## **Chapter 591 - 591 Unexpected Fortune?**

### 591 Unexpected Fortune?

This way, the distribution of the loot was perfectly solved, and it was fair to every member.

Previously, on the fifth level of the Tower, Liu Yan had been worried about this. It was not easy to distribute the resources equally and fair.

At that time, they could only choose to give the loot to the stronger members to obtain high-grade equipment and treasures. Then, they gave the lower-grade equipment to the weaker members.

The distribution of cultivation resources and other consumables would be as equal as possible.

Although this distribution rule was relatively fair, there were still many problems.

At that time, Liu Yan realized this, but he was busy with the trial on the fifth level of the Tower. Hence, he couldn't think of a proper way.

Now that he had the territory exchange shop, everything was solved.

The team members who contributed more to the territory would naturally be able to obtain more resources and increase their strength.

At the same time, they could also exchange all sorts of resources.

The equipment that they didn't need would be stored in the warehouse. This way, they could earn exchange points, and then used to exchange for the equipment they needed.

Of course, this warehouse was useless to Liu Yan.

After all, he had just handed in the spoils of war from most of the teams. They had obtained so many contribution points all of a sudden.

Naturally, Liu Yan would take whatever he wanted from the territory. He could open the warehouse and take it. Everything in the territory belonged to him.

However, to the ordinary members of Team Origin, this territory exchange warehouse was undoubtedly very convenient.

Liu Yan thought of a point. He tried to use his contribution points to exchange for C-grade equipment.

Thirty-two contribution points were deducted, and a C-grade boot appeared in Liu Yan's hands.

These C-grade boots were the ones that Liu Yan had stored in the warehouse. At this moment, it had appeared in his hands, which was pretty convenient.

When Luo Qingcheng saw this scene, she could not help but be shocked. "This warehouse and exchange shop are amazing. It even contains a space array that transfers items. It's really amazing."

When Liu Yan heard this, he nodded in agreement. Such a space array was impressive.

If Liu Yan could master this level of spatial power, he would be invincible.

However, Liu Yan also knew that spatial power was a profound power. One could not even come into contact with it on the 10th level of the Tower. One had to be above the 10th level to have a chance to learn it.

At present, there was no awakened one in the entire Blue Star who could truly master the spatial power.

At this moment, Chu Long ran over in shock. Her face was pale as if she had been shocked.

"What's wrong?" Luo Qingcheng stepped forward and asked with concern.

Chu Long's face turned pale. "I've seen a ghost! I've seen a ghost! I was sorting out the warehouse just now. Then, there was a flash of light, and a boot suddenly disappeared. Is the sixth level of the Tower haunted?"

When Liu Yan heard this, he immediately laughed and waved the boots in his hands. "Is it this one?"

When Chu Long saw the boots in Liu Yan's hands, she was stunned and said, "Why is it in your hands? What's going on?"

Seeing this, Luo Qingcheng couldn't help but smile as she explained the situation of the exchange shop to Chu Long.

Chu Long was relieved when she knew it was a space array but not a ghost. Then, she went back to the warehouse to continue tidying up.

Luo Qingcheng looked at the exchange shop and said, "This territory exchange shop is very convenient. In the future, we won't have to worry about the distribution of the spoils. The members can choose according to their own needs. And the members who contribute more to the territory will have more contribution points. So naturally, they will be able to get better supplies."

Liu Yan nodded and immediately opened the Tower's sixth level exchange shop interface.

Liu Yan was undoubtedly curious about this interface.

Looking at its name, it seemed to be the exchange interface for the entire sixth level of the Tower. Could it be that it could exchange all kinds of materials with other territories?

If that were the case, then it would be quite amazing.

After all, this was the sixth level of the Tower. It contains a vast world with tens of thousands of teams and all kinds of resources!

After Liu Yan opened the Tower's sixth level exchange interface, his vision suddenly blurred.

The currency on the Tower's sixth level exchange interface was no longer contribution points. The contribution points just now could only be used to exchange for items within the Origin Territory.

The currency on the Tower's sixth level exchange interface was origin stones.

Liu Yan could see that there were a lot of resources that could be exchanged.

There were tons of rare items, many of which couldn't be bought no matter how rich they were.

Many items could not be seen on the first five levels of the Tower. They could only be found on the sixth level!

The Tower's sixth level exchange interface was divided into many categories.

The main pages were the personal and territory pages.

The personal page, as its name suggested, contained all sorts of items that a person needed and used.

They were further divided into weapons, armor, treasures, cultivation resources, various consumables, skill books, and even job class books!

“There’s a job class book?” When Luo Qingcheng saw this, she was a little surprised.

Job class books were extremely rare and always in short supply.

There were more than 300 members in Team Origin, and they were all the best students from the five continents.

But even so, only half of the 300 or so members had job classes.

The remaining few still didn’t have a job class.

It wasn’t that they didn’t want to obtain a job class, but they didn’t have the chance.

After obtaining a job class, one could get the system and powerful strength, which would undoubtedly increase one’s combat strength enormously.

Meanwhile, most members had tier 1 job classes. Very few of them had even reached tier 2.

Existences like Liu Yan, who had already activated his tier 3, law warlock, were even rare.

But now, he could directly obtain a job class book in the shop and change his job class. He would undoubtedly be much stronger!

Liu Yan tried to open it, but it showed that the store’s level was not high enough and the job class book was unavailable.

“It seems the shop is only Level 1, so it’s unavailable.” Liu Yan said helplessly.

If Liu Yan had the opportunity, he would naturally want every team member to have a job class. It would be best if he could get some of his team’s tier 2 experts to complete their class transition. After that, they would have a significant increase in their strength.

Unfortunately, the shop’s level was not high enough, so he could not exchange the job class book.

Luo Qingcheng smiled and said, “There’s no hurry. We can slowly upgrade the territory and then the exchange shop. I guess even if we can open it now, we can’t afford to exchange it. I think any job class book is expensive, not to mention rare class, tier 2, or even tier 3 classes.

Liu Yan nodded in agreement.

It seemed that the job class book was not something they could consider at their level for the time being. They could only think about it in the future.

592 Harvest Completed

Liu Yan flipped through it.

The rest of the pages were the same. Even if some pages could be opened, due to the low level of the shop, he could only exchange low-grade items.

For example, he could only exchange for A-grade equipment and weapon in a level 1 warehouse.

It seemed that he could only upgrade the territory and the warehouse first.

But even so, Liu Yan could tell that many things could be useful to his team members.

The Tower's sixth level exchange shop would be helpful to the entire team.

Apart from the personal page, there was also a territory page.

On the territory page, there were all sorts of things that the territory needed.

It included all kinds of materials and even territories.

They could directly use origin stones to purchase territories!

Of course, the price was also incredibly high.

Liu Yan checked it. A level 1 territory with gold potential was priced at 100,000 B-grade origin stones!

100,000 B-grade origin stones were an astronomical price.

A single B-grade origin stone was equivalent to 100 C-grade origin stones.

Even if Liu Yan emptied his pockets, he wouldn't be able to afford it.

Liu Yan saw many things in the shop, many of which were high-grade items.

Not only were there a lot of items, but there were also many high-grade items.

Liu Yan had never seen or heard of many things on the lower levels of the Tower.

After all, they were in the sixth level, and there were a lot more resources.

At this moment, Liu Yan realized that he was actually poor.

Previously, Liu Yan had a ton of spoils of war from five teams, and he still felt he was rich.

However, he realized he was poor after looking at the price tag in the exchange shop. He couldn't afford anything good unless he spent the entire team's origin stones. However, that was impossible.

"It seems like we have to earn more origin stones. We're too poor." Liu Yan couldn't help but sigh.

