

Gary Stu 528

Chapter 528

Due to her health. Genevieve remained in Darlan for a week before returning to Chanaca.

The first thing she did on arriving was to go to the hospital.

John was admitted into the VIP ward. She was still in a coma, but her abdomen was gradually growing in size.

After Genevieve came out of the ward, Timothy whispered to her, "In the past month, many neurosurgeons have visited Jojo, and their diagnosis is basically the same as mine."

There was the possibility that Johanna would remain a vegetable for the rest of her life.

He had discussed with several doctors about removing the child from Johanna's womb as he did not want her to suffer so much.

A doctor had said that a hospital in Baykccp had once treated a patient who had been in the same situation as Johanna

That patient had just conceived before suffering a fall and becoming a vegetable. With the family's permission, they aborted the baby. However, the next day, the patient's heart stopped beating

Timothy knew that the chances of that happening were low but did not dare to take the risk. He was afraid of losing both Johanna and the baby.

What really irked him was that the perpetrator was still at large.
