Chapter 542 - 542 Turning the Situation Around!

542 Turning the Situation Around!

In addition, Liu Yan knew that Allen Smith still had some hidden skills that he had not used.

Whether it was the trump card that Allen Smith had cultivated before or the God's Effect of the SS-grade defensive equipment, the Dragon-scaled Fiery Armor, they could directly kill Ye Yifan.

Allen Smith did not want to use his trump cards. He wanted to use his combat power to defeat Ye Yifan!

On the other side, the other experts weren't doing too well.

Murong Xue, Zheng Tainan, and others led the experts of the Land of Origin team.

The combat strength of these few people was not bad. Their equipment was strong, so their combat strength was superior. Initially, they could have suppressed the experts from the Red Star Empire team.

However, there was a variable.

It was the strongest assassin from the Red Star Empire team, Luo Wei.

Luo Wei's stealth, speed, and assassination ability were too terrifying.

Murong Xue and the others could win against Luo Wei. They wouldn't even be able to touch him.

Luo Wei's concealment ability was too strong. One could only notice him after getting close to him.

In addition, Luo Wei's speed and movement technique were also impressive. When Murong Xue and the other experts noticed Luo Wei was close to them and wanted to defend and counterattack, Luo Wei had already retreated. He didn't give Murong Xue and the other experts any chance to attack.

Because of Luo Wei, Murong Xue and the others were constantly attacked and suffered many injuries.

If it weren't for Chu Long's continuous and powerful healing abilities, Murong Xue and the other experts would have long been unable to hold on.

Seeing this scene, Liu Yan was quite surprised. He had never thought an assassin would have such a significant impact on the battle.

Liu Yan was also an assassin. He was above Luo Wei in all aspects.

However, Liu Yan had not undergone systematic training as an assassin, so he did not have much understanding of this job class. He was unfamiliar with how an assassin should attack in a group battle.

Previously, Liu Yan would only assassinate when he needed to. When it came to group combat, he would use the Flying Cloud Mystic Bow or the Blue Flame Gloves to attack. He never thought assassins could play such a significant role in group combat, even influencing the entire situation.

Liu Yan carefully observed Luo Wei's attack rhythm and immediately understood.

Luo Wei's attack method wasn't too complicated. He used his powerful concealment, speed, movement, and explosive assassination to attack continuously.

Luo Wei always used sneak attacks to catch the opponent off guard. He would hit the target in one strike and then retreat, not giving the opponent any chance to counterattack.

By repeating this process, Luo Wei could continuously attack and injure the experts on Liu Yan's side.

One person could influence the overall situation.

Liu Yan was a little surprised, but at the same time, he admired Luo Wei.

Previously, Luo Wei had already left a rather deep impression on Liu Yan. This time, Luo Wei had made Liu Yan's eyes light up.

Liu Yan made a mental note of Luo Wei's strength. If there were a chance, he would make use of him.

Liu Yan was clear that Luo Wei's talent wasn't bad, especially his talent as an assassin.

If Luo Wei were to become one of Liu Yan's men and nurture him, Luo Wei would grow to become a true expert. He could become Liu Yan's right-hand man!

However, they were still in the middle of the ultimate gambling duel, so Luo Wei was still Liu Yan's enemy.

Liu Yan was clear that although Murong Xue and the other experts were powerful, their speed was too slow. They wouldn't be able to touch Luo Wei.

Any effort was futile in such a situation, no matter how strong one was.

Liu Yan's speed was faster than Luo Wei's.

However, Liu Yan needed to keep an eye on the New Continent team and the European Federation team. Hence, he couldn't make a move easily.

Among the Land of Origin team, the only one who could catch up with Luo Wei's speed was Allen Smith.

Thinking of this, Liu Yan's eyes lit up. He quickly shouted, "Allen Smith, you'll fight the assassin. Murong Xue, you are in charge of blocking and holding back Ye Yifan!"

Allen Smith was immersed in the battle with Ye Yifan. It had been a long time since he faced an opponent with similar strength.

The opponents Allen Smith had faced before were either too weak or too strong, such as the Moonshine Qilin.

It had been a long time since Allen Smith had encountered such an expert of similar strength, and he was currently having a great time.

Allen Smith had gradually begun to suppress Ye Yifan. If he continued to suppress Ye Yifan, he would be able to defeat Ye Yifan eventually.

However, at this moment, Allen Smith received Liu Yan's order to fight Luo Wei.

Allen Smith was a little reluctant, but it was Liu Yan's order, so he had no choice.

Immediately after, Allen Smith waved his Blood Flame Sword. After pushing back Ye Yifan with one strike, he turned around and went to look for Luo Wei.

When Murong Xue heard Liu Yan's order, she no longer bothered with Luo Wei and turned to face Ye Yifan.

After the two exchanged their opponents, they continued to fight.

Allen Smith's speed could catch up to Luo Wei's.

However, Luo Wei's concealment ability was strong, and his movement technique was agile. It was also difficult for Allen Smith to bump into Luo Wei.

Fortunately, Allen Smith was fast enough. At the very least, he could keep Luo Wei occupied and prevent him from assassinating the other experts from the Land of Origin.

Luo Wei was finally held back by Allen Smith.

On the other side, Murong Xue's battle prowess was naturally not on par with Ye Yifan's.

Fortunately, Murong Xue's defense was stronger. She also had the S-grade shield, the Rock Shield, and the S-grade defensive equipment, Shiny Golden Armor, which further strengthened her defense.

Ye Yifan was unable to break through Murong Xue's powerful defense.

Although Murong Xue couldn't cause any effective damage to Ye Yifan, her strength wasn't as strong as Ye Yifan's. She was strong enough to defend and hold Ye Yifan back!

"That's all you got? I thought you were more powerful." Murong Xue rolled her eyes at Ye Yifan and said disdainfully.

Murong Xue initially thought Ye Yifan was very powerful. Surprisingly, he couldn't even break through Murong Xue's defense.

In fact, this was also within reason.

After all, Murong Xue's job was rare, the rock pugilist. Her defense was already extremely terrifying.

Her talent was also an S-grade tyrant body talent, which also greatly increased his defense.

Under the third layer of the Tyrant Body, Murong Xue's defensive power had already reached a terrifying level.

With the addition of two powerful S-grade defensive equipment, the defensive power was already ridiculous. Ye Yifan naturally couldn't break through Murong Xue's defense.

When Ye Yifan heard Murong Xue's provocation, he was instantly displeased. The woman in front of him was weaker than him, but her defense was terrifying.

Ye Yifan didn't believe it and continued to increase his strength, but it still did not have much effect.