Luo Qingcheng nodded in agreement. "This is normal. We are considered very rich on the fifth level of the Tower, but when we come to the sixth level of the Tower, we are poor. We can take it one step at a time. However, this exchange shop is useful. We don't need to contact any other teams on the sixth level to trade with them."

When Liu Yan heard this, he agreed. In this aspect, the Tower's sixth level exchange shop was convenient.

Otherwise, it would be difficult to trade with the other teams on the sixth level of the Tower.

There would also be a certain level of danger. Who knew if the opponent was here to trade or to rob and eliminate them?

The weak didn't dare fight the strong.

However, with this sixth level exchange shop, things became easier and more convenient.

Although Liu Yan and the others were currently poor and couldn't afford anything good, they could still buy it in the future!

Just as Liu Yan was about to close the exchange shop page, Luo Qingcheng pulled him back.

"Liu Yan, look! Why does it show that you have 176530 C-grade origin stones?" Luo Qingcheng shouted in surprise.

When Liu Yan heard this, he lowered his head and saw it was true. There were 170000 C-grade origin stones in his account.

How did this happen? Liu Yan was a little confused. He clearly did not hand in any origin stones for the transaction. All the origin stones for the resources were still in the warehouse.

Furthermore, he didn't have any origin stones in his warehouse.

The high-grade origin stones had all been used by Liu Yan to make the enchanted puppets. The rests were low-grade B-grade and C-grade origin stones, or even lower. There were not that many of them.

In addition, Liu Yan felt the number 17653 seemed a little familiar.

After thinking about it carefully, Liu Yan suddenly remembered. Wasn't this the number of Lord's token fragments he had obtained back then?

Back then, when he was synthesizing the Lord Token on the fifth level of the Tower, he needed 10,000 Lord's token fragments.

However, because Liu Yan had recruited the other four teams, he naturally obtained the Lord's token fragments from them.

Other than the 10,000 pieces of Lord's token fragments that Liu Yan needed to synthesize, he had also obtained quite some Lord's token fragments. It was exactly 17653 pieces!

At that time, Liu Yan was still wondering why the extra Lord's token fragment was gone. There were no changes to the Lord Token either.

It turned out that the extra pieces of the Lord's token fragments had all become currency in the shop!

These currencies were naturally useful. They could be used to buy all sorts of things.

Even if it didn't work, Liu Yan could still buy the origin stones and use them directly. It was useful.

However, how did the Lord's token fragment that initially belonged to the entire team suddenly end up in Liu Yan's account?

Could it be that this was the benefit of being a captain?

"Perhaps it's the extra Lord's token fragments. One Lord's token fragment was exchanged for 10 C-grade origin stones." Liu Yan said.

Luo Qingcheng suddenly understood. "That's not bad. You can buy high-grade items with these C-grade origin stones. You can even buy a territory."

Liu Yan nodded. "We'll talk about this later. Although 100,000 C-grade origin stones are a lot, they'll be used up shortly if I buy a few high-grade items. I need to think about how to use it."

Immediately, Liu Yan and Luo Qingcheng left the shop and walked towards Team Origin.

He also needed to build and upgrade the wooden houses. Once he had a hundred level 1 wooden houses, he could upgrade the territory.

Even though there wasn't much time left today, there was still a chance to complete it.

When Liu Yan and Luo Qingcheng arrived at the wooden house, the team members were busy collecting the origin wood.

The origin wood looked similar to ordinary wood, but it was much bigger.

However, Liu Yan, who had the S-grade skill, Omniscient Insight, could sense the vast energy in the origin woods.

In addition, the origin wood was more suitable for building arrays. Hence, it was a crucial material for building wooden houses and other buildings.

Members of the Team Origin had already collected a lot of origin woods.

Fortunately, the territory barrier had a radius of three kilometers, which was huge. They could collect enough origin woods within the territory barrier.

At least for the first day, the team members did not need to leave the territory barrier, so they were safe.

When Luo Qingcheng saw this, she could not help but sigh, "Fortunately, we got the Golden Lord Token. Our territory barrier is three kilometers wide. Otherwise, if it's only one kilometer wide, we might not get enough origin woods.

Liu Yan nodded his head slightly. The territory was surrounded by open space, and a river was in the front.

Only in remote places would there be a small piece of the origin tree forest.

If the area was smaller, the origin tree forest would not be within the territory barrier. The member would have to leave the territory barrier on the first day, which would undoubtedly be dangerous.

The sky was getting dark, and it was already dusk.

Liu Yan saw that they had enough origin woods, so he told the members to finish gathering and return to the territory.

Once night fell, the fierce beasts and monsters would be more active, and the surroundings would be more dangerous.

The team members were all tidying up the origin trees, and making the final preparations.

Liu Yan looked at an ordinary member of the First Squad and found him familiar.

“Shi Hao, right? Take the origin wood and origin stone and upgrade a wooden house for me,” Liu Yan said.

As he spoke, he handed a D-grade origin stone to Shi Hao.

### 593 Upgrading the Wooden Houses

Shi Hao was only an ordinary member of the original Land of Origin team. Liu Yan had some impression of Shi Hao because he had met Shi Hao once when they were on the resting platform in the center of the third-and-a-half level of the Tower.

At that time, Shi Hao was bullied by Zheng Tainan and the others.

Although Shi Hao was only an ordinary member, he worked hard and passed the trial on the fourth level of the Tower. He followed the Land of Origin team and Liu Yan, successfully reaching the sixth level of the Tower.

When Shi Hao heard this, he was immediately a bit surprised. He never thought his captain would still remember him, and he was instantly overwhelmed by this unexpected favor.

“Yes, Captain!” Shi Hao replied. He took the D-grade origin stone from Liu Yan’s hands and casually walked in front of a level 0 wooden house, starting to upgrade.

The other buildings in the territory required the Lord’s token or Liu Yan’s permission before they could be built or upgraded.

However, the wooden house was different. Any team member could bind it.

After binding, the wooden house would belong to the team member. It would be the personal belonging of the team member, and the team member could also level up.

After Shi Hao targeted this level 0 wooden house, he took out one cubic meter of origin wood and D-grade origin stone to upgrade it.

Liu Yan and the others were watching from afar.

This D-grade origin stone was the lowest grade origin stone Liu Yan had.

After the wooden house was upgraded from level 0 to level 1, there was no level limit to the origin stones to upgrade it. Liu Yan naturally used the lowest level origin stones to upgrade them to save up on origin stones.

After seeing the Tower's sixth level exchange shop today, Liu Yan realized that he was not rich. He needed to save more.

Even though one origin stone was nothing, saving up bit by bit would still add up to a lot.

The other members had almost finished tidying up the origin woods. When they saw Liu Yan asking Shi Hao to upgrade the wooden house, they all gathered over curiously.

After Shi Hao handed over the materials, the level 0 wooden house automatically began to upgrade.

After a burst of yellow light, the wooden house was upgraded.

From the outside, the wooden house had become much bigger after the upgrade.

The previous level 0 wooden house was only four to five square meters in size, and there was only one bed in it. It was simple and crude.

The current level 1 wooden house was much bigger, about 20 to 30 square meters.

Although it wasn't big, it could satisfy basic living needs.

The other level 1 wooden houses also seemed to be a lot sturdier from the outside and had a certain level of defense.

But at this time, the will of the Tower's announcement sounded.

[ Congratulations to Shi Hao for completing the wooden house upgrade. Reward: 50 attribute points available! ]

[ Congratulations on your first wooden house upgrade. Reward: 100 attribute points can be allocated! ]

This time, the Will of the Tower only sounded within the Origin Territory, and only the people within the territory could hear it. It was specially made to inform the members within the Origin Territory.

The members of Team Origin were surprised to hear the Will of Tower's announcement.

