

God of Life 1081

Chapter 1081: Cole

Fang Yue's words made Cole stunned.

Killed a caller at the start?

This newcomer is really interesting!

"I didn't drag the oil bottle this time, maybe it is the will of the taboo!"

Cole's murderous aura suddenly dissipated, he smiled at Fang Yue, then hooked his shoulders.

"That was a temptation for you just now, brother, don't mind! I, Cole, is a well-known benevolent among the elect, how can I do that to my own people?"

Cole turned his face like a book, regardless of whether Fang Yue believed it or not.

In fact, Fang Yue can believe it if he doesn't believe it. If two people get together, it will benefit both. Now it is of no value.

"is there any news?"

Fang Yue glanced at Cole.

"Yes, there are 3,780 people selected this time. Those who came early and late, the earliest arrived two months ago, and the late ones, there are still a thousand people who have not come out. It is said, A big boss is about to come, thirty-two veterans who have been in and out of the forbidden land, come ten days later, killing people like hemp, difficult to deal with."

Cole's news is for example Yue Lingtong.

Although Fang Yue and Chu Yaoyao bought a lot of news, they were all good news.

Lingshi can't buy experience, not to mention, these experiences are all obtained by licking blood on the tips of their knives.

"Different forces?"

Fang Yue asked.

"Yes, 80% of the people are in the Federation, and 20% belong to evil creatures. Forbidden places pay attention to balance, probably because evil creatures are too strong, so I want to balance them with the caller!"

Cole shook his head and analyzed himself.

To walk in a forbidden place, force is more important, and mind is more important.

"Well! Different forces have different missions. You are more senior than me, have a higher evaluation, and have a strong force. The mission should be much more difficult than mine."

Fang Yue glanced at Cole suddenly and said teasingly.

Cole's face was a little abnormal, it turned pale, and immediately returned to its original state.

He didn't respond, he was acquiescing to Fang Yue's guess.

This kid is too ghost.

It's not like a rookie at all.

"A large number of people is not necessarily a good thing. The killing scene, everyone is hunter, everyone is prey, the hearts of the people are uneven, and the mouse is in the way. Therefore, the power of the caller is not easy to borrow. Finding help depends on the federation. military."

Fang Yue had his own calculations, he had seen the force of the Federal Army.

Among other things, that particle cannon can bombard the rotation realm, and when it gets it, the veteran will turn pale.

"The military's official position is not easy to be promoted. In addition to military merit, there are people on the top. Identity is also a problem. We must be innocent. We show different methods from this world. If there is no explanation, it is difficult to convince the public."

Cole has Cole's concerns. It's not that he didn't think about taking advantage of the military's path.

But no one is stupid.

This is especially true in the military. Those veteran scoundrels are very ghosts.

They suppressed the people below and suppressed them so badly, they can't wait to find an excuse to take away their military merits.

Fang Yue did not speak, and meditated cross-legged.

"Wait, let's talk about it when there is a chance, now planning is a waste of saliva."

Fang Yue closed his eyes and stopped speaking.

Cole didn't ask much, he was planning his own business.

For a long while.

Shout to kill the sky.

Outside the camp, in the sky, a silver dragon eagle flew by.

The dragon eagle is shaped like a dragon, but has a pair of eagle wings on its back. It is ten feet long and has a fierce aura.

It passed by, breathing fire in its mouth.

The fire ignited a prairie fire, and in a blink of an eye was a military camp covering dozens of acres.

In the barracks, a layer of milky white light film propped up, blocking all the flames out.

This light film is a pure energy layer, beeping, consuming energy, and constantly annihilating each other with the flame.

In the barracks, a series of guns were erected one after another.

"Plasma Cannon"

The cold voice echoed between the heaven and the earth.

Several light beams interlaced, and the point of intersection is exactly where the dragon eagle is.

The dragon eagle screamed, and the sound wave dissipated, actually blocking the attack of the plasma cannon.

"The dragon shadow at the pinnacle level of the rotation realm has a high bloodline level and has a lot of combat power beyond the realm."

Fang Yue walked out of the camp, watching the battle.

Dragon Eagle is a creature of evil thoughts, with superb strength, even if it is on the heavenly road, it is also a good player.

Although the means of scientific and technological civilization are sharp, there is not much to do with Dragon Eagle.

"Use laser light."

I didn't know who it was, and suddenly ordered.

In the barracks, a beam of laser light broke through the air.

The air was evaporated, and the laser light cut half of the dragon eagle's body like a dagger.

However, the lights in the barracks are flickering and dimming, and the energy consumption of the laser light is too large, and the energy system of the barracks cannot be stable.

Long Ying groaned, dragging his injured half of his body away.

The laser light also dissipated at the same time.

Being able to force the Dragon Eagle to retreat was a great achievement, and they did not expect to win the Dragon Eagle this time.

There were only three hundred troops stationed in this barracks. It was about a platoon of troops, with limited ordnance available. In frontal combat, it would be a good idea to be able to die a mid-cycle evil creature.

"This is a conspiracy!"

Cole appeared beside Fang Yue.

He looked into the distance and saw evil creatures like tides kill.

The levels of these evil-minded creatures are different, the weakest is only the level of the fourth and fifth levels of the Houtian realm, and the strongest even have evil-thought creatures of the rotation realm.

"Enemy attack!"

Screaming is the oldest method of reporting, but this method is particularly good in a palm-sized barracks.

The evil creatures are surging like a tide, at least seven or eight thousand in number.

At the same time, a task reminder popped up on Fang Yue's watch.

"Temporary incident: evil thoughts strike."

"Task description: Save your life in the raid of evil creatures."

Fang Yue raised his eyebrows, even if he had no task, he had to protect himself desperately.

Does this task make any sense?

"Open the energy shield!"

"Use a plasma cannon!"

"Report, the base has insufficient energy, and the energy shield can only last for ten minutes."

"The report shows that the base energy is insufficient and the plasma cannon can be used eight times. The use of the plasma cannon will greatly reduce the duration of the base shield."

In the command post, the red lights flashed, and the commanders were devastated.

The appearance of the dragon eagle is not to destroy the base at all. Its mission is to consume the energy stored in the base.

There must be an extremely wise commander among the evil creatures, and the strategies it uses are not very clever, but they are extremely effective.

This is a conspiracy. If the base did not open the protective cover when the dragon eagle was crossing the border just now, then the dragon eagle would change from a passer-by to a murderous executioner.

"Not enough energy..."

Platoon Leader Chris pondered for a moment.

"Open the arsenal, let the brothers choose their favorite weapons, life and death, wealth is in the sky, star crystal, leaving only the energy that can support the plasma cannon to fire three times. If you can escape, try to escape!"

Chris has a big beard, a long and narrow scar runs through his cheek, and his eyes are filled with the breath of a tough butcher.

Before the end, even the soldiers of the Federation were so powerless.

"Is this the federal arsenal?"

The moment he stepped into the arsenal, Fang Yue felt an eye-opener.

The federal energy is the same as the standard star crystal and the deep blue planet. This should not be a coincidence, but the inevitable development of civilization to a certain extent.

Fang Yue started with 3,000 white star crystals, 50 red star crystals, and five orange star crystals.

The distribution of star crystals is based on military rank and soldier level.

The number of star crystals in Kerr's hand was 30% more than Fang Yue.

As for the ordnance, he picked it up and took it easily.

The Federation has not yet invented storage equipment, and powerful weapons may not be convenient for escape.

Of course, Fang Yue is unscrupulously searching for the good things. For example, the X bomb, once detonated, can flatten a radius of 50 meters, and even the creatures at the peak level of the heaven and earth are not immune.

Cole is not very interested in high-tech weapons. He is a half-practitioner of civilized origin and believes in his own fists.

The high-tech weapons on his body are just a cover.

Really fighting, he didn't have time to aim at the gun and pull the trigger.

Therefore, in the end, the things in the arsenal were cheaper than Fang Yue. They were all kinds of things, and they were all powerful since they were young.

When he was a child, Fang Yue liked to watch science fiction blockbusters.

Always dreaming about being able to possess those technological weapons that transcend the times like the X-Men.

Now, there is finally a chance to get his wish.

Fang Yue's heart was naturally overjoyed.

The time to choose weapons is quite limited, because the proximity of evil creatures does not leave them too much time to protect themselves.

