

## Gacha 951

### [Chapter 951 - Witch And Little Witch](#)

"..." Alex was lost, wondering whether this female could actually be convinced or not. He had told her a minute ago, so he thought she wouldn't talk about it anymore, but it turned out she wasn't like Aria, who listened to him.

He almost forgot the fact that Aria followed his words because of the agreement while there was nothing between him and Nella.

"I said it already..." Alex let out a long sigh. "I don't have any plan regarding that for the time being."

"That's..." She looked down with a sad expression as if Alex just wronged her. "That's a no, I guess."

"Yes." Alex nodded.

"I see. I will ask my father to distribute the reward other than the Spirit Crystals. I don't know if we can replace everything with herbs, but I believe there will be some Array Plates and weapons to cover the cost of your traps." She sighed.

"Then, much appreciated."

"I will return first." She walked down while feeling down before remembering something. "That's right. There will be a huge auction one year from now. One of our plans is to give you one item from the auction, no matter what it is. You can consider this as a part of the reward."

After explaining, she handed her a token and a letter to him. "This is the golden token for our VVIP customer while the letter acts as an invitation. You can come if you want and vice versa, but I hope you can come." Nella then bowed to him once again before leaving the room.

Alex nodded and stored them in his Inventory while watching her back.

As soon as she came out, she found Aria waiting outside the room.

Before she could open her mouth, Aria showed a recommendation letter and gave it to her. The moment she saw the seal, she realized it came from the Unsurpassed Blade Sect.

Surprised, she looked at Aria with her mouth wide open as if asking her, 'Is this the recommendation letter?'

Aria smiled and nodded.

Confirming the letter's real identity, she gently nodded and whispered. "Thank you."

"You're welcome. The one who issued that letter was the peak master of the Sword Blossom Peak, the peak where Nyx and I live."

The sadness disappeared as this letter brought another kind of hope to her heart. As if she found another plan, she smiled and left the room.

"Oh, my heart." Aria then teased Alex with what just happened.

"Stop it. I feel there is a hidden intention regarding that matter, so I obviously will draw the line." Alex sighed.

"A hidden intention, eh?"

"Do you think her feelings were genuine?" Alex looked at Aria with a serious expression. "If you say yes, I am going to marry you off tomorrow."

"..." Aria fell silent and shrugged. "Fine, fine. I will stop. Anyway, we have gotten what we need, so we will return to the sect after getting the reward, right?"

"Yeah. Recover your energy since we are going straight to the sect to continue your training."

"I understand."

During the night, Nella came again while wearing a slightly sexy outfit while handing Alex a Space Ring. "There are ten million Spirit Crystals, ten Rank 8 Array Plates, four pairs of sword and spear, and ten medicinal herbs. This is the only thing we can spare. That's why we give you the extra auction item. Considering this auction is a huge one, the items will be good, so I am sure there will be something that catches your attention. I will be waiting for you one year from now."

Alex calmly nodded his head and took the Space Ring as if he didn't notice her outfit. "Thank you for the reward. It far surpassed my expectation."

"Of course. Although it's just a potential, I may become a Rank 2 God in the future, so that alone is enough to thank you for all of this. Still, do you want to reconsider me as a bonus? You will get a rich and talented wife, you know."

"Nope." Alex shrugged.

"..." She sighed. "We have finished dealing with the three families too, and according to our information, only those who came with us during the mission know about this, so they don't know it yet. In addition, no one knows your contribution other than Millman, me, Mother, and Father. I believe you won't get any trouble from the three families."

"Thank you, I appreciate it."

She then nodded before leaving the room.

Alex then sat on the bed before a blue notification appeared in front of him.

[Fufu, one more heart has been broken. Rip in peace, love.]

"So, you want to tease me too?"

[Because it's too funny. I can see that she is not genuine, so I will be shameless enough to say something like this. Still, this type of rule always sucks. People will see you as trash when you are at the bottom, and those who flock on you when you are at the top just want your talent and abilities, not you.]

"Yeah."

[I want to inform you that we have gotten a clue for the next Fire World where you can use it to enhance your Fire Authority once more. This one is a bit unique, so prepare for a huge fight. If I am not wrong, it's related to its own sun...Anyway, why don't you just absorb the sun's energy?]

"It's different. I will be lying if I say it's not formed by Fire Energy, but it's still hopeless. I have no way to absorb it because it's formed due to a huge disturbance in the past. The energy is far more turbulent than what I need."

[Either way, you haven't forgotten to visit your Master, right?]

"Of course. I will go there as soon as I leave this world." Alex nodded with a serious expression. "I will visit him after this, but there is something more important that I need to do. I am required to go to Encore once again before visiting him."

[Is it not settled yet? I can't really access your memory about this. I have done everything I can, but I simply have no clue, so I have stopped doing it a few months ago.]

"You can say it's the work of the previous master of this Gacha System. Anyway, don't think much about it. Let's consider it a secret between both of me."

Lin Xingzhi paused for a second before understanding what he meant completely.

[In that case, let's move on to the next topic. Considering it's almost ten months out here since the last time I have given you the report, I should talk about this first. There are a few bad news and good news. Unlike the usual way, I will report the bad news first.]

Alex narrowed his eyes and nodded. "Please."

[The first bad news is...I have noticed a crack in the seal the previous you used. In other words, the beast would come sooner or later. And the problem is the fact that we only have less than one hundred years left.]

"I will work even harder from now. Are the hundred years..."

[It's Eulja's time.]

"We don't have a long time." Alex nodded. "For now, I will increase my prowess first, so when I reach God King Stage, I won't be weaker than my previous self. In case I can reach the next stage after that, I will beat the beast according to the plan."

[I believe in you. The second bad news is about the Palm God. I don't know what he is thinking, but he is trying to do something weird during this period, so I might become a bit busy dealing with this matter for the moment.]

"I know. You need to be careful since I can't really do anything right now."

[Sure. Let's move on to the third one. It's regarding Sherry. Sherry has become the princess of a beast kingdom there due to various reasons. When I wanted to bail her out, she asked me to stop and let her do this. She also asked me to hide it, but I couldn't.]

"May I know the reason?" Alex took a few deep breaths to calm his heart down.

[The Beast God in charge of that world is a God King. He must know that Sherry is with you, so there won't be anything big regarding marriage. Our Eulja also has prepared for a war against that world if something happens.]

"I see. Keep her safe for me and update her status from time to time. Tell her to not forget to cultivate the Fire Authority."

[Yes. She said she wants to control the Beast World to help you in the war, so that's the reason she chose to take this risk. I apologize for not telling you sooner.]

"It's fine. She is my wife, not a doll. All of you too. In fact, I like how all of you can act without me making the decision. As long as it's for the family, I won't say anything unless it's something too big." Alex answered with a very deep meaning.

[I understand. I will tell her that you have approved her action. Alright, enough with this depressing news. Move on to the good ones. First of all, Letizia has officially become a God Rank Expert. According to her, Evelyn and Rose will follow suit before you return from that world.]

"Has she joined Eulja?"

[Yes. She is currently with the Ice Phoenix Tribe.]

"I see. I will visit her when I return. And say congratulations to her for me."

[Sure thing. Then, the second good news is about Alicia and Firia. Both have made remarkable progress. According to my information, Alicia has finished her task and met Firia. They then finish Firia's mission together. What is surprising is their combat skill. Despite having opposite elements, the two elements are in harmony. Well, you can see them when we reunite in Eulja.]

"I am looking forward to it."

[Third news. I don't know if it's good news or not, but Anna's and Anya's grandparents want to meet you. They have prepared everything necessary.]

"I understand. I will make time as soon as I have finished everything." Alex nodded.

[That's all. You have worked hard in this world, so you should have a rest.]

"Alright." Alex nodded and the blue screen disappeared. He took a deep breath and thought about what he needed to do after this.

...

The next day, in front of the Luzear Family's mansion stood four people.

"Then, thank you for the hospitality." Alex and Aria clasped their hands to Alcea and Nella, who saw them off.

"Yes, take care and thank you for the help," Alcea replied with a smile while Nella only waved her hand and remained silent.

Alex and Aria nodded before leaving the mansion, heading straight to their sect.

Meanwhile, Alcea glanced at Nella. "So, how do you feel when the man rejects you first?"

"It's sour obviously. I have never placed any importance on all my suitors' feelings, but now I have felt it myself. Although it's mainly about his uniqueness according to the ancestor, it's not like everything is all about it."

"How about you cry on my shoulder? Here. You used to cry in my hug." She smirked.

"It's enough, mother. It will only be a few years." She grinned as if she had a plan ready while taking out the recommendation letter.

"Oh! You are really my daughter." Alcea smiled and looked at Nella, knowing her plan. "I am still going to confirm it, but are you sure you will join the Unsurpassed Blade Sect just for this?"

"The ancestor said that no one recognized Sword God's talent, but when he was known, not everyone would be put on his eyes. For a merchant, All-in is a gamble, but there is sometimes that we need to do it. Besides, I have claimed boldly that I am your daughter, your little witch."

Alcea and Nella smiled at each other and said the same line. "The person who our eyes have set for won't escape from us."

"Still, you will need to practice hard, you know."

Nella raised her hand as a Spear Energy revolved on her hand. "I am more than up for it."

They looked like they had decided to gamble, but little did they know that Alex also had a time limit in this world. Whether she was fast enough or not, no one could tell.

### [Chapter 952 - Trouble Inbound](#)

A few days later, Alex and Aria had returned to the sect and immediately handed the proof that they had completed the mission.

Happy with their achievement, the peak master immediately let them rest after a long journey.

And as Alex promised, he helped her in the training of the Sword Eye. This eye was peculiar for him because this was the first one he had found with a similar characteristic with his Spirit Eyes.

However, the Sword Eye didn't necessarily exert the same technique like his first and second steps.

The Sword Eye had three main functions. Sword Barrier, Sword Pressure, and Sword Enchantment.

All of them required great control in one's Sword Qi.

To create a Sword Barrier, Aria needed to accumulate the Sword Qi in her eyes and sent it in one direction. It looked like a shield instead of a barrier, but this was something powerful because the Sword Eye had enhanced her eyes' ability when she used it, meaning she could see the world at a slower speed like his Spirit Eyes.

The Sword Pressure had the same principle as the Sword Barrier, but the Sword Qi would be placed on top of the enemy, giving a sharp pressure as if there was a rain of swords from above. It would fit perfectly with a domain that could lower one's enemy, but Aria had yet to learn a technique like that.

Still, the most powerful one was the Sword Enchantment. Unlike the first two, this one directly strengthened her attack power to the greatest degree. Alex had seen this in his fight where the Sword God would have his Sword Qi spiked up every time he almost hit him. This would increase her attack power. The moment she had the ability to control it at will, her attack power might become the strongest in this sect.

Alex felt the boundless prospect coming from this technique, but he knew that Aria was interested in not any of these. Instead, it was the most basic thing from the Sword Eye, the ability to see the world. Even though it was only for a brief moment, she felt happy just to know the world was so beautiful.

However, she didn't use this excessively because Alex was very strict in her training. He only let her see the world for two seconds before closing her eyes again.

