

# GOD! I TURNED INTO A TURTLE

## Chapter 6 – Make A Fortune

“Brother, don’t worry, if I succeed in occupying the Xue family, I will definitely lead someone to flay that \*\*\*\* mouse alive!”

Master Diao stood up and picked up the medicine sachet that was put aside.

It was getting dark and he had to go back.

Ye Que’s eyes lit up, and he thought to himself: “This guy breaks through to the second level after a day without seeing him, and he probably got something good.”

He set his sights on the pill.

“Brother, you are dead, and it is useless to keep your belongings, so I have already taken them away, and I am going to use them to complete our poisoning plan!”

Master Diao sighed softly, turned and left.

Ye Que sneered.

After talking for a long time, I didn’t want to make a fortune.

It’s just that I feel sorry in my heart, so I came here to burn paper to mourn.

“This human-skinned \*\*\*\* still wants to take over other people’s houses, I’ll cheat you to death!”

Ye Que rushed towards Master Diao with all his strength.

brush-

Easily jump into the medicine basket.

“The host left the monster forest, do you want to scan the new map?”

“scanning!”

“Ding! A new map scan begins!”

“Ding! Scanned information loaded 10%...20%...30%...”

“Ding! Information loaded 100%!”

There was some new information in Ye Que’s mind.

Outside of the Monster Beast Forest, there is Qingfeng Town, which is a place where humans live.

There are two big families inside, namely the Long family and the Xue family.

“Just wanting to occupy a big family in a mere second-level realm, wishful thinking!”

Ye Que snorted softly and rummaged through the medicine basket.

Most of them are common medicinal materials.

Scroll down again.

“It’s Ganoderma lucidum! Hehe, good stuff!”

Ye Que bites.

“Ding! The host has taken a Ganoderma lucidum for two hundred years!  
Gained 0.5 experience points.”

It turned out to be two hundred years, but only such a low experience point is definitely related to reaching the third level of the realm.

“But it’s much safer and easier than killing monsters!”

He decided to follow Diao first.

If he can get treasures of a higher age, he will make a lot of money.

Stay in the medicine box with peace of mind and continue to search.

It’s a pity that there are no good things except Ganoderma lucidum.

“Use up your skill points first.”

Killed a double monster before, and gained 0.5 experience points.

Plus the 0.5 experience points gained from taking Ganoderma lucidum for two hundred years.

He now has 1 experience point useless.

View panel.

Speed: 3/10

Defense: 3.2/10

Attack: 3/10

Experience points: 1

“Defense plus 0.8, speed plus 0.2.”

Thicken the defense first, so that you can save your life at critical moments.

Panel data refresh.

Speed: 3.2/10

Defense: 4/10

Attack: 3/10

Experience points: 0

Today, he has four levels of defense.

“Map scanning prompt: 500 meters ahead, two 1st level wild monsters appear!”

“Map scanning prompt: 500 meters ahead, a double monster appears!”

“Map scanning prompt...”

This is entering Qingfeng Town.

Ye Que can turn off the map scanning function, but in an unfamiliar and dangerous place, it is better to turn it on.

After a while.

All around became quiet.

“Map scanning prompt: 500 meters ahead, a five-level wild monster appears!”

Ye Que felt wary in his heart.

“Bring something?”

A muffled voice sounded.

“Five taels of gold, plus a 200-year-old Ganoderma lucidum, all brought here. Where’s the melting water poison I want?”

Master Diao’s voice was deliberately lowered.

“Here! Deliver!”

When Ye Que heard this, he immediately got into a medicine bag.

Master Diao put down the medicine sachet, rummaged through it, his expression changed drastically.

“If you dare to trick me, the transaction will be cancelled. If you dare to find me again in the future, you will be killed.”

The owner of that deep voice kicked Master Diao flying.

Grandpa Diao picked up the medicine bag in fear and ran away in a panic.

“What does this kind of guy think about all day long? He doesn’t have the skills, so he just wants to occupy Xue’s house!”

Ye Que really couldn’t understand how this kind of guy survived until now.

Master Diao was relieved when he ran to a crowded place.

“What the hell, where is my Ganoderma lucidum! Why is it gone!”

He rummaged through the medicine basket again.

“Won’t it be eaten by the \*\*\*\* mouse again?”

He thought of his century-old ginseng, and his face turned ashen.

“Li Heicock, I asked you to collect medicinal materials, what are you doing on the street?”

A cold voice sounded.

“Steward, I just came back from collecting the medicinal materials.”

“Then quickly put the medicinal materials back into the warehouse!”

“Yes Yes Yes!”

Li Heiciao went straight to Xue’s house.

Ye Que smiled: “Li Heicock, this name is really unrestrained.”

But after laughing, he grasped a very important message.

storehouse!

“There’s probably something good in there!”

Ye Que felt that Li Heicock was his lucky star.

Li Heicock ran back to Xue’s house, and after entering the warehouse, he was pulled into a corner by himself.

“What about the meltwater poison?”

The man asked in a low voice.

“Master Xue, the ganoderma lucidum is gone, the transaction is cancelled.”

Li Heicock said guiltily in a low voice.

“Hmph! I’ll give you a chance to occupy the Xue family, but you don’t grasp it yourself!”

The man's voice turned cold.

"I will still find a way."

"Let's just let this matter go! Keep your mouth shut, and if you dare to speak out, I'll kill you!"

"I will never talk nonsense!"

Li Heacock said in panic.

"Let me just say, how can an idiot like Li Heacock have the guts and ability to occupy Xue's house!"

Ye Que was stunned.

But after thinking about it, this Xue family is quite unlucky.

Being targeted by the people inside him.

"roll!"

The man shouted sharply.

Li Heidiao left in a panic, carrying the medicine sachet on his back.

While no one was paying attention, Ye Que jumped out of the medicine shovel and got into the stacks of the warehouse.

"Treasure, here I come!"

He drilled deeper.

"Ding! The host is taking a century-old ginseng!"

There are no experience points.

"When the realm reaches the third level, it is useless to take a century-old treasure."

When he was in the first stage, he could gain 1 experience point by taking century-old ginseng.

Based on the previous experience, if you break through to the second level, you should be able to gain 0.5 experience points by taking 100-year-old ginseng.

When you reach the third level, you can't get experience points by taking century-old ginseng.

"It's okay, there are many treasures here."

“Ding! The host has taken a cold marrow branch for two hundred years!  
Gained 0.5 experience points.”

“Ding! The host took a three-hundred-year serum fruit strain! Gained  
experience point 1.”

“Ding! The host takes...”

While eating happily, an accident happened.

“Map scanning prompt: 500 meters ahead, ten 6th-level wild monsters appear!  
Eight 7th-level wild monsters!”

“Map scanning prompt: 500 meters ahead, four eight-level wild monsters  
appear! Two nine-level wild monsters!”

“Map scanning prompt: 500 meters from the map, a ten-level wild monster  
appears!”

“System prompt: A large number of irresistible wild monsters are approaching  
quickly, please pay attention to avoid them!”

“Fuck! Everyone is approaching!”

Ye Que was so frightened that he almost lost his wits, he didn't want anything,  
and ran out quickly.

At this point, it was already night.

He had a big palm and ran fast, but no one noticed him.

“Experience points! Quickly use experience points to break through!”

If you don't care about breaking through, it will lead to a decrease in  
experience points.

This is a matter of life and death!

Only by improving your strength can you have more protection for your  
survival!
