

Genius 4341

Medical Genius Unspeakable Marriage Chapter 4341

Only after Professor Qin had prepared the apparatus did he turn around.

However, when he saw Lin Mo's calm expression, he felt surprised.

"Aren't you afraid?"

Lin Mo twisted his head and asked indifferently in return, "Should I be afraid?"

"Hahahaha!"

Professor Qin didn't reply and suddenly burst into laughter.

"Interesting!"

"I've taken over so many experimental subjects, and you're the most interesting one."

With that he flicked the syringe in his hand.

"Don't worry, my experiments have reached a mature stage."

"Once it succeeds, not only will you be no threat, but you will even gain unparalleled abilities."

"Well? Heartwarming?"

Just as he was about to stick the needle, Lin Mo suddenly said.

"Wait a minute!"

"I want to know, what exactly am I up against?"

"If the experiment fails, I'll at least know how I'm going to die!"

When Professor Qin heard this, he was visibly flabbergasted.

He had seen those who begged bitterly, had seen those who cursed and had spoken dangerously.

But this was the first time he had encountered such a calm experimental subject as the one in front of him.

"It doesn't matter if I talk to you!"

Perhaps it was also the first time he had seen such an alien experimental subject as Lin Mo, and Professor Qin generously explained.

"Later, I will first put you under anesthesia!"

"And then the results of our experiments will be put all the way into your body."

"But you don't have to worry, my experiments are so mature that you have at least a sixty percent chance of surviving."

“And break through the limits, leaving you completely transformed!”

Lin Mo frowned and continued to ask, “What is your research results again?”

At the mention of this, Professor Qin’s face instantly turned proud.

“It’s an epoch-making achievement!”

“Once it succeeds, there will no longer be any hindrance to our patriarch.”

“When that happens, everyone will be a Patriarch!”

He said as a maniacal look slowly emerged in his eyes.

“Young man, you are very lucky.”

“You will also be one of the participants in this epoch-making creation once our experiment is successful.”

The hot gaze had impatience written all over it.

Only Lin Mo had a disdainful look on his face.

The reason why a Grandmaster was a Grandmaster was because of the sublimation of a martial artist after he had reached a certain level of enlightenment of the martial dao.

To reach this realm, not only natural talent and enlightenment, but also chance were important factors that could not be acquired.

It is a fool’s dream to rely on technology alone to make a person break through to the rank of Grandmaster.

At this moment, Professor Qin is also becoming more and more insane as he speaks.

“Young man, I see you very well!”

“Today I’ll make an exception and let you see this epoch-making product.”

With that, Elder Qin turned around in a hurry.

When he came back again, there was an additional code box in his hand.

After a dazzling manipulation, a white cold gas emerged from the box.

Lin Mo’s face instantly changed after he turned his gaze and saw the items contained inside.

Wasn’t this the same plague seed that Clegg had shown him earlier?

Lin Mo hadn’t thought that he had gone to all the trouble of infiltrating District 9 with the aim of finding out this synthesis

Unexpectedly, the thing he had gone to such great lengths to find out.

Surprisingly, it was delivered to him by coincidence.

"Is this the result of your research?" Lin Mo asked with some uncertainty.

This all seemed to have come too smoothly.

"That's not true!"

Professor Qin looked excited as he put the plague seeds inside the coded box.

"This object is the result of the decades we have spent, as well as an epoch-making creation."

"As long as this experiment is successful, I will be famous for a thousand years!"

As he spoke, he had already raised the plague seed high above his head.

The look of searing devotion was close to madness.

It was as if he was holding his own god

Medical Genius Unspeakable Marriage Chapter 4342

Lin Mo looked at the professor surnamed Qin in front of him and was already powerless to spit in his heart.

Such a person, to put it bluntly, had actually gone mad.

Of course this person's state was not of concern to Lin Mo.

What he was most concerned about at the moment was finding out the root cause of this plague seed and destroying it completely.

Gradually, Professor Qin also regained his wits and slowly calmed down.

"I can't wait to witness this moment come."

"Later, I'll inject you with anesthetic and then transplant this plague seed into your body!"

"Today is destined to be shortened to a historic moment!"

With that he once again picked up the syringe that was set aside.

Just as he was about to do it, Lin Mo frowned and suddenly opened his mouth to ask.

"Have you ever killed anyone?"

Professor Qin was visibly flabbergasted in the face of this cold question.

Only he quickly reacted to it as well.

"Young man, you mean the man who died on this test bench!"