Aria didn't raise a single complaint about this because she could feel that her strength rose every day. Waiting for another few months to a year wouldn't be much of a sacrifice when she had endured tens of years.

Three months quickly passed by and Aria managed to use the Sword Barrier perfectly and worked her way for the Sword Pressure.

Alex sat on the ground while leaning on a tree as his body accumulated the Spiritual Energy nearby to increase his cultivation.

"Nyx, I am ready. Do you think you can check my progress?"

"Sure." Alex nodded and stared at her for a few seconds before throwing a rock at her.

Aria gradually opened her eyes. A sword mark miraculously appeared on her eyes, becoming the symbol that she managed to cultivate the Sword Eye correctly. And that Sword Mark was the medium to channel the Sword Qi from her reserve to the eye.

An invisible barrier appeared right before her, protecting her from the stone. In fact, the Sword Qi shattered it into dust.

"What do you think?"

"Yeah. That's perfect. It can be activated sooner since we tested it yesterday. Now, time to test the second ability, the Sword Pressure."

"There is something I want to show you because I feel this Sword Pressure is a bit special." She thought this out yesterday, so there was this desire to show it to Alex.

"Sure, go on. I will feel it myself."

Aria nodded and closed her eyes again. She then opened her eyes at speed far faster than the first one.

The Sword Qi released from the Sword Eye gathered on top of his head in a split second before it created a bigger impact than the past few months.

That pressure even created a small crater on where Alex sat.

"Interesting." Alex smiled and waved his hand, dispelling the pressure. "Instead of using it continuously, you decide to use it one single time to create a burst of Sword Qi."

"Yes. I got inspiration from your step. I don't know what it is called, but when I remember your technique, it always reminds me of the sudden burst of Spiritual Energy that contained enough power to pin somehow to the ground."

"A good—" Before he finished his words, his mask suddenly got cracked before loosening in his face, falling down slightly.

Since Aria still used the power, or in other words, opened her eyes, she caught a glimpse of Alex's face. Of course the artificial burned skin was still there, but Aria wasn't disgusted or anything. It wasn't like she didn't know anything about this despite being blind, she could see that the mark didn't suit the skin of the rest of his body, so she knew it must be Alex's burned mark that he always wanted to hide.

She fell down on her knees and subconsciously stretched her hand with a sad look. Touching the burn marks, she opened her mouth. "I don't know if I should be grateful or not, but I know you don't deserve this. Have you ever thought about healing this wound? If it reminds you of your past, how about you have someone to carry that past together with you, so you don't mind this burned skin to be removed."

Alex was slightly startled by her remarks and her actions. It was subconsciously, so Alex only sighed and gently grabbed her hand.

"It's fine. Maybe it will happen in the future, but it won't happen in the near future." Alex smiled while putting her hand down.

"Is that so? Such a shame. I don't know the other guys' faces, but I feel like you are quite a charmer, you know. That's why it's such a shame to have this on your face." She smiled.

"Have you said it to yourself? If you take care of your skin a bit more, I believe you can charm many people." Alex smiled.

"I don't have any intention of doing that, but thank you for the compliment."

"Anyway, turn it off first because it requires a huge amount of Sword Qi."

She nodded and gradually closed her eyes.

"Anyway, you have a long way to go to master the Sword Eye. I feel like there will be a problem happening soon."

"A problem?"

"Yes. It's regarding your brother and family."

"What?! Did something happen to them?"

"I was about to ask you that. When was the last time you contacted them?" Alex asked with a serious expression.

"After we returned from the escort mission."

"Hmm." Alex thought for a moment.

"Is there any problem? Are they in danger?"

"I am not sure yet. First of all, I haven't heard anything regarding your family. You remember that you did once offend someone, right?"

"Yes. You told me there is a chance that the woman would target my brother or my family instead of me."

"I don't know whether she has given up or not, but if it's the latter, I am sure around this time will be the perfect time she acts."

"This time?"

"Yes. No matter how hard the peak master and the others hide our information, some people can dig it up. I don't know the identity of the other woman, so I am not sure of her capability. But if she is a bigshot, she must already know something about you, including your brother and family.

"And she must be following your movement. With how the peak master protects you, she must be hiding this whole time, working up the plan. Well, I don't know if she is petty or not too.

"Either way, in the worst-case scenario, she will notice your achievement in the past two missions and your cultivation progress. There is a chance that she will feel threatened by it and choose the extreme measure.

"I mean, just take a look at you, in less than a year, you have reached 3-Star Martial Saint, almost 4-Star. In the near future, your progress will surpass that of her backing, so she is afraid that you will take revenge when the time arrives.

"That's why she might be trying to make a move during this time, ignoring the peak master's warning." Alex's face turned serious.

"I am surprised that you have put so much thought into it. I don't even have time to think about this and...I remember that you won't be putting your nose in my matter, right?"

"It's to hide my presence. It doesn't mean I won't give you advice or analysis." Alex shrugged. "After all, I still need you."

"Say it again in a more loving way, especially to that Nella, I am sure it will seal the deal." Aria smirked.

"You are still joking at this point?"

"Trying to calm myself down." Aria shook her head as her hands were shaking. She grabbed Alex's hands and bowed. "Thank you."

"Anyway, that's as far as I can intervene. The rest is up to you. If you are going to fix your problem, you need more strength." Alex shrugged.

"Of course. Should I do your hell training twice as hard?"

"Nope. You shouldn't. It will either break you or kill you. This is not a matter of will anymore. Your body is the one giving up." Alex shook his head.

"I see. Then, do you know what I am supposed to do?"

"I can't give you a concrete answer, but I guess you can warn them about this. I don't know if I am just afraid of something unknown, as a careful person myself, but this calm is like the one before the storm. I don't like it." Alex shook his head.

"Alright. I will be contacting my family and my brother. Maybe I should ask someone to investigate this matter?"

"No need for someone to investigate it. You can't ask anyone regarding this because we don't have any relationship with the others in the sect. Before the other party makes a move, we can't do anything."

"I see. I will focus on strengthening myself then." She nodded.

Alex nodded and decided to start the training again.

Suddenly, he felt two presences above his head and found two people before his body became tense.

The first person was a man. He had green eyes and green hair. He appeared calm, but his energy, presence, and face looked like someone he had met.

The second person was a female. She had long black hair tied into a side ponytail, letting the hair rest on her neck and run through her chest. Her face was gentle, but she was actually a Rank 5 God.

When their eyes intertwined, Alex felt an immeasurable pressure in his heart as if the woman just saw through him.

'Holy—' Alex gulped down.

### [Chapter 953 - Negotiating](#)

He had seen these two separately, but not in his wildest imagination would he see these two together like this. The male was the mysterious guy that attacked him in the upper world, right when the monster world attacked. As for the female, she was the one standing on top of the spaceship with the Palm God, his daughter.

When their eyes met, Alex could feel that these two noticed something from him.

The man suddenly whispered something to her before disappearing from the air.

Alex pushed Aria away while grabbing his sword.

The instant he appeared, he sensed the same mysterious technique as the one he handled previously.

"Acceleration."

After getting some knowledge about time from his previous self, he could finally see the attack.

To his surprise, the latter used his Divine Body to attack him, trying to see the real strength of Alex.

Noticing this, he jumped an inch from the ground and used that force to blow him away like how a Martial Saint should be.

"Nyx?!" Aria shouted his name before glaring at the new person who suddenly attacked him. She raised her sword and appeared right next to the mysterious guy.

"Deceleration." He glanced at Aria and used his Time Element to slow down her high-speed movement before catching her blow without any problem.

"What?!" Aria widened her eyes before realizing she was blown away in Alex's direction.

"Who are you guys?!" Alex caught her and shouted as if he didn't know them.

The mysterious guy smiled and jumped toward him.

Alex grabbed Aria's waist and raised his weapon before he sensed the woman right next to him. He gritted his teeth and tried to jump away, but without him noticing, he suddenly lost the strength in his leg.

'What just happened?' Alex asked inwardly before finding needles on his legs while falling to the ground with Aria. At the same time, the man also had a few on his hands, stopping him from moving.

"That's enough. Your plan is bad, so stop fighting." She sighed at the mysterious guy's man before looking at Alex. "What is the point of that burn mark? I am not sure whether you know me already or not, but I will introduce myself first, I am Silvia Hermeth, nice to meet you, Nyx? Or should I say—"

Alex already swung his sword, making her unable to say another thing because she needed to avoid it.

"Fufu. So, that's how it is. If you don't stop me, your real name will be revealed. If you stop me, I know your real identity. A hard choice, huh?" She smiled as if she just saw through him.

Alex, on the other hand, expelled the needles that tried to block the flow of his blood and used his Pure Fire to boost his legs, getting some distance from them.

Aria didn't shout or say anything regarding his real name. She had expected "Nyx" wasn't his real name, but since he didn't have the intention to say it, she made that bet.

"Before you do another thing, how about we have a talk first on how to resolve this problem. Well, it's certainly my lucky day." She smiled. "And don't try to play the fool because I can inform my father at any moment. If you think that fake mark can protect you, then you are underestimating my ability as a doctor."

[This Kubard is a sly one. The reason she is there must be because he knows that you will eventually come to this place to learn about Sword Qi and Spear Qi.]

'What should I do?'

[Negotiate with her. If it's not working, I will try to talk with Kubard since they have found you. If it's not possible, Eulja is ready for a big war.]

Alex took a few deep breaths before he put down Aria. "Let's go inside first."

He thought their appearance would be a big thing, so it would be best to go inside as to not get any attention from other people.

She smiled and nodded.

Alex brought them inside before Aria immediately chose to make tea for them.

Alex looked at the two with a serious expression.

"You don't need to be this serious. I am different from my father. Still, I wonder whether the one I am talking about right now is with Alexander Sirius or Spirit God?" She narrowed her eyes.

Alex thought for a moment. "Alexander Sirius."

"I see." She glanced at the time guy and introduced him. "He is Navin. My Father's new disciple. He told me that both of you have met in the past."

Navin nodded with a calm expression. "I am just escorting you while searching for someone. Since there is a particular person, I am just checking his movement to know whether that is him or not. After all, only a few people can be calm by my Time Element for the first time."

"..." Alex glared at him.

"He pretty much hates you, it seems." She smiled.

"I don't have an excuse. Unfortunately, I can't say anything regarding my reasons. If you want to fight me, I will accompany you. If not, I am fine as well. For now, I will be waiting outside." He rose and left the house.

Noticing Alex's gaze return to her, she smiled. "I am sure that you don't know the purpose of my visit to this world. In a sense, my father knew that no matter what you did, you would need Sword and Spear Qi, so instead of searching aimlessly, I should come here and wait. Of course, we have talked it out with the three Rank 3 Gods in this world. I am visiting the sect to search for someone, and it turns out my luck is out of the chart today."

Alex remained silent.

"Let me see, with how my father acts, I am sure you are wary against me, but I am not that unreasonable. It's true that I idolize the Spirit God, but it might not be the same for Alexander Sirius. Well, you can say I have been trained by my father to marry the Spirit God, but we have agreed to let me see the real person first before deciding that. I think what we should be negotiating is regarding that. Don't you think?"

