

# Ghost Doctor 661

## Chapter 661: It's You!

"What's wrong with you?" He was worried and puzzled.

Feng Jiu sighed and waved her hand at the man in front of her: "Nothing, I'm okay." No one could help her with this problem, so she was better finding a solution by herself!

She walked over to the other side, took the blue spirit snake out of the enchanted circle and let it loose. As for the double treasure deer, she bandaged up its wound and also let it loose. These beasts have parts that could be used to make medicine, so they couldn't be killed, or they might become extinct.

Mo Chen did not speak but quietly observed the youth instead as he released the beasts from the enchanted circle, and he watched the beasts outside of the circle. All of a sudden, the youth turned back to look at him.

"So let's bid each other farewell now! You have refined your pill and I don't intend to go back yet. So be it then!" Once she had finished speaking, she stepped out and went deep into the forest.

Though he was surprised at the lonely departure of the youth, he hadn't gone after him. If he was able to kill a ninth order king beast, as long as he was careful, he would be okay.

Moreover, as his pill was made, he had to go back and get the pill delivered.

With a wave of his sleeve, the enchanted circles disappeared, then he stepped on his flute and flew out of the forest.

Feng Jiu plundered through the forest looking for the two one-horned flame beasts from before. Once she found their base, she would set a formation so that they could not escape. She would then feed them more pills and wait to collect the fire crystals.

After half a month, she had not only collected fire crystals from all the one-horned flame beasts in the area, but also from all the other spirit beasts with fire properties nearby. The once strong, fierce and arrogant beasts were now half the size they used to be after having been forced to create multiple fire crystals. When they saw Feng Jiu they would turn in the other direction and run away.

On this evening, a sacred spirit beast with fire properties was so drained that it laid on the floor and did not move.

"All right, I will let you rest. Eat more and fatten up so that you will be ready for me when I come back next time." Feng Jiu patted the beasts head with a smile then fed him a condensate pill before she walked away feeling satisfied. She heard a deafening roar of a beast accompanied by the sweet voice of a girl.

She was surprised and walked towards the noise. She came across Ye Jing whom she had met once being chased by a sacred black bear beast. She was surprised to see that her spiritual breath was all over

the place and her spiritual energy was nearly exhausted. If she wasn't careful she would be thrown on the ground. The situation was critical.

"Little black, stop!"

When the bear heard the commands, it stopped in midair and pulled back its body. The bear turned back to look at the human being and snorted and sat on the ground obediently.

Ye Jing was in shock as she thought that she was going to be flattened by the black bear. She had not expected the bear to stop when it heard the person shout at it. In that moment of life and death, she had broken out in cold sweat. She stood up immediately and was about to thank the person for saving her life...

"It's you!"

She shouted in shock and dismay as she watched the youth walk over to her smiling. When she thought of this person's lecherous behaviour, she had turned pale. She instinctively took a step back and glared at him.

#### **Chapter 662: Feng Jiu was very hurt**

"Hehe, indeed, it's me!"

She grinned sheepishly. When she saw Ye Jing's defensive posture as if guarding herself against wolves, she could only scratch her head in puzzlement. "What a coincidence!" she smiled, looking embarrassed. "You are hurt. Let me help dress your wound!"

"You, I forbid you to come here!" Her face turned pale. When she staggered backwards, her ankles twisted and she stumbled to the ground.

"Ah!" She exhaled shallow breath, took a mouthful of cold air, and covered her ankle with one hand. The intense pain had her in cold sweats.

Feng Jiu shook his head when he saw her in this condition. "Look, aren't you wounded? What am I going to do to you? What are you nervous about?" She went over and squatted in front of Ye Jing who was still in her defensive posture with a look of panic in her eyes. When Feng Jiu stretched out her hand to slightly raise the hem of her skirt, Ye Jing recoiled violently.

"You, what do you want to do!"

Feng Jiu wore a guileless expression on her face. She put up both hands, saying, "I was just trying to look at your injury! I can't see with your skirt concealing your wound. You must pull it up a bit."