"coming!"

Listening to the roaring sound, the dust is flying thousands of miles.

Fang Yue took a deep breath, his eyes fixed on the endless community of evil creatures.

Roar shaking the sky.

The soldiers in the barracks consciously went out to fight.

This barracks is not an umbrella, the plasma cannons in it are reserved for the leaders of the evil creatures.

There was a "bang".

Many soldiers have not yet waited out of the barracks.

A metal bullet has surpassed their footsteps, hitting the iron-clad cow that was charging in the forefront and headshot!

The red blood, like a light rain, dripped and poured the ground.

Iron-clad cow, with strength comparable to its innate peak in adulthood, thick skin and amazing defense!

However, Fang Yue used a sniper rifle with armor-piercing bullets.

Even the iron skin of the tank can penetrate, and the hard skin of the armored cow is still weaker than the heavy armor of the tank.

A good start!

The morale of many soldiers was shocked.

This proves that evil creatures are not invincible.

Fang Yue hid behind the war fortifications besieged by sandbags, squinted and touched the barrel of the gun.

The barrel of the sniper rifle was hot, and about three more shots were possible.

The power of the sniper rifle is indeed great, but it is fatal if it cannot fire continuously.

Used for assassination, this is a supreme artifact, but in this kind of melee, its role is not so obvious.

"Good job!"

Chris noticed the scene here.

Fang Yue's reputation is not obvious, and his military merits are mediocre, but his performance this time is outstanding. The first kill can give him a double share of military merit.

Of course, if everyone can go back alive this time.

"Meow!"

A black cat the size of a tiger stood out from the herd of evil creatures, and its vertical pupils revealed a suffocating indifference.

Nether cat demon, with nether aura on his body, adult, at the level of heaven and earth, good at hunting and sneaking.

The early tongs rot first.

Fang Yue's first shot was indeed a powerful shot, but it also attracted the attention of evil creatures.

Evil-minded creatures are not without wisdom, on the contrary, they have more calculations and plans than anyone else!

The claws of the nether cat demon moved in the air, and the gloomy and cold nether aura enveloped Fang Yue.

Chapter 1082: Kill monsters

"It's a pity, Fang Yue!"

Chris obviously also noticed the scene here. With his skills, he could naturally kill this ghost cat demon easily.

However, he chose to watch the changes, everyone has their own responsibilities.

His duty is to command the overall situation. If a little Nether cat demon is worth his fight, then this battle will be gone.

Fang Yue clearly understood this truth. From the moment he joined the battlefield, he had no intention of letting anyone else help him share the risk.

The nether cat demon is close.

Fang Yue's lips moved slightly.

"Petrochemical!"

When witchcraft falls, this is the most common layer of petrification. The body surface of the Nether Cat Demon is covered with a thin layer of stone skin.

In an instant, Shipi was broken free by the ghost cat demon.

The petrification technique was cracked by the ghost cat demon.

However, Fang Yue's face was not disappointed.

That's it, enough!

At the moment when the ghost cat demon broke free from petrification, a pitch-black dagger had already penetrated into the softest belly of the cat demon.

The master game is just another thought.

What's more, Fang Yue's realm level was originally higher than the Nether Cat Demon.

This dagger is Krockin's dagger, extremely strong, and everything is urged.

The ghost cat demon was hit to the point, and the figure paused for a while.

Fang Yue changed a gun to the powerful Netherworld Cat Demon to fight.

Long-barreled guns, this is the most common weapon against evil creatures.

Its effective range is not very long, but it is extremely powerful.

Especially for evil creatures like the Nether Cat Demon with fast speed and weak defense.

With a bang.

A flame burned in midair.

Beep Beep Beep Beep.

The ghost cat demon was burned to ashes, and he couldn't die anymore.

"Won?"

Chris's face was filled with astonishment.

Fang Yue's series of combined punches is almost dazzling.

Calm and spicy, this is what Chris Fang Yue said.

There are technological weapons, it is not a myth to defeat the strong with the weak, but there are not many military fighters who can do Fang Yue's point.

The ghost cat fell.

Fang Yue also received a sound in his ear.

"Kill one of the elite monsters, and the mission completion degree will be improved."

"Kill the Nether Cat Demon and get 5 points!"

The voice was cold and indifferent, quite a smell of grass and mustard.

Fang Yue didn't care about this sound, but continued to plunge into the fierce battle.

This escape calculation is to complete a temporary task, and if the evil creature is killed off, what will be the gain?

Fang Yue is very curious.

And put it into action immediately.

"boom!"

With another shot, a lovebird of heaven and earth level was headshot by a sniper rifle.

Kill elite creatures and get 5 points.

The sniper rifle has a limited number of bullets, but Fang Yue strives to take away an elite evil creature with every shot.

The **** sky, solidified with stench.

But this stinking smell was even more sweet to the soldiers coming out of the barracks than flowers.

"Two evil creatures at the heaven and earth level."

Chris' gaze focused on Fang Yue again. If this exploit was placed on some long-established veterans, it would not be considered outstanding.

But for Fang Yue, a recruit who did not show the mountains and the water, it was absolutely rare.

Coupled with the iron-clad bull that was killed by him in the opening game, the combined military merits can at least make the military rank on Fang Yue's shoulder two steps higher.

From a corporal to a sergeant, it would take at least four years of suffering if it were put in a peaceful time.

But in the chaotic war years, it was just a few shots.

In a blink of an eye, the tide of beasts has arrived, and Fang Yue's remote gathering is losing its advantage.

But at the same time, those nightmare creatures discovered that they had lost Fang Yue's position.

The people behind the sandbag fortification just went to empty the building.

"Where is Fang Yueren?"

Looking for Fang Yue's back, not only Chris but also Cole, who was also the elector, was involved.

The longer Cole has been in contact with Fang Yue, the more he feels that Fang Yue is not like an ordinary electee.

At least not a newcomer.

It is indeed a good idea to use the weapons of this world to fight against evil creatures, gain military merit, and get promoted.

It's a pity that he is far less proficient and familiar with thermal weapons than Fang Yue, this road will not work for him!

Under a big tree hugged by several people.

Fang Yue broke a shadow cat demon's neck.

The body was swept away by the military merit recording instrument on Fang Yue's chest, which represented Fang Yue's successful killing.

Subsequently, the body of the Shadow Cat Demon was sacrificed alive by Fang Yue.

In other words, it is also a monster at the level of heaven and earth, the flesh and blood essence in it cannot be wasted casually, especially the soul of evil creatures is particularly strong.

After the sacrifice, Wu Ding did not respond, as if a clay cow entered the sea.

But Fang Yue was not discouraged. He believed that his efforts would eventually bear fruit.

Killing with high-tech weapons is not his best after all.

In terms of efficiency, it is far inferior to using witchcraft.

Therefore, he found a place where there were no people, used witchcraft to kill the bodies of evil creatures, and left them to the witch cauldron for sacrifice.

For Fang Yue, these evil creatures were all good sacrifices.

Soon, the number of elite monsters that Fang Yue killed exceeded the ten required for the mission.

"The caller completes the task: kill more than ten monsters above the elite level. After completing the task, get 100 points and get a random scroll."

"The random scroll has been sealed, whether to unlock the seal. If you unlock the seal, you will not be able to trade."

"turn on!"

"The scroll is opened, the sealing scroll of witchcraft, gains 1% witchcraft power forever bonus."

"Remarks, this is the gift of the rules and the favor of the goddess of luck."

"1% witchcraft power forever bonus? This scroll seems good."

Fang Yue chuckled and talked to himself naturally. This 1% power bonus is not visible when the realm is low, but when the realm is high, the foundation is huge, and the 1% power bonus is also a big one. Blessing. "

A gleam of light flashed in Fang Yue's eyes, no wonder the forbidden place could make people rise to the sky in one step.

In the outside world, there is no such thing!

Licking his lips, Fang Yue couldn't help becoming more and more interested.

"Meow!"

boom!

Fang Yue killed another ghost cat demon.

The indifferent voice sounded again.

"To kill elite monsters, you have triggered the primary task: kill 20 monsters above the elite level. (Note, the evaluation level of monsters above the elite level is increased, and the evil creatures with strength above the eighth level of the heaven and earth realm belong to the elite monster level. Heaven and earth realm Monsters between the first and seventh levels are killed by three times the number of ordinary monsters!) The mission reward is three times the basic mission."