Ye Yifan didn't know Murong Xue hadn't entered the fourth layer of the Tyrant Body yet. She wasn't in her strongest state yet.

543 Murong Xue's Terrifying Defense!

Furthermore, behind Murong Xue was the powerful priest, Chu Long.

Even if Ye Yifan could penetrate Murong Xue's defenses, he wouldn't be able to cause much damage. That bit of damage could be recovered with a simple treatment from Chu Long.

Under Liu Yan's orders, Allen Smith and Murong Xue changed their opponents. Then, the situation changed.

Previously, Murong Xue and a few other experts had worked together to fight Luo Wei. However, they couldn't do anything to him.

Although Allen Smith could suppress Ye Yifan, he could not take Allen Smith down in a short time. Allen Smith was also being held back by Ye Yifan.

But now that the opponent had changed, the situation had changed.

Although Murong Xue couldn't defeat Ye Yifan, her defense was strong. She was able to defend Ye Yifan and delay him.

Although Allen Smith could not touch Luo Wei, he could keep Luo Wei occupied. It prevented Luo Wei from assassinating the other experts of the Land of Origin team.

With this, Zheng Tainan and the other experts who had helped Murong Xue deal with Luo Wei were freed instantly. They joined the battle with the other experts and helped to deal with the other experts from the Red Star Empire team.

In this way, it would not take long for the experts of the Red Star Empire team to be defeated one by one.

As for the battle between the ordinary members of the Land of Origin team and the Red Star Empire team, the Land of Origin team was stronger and had always been slightly suppressing the Red Star Empire team.

After Luo Wei was no longer a threat, Xu Han could use his skills freely. He could continuously cast area-of-effect spells to help the ordinary members fight.

Moreover, Xu Han had obtained an SS-grade treasure, the Azure Frost Pearl. Not only could it increase the effect of Xu Han's frost skills, but it could also continuously replenish Xu Han's frost energy.

Hence, Xu Han went all out.

With Xu Han's help, ordinary members of the Red Star Empire team were even weaker than the Land of Origin team. It would not be long before they completely collapsed.

When Sun Wen saw this, he felt a little helpless.

The experts of the Red Star Empire team initially had the upper hand against the Land of Origin team. However, with a single order from Liu Yan, the situation changed.

At this moment, the ordinary members and the experts of the Red Star Empire team were gradually losing to the Land of Origin team. It would not be long before they would be defeated.

While Sun Wen admired Liu Yan, he knew he could not reverse the situation!

The members of the New Continent team and the European Federation team were also surprised to see this.

The ordinary members of the two teams started to discuss in surprise.

"I didn't expect that the combat strength of the Land of Origin team would already be stronger than that of the Red Star Empire's representative team."

"Indeed. It seems the Land of Origin team is the strongest among our five teams."

"Looks like the Land of Origin team not only took advantage of the decision made during the trial on the fifth level of the Tower, but their team members are also quite strong."

"The Red Star Empire team is going to lose."

"I feel that the comprehensive combat strength of the Land of Origin team is more powerful than our team."

"I have the same feeling. The strength of the Land of Origin team is improving too quickly."

"It's only been a short while, but the strength of members of the Land of Origin team has improved so much."

...

The leader of the European Federation team, Hans Wilson, could also tell that the situation had changed after Liu Yan's orders. The Land of Origin team and the Red Star Empire team were fighting intensely.

"This Liu Yan's commanding ability is indeed impressive." Although Hans Wilson hated Liu Yan, he had to admit it.

Derek Doyle nodded slightly and said, "That's what makes Liu Yan so terrifying. Apart from his strength, he's also a great leader. With a leader like him, the Land of Origin team has become the army's spirit. All the members are giving their all. A team like this will become stronger."

"Hmph!" Hans Wilson snorted coldly and said, "So what? The Land of Origin team will lose for sure. It's only one team, and they're already struggling to hold their own. If our team and the New Continent team join the battle, how can they hold their ground? Liu Yan is strong, but how can he hold off two of our teams by himself?"

Derek Doyle didn't say anything else, but he was a little puzzled.

"Why was Liu Yan so calm until now? Did he plan to deal with the two teams alone? How was this possible?" Derek Dole was even more confused and couldn't understand Liu Yan.

On the other side, the captain of the New Continent team, Jin Cheng, was also surprised.

When they first entered the Tower, the strength of the Land of Origin team was about the same as the New Continent team.

However, it had only been a short while, and the strength of members of the Land of Origin team had improved so much. They defeated the Red Star Empire team with both ordinary members and experts. It was shocking.

"Are all members of the Land of Origin team going all out? Their condition is good. If our team members had the spirit to go all out like them, our fighting strength would increase a lot." Jin Cheng sighed with envy.

Chu Cunrui glanced at Jin Cheng and thought, "Isn't the difference in the captains affect the quality of ordinary members?"

However, Chu Cunrui understood that Jin Cheng wouldn't be able to understand this.

At this time, Chu Cunrui only felt a little pity for himself and the other members of the New Continent team. They had the chance to join the Land of Origin team to follow Liu Yan and change their fate. However. It seemed that they were going to lose this opportunity.

At this moment, Ye Yifan was still on the battlefield. He had launched a series of attacks with all his might. However, he was still unable to cause much damage to Murong Xue.

Murong Xue's shield was like a giant mountain blocking his path. No matter what, he couldn't get past it.

Ye Yifan had already realized that something was wrong. He wanted to ignore Murong Xue's terrifying defense and turn around to attack the others instead of wasting time here.

However, Ye Yifan felt helpless because Murong Xue kept blocking him, not allowing him to leave.

Although Murong Xue's attack power was weaker than Ye Yifan's, it wasn't weak either. Ye Yifan naturally couldn't ignore her.

It also caused Ye Yifan to be unable to break away from Murong Xue's entanglement to attack the others. However, if he were to fight Murong Xue, it would be a waste of time and energy. He would not be able to cause any actual damage to Murong Xue.

After trying a few more times, Ye Yifan still couldn't get rid of Murong Xue. Ye Yifan was in despair and realized that they had lost this time.

Even if Liu Yan did not participate in the battle, the Land of Origin team was stronger than the Red Star Empire team.

If Liu Yan were to join the battle, wouldn't they be even less of a match?

544 Army of Enchanted Puppets!

Ye Yifan couldn't understand how the mediocre Land of Origin team had grown so strong in such a short time.

With no other choice, Ye Yifan could only accept that the Red Star Empire team could not defeat the Land of Origin team, and Ye Yifan could only ask for external help.