He did not expect to receive a reward for upgrading the wooden house.

Upgrading the wooden house from level 0 to level 1 would give him 50 attribute points!

Although 50 points were not a lot, it was not a small amount either. Fifty points were how much an ordinary team member could obtain after leveling.

The most important thing was that these 50 attribute points could be freely allocated by the members. It was not as random as before. It was undoubtedly much more powerful. The team members could increase a certain attribute point according to their needs and improve their abilities.

In addition, they received another 100 attribute points after upgrading the wooden house to level 1!

Many members were envious.

“Shi Hao’s luck is good. He obtained an additional reward just like that.”

“Just now, Shi Hao and I passed by in front of the captain. It’s a pity I was busy, or else Captain Liu might have called me.”

“I guess there’s only an extra reward for the first time. There won’t be any extra rewards for the later times.”

“Shi Hao’s luck is good.”

...

Quite a few squad members were envious of Shi Hao.

The extra 100 attribute points were not a lot, but it could still increase his strength.

And in this harsh environment of the wind barrier on the sixth level of the Tower, every bit of increase in strength was a bit more chance of survival. It was naturally important.

At this moment, Shi Hao couldn’t help but look at Liu Yan with gratitude. “Thank you, Captain!”

Shi Hao knew Captain Liu Yan had probably just randomly called someone over to test it out. Still, Liu Yan helped him to receive this additional reward and obtain a boost in strength.

Liu Yan was a little surprised. He did not expect to get a reward for upgrading the wooden house.

Although the reward wasn’t much, it wasn’t bad either. After all, Liu Yan had obtained it for free, so it was not bad.

However, Liu Yan naturally did not care much about these attribute points.

After all, Liu Yan, who had the SSS-grade talent, Divine Extraction, could get hundreds or even thousands of attribute points by randomly extracting a fierce beast's corpse.

Liu Yan looked at the team members. "Next, we'll distribute the wooden houses, and then you guys should quickly complete the upgrade of the wooden houses. By the way, the number of wooden houses is still not enough. A few of you need to start building your level 0 wooden houses!"

Then, the team leaders arranged for the team members to distribute the wooden houses.

This kind of thing was naturally not up to Liu Yan to personally arrange.

When the members of Team Origin found out that there were rewards for upgrading the wooden houses, they all fought for the level 0 wooden houses or built their wooden houses. On the other hand, none of the members wanted the fifty level 1 wooden houses.

The level 1 wooden house was more powerful, but the team members were fighting for the level 0 wooden house. It was a bit funny.

However, everyone also knew that upgrading a level 0 wooden house to a level 1 wooden house did not require many materials. It only required one cubic meter of source wood and one origin stone without a level limit. The upgrading materials were easy to get.

On the other hand, completing the upgrade of the wooden house would reward him.

Even if Shi Hao couldn't obtain an additional reward as he did for his first level-up, the ordinary reward was still pretty good.

Very quickly, all 300 level 0 wooden houses had been snatched up by the members, leaving only level 1 wooden houses.

The rest of the team members could only choose these level 1 wooden houses with bitter expressions as if they had lost their treasures for nothing.

When Liu Yan saw this, he also laughed to himself.

As for Liu Yan himself, he had already bound a level 1 wooden house to himself.

Liu Yan was too lazy to get those 50 attackable points.

After the wooden houses were assigned, the team members began to upgrade their wooden houses.

The origin stones had just been collected today, so there was enough origin wood.

As for the origin stone, they all had it on them.

There were low-grade origin stones, but they weren't high-grade.

One after another, notifications rang out as the team members received their rewards.

Fifty points of allocatable attribute points was not a small number, but it could increase their strength.

A total of 300 members received this upgrade reward, which was quite a lot. It would bring improvement to the overall combat power of Team Origin.

#### 594 Upgrading the Territory

Liu Yan saw that the wooden houses were almost leveled up, so he told the members of Team Origin about the situation of the exchange shop.

The ordinary team members didn't care about the Tower's sixth level exchange shop. After all, it required too many origin stones, and they couldn't afford any item.

When team members found out that the territory exchange shop could use contribution points to exchange for all sorts of items in the territory, the team members were all overjoyed.

"I collected 92 cubic meters of origin wood today. I already have nine contribution points!"

"Haha, I've collected a little more. I've got a total of 12 contribution points."

"There are a lot of things that can be exchanged."

"It seems like our captain has put all the spoils of war in. How generous."

"So many cultivation resources. I have to exchange for some quick."

"Any contribution to the territory can be exchanged for contribution points?"

...

Immediately, the team members began to try.

[ Team member Zhang San has contributed an energy-gathering pill (B-grade) to the territory and received ten contribution points! ]

[ Team member Li Si contributed an armor-piercing bow (A-grade) to the territory and received 500 contribution points! ]

[ Team member Shi Hao has contributed windspeed boots (C-grade) to the territory and has received 100 contribution points! ]

[ Team leader Zheng Tainan contributed 100 pounds of dry food to the territory and received one contribution point! ]

...

The team members tried all sorts of things. They could obtain contribution points by contributing any item. They would get the corresponding contribution points based on the value of the item they contributed.

Then, they saw that some people contributed ordinary dried rations and obtained contribution points. Everyone was surprised.

“Zheng Tainan, you’re too sneaky. You contributed dry food.”

“That’s right. How are you not embarrassed by yourself.”

“If you want to contribute food, you should at least contribute some fierce beast meat. Who would want this ordinary dry food?”

“That’s right, who would want ordinary dry food?”

...

Zheng Tainan laughed awkwardly. “I’m just giving it a try. Isn’t it just one contribution point?”

The team members took out the items they didn’t need and exchanged them for contribution points. Then, they exchanged the equipment and cultivation resources that they needed.

After a round of exchanges, the team members were all satisfied. They had obtained what they needed.

Seeing this, Liu Yan could not help but secretly nod.

This territory exchange shop allowed members to exchange their items, which was undoubtedly much more convenient.

The team members could exchange with each other, but it would undoubtedly be a lot more troublesome.

This territory exchange shop could also increase the strength of the members of Team Origin.

Following that, many team members checked the Tower's sixth level exchange shop.

However, they were not interested in the lowest-level items, and they couldn't afford the high-level items.

"D\*mn, an A-grade weapon costs several hundred C-grade origin stones. Who can afford that?"

"I only have two C-grade origin stones on me. This is too expensive."

"I'm slightly better. I have a dozen or so C-grade origin stones, but that's only enough to buy a bottle of cultivation pills."

"The things here are good, but they're too expensive. I can't afford them."

"The territory exchange shop does have C-grade origin stones. One contribution point can get one C-grade origin stone."

"Looks like I'll have to collect more origin trees and origin stones tomorrow, or else I'll be too poor."

...

Members of Team Origin realized that they were poor, but they were also looking forward to it.

As long as they contributed more to the territory, they could obtain contribution points and exchange them for many items they needed. Then, they could continuously increase their strength!

There were many ways to contribute to the territory, from collecting materials to killing fierce beasts and monsters to obtain equipment. All of these could give them contribution points.

The members of Team Origin were looking forward to it.

They had only been on the sixth level of the Tower for a day. Although it was dangerous, many members had fallen in love with this place.

After all, while the sixth level of the Tower was dangerous, it could also bring them a lot of gains.

On the first day, they kept collecting origin wood. By upgrading the wooden house, they obtained 50 attribute points, which was more than what they had gained in the past few days of cultivation.

Not to mention, the level 1 wooden house could continuously increase their strength.

Resting in a level 1 wooden house not only allowed them to recover quickly, but they could increase their strength too. There were many benefits.

And the team members were even more clear that this was only the beginning.