The second task was issued.

The task description has already appeared and the rewards for tasks are quite attractive.

"Three times the basic mission? One thousand five hundred points reward, and three scrolls or 3% permanent magic power bonus?"

Fang Yue frowned.

The description of the task is a bit vague. But this does not hinder his determination to continue to complete the task.

"Interesting. After the basic tasks are completed, there will be more advanced tasks. Since it is a basic task, will there be intermediate, advanced and even ultimate tasks?"

The evil creatures at the eighth level of the heaven and earth realm were already a bit dangerous for Fang Yue.

However, the evil creatures on the eighth level of the heaven and earth realm need at least dozens of them to gather before they can trouble Fang Yue. Such a mess is not a big threat!

Fang Yue looked at the beast tide of evil creatures again, his smile gradually stiffened.

This evil thought creature has a distinct level, and the evil thought creatures at the eighth level of the heaven and earth realm are at least small bosses.

Around them, there will be a large number of naughty creatures at the acquired, congenital, and heaven and earth level.

If you want to take the enemy's first rank among the armies, this really becomes a technical job.

"Sniper rifle..."

Fang Yue took out the sniper rifle, which had a maximum of two bullets.

The barrel of this gun is already hot. If there are too many bullets and lack of cooling, the sniper rifle will probably burst!

"Fight!"

Fang Yue climbed to the tree like a clever ape.

In the branches, a muzzle of a black hole appeared.

Aim, shoot.

The bullet pops out!

At the moment when the child popped out of the chamber, the evil creature on the eighth level of the heaven and earth realm that Fang Yue aimed at immediately felt.

It turned its head suddenly, and a pair of lantern-sized eyes looked at Fang Yue.

"Sniping, for those evil creatures that reach a certain level, has a weak effect. For killing intent, they have a strong innate induction."

Chris noticed the scene here, shaking his head and preaching.

"Damn hindsight, you know why you didn't say it earlier!"

Fang Yue is already on the line now and has to send it.

With a bang, the bullet ejected.

The rotating armor-piercing projectile flew towards the head of the evil creature.

The evil creature showed blood-stained teeth, and Fang Yue grinned. He seemed to be laughing at Fang Yue's worm shaking the tree.

The evil creature turned its head, and it easily avoided Fang Yue's bullet.

However, another bullet came quietly and banged its heart.

The smile solidified, it looked down at the muzzle of the black hole on its chest, and its big blood-colored eyes were filled with incredible brilliance.

How could it be... it had obviously avoided it just now!

"Two bursts!"

Fang Yue grinned, two armor-piercing bullets killed a evil creature in the eighth layer of the heaven and earth realm.

This transaction is not at a loss.

"That's it."

Chris gave a dazed expression.

A whim, of course, can sense the murderous intent hidden in the dark.

But its induction is limited to the location where the murderous intention comes.

One bullet, two bullets, it cannot sense.

Therefore, the evil creature only noticed the first armor-piercing bullet and missed the second armor-piercing bullet.

"boom!"

The barrel, which was already overwhelmed, finally burst after two bursts.

The iron pieces flew, revolved, and filled the sky.

The load of two bursts exceeds that of a single round of armor-piercing ammunition.

Such skills are rarely mastered by snipers.

"Kill an elite monster, and the mission completion degree will be improved."

The prompt sound rang in Fang Yue's ears. Although this sound was really not very pleasant, it was extremely pleasant to Fang Yue.

Fang Yue nowadays, one person's military exploits are comparable to a five-person elite team. And he was unscathed, more powerful than those elite squads that had been exhausted in battle!

Cole looked at Fang Yue's situation, his eyes flickered, as if thinking about something.

In the end, he gritted his teeth, made up his mind, and walked to Fang Yue's side.

"I have a task that you can share. After sharing, you can divide the reward for the task in half."

Cole suppressed his voice, and no one could hear the conversation between the two in the battle with the sound of fighting.

Chapter 1083: Shared task

"What task?" Fang Yue looked at Cole with a smile. He was a senior man who was willing to allocate half of the reward to share the task and reward with himself. The difficulty of this task is naturally conceivable.

"Break the tide of evil creatures."

At the same time that Cole made his voice, Fang Yue also received the prompt sound of the task.

"Caller Cole sends you a task invitation: to defeat the evil creatures and beasts, the task is successful, get 1000 points reward, and get a chance to draw a random skill scroll X2. If the task fails, 100 points for the caller are deducted, and the number of points is insufficient , Obliterate."

"The caller can choose to accept or reject the task."

"Accept the task!"

Fang Yue was not interested in the so-called integral, but the random scroll made Fang Yue a little bit tickled.

That is a means to permanently strengthen strength, absolutely an opportunity that is unimaginable in the outside world.

Seeing Fang Yue accepting the task invitation, Cole only breathed a sigh of relief.

This quest is Cole's main task. If it cannot be completed, Cole will have difficulty returning smoothly.

"The beast tide was initiated by the leader of the evil creature. This time, the evil creature has three leaders. The strength of these three leaders is at least at the peak of the rotation stage. It is difficult to take them all by my strength alone. "

Cole briefly introduced Fang Yue how to defeat the beast tide.

Fang Yue glanced at Cole: "Do you think that we can assassinate the three leaders of the evil thought leader with our strength? According to my observation, the leader of the evil thought creature is surrounded by many little brothers, let alone the leader? "

"Then you mean..."

Cole asked Fang Yue's advice very seriously, and Fang Yue's performance was quite different from the new recruits he knew as the candidate.

"Push all the way, crush the past, and use the force of the barracks to exert the greatest effect."

Fang Yue's words were simple and straightforward, and a bloodthirsty killing intent flashed in his eyes.

His mission is different from Cole's mission.

Cole's mission is to defeat the tide of beasts.

And his task is to kill ordinary and elite monsters.

Different interests naturally have different choices.

"Push horizontally? Are we someone?"

Cole hesitantly glanced at the people who were fighting the evil mind monsters. They were already dead and wounded. Although a federation died in battle, at least one evil mind creature would be pulled before death.

However, the beast tide is fierce, and the number of evil monsters is at least five thousand.

With more than ten times the number advantage, even if it is used to pile up, all soldiers in the barracks can still be piled up alive.

"I'm talking about the Union military, not this kind of people!"

The corner of Fang Yue's mouth raised a cold smile.

Cole frowned: "What do you mean?"

"Although it is the end, the federal military is still powerful. If it attracts the federal military's attention, this beast wave will naturally not be a problem!"

Fang Yue calmly analyzed.

Cole shouted, "Wait, there is a fatal flaw in your statement. The Federal Army is not incapable of taking advantage of this animal tide. It's just that they don't think the rescue is worthwhile. The commander of the Federal Army puts the overall situation in mind. This person They won't care about the damage."

"They don't care about personnel damage, don't they even care about new technology?"

Fang Yue's smile is more profound.

Cole seemed to understand what Fang Yue meant.

Raising his hand, Fang Yue released ten little demons, and each little demon was around the fifth level of the world realm.

The little devil at this level is neither strong nor weak, and can neither make the military feel threatened, but can also help a lot in this battle.

The little devil's move was harsh and decisive. Although there are only ten heads, but they are proficient in war methods, ten heads work together and fight alone, even the evil creatures at the peak of the world are not afraid.

"Summoned object?!"

Cole didn't expect Fang Yue to have this kind of appearance.

Summoners don't need much to exchange points in the Forbidden Land, their strength is not weak, and they are murderous, but most of these things are one-time cannon fodder.

Fang Yue summoned ten little demons to fight, making Cole really not know the plan behind Fang Yue.

However, since Fang Yue took the shot, he was not idle either.

The tiger-head machete in his hand slashed towards the evil creature beside him.

Fang Yue was staring at a creature with evil thoughts on the ninth level of the heaven and earth realm. This creature with evil thoughts was the Tyrannosaurus rex in the earth biology textbook.

Its body is burly and tall, and its soles step on the ground, causing the ground to tremble slightly. From a pair of scarlet eyes, a red light can be emitted, sweeping across the earth, scorching patches of vegetation.

"on!"