Ye Yifan looked at the New Continent team and the European Federation team in the distance and shouted, "What are you two teams doing? Can't you see how strong the Land of Origin team is? If you guys wait until we're finished, your teams won't stand a chance against the Land of Origin team. If you continue to watch the show, we'll all be finished!"

Ye Yifan's words were not without reason.

The strength displayed by the Land of Origin team was a little terrifying.

If they waited for the Land of Origin team to finish off the Red Star Empire team, they could turn around and fight the New Continent team and the European Federation. The strength of the New Continent team was average, and many members of the European Federation team were injured and not in good condition. Furthermore, the Land of Origin team had Liu Yan's help.

At that time, the New Continent team and the European Federation team might not be a match for the Land of Origin team.

Hearing Ye Yifan's shout, Hans Wilson smiled and said, "Captain Ye, don't you think that the Red Star Empire team is powerful? Do you think you can defeat the Red Star Empire team by yourself? If you need help, you should have told us earlier. We will help you."

On the other side, the captain of the New Continent team, Jin Cheng, shouted, "That's right, we're coming to help now."

Jin Cheng asked the members of the New Continent team to step forward and join the battle. They wanted to help defeat the Land of Origin team.

At this moment, the Land of Origin team had suppressed the Red Star Empire team and had a significant advantage.

However, as long as the New Continent team joined the battle, the Land of Origin team would not be able to hold on and would collapse.

"Isn't Liu Yan arrogant?" Jin Cheng said proudly. "He thinks his team and himself are invincible. I admit that Liu Yan is strong, and the Land of Origin team is also powerful. But so what? If our team joins the battle now, they will still lose."

Seeing this, Chu Cunrui shook his head slightly and didn't bother to say anything more.

Although Chu Cunrui was unwilling, it was his captain's order. Chu Cunrui could only obey.

Members of the New Continent team got into formation and aimed at the Land of Origin team, ready to join the battle.

Upon seeing this, Liu Yan flapped his Wings of Wind God and arrived in the sky above the New Continent team.

"You've finally made your move. I've been waiting for you guys for a long time." Liu Yan said indifferently.

When Jin Cheng saw that Liu Yan had come to the front of the New Continent team, he couldn't help but ask with a strange expression, "Captain Liu, we know you're strong, and I admit that even ten of me wouldn't be a match for you, but so what? Are you prepared to fight against our entire team by yourself? If you don't want to die, get out of my way. I don't want Blue Planet to lose a genius like you!"

Members of the New Continent team also rubbed their fists and were ready to fight.

On the other side, members of the European Federation team were also watching. They were curious about what Liu Yan was up to. Was he going to stop the entire New Continent team by himself?

Many team members of the Land of Origin team and the Red Star Empire team were fighting. They took advantage of the gaps in the battle to cast a glance over. They were all curious about what Liu Yan was planning to do.

Members of the Pan-ocean Community team, who were isolated at the edge of the dueling arena, were also paying attention to Liu Yan.

In an instant, Liu Yan had already become the focus of attention of all five teams in the entire dueling ground.

Liu Yan was flying in the sky. He answered the captain of the New Continent team, Jin Cheng, with a calm expression, "There doesn't seem to be a need for me to stop you personally."

As Liu Yan spoke, he waved his hand, and a bunch of enchanted puppets appeared.

They were white-colored tier 2 enchanted puppets, 41 orange-colored tier 2 enchanted puppets, and one red-colored tier 3 enchanted puppet from the European Federation team!

Jin Cheng and his team members were slightly shocked when they saw the pile of enchanted puppets.

Previously, when they were fighting the monsters, Liu Yan had used the white tier 2 combat-enchanted puppets to support the New Continent team in the metal attribute territory. Therefore, Jin Cheng and the others had seen the power of the white tier 2 combat-enchanted puppets.

"There are 40 white enchanted puppets. That's too many."

"Twenty was already a lot last time, and they even helped us a lot. I didn't expect Liu Yan to have forty!"

"These white enchanted puppets are around level 40, which is about the same strength as us. However, they are not afraid of getting injured or tired, so their actual combat power is stronger than our ordinary team members."

"Our fifty-man team can barely handle the forty white puppets, but what about the remaining forty-one orange puppets and one red puppet?"

"I wonder how strong these orange and red enchanted puppets are. If they're stronger than the white enchanted puppets, we might not be their match at all."

“I don’t think so. Even more powerful than the white enchanted puppet? I think the orange and red enchanted puppets are weaker than the white enchanted puppets.”

“If the other enchanted puppets are weaker than the white enchanted puppet, we can still fight.”

...

Members of the New Continent team started to discuss among themselves.

The European Federation team was surprised to see the enchanted puppet.

The enchanted puppet was unpopular and was a very niche combat weapon. Most people did not know about it at all. Many members of the European Federation team did not even know about it.

“What is this? I’ve never seen them before.”

“They look like machines but also humans. I don’t understand.”

“From what they call it, it’s called the enchanted puppet. What does that mean? I wonder if it’s powerful?”

“It seems like Liu Yan is planning to use these enchanted puppets to deal with the members of the New Continent team.”

“Can these enchanted puppets defeat the New Continent team? That can’t be.”

“That’s right. The New Continent team is the best among the New Continent’s students. They are not weak. How can they not defeat a bunch of weapons? ”

“This is interesting. This is my first time seeing an enchanted puppet.”

“Liu Yan has such a thing? It’s really interesting.”

...

Although members of the European Federation team were surprised, they didn’t take it too seriously.

After all, in their eyes, the enchanted puppets were just a bunch of weapons. How could they be a match for awakened ones?

545 Correct Choice

On the other side, many members of the Land of Origin team were secretly delighted when they saw this scene.

They had all seen the strength of Liu Yan's enchanted puppets. They were not weak but much stronger than the ordinary members.

At this moment, Liu Yan had released more than 80 enchanted puppets, which was more than the members of the New Continent team. It would not be a problem to drag the New Continent team down.

Most importantly, members of the Land of Origin team finally knew that their Captain, Liu Yan, had indeed prepared. It seemed like he could hold off the other two teams.

Instantly, many members of the Land of Origin team felt relieved.

Without any worries, members of the Land of Origin team could fight without restraint.

Instantly, the struggling Red Star Empire team members could not hold on for a moment when they faced the even more ferocious Land of Origin team.

The faces of the members of the Red Star Empire team turned ugly.

At the edge of the arena, the Pan-ocean Community team was overjoyed when they saw the enchanted puppets that Liu Yan had released.

They had no idea about the combat power of the white and red enchanted puppets.

However, they were very clear about the combat power of the orange enchanted puppet.