They had not even left the territory barrier. It was said that there were many dangers outside the territory barrier. But at the same time, many treasures could bring them unimaginable gains and increase their strength.

Danger and opportunity coexisted on the sixth level of the Tower!

Liu Yan looked at the territory upgrade panel.

[ Level 1 territory ]

Upgrade requirements: 10 members with 6 stars and above, Lord with 7 stars and above, 100 level 1 wooden houses ]

Upgrade materials: 100 cubic meters of origin wood (any level), ten origin stones (any level) ]

They had met the first two requirements out of the three to upgrade to a level 1 territory.

The Team Origin's strength was not bad. They were a combination of five small teams, so it was naturally strong enough.

The third condition had also been completed after the recent upgrade.

Thanks to the gold-grade horde leader token, the territory barrier's initial range were much larger, reaching a radius of three kilometers.

It allowed the members of Team Origin to collect enough origin wood in half a day to complete the upgrade of the wooden house.

They had enough to build 400 level 1 wooden houses, let alone 100.

The 300 wooden houses in the territory had all reached level 1.

With sufficient origin wood and the rewards for upgrading the wooden house, the team members had been rushing to level up.

Liu Yan had met the requirements to upgrade to a level 1 territory. He did not hesitate and directly upgraded it.

A hundred cubic meters of origin wood and ten D-grade origin stones entered the Golden Lord Token in Liu Yan's hand. They then turned into a ray of light that covered the territory barrier and the entire territory.

The territory barrier expanded, and some changes were quietly happening within the territory.

Not long after, the light disappeared, and the territory barrier expanded.

The territory had also become bigger.

At this moment, the Will of Tower's announcement sounded in the Origin Territory.

[ Congratulations on completing the territory upgrade, the territory has reached Level 1! ]

[ The territory barrier has expanded to a radius of 5 kilometers. New construction and upgrade options have been unlocked! ]

[ Congratulations on completing the territory upgrade. Lord received: One golden treasure chest. All members received: 100 allocatable attribute points! ]

Hearing the Will of Tower's announcement, the members of the Team Origin were surprised. They could get rewards for upgrading their territory?

A hundred attribute points were not a small number. It was a significant increase for every member.

"This is wonderful. I can even get rewards when I upgrade my territory."

"A hundred allocatable attribute points. I'll have to level up twice to get that much."

"I usually need to cultivate for close to a week to increase 100 attribute points. This is so great!"

"These are attribute points that can be allocated. They're different from normal attribute points. They're even more powerful."

"That's right. My spirit attribute has always been weak. This time, I'll increase it."

"I'll also increase my spirit attribute. The spirit attribute is the hardest to increase through cultivation, but now I can directly increase it!"

“This is indeed a place where danger and opportunity co-exist. We haven’t even left the territory yet, but we’ve already gained many benefits in a day!”

...

## 595 Hard-earned Peace

The next morning.

After a night’s rest, members of the Team Origin had assembled.

All the team members were full of energy and were in high spirits.

It had been a long time since they had such a good rest.

Although the fourth and fifth levels of the Tower were all about trials, there were not many dangers. It was just difficult, and it could not be compared to the deadly threats of the sixth level.

However, they were living in a wooden house in the territory of origin, which was surrounded by a territory barrier. It was undoubtedly much safer.

The team members could rest in peace, much better than before.

In this regard, Tower’s lower levels could not compare with the sixth level.

In the previous lower levels of the Tower, they had never been able to relax and rest.

On the other hand, they could have a good rest on the sixth level of the Tower, within the safe Origin Territory.

Apart from that, he was still resting on the bed in the wooden house.

The wooden house that had been upgraded to level 1 was now basic.

Although it wasn’t big, it was completed with essential things, and they could rest well.

They did not need to eat and sleep outdoors as they did in the previous trials of the Tower.

It was only better when they reached the fifth level of the Tower, where they could sleep in tents in the temporary territory.

However, how could this be compared to sleeping on the bed in the cabin?

The team members had a good rest, both mentally and physically.

In addition, the wooden house had a function that could continuously increase the user's combat experience and attribute value. It could also quickly recover health points and energy, sweeping away the fatigue of the team members.

At this moment, the team members were discussing excitedly.

"It's so comfortable. I haven't had such a good sleep in a long time."

"Indeed, it's a good thing."

"Yeah, although the sixth level of the Tower is much more dangerous than the lower levels, it's a good place to rest."

"Isn't that so? In the past, we either acted alone or in teams. We didn't have a place of our own. We wandered all day long. Now, we have a territory and a nice place to stay. It's completely different!"

"It's so comfortable to have a territory. I hope our territory and team can gradually grow stronger."

"No matter what, we can rest well in the future. When we are training, we will continue to work hard!"

...

## 596 Stability in the Territory

At this moment, Liu Yan had also walked out of his wooden house after having his breakfast. He felt extremely comfortable after a good rest.

Liu Yan felt the same way when he heard the discussion and sighs of his team members.

Although the trial on the sixth level of the Tower was dangerous, this unique trial method was quite good.

Not only did he form a team, but he also had his territory.

The trial on the sixth level of the Tower not only needed to improve one's strength but also emphasized one's talent and hard work. At the same time, it also placed great emphasis on territory and team.

Individuals and the team were inseparable.

Previously, Liu Yan had always liked to travel alone because he had an SSS-grade talent, Divine Extraction. His strength was far ahead of other awakened ones of the same level in all aspects. He would be dragged down if he formed a team with others.

He formed a team with Murong Xue and Chu Long because of their good relationship and the rules. He had no choice.

However, Liu Yan finally experienced the benefits of having a team and territory.

They were resting at night, team members were constantly taking turns to guard, so Liu Yan could rest assured.

After having a territory, things became easier in all aspects.

No matter how violent the wind energy was outside the territory barrier, it was safe inside the territory barrier. The team members could safely develop and increase their strength.

At this moment, Liu Yan arrived in front of his team members.

When the team members saw Liu Yan's arrival, they immediately quieted down.

Liu Yan looked at his team members. He was in a good mood today as well. He smiled and said, "It seems everyone has had a good rest. Today, we will work hard to improve our strength and develop the territory. The territory is still relatively peaceful, but we can't be sure about the future. We can only maintain this peace by improving our strength!"

The team members all understood what Liu Yan meant.

The Origin Territory was relatively peaceful now.

However, they knew there was still a gap between Team Origin's strength and many other teams in the Wind Barrier.

If they encountered other teams, they would lose.

In the worst case, they might even be massacred.

At that time, what they would face would not be as simple as failing the trial, but they would lose their lives.

The sixth level of the Tower was just that cruel. Many teams would find it difficult to survive on the sixth level, let alone pass the trial.

Within the Wind Barrier, only the strong could survive. Only the most powerful beings could pass the trial on the sixth level of the Tower and successfully advance to the seventh level!

After hearing Liu Yan's words and thinking about all this, the team members were excited.

"Don't worry. We will work hard."

"That's right. Although we're weak now, we can't be sure about the future."

"My strength has increased a lot during this period. I can't wait to continue improving."

"Although I'm very mediocre now, I'll become stronger!"

"We will all become strong. We definitely won't be a burden!"

"Our Origin Team will become stronger!"

...

The team members immediately had high morale.

When Liu Yan saw this, he felt slightly relieved.

At this moment, some experts had also arrived. The members of the five squads had already assembled.

Seeing this, Liu Yan began to talk about serious matters and assigned tasks.

"This morning's mission is simple. First, clear all the monsters within the territory barrier. This is the first time you're coming into contact with the fierce beasts and monsters on the sixth level of the Tower, so you have to be careful. Move in small teams first, don't act alone." Liu Yan instructed.

After completing the territory upgrade last night, the territory barrier had expanded quite a bit.

After the territory barrier expanded, there would be fierce beasts and monsters.

