

Gacha 336

336 Revenge Time

Leoz was fighting with two 8-Star Martial Lords. Even though they were two stars apart, Leoz was able to fight them on equal ground. And with the addition of Anya's support, he even got a slight advantage over them.

They were fighting for quite a while, and they had no idea that Ruben had been defeated by Anna.

Leoz looked at Agus and the sixteenth elder casually. "You have chosen the dumbest choice in your life. And because of it, there will be no Makmur Family tomorrow."

"You!" Agus immediately got angry the moment he heard that. After all, he was the current family head of the Makmur Family.

"We have the advantage in number and strength. As long as we hold long enough, people will realize and fight back. Especially after my father kills that black-haired sl*t, you all will die!" Agus snorted.

"That is not possible." Leoz shook his head.

"What? She is only a 6-Star Martial Lord while my father is a 9-Star Martial Lord. My father will be able to kill her, why is it not possible!"

"Because I have crippled him." A woman's voice suddenly reverberated in his left ear. When he tried to turn his head, his head was already flying.

"!!!"

"How-!"

Leoz only said that because he saw Anna coming to him.

After she crippled Ruben, Anna immediately came toward him. And Leoz only said something like that to distract them. Although he got a slight advantage, he would need to take more time to kill them. So, he just decided to do it in a faster way.

Anna did not care about Agus, so she immediately killed him. She then looked at Leoz, "You take care of the other one. Remember, Alex wants her alive."

After she said that, she immediately left to help the others.

...

A moment later,

They finished killing everyone except Ruben and the sixteenth elder. With Anna going around to kill those people, the battle finished in a jiffy.

After they finished, Alex then moved toward the sixteenth elder. Well, according to Song Yu, she had some problems with Charya, and she herself even confirmed that they were arch-enemy.

She also had been crippled by Leoz. And Alex only wanted what kind of person that made troubles for Charya.

"You... How can you do this to an Elder! Do you think the sect master will let you off? Even if Charya tries to protect you, you will be punished to death by doing this to me. I can act like this never happens as long as you stop this."

"..." Alex was speechless. He thought this woman was smart to know what would happen to her. The sect master would never kill him because he had seen Maxwell. If he were present in this place, he would even kill her himself. Sadly, she did not know about Maxwell. In fact, only a few people knew about him since he sealed the memory about him.

Still, Alex could not believe that this kind of person managed to make trouble for Charya. He even thought Charya was too soft in dealing with this. Well, he would personally finish this for her. Of course, she would need to be 'punished' first.

"I won't kill you," Alex said.

She grinned when she heard that. She thought he must be afraid of the punishment.

Alex continued, "I won't kill you before Jeanne' play' with you."

"What? Master, you call me? Ara, so this woman will be playing with me. Master is the best, he knows me so well." Jeanne was delighted to hear that as she immediately appeared when Alex said the word 'Play.'

"Take her away," Alex said to Jeanne.

"Understood, Master." Jeanne nodded her head. Jeanne then grabbed her hair and dragged her somewhere.

"You brat, release me right now. I will make you regret it." She even threatened Jeanne. Sadly, Jeanne did not care about her as she would have a nightmare before she died.

Alex then moved toward Ruben.

"My lord, there must be some misunderstandings. Please spare my life, and our Makmur Family will follow you." Ruben was smarter than the sixteenth elder as he immediately begged for his life as soon as Alex came.

Sadly, Alex never cared about his pleas, "Misunderstanding, huh. Well, at first, I said there is a misunderstanding between us, but you ignored me. Saying those bullsh*ts. It is only an act though."

"My lord, I am in the wrong. Please spare my life, I will give you everything in my family. You hate Intan, right? I will make her grovel to you and become your slave. You can do whatever you want to her."

Alex twitched his eyebrows. He even sold Intan just to save his life. He was beyond redemption. Alex thought this guy was a smart guy or even might be a sly fox. But he was a disappointment.

"Pathetic."

"My Lord, I—"

Alex did not let him speak anymore as he immediately cut his head.

Not long after, Jeanne also came back with a very big smile. She seemed pretty satisfied with it. Jeanne even warned him not to see her corpse since she got a little bit 'excited' in the process.

Alex was wondering if Jeanne should play with him first. But he didn't know why but he instinctively wanted to cut him down at his pathetic moment.

He was wondering why he did that, but nothing came to his mind. He stopped thinking about that since he could not remember why he did that.

"Alex, should we strike Makmur Family now?" Anna asked.

"Yes. I will use the teleportation array to enter the Makmur Family. We will grab that Intan and kill everyone inside that place. Jeanne can play with her again."

"You are the best." Jeanne was thrilled with his statement.

"Should we go now?" Anna asked.

"Wait a little bit. Because of Anya, I thought up another plan." Alex said.

The others were confused about what he wanted to do. They saw Alex took out Nelson's card, but they did not know what he wanted to do.

"Nelson, how many successors the Zhou Kingdom have?"

When he asked that question, not only Anya but even the others also realized what he wanted to do.

"They have five princes and seven princesses."

"I want you to assassinate all of them, can you do that?" Alex asked.