"That's not killing people, they're making a great sacrifice for this epoch-making feat!"

"History will remember their sacrifice!"

Lin Mo felt speechless at this kind of paranoid thinking.

“Then have you asked them for their opinions? Are they willing to do so.”

It was not difficult to tell from one’s own personal experience.

Those who came here were definitely tricked into coming.

In the end, they were forcibly controlled by them, desperate to be used as living experiments.

Professor Qin’s eyes narrowed, “Oh, they just can’t understand the feat they’re facing.”

“And we were only there to push them!”

“By the time future generations write their names on the engraved monuments of history, they will know to thank us.”

What a guy!

Clearly baiting and forcing!

Yet this Qin can make it sound so good.

By this moment, Lin Mo also knew that there was no way to communicate normally with such a madman.

Right now, it was better to pull out the information as soon as possible.

“Wait a minute!”

“If I were to be transplanted with this forehead, this transgenerational product, there is an antidote if it produces side effects!”

Lin Mo asked, forcing himself to hold back his nausea in order to latch on to the method of dealing with Clegg.

However this statement was made.

Professor Qin’s face instantly turned gloomy.

“Side effects?”

He rebuked angrily.

“You bullshit!”

“How can there be side effects to this product that spans the ages!”

“He’s perfect! There can’t be any flaws!”

Lin Mo: “.....”

It’s no fun to deceive yourself like that!

It’s not like I haven’t seen it before!

That Clegg is the best proof of that.

Perhaps this plague seed can really make one breakthrough to the level of a Patriarch.

But it is one that reduces one to a complete and utter virus bomb.

Once this item is produced in bulk.

It will be a disaster for the whole world.

“Professor Qin you are wrong!”

Lin Mo suppressed his emotions and said as nicely as he could.

“Tianyan Sijiu!”

“In this world, there can be nothing that is perfect!”

“You scientific researchers wouldn’t even know this, would you!”

“If he’s really perfect, why don’t you guys use your own experiments!”

From the exchange just down.

Lin Mo then realized that this Professor Qin looked like a bully.

In reality, he was a paranoid madman.

And when Lin Mo said this.

Professor Qin was also a little turned around for a while.

Subconsciously, he felt that there was nothing wrong with what Lin Mo said.

But from a subjective will, he also felt that there could be no flaws in what he had been studying for decades.

When Lin Mo took a look at his appearance, he instantly felt that there was a game.

He then hurriedly added.

“Even if this object is perfect, given the rigour of the research.”

“There is still a need to keep a backstop just in case, isn’t there?”

Said Lin Mo and gave a look of contempt.

Medical Genius Unspeakable Marriage Chapter 4343

Professor Qin only felt that his profession had been hit by a 10,000-point blast as Lin Mo looked on with contempt.

At this moment, he couldn’t help but hesitate.

Since the moment he stepped into this line of work, his leader had just been strong to the point of rigour.

Now it was mentioned again by Lin Mo.

Professor Qin could not help but blush.

Only he didn't lower his head, instead he raised his lower high and said stubbornly.

"How could there be none!"

"We were ready before the experiment began."

Lin Mo raised an eyebrow, his face full of contempt.

"Oh? Then go ahead and take it out and get it ready!"

"If something happens during the dying experiment, I'll have to rely on this antidote to save my life!"

"If I'm not mistaken, I'm the last of the experimental subjects."

Along the way, this group's conversation had long been memorized by Lin Mo.

At this moment, when it was mentioned, Professor Qin also snapped to attention.

Indeed!

Although he was confident that the transplant would be successful, it must not be 100%.

If something were to happen to this last subject.

It would take a lot of time for them to find a new batch of suitable subjects.

On top of that, the people up there were already in a hurry.

Thinking about some of this, Qin taught instantly that Lin Mo's words did make sense.

"I'll go get the antidote now!"

After saying this, Professor Qin flung his large arm and hurriedly left the laboratory.

Lin Mo had thought that this madman could be fooled, but he hadn't thought that he could be fooled so well.

Of course this was a good thing.

If there was an antidote, there would naturally be a bottom for that Clegg.

Pity.

Lin Mo was thinking good thoughts.

Reality was cruel.

Professor Qin, who had strided away, had no antidote at all.

Everything was just his stubbornness to save face.

At the moment, in his haste, he had rushed to the main office of the laboratory below.

As soon as he pushed the door open, he yelled out.

“Hurry up and get all the project team leaders over here.”

At these words, everyone in the office area first froze for a moment.