Only by clearing out these fierce beasts and monsters could the members safely gather all kinds of materials and cultivate within the territory barrier.

After Liu Yan gave his instructions, he asked the five squad leaders to lead their members and split up.

Liu Yan didn't need to worry about the specific implementation because the leaders of the five squads would arrange it.

The Land of Origin team was now the First Squad. Xu Han was leading the squad, and Liu Yan did not need to care about them at all.

The five squads went in five different directions and split up to clear out the monsters within the territory barrier.

Liu Yan looked at the few people behind him. They were Luo Wei, Sun Wen, Chu Cunrui, Derek Dole, Allen Smith, and Murong Xue.

The four of them didn't belong to any team at the moment. They followed Liu Yan and listened to his orders.

"Luo Wei, go and investigate the distribution of the fierce beasts and monsters in the territory, then report to me and inform the five leaders to make preparations." Liu Yan instructed.

"Yes!" Luo Wei replied and then disappeared without a trace.

Luo Wei was originally the number one assassin on the Red Star Empire team.

He was one of the top assassins in Team Origin, second only to Liu Yan.

As an assassin, Luo Wei specialized in concealment and speed. He was agile and fast enough to scout out the distribution of the fierce beasts and monsters in the territory. At the same time, he could avoid any danger.

Liu Yan then looked at Sun Wen and said, "During this time, you should focus on the situation of the other territories on the sixth level of the Tower. Yesterday, when the territory was upgraded to level 1, the public chat channel seemed to have been opened. You'll go and observe the situation of the other teams but remember not to reveal the real situation of our territory to avoid danger."

Sun Wen's strength was not bad, but he was only an ordinary expert. He could not be considered a top-tier expert.

On the other hand, Sun Wen's greatest strength was his intelligence. He was the best candidate to scout out the situation on the sixth level of the Tower while avoiding danger.

When Sun Wen heard this, he agreed and went to work.

Immediately after, Liu Yan looked at Derek Dole and said, "This morning, you will search the territory barrier and see if you can find any wind crystal stones."

“Alright.” Derek Dole replied and also left.

Liu Yan did not make any arrangements for the remaining people.

Everything had already been arranged, so there was nothing else to do.

Everything would have to wait until the fierce beasts and monsters within the territory barrier were cleared out and ensured their safety.

After clearing up and ensuring the safety of the territory, he would plan the exploration outside the territory barrier.

Seeing that there was no mission for him, Allen Smith didn't mind. He stood calmly at the side and waited quietly.

Murong Xue couldn't sit still any longer. She asked, “Liu Yan, how could you do this to me? We are old teammates. Why didn't you assign me a task?”

Liu Yan glanced at Murong Xue as he laughed helplessly.

This woman loved to fight and couldn't stay idle for a moment.

“There's no other mission. Just wait.” Liu Yan said helplessly.

“It can let me explore the area outside the territory barrier!” Murong Xue had a look of anticipation on her face. I'm skilled in defense. I'm the most suitable to explore the area outside the barrier.”

Liu Yan shook his head. “I will let you explore the area outside the territory barrier. But not now. Once everything inside the territory is stable, we will form a small team and head out together.”

#### 597 First Encounter with Whirlwind Turtle

When Murong Xue heard this, she felt a little dejected. How long would she have to wait?

“Then let me go with you to clear the territory barrier!” Murong Xue's face was filled with anticipation.

Allen Smith said calmly, “Yesterday, I saw something at the border of the territory barrier. The beasts outside the barrier are mainly turtle-type beasts. They look strong, but they're just so-so and not interesting.”

Liu Yan also said, “Stay here. The other members are strong enough. We can head out of the territory barrier in the afternoon if everything goes well.”

Liu Yan wanted stability, but he understood they did not have to be too careful. He still had to speed up the progress.

Although the territory barrier wasn't small, there were plenty of materials inside.

However, if he wanted the territory to develop and his team members to improve quickly, they would have to go outside the territory barrier.

When Murong Xue heard this, she sighed helplessly and couldn't help but feel a little regretful.

If Murong Xue had known earlier, she would have joined the First Squad. At least, she could have followed them to carry out ordinary missions.

The rest of the experts in the First Squad were now on their way to clean up the fierce beasts. However, she and Allen Smith, the two experts, were accompanying Liu Yan and idling around. It was really boring.

Immediately after, Liu Yan and the other two did a simple inspection of the territory and waited patiently. Of course, if the ordinary members outside were in any danger, they would also go to help.

It was why Liu Yan didn't allow Murong Xue to join the main force. He wanted her to be a backup force in case of any accidents.

Liu Yan knew he was the captain of the origin team, and he had to do things differently. Liu Yan could not only think about himself anymore. He must also think about the benefit of the entire team.

Not long after, a shadow suddenly appeared beside the three of them. It was Luo Wei.

Liu Yan and Allen Smith had already sensed Luo Wei's arrival.

Although Luo Wei's concealment ability was terrifying, it was not as good as Liu Yan's, so Liu Yan could easily sense him.

Allen Smith's perception wasn't as terrifying as Liu Yan's, but he could also sense Luo Wei's arrival.

As for Murong Xue, she wasn't that strong in perception and had no idea that Luo Wei had arrived.

Murong Xue didn't sense anything even when Luo Wei walked past her.

When she saw Luo Wei suddenly appear, Murong Xue was shocked. "Luo Wei! Can you stop being so mysterious? Who are you trying to scare?"

Luo Wei was stunned. Why Murong Xue scolded him?

Liu Yan waved his hand, signaling for Murong Xue to stop talking. He then turned to Luo Wei and asked, "How is it?"

Luo Wei nodded slightly and reported, "There is only one type of fierce beast within the territory barrier. It is called the Whirlwind Turtle. In terms of strength, it is quite strong. It is much stronger than the monster on the fifth level of the Tower. In terms of combat power, it has already reached 6-star!"

When Liu Yan heard this, he was slightly surprised.

He didn't expect the beasts on the sixth level of the Tower to be so strong. Any of the fierce beasts he encountered had already reached 6-star combat power.

Six-star combat power was already much stronger than the elite monsters on the fifth level of the Tower.

On the other hand, the ordinary members of the origin team were around 4-star or 5-star. Some support members only had 3-star combat power.

Only experts like Zheng Tainan could reach 6-star.

Other than them, only top experts like Liu Yan and Allen Smith had combat strength above 6-star.

"I'm afraid it would take more than ten ordinary members to deal with a 6-star fierce beast. How many Whirlwind Turtles are there? Are there any bosses?" Liu Yan asked again.

Liu Yan knew the fierce beasts and monsters on the sixth level of the Tower. Apart from being much stronger, they had another significant difference from those on the lower levels.

The fierce beasts and monsters on the sixth level of the Tower had also gained a certain level of intelligence, and most of them had formed groups.

There were very few cases of fierce beasts acting alone like those on the lower levels of the Tower.

The fierce beasts on the sixth level of the Tower not only moved in groups, but their leaders were also intelligent and powerful.

If there were many Whirlwind Turtles and a leading boss, Team Origin would be in a difficult situation.

Luo Wei heard this and reported, "There aren't many Whirlwind Turtles inside the territory barrier, only a few dozen. I just took a look. Although it's not easy for our five squads to deal with them, we can still handle it. As for the boss of the Whirlwind Turtles, it's not inside the territory barrier. It's just outside the territory barrier. I just saw it leading a large group of Whirlwind Turtles and watching the Whirlwind Turtles inside the territory barrier being attacked. However, they can't break through the territory barrier."

"Really? Wouldn't the boss of the Whirlwind Turtles be so angry that it can only watch as the Whirlwind Turtles are killed without being able to help? Hahaha!" When Murong Xue heard this, she felt that it was funny.