Alex looked down and opened his mouth. "What do you want?"

"That's not very nice, you know. How about letting me see your real appearance first? The burn mark is fake, and your hair is dyed. After that, we can talk earnestly. What do you think?"

Aria placed the tea on the table before saying. "I will excuse myself since I believe this is not my place to intervene."

"Oh?! Another wife material?" She smiled before realizing her eyes. "Your eyes...Can you let me take a look? I am a doctor, so I know what type of eyes that can be cured and one that cannot."

Aria's body shook before glancing at Alex.

"Go on." Alex nodded. "And she is not my wife."

Silvia smiled, didn't comment, and placed her hand on top of Aria's eyes. Channeling her Divine Energy, she scanned her eyes before smiling. "I think this one can be cured. There are indeed some defects in your eyes, but I can certainly cure you. Unfortunately, I need a few medicinal herbs to nurture your eyes first before treating it."

Aria opened her mouth, but no words came out. The thing she hoped for had finally blessed her with its presence, but when it really came, she didn't know whether she should take this choice or not.

"Well, we can talk about it after I talk with him." She patted her shoulders.

"I understand." Aria nodded and left them alone.

Alex then put off the burn mark, regretting that he shouldn't let go of his mask even though it was just for less than a minute.

"What do you want?"

"Such a handsome face." She stared at him while smiling. "Well, since you asked me what I want, there are a few things. I want you to be my husband, I want your seed, I want you to date me now and so on, but yeah, everything is like that. I am sure you don't like it, right?"

Alex clenched his fists and nodded.

"That's why I am not going to push you into the corner. I am sure you don't want to have a big war against my father, right? Although we might lose, you will need to face many risks just by knowing you are alive. The easiest way is to marry me, but that option is not the best. I don't like using a threat as well, so I want both of us to think of the solution.

"But let me say my piece first. I just want us to have a go first for a while. After a certain period, if it's not possible, I won't say anything and convince my father that it is not possible. What do you think? This is a pretty good solution, right?"

Alex thought for a moment and shook his head. "I don't have the resolve to do that."

"Resolve, huh. I almost forgot that the most well-known behavior from the Spirit God was to be responsible for everything around him no matter how important they were. I see, that's one point that I love and one of the biggest reasons why I idolize him." She smiled. "In that case, how do you want to solve this?"

Alex thought for a moment, having no solution at the moment.

"This is hard, you know. I mean, you should give me some chances too." She sighed. "And I ask you sincerely. As much as I don't want to use the threat of my father, I still desire to know the current Alexander Sirius myself. Besides, even if it's not possible between us, I think I would love to have a friend

like you. I can protect you or my father will help you in the future. With his help, you will have two God Kings, stopping any others to think of attacking Eulja."

"There are two reasons why I don't like the idea." Alex sighed and chose to explain. "First, I am not fond of having someone who thinks of relationships as business and calculates everything from benefits and loss. Second, I don't like to be forced anymore."

"I see." She closed her eyes for a second and smiled. "In that case, I would like to ask Mister Alexander Sirius to give me a chance to know you more. If in three years we know that it's not possible, I will give up. Of course, you can use Eulja's time for these three years."

"I would love to see how you act and do things, and I promise to not hinder you or something that will risk your identity. After all, not everyone is destined to be married. Besides, it's not like I can simply leave this world after discussing the terms and agreements with this world, right? I still need to live here for a period of time. I can create a new identity as well."

Alex never thought that the person in front of him would step back like this. From what he heard about this Palm God, he would do everything possible just to have him as his son-in-law. And he would most likely force him in the process.

"That..." Alex still hesitated.

[Why don't you accept it? It's not like you have something to lose. And I have asked all the spies regarding her information. Her words are credible, and her personality is trustworthy. From others' perspectives, she is one of the most talented people in the universe. Achieving Rank 5 God within three hundred years old.]

"Well, I should talk about myself first, right? I have told you my name and my father. As for my strength, I am a doctor, specializes in acupuncture. I can literally save anyone as long as they do not die. I am known as a Light Goddess instead of a Divine Doctor or something because my Light Element is a bit special...No one knows about this other than my family, but I will tell you to show my sincerity. My Light Element can carry a huge amount of Spiritual Energy that is very useful in healing people."

"..." Alex closed his eyes.

#### [Chapter 954 - Agreement](#)

Alex closed his eyes, feeling troubled. On one hand, her proposal indeed interested him since he could see her sincerity as well. On the other hand, this was against his personality. This bothered him the most. If another person were in his position, they would accept this instantly, but he couldn't.

The room fell silent for a few minutes before he asked. "Since you come here with that intention, I can respect that, but what is he doing here?"

"He? Ah, you must be talking about Navin. After meeting with my father, he has become my father's disciple, so he is escorting me right now. According to his words, he is also searching for his wife, so I let him go with me." She nodded.

"Do you know that he had attacked me without any reason?"

"He had a reason, but he just couldn't say it. I don't know the reason too, but it seems all of us are at risk."

Alex thought for a moment and found something that would create such a situation. "So, that's how it is. I don't know his ability, but I have finally realized why he attacked me."

She smiled. "That's good then."

"You are not going to ask me? Your life is at risk too, you know."

"You can say it to me if you want. But if you don't want to, I won't ask. I don't say I am curious, but something is better to not be known. Besides, you might be telling me in the near future, fufu." She smiled.

Alex let out a long sigh. "I admit defeat. For now, I will introduce myself first."

She stopped him and said, "Alexander Sirius. The bone is 48 years old according to Eulja's time. From the skin and your body's structure, you are a Rank 9 God... Might reach Rank 8 God in a few months to one year this world's time. There is indeed a change in your body, but I think the basics are still the same.

"As for your element, I can see Fire Element and Space Element enhancing your body. The Fire Element is a Pure Element because it's at a level I have never seen before. The same applies to your Space Element, but I don't think it's a Pure Space Element because it lacks the power like your Fire Element. Well, that's how much I can observe with my eyes and my knowledge as a doctor."

Alex widened his eyes in amazement. He never thought that his body would show that much information.

"Of course, I don't think I need to say this, but I can see that you are using a Sword in your right hand and a Spear with your left hand from your hands' appearance alone. And seeing there is a remnant of blood and medicine, I think you are an Alchemist and an Array Master. Unfortunately, I can't see or sense any type of metallic things in your hand, so you are not a Forging Master. That's all I can see from you."

[This girl is dangerous for various reasons.]

Alex had the same opinion and let out a long sigh.

"Hehe, I think I am right for the most part. That's my intake as a doctor. If I don't have this kind of knowledge, I don't think I can see your true strength. I don't know how you did it, but you have completely sealed your Divine Energy and Divine Soul, so no one would recognize you unless they try to stimulate your Divine Body.

"The Space Element is weird as well and hidden pretty well. I am not sure at first, but I can see a fluctuation around your body, so I know. The hand that holds a spear is different from those who use bows, swords, or any other kind of weapon. Although it's hard to spot, if you are a doctor with a Divine Body, your senses can pick it up.

"As for the lingering scene of medicinal herbs and blood, it's hard to pick up unless you know the intensity of someone using medicinal herbs and someone refining medicinal herbs. It comes to experience. The same applies to blood. No matter how hard you wash it, as long as there is a minuscule

amount of it, it's still possible to detect it because it has been ingrained in your hand. I can help you remove it though."

Alex scratched his head, wondering what he had done wrong to see someone capable of seeing through him. No wonder Lin Xingzhi classified her as dangerous. Her skills were monstrous.

"So, three years is it?"

"Do you accept?" She had an expectant look and felt happy that she finally managed to convince him.

"I have a few conditions and questions before that."

"Sure. We can talk about it."

"First, I have the right to refuse since I don't want someone to just force her will on me if I know it will be dangerous to me or both of us."

"I understand. I don't like to impose my ideal on someone as well. I am content if you give me some chances from time to time. I would like to know you more as the reincarnation of someone I idolize."

"That one too. I would like to separate myself from the past image."

"Oh?! I am sorry if I make you feel uncomfortable. I will refrain myself from now on."

"Before moving to the second condition, I want to know what he will do in this world."

"He won't do something and probably train for most of the time. After all, it's true that the Sword Qi from this world is very useful. According to the sect master of the Unsurpassed Blade Sect, he can train here as long as he promises with Universe Oath to not tell or teach a single person including his child in the future."

"I see." Alex thought for a moment. "I don't mind if you tag along in a mission that is possible for such a thing, but if it's a special mission, especially one with a supervisor, I am afraid it's not possible. I don't want anyone to question my identity."

"I can see why. The reason is the same as you hiding from my father, right?"

Alex nodded.

"Alright. Just inform me when you leave."

"As for the third condition, I want to ask where do you live right now?"

"I am living in the First Peak. I can move my temporary house anywhere."

"No. Please don't. If you suddenly change your house, I will be troubled. You can stay there, and I promise to create a Teleportation Array in your house, so you can visit here anytime you want."

"Hehe, so sweet." She smiled. "This confirmed another thing that my father told me. When you agreed to something, you would do anything to the best of your ability to satisfy both parties."

Alex shrugged.

"Fine. I will be content with just that. Although I have promised them to help them from time to time, I can ask them to put the message in front of my house, so it's a kind of appointment first before getting the treatment. They won't realize if I am gone." She smiled.

"Then, take this." Alex took out a token and handed it to her. "I can feel the direction and the length if it's not that far. I will go there later by using my Space Element and draw the array before linking it up with the one in this house. Of course, Aria...I mean, the one who is staying with me doesn't know about this, so I want you to tell them it's your ability."

"Sure. I can do that much. It's not like I have something important."

"Then, the third condition will be about your identity. I want you to impersonate someone so no one is surprised by your presence. And if the peak master visits here, I want you to hide."

"Sure. If I am not wrong, the peak master here is a Rank 5 God, so I think I have the ability to hide from her with my own strength."

"There is another solution, but I don't know if you will agree or not."

"Tell me about it."

"I can seal your strength with my Space Element just like how I seal my strength. After that, with you using a new face, we can just forge an identity about you being Aria's or my friend."

Silvia thought for a moment and nodded. "Sure. I don't mind you sealing my strength. But do you have a way to suddenly unseal the strength?"

"There are two ways of canceling it. The first way is to go far away from me. Secondly, I unseal it normally. If you are in your house, I won't have enough control to maintain the seal. Meanwhile, I can keep it as long as you are close to me."

"In that case, I only need to have another face when I am here or doing a mission with you, right?"

"Yes. Of course, the mission is with Aria as well because I have promised her to train her."

"Sure. It's nice to go along with a wife candidate."

"As I said—"

"Right." She rolled her eyes, not buying it, especially after seeing how intimate he was with Aria.

Of course, it was normal to have such a thought when she saw her hand touching his face. If she looked at the entire situation, she wouldn't misunderstand.

"Whatever. I am too tired to explain the entire situation. You can ask her about it later." Alex let out a long sigh.