"You, don't mess up..." She recalled that there were no other people nearby. This young man was a previous offender. Her face paled. She wanted to prop herself up, but her effort to exert another foot failed and she tumbled down again.

Feng Jiu was still crouching down. This had now happened to her over and over again. She felt her own face and wondering gloomily. Did she have the face of a pervert?

“Ouch!” Ye Jing fell down again. It seemed that her foot injury was more serious. Cold sweat oozed all over her forehead.

Seeing this, Feng Jiu sighed softly. She shook her head and went over, then grabbed her feet and took off her shoes and socks.

“What are you doing! Rogue! Let me go! Let go!” Ye Jing cried out in alarm. She struggled and slapped the young man who had taken off her shoes and socks, feeling ashamed, angry and frightened.

Could a woman’s feet be seen by a man? This young man was really a lewd thief!

Feng Jiu saw her ankle swollen badly and also noticed her struggling constantly. She turned her head and waved to the big black bear sitting beside her. “Little Black, come here and help hold her down, don’t let her flail about.”

“Growl!”

The black bear of about 2 to 3 meters height made a low growl. It walked over obediently. Two heavy bear paws directly pushed Ye Jing to the ground to keep her from moving.

“Be gentle. This is a beauty. Don’t hurt her with your rough paws.”

She spoke as a reminder with no other meaning. She just thought that Ye Jing was a delicate beauty. Little Black’s rough paws should not press her too heavily, causing an injury. However, this reminder might be construed differently in other people’s ears.

“No, no! Let me go...Ruofei...Help me, Ruofei...”

After all, she was a woman, being held down by a big black bear and lay on her back, unable to move. In the place where she could not see, she felt her skirt lifted by the pervert which made her face pale. She made a terrified sound followed by a desperate cry for help, hoping that her close sister could hear and save her.

Feng Jiu shook her head. She didn’t realize that she was such a failure in her conduct. She thought that Ye Jing had saved a child’s life so that her character was not bad. She wanted to help her, but she didn’t expect that she regarded her as a rapist.

But...Ruofei? Did Ye Jing come here accompanied by someone?

A certain light streaked through her eyes. She looked up slightly at the trees not far away, where there was just a trace of chaotic breath. At this moment, she saw a woman hiding behind the tree looking at her.

If she was right, the woman behind the tree should have been the woman in white on the street that day.

### **Chapter 663: Easily misunderstood**

Hiding behind a tree not far away, the woman in white was horrified to see the scene in front of her. The big black bear, a Saint rank beast, obeyed the young man’s words and pushed Ye Jing to the ground.

She recognized that the young man in the green robe was the rogue who had taken advantage of Ye Jing in the street that day!

From the panicked tone of Ye Jing's call for help and the way she was pushed down on the ground, although the view was blocked by a big black bear, it can be inferred that the pervert was about to do something to her...to commit that kind of thing...

Her palms were sweating and her heart was beating wildly. If Ye Jing lost her innocence here, then...

"Growl!"

Suddenly, the big black bear turned around and roared. Its sharp fangs made people tremble. The Saint ranked beast emitted a powerful pressure like waves of water crashing. It frightened Bai Ruofei who was hiding behind a tree. She didn't dare to stay any longer.

Whether she died or lived, whether she lost her innocence or not, it was none of her business.

Seeing the woman in white running away, Feng Jiu's lips curved up. She looked Ye Jing in the eye and said, "Sigh, your companion ran away."

Ye Jing, in a fright, was stunned to hear her. "You, what do you say?" At this time, she even forgot to struggle.

"It was the woman who stood beside you on the street. She was just over there listening to you calling for help, but now she's running away." As she spoke, she looked at her ankle and saw that she had only sprained her tendons and not hurt her bones. Then she took out the medicine and put it on her, rubbed it for a while, and the medicine penetrated into the skin to soothe her tendons.

Ye Jing stiffened. She didn't notice Feng Jiu's kneading and pressing. Her mind was filled with thoughts that Ruofei had truly heard her cry for help. Was she going to find someone to save her?

She was reluctant to think of her friend as unwilling to help. She thought that it was normal for her not daring to rescue her because of the pervert and also the Saint rank beast black bear. She should have gone to get some help.