Liu Yan was also a little surprised. He had not expected such a coincidence.

The barrier of a level 0 territory had a radius of three kilometers, and there were no fierce beasts in the beginning.

After completing the territory upgrade last night, it reached Level 1, and the barrier expanded.

As a result, a portion of the Whirlwind Turtles was trapped inside the barrier, while most of them and their boss were still outside the territory barrier. It was purely a coincidence.

"Let's go and check the situation." Liu Yan waved his hand.

Immediately, under Luo Wei's lead, Liu Yan and the other two walked toward the direction of the Fourth Squad.

The Whirlwind Turtle boss was outside the territory barrier in this direction.

As Liu Yan and the others walked over, they saw the members of the Fourth Squad, under the leadership of the captain of the Fourth Squad, He Yang, besieging the Whirlwind Turtle.

The Whirlwind Turtle's size was not small. It was bigger than a regular human.

However, the Whirlwind Turtle, which had mastered a certain amount of wind elemental energy, was not as slow as ordinary turtles. With a slight turn, it could escape from the battlefield. They were surprisingly agile.

In addition to its terrifying defensive power, the members of the Fourth Squad were undoubtedly struggling to deal with it.

After all, the Whirlwind Turtle had a 6-star combat power, which was much stronger than the ordinary members of the Fourth Team. In addition, it also had a terrifying defense and speed, making it even more difficult to defeat.

Liu Yan looked over and saw that apart from those experts, the members of the Fourth Squad needed more than a dozen members to deal with one Whirlwind Turtle.

Even so, under the joint attack of more than a dozen people, it would take a lot of time to deal with a Whirlwind Turtle, which was strenuous.

The members of Fourth Squad had never encountered such a powerful fierce beast before, except for boss-type ones. It required more than a dozen of them to work together to defeat it, and it was still challenging.

“I didn’t expect the fierce beasts on the sixth level of the Tower to be so powerful.”

“This Whirlwind Turtle seems to be the most ordinary beast on the sixth level of the Tower. I didn’t expect it to be so difficult to deal with.”

“It’s a good thing we have a lot of people, and there aren’t many Whirlwind Turtles. Otherwise, we would be finished today.”

“Just now, I saw a dense horde of Whirlwind Turtles outside the territory barrier. There are so many of them. If they were to come in, we wouldn’t be a match for them at all.”

“Fortunately, we have a territory barrier. Many Whirlwind Turtles outside can’t get in at all.”

“I think I saw the boss of the Whirlwind Turtles. It’s the size of a small mountain and looks very powerful.”

“This level is filled with fierce beasts. It seems like our future won’t be easy.”

...

598 Whirlwind Turtle King!

The members of the Fourth Squad were struggling to deal with the Whirlwind Turtle.

Liu Yan saw this but did not help.

Liu Yan’s 11-star combat power could defeat these six-star Whirlwind Turtles easily.

If Liu Yan were to make a move, he could annihilate the Whirlwind Turtles that the Fourth Squad was fighting.

But Liu Yan did not do anything.

Liu Yan could help the Fourth Squad now, but what about the future?

Liu Yan knew the members of the Fourth Squad needed to experience tough battles.

Only after many challenging battles would the members of the Fourth Squad be able to improve their strength in the future.

Liu Yan looked at the members of the Fourth Squad and encouraged them. “Don’t worry, keep fighting. Although these Whirlwind Turtles are strong, you have a team. In addition, you’ll have the combat power to fight the Whirlwind Turtle on your own in the future!”

The members of the Fourth Squad had initially thought that it would be difficult, but after seeing Liu Yan’s arrival, their faces became much more excited.

In their hearts, Liu Yan was their idol. Back on the fifth level of the Tower, Liu Yan had single-handedly defeated the European Federation team. The Pan-ocean Community team had watched the entire process and were shocked by Liu Yan.

When the members of the Fourth Squad heard Liu Yan’s encouragement, they were instantly excited.

“Captain Liu is right. We have a team, and we have more people. We can defeat this Whirlwind Turtle.”

“That’s right. Although this Whirlwind Turtle is strong, so what? It’s still going to lose to us.”

“Although the beasts on the sixth level of the Tower are powerful, there are also many opportunities. We will be able to grow quickly.”

“That’s right. The sixth level of the Tower is full of opportunities. We can become stronger. Many opportunities are waiting for us!”

“I want to be as powerful as Captain Liu Yan in the future!”

...

With Liu Yan’s encouragement, the members of the Fourth Team immediately became more confident.

Correspondingly, their combat strength also increased after their spirits were hyped. The Whirlwind Turtle kept running away from their attacks, not daring to fight head-on.

He Yang was currently fighting a Whirlwind Turtle alone. When he saw this scene, he could not help but feel relieved. He nodded at Liu Yan from afar, thanking Liu Yan for his encouragement. Liu Yan’s speech made members of the Fourth Squad regain their confidence and increase their combat strength greatly!

At this moment, Liu Yan was satisfied.

Members of the Fourth Squad had a tough time dealing with these Whirlwind Turtles. But these team members weren't weak. They would become much stronger in the future.

At that time, he believed that each of them would have the battle strength to deal with the Whirlwind Turtle alone!

After this, Liu Yan led Murong Xue and the other two and continued moving forward, passing through the battlefield. However, they didn't make any moves.

When Murong Xue saw the scene before her, there were a few times when she wanted to join the fight. However, when she saw Liu Yan continuing to advance, she could only follow him and not interfere.

Not long after, Liu Yan and the others passed through the battle area between the Fourth Squad and the Whirlwind Turtle. Then, they arrived at the edge of the territory barrier.

As soon as they arrived, they saw a Whirlwind Turtle the size of a small mountain. It was over ten meters tall when it lay down and slammed into the territory barrier.

The enormous Whirlwind Turtle charged over with great power.

However, when it landed on the territory barrier, it was blocked by an invisible force. Under the loud collision sound, the territory barrier did not move at all.

Even the powerful Whirlwind Turtle King could not do anything to the territory barrier.

When one of the team members saw this, he explained to Liu Yan and the others, "When we first started clearing out the ordinary Whirlwind Turtles inside the territory barrier today, this giant Whirlwind Turtle had been hitting the territory barrier. We were worried at first, but later we realized that it couldn't break in. This territory barrier is powerful!"

The rest of the team members also agreed.

"That's right. This territory barrier is too powerful. Even such a giant Whirlwind Turtle can't break in."

"This Whirlwind Turtle has been crashing into it for so long, but the territory barrier is fine."

"This territory barrier is so powerful. I feel so safe."

“It’s so sturdy and strong!”

...

The team members discussed and continued to work together to deal with the Whirlwind Turtle.

Although they could deal with one Whirlwind Turtle together, they didn’t dare to let their guard down.

The Whirlwind Turtle with a six-star combat power was already equivalent to an expert in their team.

Even if they were to deal with a single Whirlwind Turtle, they would still be injured if they were not careful. They had to be extremely careful.

After Liu Yan heard this, he immediately understood.

This territory barrier seemed to be very powerful. It had no problem stopping the Whirlwind Turtle.

Liu Yan looked at the Whirlwind Turtle, which was as big as a small mountain, and immediately checked its attribute panel.

[ Whirlwind Turtle King ]

Potential: S-grade

Level: 72

...

Combat power rating: 8 stars!

Liu Yan looked at the Whirlwind Turtle King’s attribute panel and was a little surprised. This Whirlwind Turtle King’s combat power had already reached eight stars.

In Team Origin, only five people, including Allen Smith, had reached eight-star combat strength.

Other than that, only Liu Yan himself had reached 11 stars of combat power.

In Team Origin, an 8-star combat power was already among the top experts!

