going to fight alongside our King!"

"That's right. Our King has returned. It's a shame if we show our back to our enemies."

"Kill them! It's time for Eulja's fang to be shown again to this Universe!"

"With our Spirit God reaching God King Stage, everyone shall bow before us!"

"Kill!"

Eulja's morale turned into madness instead. And it was all only due to his name.

Seeing this sudden eruption, even the other God King's armies started getting their morale back since Eulja that had multiple God Kings didn't give up yet.

"Let's go!"

"Follow Eulja."

"Fight back!"

"We also want to kill these bastards!"

All armies began to push back as they became fearless.

Lin Xingzhi smirked and said, "It's useless, Dragon God. You don't know anything about our morale. You can't be compared to him."

"Hmph! Morale? I don't care. After thirty minutes, you will realize you are in a perilous situation. At that time, you all will start falling into despair."

"Think what you want... My Eulja is better than your imagination." She smirked and summoned two more Elemental Disturbances. She had gotten enough morale to last them fifteen minutes. Even if the Dragon God and the other God Kings tried to push them back while releasing all of their strength, they wouldn't be able to extinguish them because all of the soldiers were prepared to die.

On another side of the battlefield, the God of Destruction faced off against the Phoenix Goddess as well as Battle God.

The Phoenix Goddess wanted to fight him because of their previous fight.

"It's time to settle this, Phoenix Goddess." He smirked and released all his power.

"Do you think you can?" She snorted and said, "It's impossible to wait for your Spirit God. He is too late. At the same time, even if you try to escape from here, all of your force will suffer. Now you will understand how I and the others felt when you chased us."

"Hahaha! Say whatever you want. I can still hold you two back for another three hours." He then jumped forward with the Power of Destruction covering his fist. He sent a punch while saying, "No need to talk anymore. I am not the kind of person who likes to buy time this way."

"Hmph! Arrogant bastard." The Phoenix Goddess flapped her wings and flew toward him. The clash between fire and destruction started again with an additional power of Fighting Intent from the Battle God.

Boom.

...

Ten minutes later, after a loud explosion, the God of Destruction made a distance again while taking a few deep breaths, assessing their situation.

Although the armies had been holding well, their number had gotten reduced a bit more than he expected and it would turn worse sooner or later. He needed to think of another way to overturn the situation, albeit the one and only solution appeared right on top of the Phoenix Goddess.

Yes, Alex's figure appeared right behind the Phoenix Goddess, sending chills down her spine.

She gulped down and turned around, trying to do something even though she knew her death was coming.

Alex, on the other hand, raised his sword, trying to cut her while saying, "Oh, I'm lucky to be teleported right at this position."

"Spirit God!" Phoenix Goddess screamed because of the surprise as well as the hatred. She also tried to use her power to block Alex's attack, but Alex quickly activated his Sun God Fire to suppress her flame. "Sh*t! Curse you."

Trying to turn back to human form to avoid him, Alex kicked the Phoenix Goddess on the stomach, blowing her away to the nearby Lower World.

He then followed her before she could escape with eight different powers covering his Sword.

"!!!" The Phoenix Goddess widened her eyes but couldn't block this because her strength was suppressed.

Escaping was also not an option because Alex already arrived with his Space Element, slashing his sword down.

"Eight Purities Slash!"

The fire flared up, creating a massive explosion that alarmed the entire battlefield. At the same time, the Space Element began to bend the planet, bending it to the inside. His Absolute Blade Intent, Divine Energy, Soul, and Blade Qi went through the planet. The Nature Energy from the Spirit Crown enhanced the overall slash, while the Life and Death Energy sent a death threat to the Phoenix Goddess.

Instead of the Fire Disturbance, he channeled his Law in this slash, resulting in him using Eight Purities Slash.

However, all this was enough because he just split the Phoenix Goddess into two, but that wasn't all. His slash created a series of reactions and sent enough energy to create a loud explosion.

People were wondering what kind of explosion it was, but they soon dropped their jaws as soon as the planet behind the Phoenix Goddess was split into two.

The God of Destruction twitched his eyebrows since he was her opponent but also shook his head helplessly. "This is his strength after reaching God King? How do I even compete with this monster? I should forget about having a spar with him."

Lin Xingzhi couldn't help but smile while muttering. "The reaper has come to take all your lives."

"Seriously? This kind of strength... Haiz... That Palm God has truly struck gold. I wonder if I should reeducate my daughter to seduce him as well..." The Holy God let out a long sigh. "Marrying a devil. Haiz, I need to stand on my belief."

The Song Goddess made a big grin as she couldn't help but shed tears. "This is it... The strongest God King, His Majesty, Spirit God."

Magic Goddess, who was new to this, scratched the back of her head while muttering, "I am so lucky to get on his good side to the point it's a business deal... I should focus on this more."

Last but not least, Alaya, who couldn't participate in this war yet and tried to stop the last God King with Korzan and the other Rank 2 Gods, chuckled. "What an entrance..."

Not just them, it turned out there was another person that wanted to celebrate his entrance. It was none other than his own disciple, Rose.

After realizing how otherworldly Alex's luck was, she instantly understood Alex's Law along with his proper title. Although it would be hidden under his formal title, Spirit God, she still knew that her master was the best.

Like how he broke the system with his ridiculous Law earlier to get all the things he needed, Alex used that luck to arrive right in front of the easiest opponent for him even though he only teleported randomly.

[Hahaha. All those guys are going to be dead soon. We have the ultimate God of Fortune here!]
