### 581 Three Types of Battle Tokens!

“After the siege token is activated, the attacker will directly come to the territory barrier and attack the opponent’s territory. The defenders will have to fight on their territory with the help of walls and various defensive buildings, so they naturally have some advantages in defense. One team must have stronger power to siege the opponent’s territory successfully. This is the weakness of the siege token, but the advantage is that if the siege fails, there will be no punishment. They will only be teleported back and lose a siege token. And if we succeed, we can directly occupy the opponent’s territory and obtain the team members, resources, and everything else within the territory. The benefits are the greatest!”

“The group battle token is different. As the name implies, it’s a group battle. After it’s activated, all the members of both sides will be transported to an open battlefield. The two teams will directly face each other in a group battle. The advantage of the group battle token was that it wasn’t as difficult as sieging a territory. It only required the entire team to defeat the other party. The disadvantage is that the winning bet is set by both parties. If you win, you will get less, and if you lose, you may lose.”

“The last one is the single battle token similar to the group battle token just now. The only difference is the number of participants. The group battle token involves all the members of the two teams, while the single battle token involves 10 members of both teams for single battles. The loser will leave the stage directly, and the winner will continue. Whoever stands at the end will win this round of duels. The advantage is that as long as the expert team member is stronger than the opponent, the difficulty is much lower. The disadvantage is the same as the group battle token. Both sides will have a bet, the losing side will bear the loss!”

After listening to Jin Cheng’s explanation, the team members all had an understanding of these three types of battle tokens. They immediately began to discuss.

“This battle token sounds powerful.”

“With battle tokens, we can directly start a battle. There’s no need to reach the opponent’s territory.”

“In that case, aren’t we in danger? After all, we have just entered the sixth level of the Tower, so our strength definitely can’t compare to those who’ve been on the sixth level for a few years.”

“That’s right. Especially this siege token. They can defeat us in an instant.”

“If a strong team were to issue a siege token to attack our team, we’d be finished.”

“This is bad, aren’t we in danger?”

...

The team members were all worried.

The sixth level of the Tower was a Tower level that had fused thousands of regions, including the powerhouses of thousands of planets.

They were the most outstanding students in this batch of students on the Blue Planet, and their strength was not weak.

However, it was naturally not enough compared to the thousands of teams from other planets.

It was especially so when the other teams had entered the sixth level of the Tower before them.

After training on the sixth level of the Tower for some time, their overall strength had naturally improved a lot, and they were more powerful Team Origin.

For a moment, all the team members were a little worried.

They thought they could rely on the special environment of Wind Barrier to ensure their safety temporarily. In addition, the sixth level of the Tower was too large, and the other teams would not be able to come into contact with them.

However, the three battle tokens existed, and things had become difficult.

The other two battle tokens were manageable. At most, they would bet lesser things, so they would lose less if they lost.

However, if they lost in a siege, they would lose everything, including their territory. They might even be massacred, and all of their members would die.

Team members didn’t even dare to imagine such heavy losses.

Jin Cheng saw his team members were worried, so he quickly said, “You don’t have to worry too much. When using the three types of battle tokens to choose a target, it’s either random or specified. They need to know our team number to choose us specifically. We just arrived on the sixth level of the Tower, and the other teams don’t know us at all, so they don’t know our team number. We may get selected by the opponents randomly, and that’s nothing we can do. We can only depend on luck.”

When everyone heard this, they suddenly realized that this was undoubtedly much better.

Otherwise, if they were to be declared war by a strong team the moment they reached the sixth level of the Tower, they would be finished.

Now that the other teams didn't know Team Origin's team number, they could only try their luck to get Team Origin randomly. It was undoubtedly beneficial to Team Origin, as they had a certain amount of time to develop.

When Liu Yan heard this, he nodded his head slightly. He had a rough understanding of these three types of battle tokens.

All in all, the three battle tokens had their advantages and disadvantages.

In terms of benefits, the siege token was the most but was also the most difficult. After all, the sieging side could use the terrain and territory to defend.

The attacking side had to be much stronger than the defending side to take them down.

For now, Team Origin was relatively safe. They had just arrived on the sixth level of the Tower, so the other teams didn't know them at all. The other teams didn't have the chance to declare war on them.

As for those who were unlucky and were randomly selected by a team, they could only blame their bad luck.

At the thought of this, Liu Yan turned to his team members and said, "At the moment, our team is still weak on the sixth level of the Tower. We should not worry about the battle tokens now. We can't declare war on any team. For now, it is more important to build the territory and develop it. We should improve our strength first and have enough defensive power, then consider taking the initiative to declare war later."

All team members agreed.

"Yeah, it's better for us to keep a low profile now."

"That's right. We can't reveal our numbers. Otherwise, we'll be finished."

"Let's get stronger first. We'll talk about the rest later!"

"Our talents aren't weak. As long as we're given time to grow, we won't need to fear the other teams."

"I heard that the sixth level of the Tower is a good place to improve our strength. We must seize this opportunity."

...

After sharing all the information that the New Continent team had, Jin Cheng retreated.

The four teams had already shared their intelligence, and only Fourth Squad was left, which was the original Pan-ocean Community team.

He Yang walked out with a slightly embarrassed expression.

The information regarding the sixth level of the Tower was difficult to obtain.

The Pan-ocean Community was the weakest among the five continents.

Therefore, He Yang naturally knew very little about the sixth level of the Tower.

He Yang looked at the crowd awkwardly and said, "Well, we don't have any information on the sixth level of the Tower. I'm really sorry."

When Liu Yan heard this, he didn't mind at all. "It's fine. It's okay if you don't have any information. We're sharing information anyway. We're all a team now, not just cooperatives."

582 Building a Territory

He Yang heaved a sigh of relief when he heard that. "Alright, our squad will contribute more in other areas to make up for it."

He Yang knew very well that it was difficult to obtain information on the sixth level of the Tower.

The information shared by Luo Qingcheng and the other three squads was not much. However, it was important, especially for the team that had just arrived at the sixth level of the Tower. It could play an unimaginable role.

In this aspect, Fourth Squad naturally had the advantage over the other squads.

He Yang was well aware of this, so he planned to contribute more to the team in other aspects in the future to make up for it.

The members of the other teams didn't mind.

Although the other teams had no contact with the Pan-ocean Community team, and other teams even had conflicts with them, the Pan-ocean Community team was still strong.

However, they were now a team and in the same boat.

Especially after reaching the sixth level of the Tower, they would face difficult and dangerous situations.

They had to work together to face and overcome these difficulties.

“Captain He, you’re too polite. We’re already a team, so there’s no need to fuss over this.” Jin Cheng said with a smile.

Hans Wilson nodded and said, “That’s right. Why are you still saying such things?”

Ye Yifan didn’t say anything, but his face was also calm. He didn’t care about this at all.

Xu Han had been with He Yang before. He had a good relationship with the Pan-ocean Community team, so he did not care about these things.

Liu Yan also looked at his members and said, “Alright. We’re almost done sharing the information. Everyone should pay attention to what Captain Jin Cheng just said. From now on, no one is allowed to reveal our team number or position without my permission. We can’t expose our existence to avoid attracting danger. We are currently the weakest among the many teams on the sixth level of the Tower, so we must be careful.”

“Yes!”

“Yes, Captain!”

Members of the five squads all responded.

After listening to the information, they all understood the importance of this matter and could not afford to be careless.

Liu Yan nodded slightly. “Let’s build the territory first. We’ll talk about the rest after that.”

As he spoke, he took out the Golden Lord Token from his spatial ring and prepared to start building their territory.