Now, the boss of any fierce beast group they encountered had reached 8-star combat power.

However, Liu Yan immediately felt relieved after thinking about it. After all, an ordinary Whirlwind Turtle's combat power had already reached six stars, so it wasn't surprising that the Whirlwind Turtle King's combat power had reached eight stars.

At this moment, the Whirlwind Turtle King had temporarily stopped charging forward. It was staring at Liu Yan through the territory barrier and roaring continuously.

With the existence of the territory barrier, Liu Yan couldn't hear the Whirlwind Turtle King's roars. However, one could see the anger in the Whirlwind Turtle King's eyes. It seemed to hate Liu Yan and the others for attacking ordinary Whirlwind Turtles, but it couldn't stop them.

Liu Yan was a little surprised. The Whirlwind Turtle King, which had reached eight stars of combat power, had such a high level of intelligence. Not only did he care about the ordinary beasts below him, but he could also tell that Liu Yan was the leader of Team Origin. He was indeed quite powerful to stare at Liu Yan.

Liu Yan secretly noted this in his heart. It seemed that he would have to pay more attention to this Whirlwind Turtle King in the future.

Although the Whirlwind Turtle King could threaten Team Origin, it still had to be killed.

After all, according to Luo Wei's investigation.

On the other side of the territory, there were many Whirlwind Turtles.

It was obvious that this was the habitat of a Whirlwind Turtle.

If the members of Team Origin wanted to leave the territory barrier to collect resources and harvest outside, they had to pass through here.

Only by dealing with these Whirlwind Turtles would the members of Team Origin be able to go out safely.

Not to mention, the territory would continue to upgrade, and the territory barrier would continue to expand. Sooner or later, they would have to deal with the Whirlwind Turtle King.

Then, Liu Yan brought Luo Wei and the others and continued to stroll around the borders of the territory.

Within the territory barrier, the members of the five squads were under the leadership of their respective leaders, fighting the Whirlwind Turtle.

Although the Whirlwind Turtle's combat power was at six stars and was extremely powerful, there were only a limited number of them. The members of Team Origin had a

difficult time, but they still could defeat the Whirlwind Turtles. Overall, it was still relatively smooth.

The real danger was still outside the territory barrier.

#### 599 Bountiful Harvest

There were many Whirlwind Turtles outside the territory barrier, far more than the ones inside.

Fortunately, after a round of investigation, Liu Yan and the others found that only about half of the area had Whirlwind Turtles.

The remaining half of the area was free of Whirlwind Turtles, and it did not seem to be their habitat.

This way, the pressure on Team Origin would become lesser. They could go out from these directions and slowly kill the Whirlwind Turtles. They wouldn't be surrounded by them as soon as they went out.

When it was almost noon, the five teams had already cleared all the Whirlwind Turtles within the territory barrier.

At this time, the team members also submitted their gains.

The Whirlwind Turtle's corpse and origin stone were not of much use to them.

Rather than keeping it, it would be better to hand it over to the territory and obtain contribution points, which could be exchanged for other useful things.

After all, Liu Yan had already stored tons of spoils of war he had obtained from the Tower's fifth level in the warehouse for all the team members to exchange for contribution points. At this time, contribution points were crucial to these ordinary team members.

As the team members handed in their items, a series of notifications appeared in the exchange shop.

[ Team member Feng Tai has submitted a piece of origin stone (A-grade) and received 1000 contribution points! ]

[ Team member Liu Liqun has submitted the corpse of a Whirlwind Turtle (A-grade fierce beast) and received 300 contribution points! ]

[ Team member Lu Jinming has submitted a piece of origin stone (B-grade) and received 500 contribution points! ]

...

As the team members handed their items, they received a lot of contribution points.

These Whirlwind Turtles were not low-level and powerful, which brought them great gains.

An A-grade origin stone could be exchanged for 1,000 contribution points, which could be used to exchange for resources in the territory exchange shop.

Of course, the contribution points were divided equally among the team members. After all, it was a joint effort of several people to solve the problem, so the gains were naturally divided equally among them.

What made the team members the happiest was that a fierce beast's corpse could be exchanged for many contribution points, which was a bit unexpected.

In their opinion, the corpses of fierce beasts had no use other than eating them.

But now, a Whirlwind Turtle's corpse could be exchanged for several hundred contribution points. Although it couldn't be compared to the contribution points from the origin stones, it was still quite a lot. No team members wanted to eat the turtle meat. They immediately handed it over to the territory to exchange for contribution points.

When Liu Yan saw this, he laughed in his heart.

The corpses of these fierce beasts were of no use to other awakened ones.

However, it was like a treasure to Liu Yan.

In the afternoon, when the team members were resting and regrouping, Liu Yan went to the exchange shop and exchanged for a large number of Whirlwind Turtles' corpses.

After that, Liu Yan started Divine Extraction.

Rays of milky white light fell on the corpses of the Whirlwind Turtles.

The corpses of the Whirlwind Turtles instantly withered.

In front of Liu Yan, a series of extraction also appeared.

[ Divine Extraction of Whirlwind Turtle corpse (A-grade fierce beast, level 51), obtained:  
[ combat experience +1231, agility +873, vitality +567, wind elemental affinity +67! ]

[ Divine Extraction of Whirlwind Turtle corpse(B-grade fierce beast, level 58), obtained:  
Combat experience +923, agility +731, strength +482, wind elemental affinity +57! ]

[ Divine Extraction of Whirlwind Turtle corpse (A-grade fierce beast, level 52), obtained: Combat experience +1312, agility +921, resistance +451, wind elemental affinity +77! ]

...

[ You have gained enough combat experience to level up. You have successfully leveled up! ]

[ Your level has reached Level 42! ]

[ You have gained enough combat experience to level up. You have successfully leveled up!]

[ You have reached level 43!]

The dozens of Whirlwind Turtles' corpses that he had just exchanged for were all extracted by Liu Yan.

The Whirlwind Turtle corpses brought a huge harvest to Liu Yan.

With tons of combat experience, Liu Yan rose by two levels, reaching level 43. His various attributes received a huge boost, and his strength also increase.

After all, Liu Yan had already built a perfect foundation and reconstructed a perfect physical body. Now, every upgrade would bring him a huge improvement.

The corpses of the Whirlwind Turtles also gave Liu Yan many attribute points by using his Divine Extraction.

He had the most increase in his agility attribute because these Whirlwind Turtles were wind-typed fierce beasts.

To Liu Yan's surprise, apart from these regular increases, there was also an increase in affinity with the wind attribute.

Liu Yan carefully sensed it. After boosting the wind element affinity, Liu Yan's perception of the wind elemental energy became clearer.

The current Liu Yan could vaguely sense the wind elemental energy in the air.

He also could sense terrifying wind elemental energy from his SSS-grade special equipment, Wings of Wind God.

It seemed that the affinity of the wind elemental energy was like this.

Liu Yan was overjoyed. If this continued, he could master the Wind Talent or even the Wind Secret Art in no time. He did not need those treasures as long as he extracted enough wind-typed fierce beasts.

However, Liu Yan could also feel that these Whirlwind Turtles did not have high attainments in wind elemental energy. They were just ordinary fierce beasts. Therefore, his boost in affinity with wind elemental energy was limited. He estimated that he would need to extract more wind-typed fierce beasts.

Or he could extract a powerful wind attribute beast to speed up the process.

However, Liu Yan was not in a hurry. He knew that the wind elements were not an ordinary attribute. It was a high-tier attribute, and it would not be easy to master it. He would need to put in a lot of effort.

Liu Yan was already satisfied. Without any battle, he could level up two levels by just using the corpse of the Whirlwind Turtle that his team members had obtained after the battle. It was convenient.