Fang Yue didn't hesitate, carrying a long-barreled gun and culled in the direction of the Tyrannosaurus Rex.

In the eyes of Tyrannosaurus, there is no Fang Yue.

His breath is too weak, not even as good as some veterans on the battlefield.

Tyrannosaurus rex should not be close, there are hundreds of evil creatures beside him.

The first to be culled was the two big ants whose size was enlarged three to five hundred times. They were all creatures of the heaven and earth level, with teeth like saws and poisonous saliva.

"Go to hell!"

Close to his body, Fang Yue kicked and flew.

These evil thought creatures at the innate realm level are not worth his use of heat weapons.

The two big ants were kicked and smashed the trees next to them.

Their bodies are fragile, and when they step down, they will get more air and less air.

It is not that they are given a chance to turn over, but that this big ant is also a good sacrifice. It is a pity to kill them. If they are killed, the effect of the sacrifice will be much worse.

"This Fang Yue is so brave! The sniper rifle is abandoned, and he dares to fight the evil creatures in close hands!"

Among the other soldiers, someone saw Fang Yue rushing through the evil creatures.

In the army, if you disobey the officials, you are serving the heroes who dare to fight and kill.

Before, Fang Yue's spear skills made them feel astonished. Now, they are single-handedly rushing into the enemy's barracks, so brave that they can't accept it.

Chris raised his eyebrows. He didn't know what medicine was sold in Fang Yue's gourd.

Fang Yue's spear technique is amazing, he can defeat the strong with the weak, and kill the evil creature Thaksin at the eighth level of the heaven and earth realm.

But without the sniper rifle, he was just a tiger with his teeth pulled out, and he was not fierce.

It's a good thing to be strong, but if it's too strong, it may not be.

Before, Fang Yue's sniper rifle exploded, and his heart was relieved.

But right now, Fang Yue's actions made him a little uneasy.

If Fang Yue is really unsure, would he dare to get close to the evil creature?

Where did Fang Yue's certainty come from.

This question lingered in Chris' mind.

His eyes stayed true to Fang Yue, always waiting for the result.

The two big ants were abandoned, and the other evil creatures finally became vigilant.

More than ten evil thought creatures at the heaven and earth level gathered around and blocked all Fang Yue's escape directions.

Fang Yue squinted, didn't gather, raised his hand, and fired a shot at the first level of the heaven and earth realm that hadn't been recalled in the gap.

A bullet the size of a donkey dung ball pierced through the air, which is not simple and straightforward.

However, the bullet burst and was quite powerful, directly exploding the unsuspecting evil creature to death.

This moment, it even angered the evil creatures around, whether or not the evil creatures of the guardian of the Tyrannosaurus rex gathered!

Under their siege, these humble humans dared to hurt their companions and succeeded, which deeply stimulated the ray of pride in the minds of evil creatures.

Fang Yue's complexion remained unchanged.

Set up the gun, quietly waiting for the siege of many evil creatures.

"Are you almost here?"

The corner of Fang Yue's mouth suddenly turned up with a cold smile. He bent his legs slightly, kicked the ground suddenly, and jumped into the air.

This evil creature blocked all his way out, in all directions, but this air was unsupervised.

In the concept of evil creatures, ordinary human races will not vacate. All the land is sealed, and the human race cannot escape.

However, Fang Yue borrowed this loophole of thinking.

Fang Yue's upper body uniform faded, and a bazooka appeared behind him, with the bazooka's blasthole facing downwards, and at the same time, Fang Yue's hand had the same large weapon-the X bomb.

The X bomb fell.

At the same time, the rocket launcher was ignited, and a shell flew out of the rocket launcher at extreme speed, and Fang Yue directly rushed into the sky with its recoil.

He can't fly, but he knows how to use the wings of technology.

The rocket fell first, turned into a huge mushroom cloud and exploded, followed by the X bomb, smoothing out all the breathing creatures within 50 meters.

This X bomb is often criticized for its short range and small explosion range.

But its advantages have always been overshadowed by its disadvantages.

The X bomb can wipe out all the creatures within a radius of fifty meters, and they are all ants if they don't enter the cycle.

Moreover, its low cost and fast production are advantages.

Among other things, Fang Yue had fifty X bombs on hand.

A layer of white light spread out, and Fang Yue's position just now was vast and vast.

With the reaction force of the rocket launcher, Fang Yue flew to an altitude of nearly 100 meters, then opened a parachute and Shi Shiran landed.

This is a rare grand occasion.

An X bomb killed at least twenty evil creatures at the heaven and earth level.

In the history of war between the Federation and evil creatures, this is a rare record.

Fang Yue's contribution quota has risen precipitously.

But Fang Yue's gaze stayed on the Tyrannosaurus rex.

"You have become a polished commander!"

Fang Yue's smile was a bit pompous.

Let Natyranx go to the sky with anger, and die more than twenty subordinates of the heaven and earth realm. It will not really become the commander of the polished rod, but it is an indisputable fact that most of the essence of the horse and horse has been under his hands.

The Tyrannosaurus rex became angry, and the two red rays of light converged and fell towards Fang Yue's combat power.

Fang Yue rolled back one by one, avoiding these two rays of light.

This is anticipation.

It has nothing to do with responsiveness, but the brain is more important.

"Master Chris, please use plasma rays to kill this Tyrannosaurus."

Fang Yue shouted loudly.

Chris was unheard of.

This reaction did not go beyond Fang Yue's expectation. It was a great taboo for the master of high power, in which era and where the planet was.

The cry just now was just a temptation.

Success or failure is an answer to Fang Yue.

"I can't count on it!"

Fang Yue muttered to himself, his voice was not loud, but many people heard clearly.

Someone clenched his fist, it was worthless for Fang Yue. He had already killed so many Tyrannosaurus subordinates. If he used a plasma cannon at this time, he would surely kill the Tyrannosaurus in one blow.

Chapter 1084: Star Cannon

The Tyrannosaurus rex is dead, and the other soldiers under him are all chickens.

It will be much easier to deal with.

Fang Yue is a hero, but the hero always has no good end.

However, this time the results seem to be different.

"Rely on your own!"

Before Fang Yue's words were over, a cannon was fiddled with it. It seemed to have been hidden here for a long time, but Fang Yue took away the branches that were hidden.

"Star Cannon!"

This is something Fang Yue brought back from Deep Blue Planet, which incorporates some rune methods.

Runes, in the eyes of scientific and technological civilization, are magnetic circuits, and everything is the same, nothing more than that.

A beam of pale blue light gushes out, the size of the bowl. It directly penetrated the eyebrows of Tyrannosaurus rex.

Tyrannosaurus was caught off guard, who would have expected a small soldier to control such a terrifying killing weapon.

It fell to the ground in response, and could not die again.

Sure enough, the other subordinates of Tyrannosaurus rex did bird and beast scattered.

Fang Yue wiped the blasthole of the star cannon, lowered his eyebrows, without any emotion.

And Chris was standing beside him, stiff and a cold back.

Where did Fang Yue's big weapon come from, its power is only stronger than that of a plasma cannon.

The energy of the Star Cannon is concentrated, its power is greater, and its consumption is smaller.

If it is in a war, the effect is probably greater than that of a plasma cannon.

"Hahaha, Fang Yue, did you call me just now? The voice was too mixed during the fight, I didn't hear it clearly."

Chris joked to himself, as if talking to himself naturally.

Naturally, he didn't even believe in ghosts.

But Chris only helped himself, Fang Yue didn't need to believe it, just give him a step down.

Sure enough, Fang Yue greeted him with a smile, "Where is Lord Chris! You are the commander of the entire army, so you can't do everything you can do every day."

When these words were said, the embarrassment on the surface of the two people was solved.

But the resentment and anger in my heart is hard to say.

"There is also a good sniper rifle here. It can only rust when placed with me. I am good at command and I am not proficient in sniping.

Chris sent out a more refined sniper rifle. It was marked on the upper limit of the barrel's heat that Fang Yue could fire at least ten armor-piercing rounds.

For the sniper, this is definitely a rare treasure.

Unfortunately, Fang Yue is not.

"Thank you, sir!"

Fang Yue took the sniper rifle, but couldn't hear the slightest gratitude in his tone.

This sniper rifle can be regarded as the grudge that Chris had just failed to save.