All members were looking forward to it.

Luo Qingcheng ordered, “All squad leaders, take your members and spread out.”

To build a territory, they naturally needed to give up space.

Then, the five squad leaders led their members and made space for Liu Yan.

The members discussed in low voices as they looked expectantly at Liu Yan, who was in the middle of the open space.

“I wonder what this territory will look like?”

“I heard that the newly built territory is level 0, so it’s probably not much. It will only become more powerful after the upgrade.”

“That’s right, I’ve heard about it too. It seems the defensive capabilities of the powerful territories are terrifying. Even a single team can’t take them down.”

“Yes. Although the benefits of the siege token are great, it is extremely difficult with the existence of the territory.

“This is a gold territory, so it should be much more powerful than a newly built level 0 territory, right?”

...

The members were all discussing in low voices.

At the same time, Liu Yan, who was in the middle of the space, took out his Golden Lord Token and was ready to start building the territory.

The barrier above was neither too big nor too small, with a radius of about one kilometer. The space was relatively limited.

The terrain within the barrier was mostly flat, with only a small mountain. There wasn’t much of a difference in the terrain.

Hence, Liu Yan didn’t need to worry about the terrain. He could build the territory in the middle of the territory barrier.

Liu Yan looked at the Golden Lord Token in his hand and activated it with his energy.

As the energy in Liu Yan’s body flowed into it, the Golden Lord Token, which was already emitting a shiny golden light, became even more dazzling.

Immediately, Liu Yan felt a slight pain in his hand.

He looked down and saw the Golden Lord Token cutting his finger.

His blood was flowing into the token as if it was trying to recognize him as its master.

Liu Yan was slightly surprised.

After all, Liu Yan’s physical body was no longer the same as before.

After the reconstruction of his body and all sorts of upgrades, Liu Yan's physical defense was incredible.

But now, Liu Yan's skin was both flexible and firm.

Even low-level weapons could not cut through Liu Yan's skin, let alone ordinary blades.

However, this Golden Lord Token could cut through Liu Yan's skin easily. It was extraordinary.

Liu Yan was clear that apart from the establishment of a territory, the Golden Lord Token itself was also an extraordinary existence.

Liu Yan kept this in mind and decided he would explore the Golden Lord Token when he had the chance.

As Liu Yan's blood flowed into the Golden Lord Token, it had already completed the owner recognition process.

In the next moment, the Golden Lord Token flew into Liu Yan's body.

At the same time, a new territory appeared around Liu Yan.

Liu Yan was a little surprised. He didn't expect the Golden Lord Token would enter his body directly after the territory was built.

Liu Yan sensed it carefully and realized that after the Golden Lord Token entered his body. It did not do anything else. It quieted down, and he decided not to bother about it anymore. He would research it later.

Immediately, Liu Yan looked at the surrounding territory.

Rather than calling it a territory, it was more like a small village.

In the village, there were hundreds of simple wooden houses. At the edge of the territory, there were simple fences surrounding a courtyard. It was not a city wall at all, so it had no defense at all.

Members of Team Origin were disappointed when they saw the new territory.

Although they had already guessed that the newly built territory would be level 0 and not too flashy, it was a Gold Lord Token after all. They did not expect it to be so underwhelming.

In the entire territory, there were only hundreds of wooden houses and a fence that looked like a mud wall. It was indeed a little shabby.

“D\*mn, isn’t this too shabby?”

“How is this a strong territory? This is a small village!”

“I’m from the countryside. This fence is even worse than my hometown’s.”

“This one-meter-tall fence is not even as tall as me. Is it a joke?”

“Indeed, what defensive ability does this fence have? I don’t understand.”

“If other territories use the siege token to declare war on us, how can our territory provide us with any help?”

...

The team members were all extremely disappointed.

## **Read Global Towers: Starting With The SSS-Rank Talent, God-Tier Extraction Chapter 583 - 583 Magical Wooden Houses and Mud Walls**

### **583 Magical Wooden Houses and Mud Walls**

Liu Yan was also slightly disappointed. He didn’t expect the new territory to be so ordinary.

However, Liu Yan’s expression changed after he used his S-grade ability, Omniscient Insight, to sense the situation.

This seemingly normal territory was not that ordinary.

With his Omniscient Insight, Liu Yan immediately discovered the extraordinariness of this territory.

First of all, there were hundreds of wooden houses. They looked like small wooden houses and were extremely simple and unrefined.

However, these pieces of wood seemed to be made of special materials.

In addition, there seemed to be a special small array formation in each of these small wooden houses.

Under the influence of these special small array formations, the surrounding spiritual energy was constantly gathering in the middle of these wooden houses.

Without a doubt, cultivating in these wooden houses would yield twice the result with half the effort, and his strength would advance very quickly.

Even if he did nothing and stayed in these wooden houses, his strength would probably slowly increase under such dense spiritual energy.

These wooden houses were like treasures!

Besides these wooden houses, the fence at the edge of the territory was not a real fence.

On the outside, it looked like a fence made of mud, but that was not the case at all.

Liu Yan, who possessed the SS-grade Earth Secret Art, could feel the dense earth elemental energy within the fences.

There was no doubt that the defensive capabilities of these fences would be great.

Liu Yan looked at his disappointed team members and laughed with a strange expression. "Everyone, this territory only looks simple and crude, but it's not."

When the team members heard Liu Yan's words, they were all a little confused. They did not understand what Liu Yan meant.

This territory, or perhaps this village, only had wooden houses and fences that looked like mud walls. What was so special about it?

While the ordinary members were confused by Liu Yan's words, the experts also used their methods to discover that something was wrong with the territory.

Sun Wen walked up with a face full of surprise and said, "It's magical. I've never seen such arrays before!"

Seeing this, Ye Yifan couldn't help but feel a little puzzled.

He knew Sun Wen had done a lot of research on array formations. He must have discovered something.

Sun Wen didn't respond. He seemed to be engrossed in it. He walked into a small wooden house with an infatuated look. After fiddling with it for a while, he came out with a face full of joy.

The other team members were also attracted by Sun Wen. They looked over curiously.

After Sun Wen walked out, he looked at Ye Yifan and then at his team members. He said with a face full of joy, "Everyone, these wooden houses are all treasures. Although I don't know how these arrays were formed, they are useful."

When the team members heard this, they were all a little surprised. They didn't think the small wooden house that looked ordinary would be so extraordinary.

"An array? There's an array in every wooden house?" Xu Han was surprised.

Xu Han was proficient in all kinds of spells. Although he was not good at array formations, he had some understanding of them.

Xu Han knew that it was not easy to make an array.

However, the hundreds of wooden houses in front of him all had arrays.

Xu Han was surprised by such a big deal.

Xu Han knew better than the other team members how difficult it was to make so many arrays.

Sun Wen nodded. "That's right. At first, I was also surprised. How much effort must it take to create so many array formations? Even if they are just small arrays, they are still powerful. After I observed and felt it for myself, I am sure these are indeed arrays. Although I don't know how these arrays were formed in such a small wooden house, they exist. The function of these arrays is simple but extremely useful, and that is to gather spiritual energy! As long as you're in this small wooden house, your strength will slowly increase without doing anything. If you cultivate in the wooden house, you'll get twice the result with half the effort, and your strength will improve rapidly!"

When the members of the five teams heard this, they were all shocked.

"D\*mn, these wooden houses are so powerful?"

"It seems that I've misunderstood these wooden houses. I'm sorry!"

"There's such a good thing?"

"From now on, if we stay in the wooden house when we have nothing to do, won't our strength keep increasing?"