After seeing that the person who came was Professor Qin.

Immediately, the people there started to carry out his orders like crazy.

They were afraid that if they were a step late, they would be dragged away by the general advisor of the project to do experiments.

In a short while, the sound of the Secret Technique’s footsteps approached towards the office area.

The directors of the various laboratories were arriving

.....

The sudden movement of people has naturally attracted the attention of others as well.

“What’s going on, is something big happening over there?”

Master Dou, who was about to leave, asked curiously at the sight.

“I’m not sure!”

The security guard on the side spoke up.

“But it seems that they heard that there was some urgent matter on Professor Qin’s side and summoned all the lab directors there in a hurry.”

As soon as Master Dou heard that it was Professor Qin, he had no desire to inquire.

This old guy, he was stirring all day long.

Everyone was used to it.

“I know!”

Master Dou nodded calmly and gave one more explanation before leaving.

“You guys line up the security aspect carefully again.”

“Right now it has reached a critical stage, if anything goes wrong, be careful of your dog’s life.”

The security guard replied with a nod and a wink while paying a smile.

“Don’t worry, Master Dou, we brothers are all in full spirits!”

Master Dou snorted coldly before he walked into the lift.

And when the lift door closed.

The security guard who was still smiling and welcoming instantly changed his face.

“Bah, a field agent, occupying a bit of connections, what a big tail he is pretending to be!”

“What the hell!”

And as he spat, echoing voices rang out beside him.

“You’re right!”

“This one really isn’t any good!”

Seeing someone echoing the sentiment, the security guard nodded his head repeatedly.

Only when he was about to say something back, his face suddenly that changed.

“What are you?”

Medical Genius Unspeakable Marriage Chapter 4344

Lin Mo had just left the laboratory on Professor Qin’s first foot when he stalked out on his second.

Originally, he had also seen the figure of Master Dou and wanted to come at all to check out the situation.

To the point that he hadn’t expected the rain to be so much to go for a scene.

The security guard looked at the unfamiliar face in front of him and immediately raised the pistol on his waist.

The black hole of the gun was pointed dead on at the incoming person.

“You don’t know me?” Lin Mo asked rhetorically, sinking his face.

The security guard was instantly unsure of himself by the other party’s underhanded rhetorical question.

“Which department are you from?”

“Do you know Professor Qin?”

As soon as Lin Mo finished speaking, this security captain nodded his head repeatedly with a frightened look on his face.

Professor Qin’s infamy was something that the entire lab had heard like thunder.

As the top leader of the entire laboratory underneath, although Professor Qin usually focused on his own experiments and did not care much about things.

However, once someone offended him.

Basically, he was sent to the test bench.

Up to now, no one has ever come off his test bench alive.

Thinking of this, the security chief's expression changed and a smile instantly appeared on his face.

"Little brother, you have a relationship with that Professor Qin?"

"That's right!" Lin Mo nodded in an undeniable manner.

As soon as the security captain heard that, the smile on his face instantly became even more flattering.

At this moment, he only felt that he had hugged a big leg.

He had to know that although Professor Qin was not an elder, his status was better than that of an elder.

Even the great elders within the Church were polite when they saw him.

"Greetings, my lord!"

He said, rubbing his hands together nervously.

"I wonder what your lordship's relationship is with Professor Qin?"

Only when the relationship was confirmed would he know with what intensity to climb.

Lin Mo smiled faintly.

"I am the experimental subject that was captured. If I were to say a relationship, it would be that of being experimented on!"

"Oh, so that's how it is, I didn't expect that Your Excellency and Professor Qin would have such a deep relationship"

The security captain was halfway through his lick when he suddenly realised something was wrong.

No wonder he felt that Lin Mo looked a little familiar.

It turned out that he had just met up with the tied up Lin Mo on his way to patrol.

"Don't you dare fool me, I'll fucking"

Just as he was cursing over and over again, he was ready to start robbing.

Suddenly he felt a stiffness in his body.

It was as if he had been casted with a stasis spell, unable to move at all.

As for the gun in his hand, it had already appeared in Lin Mo's hand.

"Now you answer whatever I ask."

"If you dare to do anything else, I will send you straight to your death, do you understand?"

The security captain felt the cold robbing mouth on his temple and was already scared out of his wits.

Even though he knew that the Lin Mo in front of him was coming from a bad place.

But with his small life at stake.

At this moment, that he dared to refuse.

Frantically, he blinked his eyes in agreement.

“Very well!”

