

Ghost Doctor 2025

Chapter 2025: You must have a solution

As soon as he thought of this, he felt a chill in his heart. In the eyes of their master, was the Volcanic Flare Stone more important than them? Was he not afraid of them being unable to return?

He recalled that he didn't let his father at home know about this trip. If he died, his parents would not be able to accept it. Among the six of them, only the junior sister mentioned the Volcanic Forest to her father. The other families did not know about it at all.

Sage Hun Yuan, who was still looking for Zhuo Junyue and Fengjiu, heard this, he frowned and glanced at him. When his gaze landed on Fan Yixiu's arm, he scolded. "Since you don't know anything, why did you dare to enter this Volcano Forest? Your master asked you to die and you really came here. Each one of you is brainless indeed."

When they were scolded severely by Sage Hun Yuan, not only Fan Yixiu but also the Chai clan bowed their heads and dared not speak. They really did not think carefully, especially Second Master Chai. He could not help but regret it at this time. If he had known, he would not have brought them here to gain experience. If all the members of the family died here, even if he came back alive, he wouldn't be able to absolve himself from blame.

In the end, he was too confident. He thought that he was an immortal strong exponent and so he could take his clan members into the Volcano Forest to gain experience. But, he didn't expect to meet dangers at every turn.

At this time, the physician who looked after the Chai clan shook his head after examining the injuries of those from the Chai Clan. He told Second Master Chai, "Second Master, there seems to be nothing wrong now, just some skin injuries. I have asked them to take some medicine after treating the wound, but I just don't know ..."

He didn't know if there would be other symptoms next. Especially, when he saw that Sage Hun Yuan didn't say much, he felt uncertain in his heart. However, at present, he couldn't find anything during the examination.

"Immortal Lord, please tell us what will happen when one is bitten by man-eating ants? So we can be prepared." Second Master Chai implored. He had an ominous premonition. If the bite only resulted in skin trauma, Immortal Lord Hun Yuan's face shouldn't have looked so unsightly.

"Senior Uncle." Fan Yixiu called out, looking at him with anxiety.

All of the people around, whether bitten by man-eating ants or uninjured, directed their gaze towards Sage Hun Yuan.

When he saw everyone was looking at him, Sage Hun Yuan snorted and said angrily, "What are you looking at me for? The old man, I, don't have any medical skills! Why do you think the man-eating ants are listed as the five poisons of the Volcano? Of course, it's because of its poison!"

“However, there are no signs of poisoning in the people who have been bitten.” The Chai family’s physician said doubtfully. He really didn’t detect any toxins. How could it be because of the poison of man-eating ants?

“Just because you didn’t detect it doesn’t mean it’s not. Do you think it’s an ordinary poison? Ordinary poison will be alright by taking a few antidote pills. But, this is the poison of man-eating ants, that is its poisonous fire! At present, the wound has not worsened, the poisonous fire has not attacked the heart, so you do not feel anything. But soon, if you are poisoned, it will take effect in about the time it took a column of incense to burn. Then, the poisonous fire will attack the heart. Even the Daoist Immortal will not be able to save.”

When they heard this, those who had been bitten by the man-eating ants turned pale and their eyes showed despair. “It’s over. It’s over this time. We’re dead.”

“Immortal Lord, you must have a solution, right? You must be able to think of a way.”

Chapter 2026: Where is the young man?

The Chai Clan mumbled their questions. They look like they were lost. A lot of them had been bitten by the man-eating ants. If things would happen as he said, then, wouldn’t they end up dead?

“What solution can I find? I have no medical skills.” Sage Hun Yuan said angrily. His eyes were still roving around the place, wondering, why didn’t he see the two kids?

“Senior Uncle, can’t we solve it even if we have antidote pills? I just took one. It’s a fourth-grade medicinal pill. Should it work?” Fan Yixiu asked, looking pale and downhearted.

In order to have a chance of survival, he even took the fourth-grade antidote pill given to him by his father. He just had no idea whether it would work.

“The reason why this man-eating ant is one of the five poisons in the volcanic forest is that they are used to the high temperature from the volcano all year-round. They are not ordinary man-eating ants. Every man-eating ant has the poisonous fire on its tail, but the old man has not heard of anyone who has been bitten.”

“Then, then, is it hopeless for us?” One of them murmured.

Sage Hun Yuan glanced at them, stroked his beard and said slowly. “I don’t say that it’s totally hopeless.”

When the people who had already felt desperate heard his words, a glimmer of hope raised again in their hearts. “Please Immortal Lord, show us a way to survive.”

“That little scoundrel. It’s up to the little scoundrel to save you.”

Sage Hun Yuan let out a snort. From their looks, they had no idea that a little scoundrel possessing brilliant medical skills existed in their clan. And they had been trying to save him? They held the life-saving treasure in their arms, but they didn’t know how to use it. These people really lived in vain.

Little scoundrel?

Everyone wondered, thought about it, then asked cautiously. "Is that Little Jiu?"

"Who else? That little scoundrel has brilliant medical skills! If he wants to save you, you will live." Like that time, he could also solve the medicine. He believed that this man-eating ants' poisonous fire would pose no difficulty for him.

The crowd was shocked. They suddenly looked around and found that the young man in azure was not here, neither was the man surnamed Zhuo. They couldn't help but tremble. They had taken care of their own lives and forgot the young man. Would he get bitten by the man-eating ants?

"He, he's not here..."

Chai Feng also reacted "Is it possible that Little Jiu encountered danger? Why isn't he with us? I'll go back and look for him!"

"I'll go with you. The others rest here." Second Master Chai said, then told the others. "If they come back, please ask him to take a look at your wound. If we can't find him, we will come back as soon as possible."

As he said this, he told Sage Hun Yuan. "Immortal Lord, please help keep an eye on these people here. We'll be right back."

"Go, go ahead!" Thinking that the Chai family was the little scoundrel's clan, Sage Hun Yuan didn't give them dirty looks, but waved his hand and found a place to sit down.

Although he did not hold much hope for that boy's skill, with that wooden man Zhuo Junyue in tow, he wouldn't be dead. He believed they lost their way in the woods!

Of course, Feng Jiu and Zhuo Junyue were indeed in the forest at this time. However, they did not lose their way but walked back. Zhuo Junyue was not talkative and he did not know her intention. When he saw her walking back, he just followed and protected her without asking questions. It was not until they arrived at the place where they had encountered the man-eating ants that the young man stopped.