"How is this a wooden house? It's a treasure!"

"That's great. I'll cultivate in the wooden house in the future and improve my strength!"

...

Sun Wen was also overjoyed as he nodded. "Not only that. My injuries, physical strength, and energy will constantly recover in these wooden houses. It's simply amazing. The role of this territory is far more powerful than it looks on the surface!

When the team members heard this, their faces were filled with joy.

They didn't think these ordinary wooden houses would have such a magical effect.

At this moment, Liu Yan's expression was strange as he said, "Other than the wooden houses, the fences are also extraordinary."

After the team members heard this, they all looked at the fence at the edge of the territory in confusion.

The one-meter-tall mud wall looked fragile and ordinary.

Many experts were also a little confused.

Although they couldn't accurately figure out the use of the small wooden house like Derek Dole, they also noticed that something was wrong with the wooden house.

However, the fences looked very ordinary.

Then, Murong Xue walked out at this moment. She had a strange expression on her face. "The earth elemental energy in the fence does seem to be a little dense."

Murong Xue was a rock pugilist. Her perception of the earth element was much clearer.

Ye Yifan also nodded. "There is a lot of earth elemental energy in the fence. It seems to be extraordinary."

"Let me test it out." As Zheng Tainan spoke, he walked over to the fence and immediately threw a punch.

Zheng Tainan was a swordsman. He was good at using a sword but not good at punching.

However, he was still a melee class and an expert, so his strength was naturally not weak.

Then, Zheng Tainan's punch landed on the fence.

The seemingly fragile mud wall did not seem to have any reaction to Zheng Tainan's punch. It did not move at all, except for some flying dust.

When the team members behind saw this, they were a little surprised.

“Zheng Tainan, did you use any strength?”

“This mud wall looks so weak. Can’t you break it with one punch? ”

“It didn’t break, but there’s no crack at all.

“What’s going on? Zheng Tainan’s strength isn’t weak.”

“Zheng Tainan, are you acting?”

...

The team members were all suspicious.

Zheng Tainan’s expression changed. He had used almost all of his strength.

However, the mud wall did not move at all.

Zheng Tainan immediately understood that the mud wall was not as weak as it looked on the surface.

Zheng Tai Nan also believed Captain Liu Yan’s words. This mud wall might look weak, but it was not ordinary.

“If you don’t believe me, you’ll know when you try it.”

After saying this, Zheng Tainan retreated.

#### 584 Territory Establishment

When the team members heard this, they were all a little skeptical. Many of them went forward to try.

However, after many attempts, the team members realized that even with their strength, they could not even move this seemingly fragile mud wall.

The seemingly fragile mud wall was extremely tough.

In the end, Murong Xue, who was extremely strong, stepped forward to test it out. She had to use her full strength to finally shake the mud wall, causing a few cracks to appear. But that was it.

Even with Murong Xue’s strength, she could not break through the mud wall.

A few members tried to use elemental attacks, but it was still the same.

Even long-range attacks were unable to shake the mud wall.

The defensive power of this mud wall was astonishingly strong.

The team members were all shocked.

“I didn’t expect this mud wall to look so ordinary, but it’s so sturdy.”

“This defensive power is like A-grade defensive equipment.”

“Not only can it defend against physical attacks, but it can also defend against magical attacks. It’s powerful.”

“My god, this mud wall is quite sturdy!”

“It’s a pity that this wall is too short. It’s only a meter tall. If it were higher, it would be an advantageous defense for us.”

“That’s more than enough to block long-range attacks. Unless the opponents have team members who can fly, the threat they pose to us will be greatly reduced.”

...

Liu Yan looked at his team members and concluded, “The defensive power of this mud wall is not bad. It has a defensive ability. However, it is limited because it is too short. Perhaps it will be much better after the territory upgrades. After all, our territory is still at level 0.”

The team members all agreed. It was only a newly built level 0 territory and still in its weakest form.

After the construction and upgrades, Liu Yan believed that the territory would improve in all aspects, which would be of great help to them.

Although the current level 0 territory had very few things and was very simple, only wooden houses and mud walls, it could still be helpful to the entire Team Origin.

After building the territory, Liu Yan found that as the team leader, he could open the village interface.

Liu Yan had a look of anticipation on his face as he immediately opened it to check.

[ Territory name ]: Origin Territory

[ Coordinate ]: 4252,5323,7542

[ Territory potential]: Gold

[ Territory level ]: level 0 (village)

[ Territory population ]: 356

[ Member's combat strength ]: 11-star member (1), 8-star member (5), 7-star member (5), 6-star member (23), 5-star member (106), 4-star member (188), 3-star member (28)  
]

[ City wall level ]: 0 (none)

[ Territory buildings: level 0 wooden houses (300), level 1 wooden houses (50) ]

[ Defensive structures: None ]

[ Functional buildings: None ]

[ Territory storage: None ]

[ Barrier area ]: 3 square kilometers

[ Territory war beast ]: None

[ Territory special function ]: Teleport back to the territory (level 0)

On the new interface, the default name of the territory was Origin Territory, which was a simplified reference to the Land of Origin team. Of course, Liu Yan could also change the village's name, but it seemed unnecessary.

The coordinates of the territory were the most confidential existence at the moment.

As long as the other teams knew the coordinates of their territory, they could directly use the three battle tokens to declare war.

Although Team Origin wasn't weak, they had just reached the sixth level of the Tower. Naturally, they would be weaker than many teams that came before them.

During this period, it was best for Team Origin not to have conflicts with other teams. They should focus on developing, and improving the strength of their members. Furthermore, building and improving their territories.

It was undoubtedly more secure to start a dispute after they had grown stronger.

The coordinates of the territory could not be leaked.

Once it was leaked, it would bring disaster to the entire Team Origin!

Fortunately, Liu Yan asked his team members and found out they also had a territory operation interface. It was simple and different from Liu Yan's. There was no information on the coordinates of the territory.

Liu Yan decided to keep the coordinates of his territory a secret. It would be better if he were the only one who knew it.

Liu Yan wouldn't reveal this to any of his team members.

It wasn't that he didn't trust them, but the more people knew about the secret, the more likely it would be leaked.

The coordinates of the territory concerned the survival of Team Origin, so Liu Yan naturally had to be extremely careful.

Seeing the "territory potential" column, Liu Yan was surprised.

He didn't expect a territory would have the same potential as awakened ones, fierce beasts, equipment, and treasures.

Liu Yan was right. The reward for first place in the fifth level trial was not simple. It was not as simple as having more wooden houses at the start of the trial or having a larger territory barrier.

From the looks of it, there was still a big gap between the potential of a Golden Lord Token and a regular one.

Could it be the gold territories with high potential could have even more improvements after being upgraded?

Liu Yan secretly guessed. If that were the case, then the Golden Lord Token would be extremely important to their team's trial on the sixth level of the Tower. It would bring them more benefits and help them improve their strength.

In addition, the territory's potential was divided into levels. Did that mean that Liu Yan could also use special methods to increase the territory's potential level and make it stronger?

However, Liu Yan could only guess in his heart. He could not be sure.

As for the specifics, he could only wait until he went to the trial on the sixth level of the Tower and figure it out himself.

Liu Yan continued to read. The population of the territory was not surprising. The five teams had formed a team. As a result, the number of members increased, reaching 356 members.

However, the combat strength column at the bottom surprised Liu Yan. All the team members had been divided into different combat strengths.

At this moment, all team members had also noticed the changes in their attribute panels. A new column had appeared, and all the team members had been divided into combat strengths.

“Strange, why is there still a combat level?”