“Now I ask you, where is the plague seed stored in your lab?”

As the words fell, Lin Mo pointed a finger at the neck of the security captain.

The security captain was relieved of his mute point and did not dare to hesitate in the slightest as he hurriedly replied.

“In laboratory number six, all their plague seeds are stored over there!”

“But it’s very heavily guarded over there, almost all the security personnel are over there.”

“In the event of an accident, they’ll be the first to contact the elders!”

When Lin Mo heard this, he couldn’t help but frown.

“You can still contact the elders outside here?”

The security captain couldn’t help but tremble when he saw Lin Mo’s ice-cold gaze.

It was as if his mind had been seen through when he had originally been a little thoughtful.

He didn’t dare to hide the slightest bit and spoke straightforwardly.

“Each of our captains has a special summoning talisman on them.”

“In the event of an accident, we will contact the elders at the first opportunity.”

This made it difficult for Lin Mo

Medical Genius Unspeakable Marriage Chapter 4345

After Lin Mo learned that all the security captains in this place could directly contact the elders of the Five Poisons Sect.

Then he gave up his previous plan to secretly destroy the other side’s plague seeds.

The best solution right now was to directly destroy this underground laboratory.

However, at the moment, Lin Mo could not be sure if all the Five Poison Sect’s plague seeds were here.

If, like Clegg, someone outside still had it, there would be a big problem.

After pondering for a while, Lin Mo finally decided to start with the professor surnamed Qin.

At this moment, the security captain who was under his control asked nervously.

“My lord, I’ve already told you everything I know!”

“Can you spare me?”

Lin Mo turned his gaze and did not answer directly, but only asked quietly and rhetorically.

“Have you ever killed those innocent people?”

For a moment the security captain was directly dumbfounded by the question that caught him off guard.

Who didn’t have a few lives in their hands in the Five Poisons Sect now!

“My lord, I didn’t mean to”

Not waiting for him to finish, Lin Mo raised his hand and patted his shoulder.

“It’s alright, just know your mistakes and be able to change, be a good person in your next life!”

The security captain suddenly let out a sigh of relief when he heard the first half of the sentence.

However, when he heard the second half of the sentence, his face instantly changed when he reacted.

“I’ll fuck you!”

Just as he was about to shout for someone to come and kill him.

A biting sword aura rose violently beneath his feet.

There was not a single scream or any pain.

The security captain simply disappeared from this place.

The only smell of blood left behind also quickly dissipated in the strong smell of formalin.

Lin Mo clapped his hands together and frowned as he watched the warehouse the man had pointed to.

After much hesitation, he chose to quietly return to the previous laboratory

.....

The other side.

At this moment, Professor Qin was full of anger as he raged at the several lab directors in front of him.

“A bunch of trash, what use do I have for you?”

“Can’t even handle such a small matter!”

“Even if I were to raise a pig, I would be a hundred times better than you all!”

“I don’t care, if I don’t receive satisfactory results by five o’clock this afternoon, everyone rolls up and leaves.”

The directors of the labs at the bottom were naturally full of discontent at this moment, but none of them spoke back.

After all, those who had the guts to do so had already been sent to the experiment bench.

After a furious rebuke, Professor Qin then heaved the door shut.

Only then did the few directors present dare to whisper their discussions.

This super virus that had brought together a group of senior professors to research for more than ten years.

But to research an antidote in this short period of time was simply impossible.

“Isn’t this a clear case of making things difficult for us?”

“This super virus itself is modifying a person’s genetic sequence, and once it is activated, the whole process is simply irreversible.”

“Right, it would be better for us to research an antidote to this reversal than to just kill me!”

“The project is about to reach its end, and this is a good reason to suddenly do this whole thing again.”

“There’s nothing better to do than to eat!”

“I think it would be better to just call off the project and let everyone go back to their own homes!”

With these words.

One of the lab directors beside him suddenly had a bright gaze.

“Wait, I’ve got an idea!”

The man who spoke with him slapped his thigh.

Several other colleagues around him also hurriedly gathered around and asked questions.

“Didn’t Professor Qin say that earlier?”

“He was thinking of researching a corresponding antidote in order to prevent accidents during the experiment.”

“But we all thought in the wrong direction and kept obsessing about how to reverse this gene sequence change.”

“In fact, we just need to be able to develop an agent that directly blocks the contact between the super virus and the genes won’t that be enough

Medical Genius Unspeakable Marriage Chapter 4346

In the midst of a torrent of explanations.