"Well, do you want to make a better cover? I can make the burn mark as smooth as possible to the point you can feel the Spiritual Energy from that wound as if it's connected to your body. Even a doctor like me has trouble seeing through that disguise." She smiled. "Of course, the same applies to your hair. I can change it in a natural way."

Alex looked at her and hesitated for a second. "Is your current appearance a disguise too?"

"Of course not. With my acupuncture, I can change one's body structure. If I go even further, I can use my Light Element to create a new foundation in your body. For example, in stage one, I can change your voice, skin or hair color, or even your body. Ah, by the way, mine is natural alright? I never use it on myself even though I can give more volumes to one's curves."

"..." Alex fell silent and chose not to comment on this.

"And at the second stage, I can manipulate your body to the point of changing your gender while turning the yang into yin. With present technology, you can change your gender, but you will still have yang energy in your body. Although it doesn't really matter for daily activity, it's a big influence on your cultivation. Just tell me if you feel like becoming a woman to test the pleasure of being one." She grinned slyly.

"I don't have that desire and won't ever have one." Alex shook his head, wanting to smack this girl's head, albeit refrained himself as he didn't know her long enough to do something like that.

"Anyway, I have no problem with your conditions. Any more conditions?"

"It's not a condition but an agreement. I will respect you and your opinion, so I hope you can do the same. If there is friction or some problems, instead of solving it alone with some sorts of excuses on behalf of love or whatever bullsh\*t, I would like you to talk about it with me."

"Hehe...Now, I am more interested in you. True enough. Family is built by two opposite genders, not one. We don't sacrifice so someone can live, but we sacrifice ourselves because we want to live with them."

Alex nodded. He adapted this principle when he saw his previous self die in that beast's hand. When he put it in his perspective, he didn't know whether he was able to refrain himself from committing suicide. After all, there wouldn't be another prophecy.

### [Chapter 955 - Bringing Silvia Home](#)

"Well, please take care of me." She bowed her head.

"For now, how about you return first? Too long here will just catch someone's attention."

"Fine. There is something I need to deal with anyway, so I will be leaving for today and tomorrow. You can make the Teleportation Array the day after tomorrow."

"Just activate the token, and I will know when you are ready." Alex shrugged.

"I understand." She smiled. "One more thing that I need to confirm. You are Nyx in this world, and you don't have a plan to stay for too long, right?"

"Yes." He nodded.

"In that case, I have a solution for that. As long as we have a body, we can transform it into you before I use my Light Element to cover it with Spiritual Energy, making it look like you have died. What do you think about it?"

"That's an interesting idea, but I can't choose for the time being." Alex nodded, not agreed or disagreed.

"Alright, then. See you later." She smiled while waving her hand.

When he saw her off, he dropped to the ground while scratching his head. "I am tired of this. There was Nella not long ago and now this..."

[A popular guy. Still, I am surprised that you don't have anyone to supervise Nella. You must have recognized her sudden transformation, right?]

"Yeah. That's why I am not confident in leaving anyone to pay close attention to her. I feel like there is something weird with the Spear Mark on her forehead. If I send someone to supervise her and it turns out to be something that can catch them, the situation will become even more complicated." Alex let out a long sigh.

[I see. You have used your Spirit Eyes for a long time, so I guess you can start differentiating this type of thing. I don't have an objection to your decision, but I will remind you one more time about the danger.]

"I know. I am not planning to stay for a long time in this world. There is a chance that I will take Silvia's suggestion and use my death to stop her in the future. If that is still not enough, then I will have no choice but to kill her to prevent another Shelka." Alex nodded with a serious expression.

[Since you have the vision for the future, then there is nothing to worry about. I will ask the N Squad to monitor that world and make sure that Nella didn't do anything suspicious when she leaves the world. We can observe her ten to twenty years before confirming her real intention.]

"Yeah. I will leave that matter to you after I leave this world. For now, there is no need. If she is indeed someone that I think she is, she won't harm me for a short time."

[I understand. Then, how about Silvia? I feel the situation is under control, right?]

"Yeah, but I still feel bad for doing this. It's just not fit with my conscience." Alex pinched the bridge of his nose, feeling the stress.

[I know that you are doing this for the best of everyone. I mean, there will be many Spirits dying if we indeed have a war against the Palm God. They are willing, but it's still unnecessary death. Besides, it's only three years of Eulja's time. You will at least live for another two years of Eulja's time there before you can enter the Sword Pavilion, so I guess you will only need to fix the problem in the last one year.]

"I hope it's as simple as that. She is a doctor, right? If she pokes me here and there with her power, won't my chastity be in danger?"

[Pfft. You have nothing to lose for a one-night stand.]

"I have. I will lose my conscience."

[Fine, fine. For now, we can only wait and see. At the very least, there won't be any conflict with the Palm God, and you have someone to take care of you when you are there, so I feel relieved.]

"Anyway, according to the agreement, I will give her a chance. Whether it will stay just as a simple agreement or not in the future, that will depend on many things. I just want to know that this is my stance. Do you have a problem with this arrangement?" Alex asked.

[Nope. From my perspective, it's indeed good to have someone that powerful in the family, more so with her potential that can be said to be the peak. If nothing goes wrong, I have no doubt she can reach God King in the future. That is something I would like to see and very beneficial to our Eulja. As for her own character, I don't have any qualms at the moment. I said it earlier, but her personality doesn't seem to be twisted, so I won't need to watch my back.]

"If you are fine, then it's good. I want you to ask the others as well."

[Sure. It will take a day for them to reply, but I can tell them about this. Though, I believe the others share the same opinion as me.]

"Just ask them first."

[Alright. I will be leaving you for now.]

"Yeah. Thank you." Alex nodded and let out a long sigh before Aria came inside the house.

Finding Alex on the ground, she asked. "What happened to you? Is she your wife? Or maybe your soon-to-be wife? Wait. Don't tell me you just want to escape marriage, so you hide in this world?"

"Oi, oi. Don't let your imagination go wild." Alex stopped her. "It's not like what you are thinking. Let me solve this problem in two days before I explain everything to you, alright?"

"I understand."

"You can practice alone for now. I need some time to cool my head." Alex waved his hand, telling her to go.

Before leaving for training, Aria stood still for a few seconds and said. "Nyx, I am sorry. If I didn't pressure you and crack your mask to the point it fell off, they wouldn't know it was you."

"It's fine. With her so-called insight, I feel like I won't escape that long either." Alex shook his head. "Just think of it as my bad day."

She hesitated and chose to leave him alone.

That day ended peacefully, and Alex started teaching Aria again the next day until he found the token lit up that night.

"Alright. You can continue by yourself. I need to deal with another matter." Alex informed her and went straight to the house before using his Spatial Gate to enter the Space World. Within that world, Alex ran toward the direction that the token gave him.

When he arrived, he created another Spatial Gate to return to the real world right inside her house's training field.

Silvia seemed to have noticed it too and proceeded to meet him. Unlike the previous time, she wore a black shirt, brown leather shorts, and a long white coat that many doctors from Earth used. Her black hair was replaced with brown color tied into a twin tail, resting on her chest.

"You are rushing to this place?" She was a little surprised, thinking Alex would arrive in another thirty minutes or so.

"No. I just want to finish this as soon as possible."

"Oh. Well, I only need to put down this coat of mine, and we are set to go. Do you think anyone will recognize me if I have this appearance?"

"No, unless you purposely lead them to your identity with that tone and style of yours."

"I can adjust my pitch a little bit with some simple acupuncture." She nodded. "Anyway, do you want me to treat you first? Like the trace of medicinal herbs, blood, burn marks, and your hair?"

"I think you can do that after going to my house. I can explain to Aria while you are at it." Alex shook his head.

"I see. Then, come in first. I will show you the perfect room to place the Teleportation Array." She waved her hand, asking him to go inside.

Alex hesitated once more before coming in. There was not much difference between this house and his, so he ignored most of the portion of the house and headed straight to a certain room.

"You can use this room."

"This is..." Alex narrowed his eyes.

"I just built this secret room today." She smiled, presenting him a secret room under her own bed. The entrance was like a free fall for a few meters before hitting the room. "I need to be extra careful while dealing with you, so yeah, I use a bit of my time to make this."

Alex nodded. "Thanks. I will proceed then."

She stepped back and saw Alex spreading the monster blood in the whole room before using his Spiritual Energy to control them.

Symbols after symbols were made and planted on the room before slowly turning into an array. Alex didn't forget to make the connection with the Teleportation Array he made in his room.

After testing that it could be activated, he nodded. "It's done."

"You are fast. I had seen many Array Masters, but none was as fast as you."

"It's due to my mastery in alchemy that allows me to achieve this kind of control." He shrugged.

"I am now curious about your alchemy. As you might already know, I am a Doctor, and obviously, I need to make my own medicine, so I have learned Alchemy. It seems it will be interesting to talk about Alchemy with you." She smiled.

"Not really. I only can make two Divine Pills, so you shouldn't waste your time. I just have too many things to master everything." Alex sighed. "Anyway, aren't you supposed to ready yourself?"

"Ah, I was mesmerized by your unique approach, so I couldn't help it. Just wait for five minutes. I will be done." She immediately leaped to the surface and took off her coat. After confirming everything was perfect, she returned to the room. "I am ready."

"By the way, what is your name?"

"I am Sil—Ah, you must be asking my pseudo name. I will just use Mya as my name. The background will depend on you since you understand this world more than I do."

"Alright then. We can discuss it with Aria as well. Before that, I need to seal your cultivation first. There is a chance you will die because of this, but if you trust me—"

"It's fine. You don't need to explain. Just seal my cultivation." She smiled. "I am ready for any kind of risks, including you."

Alex never expected that she easily trusted him like this. However, her smile told him that she was serious about this.

Thinking for a while, he stretched his hand and touched her head. The Space Element then entered her body and created a special realm that sucked her cultivation.

Silvia let him do whatever he wanted, even though there was a possibility of Alex killing her with her current strength.

When he finished sealing her, there was a period of time that Alex just stared at her, but she only put on her biggest smile as if she completely trusted him.

He let out a long sigh before activating the array. "Teleport."

Alex and Silvia then appeared in Alex's room.

"So, this is your room." She smiled while looking around, only to find Array and one bed in his room. "You didn't do anything in your room?"

"There is nothing I can do here." Alex shrugged. "Anyway, I will call Aria first."

Alex walked outside his room, opening the door that led him to the field. "Aria, come inside. We have something to talk about."

Hearing his voice, she nodded and walked toward him before noticing a female behind him.

"She is..." Aria furrowed her eyebrows. She thought it would be Silvia, but she couldn't feel any similarity from her, making it confusing.

"I am Nyx's girlfriend, Mya. Nice to meet you." She smiled and clung to Alex's hand playfully.

"..."

[Chapter 956 - Massage](#)

"I see. You are the woman who came and attacked him yesterday." Aria nodded her head with a calm expression.

"..." This time, it was Silvia's turn to be dumbfounded as she subconsciously released Alex's hand. She never expected Aria to talk to her like that after seeing her yesterday.