Previously, when they were fighting the monsters, Liu Yan sent an orange enchanted puppet to help them.

At that time, members of the Pan-ocean Community team had witnessed the power of the orange enchanted puppet.

According to their observations, the combat power of the orange enchanted puppet was stronger than the Red Star Empire team members. They were already on par with the Red Star Empire team's experts.

More importantly, the orange enchanted puppet was not a living being. It did not feel pain or fatigue. Hence its combat power was naturally stronger than it was supposed to be. In other words, it was much stronger than an ordinary expert on the fifth level.

"There are so many orange enchanted puppets."

“That orange enchanted puppet helped us a lot earlier, and there are 41 of them this time.”

“I wonder if these orange enchanted puppets have the same combat ability.”

“They should be the same. I think these orange enchanted puppets look the same.”

“If that’s the case, the members of the New Continent team will fight the 41 orange enchanted puppets with their heads!”

“Haha, not counting the white and red puppets, the 41 orange puppets are 41 powerhouses. The members of the New Continent team are no match for them.”

“No wonder Captain Liu was so confident. He was prepared.”

“There are so many orange-colored enchanted puppets. The New Continent team and other teams will be in trouble.”

“Captain Liu Yan can lead the Land of Origin team to defeat three of their teams this time. This is too ridiculous!”

...

At this time, He Yang, the captain of the Pan-ocean Community team, was also suddenly full of joy.

He thought the Land of Origin team would lose, but He Yang had already accepted the result.

At most, there would be no additional rewards. He Yang was also willing to follow Liu Yan and join the Land of Origin team.

However, He Yang did not expect that Liu Yan would have such a powerful orange enchanted puppet.

In this case, Liu Yan’s team might be able to defeat all three of them!

He Yang was instantly stunned.

If Liu Yan’s team won, He Yang and members of the Pan-ocean Community team would receive generous additional rewards. They would also be able to recruit the three teams.

The strength of the Land of Origin team had undoubtedly increased a lot all of a sudden. The subsequent trials on the fifth level of the Tower would be much smoother, and they could make a name for themselves!

He Yang could not help but feel fortunate at this time. Of course, he still chose to surrender and join the Land of Origin team decisively.

At this moment, it seemed to be the right choice!

In the dueling arena.

Under Jin Cheng's command, members of the New Continent team had already begun the battle and rushed toward the army of enchanted puppets.

Although he knew the white enchanted puppet was quite powerful and was around level 40, he was not afraid of it.

The 40 white enchanted puppets would require most of the members of the New Continent team to deal with.

Moreover, there were many orange enchanted puppets and a red enchanted puppet, whose combat strength was unknown.

However, Jin Cheng was also clear that compared to the unknown combat strength of the magical puppets, the Red Star Empire team was not going to be able to hold on.

The Land of Origin team displayed their terrifying strength when fighting the Red Star Empire team. If the New Continent team did not act quickly and waited for members of the Land of Origin team to finish off the Red Star Empire team, Jin Cheng was not sure that his team could defeat the Land of Origin team.

If it dragged on until then, there might be a change in this final battle.

It would be too embarrassing if three teams were to lose the ultimate gambling duel against one team.

Jin Cheng didn't want such a situation to happen.

Liu Yan did not panic when he saw the New Continent team members charging over.

He let the enchanted puppets fight the New Continent team. He did not intend to fight.

Seeing that the members of the New Continent team were about to surround them, Liu Yan controlled the 40 white enchanted puppets to fight with the Gold Secret Art.

As for the orange and red enchanted puppets, Liu Yan did not let them fight.

Liu Yan wanted to test the white enchanted puppet's combat power.

Although he knew that the white enchanted puppet's combat power was around level 40, he was still very confident.

It was a war machine without life, so it was naturally not afraid of pain or fatigue. Its combat power was stronger than that of an ordinary awakened one with the combat power of a level 40.

But at the end of the day, this was the individual combat power of the white enchanted puppets.

Liu Yan did not know much about the group combat ability of the white enchanted puppets.

Liu Yan didn't try it out before. He only remembered it this time.

A team with the same number of members and the same strength, but with different cooperation, the combat power they could display was different.

The white enchanted puppets only knew how to fight on their own and did not know how to cooperate.

However, the white puppets did not know how to cooperate. Liu Yan could control them to fight together.

Liu Yan had the Gold Secret Art. He was able to control the enchanted puppets easily.

Especially since Liu Yan was flying in the sky with his SSS-grade special equipment, the Wings of the Wind God. Liu Yan could see the situation on the ground with a single glance from the sky. Naturally, it was easier for him to control the white enchanted puppets to cooperate in battle.

546 Enchanted Puppet Group Attack

Liu Yan controlled the white enchanted puppets to get into formation according to the battle formation that the members of the New Continent team had practiced before.

Among the members of the New Continent team, the ordinary members were similar to the white enchanted puppets. Naturally, the expert members were much stronger than the white enchanted puppets.

In terms of numbers, the New Continent team was way ahead of the white enchanted puppets.

In terms of overall combat power, the New Continent team surpassed the white enchanted puppet.

However, even in the face of many powerful New Continent team members, the white enchanted puppets were not afraid or flinched as war machines. They faced members of the New Continent team with cold faces.

Soon, the two sides came into contact and started fighting.

The moment they met, the white enchanted puppets had the upper hand against the stronger New Continent team.

Seeing this, Liu Yan was a little surprised. After careful observation, he finally found the reason.

The main reason was that the white enchanted puppets were not afraid of getting injured. Therefore, the white enchanted puppets would not dodge insignificant attacks at all. Instead, they would immediately counterattack as the opponents attacked them.

Even if they were injured, they did not feel pain. It didn't affect their attack at all. It was as if it had never been injured at all.

On the other hand, the members of the New Continent team were different.

Even minor injuries would cause bleeding and pain.

Up until now, these awakened ones had already gone through many trials and dangers. They had also seen countless battles of all sizes and were used to injuries.

However, these injuries would still cause them pain and affect their attack.

Hence, the White Enchanted puppets had the upper hand against the stronger New Continent team.

However, as the members of the New Continent team arrived and the formation unfolded, the battle situation was reversed. The members of the New Continent team suppressed the White enchanted puppets.

However, the white enchanted puppets were still in formation and relying on each other.

In addition, these white enchanted puppets were not afraid of getting injured. They ignored minor injuries and could continue fighting even if they lost an arm or a leg. Still, their combat effectiveness would be reduced.

The white enchanted puppets would only end the battle when their cores were damaged.

However, the core was incomparably sturdy. Even if it left there to be attacked by the awakened ones, it would still take some time before it could be damaged.