The few lab directors present were not stupid and understood instantly.

“Yeah, why didn’t I think of that!”

“This method can be done, and it’s not too difficult!”

“Viruses are born out of our hands, it’s not too easy to research blocking agents.”

Three words later, everyone hurriedly knocked on the door of Professor Qin’s office

.....

The conversation was split into two.

Inside the central laboratory.

After a brief exploration of the entire underground laboratory, Lin Mo’s determination to destroy this place was strengthened.

During his exploration, he met several ordinary people who had become inhuman because of the experiments.

He also saw many bodies that had been dismembered for research.

But looking at their grim faces in pain, it was possible to guess how much these people had been tortured before their bodies.

Right not to alarm the snake, Lin Mo finally suppressed the anger in his heart and

He then returned to the central laboratory at the first opportunity.

He then retied the rope that bound him.

At the same time, the plan to destroy the laboratory underneath was already being worked out in his mind.

Before that, of course, he still needed to get the antidote from Professor Qin.

After waiting for several hours.

The door to the lab finally opened again.

The sound arrived before the person was seen.

Professor Qin didn’t even enter the door before he was seen shouting with gusto.

“I have fetched the antidote!”

“Next we can finally test it in peace!”

Just as he entered he shook the three dark green potions in his hand in triumph.

This was the result of an afternoon’s work by all the people in the laboratory.

After a few security personnel had been brought in to experiment, they were indeed extremely effective.

If Mr. Chu had an accident during the transplantation process, just one injection would completely suppress the plague seed.

The experimental body was protected to the greatest extent.

After Professor Qin finished showing off, he placed the three potions, on top of the shelf.

At this moment, he did not even notice that Lin Mo was already glowing with a fierce light.

He was still there mumbling with anticipation.

“This moment is finally coming!”

“The old man’s dream of fame for a thousand years is finally coming true.”

“When the time comes, everyone in the world will honour me as a god!”

Today, it was no longer possible to conceal the excitement that filled his heart from his mouth alone.

“Are you ready, lad?”

“The doors of the new century will be pushed open by us!”

After Professor Qin finished speaking with his eyes full of searing enthusiasm, he raised his hand and stabbed the syringe straight down.

It was also at this moment that his excited smile suddenly froze.

The syringe needle, which was originally incredibly sharp, suddenly bent the moment it touched Lin Mo’s skin.

It was as if it had been stuck halfway into a steel plate.

“How is that possible?”

Professor Qin did not react for a moment and just stared blankly at the bent needle.

It was also at this moment that Lin Mo’s cold voice rang out in his ears.

“There is nothing impossible!”

Professor Qin looked up in the raw direction.

He only saw that Lin Mo, who had originally been comfortably on the experimental table, had completely broken free from his restraints.

Professor Qin’s heart was astonished.

“You you actually broke free of the rope, how did you do it?”

“It’s not as if you have hands!”

Lin Mo said and began to move his wrists.

Originally, he thought that this Professor Qin would go and return.

Who would have thought that the antidote would take all afternoon.

He caused himself to lie down for a whole afternoon.

With the benefit of hindsight, Professor Qin's brows twisted slightly.

"You're not an experimental subject!"

"Say, what are you down on the ground?"

The average experimental body can be the one that achieves an expedition over.

It was by no means possible to possess the ability of Lin Mo.

Lin Mo smiled faintly and raised his hand to wipe.

The disguise fixed on his face instantly dissipated, revealing his true face.

"Get reacquainted, my humble self Lin Mo"

Medical Genius Unspeakable Marriage Chapter 4347

Lin Mo had thought about reporting his true identity afterwards.

This Professor Qin might be shocked, might be alarmed.

But what he had never expected was that at this moment, he had a puzzled look on his face.

"Lin Mo? Which side of the power did you send over?"

Lin Mo: "....."

Feeling so dumb!

"You haven't never heard of me, have you?"

Professor Qin nodded with a serious look on his face.

"No! You're famous!"

Lin Mo felt even more dumbfounded.

It didn't make sense!

He had first killed two of their Five Poison Sect's sect masters.

After that, he had exterminated all the branches of their Five Poison Sect in District 8.

Such a great revenge, and there was still someone who didn't know him!

"Then have you ever heard of the Seven Deadly Sins?"

"This I know!"

Professor Qin frowned, "You are a member of the Seven Deadly Sins?"

He said and suddenly tensed up.

The research project at hand was the highest secret of the Five Poisons Sect.

It was the most critical period at the moment.