"Pfft." Alex looked away and laughed. The one that had been in control since yesterday was her, so it felt a bit satisfying to see her like that.

"Alright. Joke aside, nice to meet you. I am Aria Cypress. May I know what the situation is?" She asked politely, knowing that the one in front of her was a God Rank Expert who was even stronger than Alex.

"Come inside. I will explain the situation and clear up a few things."

With Alex's invitation, she went inside as they sat while facing each other.

"For now, she is going to do many things with us, so I want to make up her identity first. Her name is Mya. Why is she with us..." Alex thought for a moment. "Just say she is your friend that has become a disciple of this sect not long ago."

"We need to have another reason why you let her come here." Aria looked at Alex. Since Alex's desire to stay alone was known to a few people, he needed to justify that reason.

"How about I am your friend that you've known since many years ago? I came here one or two decades ago because I wanted to see the world, leaving you alone there. After knowing that you are here, I decided to visit you. We can throw a childhood sweetheart as a bonus. That's a more convincing reason...Like you come here because you are searching for me." She smiled.

Alex was speechless on how every plan was connected to him and her being a lovey-dovey couple.

"Anyway, we can make her my long-lost friend who became a jerk and left me in the past just to pursue her cultivation. And now she wants to get back like this." Alex nodded as if he thought this excuse was perfect.

"Oi!" Silvia pouted.

"I understand. That's the base of our story then." Aria nodded in agreement, pouring even more salt on her wound.

"Why am I the one who gets bullied here." She sighed. "Normally, no one dares to make fun of me."

"That's that, this is different. Unless you do me good or respect me, I won't respect you. If you make things difficult for me or do something ridiculous, then don't expect me to treat you well." Alex shrugged.

"Fine, fine. Take it as my mistake. I pay the price with this kind of stupid background story, alright?" She looked down, admitting defeat. This Alex really didn't pull his punch.

"Anyway, I have an agreement with her while I am here. As for when I come back? I don't know yet. At least, I will stay until I have completed the Sword Pavilion trial." Alex nodded.

"I understand. I will do my best during the time you are here." Aria then looked at Silvia. "May I know what will Senior do here?"

"Enough with this senior. Just treat me like I am your friend, so call me Mya." She thought for a moment and glanced at Alex. "I should be working on your cover first."

"Ah, yes. Please."

She then rose while smiling, taking off his mask. A few needles appeared on her hand as she started poking the needles one by one around his face.

"What are you doing?"

"You have seen the burn marks, right? That's fake."

"The burn marks? Oh, I see."

"Hehe..." Silvia interjected proudly. "I can see it through in a single glance. So, I am doing him a favor to make a perfect one for him."

"By the way, you can find a medicinal herb called Paniuoma. It's a Rank 8 medicinal herb that can nurture your eyes, considering it has never been used for a long time. And I can see that you are training a certain Eyes Technique, yes?"

"Yes."

"You can use the Eyes Technique during the process, and you will find it will become stronger and stronger. However, if you want the biggest effect, you can search for a Divine Herb called Sun Ganoderma. It can revive your dead eyes and nurture them as if they are reborn. Your choice."

"I understand. I will try to ask my family to search for it."

Alex thought for a moment and searched for the two herbs in his Inventory, but he didn't find any. It seemed, even the garden that his previous life left him didn't have an herb like this."

"Anyway, the nurturing period will last a few months. If I happen to leave this world first before you can do it, you can search for me when you reach God Rank. I will treat you as a friend." She smiled.

"Thank you." Aria smiled and bowed her head.

"It's fine. You have beautiful eyes, so it's a shame that the world doesn't know it."

"For now, I will be training with you since I am curious what kind of training that this guy gives you to the point there are many bruises on your body. The bruises are not external, but it's internal. In fact, I should heal you first. This guy also has it, but he had reset it when he reached God Rank and attained the Divine Body. But you? You need treatment. Let's go to your room first. I will give you a message. I am sure you will feel relaxed, and the flow of your Spiritual Energy becomes even stronger."

Aria hesitated for a second and saw Alex nodding his head. "I will be in your care."

"Good. Since we don't have anything to do, let's finish this." She rose from her seat and helped Aria up before dragging her to her room.

Meanwhile, Alex decided to clean up the mess in his room before he found a sweet voice coming from Aria's room.

It was none other than Aria's sweet moans. With just listening for a second, everyone would know she felt pleasure from the massage.

Alex simply ignored her sweet voice and continued his training. However, he was shocked by another thing. It was Aria's breakthrough after a whole night of massage.

"What in the world is that massage?" Alex couldn't help but comment, wondering if it was this easy to advance to another stage. If that was the case, he wanted the same massage to reach Rank 8 God.

After another few hours, Alex came out of his room since it was his usual time to get his own training.

When he came out, he found Silvia doing something in the kitchen.

"Oh, you are out? This is your breakfast. It's just a Rank 8 herb that can circulate your Spiritual Energy faster." She smiled.

"Hmm?!" Alex widened his eyes, never expecting to have breakfast.

Cultivators don't need to eat. This is a general rule because they can absorb the Spiritual Energy and turn it to fulfill their hunger.

"You have never had breakfast?" She tilted her head. "Well, I want to apologize as well because I am not a cook. If I can cook better, I can cook medicinal herbs and monster meat into something nutritious that can supply Spiritual Energy for morning training. I have found a world in my journey that uses such a method instead of pills, so I know it's possible. It's amazing to see many kinds of jobs that we think are useless actually have a powerful strength if they're used in the right way."

"Indeed." Alex nodded in agreement.

"Here, eat this salad first and finish the tea. I will fix your hands and any other broken "gears" in your body." She grabbed Alex's right hand and began massaging it.

Alex was startled at first because the massage didn't hurt. He thought to fix the problems would require strength like how he used to watch. He used his left hand to eat breakfast while glancing at her from time to time, finding her very different when she treated someone.

All the playfulness disappeared. He could only feel her gentleness and care of his body.

Not long after, his nose picked up a weird smell, so he took another glimpse at his hand, realizing it came from there.

"It only needs another two minutes before everything is expelled. I will do your other hand after that before moving to your entire body." She smiled. "Still, I am wondering what kind of training do you have this whole time?"

"Why?" Alex asked.

"Your body is breaking and recovering again and again. This doesn't really have any effect if you keep cultivating, but it will wear your body out when you are old." She sighed. "I can fix this because you are

not too old, but if you have passed five hundred years old, this type of thing can't be repaired anymore. Can I observe your training, so I can give input from a doctor's perspective?"

Alex thought for a moment and nodded. "It's not like I am doing something special, so I guess you can. The training is like breaking your limit again and again every single day to increase your cultivation speed and body strength."

"What do you mean by that?"

"I mean, if I ask you to run and you can only run five laps, I will ask you to run six laps. If you can continue, I will ask you to do another lap and so on until you collapse. I found this when I was training like a crazy cultivator and felt the effect."

"That is hard and painful to train. Not many people know the side effect, but if they know, they will start thinking. Luckily, you meet me before the worst happens. By the way, who else has been training like this?"

"Ehm...My Disciple, maid, and someone under my tutelage."

"I need to fix their bodies too. There are many dead cells accumulated in your body, so I need to expel them with my massage. If you pass five hundred years old, I don't suggest you keep this training, you hear me?"

"I understand." Alex nodded with a serious expression. The agreement was only there a few days ago, and she had become this caring, so how could Alex ignore this good warning?

After finishing his right hand, she moved to his left hand.

"You are not tired?" Alex asked with a concerned face. The massage required Spiritual Energy, so it must be tiring to keep it up for a whole night for Aria. And she even served him breakfast and did all this.

"Nope. I am good. I understand now why you are only this young but reach this step. I don't know if I should call you a genius or reckless, but either way, you are the youngest one I have ever known to reach Rank 9 God before fifty years old." She sighed.

"I have many things that push my back to advance forward, so this is the result. I have no regret." Alex shrugged.

"Still, to think I am holding a man's hand like this. When everyone tried to know about me, they would always meet my father's iron palm. I was told that I served only to marry the Spirit God's reincarnation. I indeed idolize him, but when I found you, truth to be told, I feel a bit empty." She felt a bit down.

"Empty?"

"Yes. There is nothing special when I first met you in person. Even when I negotiated everything with you, I didn't know how I felt at that time. Since my father had raised me up like that, I chose to continue this. I used yesterday to handle all the business with this sect while thinking about this seriously.

"Unfortunately, I simply had no clue about this. Only when I tried this and knew you a bit better with the conversations yesterday and talked to you like this, I feel this is not bad. It just makes me relaxed. Well, I just want you to know that." She smiled before rising from the seat and pushed Alex from behind, so he

sat a bit forward, giving her space to start her massage. "I have finished with your hands, so I will start giving you a massage."

### [Chapter 957 - Exchanging Knowledge](#)

When she started the massage, he finally realized why Aria let out such a moan last night. The pleasant feeling indeed permeated all over his body. The dead cells in Silvia's mouth slowly made their way out of his body as if thousands of ants were leaving his body. It was weird but pleasant because he felt that his body became light and Spiritual Energy inside his body flowed better than normal.

Alex closed his eyes for a moment and enjoyed the feeling. He had been cultivating in the harsh way where he constantly got pain, so when he received something like this, it felt weird.

"Hmm." Alex groaned before starting to circulate his Spiritual Energy around. The Spiritual Energy in the surroundings then turned Divine Energy, and his body absorbed it so naturally.

She smiled and kept doing it for an hour. Although Alex didn't advance to the next stage, his strength had increased drastically.

After finishing the massage, Silvia smiled and cleaned up while waiting for him to finish.

Aria came out of her room during that time and went to the field when she saw Alex cultivating. Even without him, she knew what to do in her training. And Silvia was watching him anyway, so there shouldn't be any problem.

It took him another five hours before his body finally calmed down, lessening his cultivation speed to the normal level.

Silvia came to his vision as soon as he opened his eyes and asked. "How do you feel? Is there any difference?"

"I feel amazing. Not only did my energy flow even more smoothly, but it also channeled even more energy. What was my condition actually?"

"Because you were pushing your limit continuously, your veins clogged up. I am removing them with my massage. Of course, this technique is special because everything comes from my power such as my sensitivity, knowledge, and element. And now, you are free from that. Your body is adjusting to that new state a moment ago and allows you to increase your cultivation by a large amount in a short period of time." She smiled.

"Then, won't it be more effective if I keep doing that before I am five hundred years old? I mean, I can arrive at that state from time to time and ask you for the massage?" Alex asked. In his mind, this type of cultivation would revolutionize the cultivation system. However, when everything sounded too good to be true, it was the time he needed to question it.

"If it's that simple...I can't use it on one's body continuously because it will mess up with your foundation. If you want, I can do it once more, but I will do it when you want it in the future, even if we go separate ways." She smiled.

"Thank you." Alex nodded. Despite how gentle and good she was, he still couldn't trust her one hundred percent. There was not enough time to determine her personality, considering he just met her yesterday.

"You're welcome. That's right. Aria has started her training. Are you going to train as well?"