"All right." Feng Jiu stood up and started to withdraw. She gave a signal, "Little Black, let her go."

The big black bear howled. It loosened its grip obediently. It was about walking away but secretly glanced at Feng Jiu. It saw her smiling and watching the bear attentively. It was so frightened so that it crouched in a well-behaved manner.

Ye Jing, lying on the ground, looked back at the young man who had stepped away. Her eyes fell on her ankle, which had been rubbed and bandaged with medicine. Her face heated up with some embarrassment while somewhat remorseful and also somewhat astonished.

It seemed that she really misunderstood the young man.

"I'm sorry." She said apologetically with her head lowered slightly.

"Never mind, who asked me to look like a pervert?" She waved her hand and sighed.

Hearing the words, Ye Jing's face turned red and her head hung lower. "I'm sorry, I really, really didn't intentionally misunderstand you."

"I know, I know. I was the one who hit you on the chest the first time I saw you. It's normal for you to misunderstand." She spoke quickly. Although it was the fact, she did not feel anything at all. After all, there was nothing to be embarrassed about between two women.

But Ye Jing was different. On hearing this, she blushed like cooked shrimp. She looked up at the young man quickly but saw his casual appearance. Obviously, he didn't mention it intentionally. She bit her lip and lowered her head.

She had never met anyone like this young man.

### **Chapter 664: Little Black who's dependent on Feng Jiu**

"How did you provoke Little Black? He's been very obedient recently and hasn't attacked anyone. Why was he chasing you?" Feng Jiu asked as she walked over to Little Black who was crouched down and patted its head.

"Little, Little Black?" Ye Jing stared at the two to three metres tall black bear in disbelief. That was a sacred beast and it was definitely not small.

"Yes, Little Black, I picked the name. Don't let it fool you, he is actually a big softie." Feng Jiu smiled and patted the black bear again. Seeing that it hung its head low, she took out a medicinal pill and placed it in the middle of her palm.

"Hey, eat it!"

The big black bear's eyes lit up when it saw the medicinal pill in her palm. It opened its mouth immediately and went forward.

This made Ye Jing's heart skip a beat. His hand wouldn't be bitten, would it? However, this hadn't happened as the black bear used its tongue to lick the pill up to eat, and then proceeded to lick the young man's face.

Feng Jiu smiled and moved her head to the side: "Stop playing, sit down nicely."

Ye Jing was amazed at what she saw. She noticed that Feng Jiu was wearing Nebula's uniform and asked: "Are you a student from Nebula Academy? Are you new to the school this year?" The Medical Division and Alchemy Division wore green clothes. It was said that this year the Alchemy Division had only accepted one student, it couldn't be this young lad? So he was probably from the Medical Division.

"Yes, I only started this year?" She adjusted her robes and said: "I have to go back now, what about you?"

Upon hearing this, Ye Jing couldn't help but stroke her ankle and replied: "I can't walk."

"I know you can't walk. What I meant was do you need help going back?"

"How can you help?" Ye Jing stared at the young man.

Feng Jiu broke into a smile and patted the big black bear next to her: "Little Black, carry her."

"Hey!"

The big black bear made a noise and went over to the tiny person and picked her up, then turned to look at Feng Jiu.

"Let's go!" After staying in the forest for half a month, she had collected enough crystals to allow her to exchange them for what she needed.

"Wait." Ye Jing who was carried by the big black bear was frightened to move, she looked at Feng Jiu and asked: "My friend....." She had not finished speaking and was interrupted by the young man.

"Take care of yourself first! Your friend is more quick-witted than you." She continued to walk on ahead while the big black bear stomped after her.

After a day, they finally left Myriad Beast Mountain Range.

Feng Jiu looked at Ye Jing who had fallen asleep in Little Black's arms and said: "Little Black, good people help others to the end, send her back to the Spirit Division."

The big black bear stared at her as it did not know where the Spirit Division was.

She touched her chin as she thought: "Forget it, let's go back to mine first! You are too conspicuous. If you were to go to the Spirit Division I'm not sure what sort of trouble you would cause." She led the big black bear to her cave dwelling.