Seeing Fang Yue took the things, even if he didn't have the slightest gratitude, Chris was slightly relieved, and Liangzi just removed it.

"Do you really intend to survive this wave of evil creatures?"

Chris asked Fang Yue that there was no relationship between superiors and superiors, but he seemed to be a good friend of many years.

This change of face is a basic skill of the superior, and it is also a manifestation of apathy.

If you are interested, you can greet you with a smile and call you Dad or Grandpa.

But the value is gone, it makes you not even a grandson.

"I don't know why this animal tide started?"

Fang Yue's quick words, directly hit the core of the problem, just as it is said that there is no windless three-foot wolf, these evil creatures are not eating out to eat, and hit the military barracks.

No one else knows the reason for this, but Chris, who is the highest officer in the barracks, definitely understands the tricks.

"This evil-minded creature is naturally bloodthirsty, why did they do it, how do I know?"

Chris glanced at Fang Yue and gave you three points of respect. Do you really consider yourself an uncle?

Some things should be asked, some should not be asked.

This involves the beast tide, is Fang Yue, a small soldier who can care about it?

Fang Yue asked, and didn't bother to ask again. If Chris didn't say it, he couldn't help it even if he forced it.

"Master Chris, you might as well report it. Fang Yue found some high-tech weapons left by aliens, come to rescue?"

Fang Yue understood what he said. At this time, there is no need to hide it.

The barracks are gone, you can ignore it, but I have new technologies and new technologies here. Can you play stupid?

Interests are moving.

Fang Yue is waiting for Chris' choice.

Chris really showed a thoughtful look, but didn't give Fang Yue a direct answer.

"Let me ask about this."

After that, Chris cast his gaze on the battlefield further away.

boom! boom! boom!

Suddenly, it exploded, and the white light covered all directions.

The X bomb, I don't know when it was buried in the herd of evil creatures, and suddenly exploded, killing several boss-level evil creatures on the eighth and ninth levels of the world.

Fang Yue's cue jingled, and the voice continued.

Counting Fang Yue's killing of Tyrannosaurus and the boss who killed him before.

An elite evil creature, he has already killed twelve.

"How is this going?"

Chris looked surprised.

This happened without warning.

Could it be that they still have experts to help?

Chris was hesitating.

Fang Yue blew a whistle, and ten little demons descended from the sky.

The little demons stood in a row in front of Fang Yue.

"What is this?"

Chris was a little frightened. There was still blood on the corners of these little demons. He didn't know whether it was the flesh of human beings or the flesh of evil creatures.

Chris is not afraid of living people, but he is afraid of the unknown.

When will Fang Yue be able to control these demon-like things?

Chris found that he had no idea about Fang Yue. He is like a mystery, which makes people unable to figure it out from head to toe.

What does he want to do?

How many hole cards are in the hand?

Chris actually didn't know anything about him.

Gradually Chris suppressed Yue's killing thoughts.

For twelve years in the army, Chris has never fought an uncertain battle.

Seeing Chris' desire to kill faded.

Fang Yue also felt relieved. He dispatched the little demon to deter Chris.

Caibo is touching.

If Chris wants to be greedy for his own new technology, he has the idea of killing people and making money.

At that time, he killed Chris, and he could not escape the fate of being hunted down by the military.

The previous campaigns and plans were then in vain.

Now, Chris was shocked. As long as the two sides got rid of their hostile identities, cooperation was possible.

Taking advantage of the military, every soldier is a **** in his hand.

Folding one piece may affect the overall operation.

"Master Chris, can you think about my proposal just now?"

Fang Yue narrowed his eyes and looked at Chris, waiting for Chris' response quietly.

"I can report this technological matter, but you always need to explain to me the explosion of the X bomb just now!"

"It's simple. These little demons are similar to evil creatures in appearance and breath. And evil creatures themselves are ever-changing. They don't know anyone at all. The little demons can mix into the community of evil creatures without disguising. . Then bury the X bomb or something, which is a smooth chapter."

"However, this method will be abolished once used. Those evil creatures who are alert will certainly not let the little devil succeed a second time."

"Oh, by the way, I forgot to tell you, this little devil is not a creature of evil thoughts, but a product of the biological civilization left by the alien civilization. They recognize me as the master and are absolutely loyal to me. The little devil's strength is not They are very strong, and each head is equal to the fifth or sixth level of the heaven and earth realm, but they are good at combining attacks and besieging, even the evil creatures that are new to the rotation realm are not afraid."

Chris suddenly understood that Fang Yue had something to say.

The general strength of his soldiers is also the level of innate realm. The squad leader's words are all at the level of the heaven and earth realm, and Chris's own combat effectiveness is also at the peak of the heaven and earth realm.

If Fang Yue chooses to attack in a group, he and the little devil join forces, and Chris may not be able to survive.

The advantage of human beings against evil creatures lies in weapons, and Fang Yue's control over weapons is not weaker than him.

"Okay, I agree to your terms, report your situation to the above, and try to get support from the above, but even the people above will take time to support. I don't know if you can survive that time."

Chris took a deep look at Fang Yue.

The demise of this camp was already a certainty, a little resistance, but one or two insignificant waves in the sea would calm down in the shortest time, but no one thought that Fang Yue could give him such a big surprise.

"ASAP!"

Fang Yue said something, turning his head and walking into the community of evil creatures.

The little demon dispersed, like a drop of water into the sea, disappearing in a blink of an eye.

The little demons are Fang Yue's summoned creatures, and the heads of the evil creatures they killed will be counted on Fang Yue's body.

There are also eight elite-level evil creatures. The tide of beasts is surging and quite terrifying, but for Fang Yue, it is also the best opportunity to complete the task.

Even the eight elite-level evil creatures can't kill, but he can at least accomplish the goal of killing a thousand ordinary monsters.

A glance at the corner of his eyes.

Cole was already in the midst of the evil-minded monster, his aura converged, like a harmless little animal. While passing by the evil-minded creature, the other party allowed Cole to leave without even turning his head.

Breathing technique.

Fang Yue has seen a lot, and even he himself has mastered at least three different methods of restraining interest.

But there are really not many that can achieve Kohl's level, at least Fang Yue can't do it himself.

Turn a blind eye?

No wonder Cole wants to assassinate the leader of the evil creature.

However, Cole hadn't gone far, and when he passed the leader of the evil mind monster on the ninth level of the Heaven and Earth Realm, Cole's figure suddenly stiffened.

He turned his head slowly, his eyes met.

A pair of scarlet eyes the size of a lantern looked at Cole.

"Evil-minded creatures are extremely sensitive to the fluctuations of people's various thoughts, and simply astringent aura is not enough. If you really want to do a latent assassination, at least let your thoughts disappear."

Chris fiddled with his fingers and said to himself.

He is an abominable commentator, every time he puts it out.

Chapter 1085: Sniper

Aim, kill!

Fang Yue's sniper rifle was ready.

The distance of nearly two kilometers was just a moment for Fang Yue's armor-piercing projectile.

The harsh rubbing sound wafted in the air.

A lovebird flew across the sky.

With a bang, the lovebird was bombarded with shards by the armor-piercing projectile.

A thick cloud of blood, commemorating its appearance.

"Be blocked!"

Fang Yue's expression was gloomy.

This evil creature's loyalty to the boss has exceeded his life.

The evil creature turned his head slightly, his attention was drawn away by Fang Yue.

Cole escaped silently, mixed into the vast wave of evil creatures, and disappeared in a blink of an eye.

"Bah, this is so embarrassing!"

Cole's face was full of dissatisfaction, no matter how this kind of thing let him catch up.

He took the route of Wuxiu, slashing, turning land into rivers, accusing the sun and the moon, just like a devil. But in order to protect the identity, it can't be easily displayed in this world.

Otherwise, his identity will be exposed and the identity advantage given to him by the taboo will be lost.

The martial arts in this world have simple means of fighting, and the value of the force is quite limited. They mainly rely on the system of science and technology to fight evil creatures.

Fang Yue walked to Cole's side and said comfortingly.

The identity of the federal military is their protective umbrella. It is not a last resort and cannot be easily torn apart.

This time, there are not one or two callers. There is a mixture of fish and dragons. Maybe two big bosses have to use their identity advantages to restrain each other.

The accumulation of momentum is especially important in forbidden places. The stronger the world background, the more so.