Alex thought for a moment while checking his body. With the leap he had a moment ago, he might be able to reach Rank 8 God within one year. That was why he decided to shift half of his schedule for training to increase the amount of his Sword Qi. This way, he should be able to reach Rank 8 God within a year, and his Sword Qi might be more than he expected.

After coming to a new conclusion, he looked at Silvia and nodded. "I need to get stronger as fast as possible, so I can't afford to waste my time."

"Is that because of the calamity beast?" She asked.

"Eh?!" Alex widened his eyes. "How—"

"My father knows that your previous life died under its hand. After gathering enough information, including the one from Navin, he realized that the beast would soon terrorize this universe. He was convinced only after he found a clue about your reincarnation. The only one that fought that beast and sealed it was you, so the one who would solve it was you as well.

"Because of Navin's special ability, which I know nothing about, my father told me to wait for you instead of searching. After all, you will need strength to face the beast. Even if I am not by your side, I will assist you in this matter as a friend. Well, these are a few reasons why I do this."

Alex stared at her eyes for a moment before blinking a few times. "Well, I am thankful for your help. Rather than talking about this complicated topic, it's better to proceed to practice first. You should know that your Rank 5 God strength is not enough, right?"

"Indeed." She nodded. "You don't mind if I observe your training, right? I would like to know and maybe give some advice to improve the method."

"Sure." Alex then went to the field with Silvia following him.

When Aria noticed their presence, she stopped for a moment and asked. "Have you finished your business?"

"Yeah. Sorry for the wait. I will be going to train with you." Alex nodded. "Time surely flies. Only one more month before reaching one year mark."

"I agree. I never thought I would be able to reach 3-Star Martial Saint in just a year, especially from 9-Star Martial Monarch."

"It's your talent. I am just helping you." Alex smiled. "You have talent."

Aria smiled when she heard Alex's praise. No talent could bloom when the person didn't recognize it. If Alex didn't come, she wouldn't hear and have this kind of progress.

"Thanks." She smiled while watching Alex prepare his body for training.

The two then started their usual training.

Silvia supervised the entire training, especially how they broke their limit and collapsed to the ground. When that time came, she tried to help the recovery process and took a few notes on their condition.

Alex usually used a third to two-thirds of his day to break his limit while the rest was used to cultivate. When Silvia helped them up, Alex asked. "So, how is it?"

"That is something new to me. I have never thought that such a thing exists and can be exploited every single day. No wonder you can reach your level at that age. This will revitalize the entire cultivation system. However, you need a doctor like me to make sure you don't have any side effects from the old days.

"The training itself is already pretty good, and I don't have any complaints regarding that. Anyway, I don't see any problem other than how torturous it is. I mean, I doubt many people can do something like that because they need to do it every single day. It's like you are dying and reviving repeatedly every day.

"In a normal person's point of view, it is something hellish. Not many dare to think about something like this, so I guess there is a plus as well regarding this method. That's my honest opinion about your training." She approved Alex's method of training.

"What kind of side effect will we have?" Aria found something troubling and asked.

"It's quite big. If you manage to reach God King, you might not be on par with the other God Kings. Of course, it will be different if you have a powerful technique surpassing normal God Kings. And your wounds are harder to heal as well because your natural recovery has been exhausted to build up your body. There are two others, but I guess this one can be minimized with a medicinal bath to relax your body."

"It is indeed big. There is also a chance that the other God Kings will think twice before attacking this kind of geniuses, but when you corner them, they will realize your true strength and kill you. In other words, it will be the fight in the mind level." Aria nodded.

She never dreamed of being a Rank 1 God, but Silvia said there was a potential to do that if she continued in this path. Even if she were weaker than any God Kings, she would still be the strongest in this world. No one would mess with her family in the future, so she thought nothing of it.

However, she heard Silvia added something interesting.

"The side effect can be erased by my massage. One more time, and I can't really do it anymore unless you want to have a ruined foundation."

"Then..." Aria thought for a moment. If she was able to become a God King, there were two scenarios that she would have regarding Silvia. Firstly, Silvia could leak the information about her not being as strong as normal God Kings so many people could attack her. The second possibility was where she asked Silvia's help to fix the side effect.

With the authority and prestige of a God King, there should be a big chance for the second possibility. What made her wonder was Alex's plan.

Although he didn't find it comfortable, he might need to marry Silvia because of her ability. She already had this knowledge in her head, so she was the one who could create an army of God Kings.

Of course, she didn't know that it required a huge amount of resources. In this house alone, Alex already created a Gathering Array for training purposes and used a huge number of Spirit Crystals.

Due to the location and his intention, Aria could absorb the abundant Spiritual Energy coming from a Rank 9 Gathering Array. If she knew that she could only reach 1-Star Martial Saint without a Gathering Array, she would realize how reliant she was with the Gathering Array.

Alex, on the other hand, tried to come up with a way to mitigate the risk while waiting for Silvia to restore his strength.

"By the way, I would like to ask something." Alex suddenly found a way and wanted to confirm it.

"Sure."

"What if we use a Divine Herb? If I am not wrong, there is a Divine Herb that can make one's body reborn, right?"

"Yeah. Immortal Tree's root. This one is like the process you have to endure during the transformation of your mortal body to a Divine Body, so yeah, you will have a new set of your body. This was the reason why your problem wasn't that big." She nodded. "Did you find anything strange in your Divine Tribulation?"

"Nope. There was nothing." Alex shook his head.

"I guess there is no penalty from doing this ridiculous training." She nodded.

"Do you think there is another person that can heal this body beside you?" Alex innocently asked.

She misunderstood this and looked down. "Are you not satisfied with me?"

"No, no. I was just curious. If you didn't want to answer, then alright. I was wondering whether a poison expert could do something like this, so no one would be able to sniff something from my body again like you." Alex sighed.

"In that case, I don't think so. Only doctors can understand your current situation, but not many have Light Element, much less my unique one that can carry one's strength to heal someone. In fact, many are trying to grab me because of this. If not because of my father's prestige, I wouldn't know how my future would end up." Silvia sighed.

"You have your own problem, I guess." Aria realized that Silvia must have undergone a harsh childhood because of her ability.

Silvia smiled and replied. "Not really. I love my family, and that's the end. Wait. Maybe it was because of my father's obsession over someone that he rejected all those marriage offers."

"..." Alex's expression darkened.

After fully restored, Alex and Aria proceeded to their cultivation. Silvia confirmed that they indeed practiced at a faster rate. Although the effect wasn't that apparent, if you continued doing this for

months or even years, you would realize that your cultivation speed increased due to the increase of your limit.

This was really revolutionary, she thought. Silvia couldn't help but smile as if she had a thought about this.

### [Chapter 958 - A Problem And A Plan](#)

Silvia suddenly changed her hairstyle, turning it into a ponytail. She stretched her body as if she wanted to do something.

Alex looked at her and gave a nod as confirmation.

"I am going to train with both of you. It seems it will be the perfect time to increase my strength drastically. I can deal with the side effect myself, so it will be fine. Time to aim to be a God King within a hundred years, I guess." She smirked. "Please take care of me."

Since Alex had no problem, Aria didn't raise any concern as well. No matter how she looked at her, the latter already did many things for her, so there was no way she could reject it unless Alex rejected her because of suspicion.

The training began that day, and the three had their share of fun, knowing how their body worked from Silvia. That way, they might be able to improve something according to her advice.

Like Alex and Aria, Silvia learned how ridiculous Alex's training was. Even she couldn't follow it that easily. Only due to her feeling that she decided to fight for, she persisted in the training.

The training was hard, but she believed she could endure the brutal training for three years. It wasn't like she didn't get anything either.

Alex and Silvia kept exchanging ideas about the improvement of the training menu, and they somehow managed to increase the efficiency of the training by thirty percent. It was a huge leap, and they felt happy about it.

Three weeks passed by, and the peak master seemed to have no mission for them. Unfortunately, the peace couldn't continue any longer when a bird flew toward Aria with a letter on its feet. This bird was slightly bigger, so the letter was also bigger.

She suddenly fell to the ground, dropping the glowing token and the letter.

"Aria?" Alex narrowed his eyes. "What happened?"

"Do you remember there is a chance that my brother will get attacked?"

"Does he..."

"Yeah. When my brother went back to the house, he was ambushed by a group of bandits. According to the letter, the bandit shouldn't be around that area. No, it should be on another continent. The reason why it appeared and attacked him..."

"The woman you saw?" Alex narrowed his eyes. "So, what is his condition right now?"

"He is fine and has contacted my father, but he is trapped inside a Deep Prison Forest. That forest is very dangerous but has abundant resources. He has enough supply to last him for a while, but I don't think he will last long. As soon as he is found by the monsters there, it will be the last for him. And there are still the bandits along with that woman. If they capture him, they will torture him before killing him." She gritted her teeth.

Alex narrowed his eyes. He had talked about this in the past. Due to his identity, he couldn't risk meddling in anyone's problem.

Aria knew it as well, and there was only one way to save him. It was to ask Alex. After all, the enemy this time had a God Rank Expert, so there was no way she could win against him. Meanwhile, there was another option which was the peak master, but it would mean she owed her a favor.

She wouldn't be able to leave the sect that easily with this type of promise, resulting in her abandoning the promise she had with Alex.

Luckily, Aria already informed her brother about this in a roundabout way where he couldn't get any information about Alex. Even so, with the information alone, he understood how he could be saved and immediately gave it to Aria.

Aria kneeled and begged Alex while trying to get his support by throwing the bait. "I beg you to save my brother. I know your principle and the agreement between us. However, there is something you might want from the forest.

"It's a Divine Herb called Eternal Ice Flower. My brother found it when he ran away from the bandits and chose to stay in the cave where it lived. Unfortunately, he couldn't get it because there was a Rank 9 God Beast protecting the flower. He didn't know how long it needed to bloom, but he believed it was soon.

"Rather than thinking about helping me to save my brother, how about considering that you want to get the herb and somehow end up bringing my brother along? Please, I beg you." Her hands were shaking, not knowing whether this was enough or not.

Silvia also wanted to see his decision. She had learned about the agreement, but the relationship between Aria and him was still visible. Due to his principle and heart, Alex must choose one of the answers no matter how hard to choose.

On one hand, there was a chance that they might encounter the bandits and fight them. When that time came, their backing would realize what happened to them. That way, he and Aria would be targeted by them, creating another problem.

On the other hand, the temptation of the Eternal Ice Flower indeed moved his heart, and this one year he experienced with her wasn't wrong.

'Ugh. What should I do? The Eternal Ice Flower will be beneficial for both Alicia and Letizia, but the risk...I can't easily mobilize the N Squad in this world.' Alex thought for a moment.

[You might be overthinking this, Alex. Indeed, if we have enough information about the enemy, we will be able to cover our mess. However, you need to know that we are humans who sometimes think by

our emotions. Besides, if pushes come to shoves, you can simply use the Teleportation Array to avoid fighting.]

'Do you want me to take the risk?'

[I am just offering a solution. Everything will be decided by you.]

Alex clenched his fists and sighed. "I understand. Let's save him."

Aria smiled and immediately thanked him. "Thank you. Really, thank you."