“My combat strength is at the five-star. What kind of level is that? is it powerful?”

“How come I’m only at 3-star? What’s going on?”

“How do they divide our combat star levels? I don’t understand!”

“Old Chen can’t beat me in a one-on-one fight. How come he’s a five-star warrior while I’m only a three-star warrior?”

...

The team members were all confused.

Seeing this, Derek Doyle walked out and explained to the crowd, “I’ve heard about this before, but I’m not sure about the details. In general, it’s based on the potential, level, attributes, talents, skills, and even equipment of a team member. It doesn’t seem to include some special skills, and the attribute restraint is ignored. For example, Old Chen might not be able to beat you in a one-on-one fight, but he’s good at long-range spells. He might not be able to beat you, a warrior, in a one-on-one fight, but he’s much more useful than you in a group fight. Hence, his combat star rating is also higher than yours. All in all, 5-star combat power is about the same as a level 50.”

## 585 Combat Star Level

After hearing Derek Dole’s explanation, the team members finally had a preliminary understanding of the combat star level.

All in all, the assessment of the combat star level was accurate. It could integrate the many factors of each team member to make a comprehensive assessment of their combat strength.

However, there were some secretive skills, such as the fusion skill of the Third Squad or the European Federation team. Those were not included in the combat star level rating, but it was still accurate.

Of course, members of the same star level had different combat strengths, but they were generally at the same level.

In addition, there were also situations such as attribute restraint and class restraint.

Those with a higher star level might be suppressed by those with a lower star level. Naturally, they would not be able to defeat the other party.

Immediately, the team members asked each other about their star level.

After some understanding, everyone found out that most ordinary members of the five teams were four-star and five-star warriors, which were equivalent to the level 40 and level 50 ordinary awakened ones. There were some four-star warriors, but they were probably not far from five-star.

In addition, a small number of members had three-star combat power. Most of them were healers, control professions, and other support professions. They were not good at fighting, so their combat power was naturally limited, to only three-star.

Of course, there was an exception, and that was Chu Long.

It seemed like Chu Long's healing and support abilities were too strong. Her combat star level was actually six-star. And a six-star awakened one was already considered an expert.

In the five teams, there were mainly experts such as Chu Cunrui, Zheng Tainan, Liu Qing, and Liu Ning. Their combat star level was six-star, and they were all experts in the five teams. The entire Team Origin had a total of 23 six-star experts.

Then, Murong Xue, Sun Wen, he yang, Jin Cheng, and Derek Dole were the five people to reach the 7-star level.

Further up were Allen Smith, Xu Han, Ye Yifan, Luo Wei, and Hans Wilson, the five top-tier experts. They had reached eight-star combat strength and were already the top masters in Team Origin.

Finally, there was an exception. There was a gap. There was an 11-star combat level member!

"D\*mn, this is ridiculous. Our team has 11-star members!"

“Captain Ye’s battle level is only eight stars, but he’s a genius from our Red Star Empire team.”

“There’s a huge gap between every star of combat power. How did someone manage to achieve 11 stars of combat power? ”

“Who is this member with 11 stars of battle power? Could there be a problem with the assessment?”

“Are you joking? Our team’s number one expert is, without a doubt, Captain Liu Yan!”

...

Immediately, the team members looked at Liu Yan in shock.

The members of the five teams all knew that Liu Yan’s combat strength was extremely terrifying.

After all, Liu Yan could annihilate two teams in the ultimate gambling duel on the fifth level of the Tower.

Although he had many enchanted puppets, Liu Yan’s combat strength was also extremely exaggerated. He had single-handedly destroyed the powerful European Federation team.

This level of combat strength was ridiculous.

However, when everyone saw the rating of Liu Yan’s combat strength, they finally realized how ridiculous and exaggerated Liu Yan was.

“It should be Liu Yan. Only Liu Yan can reach 11-star.” Xu Han said.

Ye Yifan also looked at Liu Yan in shock. Eleven stars of combat power meant that Liu Yan’s combat power had already reached the combat power of a normal awakened who was at level 110.

And Liu Yan’s actual level seemed to be just over level 40.

At level 40, he had the combat power of a level 110 awakened one. How ridiculous.

Murong Xue wasn’t surprised at all. She was able to reach 7 stars, so Liu Yan was already stronger than her by several levels. On the fifth level of the Tower, Liu Yan had gained another huge improvement and was now ahead of Murong Xue by four levels. It was only natural for him to reach 11-star combat level.

Allen Smith did not say anything, but he stared at Liu Yan with a face full of suspicion. Although he had expected that Liu Yan was much stronger than him, he did not expect Liu Yan's strength to have reached such a terrifying level.

Luo Wei, on the other hand, felt much better.

After Luo Wei was defeated by Liu Yan in speed, concealment, and assassination skills, he suffered a huge blow.

However, it was reasonable. After all, Liu Yan was more powerful than him by three levels and had reached the 11-star of combat level. It was not a surprise for Liu Yan to completely crush him in his most skilled field.

"Brother Liu Yan is too powerful." Chu Long couldn't help but feel happy for Liu Yan.

Luo Qingcheng looked at Liu Yan with a complicated expression.

Although she didn't know Liu Yan as early as Murong Xue, Chu Long, and Liu Yan, she had known him for quite some time. She had already gotten to know him when they were on the third-a-half level of the Tower. They had even developed a close relationship.

At that time, Luo Qingcheng could see that Liu Yan's strength was not ordinary, and he had an extremely heaven-defying talent.

However, he did not expect Liu Yan to grow so quickly and possess such terrifying strength in such a short period.

Luo Qingcheng knew Liu Yan had already grown from a genius to a strong man.

Luo Qingcheng also knew Liu Yan would grow even more powerful with his heaven-defying talent over time.

Although Liu Yan was already extremely powerful, he was still far from his limit.

With Liu Yan's talent, he would continue to grow and reach an even higher height!

Luo Qingcheng couldn't help but feel extremely fortunate that she had followed Liu Yan back then.

Now that Liu Yan had grown up, she might have a chance to find her sister by relying on him.

In this huge Wind Barrier, there were many strong people.

Luo Qingcheng had no chance to find her sister by herself.

However, she would have a chance with Liu Yan's help.

At this time, Liu Yan looked at his attribute panel. There was indeed an additional column, the combat star rating column. His combat star rating was the only 11-star combat power in Team Origin!

Liu Yan's heart was relatively calm at this moment. After all, Liu Yan was extremely clear about his combat strength.

He had many S-grade and SS-grade skills. He also had many S-grade and SS-grade equipment, and even an SSS-grade special equipment, Wings of the Wind God. Liu Yan's combat star rating could not be low. It must be outrageous.

Liu Yan was currently only at level 41, but his combat power had already reached 11 stars. That was almost the combat power of an Ordinary Level 11 awakened one. It was ridiculous.

Liu Yan even felt the 11-star combat power rating was a little low.

His many enchanted puppets had extraordinary combat strength. It was impossible for him to only be 11 stars.

Liu Yan guessed that the enchanted puppets were an external force, not Liu Yan's combat strength, so they were not counted.

In addition, a powerful heaven-defying skill like Attribute Fusion was a godly skill that only the top powerhouses on the ninth or tenth level of the Tower could possess. If it was counted into the rating, Liu Yan would have more than an 11-star combat level. It seemed it was not included either.

Still, Liu Yan's combat level had reached 11 stars.

If his heaven-defying skills were counted, Liu Yan estimated that it would be even more exaggerated.

586 Territory Special Function

At this moment, Liu Yan looked at the crowd and nodded his head in admission. "That's right. My combat star rating is indeed 11!"