With a "bang", Fang Yue's armor piercing popped out, and the rotating bullet pierced the boss's eyebrows.

Not every fatal injury will be blocked by the younger brother.

"I'm avenging you!"

Fang Yue blew away the endless fireworks on the muzzle.

Under Fang Yue's sniper, a lot of evil creatures from the eighth or ninth level of the heaven and earth realm continued to fall.

Some who wanted to avoid them with the help of dexterous figures were imprisoned by Fang Yue using petrification techniques.

There are many techniques that petrification should have, not only condensing a layer of stone skin on the body surface, but also petrifying flesh and blood and imprisoning the flesh.

Fang Yue's sharpshooter, who has a hundred shots, actually has a lot of water.

Hitting moving targets and fixed targets is not a difficulty factor at all.

However, Fang Yue's door was clear about this matter, but other people couldn't see so many doorways.

In a blink of an eye, the ten bullets of the sniper rifle presented by Chris ran out. Before the gun exploded, Fang Yue carried the sniper rifle on his back.

This is a good thing and can be used again after cooling.

It would be a pity if one more bullet was fired in order to become a disposable consumable!

Ten armor-piercing bullets, seven-headed elite monster.

For Fang Yue, this is a good record.

During this period, the ten little demons were also very competitive. They quietly besieged and killed two evil creatures on the ninth level of the heaven and earth realm, allowing Fang Yue's task to be successfully completed and filling the last trace of progress.

After the mission is completed, 3% of the permanent magic power is permanently increased to the hand.

Fang Yue's points on hand also reached the number of 2,330 points.

Killing evil creatures can not only complete tasks, but also earn points.

The number of points corresponding to evil creatures of different strength levels is also different.

However, according to Cole's introduction, the points can only be used until they leave the forbidden place.

The exchanged items are very restrictive. Except for some consumables that are of good value, other items are relatively ordinary.

Of course, this point has another function, that is, it can repair any damage to the body. The more serious the damage, the more points are consumed.

The real opportunities are in the Forbidden Land itself, and points are just a supplementary existence.

"Killing elite monsters, you have triggered the intermediate task: kill the evil creatures above the fifth level of the Three-Headed Rotary Realm. After the task is completed, you will get 9% witchcraft power for permanent fixation. This task is a limited time task, please complete it within 5 minutes. This task. The task cannot be completed within the time limit and the task will be automatically closed."

The indifferent voice sounded again.

Fang Yue spit out a thick sputum.

"The difficulty span of this intermediate task and elementary task is so large? Five minutes, three-headed revolving creature with evil thoughts, this task is not designed to be completed!"

According to normal circumstances, in five minutes, let alone killing three-headed creatures of rotation level, even finding a creature of rotation level in the vast herd is extremely laborious.

The reward for this task is indeed extremely rich.

But the difficulty of completion also skyrocketed.

Fang Yue took a deep breath and jumped to Chris' side in two steps.

At this moment, Fang Yue had already made a decision. In order to complete the task, it didn't matter even if he sacrificed some inherent advantages in his hands.

The normal way, it has been unable to complete the task.

Therefore, Fang Yue decided to take the risk and let it go.

"Fang Yue, what are you going to do?"

The moment Fang Yue jumped to his side, Chris suddenly felt alert.

"Fang Yue, what do you want to do? Are you trying to usurp the throne?"

Chris felt a vague murder in Fang Yue's body, and at the same time ten little demons each occupied one side and looked at him.

"Chris, you must have a satellite positioning device in your hand, right? Show me the location of the center of this evil creature's animal tide."

Fang Yue's voice was firm, and there was no room for negotiation.

Chris was taken aback by Fang Yue: "This is a military secret and cannot be given to you."

"Say it again?"

Fang Yue's knife had been placed on Chris' neck, and the cold blade made Chris' hairs blow up.

"Fang Yue, you are crazy, threatening your boss, do you know what kind of sin it is?"

Chris roared loudly at Fang Yue, as if he had heard the sound of Death's footsteps hovering around him.

At this moment, Chris understood that Fang Yue was not joking with him. Although I don't know what Fang Yue really wants to do, if he doesn't follow it, cold death must be waiting for him.

"Threatening you is death, but being killed by a nightmare creature is also death. If you die, if my plan can succeed, I may have a silver lining to kill these devastating creatures."

There was a deep color in Fang Yue's eyes.

Fang Yue had already said this, proving the determination in his heart. There was a touch of determination on his face.

Fang Yue's attitude made Chris' heart chuckle.

This is a desperate posture!

"Fang Yue, if you have something to say, it hasn't reached the point where life and death meet."

Chris felt the bitter murderous intent, somehow, his heart softened and he gave in half a step.

"I wanted to discuss it, but you didn't give me a chance!"

With a roll of the blade in Fang Yue's hand, Chris' head flew up, blood gushing like spring water, and when he was dying, Chris' eyes were filled with unbelievable gazes.

"Fang Yue, you killed Chris? Are you planning to fall out with the military?"

Cole couldn't understand Fang Yue's routine at all, saying that he was the one who would use the military's power, and now he is also the one who kills decisively.

"When the value is exhausted, there is no need to stay in this world."

Fang Yue lowered his head and wiped the blood-stained blade in his hand, his cheek was buried in the shadow, no one could see his expression clearly.

Afterwards, Fang Yue searched his body and fished all the star crystals and pistols on Chris into his pockets.

Chris is a lieutenant platoon leader, and his wealth of weapons is not comparable to that of ordinary fighters.

The warriors in the distance were too busy to take care of themselves and could not help Chris's death.

In fact, Chris was unpopular in the military, especially this time, he was not saved, it was even more chilling.

At this time, no one will stand up for him.

Compared to the fearful Chris, Fang Yue who bravely killed the enemy is more like a hero in their imagination.

"that's it!"

Fang Yue found a black key from Chris' waist.

This key corresponds to the control room of the plasma cannon in the barracks.

Fang Yue's goal was actually the control of the plasma cannon.

He unscrewed the door of the control room and entered it. The key is inserted into the switch hole, and the entire control room starts.

A waiting particle cannon appeared in front of Fang Yue.

Star crystals are stuffed into the energy storage platform of the plasma cannon.

With the buzzing sound, the plasma cannon began to activate.

The blasthole of the black hole locked a wicked creature that was roaring at the fifth layer of the Wisdom Cycle Realm. It looked like an eight-armed dragon.

Fang Yue's divine mind lock is more accurate than pure technology satellite lock.

The eight-armed dragon sensed the lock of the plasma cannon, roared, and jumped up.

Its figure is extremely fast. In the high-speed irregular movement, it is difficult for the plasma cannon to lock the evil creatures above the rotation level.

No matter how powerful the cannon is, if it fails, it will be useless.

"Trap him!"

Fang Yue's lips opened slightly.

The ten little demons gathered around the eight-armed dragon. The ten little demons were hard-faced and naturally they were not the opponents of the eight-armed dragon. However, they were arranged into a battle formation, with buckets of thick vines broken. Empty out.

The vine suddenly came and locked the waist, neck, and other vital parts of the eight-armed dragon.

It was caught off guard and did not break free in time.

Master clashes, just in an instant.

At the moment when the eight-armed dragon was trapped, Fang Yue's plasma cannon had been aimed.

A beam of white light pierced the void and shattered the eyebrows of the eight-armed dragon.

"First!"

Fang Yue whispered to himself.

The death of the eight-armed dragon made evil-conscious creatures instantly angry. If it were the eighth-ninth level of the heaven and earth realm, it could already be regarded as the middle level among the evil-conscious creatures.

Then the eight-armed dragon, who has reached the fifth level of the rotation realm, is the soul figure among them, belonging to the category of higher levels.

Its death made many evil creatures furious.

A large number of evil creatures rushed towards Fang Yue's position.

There are also some evil creatures that started chasing and killing ten little demons. If it weren't for these ten evil creatures, the eight-armed dragon would not die.

The plasma cannon, for evil creatures of the eight-armed dragon level, although powerful and irresistible, it is not necessarily deadly.

If it fails to hit, no matter how powerful it is, it will be useless.

Chapter 1086: Fruitful

The ten little demons did not choose to fight head-on, they scattered and fled.

But soon, they were surrounded by groups and there was no way to escape.