After she had settled Ye Jing in her cave dwelling, she came out to see that Little Black was still crouched down outside and refused to leave. She asked in surprise: "What are you still doing here Little Black? Go back now!"

"Oh!" Little Black snorted in response and slammed its heavy paws onto the grass repeatedly.

Feng Jiu asked dumbfoundedly: "You aren't saying that you don't want to go back and you want to stay here now, are you?"

### **Chapter 665: Did Not Do Any Good Things**

"Oh!" Little Black snorted then howled at her and nudged her. It was usually afraid of her, but if he could have medicinal pills to eat from time to time, it did not want to go back.

Feng Jiu was stunned and dumbfounded: "This, this isn't very good isn't it?"

She had quite a lot of beasts and had no need to keep a big black bear! Moreover, she could not sit on it and walk through the markets like Old White. Nor was it like the Cloud Devouring Beast and could turn into a little meatball, or like Fire Phoenix who could turn into a little doll. She had really never thought of keeping it.

"Oh!"

It had stood up suddenly and started banging its huge paws against its chest. It roared loudly, as if it was trying to tell her that it was very strong.

“Stop stop stop!” Even though there was no one around, but this sight was quite frightening.

She sighed and thought about it: “How about this. Since you don’t wish to go back, you can stay here and guard the cave dwelling entrance for me. When you eventually want to go home, I won’t stop you. For now, just sit here obediently and guard the entrance. I have to go ...”

Before she could finish speaking, she heard the sound of hooves and the voice of the Cloud Devouring Beast.

“Master.”

She turned around and saw Old White with Cloud Devouring Beast on its back and could not help but be a little surprised. Why would Old White allow Cloud Devouring Beast to ride on its back? Moreover, she had not seen them in over half a month, they had not lost weight, but gained weight instead. What happened?

“What have you been up to recently? Didn’t I tell you to guard the cave entrance and not wander if you had no need to?” Her gaze fell onto Cloud Devouring Beast, at least he could speak, unlike Old White who could only snort and make noises.

“Master, we didn’t do any good things.” As it spoke, it glared ferociously at the big black bear behind its master.

“Oh!” The big black bear sprawled down onto the ground immediately and trembled in fear behind Feng Jiu. In the Myriad Beast Mountain Range it was the master, but here it had actually come face to face with a spirit beast.....

“You didn’t do any good things, so you have done bad things then?” Her gaze swept across Cloud Devouring Beast and thought, there was nothing much they could destroy here at the Alchemy Division.

“Master, your brother came here to look for you and said that he was at the Mysterious Division.” Cloud Devouring Beast changed the subject quickly and then laid his head down on Old White’s back, not daring to lift his head.

Upon seeing this Feng Jiu raised her eyebrows and didn’t ask what they had been up to while she was away. Instead, she gave them some instructions and headed off to the exchange point to change the fire crystals. Then she could go to the Sky Building to get some good items and then go and see Guan Xilin.

Cloud Devouring Beast let out a big sigh of relief as it watched her departure. At this time, its gaze moved to the big black bear who had hidden behind the tree...

At the academy’s exchange point, Feng Jiu stood there and looked at the middle-aged steward, then asked: “Excuse me, can I exchange fire crystals for contribution points?”

“Yes of course, of course. As long as you can provide them, we will exchange them for you. Also, contribution points are the same as the task points.” The middle-aged steward replied casually, not expecting this young boy to have that many fire crystals with him. After all, one one-horned flame beast

only made one fire crystal a year, and the beast would guard the crystal fiercely. So how could this young boy obtain it?

Upon hearing his words, Feng Jiu took out all the fire crystals from her waist bag and the middle-aged deacon was dumbstruck. Even the students queued up behind him stared at the little mountain of fire crystals, all speechless.....

### **Chapter 666: Young lad, are you from the Pharmacy Division?**

Feng Jiu pushed the fire crystals, stacked like a small hill, forward."It's a total of three thousand nine hundred and eighty. Please take a look."