If the Seven Deadly Sins were to find out about it, it is likely that all the efforts would be lost.

It was a good thing that Lin Mo shook his head.

“You’re thinking too much!”

“I’m just making sure that you’re not completely isolated from the world.”

He hadn’t anticipated that this Qin surname was so closed off from information.

However, once he thought that their main duty was to be in charge of experiments, Lin Mo figured out quite a bit.

In this line of work, it was true that one did not need to know too much external information.

Thinking of this, Lin Mo clapped his hands and said.

“I’ve told you everything you’ve asked.”

“Now you need to answer my questions?”

Professor Qin looked stunned and asked with some disdain, “Who am I to tell you!”

This young man in front of him, entering this place in disguise, his purpose was already self-explanatory.

Although he was good at fooling people, he was not stupid either.

How could he possibly cooperate!

“Wait!”

Professor Qin’s face changed violently.

At this moment she snapped to attention.

If Lin Mo had entered this place in disguise, wouldn’t his own suitable experimental body have disappeared?

She had worked so hard to prepare for so long, all for nothing?

One must know that in order to find these suitable experimental subjects, this Five Poison Sect did not know how much effort they had wasted.

And in order not to be discovered, they had spent a lot of manpower and resources to secretly trick these experimental subjects over.

If they wanted to collect them again, they would have to spend a lot of manpower and resources.

You know, this laboratory underneath is a burnt gold cave.

Every day of delay is a day that requires the burning of vast amounts of resources.

“Where are my experimental bodies?”

Professor Qin questioned with red eyes.

“Do you still need to ask? Naturally, they were all clicked by me!”

Lin Mo explained with a cloudy face.

Of course in reality, he had only given that transport team, one of them, a shot to put them to sleep for a few days.

He wasn't so heartless that he would kill anyone.

However as soon as Professor Qin heard this reply, he instantly stormed up.

“Bastard!”

“How dare you kill them!”

“You're dead, you're dead!”

He muttered this as he made his way to the gate.

“You spoiled my feat and I want you to die for good.”

The words fell to the ground and he raised his hand and slapped the red button on the side.

This was the alarm that every lab was equipped with.

Once tapped, the security personnel of the entire laboratory underneath, would arrive at the first opportunity.

The Five Poison Sect, the headquarters will also arrive at the first opportunity.

At that time, it would be Lin Mo's time to die.

Just as Professor Qin's side imagined it.

But there was not the slightest movement around him.

Snap, snap, snap!

Professor Qin thought the machinery had malfunctioned and tapped several more times anxiously.

Only that no matter how much he tried, there was no longer any response from anyone.

“You tampered with it?”

Professor Qin raised his head and glared viciously at Lin Mo, his gaze seemingly intent on killing.

“Or else what!”

Lin Mo shrugged his shoulders and turned sideways to take the antidote off the shelf.

Medical Genius Unspeakable Marriage Chapter 4348

Professor Qin watched as the alarm was broken and twisted his head to rush towards the gate.

Intending to summon the surrounding security personnel over.

When the time came, this damned kid would still not escape death.

Only when his palm pressed the fingerprint lock, the mechanical door unexpectedly lost its response as well.

“How is this possible?”

With a face full of disbelief, he quirked his cheek.

Only to see that at this moment, Lin Mo was holding up a large bundle of wires in his hand with flames splattered all over.

Obviously, one of them was connected to this mechanical gate.

Seeing this scene, Professor Qin’s furious emotions snapped back down.

Both the gate and the alarm had been destroyed.

The soundproofing in this laboratory was again top-notch.

Even if yes were to start a robbery inside, no movement could be heard outside.

This was originally designed to provide absolute quiet environment facilities for the experimenters.

Now it has completely trapped Professor Qin.

Faced with such a predicament, Professor Qin could not help but panic.

“You

“What the hell do you want?”

As he watched Lin Mo take a step towards him, his expression suddenly became even more tense.

He had been engaged in research for so many years.

He had always been high up in the air.

This was the first time he had encountered this kind of danger at the moment.

For a moment, the square was in disarray.

“Don’t you like to study?”

Lin Mo said in a cold voice.

“If you think the research you’re doing is great, why don’t you use your own experiments?”

He said it all over again as he came to Professor Qin’s heels.

“Isn’t it the greatest thing to give yourself for the cause you love?”

Now that the antidote to the plague was in hand, there was no need for the underground laboratory to exist.

Of course, if it weren't for the fact that the man named Qin still had some value, Lin Mo wouldn't have let him live until now.