Quantity beats quality, and a large number of evil creatures surrounded them with three layers inside and three layers outside.

"Almost, it's getting hot!"

Fang Yue muttered to himself, and the corners of the ten little demons showed evil smiles.

Layers of white light all lit up.

The ten little demons unexpectedly chose to explode, triggering the X bomb on their bodies.

A dazzling light enveloped the earth.

For a time, it turned out to be like the sun rising, piercing the darkness and covering the earth!

A large number of evil creatures were wiped out.

Fang Yue received prompt sounds one after another.

"Kill ordinary monsters on a thousand planets, complete the mission, get 500 points, and a random martial arts scroll."

"Kill extra ordinary monsters, start the primary mission, kill 3,000 ordinary monsters, complete the mission, get 1500 points, random martial arts scroll X3."

Sure enough, after the basic tasks are completed, there will be primary tasks open.

The rewards for primary tasks are more generous than primary tasks.

However, with limited time, Fang Yue had no time to open the martial arts scroll.

Only when the leader of a four-headed revolving state above the fifth level of the evil creature is killed, he can get the intermediate task reward.

Fang Yue's eyes were focused, waiting for the arrival of the evil creature.

Sure enough, evil creatures appeared like tides, but they were still 500 meters away from the military camp.

With a bang, another X bomb exploded.

This was buried before Fang Yue.

Waiting for work with ease, he had already calculated the scene of the beast tide running.

Another creature with evil thoughts was wiped out from the world.

What Cole saw was simply dumbfounded. The power of this technological weapon was certainly not small, but Fang Yue's calculations were also dumbfounded.

These evil creatures seemed to come in droves to die.

The other Fang Yue's comrades who were still fighting in blood, suddenly felt that the pressure on their shoulders had decreased a lot.

The successive explosions of X bombs wiped out evil creatures in large numbers.

Nowadays, the density of evil creatures has decreased a lot, making them feel that these monsters are not invincible.

Fang Yue did not speak, but coldly watched the evil creature fall.

This is just the beginning.

Today, these evil creatures are destined to become bones under his feet.

"Plasma cannon, kill me!"

There is no need to aim, the dense clusters of evil creatures have poured into the barracks.

A beam of light swept across directly.

Pieces of evil creatures were cut in half, flesh and blood like mud.

However, these evil-minded creatures seem to be dead and fearless, and continue to march on the blood of their companions.

Their steps are extremely firm.

This evil creature is inexhaustible to kill, can make people feel desperate.

Fang Yue squinted, and he saw a black-haired monkey jumping up and down, scratching his ears and cheeks, surrounded by many evil creatures.

And many evil-minded creatures surround it, and they are obedient to it.

"This monkey should be one of the leaders of these evil creatures!"

The corner of Fang Yue's mouth showed a slight smile.

Evil-minded creatures, the higher the level of their cultivation, the higher their control over other lower evil creatures. At the same time, the wisdom of evil-minded creatures will increase as their cultivation level increases!

Wait for the particle cannon to be ready.

Lock and aim.

The figure of the black-haired monkey immediately stiffened, as if trapped in an ice cellar, unable to move.

Its eyes are wide open, and they are full of panic.

A beam of white light passed through.

Failed!

Fang Yue clearly perceives that the black-haired monkey's position has only one slender monkey hair swept by the light of the plasma cannon, and it instantly evaporates.

At the level of the rotation realm, every evil creature began to tap its own potential and supernatural powers.

In addition to their pure realm advantage, their use of talent has also reached the extreme state.

This monkey hair substitute technique is the natural magical power of this evil creature.

However, Fang Yue was not disappointed. If these evil creatures are really so easy to kill, then he doesn't need to work hard here!

Look down at his watch, there are four minutes left.

Ding sound.

A long sword fell, blocking the black monkey's path.

It was Cole who shot.

He and Fang Yue are now grasshoppers tied to a rope, both prosperous and damaging. After sharing their tasks, they belong to the ranks of comrades-in-arms.

The black-haired monkey escaped, so he was naturally filled.

"squeak!"

The black-haired monkey scratched its ears and cheeks anxiously, and its monkey paw fell on the scene of the sword.

The long sword vibrated, wiping out a series of sparks.

The back grip of this black-haired monkey was actually stronger than the steel long sword in Cole's hand.

"Tie the cents!"

Cole is not in a hurry. As the elector, it is commonplace to use weak to strengthen.

Walking in a forbidden place, how could he not have a few treasures in his hands.

An earth-yellow rope was thrown out of Cole's hand and turned into a small snake to instantly trap the black-haired monkey.

The black-haired monkey struggled, and the bundle of immortals also cracked.

But this is enough!

Plasma cannon preparation.

emission!

Another beam of light penetrated.

The evil creatures above the fifth level of the second head cycle fell.

Fang Yue's task has been completed two-fifths, and the remaining time is three minutes and forty seconds.

The light in the operating room gradually dimmed and finally extinguished.

There is no energy.

The firing of three plasma cannons has exhausted the last trace of power stored in the base.

In fact, this plasma cannon can be considered a success.

If it weren't for Fang Yue's shrewd calculation.

Three cannonballs can never kill two nightmare creatures above the fifth level of the cycle.

The plasma cannon that had run out of energy was no longer threatening, and the evil creatures that had been waiting and watching all rushed up.

The barracks were overwhelmed for a while.

Fang Yue seemed to have become the sweet pastry in the eyes of these evil creatures.

"Sure enough, evil creatures have extraordinary wisdom. They also know how to turn their companions into cannon fodder, exhaust all the energy in the plasma cannon, and then come out to pick up the leak."

Fang Yue affirmed a fact more and more. And his subsequent actions are based on this fact.

"This plan must be successful~"

Fang Yue muttered silently in his heart.

A large number of evil-minded creatures rushed in, their levels were different, and the number was extremely large.

Fang Yue's divine thoughts spilled, and finally he determined at least the leader of the evil thought creatures above the fifth level of the three-headed revolving state.

Fang Yue's figure disappeared quietly.

The control room where the plasma cannon is located is occupied by many evil creatures.

Fang Yue's figure had appeared several kilometers away.

"Let's die together!"

Fang Yue whispered softly, as if he was a magic stick, proclaiming the end of the end.

The white light, like a spreading cobweb, quietly spit out the cobwebs everywhere.

Fang Yue buried all the X bombs in his hand under the barracks.

All the bombs detonated at the same time, loudly.

The whole world became quiet.

Fang Yue watched as the body of the evil-minded creature turned into ashes.

The power of the X bomb is unimaginable.

One is enough to wipe out all the creatures below the cycle.

The power of several X bombs is superimposed, and even the existence of rotation can be severely damaged.

With dozens of X bombs, it is estimated that the construction land after the barracks was flattened would not be able to build any buildings in hundreds of years.

"Kill the evil mind creature elite X3 above the fifth level of the Rotary Realm, and the mission is 60% complete."

"Kill the evil creature elite X4 above the fifth level of the Rotary Realm, and the mission is 80% complete."

The indifferent voice prompt stopped abruptly.

A gorilla, nearly ten meters tall, slowly stood up from the white beam.

King Kong Ape!

Fang Yue's breathing almost stagnated.

Not all evil creatures are afraid of high-tech weapons.

Some evil creatures have extremely high resistance to high-tech weapons or are simply immune to all damage from high-tech weapons.

Fang Yue knew this for a long time.

But he didn't expect that his luck would be so back, that such a thing would be encountered by himself.

The breath of the eighth layer of the rotation realm fell down.

Fang Yue's breathing became a little harder.

Even among the many leaders of evil thought creatures, this diamond ape is considered powerful.

He is not undamaged, the original golden and beautiful fur has now become a dim gray under the explosion of the X bomb.

However, even if the tiger falls into the Pingyang, it is still a tiger.

Without the aid of high-tech weapons, Fang Yue could not show any means other than witchcraft, it would be impossible to kill this diamond ape.

"Space crack!"

The corners of Fang Yue's mouth moved slightly.

A silver crack opened quietly behind the diamond ape.

The huge suction force seemed to stick out of countless hands, dragging the evil creature into it, and then the space crack slowly closed, as if nothing had happened.

Everyone's vision was shrouded in white light, and no one knew what happened at this moment.