The middle-aged man gulped and looked at the teenager in front of him strangely. "You collected all this by yourself?"

"Yes!"

She had caught almost all the Fire beast family's spirit beasts in the Myriad Beasts Mountain Range, and only then did she collect so many. But when she thought about it, it's not too bad. There were nearly two million contribution points here. She needn't do any tasks for a long time. Besides, it's a good deal to get treasures without spending money.

"Hiss! How is that possible? His azure robe shows that he's a student of the Pharmacy Division right? Pharmacy Division students are all weak, they don't have the strength to truss a chicken. How could he collect so many fire crystals?"

"That's correct. These fire spirit beasts have to be above the sixth-rank before they can produce fire crystals. Moreover, the lowest rank beyond the Myriad Beasts Mountain Range is the one-horned flame beast. It's an extremely agile beast. No ordinary people can catch them, let alone dig out their fire crystals."

At that moment, a student of the Spirit Master rank in the back paused and then yelled.

"I see! He must have given those spirit beasts some potions. I went to the Myriad Beasts Mountain Range on a mission. These few days, I had encountered all the fire beasts of sixth-rank and above had their fire crystals dug out. Furthermore, the spirit beasts' numbers had thinned out a lot. They seemed to have been ravaged. This must be his doing!"

Hearing this, Feng Jiu's eyes blinked and looked at the indignant man in front of her. They were suspecting her ability and her means of getting these items. What did it relate to them? What were these people, who had their bellyful of food, meaning to do?

Lazy to argue with them, she knocked on the table. "Quickly exchange it for me. I had other things to do!"

The middle-aged man looked at the young man in front of him, and then counted the fire crystals stacked into a small hill. He wiped his sweat while counting. Such a heavy workload and so many fire crystals he had not seen for so long. He converted nearly two million contribution points at a time. He was afraid that this would alarm the academy teachers, the headmaster and others.

Half an hour later, the calculation was properly conducted. The middle-aged man put the contribution points to her jade card and re-registered it. When he saw that the young man was turning around and leaving, he was astonished. He thought this young man belonged to the Pharmacy Division, but unexpectedly he came from the Alchemy Division. This division had no students these past few years, so this youngster should be the one who just came in this year.

Watching this youth leave, several students who exchanged their contributions glanced at each other and followed him.

The middle-aged man saw this and shouted, "Hey, don't you people want to make an exchange? Why are you all leaving?"

Feng Jiu walked away, thinking about the kind of treasures the building had in store. What can nearly two million contributions be converted into? She was really looking forward to it, but when she came out of a section of the road, several people already blocked the road ahead.

She looked up at the people who were behind her at the exchange point earlier. "What are you doing?"

"Young lad, aren't you from the Pharmacy Division? Your division should have lots of good stuff, right?"

One of them smiled at the young man with his arms folded across his chest. He completely ignored the gazes of some students around. Obviously, this was not their first time to do such a thing.

Feng Jiu was stunned, her eyes widened with shock. It was blackmail. Was this the case of old students bullying a new student? She had heard about this in other academies for a long time, but she didn't expect to run into it.

This gave her a fresh feeling. It's truly...splendid.

### **Chapter 667: I'm here to exchange for treasures**

There were many of them! They were wearing Mystical division's blue robe. Should she give them the cosmos sack obediently? Should she instead just tidy them up or give them some medicine silently?

What should she do when she encountered this kind of event when she had to resist without using power?

She frowned and thought hard. She thought it over and over again. This academy forbade infighting among students. If they had to fight, they'd better battling it on a fighting platform.

She glanced at those few people and saw their chins pointed up slightly. She looked as if she dared not look at them. Suddenly she smiled. "There are many people here, shall we go there?" She pointed to a bend in the path not far away.

Those people took a glance. With a grin, they gave Feng Jiu a signal to go first and then followed her toward the path.

Some of the students in the surrounding shook their heads. "Why is that pharmacy division student got stared at by those people? They are local tyrants and they have done a lot of such things in private."

“It’s no wonder. That youngster is a new student who knows nothing.”

“Shall I inform a teacher about this?”