But what surprised Lin Mo was that after being threatened, Professor Qin did not feel the slightest bit of fear.

On the contrary, Lin Mo actually saw a look of hesitation in his eyes.

So this guy really had the intention of putting himself on the test bench.

After a short while, Professor Qin's expression gradually became firm.

"You're right!"

"Research experiments are what I'm most interested in and what I'm best at."

"If I could use myself as an experimental subject, what other researcher in the world would be able to match me once I succeeded."

He was halfway through talking to himself before he suddenly stopped.

In his hot eyes, it was as if he had an infinite longing for this matter.

This scene really startled Lin Mo as well.

How could there be such a madman under the sky?

At first, Lin Mo still maintained this skeptical attitude.

He thought that the man surnamed Qin was afraid of death and had deliberately set up a blindfold to confuse himself.

However, what one did not expect was that after this Professor Qin finished speaking.

Surprisingly, he directly began to take off his isolation suit by himself.

The mask, goggles and everything else were also retreated by him one by one.

With that, the real face of Professor Qin appeared.

A hunched body and an old face.

A little old man in vivid form.

The deep folds on his face could have caught flies.

With all the protective apparatus taken off, Professor Qin solemnly walked to the mirror.

After combing through the few strands of his thinning, white hair, he then straightened his coat.

Having done this before, he then took out an old camera.

Under Lin Mo's dismayed gaze, he earnestly left a selfie.

"Very nice, it won't be long before this photo appears on the memorial wall of the World Institute."

He muttered a word to himself before lying down directly on the test bench he was on.

After some clumsy manipulation, he found that it did not bind him.

So then Professor Qin turned his head and looked over.

"Lin Mo, right?"

"Come and do the old man a favour"

Medical Genius Unspeakable Marriage Chapter 4349

Zone 9, laboratory underneath.

Lin Mo looked at the old man in front of him who had half of his feet in the coffin.

For a moment, he didn't even know what to say.

"Are you really going to let me do it?"

Lin Mo looked at the plague seed in front of him and asked with some confusion.

"As far as I know, there are still many researchers in the lab underneath this one."

"They're the professionals!"

Elder Qin grinned and shook his head.

"There's no need for that, the operation is simple."

"All you need to do is sedate me, then scratch my chest and put in this latest generation of plague seeds."

"Besides, if I were to actually asked the other researchers to come and help."

"Would you agree?"

At these words, a smile appeared on Lin Mo's face as well.

It turned out that this old man had been smart from start to finish.

The reason why he had been fooled again and again was entirely because of the crazy obsession in his heart.

This is a very pure man.

This couldn't help but remind Lin Mo of Hu Quan from District Three.

Although these two had different things in mind, that purity was extremely similar.

A purity of heart without distractions for a single goal.

“Professor Qin, how many people have you killed?”

When Lin Mo subconsciously asked this question, his heart inexplicably had more anticipation together.

He always had respect for such people.

As long as Professor Qin shook his head and denied that he had killed anyone.

Lin Mo might not really be able to lay a hand on him.

Only Professor Qin replied bluntly.

“Can’t remember anymore!”

“I’ve been researching for so many years, and the number of people who have died on this test bed must be several hundred, if not over a thousand.”

He could not see a trace of guilt in his face before mentioning this.

On the contrary there was a small hint of smugness.

It was as if it was a great honour for those who died on his laboratory bench.

Lin Mo saw this and shook.

After all, he had thought too much.

This old man had been pure to the point of paranoia, pure to the point of madness.

There was no longer any humanity left in order to complete the experiment he had on his hands.

It’s hopeless!

Lin Mo sighed faintly.

Before he laid his hands on him, he asked one more question.

“How much of this plague seed of yours has flowed out of the laboratory?”

Before destroying this place, Lin Mo still had many questions that he needed to understand clearly.

However, as soon as Professor Qin heard this question, he directly shook his head.

“Right now all the plague seeds are still in the research stage, how could they possibly flow out to the outside world before they mature?”

“All the plague seeds are used, and the transfer is only possible after the group has personally gone through and signed for it.”

“This I can guarantee, it is impossible for the plague seeds to flow out to the outside world!”

Getting this answer Lin Mo couldn’t help but frown.

The plague seed in Clegg’s hand was something that he had seen with his own eyes.

If he said that it hadn't flowed out to the outside world, how could Lin Mo believe it.

However, when he thought about it, there was no need for the man named Qin to lie to himself about such a matter.

