

Gacha 364

364 Misunderstanding Again? Really?

After contemplating for a while, Alex came up with one feasible plan. The start would be the same. However, Alex would summon Leoz, and Fabio around them. They would shout something to make the soldiers panic.

Vera should be able to make a giant ice wall in their right while Greg erected a barrier in their left. That way, they could only think about escaping from two directions. Anna, Jeanne, and Anya should be able to fight with them from the front. Alex, Fabio, Leoz, and Nelson then started killing them from the center.

Without their leader, the soldiers should start running for their life. At that time, they could start chipping their number bit by bit until they killed all of them. Since there was no tree or whatsoever, they did not have any place to hide, so Alex did not need to care about the possibility of missing someone.

He might need to summon Wright and Salijan to help Vera and Greg, so they did not go toward any other direction. Of course, Leoz's 10-Star Martial Lord cultivation stage as well Nelson 3-Star Martial King cultivation stage would be a huge factor in this war.

Alex then looked at his spirits, "We are going to attack them in a few hours. Here is my plan..."

After telling them his plan, everyone started going to their position. Leoz and Fabio were in the card, ready to be summoned anytime.

"Nelson. We will start now."

"Understood. I will use my True Spirit Body right now." Nelson said. Not long after that, he continued, "I am ready."

"Summon." Alex immediately summoned him. He saw Nelson's True Spirit Body. There was no change in his appearance like a horn or something. Instead, he was wearing a black mask that was covering his mouth and nose. Alex saw his eyes that filled with coldness with two black balls hovering around him. This made him even more like an assassin.

"Let's infiltrate their headquarters," Alex said.

"Young Master, if you want to infiltrate their headquarters, let me make some traps first. That way, you can appear casually around them. I will handle the rest." Nelson said.

Alex furrowed his eyebrows. He did not understand what he meant but still nodded his head. "Alright."

Nelson then disappeared. Back then, he was curious how Nicole could disappear just like that, so this time, he used Spirit Eyes to observe Nelson. It turned out Nelson did not disappear. Instead, he went to his own shadow before his own shadow disappeared, leaving the energy behind.

Only Alex's Spirit Eyes or someone far stronger than him that could feel his presence. His curiosity did not disappear even after he saw that. After all, he did not remember Nicole had a skill like that. After thinking for a while, he shrugged it off. Each of them must have a special skill for that. If not, they would not become Nelson's subordinates.

He then waited until Nelson finished his business. However, Nelson only came back an hour later.

Alex was startled as it took too long. "Did something happen?"

"No, I just made some preparations for the others." Nelson shook his head.

Alex nodded. He then made a normal Spatial Door to infiltrate their headquarters. After that, he went inside that blue colored realm again together with Nelson.

...

On Southern Kingdom's headquarters,

There were around ten people who were discussing the war since they would fight the Heavenly Sword Sect in two days. If Alex were here, he would recognize three of them. They were Bima, Morgan, and Mega.

"We will let the Mount Hua Sect attack them first since we don't have that many soldiers with us," Bima said.

"Yes. We need to strike at the moment they never expected. Although I am feeling bad since the sect has fostered up her highness, we still need to do this. Our reputation has been smeared because we need to take his wanted poster after getting pressured by them.

"If I know he helped us just so he could beat her highness, I would catch him immediately in the war. I am sorry, Your Majesty. Of course, they never thought that our princess, who they had abandoned, would become a 4-Star Martial Lord in a short time. They can only regret it when they know this." Morgan apologized.

"You jest, Minister Morgan." Mega made an evil smile when she heard that. The royal family had many oppositions when they wanted to attack the Heavenly Sword Sect, so they did not have that many Martial Lords as well as soldiers in their rank.

In fact, they only had five thousand Martial Grandmasters and fifteen thousand Martial Masters. It took all of Royal Family influence to get all of them as well as to make sure there would not be civil strife inside the Southern Kingdom.

After conquering Heavenly Sword Sect and getting Alex's entire wealth, no one would be able to fight their royal family in hundreds if not thousands of years. It was worthy of using it all for a Martial Emperor's inheritance.

And Morgan was the only one they managed to convince with their bullsh*ts. It was because he directly participated in the war.

Of course, Morgan was also clueless about why Mega could raise her strength. After all, he was in close door cultivation to heal himself, so he never heard any sort of information concerning Blood Pill and Berserk Pill.

By the time he recovered, Bima immediately came to him and asked him to join a war with him. After telling the reason for this war, Morgan was enraged. Sadly, none of his subordinates, such as Julius or Daniel, managed to inform him about the Blood Pill and Berserk Pill before he left the kingdom.

If not, he might suspect Mega's advancement. And with this, they just brought Morgan to die together.

"After getting beaten like that, I just realize that I have more potential in me. This is what we call turning misfortune into a blessing." Mega humbly said.