“It’s none of our business. Why do we need to do so much? What if those people knew about it and tidy us up later?”

Each of those students said like that. They only looked on but didn’t intend to step in. However, not a long time after, they saw the young man in an azure robe came out from the path and going in the other direction. They were shocked.

“How did the teenager come out? What about those people?”

“Yes, there were so many people, right?”

One after another spoke in astonishment. Finally, unable to resist their own curiosity, they walked towards the path. But when they saw the scene on the path, they could not help but stare in amazement.

This, this was a little different from what they had imagined...

They saw several people were hanging upside down on the tree on the small path. Clothes were stripped off their bodies, only their underpants remained. All of them were unconscious while in that position like hanging tree lanterns. It was a very strange sight indeed.

Those students gulped and asked, “Say, do you want to step forward and bring them down from the tree?”

“Don’t you have enough things to do? Anyway, they weren’t tied up by us. What if they blame us later?”

“Let’s go quickly! These guys deserve it. Let them hang there and make a fool of themselves.”

Those students spoke, then had a second glance at the unconscious men hanging upside down on the tree. They made a quick exit as if they had never seen this scene.

Meanwhile, Feng Jiu hummed a tune on her way to the Sky Building. Her steps slowed down, then she handed her identity jade card to the old man who guarded the building. Her eyes turned to tiny half-moons when she smiled. “Teacher, I am here to exchange for treasures.”

The old man took the jade card and glanced at the young man who asked for a treasure exchange. This was the first time someone had spoken so directly.

“Every magical artifact has different contribution points. Go in and take a look! Find what you like and if your contribution point is enough, you can exchange it.” As the old man spoke, he registered the information on the jade medal.

Alchemy division student, Feng Jiu, sixteen years old.

“Thank you so much, Teacher.”

Feng Jiu took the jade card but did not step in. Instead, she looked at the old man, her eyes curved into small squint when she smiled. “Teacher, I heard from the students at the foot of the hill that you can

advise students on how to choose magical artifacts? Well, according to you, what kind of weapon should I choose?"

### **Chapter 668: Rainbow-coloured glazed feather**

The old man's eyebrows slightly rose up while looking at the young man in front of him: "Hearing from the students at the foot of the mountain? The old man has been here for so many years and only gave guidance to a few students. However, the students at the foot of the hill can't get this honour to receive my pointers."

Hearing the old man's words, Feng Jiu's smile deepened. "Yes, I know that teachers do not often give advice, but any advice will help students pick out the most suitable treasure. Teacher, what do you think in my case? Which one is relatively suitable for me in the Sky Building?"

She looked at him excitedly, expecting his advice.

Seeing this, the old man unconsciously smiled. His face was solemn. Which student did not come here in a deferential and well-behaved manner? This shy youngster was also like that, pressing ahead for this opportunity.

"All right, the old man is asking you, what kind of weapon do you want to pick?"

"As a matter of fact, I can't fly. Thus, I'll choose a flying magical artifact, which is neither too luxurious nor too large. But it can be used as a means of transportation, to go in and out of places. It would be better if it can be used as a weapon or a tool for defence." She smiled sheepishly while looking at the old man with glistening eyes.

"Tch! You've got a lot of demands there."

He laughed disdainfully and glanced at Feng Jiu. "There is a mahogany box on the top shelf of the second floor. Inside, there is a rainbow-coloured glazed feather. When it recognizes the owner's blood, it can be used as a flying magical artifact and it can also be hung on the waist as an adornment. This feather is also equipped with a defence function. This magical artifact was made by a former magical artifact refiner at the academy. It can resist the three strikes of a Golden Core cultivator and a hit from a powerful Nascent Soul. There are many students looking at this rainbow-coloured glazed feather, but it needs 1.8 million contribution points to exchange."

When he reached this point, he glanced at the young man. "Good stuff requires high contribution points. There are still stuff available that requires low contribution points. Go to the first building, the third row on the second floor. There is also a flying magical artifact that needs only 5,000 contribution points."

"Thanks so much, Teacher."