Could it be that there was more than one laboratory underneath this one?

When Lin Mo raised the doubts in his mind, he still received a negative answer.

"Such a laboratory would have emptied almost all the resources of the eighth district."

"How can we have the energy and cost to build another one?"

Lin Mo saw the sincerity of his attitude and did not test the waters.

It was straightforward to tell Clegg about it.

"What?"

For a moment, Professor Qin snapped into excitement.

"Someone has already succeeded in transplanting and has broken through to Zong Shi?"

"No out, I even fought with it before."

Lin Mo answered back truthfully.

"That person's strength is much worse than that of a Patriarch though."

"But his viral poisonous aura all over his body is terrifying."

"Once it's not handled properly, it's likely that the entire Death Island will be buried with it!"

Professor Qin listened to Lin Mo while shaking his head in confusion.

Medical Genius Unspeakable Marriage Chapter 4350

"This is absolutely impossible!"

Professor Qin said with confidence.

"The principle of this plague seed is to stimulate the human genetic sequence to be altered."

"Thus achieving the effect of breaking through the limits."

Professor Qin looked incredibly confident after he finished speaking with confidence.

And that fierce look also caused Lin Mo to be filled with doubts.

Clegg's condition was something Lin Mo had seen with his own eyes, and had also seen the plague seeds left in Clegg's hands.

"I think, if I'm not wrong, there might be a betrayer under your hands."

If Professor Qin hadn't lied.

That was the only possibility.

Someone in the lab had secretly given the plague seed to someone outside the lab without Professor Qin's knowledge.

On this point, Professor Qin did not refute it again.

The symptoms that Lin Mo complained of were indeed the state of the plague seed transplant.

And it was also the third generation of the plague seed that was the most riotous of all their research results.

Of course, Professor Qin did not have any complaints about this.

On the contrary there was some small excitement.

Since all three generations of the plague species had a precedent for success.

Then the possibility of success for this latest sixth-generation plague seed in his hands was also infinitely magnified.

The only thing that made him dissatisfied was that this third generation plague seed was the strongest though.

But there were also many drawbacks.

Not only will there be a backlash in the eyes, but it is more likely to shock the mind.

Time abnormally, a transformer transplanted with three generations of plague seeds will become a machine that only knows how to kill.

For the latter point, he, Professor Qin, was the only one in the entire underground laboratory who knew.

In that case, that Clegg, even if he succeeded, could only be considered a defective product that

"Come on, quick, help me finish the transplant."

"Old man, be that first!"

In the eyes of this old man surnamed Qin.

The danger of Clegg was simply irrelevant.

Dead or not, this old man didn't even care about it.

All he had in his eyes was this plague seed!

Lin Mo frowned, knowing that this Professor Qin was completely bewitched.

"One last question!"

"If you have this antidote, can you dispose of that Clegg."

Professor Qin froze for a moment, then shook his head.

"I'm not sure!"

"This antidote is merely something I've temporarily ordered to be researched."

"His effect is to isolate the plague species from genetic changes in the human body."

"As for how effective it can be on those who have already been transformed, I am not sure!"

Hmm?

When Lin Mo received this answer, the corners of his eyes couldn't help but twitch.

After all the hustle and bustle of his own life, he had gotten such a thing?

Professor Qin also seemed to have seen what he was thinking, and reminded him in an unhurried manner.

"The greatest thing about this plague species of ours is the modification of the human genetic sequence."

"Once it succeeds, it is a complete and utter transformation."

"And the process is irreversible!"

Lin Mo was not stupid, so he naturally understood the meaning.

In other words, this talk of an antidote.

It was completely a non-existent thing.

All that work for nothing?

Thinking of this, Lin Mo not only had a few moments of chagrin in his heart.

Originally, he had thought that he had found a way to deal with Clegg.

Unexpectedly, all he got was such a result.

At the moment, he could only hope that the three potions would work.

"Wait!"

Behind him, Professor Qin saw that Lin Mo was planning to leave regardless of himself, so he hurriedly shouted out.

"There's still this step for me!"

"This plague seed hasn't been transplanted for me yet!"

He shouted with some anxiety.

As soon as the words left his mouth, Lin Mo raised his hand and flung it back.

In the next second, Professor Qin's whole body straps all split in two.

“You can do this kind of perverted thing yourself!”

Lin Mo added after finishing with a somewhat disappointed tone.

“But you need to finish it as soon as possible, it won’t be long before this place will completely disappear
.....”