Alex saw this and had a mixed feeling about it. Despite their relationship, Aria was never this shaken, even when she was almost raped. Finding such a woman acted like this would truly shake one's heart.

When Silvia heard his answer, she closed her eyes for a second before saying, "I will join you guys. It's not like I have anything to do here."

Alex furrowed his eyebrows.

"My strength is your assurance. Besides, you don't plan to stay here for a long time, right? We can always use another identity with me here and make the situation as if Aria is the only one rescuing him. Unless their backing had a way to track what they did on another continent, it would be hard to know it was you." Silvia shrugged as if this was something that could easily be resolved.

"You can change my appearance?" Alex asked with a serious expression.

"Yes."

"Do you think I can impersonate someone?"

"Oh?!" Her eyes lit up as if understanding Alex's intention. "Interesting. As long as I know their face, I can copy it."

"I will be using someone from the Grayfig Family to handle the bandits."

"Hey. If you are going to do that, I can hypnotize, you know. This is usually for medical purposes, but this one is special. Using this technique, I can alter a bit of their recent memory to shift the entire situation from you and Aria to this Grayfig Family." She smiled.

Alex heard the plan and hesitated.

Seeing this, Silvia continued. "I am doing this just for getting a point in your heart, not for you owing me a favor. So, you can...No, you must treat this one as me helping my "future" husband, alright?"

"..." Alex fell silent and sighed. "Thank you."

"You're welcome." She smiled. "So, the plan is to shift the blame, right?"

"Yes. Aria will explain more about the Grayfig Family. We need to know whether the people that know about this grudge follow her or stay in this sect..."

"What is her name?" She asked.

Alex didn't know her name, so he looked at Aria. "You go to the peak master and learn her name. This won't be that big enough to owe a favor."

"I understand." She nodded.

"If you are going to do that, make sure to tell me the name. I can ask Navin to kill them mysteriously. His time ability is very useful for this purpose." Silvia nodded.

"Ye-yes." Aria repeatedly thanked her before heading straight to the peak master's mansion.

Alex then turned to Silvia. "Are you sure about it?"

"Of course. Besides, I have gotten the absurd training method that allows one to increase their cultivation speed. Even though it can only be perfect with my ability, I haven't repaid you enough for the information. Though, it's not like I will spread it."

"Thank you." Alex slightly bowed his head.

"Why are you bowing your head? You are the king of Eulja. A king shouldn't bow that easily."

"Acknowledge one's mistake and thank someone for their help. This is something I must do. Even if they are just a normal family, I will still bow my head to thank or apologize."

"Heh?! I don't know whether the previous you had this character, but I do like it." She smiled. "In this bloody universe, a normal family consisting of ordinary people will be slaughtered by the strong if they antagonize them or something. There are even some who are so petty to kill without reason or just because they bump into them. That's why I think your character is likable, and this might be the reason why people voluntarily follow you."

"Did you see her expression earlier? Even if you wanted her to warm the bed tonight, she would gladly give herself to you. I saw that expression every now and then, so I know."

Alex scratched the back of his head, not knowing what to say about this.

"Anyway, I will be preparing to handle the business inside the sect before going there. Make sure you prepare enough Teleportation Array Plates if you don't want her to know about your Space Element. Give me the information later and leave the sect tomorrow. What do you think?"

"Yes. I will be leaving most of the matters to you."

"Sure. I can do practically almost anything in this sect with my special identity anyway, so I am free...Unlike you."

Alex then waved his hand, watching her returning to his bedroom to use the Teleportation Array. However, no one knew that Alex had another reason. He planned to antagonize the Grayfig openly this time, building up their frustration from this early, so when one year later he went to the Sword Pavilion, the Grayfig Family might send their best strength.

It would be the perfect time to camouflage his death and leave this world without any suspicion.

[Chapter 959 - Reasons](#)

Alex looked at how the two girls left him and noticed the letter on the ground.

'Still, why the heck they wrote a letter to a blind girl?' Alex shook his head helplessly and reached out the letter, reading it.

"Master Nyx. When I looked at you with my own eyes, I realized that you were not a normal person. And seeing my daughter's progress truly made me believe that. However, I would like to request your help. I would pay anything for this, and my son gave me the information about his current situation.

"According to him, he is hiding inside a cave with the Eternal Ice Flower in it. There is a Rank 9 God Beast protecting that place, so he couldn't do anything right now. I would like to make a deal with you. Please save my son with the exchange of this flower information. In addition, I will give you anything you want because I know that is not enough. But please, save my son first."

Alex fell silent, realizing that the letter was actually for him. Aria's father knew that Aria couldn't read the letter, so he sent the letter to someone who could read it. He knew that Alex was mysterious and there might be a chance of him saving Adrian, so he directly asked him in this letter.

If not because Aria had learned the Sword Eye, she wouldn't know about the content of this letter.

"Seriously..." Alex scratched the back of his head. "What am I meant to do? This family...Haiz."

Alex burned the letter and sighed while waiting for Aria to come back.

As soon as she returned with the name, Aria immediately reported to Alex.

"Her name is Perone Grata. The Grata Family doesn't seem to be that well-known on the other continent. From what I know, they can't be compared to the Luzear Family. Even so, there were still a few God Rank Experts in that family, so I guess I could understand where her arrogance came from."

Alex furrowed his eyebrows before nodding. "I understand. I will handle the rest. You can go back to your training first."

"When are we leaving?" Aria asked with a worried expression.

"Tomorrow morning. We need to handle a few things first, so not only can we save your brother, we can deal with the entire problem."

"I understand." Although she felt bad about the current decision, she had no other choice. Alex already agreed to this unreasonable request of her, so she could only follow his command.

Suddenly, Alex looked up, finding a bird that flew down and perched on Aria's shoulder.

She traced the bird with her Spiritual Energy and found the letter. Just like before, the family must think that Alex would be the one reading it, but she had learned the Sword Eye.

However, Aria read it herself before looking at Alex. "According to my brother, the situation is pretty good. Although the Eternal Ice Flower is freezing him, he should be able to last for a week before getting frozen."

Her expression told him how happy she was because of the information.

"Yeah, yeah. For now, go back to your training. I will handle the rest." Alex nodded while waving his hands.

"Yes." She nodded with a serious expression.

Alex wanted to ask her for the letter again but hesitated. That was why he changed the question a little bit. "Is the letter directed to me?"

"Ye-yes." She looked down and handed the letter to him. "I just thought that you wouldn't need to handle it because I was afraid that you wouldn't like the tone of my father. He was so desperate."

Alex nodded in understanding and read the letter.

"Adrian's condition is normal right now, albeit the people are searching for him, so he can't go out at the moment. Because of the Ice Energy coming from the Eternal Ice Flower, he might become a frozen statue in seven days. That's why, please help him. I beg you. Even if you want me as your slave, I will do it."

Alex twitched his eyebrows and looked at Aria.

Aria didn't dare to look at him. She knew how bad the letter was, but she presented it in a cheerful way. Little did he know the reason she acted that way was due to his strength.

She believed that as long as Alex made a move, seven days wouldn't be a challenge at all.

Alex sighed and turned around. "I will be preparing myself. For this...You owe me one."

"Y-yes." She repeatedly nodded.

He returned to his room and used the Teleportation Array to go to Silvia.

The latter surprisingly was waiting for him in the very room.

"You have come." She smiled. "Do you have any information regarding the attackers?"

"Yes. Perone Grata from Grata Family. The strength is unknown, but they shouldn't have a Rank 5 God. No, they are far lower than that, so maybe they only have Rank 7 or Rank 8 God as their strongest fighter." Alex speculated.

"I see. That will be easy then. I have contacted Navin for this, and he is checking it right now. Don't worry. I will be dealing with everything inside the sect. I am sure the sect master can understand me." She smiled.

"But there is still a rule, right? Or do you plan to kill them inside the sect?"

"Of course not. I am asking him to hold on for a moment. When we have managed to kill them while leaving one or two people, so they could shift the blame, I will use the information regarding their young miss to make them leave the sect. That's where he will kill them." She explained the plan.

"I see." Alex nodded with a serious expression. "I have another concern. Does she have another family member in this sect?"

"I am not sure. Navin will finish the investigation by today, so we will see. Even so, they wouldn't dare to do anything to me because I am a Rank 5 God and my father is a God King." She shrugged. "Unlike you who can't afford to have your identity known, I am not afraid."

"Thanks."

"No need to say thanks. I am doing it because I want to do it and a part of the payment for the training technique. Besides, I actually want you to save her as her friend. So, all good."

Alex nodded. "Are you really going with us?"

"Yeah. You are not going to chase me out, right?"

"No. You have the right for it." Alex shook his head.

"Good. Then let's go outside. I have gotten the information about the Grayfig Family member here, considering the one who holds the record is this peak's peak master. Since he owes me from curing his wound, I get to know the information about him easily." She pointed at the hole on the ceiling, inviting him to her house.

Alex nodded and followed her to the house.

"Sit on the bed. I am going to prepare the needles and equipment to change your face and hair color. Besides, you need to change your clothes too."

Alex looked at the bed and sat on it, looking at Silvia, who was taking out a few stuff from her Space Ring.

"May I know something?"

"Sure. You don't need to be that formal."

"When did you find that Navin? What happened at that time?" Alex asked.

"Ara." She covered her mouth slyly and teased him. "Jealous?"

"Not at all." Alex shook his head. "You should know that he suddenly attacked me, right? Even though he had a reason, I simply had no idea about that. And it was even worse when I was trying to save a world back then."

"Really? Did he attack you at that time? What happened? I am curious now. How about if I answer you, you tell me the story?"

"Sure."

"Alright. I will go first then." She nodded. "A few years ago, specifically when we were going around with our spaceship, we found a masked man. My Father told me he was an extraordinary person, and I needed to watch out if we met again since that man immediately ran away with his Teleportation Array."

"Wait a minute...You have the Space Element...Don't tell me..." She twitched her eyebrows, never expecting to see the situation was actually like this.

"Yeah. I was the masked man you saw." Alex nodded. "After that, I learned that you were the Palm God and his daughter."

"From Lady Lin Xingzhi?"

"Yes."

"I see." She facepalmed while sighing. "Anyway, after that, we met another person again—chased by a few God Rank Experts. When my father saw that the man was actually a Time Element user, he helped him. I am sure you understand why, right?"

"Father-in-law?" Alex asked.

"Yes. The Time God truly revolutionized the entire universe's view about Time Element. The Time Element users, although scarce, were strong. In my father's perspective, it was worth it to save someone having that power since he would be useful in the future, whether we talked about their power or influence.

"To our surprise, the man actually had no background or whatsoever, so my father asked him to be his disciple, and he accepted. Maybe he wanted to use my father's identity for protection...Either way, there was nothing wrong with that.

"Not long after that meeting, he told us that the universe was on its death door unless they did something to prevent it from destruction. My father couldn't believe that at first, but when he learned that he had met someone with the same appearance as that of a Spirit God, he instantly believed and linked everything to your death and the beast.