Furthermore, the white enchanted puppets would also dodge. They would not get attacked foolishly.

At the same time, the white enchanted puppet also caused many injuries to the members of the New Continent team.

After a round of battle, Liu Yan felt satisfied.

The white enchanted puppets' group combat power was better than Liu Yan had expected.

The 40 white enchanted puppets could withstand the attacks of the powerful New Continent team and fight back fiercely. The effect was much better than what Liu Yan had expected.

Based on Liu Yan's observation, he estimated that the 40 white enchanted puppets' group combat power should be close to that of the 60 awakened ones.

This number sounded a little ridiculous, but it was reasonable.

The white enchanted puppets were war machines immune to injuries and fatigue. They were also machines that worked well with each other, even perfectly.

In addition, Liu Yan was in the sky. After observing the specific situation of the battle, he used Gold Secret Art to precisely control the white enchanted puppets. It was why they had such a powerful group combat power.

For example, members of the Land of Origin team had been working together for a long time, so their tacit understanding and cooperation were quite good.

Even so, they were all awakened ones, humans.

Humans would be injured, afraid, and have their thoughts. At the same time, they would also have selfish motives. Although the overall cooperation was good, there were inevitably many problems with the small things.

In addition, Liu Yan was observing the overall situation from the sky. After discovering any problems, it was difficult for him to immediately and accurately inform members of the Land of Origin team and make adjustments.

Liu Yan could only shout to inform them, but doing so might not be as accurate, and there would also be a delay in time. With the delay, their battle achievements might be fleeting.

As for the white puppets, they were like machines that would not make any mistakes. Furthermore, Liu Yan could control them using Gold Secret Art. With a single thought,

the white enchanted puppets would act like Liu Yan's body. They would move according to Liu Yan's thoughts.

Liu Yan was relieved. In this case, the combat power of the enchanted puppets would be even stronger.

After this battle, the white enchanted puppets memorized the group combat method in their cores.

In the future, they could still cooperate without Liu Yan's real-time control. They could fight according to the combat methods in their memories.

Although Liu Yan might not be able to control the situation in real-time, he could still make reasonable adjustments according to the overall situation and the specific situation, which made his combat strength even stronger.

However, the white enchanted puppets' group combat power was already good if they could work together in battle.

Seeing that the training was almost done, Liu Yan quickly took control of the 41 orange enchanted puppets behind him and went forward to help.

If Liu Yan did not step forward to help, the core of the white enchanted puppets would be destroyed. He did not want that to happen.

The white enchanted puppets only had surface injuries. Liu Yan could repair them with materials in the future.

However, if the core were destroyed, the puppets would be destroyed. Liu Yan could not repair it and would have to make a new one.

Creating new enchanted puppets would consume more resources, and the combat methods they had just used to cooperate would be gone. They would need to be re-cultivated, which would undoubtedly be troublesome.

As for the orange puppets, Liu Yan did not control them to cooperate in battle. They fought as they pleased and defeated all the members of the New Continent team.

Liu Yan wanted to train these orange enchanted puppets for team combat, but the members of the New Continent team were too weak to be trained.

547 Terrifying Enchanted Puppet Army

As the 41 orange enchanted puppets arrived at the front and joined the battle, the situation was reversed.

The team members of the New Continent team initially had the upper hand and were about to break through the defense line of the white enchanted puppets. At this moment, they were hit hard.

Faced with these level 50 orange enchanted puppets, the members of the New Continent team were no match for them.

When the ordinary team members faced the orange enchanted puppet, they were almost defeated in two or three moves.

As for the experts of the New Continent team, they were able to handle the orange enchanted puppet one-on-one.

However, when an expert faced multiple orange enchanted puppets at the same time, they could not hold on any longer.

Even the top-tier masters of the New Continent team, including Jin Cheng, could not withstand the siege of three to four orange enchanted puppets and were forced to retreat.

The situation here was completely one-sided very quickly.

Not only were the representatives of the New Continent unable to defeat the army of enchanted puppets, but they could not even defend themselves. They would be defeated soon.

At the edge of the dueling arena, the members of the Pan-ocean Community team cheered when they saw the situation turn around and the enchanted puppet winning the battle against the New Continent team.

“Didn’t I say so? These orange enchanted puppets are the ones we’ve seen before. They’re all extremely powerful.”

“That’s amazing. Forty-one orange enchanted puppets with level 50 combat power. That’s half a team’s experts.”

“Half of the team of experts, who can withstand this?”

“Haha! the New Continent team will be the first to fight. How can they defeat the enchanted puppets?”

“I feel that even if the European Federation team and the Red Star Empire team were to fight, they wouldn’t be able to defeat the enchanted puppets.”

“Forty-one experts, this is too ridiculous.”

"I didn't expect Captain Liu Yan to lead the Land of Origin team to defeat all three teams simultaneously!"

"Haha, it seems like the three of them can't escape the fate of being absorbed."

"Hey, since our team is the first to join the Land of Origin team, and our attitude is so good, do you think our status will be higher than these three teams in the Land of Origin team in the future?"

"I think so, hahaha! Captain He's choice back then was correct!"

...

When He Yang heard his team members praise him for making the right choice, he suddenly felt very proud.

He Yang couldn't help but say proudly, "What I said back then was right. Following a character like Liu Yan is the right choice. Only by following this kind of person can we change our fate. Back then, there were still a few of you who opposed me. Now you know how correct my choice was, right? In the future, when your will strength improves. Don't forget that I'm the one who led you to this crucial step!"

When members of the Pan-ocean Community team heard this, they laughed and were very grateful to He Yang.

If He Yang hadn't made the right decision, they wouldn't have been so comfortable.

At the same time, the members of the European Federation team saw that the battle between the New Continent team and the enchanted puppet army was one-sided, and they all looked bitter. It was the opposite of the Pan-ocean Community team.

They had just been looking down on the enchanted puppets, and now they got slapped in the face.

"Holy sh*t, what's up with enchanted puppets? Why are they so strong?"

"Those white puppets are already strong. They are not weaker than the ordinary members of the New Continent team in one-on-one combat. These orange puppets are outrageous!"

"This orange enchanted puppet is too terrifying. It's not losing to an expert in a one-on-one fight. I feel like it's level 50!"

"Forty-one orange enchanted puppets are equivalent to forty-one powerhouses, and they're not afraid of getting hurt. Isn't their combat power too exaggerated? "

“It’s over. How can the army of enchanted puppets be so powerful? Can Liu Yan lead a team from the Land of Origin to defeat our three teams? ”

...

Members of the European Federation team could no longer stay calm.