"Hoho, that-!" Just before Morgan finished his words. A gate suddenly appeared inside the tent along with a voice, "What the heck with that? Turning misfortune into a blessing? Using the evil blood pill that was made by human blood to advance and calling it 'Turning misfortune into a blessing,' you must be kidding."

Mega instantly recognized this voice. She turned her head. "You-!"

Bima, Morgan, and the others immediately took out their weapons. They were shocked when they saw the portal. "Space..."

Two people came out from the gate. They were Nelson and Alex.

"You... you are that person!" Morgan was surprised when he saw Alex. Alex was using his mask at the moment.

"I never thought you old fart would also join this. I thought with your personality, you won't participate in this war because of greed or benefit, it seems I was wrong." Alex said while taking off his mask.

"You!" This time it was Mega. She hated Alex to the bone.

"Greed? What do you mean? I am here to have justice for what you have done to her highness Mega." Morgan roared. But even that roar did not manage to alarm anyone outside because Nelson had used his skill.

Alex was astonished to hear that. He was wondering if Morgan did not know about the reason why the Southern Kingdom decided to wage war. However, after seeing Mega, he did not need to think about it anymore as Morgan might be truly clueless about this.

"You don't know about Blood Pill?"

"What blood pill? I don't care about any Blood pills or whatever. I have been recovering this whole time and as soon as I finished recovering, I heard you bastard beat her highness brutally in front of everyone. Since you are here, I will apprehend you right now." Morgan said.

"That is if you can." Nelson suddenly spoke as he tweaked his finger.

"Moon Shadow Spirit First Skill, Shadow Bind."

Many black colored tentacles suddenly appeared from the ground. This was the same move he used when dealing with those people from the Zhou Kingdom. However, he used this move with his True Spirit Body.

"What is this?"

"I can't move away from this position, but I can still move my hand just fine."

"I have the same condition."

"Wait, I feel like my Spiritual Energy got drained a bit."

The people started noticing the effect of Nelson's Shadow Bind. Because he used it with his True Spirit Body, this Shadow Bind also had the effect of sucking their Spiritual Energy. As long as there were no Martial King, no one would be able to break free easily.

"All the people outside hear me!" Bima immediately shouted as he wanted to make their position known to others. This way, the soldiers would be able to hinder Alex and Nelson a bit. They would then free themselves within that time.

Sadly, Nelson had prepared for this. He already set up a kind of Sound Insulation Array just like before with the Zhou Kingdom.

"No one will hear you from this place," Nelson said coldly.

"Nelson, kill all of them except those three," Alex ordered. The three people he was talking about were Bima, Morgan, and Mega.

"Understood." Nelson nodded his head as he released his Spiritual Energy.

"Mar-Martial King!" Of course, Bima, who was the strongest out of them, instantly recognized Nelson's strength. "You... you are a Martial King!"

When the others heard that, they became pale, especially Mega. She never thought Alex would have a Martial King. When she made this plan, she thought Alex was only a normal person with a high talent. He had no background or whatsoever.

However, the sixteenth elder should know that Alex had a strong backing when the True Seven Stars Cut were known by others. After all, the sect master warned them about that. However, because of her hate for Charya, she ignored that warning. Of course, before she died, she never said about it to Intan or Mega since it would hinder her plan.

And that proved to be effective in this situation. The moment they heard Nelson was a Martial King, they panicked.

"I never heard he had a Martial King for a backing! This... Did Heavenly Sword Sect have two Martial Kings?"

"We should know about it if they had!"

"Look! Even though he has a mask, from his facial features alone, he should be a younger generation!"

"Nelson, they are too loud," Alex said coldly.

"He-!"

Nelson swung his sword around, and before they knew it, they already died. There was no sign of resistance from them because of the shock.

Alex was astonished by his performance. He remembered when Anna talked about Nelson's strength. Even his Spirit Eyes could barely see his movement. He noticed that those two black balls covered his sword with torrential black energy, and it increased his attack power.

After killing all of them, Nelson then said, "I have finished the task, Young Master."

"Wha-!" Mega was dumbfounded when a Martial King suddenly called Alex with Young Master.

"Young Master?" Bima dropped his jaw to the ground because of the shock. Nelson might be a young man judging from his facial features alone. And he was already a Martial King. Even with that powerful strength, he called Alex Young Master.

He was too shocked about that. After all, if even a Martial King called him Young Master, Alex must be a scion for such a strong family. And their power was immeasurable. The head of that family or influence might be a peak Martial King or Martial Emperor if not higher.

To think they dared to make a move on such a person. The only thing inside Bima's mind was regret. He realized that for a person like Alex, an inheritance of a Martial Emperor might not bother him that much. He realized that Mega had been lying to him.

If Mega befriended such a person, this would mean that their kingdom would rise. However, she took the path of no return... No, not only her, but he also took this path.

"Yo-Young Lord, There is a misunderstanding."