Feng Jiu respectfully gave him a salute. 1.8 million contribution points – it was close to the full amount of her entire fortune. She thought earlier that her contribution points were too numerous, it would take a long time to get those points exchanged. She wouldn't need to worry about those points. Unexpectedly, almost all of them were gone in one trip to the Sky Building.

Rainbow-coloured glazed feather? She wanted to see what kind of feather it was and why it was worth so much.

Following the old man's instruction, she came directly to the innermost shelf of the second building and took down a mahogany box at the top. When it opened, it was as if a rainbow of seven rays of light emerged into view. Its dazzling beauty made her fall in love at first sight.

No woman could refuse beautiful things. This feather was really beautiful. It was of palm-sized length and looked like an ordinary feather. The difference was it had seven coloured brilliant rays continuously flowing on the feather layer by layer, like ripples of water. It was dazzlingly beautiful.

"This is it!" She picked up the mahogany box and walked out to the old man and put the box in front of him. "I'll exchange for this one, Teacher."

The old man glanced at the mahogany box, asking, "Do you have that many contribution points?"

"Of course I have! I just returned from my mission." She grinned and again handed the jade card forward.

The old man accepted it suspiciously. He didn't check the contribution points in the jade medal before, so he didn't know how many contribution points there were. When he looked at the figures, even he who had always kept a straight face could not help staring.

Chapter 669: Did you hear?

"You have this much? Doesn't the information on your identity jade card show that you just entered the academy?" He couldn't restrain himself from asking. He stared at the young man. "What kind of backer do you have?"

"Eh..."

Feng Jiu was stunned. She scratched her head sheepishly with an innocent face. "I don't have any backer! I earned all these myself. It's the truth. I went to the Myriad Beasts Mountain Range to collect the contribution points of fire crystals. I just exchanged the points!"

Was she that untrustworthy? She clearly spoke the truth, but nobody believed her?

She shouldn't have told them that she went to the Myriad Beasts Mountain to collect fire crystals. The old man was even more stunned and looked at her incredulously when he heard that.

Even while the old man was still very sceptical, he didn't say much. He helped Feng Jiu exchange the points for the rainbow-coloured glazed feathers. After all, she had enough contribution points. There was no reason for him to refuse the exchange. However, he thought of getting someone to find out the information for him later. What's this young man's background? Was he a relative of the headmaster? Did the headmaster give him contribution points secretly?

But he instantly rejected this idea as soon as it came to mind. It was impossible, and the headmaster was not that kind of person.

After the exchange, Feng Jiu put a drop of her blood to be recognized as the feather's master. Then she took out a red ribbon and tied the treasure around her waist. She looked at the brilliant glazed feather on her waist. She couldn't help praising it. "It's truly beautiful."

"Thank you for your guidance, Teacher. I'm leaving. I'll be back again." She waved and went to the Mystical Division followed by the old man's stare.

Along the way, the students who met her cast their eyes on the feather at her waist. They were all astonished.

The rainbow-coloured glaze feather was one of the three treasures in the Sky Building that students wanted to exchange the most. The rainbow-coloured glaze feather was refined by the academy's senior tool refiner before. Its feathers were almost weightless. The rainbow-like seven-coloured rays of light were like ripples of water flowing. It flowed layer upon layer like ripples of water, very beautiful.

Its most desirable characteristic was that besides flying at an extremely fast speed, it could also withstand three attacks by Golden Core cultivators and one hit by a powerful Nascent Soul. It's a magic artifact that could save one's life.

As far as they know, the Top Ten Proud Children of Heaven in the academy all focused their attention on the three treasures in the Sky Building. However, contribution points were not so easy to earn, especially the points to exchange for those three treasures were so high that ordinary students could not exchange for them even after a few decades.

Unexpectedly, today they saw it at the waist of a Pharmacy Student in an azure robe. The news spread quickly in the academy almost at the speed of wind...

"Did you know? One of the three treasures in the Sky Building, the rainbow-coloured glazed feather was exchanged by an azure-robed student."

"Did you hear that? The rainbow-coloured glazed feathers were exchanged by a student from the Pharmacy Division. It was said that this student just came in this year."