Everyone knew it was Liu Yan. In the entire Team Origin, only Liu Yan could reach such a terrifying level.

However, upon hearing Liu Yan's confirmation, the other team members were shocked.

"Damn, isn't this too amazing?"

“I’m only at the four-star level, and Captain Liu is already at the eleven-star level. Isn’t the difference too big?”

“I think it’s normal. After all, Captain Liu could defeat our squad by himself. His strength is indeed outrageous.”

“With a terrifying person like Captain Liu around, I believe the trial on the sixth level of the Tower will be much smoother.”

“I’ve really learned something new. In the past, Ye Yifan was already a heaven-defying figure in my eyes. But compared to a monstrous figure like Liu Yan, Ye Yifan seems mediocre.”

“He’s not ordinary either. He’s also a top-notch expert. We only have four or five stars of combat power. Hahaha.”

...

The team members were all discussing in low voices excitedly. At the same time, they were also filled with anticipation.

Although they could not compare to Liu Yan or top-tier experts like Ye Yifan, they were still talented. There were many opportunities on the sixth level of the Tower, and they had a great chance of improving their strength on the sixth level!

Liu Yan looked at the remaining columns of the territory control panel.

The next grade for the territory was the level of the city wall.

The current city wall level of the Origin Territory was still at level 0.

But through the test just now, Liu Yan knew the fences had strong defense even though they looked like they were made of mud.

It might not be enough to defend against experts, but it was still quite effective against ordinary members.

If the city walls were upgraded, Liu Yan believed they would definitely have a very good defensive ability.

There was nothing much in the next territory building column because their territory was a newly built level 0 territory. There were only 300 level 0 wooden houses and 50 level 1 wooden house, nothing else.

Liu Yan had won first place in the Tower’s trial on the fifth level and received a Golden Lord Token. Otherwise, he would’ve gotten even fewer wooden houses.

After Derek Dole's experiment, they knew there was a significant difference between a level 0 wooden house and a level 1 wooden house. There was almost a 50% difference in the effect.

It also meant that the members would get 50% more benefits if they stayed in a level 1 wooden house instead of a level 0 wooden house.

The accumulation of time and effort would inevitably lead to a huge gap.

Liu Yan also knew the wooden house could be upgraded. He just had to spend resources to upgrade it later.

The defensive buildings, functional buildings, and territory warehouses were absent. They had not been built yet, so Team Origin could only do it step by step.

As for the territory's barrier, it was currently three kilometers in radius. Liu Yan paid attention to this point. He thought it would be useful.

If it were a regular Lord's token, it would only have a radius of one kilometer, which was much smaller.

With a larger area, it meant that the members of Team Origin could explore more lands. With a larger area, they could collect all kinds of resources and hunt more fierce beasts and monsters. Naturally, they would gain more benefits.

There was also no territory battle beast.

The last section was about the special functions of the territory.

Currently, the newly built Origin Territory was still at level 0. It only had one special function, which was One-click Recall.

Liu Yan had just noticed that this skill had appeared in his attribute panel, so he quickly checked it.

[ One-click Recall ]

[ Level: 0 ]

[ Effect: After activation, the user can communicate with the territory. After 10 seconds of channeling time, the user can instantly return to the territory regardless of distance! ]

[ Usage: 3/3, recovers three times a day ]

After seeing the effect of the recall button, Liu Yan frowned slightly.

This skill might be weak, but it allowed one to instantly return to their territory regardless of distance. It was extremely powerful.

However, it required a full ten seconds of channeling time. It was fine when exploring the outside world. Ten seconds was not long, and it was a great traveling skill. No matter how far they were, they could return to the territory in 10 seconds.

Ten seconds might not seem like much, but it was enough to change everything in the event of danger. They could die in ten seconds while waiting for the One-click Recall to activate.

Liu Yan shook his head helplessly. It seemed like this One-click Recall skill could only be used as a powerful skill for traveling for the time being. It was not convenient to use it when he encountered danger. He could only level up it in the future.

After all, the current level 0 teleport required 10 seconds of channeling time. After leveling up, the teleport might require much less time and become a heaven-defying skill.

Still, the current One-click Return was already powerful.

After all, it was a special ability of the territory. It was a skill that every member of the Origin Territory could use, and it was powerful.

Currently, it could be used three times a day, which was quite a number of times.

Liu Yan was quite interested in territory-specific skills.

First of all, if this One-click Recall could level up, it would definitely be of great help to every member of Team Origin.

On the other hand, Liu Yan was quite curious. In the future, he would definitely have the opportunity to increase the territory's special function.

As for the territory's special function, it seemed to be able to allow every member of the Origin Territory to master this skill. It was undoubtedly a bit powerful.

If the newly added special function of the territory was slightly stronger, wouldn't it directly increase the overall strength of the Team Origin by a large margin?

At this moment, members of Team Origin were also discussing the power of the Once-click Recall.

"This One-click Recall is too powerful."

“It’s only level 0, but it’s already so powerful. How much more powerful will it be in the future?”

“It’s a pity that the channeling time is a little long. If it had shorter channeling time or no channeling time, it would be a godly skill.

“Be content. We’re already very strong now. It’s equivalent to each of us having a special teleportation array!”

“I think it’s useful too. Didn’t they say we can’t leave the barrier for too long? With this One-click Recall, we have more time to explore the outside world.”

...

Liu Yan listened to the discussion of his team members and couldn’t help but nod secretly. Liu Yan had overlooked this aspect before.

The Wind Barrier on the sixth level of the Tower was completely covered by the berserk wind elemental power, constantly tearing and howling.

Ordinary team members were naturally unable to leave the barrier for too long. There was a time limit.

Initially, he had to take into account the time taken to return, so the exploration area was reduced by half.

However, with the One-click Recall, they did not need to worry about the time usage returning to the territory. The exploration would be completed immediately. When they could not hold on any longer, they could use the One-click Recall. Their exploration time outside the barrier would be doubled.

At this time, Liu Yan also opened the new construction column to take a look.

587 Territory Upgrade Conditions

[ Construction column ]

[ Existing buildings: level 0 wooden house (300), Level 1 wooden house (50) ]

[ Buildable/upgradable buildings: wooden house (maximum level 1), warehouse (maximum level 1), redeeming shop (maximum level 1), guard tower (maximum level 1) ]

There were only a few buildings, and there were not many buildings to build.

However, with the experience from the wooden house and the mud wall, Liu Yan knew they could not underestimate any buildable instruction in this territory.

Liu Yan checked the materials and conditions required for the construction.

[ Wooden house ]

Level: 0

Effect: Increase user's combat experience by 100 per hour. Increase the user's random attribute points by 10 per hour. Recover 100 hp and 100 energy per hour.

Required condition: territory level 0

Required material: origin wood (any grade) 1 cubic meter

[ Wooden house ]

Level: 1

Effect: Increase the user's combat experience by 150 per hour. Increase the user's random attribute points by 15 per hour. Recover 150 hp and 150 energy per hour.

Required condition: territory reaches level 0

Required materials: 1 cubic meter origin wood (any level) 1, 1 origin stone (any level)

After reading the wooden house's introduction, Liu Yan couldn't help but sigh. This wooden house was magical.

The materials required for the construction were also simple. It was only a cubic meter of origin wood, but it had such a good effect.

The origin wood was a kind of wood that contained special energy. The trees in the Tower had been nourished by elemental energy for a long time. Hence, they all met the conditions of the origin wood, but there were differences in level.

Building a level 0 wooden house required one cubic meter of origin wood, and there were no level requirements.