At this time, Hans Wilson was also surprised, but he immediately reacted and ordered all the members of the European Federation team to join the battle.

If they continued to watch the show, the Red Star Empire team would be defeated by the Land of Origin team, and the New Continent team would be defeated by Liu Yan’s army of enchanted puppets. The European Federation team would have to face the Land of Origin team members, Liu Yan, and the enchanted puppets. They had no chance of winning at all. They had to join the battle immediately.

Naturally, Hans Wilson did not care about Liu Yan, who was in the air. After all, Liu Yan had only killed one person.

Hans Wilson quickly ordered the members of the European Federation team to head toward the battlefield between the Land of Origin and the Red Star Empire team.

As long as he could help the Red Star Empire team defeat the Land of Origin team, they would only need to work with the Red Star Empire team to face Liu Yan and the army of enchanted puppets. They would still have a good chance of winning.

Seeing this, Liu Yan naturally wouldn’t let Hans Wilson have his way.

Liu Yan glanced at the battle between the New Continent team and the army of enchanted puppets.

After the orange puppet joined the battle, the situation was already one-sided. Jin Cheng had already led the members of the New Continent team to defend in a defensive formation. They had no power to resist at all.

Seeing this, Liu Yan was relieved. He immediately ordered the enchanted puppet army to defeat all the members of the New Continent team in a free-for-all battle. Liu Yan also ordered the red tier 3 enchanted puppet to defeat Jin Chen and bring it to him. If anyone tried to stop him, he would knock them down as well!

In the dueling arena.

Hans Wilson was leading a group of members from the European Federation team as they charged toward the battlefield between the Land of Origin team and the Red Star Empire team.

The New Continent team was about to be defeated. However, Hans Wilson knew they could turn the tide if his team helped the Red Star Empire team against the Land of Origin team.

At this time, Liu Yan flew in front of the European Federation team as if he wanted to stop the entire team by himself.

The members of the European Federation team looked at him with contempt.

“You want to stop an entire team by yourself? Where is your unearned confidence come from?”

“We weren’t in a good state last time, so we let you win. But this time, it will be different.”

“That’s right. We’ve recovered quite a bit. Why should we be afraid of you now?”

“This Liu Yan is too stupid. He’s a fool to think he can stop us all by himself.”

“He had used the enchanted puppet army. How can he stop us now?”

“Liu Yan is powerful. He has successfully stopped the New Continent team with his enchanted puppets army.

...

548 One Person Block an Entire Team

Hans Wilson glanced at Liu Yan, who was high in the sky, but he was too lazy to respond.

Hans Wilson knew the most crucial thing now was to help the Red Star Empire team defeat the Land of Origin team.

The European Federation team must help the Red Star Empire team to defeat the Land of Origin team if they wanted to win the ultimate gambling duel.

After all, the New Continent team was no match for the enchanted puppets. It would not take long for the New Continent team to be defeated by the enchanted puppets.

By then, they would have to face the enchanted puppets army.

Hence, they could not afford to waste more time on Liu Yan.

Hans Wilson immediately ordered, “Don’t worry about Liu Yan. Continue to advance. A few experts and I will delay Liu Yan!”

Hans Wilson still remembered his last failure.

The experts from the European Federation team used their combination skill, Silver Moon Secret Skill, to attack Liu Yan. They had even exhausted all their strength to do so. However, Liu Yan still managed to dodge it with his terrifying speed.

This critical failure caused the experts, including Hans Wilson, to lose their combat power and have no chance to defend themselves. The European Federation team lost to the Land of Origin team.

Although they had lost the last time, Hans Wilson knew they were not in good condition and their combat power was not weaker.

On the other hand, they also underestimated Liu Yan. Otherwise, if they had fought more carefully, the seven of them should have been able to defeat Liu Yan.

In the current situation, they did not even need to defeat Liu Yan. They only needed the seven experts to hold Liu Yan back. This way, they could send the main forces to reinforce the Red Star Empire team to help them fight the Land of Origin team.

After dealing with the Land of Origin team, the European Federation team and the Red Star Empire could fight Liu Yan and his army of enchanted puppets. Wouldn't they be able to take them down easily?

When the members of the European Federation team heard Hans Wilson's order, they all headed toward the battlefields of the Land of Origin team and the Red Star Empire team. They had no intention of paying attention to Liu Yan.

As for the seven experts led by Hans Wilson, they prepared to join forces to deal with Liu Yan.

Seeing this scene, Liu Yan did not want to let them off.

Liu Yan needed to stall the European Federation team, not just a few experts.

Liu Yan did not hesitate and immediately activated his B-grade skill, Fog, and A-grade skill, Poison Control.

The effect of Fog was to create a white fog in an area, affecting the movement of the area.

At the same time, this white fog would contain a series of debuffs, such as speed reduction and defense penetration.

In addition, with the help of Poison Control, Liu Yan could attach a powerful poison to the white fog.

The Fog skill was only a crowd control skill, and its damage wasn't that high. Liu Yan hadn't used it for a long time because it wasn't of much help.

However, the situation was just right for using Fog.

The fog did not deal much damage, and its crowd control ability was average, so it was not effective against experts.

However, it was enough to deal with the ordinary members of the European Federation team.

Especially with Liu Yan's increase in strength, the range of his Fog skill also increased a lot. The range was vast, and it could directly cover all the members of the European Federation team.

In addition to Poison Control's effect, the Fog skill greatly affected the movement of the team members of the European Federation.

At the same time, Liu Yan also took out his S-grade weapon, Flying Cloud Mystic Bow.

The A-grade skill, Electrification, was activated, and an electric arrow was formed.

A-grade skill Split and A-grade skill Track were activated.

When the arrow was shot, it immediately split into seven arrows. Each arrow had a tracking effect.

The experts from the European Federation team were not affected by the fog.

However, the ordinary team members were greatly affected. At this moment, the electric element arrows were extremely fast. With the tracking spell covering them, they all hit the targets accurately!

The seven arrows instantly disabled seven ordinary members of the European Federation team!

Not only did Liu Yan's attack slow down the movement of all the members of the European Federation team, but it also instantly defeated seven members of the European Federation team. The effect was absurd!

"No, if we don't deal with Liu Yan, our normal members won't be able to advance." Derek Dole reminded.

In the current situation, Hans Wilson's previous plan had failed.

If the ordinary members ignored Liu Yan, the European Federation team would lose many members due to Liu Yan's terrifying long-range attack ability. It was a huge loss.

Although the skills that Liu Yan used did not have a strong area of effect damage, their control effect was pretty good, and their attack power was even more powerful.