From the beginning to the end, Liu Yan only paid a few contribution points and nothing else. Hence, Liu Yan had many contribution points.

After all, Liu Yan was the one who had stored a large amount of loot in the warehouse.

A large number of spoils of war brought Liu Yan a large number of contribution points.

Liu Yan's contribution points were more than all the contribution points of the entire team combined. There was no way he could spend all of them!

Liu Yan was satisfied. He activated his SS-grade Fire Secret Art. A huge flame appeared on the spot, directly burning the dead Whirlwind Turtle's corpse into ashes. Then, Liu Yan walked back to his team members.

At this moment, the members of Team Origin were resting, eating lunch, and healing.

Other than some members being on guard, the rest of the team members relaxed.

"I didn't expect the first day's battle to be so difficult. These Whirlwind Turtles are strong."

"Luckily, we have more people. Otherwise, we wouldn't have been able to deal with these Whirlwind Turtles."

"That's right. The eight of us fought against a Whirlwind Turtle, and six of us were injured."

“It’s a close call, and the injuries aren’t serious.”

“There are so many of us. It’s not that difficult to beat the Whirlwind Turtles as a group, haha!”

“The Whirlwind Turtles within the territory barrier have all been eliminated. The territory barrier is safe once again.”

“It’s great to have a territory barrier. We’re very safe now.”

...

## 600 Harsh Environment

The members of Team Origin were all happy.

Although many team members had been injured in today’s battle, most of them were light injuries, with only a few members suffering from serious injuries.

The team members with minor injuries could slowly recover after some simple treatment. After all, they were all awakened ones, and their physical fitness was not bad.

As for the members who were seriously injured, Chu Long would personally treat them, and they would also recover quickly.

The members of Team Origin didn’t suffer many losses.

With the territory barrier, the members were relieved. They knew that there was no danger within the territory barrier.

When the other team members saw Liu Yan, they were all excited.

“Captain, did you see that? We’ll be able to deal with so many Whirlwind Turtles in half a day.”

“That’s right. Today, the four of us took care of a Whirlwind Turtle. It’s amazing.”

“So what if these Whirlwind Turtles are powerful? Aren’t they defeated by us?”

“Captain, we’ve cleared all the Whirlwind Turtles within the territory barrier. Our territory is safe.”

...

The members excitedly talked about it as if they were taking credit for it.

When Liu Yan heard this, he smiled and said with certainty, "Well done. You cleared all the beasts within the territory barrier in half a day."

Hearing Liu Yan's praise, the members of Team Origin were all excited.

However, Liu Yan's tone changed. "However, this is only the beginning. We still have a long way to go. We'll take a break later. We're going to try to leave the territory barrier."

Liu Yan had also thought about it carefully.

Although it was filled with danger outside the territory barrier, not to mention the unknown dangers in the distance.

What was known so far was the brutal nature of the wind elemental energy and the Whirlwind Turtles were near the territory barrier, including the powerful and intelligent Whirlwind Turtle King.

They were dangerous to the members of Team Origin.

However, Liu Yan also understood that the members of Team Origin had to leave the territory barrier and take risks outside.

There were not many materials left inside the territory barrier, and they could not find some specific materials.

Staying within the territory barrier would be safer for a short time, but they couldn't be sure about the future. They had to leave the territory to explore and collect resources.

The members of Team Origin had just cleared out all the fierce beasts within the territory barrier and had relaxed a little. Hearing Liu Yan's words, they immediately became nervous again.

"Captain, why are we leaving the territory barrier so soon?"

"I saw it on the public chat channel. Many teams that arrived on the sixth level of the Tower would usually develop for half a month or even a month before leaving the territory barrier because they were not strong enough."

"Yeah, we've only been on the sixth level for two days. Isn't it too early to leave the territory barrier?"

"There are so many powerful Whirlwind Turtles out there. We're no match for them!"

"Captain, are we strong enough?"

...

The team members were all worried.

Even the experts were a little worried.

After all, there were so many members in Team Origin, and it would be difficult for them to deal with dozens of Whirlwind Turtles.

If he had to face the hundreds of Whirlwind Turtles outside the territory barrier, it would be even more difficult.

When Liu Yan heard this, he naturally understood the worries of his team members and consoled them.

“I know what you’re worried about. It’s safer to stay within the territory barrier, but you must know that we can’t improve our strength and develop the territory if we stay in the territory barrier. The safest way is to improve our strength and not rely too much on the territory barrier. Relying on the territory barrier will be safer now, but it will be useless in the future. After all, there will be other territories invading our territory. There will also be a period of monster attacks when the territory barrier is no longer effective.”

“We need to eliminate the Whirlwind Turtles outside sooner or later. It’s better to clean them up early than later. We can take our time, and there’s no need to finish them all at once. I’ve just observed that only half of the area has Whirlwind Turtles. We can go out from other directions and slowly clean them up. If we encounter danger, we can retreat into the territory barrier when necessary.”

The team members naturally understood Liu Yan’s reasoning.

Although it was dangerous to leave the territory barrier, there was also a greater chance to increase their strength, which would bring them long-term safety. They would be able to survive on the sixth level of the Tower for a long time and even have a chance to advance.

However, many of the team members were still worried.

After all, Whirlwind Turtles left a deep impression on them.

Any random fierce beast they encountered on the sixth level of the Tower had a combat power of six stars, which was more powerful than most of their team members.

Not to mention that there were still many Whirlwind Turtles outside, so naturally, many of the team members were worried.

However, some team members were looking forward to it. After witnessing Liu Yan’s strength, they had absolute trust in him and wanted to follow him to become stronger.

“Everyone, Captain is right. No matter how good the territory barrier is, it can’t protect us forever.”

“That’s right. The safest way is for us to grow our strength.”

“Captain is right. We utilize the territory barrier to explore and deal with the Whirlwind Turtle, not hide inside.”

“I don’t want to hide inside. It’s too slow to improve my strength.”

“We can only slowly cultivate on our own if we stay inside the territory barrier. There’s no other way to increase my strength. I can’t even continue to upgrade my wooden house.”

“With Captain Liu Yan around, what do we have to worry about? Just follow us boldly!”

...

Many team members who were initially worried gradually began to believe him. Since Liu Yan was leading them, they wouldn’t lose their lives. At most, they would be injured.

And if he didn’t encounter some danger and get injured, how could he improve his strength after some hardships?

After going through the many rounds of selection in the lower levels of the Tower, awakened ones who could reach this stage were not ordinary people.

Soon, members of Team Origin regained their confidence and began to rest and prepare.

Seeing this, Liu Yan was relieved. At the same time, he checked the upgrade requirements and materials for the territory and wooden house.

[ Level 2 territory ]

Upgrade requirements: 200 level 1 wooden houses, 50 level 2 wooden houses, 20 6-star team members, 8-star lord, 1 or more battle pets (maximum three)

Upgrade materials: 100 cubic meters of origin wood (C-grade and above), 100 origin stones (C-grade and above), 100 wind crystal stones (C-grade and above), 100 cubic meters of fine iron (C-grade and above) ]

[ Level 2 wooden house ]

Effect: Increase user’s combat experience by 300 per hour. Increase the user’s random attribute points by 30 per hour. Recover 300 hp and 300 energy per hour.

Upgrade requirement: territory at level 1

Required materials: 10 cubic meters of origin wood (C-grade and above), 10 origin stones (C-grade and above), 1 wind crystal stone (any grade)

After the wooden house was upgraded to level 2, not only did it require more origin stones and origin wood, but it also had a level requirement and an additional necessary material, wind crystal stone!

According to Liu Yan's inquiry, the wind crystal stone was a crystal stone formed by wind elemental energy.

However, this material was currently not available within the territory barrier. It could only be found outside the territory barrier.