"I heard some people guessed that this azure-robed student have a strong backer."

"Yes, otherwise how could it be possible for this year's new student to exchange the rainbow-coloured glazed feathers?"

"The academy's teachers don't have the authority to give contribution points. It's very likely that this azure-robed student is the headmaster's or deputy headmaster's younger family member."

"It's impossible. I heard that the headmaster's family is not in this area. Not to mention the family's younger generation."

"The deputy headmaster's then. Otherwise, how did that student earn the 1.8 million contribution points for the feather?"

I don't know, but I've heard that all the Ten Proud Children of Heaven in our academy knew about it. All of them have already gone to look for that azure-robed student."

At the same time, Feng Jiu who didn't know that she had become the focus of attention at the academy, had arrived at the Mystical Division.

### **Chapter 670: I'll come back again later**

When she climbed the Mystical division's main peak, she saw students in groups of three or five people. Some were under the tree discussing the martial arts, some sitting on the grass chatting with a smile on their faces, some had both their feet hanging down from the tree with their head down the plant and their eyes closed without speaking, while some others...

"Sigh! All are Nebula Academy students. Alchemy division simply can't be compared to the Mystical division!" She sighed softly. Feng Jiu felt keenly that this Mystical division's main peak area had so many people. Not just the number of people, the atmosphere was also lively and harmonious. It formed a strong contrast to her desolate Alchemy division.

She stepped forward, her handsome face wore a smile that she thought inoffensive to people. She cupped her fists in a salute toward a student politely to make some inquiries. "Excuse me, may I ask..."

At some distance away from the student, she saw him pointing at her while crying out involuntarily.

"Look! Here's the youth in azure robe! He has come to our Mystical division!"

As soon as this was said, the gazes of the people around her whizzed toward her. Even the man on the tree, who had his eyes closed and kept silence, turned over and stared at her with widened eyes.

"Er... this, what are you doing?"

She asked somewhat confusedly, looking at the students around her. She took a step back, but the path behind her was surrounded by people. They were all staring at her and then their gazes fell on the rainbow-coloured glazed feather that she wore around her waist.

"What are you doing? I exchanged for it." She instinctively covered the feather on her waist and stared warily at the crowd.

"Young fellow, what's your background? You've been in the academy in less than a month, yet already exchanged the rainbow-coloured glazed feather?"

"What kind of background?"

Feng Jiu was shocked. She answered innocently, "I have no powerful backing, but I earned it myself." In all honesty, she had done missions obediently to get these contribution points. Why did everyone asked her about her background?

"Are you kidding? You earned it yourself? That rainbow-coloured glazed feather was stared at by the academy's Ten Proud Children of Heaven! They all couldn't make 1.8 million contribution points. Yet you, a rookie in the academy, make it in less than a month? Would anyone believe it?"

Feng Jiu's lips curved. A rookie? She's called a rookie again. Even though she's a rookie, she's not food, okay?

“This is what I earned myself. This feather has recognized me as a master with the drop of my blood. It’s clear. If you don’t believe me, I can’t do anything. But even if you don’t believe me, what does this have to do with me?” These people! Was it easy for her to exchange this feather? It cost her 1.8 million contribution points. She was also grieving!

However, as soon as they heard this, they became angry and glowered at the innocent and wronged young man in front of them.

“Why doesn’t it matter? We can’t exchange for it. You, a new student in the pharmacy division, exchanged for this treasure. Aren’t you getting it through the back door?”

“That is, the academy’s Ten Proud Children of Heaven can’t exchange for this treasure, but it’s given to you, a rookie. Can it be none of our business?”

“Senior Sister Zhou said that she wanted to exchange for this rainbow-coloured glazed feather ever since entering the academy. She tried hard to earn some contribution points for this feather. Say, wouldn’t she be sad if she knew that the feather she liked was given to a rookie?”

She saw those students had their face flushed with anger and spitting saliva while speaking in boiling fury. Feng Jiu stepped back to guard against their saliva while saying, “Don’t get excited. I’ll come back again later since I’m looking for someone.”