Liu Yan attacked seven opponents at once. Although it wasn't much, his attack power was strong. He took care of all seven members in one go.

Such a long-range attack was terrifying. Naturally, the European Federation team could not leave Liu Yan alone.

As Derick Dole spoke, he used his skills to dispel the fog and detoxify the members of the European team.

Derek Dole's job was also field-controlling.

Compared to Xu Han, Derick Dole's area of effect control was not as strong, but he had some support skills that could help the members of the European Federation team detoxify.

Derek Dole and Xu Han's classes had advantages and disadvantages, but they were both powerful support classes that could control the battlefield. They would have a huge impact on the overall battle.

The captain of the European Federation's team, Hans Wilson, also realized this problem. He looked at the experts and ordinary members who were already prepared and ordered, "All experts, follow me to engage in close combat and quickly finish off Liu Yan. The rest of the team members suppress him from afar and cooperate with him in battle. Try to finish off Liu Yan in the shortest time possible!"

Since Liu Yan's long-range attack ability was so powerful, Hans Wilson could not ignore him. He might as well let the entire European Federation team deal with Liu Yan together and get rid of Liu Yan in the shortest time possible. Then, they would rush over to support the Red Star Empire team.

On the other hand, from Hans Wilson's previous contact with Liu Yan, Liu Yan seemed to be extremely good at long-range attacks.

Since that was the case, Liu Yan's close combat strength might not be terrifying. As long as he could get close to Liu Yan, he should be able to finish him off relatively quickly.

Finally, Hans Wilson was also clear that Liu Yan's speed was terrifying. Therefore, he could dodge the long-range attacks of these experts.

549 Liu Yan at Full Power

In this case, if they were to engage in long-range attacks, it would undoubtedly be disadvantageous for them.

However, it was different when they got close. Close-range attacks were not easy to dodge. Furthermore, it was seven against one. They would be able to take down Liu Yan very quickly!

The seven experts, including Hans Wilson, immediately rushed toward Liu Yan.

The ordinary members of the European Federation team also launched long-range attacks, ready to suppress and attack Liu Yan.

Seeing this, Liu Yan did not panic.

He activated the S-grade skill, Prison of Giant Trees.

A large amount of wood element condensed and formed a huge wooden prison, directly trapping the seven masters, including Hans Wilson.

Prison of Giant Trees's binding power was extremely powerful, and with the addition of the SS-grade Wood Secret Art, its restrictive ability was naturally terrifying.

Even if the seven experts, including Hans Wilson, could break through the Prison of Giant Trees, it would take a lot of time. It also achieved Liu Yan's goal of delaying them.

Immediately after, Liu Yan used his S-grade skill Rock Wall against the long-range attacks of the ordinary members of the European Federation team!

A large amount of earth elemental energy gathered, and a wall appeared in front of Liu Yan.

Liu Yan could control the size of the rocks.

Since he only needed to block the attacks for himself, Liu Yan shrunk the size of Rock Wall. It was enough to block the attacks for him alone, and he used the earth element saved from the shrinking to increase the thickness.

Rock Wall had been thickened to more than a meter thick.

The long-range attacks from the ordinary members of the European Federation team had also arrived, and they all hit Rock Wall.

After a round of attacks, Rock Wall had been reduced by quite a bit, but there was still more than half a meter of thickness!

The defensive power of the S-grade Rock Wall was so terrifying that it could withstand two rounds of long-range attacks from the ordinary members of the European Federation team.

When Liu Yan saw this, he could not help but feel surprised.

It was Liu Yan's first time using the Rock Wall since he had comprehended it. He never thought its defensive capabilities would be far beyond his expectations.

After all, it was a defensive skill comprehended from the SS-grade Earth Secret Art, and it was just that exaggerated.

On the other side, the ordinary members of the European Federation team were in disbelief when they saw that Liu Yan had easily blocked a round of long-range attacks.

They had seen Liu Yan's terrifying strength before, but they only knew that he was fast and had strong offensive abilities.

However, they did not expect Liu Yan's defensive ability to be so powerful.

Liu Yan had powerful offensive and defensive capabilities. At the same time, his speed and control skills were also impressive.

Liu Yan was equivalent to an all-rounded expert. It was too terrifying.

"How is this Liu Yan so strong?"

"Is this an awakened from the fifth floor of the tower? This is too ridiculous."

"He blocked all our attacks effortlessly. The gap between us is too big!"

"Liu Yan and I are not on the same level."

"This is too exaggerated."

"There's no way to fight at all?"

...

Members of the European Federation team were shocked by Liu Yan's terrifying strength.

At this moment, members of the European Federation team were all stunned by Liu Yan.

Facing the god-like Liu Yan, members of the European Federation team couldn't help but feel fear in their hearts.

A team of experts was afraid of one person. It sounded impossible, but it was happening.

In contrast to the bitter faces of members of the European Federation team, members of the Pan-ocean Community team at the edge of the arena cheered.

"Captain Liu Yan is too amazing!"

"This combat strength is indeed outrageous."

"Good boy, Liu Yan, my God!"

"One person blocking two teams. If I didn't see it with my own eyes, I wouldn't have believed it."

"That's right. This is too ridiculous."

"I feel that Liu Yan's strength has already far exceeded the fifth level of the Tower."

"I've never seen such an outrageous person."

...

Members of the Pan-ocean Community team were all surprised.

Seeing this scene, the members of the Pan-ocean Community team were naturally happy.

After all, given the current situation, the Land of Origin team would be able to defeat the Red Star Empire team.

The army of magic puppets released by Liu Yan crushed all members of the New Continent team.

Now, if Liu Yan held back the members of the European Federation team and bought some time for the other two teams, the Land of Origin team would win the ultimate gambling duel.

The Land of Origin team had launched the ultimate gambling duel against four teams simultaneously. At this moment, they fought against three teams at the same time, but they still won. It was ridiculous!

On the other hand, the members of the Pan-ocean Community team had long surrendered and joined the Land of Origin team.

If the Land of Origin team won, they also won.

If the Land of Origin team won, they would also receive generous additional rewards. At the same time, they could take in the other teams. The overall combat strength of the team would naturally be greatly enhanced.

He Yang, captain of the Pan-ocean Community team, was also overjoyed.

The current situation seemed to be great. Liu Yan could lead the Land of Origin team to defeat the other three teams and complete this seemingly impossible task.

At that moment, He Yang was even more grateful for his initial choice.

Following a captain like Liu Yan was worth it. They would be able to change their original fate by following Liu Yan!

Meanwhile, in the dueling arena.