However, the effect of a level 0 wooden house was pretty good.

Every hour, it could increase the user's combat experience by 100, the user's random attribute points by 10, and recover 100 hp and 100 energy.

Liu Yan was currently level 41. He needed more than 40,000 combat experience to level up.

To Liu Yan, 100 combat experience points were not much.

Ten attribute points, 100 hp, and 100 energy points were also relatively less.

However, the rewards brought by this level 0 wooden house were free. As long as the user stayed in the wooden house, they could obtain them without any cost.

In the long run, it would accumulate over time and would be a lot.

Moreover, this was only a level 0 wooden house could do. In the future, its effects would increase after it was upgraded.

It was the case for the level 1 wooden house. They only needed to spend one more origin stone that did not have a level requirement to upgrade it. However, the various gains had increased by 50%.

The gains from the wooden house were much more than the cost of building it.

Liu Yan guessed that this was mainly related to the special array formation in the wooden house. That array was the most crucial part.

Sun Wen studied array formations. However, even he couldn't understand the arrays in the wooden houses, let alone someone like Liu Yan who knew nothing about them. They were too complicated.

Liu Yan could only try to master the magical and special array formation if he had the opportunity in the future.

At the moment, the most important thing was to build and upgrade the territory.

Liu Yan knew the grade of the territory was the most important.

Although the buildings like wooden houses, a warehouse, or a shop could offer many benefits, their importance could not be compared to leveling up the territory.

After all, the territory's upgrade would bring about improvements in all aspects. They could build more magical buildings and upgrade higher-level buildings, bringing about greater improvements.

Upgrading the buildings would bring limited benefits.

However, upgrading the territory would bring about an all-around upgrade, so it was naturally the most important.

Liu Yan didn't bother with the other options. He first looked at the requirements and materials needed to upgrade the territory.

[ Level 1 territory ]

Upgrade requirements: Ten members with 6 stars and above, lord with 7 stars and above, 100 level 1 wooden houses ]

Upgrade materials: 100 cubic meters of origin wood (any level), 10 origin stones (any level)

Liu Yan looked at the upgrade conditions for a level 1 territory and immediately had an idea.

There were three conditions in total.

The first was that the territory had ten 6-star members and above, which had already achieved the condition.

Team Origin had a total of 23 six-star members.

Including five 7-star members, five 8-star members, and Liu Yan, who was an 11-star member, there were 34 members with 6-star combat strength and above.

Liu Yan knew this condition was easy to achieve because Team Origin had absorbed the other four teams, which was equivalent to gathering all the members of the five teams.

If the other four teams were not incorporated, with the strength of the original land of origin team, there would be less than ten members who had a combat strength of six stars and above.

Because Team Origin had recruited the other four teams, they had a good start at the sixth level of the Tower. They had met the requirement to upgrade to a level 1 territory at the beginning. It meant they were already ahead of the other teams!

The second requirement to upgrade to a level 1 territory was that the lord's combat strength had to reach 7 stars or above.

Liu Yan's combat strength rating was 11 stars, so he naturally met the requirements.

The last condition was a hundred level 1 wooden houses in the territory.

Team Origin hadn't reached this condition yet.

Out of the three conditions, it was the only one that they hadn't met yet.

However, Liu Yan had just finished checking the upgrade conditions for one wooden house. It was not difficult. There were origin woods within the territory barrier, and he did not need to explore the area outside the territory barrier to collect them.

As for the origin stone?

Liu Yan had plenty of them in his spatial ring!

Because Team Origin's territory was gold level, they had fifty level 1 wooden houses at the start.

In this way, they could save a lot of effort. They only needed to build or upgrade fifty more wooden houses, and they would be able to meet all the conditions for a level 1 territory upgrade.

The materials needed to upgrade to a level 1 territory were not harsh. They only needed to collect more origin wood.

Immediately, Liu Yan looked at the other members and told them about the upgrade of the wooden houses and the territory.

After the team members learned the detailed data about the wooden house, they were all surprised.

Sun Wen had told them that these wooden houses were extraordinary. They could slowly increase their strength by staying in the wooden houses and doing nothing.

However, after hearing the specific data about these wooden houses from Liu Yan, the members were even more surprised.

Although these wooden houses didn't bring much improvement, the key was that they didn't need to pay any price. As long as they stayed in the wooden houses and did nothing or did their things, they could constantly passively obtain these benefits. It was a good thing.

The point was that the materials required to build and upgrade the wooden houses were not much.

588 Starting to Build the Territory

"I didn't expect the wooden houses to be so powerful."

"This is only a level 0 wooden house, and it already has such great effects. How amazing will it be when it's upgraded to a higher level?"

"The effect of a level 1 wooden house has been increased by half. Not bad."

“A level 1 wooden house can increase an attribute by 10 points per hour, so that’s 240 points per day. It is about the same as the result of a day of cultivation!”

“We’re training in the level 1 wooden house. It’s equivalent to our speed of improvement doubling!”

“If a level 0 territory can be so strong, I wonder how strong a level 1 territory will be.”

...

Members of the Team Origin discussed with each other excitedly. They were all looking forward to it.

No one had expected that the sixth level of the Tower would bring so many benefits.

At this moment, Liu Yan also looked at his team members and said, “We’ll decide on the distribution of the wooden houses tonight. There’s no need to enter the wooden houses to increase our strength if we collect them first. Other matters could be discussed later. First, I would assign today’s tasks. The most important thing now is to upgrade the territory. There’s still some time before dusk, so all members should hurry up and explore the territory within the barrier. After exploring, collect as many origin woods as possible and upgrade the wooden house. We need to upgrade the territory to Level 1 in the shortest time possible!”

“Be careful during the exploration, don’t leave the territory barrier. Explore the area within the territory barrier first. All the team members split up into groups of four. This way, we will have enough people to get the origin wood. At the same time, it would be safer to deal with the fierce beasts. After all, we’ve just arrived on the sixth level of the Tower. We still don’t know much about the fierce beasts on the sixth level. All team members, be careful!”

When the team members heard this, their faces were filled with anticipation.

The trial on the sixth level of the Tower had finally begun.

They started with the exploration of the territory barrier!

Then, the members of the five squads split up into small groups and started to move. They explored the situation within the territory barrier, collected the origin woods, and cleared out the fierce beasts and monsters within the territory barrier.

The trees in the Tower were very different from ordinary trees because they had absorbed a large amount of elemental power of various attributes for a long time. They were much taller and thicker. Even the thinnest origin tree was as wide as four or five adults wrapped their arms around it. The giant trees that were hundreds of years old on the Blue Planet could not compare to the origin tree.

Even for awakened ones, cutting down a giant origin tree was strenuous. Therefore, it was much easier for a few people to cut it down together.

At the same time, the team members moved in small groups to face the unknown fierce beasts and monsters on the sixth level of the Tower. It was also safer.

After all, they had just arrived on the sixth level of the Tower. They didn't know the strength of the beasts and monsters on the sixth level. It was safer for them to act together.

Even if they encountered a powerful fierce beast or monster, they could at least protect themselves, and the surrounding small teams would naturally send reinforcements.

If it didn't work, Liu Yan would also send reinforcements.

After all, the size of the territory barrier was only three kilometers in radius. It was easy to send out reinforcement.

Within the territory barrier, it was naturally relatively safe.

Under Liu Yan's orders, the combat team members quickly split up.

Some support members stayed in the Origin Territory to build and upgrade some buildings with Liu Yan.

Liu Yan knew he had to raise the strength of his team members and the defense of his territory in the shortest time possible.

The strength of the team members was challenging to improve in a short time.