"I can, for most of them, but I can't kill the second prince and the first princess. Because the second prince is in the Mount Hua sect while the first princess is in Rainbow Flower Sect. The other princes and princesses are in the capital city, so killing them should be easy."

"Alright. Don't mind about the two. You can choose the best time to do it."

"Understood."

"Alex, you are pretty bad, aren't you?" Anna said, trying to tease him.

Alex thought about it himself. He had been killing many people in this world. In the lower world, he remembered every person he killed. The guy from Maka Town, The old king of Zircodina Kingdom, the assassins, and John.

After he roamed around in this world, he realized he had killed so many people. He was wondering if he became a bad person... No, he thought he was not. It was not like he was a good person from the start.

Back then, he had his inferiority complex and slowly overcame it. He did not kill the people that wanted to kill him because his complex said it was normal for them to hate them like that.

However, it led him to his biggest regret, Alicia. When he sealed Alicia, he decided to not leave any possibility for others to have revenge again. Thus, resulting in him being a careful person. And as a careful person, Alex chose to kill to eliminate the future problem.

[Host, they are your enemies. But I also need to remind you, you should not kill innocent people. For example, like what you are doing right now, your enemies are Kasmanan Family, Makmur Family, and their Royal Family. You should not kill its citizens and other unrelated people.]

"I know. I won't do that." Alex nodded.

After adjusting his thoughts, he looked at Anna and the others. "Let's go."

They nodded and disappeared.

...

Alex and the others arrived in the capital city in a few hours. Alex immediately used his teleportation array to enter the capital city from outside before entering the Makmur Family.

"I am sure there will be no obstacle again, so I want us to finish this fast and go back to the sect."

"Understood." They immediately disappeared.

They moved very fast. And with the people from the Makmur Family who were not prepared for this, Alex and the others were able to kill them easily.

"Young Master, I have found her and apprehend her." Fabio suddenly sent him a message.

"Alright, I will go to your position."

When he arrived, he saw Intan kneeling on the floor. Apparently, Fabio had crippled her.

"You..." Intan was shocked to see Alex in front of her. After all, her family was chasing him, so Alex should not be in this place.

"You don't need to worry about those people. They are already dead." Alex said coldly.

Of course, Intan knew what he meant. Her grandfather, her father, and the rest of the family had been killed.

"You... Always her. It is always her! Why?" Intan did not beg her life or anything. She only complained about something Alex could not understand.

"Even when you were chased by the Bell Family, you are the one who saved her. In the Death Forest, if it was not because of you, how can she get all those things." Intan protested. It seemed she had been following Putri's matter this entire time.

Fortunately, she did not know the method he used. If not, Alex might be in trouble.

"You... If you are my Junior Brother, I will even let you have my body or become my husband. Why! This is unfair. If she didn't receive it by the ninth elder, she would not have all of this." Intan suddenly started crying.

"..." Alex looked at the pitiful Intan coldly. Nicole had told her how he wanted to kill him and how she managed to convince the Makmur Family to move. He somehow could not have any sympathy for her because of that.

If he could sympathize with her even the slightest after she talked like this, he might even let her kill herself or something. But when he remembered how poisonous her mouth and heart were, she just could not raise his sympathy. He decided to ignore her.

Not long after, the others also gathered in his position. Alex then looked at Nicole as he took out the half-box from Mithra, "Since the Makmur Family is finished. I want you to search for the other half of this box."

"Understood."

Alex nodded, and he made a teleportation array to teleport them away.

They arrived in the nearby woods. Intan was obviously shocked when she saw what Alex did. "You... you are a Space Element Array Master..."

"Jeanne, your turn."

"Alright." Jeanne smiled as she dragged the shocked Intan away. Of course, Anya also helped her to torment her even further.

After 'Jeanne Session,' Alex burned her corpse.

"Young Master, do you sympathize her?" Fabio, who was watching her from the beginning of her rant, asked.

Alex shook his head. "If we leave her corpse in this place, the Southern Kingdom will immediately know it was us who exterminated the Makmur Family. Although they will know about it sooner or later, this is only for precaution.

"We are finished here. What are you going to do?"

Anya suddenly said, "We will continue to train in the Nemu Forest. But people will know about the change in the undead region sooner or later. At that time, we will leave this place. Don't worry about us, I will take the command."

Alex was surprised to see Anya wanted to lead the spirits in this place. Nonetheless, he nodded his head. "I leave it to you.

"Anna, I will leave Alex to you," Anya said. She decided to stay in this place because she knew she was not strong enough.

Anna nodded her head. Alex then said, "Then, see you guys later."

...

The royal family knew that the Makmur Family had been exterminated, and they didn't even realize it. When they tried to investigate it, they could not find any Martial Lords inside the family.

Although they did not find them, judging from the situation inside the Makmur Family, they could imagine what happened to them.

Because everyone was killed in their mansion, the royal family also did not know about the undead region. They only found it a few months later after the people started the rumor about the appearance of a mountain in the undead region.

When they heard about it, the royal family immediately sent their people to investigate it, but to no avail. They found an altar and Makmur's family remnant. But they did not find anything else, not even undead.

They were bewildered as they did not know something this big happened. The other influences also received this information. Regrettably, they only came back empty-handed.