Hans Wilson and a few other experts were trying their best to destroy the Prison of Giant Trees.

However, not only did the Prison of Giant Trees have a strong defense, but it also had a lot of restrictive abilities, making it very difficult to destroy. Moreover, the Prison of Giant Trees constantly absorbed the surrounding wood elemental power and repaired itself repeatedly.

It also caused the seven experts, including Hans Wilson, unable to damage the Prison of Giant Trees in a short time. It would take a long time to do so.

But in the current situation, time was the most important.

The situation was critical, and Hans Wilson could not care less. He immediately ordered, "Let's use our fusion skill to attack the ordinary members of the Land of Origin team. I'd like to see how Liu Yan blocks this attack!"

It was a fusion skill of the European Federation team. Initially, Hans Wilson didn't want to use it and only used it at the most critical moment.

550 Fusion Skill

Hans Wilson was clear that since it was a trump card skill.

It was best not to use it and keep it as a trump card.

After all, even if they won the ultimate gambling duel, the Land of Origin team would still have to compete with the Red Star Empire team in the coming year. If they hid this trump card, they would have a better chance of defeating the Red Star Empire team next year and obtaining the generous reward for first place.

In the previous battle against the Land of Origin team in the water attribute territory, members of the European Federation team were physically exhausted. They could not use this trump card at all. Otherwise, Hans Wilson would have used it long ago.

The current situation was too critical, and Hans Wilson couldn't care less.

The competition with the Red Star Empire team in the coming year was not the priority. At this moment, they had to win the final battle before them and obtain generous additional rewards first.

Members of the European Federation team were still a little flustered at first.

After all, Liu Yan had blocked the attack of an entire team by himself. It was simply too outrageous. It was the first time they had seen such a situation.

However, after hearing the order from their captain, Hans Wilson, they regained their composure.

They did not have to think twice about using their trump card.

Immediately, the ordinary members of the European Federation team began to cast spells.

The casting process of each team member was somewhat similar, but the details were different.

Instantly, elemental powers of various attributes were condensed and gathered.

S-grade fusion skill, Silver Moon Slash, activated!

All members of the European Federation team gathered their strength together and formed a huge Silver Moon Scimitar.

The S-grade fusion skill, Silver Moon Slash, was like the S-grade fusion skill that Hans Wilson and the other experts had used previously. They were both powerful S-grade fusion skills with incomparable power.

And the S-grade fusion skill Silver Moon Secret Skill from last time was the condensation of the power of seven experts.

This time, the Silver Moon Slash was the combination of the strength of the ordinary members of the European Federation team.

Although they were only ordinary members and their strengths couldn't be compared to experts, they had more people. There were dozens of them, so their power was naturally stronger.

At this moment, Liu Yan, who was opposite him, was frowning.

This S-grade fusion skill, Silver Moon Slash, seemed extremely powerful.

With the help of his S-grade skill, Omniscient Insight, Liu Yan could sense that the Silver Moon Scimitar formed by the various powers of the European Federation team members contained terrifying power.

This power was too strong, and even Liu Yan would not withstand it.

Helplessly, Liu Yan was unable to dodge.

After all, the Land of Origin team was right behind him.

At this moment, members of the Land of Origin team were still fighting with members of the Red Star Empire team. Members of the Land of Origin team had already gained a significant advantage. It was just that the battle had yet to end.

If the terrifying Silver Moon Scimitar were allowed to hit the ordinary members of the Land of Origin team, the situation would be turned around. Then, the Red Star Empire team would win.

As a result, not only would the Land of Origin team possibly lose the final battle, but many members of the team would also be injured.

Members of the Land of Origin team still had to go to the sixth level of the Tower for the trial.

The sixth level of the Tower was dangerous, so he naturally had to go in his best state.

If team members of the Land of Origin team were to go there with injuries, it would be more dangerous, and there might even be many casualties.

Therefore, Liu Yan would not allow the powerful Silver Moon Scimitar to hit members of the Land of Origin team.

Liu Yan couldn't help but think of a way to deal with it.

At this moment, Hans Wilson, who was in the Prison of Giant Trees, became anxious when he saw Liu Yan in the sky. He sneered and said, "Liu Yan, don't you have a fast speed? Let's see if you can successfully dodge this time, or do you dare to dodge? I'd like to see how you're going to block the joint attack of all the members of the European Federation team this time!"

Although Hans Wilson witnessed Liu Yan's unimaginable terrifying strength, he was still shocked.

However, Silver Moon Slash was a powerful fusion skill performed by members of the European Federation team. It was naturally powerful.

Hans Wilson also believed that this attack would be able to severely injure Liu Yan and the other members of the Land of Origin team, helping the Red Star Empire team to turn the situation around. Then, they would work together and successfully win the final battle.

The members of the Pan-ocean Community team were also worried when they saw this scene.

"Holy sh*t! Isn't the power of this S-grade fusion skill, Silver Moon Slash, a little too terrifying?"

"Although Captain Liu Yan is strong, he shouldn't be able to take this attack head-on."

"That's right. After all, it's an attack formed by all the members of the European Federation team. It's extremely powerful."

"I've heard that the European Federation team is good at some fusion skills. Not only can they gather the strength of the team members, but they can also have a strong effect."

"Captain Liu Yan can't be stopped at all. We can't take him head-on."

"However, if Captain Liu Yan doesn't block this attack, it'll hit members of the Land of Origin team. Won't the Land of Origin team lose the final bet this time? "

"That's right. If the Land of Origin team loses, Liu Yan will have to face the European Federation team and the Red Star Empire team with his army of magical puppets. It will be extremely difficult."

"Are Liu Yan and the Land of Origin team going to lose this time?"

...

He Yang frowned. He didn't expect the captain of the European Federation team, Hans Wilson, to be so shameless. Hans Wilson would resort to unscrupulous means to win this ultimate gambling duel. Hans Wilson even used the trump card. It would probably seriously injure members of the Land of Origin team.

To win this ultimate gambling duel, Hans Wilson had gone crazy!

At the same time, a Silver Moon Scimitar with a variety of attributes and terrifying power was already attacking Liu Yan.

The Silver Moon Scimitar was the combination of all the strengths of the European Federation team members and was extremely terrifying.

No matter how strong Liu Yan was, he was still just one person. There was no way he could withstand this terrifying S-grade fusion skill, Silver Moon Slash.

If Liu Yan dodged, the other members of the Land of Origin team behind him would suffer.

The Land of Origin team was about to win against the Red Star Empire team. If they were severely injured, it would be a complete reversal of the situation!

At this moment, Liu Yan's figure was like an ant in front of the Silver Moon Scimitar.