The territory's buildings and defenses could quickly increase the overall defensive capabilities of the territory. Hence, they were the priority.

Only with enough strength and defensive ability could they prevent the dangers from the other territories.

He couldn't always hope other territories couldn't challenge the Origin Territory.

Moreover, there might be other powerful territories outside the territory barrier that could threaten them.

One's toughness was always more important than luck!

After the ordinary members of Team Origin split up, a few core members found Liu Yan.

They couldn't say too much in front of the ordinary members just now. They did not want to affect the mentality of the ordinary members and make the situation even tenser.

But in reality, they were already worried.

Derek Dole looked at Liu Yan and said sternly, "Captain, the situation on the sixth level of the Tower is much more dangerous than we expected."

"Even if we're a team made up of five teams and are quite strong, we're still not strong enough." Sun Wen sighed.

Even Xu Han, who had always been in a good mood, had a serious expression. "It's indeed a lot more difficult."

"Is it that difficult? We're not weak." Murong Xue didn't understand.

"Captain, what's our next step?" The leader of the Fourth Squad, He Yang, couldn't help but ask.

The difficulty level of the sixth level was far beyond their expectations.

At this moment, He Yang was also a little lost and did not know what to do.

He Yang was also rejoicing. Fortunately, his team joined Team Origin. He could still count on Liu Yan.

If he had to rely on himself to command the team, He Yang would not know what to do.

The other team leaders also looked at Liu Yan.

They had the advantage of their continent, so they had more information than Liu Yan.

However, Liu Yan's strengths and leadership skills were much better than theirs. They naturally wanted to know what Liu Yan was thinking.

Even Ye Yifan, who had always been proud, had to admit that he was not as good as Liu Yan when it came to commanding the troops.

Liu Yan's expression was calm. Although he was not relaxed, he was not serious either.

Liu Yan looked at them and comforted them, "This level is indeed more difficult than we expected. However, it is more advantageous for us in all aspects. Our team contains five squads, and our strength is relatively strong. On top of that, we also have a Golden Lord Token. We have a great start."

The few of them looked at each other and nodded in agreement.

Indeed, their team had many more people. When they left the fifth level of the Tower, each member received an extra reward, which increased their strength by a lot.

Overall, compared to the other teams that had just entered the sixth level of the Tower, Team Origin was at least above average, if not the strongest.

In addition to the Golden Lord Token, he naturally had the advantage.

Liu Yan continued, "The most important thing now is to upgrade the territory. Upgrading the territory will bring an all-around upgrade. Our strength is not bad, and we have met two requirements for the territory upgrade. We only need fifty level 1 wooden houses. We can try to complete the territory upgrade today. Then, we will be responsible for building the remaining buildings, warehouses, and Exchange shops. After that, we'll clear all the fierce beasts and monsters within the territory's barrier. We'll also test out the wind elemental energy outside the territory's barrier, and then explore the territory's surroundings to determine the situation."

589 Shabby Warehouse

When the others heard Liu Yan's words, they could not help but feel surprised.

They didn't expect Liu Yan's thinking to be so clear. Liu Yan had thought through every step of the plan clearly and was in good order.

Normally, they could also come up with such a good plan.

However, when faced with the danger of the sixth level of the Tower, many people were somewhat flustered and could not think calmly.

However, Liu Yan did not seem to be affected at all.

After confirming the plan, everyone split up and started to act.

Luo Qingcheng and Chu Long, the two non-combat personnel, went to build the territory with Liu Yan, the lord of the territory.

The rest of the experts went to help the ordinary members to collect resources.

After splitting up, Liu Yan brought Luo Qingcheng and Chu Long to the territory.

"The only buildings that can be built now are the warehouse and the exchange shop." Liu Yan said directly.

"I don't know the specific use of this warehouse and exchange shop. They are the buildings in the territory, so they should be of great help to us, right?" Chu Long couldn't help but guess.

After all, the wooden houses and mud walls in the territory looked so bad that they were of great help to them, not to mention the two newly built buildings.

Luo Qingcheng looked around and said, "Although we just started to build the territory and there are not many buildings, we still need to plan the layout. The warehouse is an important building. It's best to place it in a safe position. The exchange shop should be placed in the middle for all members to use."

Hearing this, Liu Yan nodded. He had the same thought.

Liu Yan looked at all the wooden houses and chose the level 1 wooden house that was the most remote as his house.

Liu Yan naturally had his reasons for choosing this wooden house. It was in one of the directions of the territory. With Liu Yan there, it would be much safer.

Liu Yan would arrange for the top-tier experts to stay in other directions.

To ensure that there were top experts in all directions of the wooden houses in the territory to prevent any unexpected situations.

Liu Yan's position was undoubtedly the safest. It was the most suitable place to build the warehouse.

"This place will do."

Liu Yan arrived at an empty area.

This open space was not far from Liu Yan's wooden house, so it was the perfect place.

Luo Qingcheng also agreed with Liu Yan's idea, "Then let's start building it. Check the materials you need."

Liu Yan took a look. The warehouse was different from the wooden house. Although the materials required were not much, they were more precious. Building a level 1 warehouse required three cubic meters of origin woods and 100 origin stones (C-grade and above).

Chu Long was surprised when she found out the required materials. "You only need three cubic meters of origin woods? The warehouse should be small. It doesn't seem good."

However, Luo Qingcheng shook her head and said, "But it requires 100 origin stones above C-grade, not low-grade origin stones. I think there is something special about this warehouse. I guess it's very different from the common warehouse we imagined."

Liu Yan felt the same way. They could only know how the warehouse was after building it.

Luo Qingcheng and Chu Long moved three cubic meters of the origin woods their team members had just collected.

Liu Yan then retrieved 100 C-grade origin stones from his spatial ring.

He had gained a lot from the fifth level of the Tower, especially the origin stones.

On the fifth level of the Tower, they received equipment and cultivation resources. Since origin stones could not immediately increase the combat power of the team members, they were not distributed to the members. As a result, Liu Yan had a lot of origin stones.

Liu Yan had even specially selected a few. Liu Yan would only use C-grade origin stones. He would try his best not to use high-grade origin stones to avoid wastage.

In any case, this warehouse only required a C-grade and above origin stones. It didn't say that using higher-grade origin stones would increase the quality of the warehouse. Hence, Liu Yan didn't want to waste it.

After all the materials were prepared, Liu Yan took out the Golden Lord Token and started building.

After the establishment of the territory, the Golden Lord Token returned to Liu Yan's hands. However, there seemed to have been some changes, and Liu Yan could not figure out what exactly had changed.

As for the construction of the territory buildings, the wooden houses were distributed to the members, which allowed them to level up by themselves. The construction and upgrade of the other buildings required the Golden Lord Token, which meant they had to go through Liu Yan's hands.

After Liu Yan took out the Golden Lord Token, he chose to build a level 1 warehouse.

Suddenly, the golden light on the Golden Lord Token shone brightly, then fell on the materials and began to build on its own.

After a burst of dazzling golden light, the materials disappeared and were replaced by a stone house.

When Liu Yan and the others saw the stone house, they were surprised.

This was the warehouse? It was so simple.

The entire stone house was only about seven or eight square meters in size. It looked small and could probably only fit a few people.

How many things could such a small warehouse hold?

On the other hand, the stone door of the stone house looked extraordinary. The entire door was a lock.

“This warehouse is so simple? It’s a level 1 warehouse, but why does it feel like it’s not much bigger than a level 0 wooden house?” Chu Long couldn’t help but doubt.