"That was why he made the decision for me to wait for you here. Navin was there because he had two purposes. It was to search for someone I believed to be his loved one...Maybe his lover or something that may or may not have reincarnated and helped me recognize you. He said his eyes could differentiate someone unique such as you.

"My father believed that, and here I am." She ended the explanation with a smile.

Alex closed his eyes for a second, swallowing all this information. After two minutes, he nodded and opened his mouth. "Then, this time is my side of the story. You should know there is a Divine World called the Monster World near the Upper World that I used to live in, right?"

"Yes. Unfortunately, neither I and my father could visit that Upper World, leaving my father frustrated."

"That world actually had linked up with the Monster World in the past. My previous life had helped that world once and reduced the world to a mere Upper World from a Divine World."

"What?!" She opened her mouth in surprise. "No, I should say as expected from the Spirit God. Even my father couldn't turn a Divine World into an Upper World."

"I don't know how to do that as well." Alex shrugged. "I am a different person, so..."

"Don't worry. I am interested in you as well because you are peculiar."

"Anyway, the two worlds linked up again, causing a huge Space Disturbance. The only way to stop this was to use the remaining power stored for a long time to create another layer of protection, closed the portal and erased any markings that could be used to trace and link the world.

"And when I was about to enter the place where we could do that, he suddenly appeared and attacked me. I fought a bloody battle that time, even though I almost never got huge injuries during all the fights I had experienced in that Upper World.

"Because he saw the situation turning around to my advantage, he decided to leave that world. And I needed to recover my power on the way, making me very exhausted. Well, I didn't deny that the fight really helped me to advance my power to another level." Alex shrugged.

"That's a nice story." She nodded before placing all the equipment on the table and dragging it toward the bed. She took out her needles and said, "Alright. Time to change your appearance."

### [Chapter 960 - Die!](#)

"Done."

After treating him for two hours, Silvia finally released him and took out a mirror.

He was amazed by his current appearance. Unlike his usual short golden hair, he had long blue hair. His body builds also matched the second young master of the Grayfig Family, Gasha Grayfig.

"This..." Alex touched his face as if he was touching his real skin, so he asked. "Can you explain how this actually works?"

"I altered your bone and flesh with my technique. Of course, this is not perfect. I need to supply the hormone and other things inside your body. You can only impersonate him for a week unless you want to permanently change."

"I see. A week of this world's time, right?"

"Yes."

"Then, it will be fine. I can finish this problem within the time limit." Alex nodded. "I will probably use the Teleportation Array Plate, considering Aria doesn't know about my space element yet."

"Or you can have me act like I am the one creating the array." She smiled.

Alex looked at her for a second before shaking his head. "No. Let's go with the array plate first. I don't really want to open all my cards this soon."

"I understand. I shall follow your decision. Anyway, I will be leaving the sect as Mya before returning to my original appearance."

"Alright. You might not have any more scenes to play." Alex nodded.

"I want to confirm this...You are going to kill everyone that chases him other than one or two people, right?" She asked with a serious expression.

"Yeah."

"Alright then."

As soon as Silvia finished, Alex decided to return first without talking to Aria. He only stayed there to cultivate while thinking about this matter once again to make sure everything went according to the plan.

After finishing their preparation, they gathered in the field.

"Give me the token to know his direction." Alex stretched his hand toward Aria.

Not knowing why he asked for that because they should be flying already, she still handed the token to him, only to find herself surprised by what Alex took out after that.

It was the Teleportation Array. They needed at least a week just to return to the Cypress Family, so the time was quite tight. That was why Aria wasn't satisfied with their judgment.

Alex activated the Teleportation Array without paying attention to her emotion. He only told her, "You should reserve your strength. Did I train your Sword Eye too much to the point you will use that Sword Eye this easily?"

"Ah?!" Aria suddenly realized what she had done in the past few weeks. After knowing that she could see the world for two hours with her full strength, she often took a peek when it wasn't the time for training.

It was normal for her to be curious and wanted to do it, but Alex asked her to suppress that desire because the training menu was perfect. With her using the Sword Eye, it would mess the menu up.

Even so, just like how a person felt like buying something for themselves when they got their first payment, Aria still sneakily took a glimpse, ignoring Alex's advice.

Alex didn't mention it for a long time until he found that Aria had gone too far. Just like how she easily read the letter and other things, he had the need to correct her even if this action looked displeasing.

"Right. You should take care of yourself. In my experience as a doctor, ninety percent of my dying patients actually died because they chose to ignore my advice and decided to have something I forbid. That's why I always make a contract with them that they won't make me accountable if they sneakily do something bad." Silvia added, lecturing Aria.

She could understand Aria's feelings, but this was something that needed to be done.

"I-I understand." She looked down, feeling guilty and sad.

Silvia smiled and patted her head. "Don't worry. You will have your chance after getting my treatment in the future. You will see the whole world without needing the Sword Eye any more, so you need to endure your desire for now."

"I'm sorry."

They talked like this while teleporting. Alex still needed time to activate the Teleportation Array, so they had time to talk like this while teleporting.

Luckily, Alex already grasped enough information about this world, so he could use the Teleportation Array without risking someone finding them on the way.

After around five Teleportation Array, Alex felt there was no need to use it anymore because they only needed around one day of flying to reach the forest.

"The forest is in that direction. Let's go." Alex commanded.

The two girls nodded.

Alex chose to fly for a day to come up with their role-playing. He instructed Aria with whatever she needed to do to shift the blame from her Cypress Family to the Grayfig Family.

Although Silvia could alter one's memory, it would be easier to tweak instead of altering since the person who got his memory tweaked would believe it easier than the latter method.

Aria kept noting every important aspect in her mind.

It took them six hours before they finished their plan.

After that, they didn't talk about anything until they reached a certain area the next day.

It was a huge mountain that pierced the cloud, but Alex found something more amazing inside. Unlike other mountains in his surroundings, this one had powerful ice energy in the center of the mountain.

'Wait a minute. Is this the sign of the Eternal Ice Flower? Now that I think about it, I have never gone on an exploration for godly items, right? If only I use my Spirit Eyes continuously while going around the world, I would surely find something hidden like this, no?' The doubt raised in his heart as he cursed himself from being a fool.

He should have thought and done this since long ago, but the idea just appeared in his mind. If he ignored the past and focused only when the time he had evolved his Spirit Eyes to the highest degree, he would have been searching for treasures since the Upper World.

Alex was completely baffled as to how he couldn't think something this simple. However, he soon noticed something was wrong.

Next to the powerful Divine Energy from the Eternal Ice Flower, Alex found a few dots of energy. There were a total of thirty people inside the mountain.

Alex recognized two of them instantly. The first one was the monster. Due to the difference between humans and monsters, it was easy to spot one.

Luckily, the monster seemed to be far away from the other group, albeit this group was a bad deal.

The second dot he recognized was in that group. After knowing him and remembering the man called Adrian from the exchange inside the Cypress Family, Alex could easily find him among the crowd, but it became a dilemma instead when he found his energy slightly low.

At the same time, the others seemed to be ganging up on him, so the time limit basically disappeared.

"This is not good. The group has entered the cave and made contact with your brother. We need to find the cave entrance and save him. If it's too long, I am afraid they will kill him." Alex warned them.

Silvia wanted to know how he could gather such information, but it was for a later time. Meanwhile, Aria couldn't control her emotion and ask. "Where is the entrance?"

"You shut up! If you can't calm down, I am going to send you away from here!" Alex shouted. "I am not a cold-blooded person, but I know how to act logically! Is this what I have taught you this whole time?"

Aria's body shook, and she gritted her teeth while calming herself down.

Alex and Silvia used their eyes and perception to check the flow of energy, finding the same exact spot. They both pointed in a direction not far from here. "There."

Exchanging looks, they nodded at each other as if agreeing with their direction.

"Let's go!" Alex commanded and led the group, finding the entrance a few seconds later.

They immediately headed inside as fast as possible. After another one minutes, they found the group they were looking for that seemed to be beating someone. There, Alex and Aria recognized one Rank 10 God while Aria opened her eyes and found Adrian in the center of the crowd with wounds covering his body.

"Adrian!" Aria shouted while releasing her Purgatory Sword, so they would leave Adrian.

Seeing this, the Rank 10 God beside them protected the entire group while the rest retreated a few steps back.

Aria instantly appeared next to Adrian and checked his body's condition. She subconsciously checked him with her eyes, leaking the Sword Qi that accidentally brushed their skin, especially Perona's, and this angered her.

"You!" Perona released her killing intent.

'Alex. It seems we need to change our plan.' Silvia raised a doubt with the thought transmission as they appeared not far from Aria to protect her.

Alex could understand her concern. He thought he could eliminate one at a time, so he could simply use his strength to eliminate them. However, it would be a different case if the whole team was here.

'I have a suggestion. I will handle the Rank 10 God while you kill the rest. We will leave the one on the left alive. I can infuse the memory with me being the peak master to confuse that person. Although it has its own risk, I think their backing should know to not meddle with Aria.' Silvia offered a solution.

'And since they need to keep their image or whatsoever, they will shift the blame to the Grayfig Family.' Alex agreed. 'I understand. Please.'

'Sure thing.' She smiled and covered her face with her hand. "To think there is someone who dares to touch my Sword Blossom Peak's Favorite Disciple's brother. This is ridiculous. I have investigated you and your Grata Family, but it seems the Grata Family doesn't put me in their eyes, so I will use this as a warning."

Her face slowly turned into that of Illevis. Her cultivation gradually rose from 5-Star Martial Saint to Rank 5 God because Alex played along by removing the seal at the right timing.

"This..." Only the Rank 10 God could sense the Divine Energy inside her. No one had yet to realize the fact that this woman was actually a Rank 5 God.

Because of that, Perone still maintained her almighty attitude and ignored everything. She didn't even hear Silvia's words.

"I am going to kill you!" She shouted while releasing a Sword Wave, never bothered herself to check Aria's current cultivation stage. Her hate for Aria over something petty was already too much, so she thought she should kill the little brother on her arm first so Aria would fall into despair.

"Young—" The Rank 10 God couldn't react when he realized Silvia's Divine Energy was locked onto him.

The veins were bulging on her forehead after seeing Adrian's state. She couldn't stand seeing Adrian's current state. It was horrible.

"Adrian...I am sorry for leaving you this whole time. Just take your time and relax. Your sister will deal with the problem first." She gently smiled while stroking his head.

"Sister..." Adrian raised his finger, trying to warn her about the Sword Wave.

Aria only smiled at him, telling him everything would be alright.

When the Sword Wave was about to hit her, Aria turned her head toward the Sword Wave and obliterated it as if it was cut by a sword.

"Wha—" The woman was obviously shocked. She couldn't see what Aria just did to destroy her attack.

However, the latter gradually rose from the ground, opening her eyes completely at this moment. It sent a powerful shock wave to the surroundings as if there were numerous swords piercing their body.

All the people, including the Rank 10 God, stood still. The hair on their hands was standing while their body was shaking, especially when they saw Aria opening her eyes.

"All of you are going to die."

Upon that world, immeasurable killing intent filled the cave.
