

## GLOBAL DUNGEON: MY SUPPORT IS TOO STRONG

### Chapter 9

Talent Skill! Assessment Over

“Ah, well...”

Outside, in the classroom.

The teachers were already numb.

A second ago, they were still worried about Lu Benwei, but the next moment, Lu Benwei showed them what it meant to kill ten monsters in one step.

“Hiss... Phew... Forget it. I won’t look at this kid anymore. He makes me suspect that I’m useless.”

Finally, a teacher suddenly said faintly.

The other teachers did not mock him. Instead, they fell silent.

The people present were all above level 20, but they believed that if they were placed in Lu Benwei’s position, they would not even be able to come out alive, much less so easily.

What level was Lu Benwei at now?

The more they watched, the more frustrated the teachers became.

Hence, with everyone’s tacit approval, the focus on the holographic projection gradually shifted to the other students.

Fortunately, after being beaten up by Lu Benwei, those students became obedient and formed teams to fight monsters and level up. They did not cause any more trouble. Only then did the teachers feel better.

Time passed.

Before they knew it, an hour had passed.

Lu Benwei relied on his high shield and extremely high attack power to forcefully flatten hundreds of Ghost Wolves.

Just as the last Ghost Wolf fell, the system voice suddenly spoke.

[Ding! Congratulations on killing level nine Ghost Wolf. Ten times drop rate triggered. Obtained Skill Scroll—Ghost Shadow]

[Congratulations, host. You have comprehended the innate skill—Eye of Insight!]

[Your experience points have reached the upper limit. You cannot continue to obtain experience points. Please complete your Class Advancement as soon as possible.]

“Eh? It’s actually a lord-level monster?”

Lu Benwei was delighted to see the body of the last Ghost Wolf at his feet.

He did not expect that this mystic realm would accidentally give him another small surprise.

Immediately after, he checked his spoils of war.

[Ghost Shadow]

Skill Scroll

Quality: Rare

Level: 15

Effect: After activation, you can temporarily obtain the ability to communicate with the shadows. You can fuse yourself with the shadows and create a clone to stay in place. The clone cannot move or attack. Duration: 30 seconds.

[Eye of Insight (Unique)]: Talent skill. After using it, you can see through everything.

“Damn! That’s a little strong.”

After reading the introduction of the Talent Skill and Skill Scroll, Lu Benwei was excited.

To put it bluntly, the effect of [Ghost Shadow] was to release a clone to attract aggro during a battle, while the user had already hidden in the shadow. This was simply a necessary skill to cheat others.

However, this skill should belong to an assassin based on its effect. He wondered if there would be any conflict if he learned it.

However, if he wanted to learn, he would have to reach level 15 first. Thinking about this now was still a little far off.

Although the talent skill at the back could not directly increase combat strength, it was a very practical and powerful skill.

This was equivalent to appraisal in online games. All items had no secrets in front of him, allowing him to make better judgments and seek benefits and avoid harm.

Originally, Lu Benwei only wanted to increase the proficiency of [Heavenly Dog’s Fury] by staying in the mystic realm. He did not expect to obtain such a big surprise.

After being happy for a while, a mechanical female voice suddenly sounded in the sky again.

[Ding Dong! There’s still an hour before the end of this assessment. Students, please level up as soon as possible and strive to pass the assessment! Now, announcing the rankings!]

Hearing this voice, Lu Benwei did not feel much.

Currently, his points had already left the others far behind. Moreover, his level had also exceeded the criteria to pass the assessment. The first place of this assessment could be reserved in advance.

“But since we have an hour left...”

Standing where he was, Lu Benwei gave up on the idea of continuing to increase his skill proficiency.

Now that he had the [Eye of Insight], he planned to walk around the mystic realm and see if he could gather the materials needed for his Class Advancement.

After all, there were not only monsters in the mystic realm, but also many materials that were not available outside. There were even some materials that were priceless. If he could get one, would he not make a profit?

Therefore, for the next hour, Lu Benwei was basically collecting materials. Occasionally, he would encounter a few monsters, but he would kill them instantly. It was not challenging.

It was worth mentioning that the innate skill [Eye of Insight] was really useful. When activated, everything Lu Benwei saw with his eyes would form a detailed information feed to his brain, allowing him to find some expensive materials very easily.

In the process of finding the materials, Lu Benwei also discovered another wonderful use of the Eye of Insight—to find treasures through information prompts.

As long as it was within Lu Benwei’s sight, everything would be recorded by [Eye of Insight] and turned into information for Lu Benwei to know.

However, there was still a limit to what the human eye could see. For example, when there was a cover, it was difficult to discover what was behind it.

However, the Eye of Insight was like a radar. Wherever Lu Benwei looked, it would be scanned by the Eye of Insight. Even if he was blocked, there would be a notification.

This was simply a treasure hunting tool.

An hour passed quickly. Not only did Lu Benwei collect all the materials for his Class Advancement, but he also obtained many other materials and treasures in the mystic realm. Even if he could not use them, he could sell them and escape poverty overnight.

In this hour, the others also spared no effort in fighting the monsters and trying their best to increase their levels and points.

Unfortunately, most of the students could only form teams to hunt monsters. Even though the assessment time had been extended by two hours and they had found the right method, about a hundred people had reached the level required for the assessment.

However, Lu Benwei's name was still at the top of the rankings with more than 10,000 points.

Qian Bin was still in second place, but he only had less than 200 points, not even a fraction of Lu Benwei's.

However, after the previous battle, no one dared to have any objections to Lu Benwei's ranking.

Damn it, so many people had been beaten up by Lu Benwei like ants. Only a fool would run to Lu Benwei and say that he had a problem with his ranking.

Finally, as the mechanical female voice in the air indicated that the assessment time was up, everyone was pulled out of the mystic realm by an inexplicable irresistible force and returned to the original school field.

The assessment officially ended.

When they entered the mystic realm, there was a neat line of thousands of people.

However, when they returned, there were only a hundred or two people left standing. Most of them were lying on the ground and had suffered serious injuries

Nearly a third of the others were neatly placed at the front, covered with white cloths.

The joy of passing the test instantly disappeared, leaving only inexplicable grief.