In fact, this was the case. The level 0 wooden house was small, but the level 1 wooden house was a little bigger, almost the same size as this Level 1 warehouse.

Luo Qingcheng also had some doubts, but she still shook her head and said, “This warehouse shouldn’t be simple. Look, this warehouse looks like a stone house, but it’s a warehouse made of origin stones. I think it’s very extraordinary. In addition, I can also feel a different array fluctuation from those wooden houses. I reckon it’s totally different inside.”

Hearing this, Liu Yan nodded his head.

Liu Yan had the S-grade skill Omniscient Insight. He could feel that this warehouse was extraordinary.

Liu Yan tried to explore deep into the warehouse.

The moment Liu Yan entered the warehouse, he was blocked by the warehouse, making it impossible for him to investigate the warehouse.

Liu Yan could even feel the terrifying power of the warehouse.

Liu Yan knew that this warehouse must be extremely tough. Even Liu Yan would find it difficult to break through, let alone ordinary awakened ones!

Thinking up to this point, Liu Yan decided to give it a try. He took out his SS-grade weapon, the Blue Flame Gloves, and threw a full-force punch toward the warehouse.

Although Liu Yan didn’t use any other enhancing skills, his terrifying strength alone, coupled with Blue Flame Gloves, was already a terrifying power.

However, when Liu Yan’s punch landed in the warehouse, it did not move at all. Instead, Liu Yan felt a backlash and pain.

It seemed that after the warehouse's reinforcement, the reaction force was even stronger.

Seeing this, Liu Yan was a little surprised. The toughness of this warehouse was beyond his expectations.

#### 590 Magical Exchange Shop

Luo Qingcheng also saw this scene. She could not help but exclaim, "It seems like this warehouse is much more impressive than we thought."

This warehouse was extremely powerful to withstand Liu Yan's punch without moving an inch!

Chu Long was also surprised. "It seems like the buildings in this territory are all very powerful, even though they look shabby. I wonder what the interior of the warehouse looks like."

Liu Yan felt around carefully and understood the warehouse's defense.

In addition to being made of origin stones, this warehouse was durable. There was also a special array inside.

When Liu Yan's fist landed, only some of the fist power reached the warehouse. Most of the power was blocked and counterattacked by the special array. It was why Liu Yan got a recoil and felt pain.

Liu Yan guessed it would be difficult for him to break through the warehouse unless he used his trump cards.

Liu Yan's combat level was 11-star, and it was already so difficult, let alone the rest of the team.

"The defense of this warehouse is outrageous. Don't worry. Let's see what it's like inside." As Liu Yan spoke, he touched the warehouse's door.

As the lord, Liu Yan could choose to open the stone door of the warehouse after touching it. At the same time, Liu Yan could also sense that he could choose which team members to allow to open the warehouse.

Liu Yan pondered for a while and chose Luo Qingcheng and Chu Long.

The two women were trustworthy. In addition, they were responsible for the warehouse, so it was reasonable to give the accessibility to them.

Although Xu Han and the others were trustworthy, they were still combatants, so they did not need to open the warehouse personally.

Then, the warehouse was opened, but the inside was deep darkness.

The warehouse was only so big, but they could not see what was inside.

Luo Qingcheng suddenly looked at Liu Yan in surprise, "This warehouse has its own space!"

Liu Yan was also aware of this point. He immediately led the two women into the warehouse.

They entered the warehouse, and the space suddenly opened up. At a glance, the entire warehouse was the size of a football field. It was more than ten meters tall. The overall size was estimated to be more than ten thousand cubic meters.

"I didn't expect it to be so big inside." Luo Qingcheng was a little surprised.

"This warehouse is impressive." Chu Long couldn't help but exclaim, "The defense of this warehouse is so strong, and the space inside is so big. It can store many things but looks so small from the outside. It doesn't occupy much land. It's practical!"

Liu Yan also nodded. "This is only a level 1 warehouse. It can be even more powerful in the future. In the future, we'll use this place as a warehouse and put all the items here."

There were a lot of spoils of war on the fifth level of the Tower. Although Liu Yan's spatial ring was an intermediate storage ring and had a lot of space, it was almost full.

Liu Yan had no more room to store more of his things. Now that he had this warehouse, everything was much more convenient.

Liu Yan took out all the resources of the storage ring team and threw them into the warehouse. Then, he asked Chu Long to bring a few trustworthy support team members over to sort them out.

Then, Liu Yan brought Luo Qingcheng and left the place.

Before he left, Liu Yan told Luo Qingcheng and Chu Long that only the three of them could open the warehouse, so they must be careful.

After leaving the warehouse, Liu Yan brought Luo Qingcheng to an open space in front of the territory.

This place wasn't far from the wooden houses. It was almost the center of the entire territory. The team members would almost always pass by here to enter and exit the territory.

Liu Yan planned to build an exchange shop in the territory.

He did not know much about the use of the shop. Based on the situation of the territory, Liu Yan guessed that as long as it was a building in the territory, it would have great use.

This exchange shop might be useful to every team member. Hence, it had to be built in such a place to make it convenient for all team members to access.

Liu Yan looked at the materials required for the level 1 exchange shop. They were the same as the materials for the level 1 warehouse, which were still three cubic meters of origin woods and 100 pieces of origin stones of C-grade and above.

Luo Qingcheng went to move three cubic meters of origin woods. Liu Yan also took out 100 C-grade origin stones, but none of them were higher than C-grade.

The high-grade origin stones should be reserved for more important uses.

Once the materials were ready, Liu Yan began the construction. To be precise, it was an automatic construction.

After Liu Yan took out the Golden Lord Token, he chose to automatically build a level 1 exchange shop.

The Golden Lord Token emitted a golden light, which enveloped the materials on the ground.

The dazzling golden light disappeared not long after.

The materials on the ground also disappeared, and in their place was a stone shop.

Liu Yan stepped forward to check. The shop was small, about the size of the newspaper stand outside the Tower.

However, Liu Yan could tell this shop was also made of origin stones, so it was naturally unbreakable.

There was nothing in the store, only a virtual screen.

Liu Yan stepped forward and opened the virtual screen. It was the exchange shop's interface.

The exchange shop was divided into two interfaces. One was the Tower's level exchange shop, and the other was the territory exchange shop.

Liu Yan opened the exchange shop and found that many things could be traded. Some of them looked familiar.

Liu Yan realized these were the weapons, equipment, treasures, cultivation materials, medicinal pills, and other materials he had just taken from his storage ring.

After looking at the introduction, Liu Yan finally understood.

They could use contribution points to exchange for things within the territory from the territory exchange shop.

And these things had to be handed over by the members of the territory. At the same time, they would receive contribution points.

In simpler terms, each team member could use things they didn't need to exchange for contribution points. Then, they could use the points to exchange for other things they needed.

At this moment, Liu Yan could see some other information through the territory exchange shop interface.

[ Zheng Tainan has collected five cubic meters of origin wood for the territory and obtained five contribution points! ]

[ Zhang San collected three cubic meters of origin wood for the territory and gained three contribution points! ]

[ Li Si has collected two cubic meters of origin wood for the territory and gained two contribution points! ]

[ Murong Xue has collected eight cubic meters of origin wood for the territory. You have received eight contribution points! ]

...

Below the information, Liu Yan also saw his current contribution points: 132532!

Seeing this, Liu Yan immediately understood. It was probably the contribution points from the pile of resources he had just put in the warehouse.

After roughly understanding the use of the territory exchange shop, Liu Yan was amazed.

This way, the more members contributed to the territory, the more contribution points they would get. They could exchange for better things, weapons, equipment, and others.