Even Cole didn't notice the abnormal change here, he only thought that all those evil creatures died with the base in the explosion.

"Your mistake is to stand up too early, no one is supervising, I can use any means to send you away from this world."

Fang Yue chuckled lightly.

mission completed.

9% witchcraft power is permanently strengthened instantly.

Along with the fall of the leader of evil creatures above the fifth level of the five-headed cycle, there are also a large number of middle layers of evil creatures, and the minions died under the power of the X bomb.

The tide of evil creatures was finally coming to an end.

The rest is the work of clearing up the mess, and the soldiers who are trying to get more combat exploits are particularly active at this moment.

Fang Yue didn't participate in it. He ate meat and always kept some soup for his brothers.

The finishing work is quickly over.

Fang Yue's waiting for reinforcements from the higher military bases has not arrived.

Fang Yue glanced at the communication recorder Chris had left behind. There was no recent contact record on it.

"People who are too ambitious will eventually be eaten by their own ambitions."

Fang Yue understood that Chris should have wanted to swallow the technology in his own hands.

However, obviously this Chris's appetite is not so good, even if the food has been delivered to him, he can't swallow it.

Chapter 1087: Ruthless

Fang Yue is sorting out his own harvest.

In addition to superimposing 13% of the permanent power of magic power.

His primary creatures that killed ordinary evil creatures have also been completed.

1500 points are credited, plus three random martial arts scrolls.

If you add elementary missions, he will earn 2000 points and four random martial arts scrolls.

At this moment, Fang Yue once again observed his identity as the caller.

The points situation has become 9856 points. In addition to the task, the extra points are obtained by killing evil creatures. In addition, after completing the Cole shared task, he also obtained two random skill scrolls.

Fang Yue glanced at Cole.

Cole couldn't help but sneer.

"It is said that the military of this federation is extremely inefficient, and each time it appears after the surprise. It seems that it is indeed well-deserved."

Cole looked far away.

He saw a team of hundreds of people coming from the dust.

This team is well prepared for combat, and is definitely more than a grade beyond the old and weak remnants of Fang Yue.

"Are you grabbing merit?"

Fang Yue muttered softly.

Fang Yue's military merits cannot be deprived, after all, the military merit recorder just now has recorded everything.

However, the corpses left by these evil creatures after death contain many extremely precious materials.

These materials can be made into valuable, indestructible cold weapons, or some high-tech materials.

In the era of chaos and fighting, truth must always be surrendered under the fist.

In a moment, the team arrived.

Fang Yue's spiritual thoughts swept through, a total of 345 people.

The one standing in the front, wearing a black protective suit, could not see his exposed skin from head to tail.

"Federation, Eighth Army, Seventeenth Division, Seventh Brigade, Third Regiment, 28th Battalion, Battalion Commander Joule."

The man reported his family, his voice was cold and merciless.

"boss?"

Fang Yue was a little surprised. He thought he was stealing military merit, but he didn't expect that the people above actually came.

"This situation... the beast tide has been defeated by you?"

Jiao Earring looked around, he led his assault team over the mountains and rivers. He wanted to save as many soldiers here as possible. Unexpectedly, they were still a step late in the end.

The tide of beasts has been defeated.

He seemed to be a man of military merit.

Under the mask, Joule's face couldn't help showing an awkward look.

"It is accurate to destroy, not to defeat."

The corner of Fang Yue's mouth showed a faint smile.

The corpses all over the place were anxious, it was indeed destruction, not defeat.

"How did you do it? Let your platoon leader Chris come to see me!"

Joule's voice became high and cold again, Fang Yue, an ordinary soldier, was not qualified to contact him directly.

In the army, the class is strong. Generally speaking, avoid leapfrog communication.

"Platoon Commander Chris, he has sacrificed!"

Fang Yue didn't even bother to pretend to pretend, and said directly.

"Chris is dead? How did he die?"

Joule's pupils shrank slightly and looked towards Fang Yue.

At this moment, Joule finally felt something was wrong.

My arrival was not cheered by these soldiers, but a hint of hostility permeated through the eyes of the surviving soldiers.

And they looked at Fang Yue's gaze, gratitude mixed with worship.

Such treatment is generally only available to heroes in the army.

The mutiny of the military is the most feared thing for the military generals of the Federation, which means that their authority will no longer exist.

"I killed it."

Fang Yue's response was plain as water, and there was no emotional fluctuation on his face.

Cut off a platoon leader and killed his immediate boss.

Fang Yue seemed to be crushing an ant to death at random.

"You killed? Why kill him!"

Joule's pupils shrunk slightly, but he did not blindly take the shot.

To be able to sit in the camp, force alone is not enough.

Since Fang Yue dared to say this to him and did not hide it, he naturally had his trump card.

"He's not dead, we're all going to die. Chris controls the barracks and never takes the names of ordinary soldiers like them in his eyes."

"Rather than being killed by the evil creature, it's better to give it a go."

Fang Yue's voice was not loud, but the surviving soldiers gradually gathered around him.

That's right, Fang Yue killed Chris to save everyone. If the above were to blame, then even if they desperately died, they would have to save Xiao Yue.

Joule has noticed the changes in these soldiers.

He sighed slightly.

The most worrying thing finally happened.

Although the officers born in the peaceful age have the rights and qualities of an officer, it is difficult to establish the prestige as an officer in the war.

"Chris's death, I'll investigate it! If it's like what you said, if Chris ignores his soldiers, I won't pursue his death. But I want to know, you guys. How did people solve this beast wave! According to my understanding of the scale of this beast wave, even if the entire camp is full of soldiers, it may not be able to defeat the beast wave of evil creatures, let alone completely destroy it. Up!"

This is what Joule is most concerned about.

He had a total of ten platoons. However, according to his estimation, even if ten platoons were deployed together, they would at most be equal to the beast tide.

If these evil-minded creatures are desperate to carry out suicide attacks, maybe his men will have to bear a lot of casualties!

Fang Yue raised his eyebrows: "You can read the history of this incident on our military recorder."

"What if I want to listen to your dictation?"

"my pleasure!"

Fang Yue briefly explained how he would defeat the beast tide.

He naturally concealed what should be concealed.

"You mean, the leader of this evil creature has extraordinary wisdom?"

Joule's eyebrows raised, and he was pondering this question.

"Yes! However, in this world, there has never been a lack of cleverness. There are far more people who die on self-righteousness than those who die on perseverance. Wisdom is a double-edged sword and may pose a greater threat to us. For example, the original Shadow Dragon's trick to lure the enemy, and

the organized and large-scale offensive. But sometimes cleverness can also become a trap for self-destruction. How to deal with this information depends on Lord Joule Attitude!"

Fang Yue said jokingly, but he didn't show too much humility in Jiao Er.

"Then how are you sure that the animal tide will finally attack the barracks?"

For Fang Yue's attitude, Joule didn't take it to heart.

After all, Chris's actions may have caused Fang Yue and even the surrounding soldiers to feel aversion to the military's officer system.

"I asked Chris before, this beast wave must come here to ask for something. Chris did not answer me, but the waves of beast wave attacks let me know the root cause! The biggest advantage of human beings against evil creatures is It lies in high-tech weapons. You and I understand this, and the leaders of the beast wave also understand. Therefore, if I were the leader of the beast wave, the first thing I must do is to seize the high-tech weapons of mankind and smooth the gap between the two sides. The weapon gap. The place where the most weapons are stacked is the military camp."

Fang Yue gave out the basis for his inference.

Joule shook his head: "All this is your own speculation, there is no basis at all."

"If there is a real basis, this Chris did a very strange thing before the arrival of the beasts. He opened the weapon arsenal and asked the soldiers to take away the weapons they could use as much as possible. According to my brief to Chris He is not such a generous person. Therefore, I conclude that he may also know the purpose of the beast tide, so he locked the target on the weapon. Soldiers have more weapons, which is equivalent to To disperse the pressure of the animal tide for him. In his eyes, there is only bait, but there is no habit of loving soldiers like children."

Fang Yue's words left Joule speechless.

Although he didn't want to admit it, Fang Yue's speculation made sense.

"Furthermore, in marching battles, where is there any guarantee! If I am a general, I must try my best to fight for the first line of life."

An unruly smile appeared on Fang Yue's face.

Joule was pondering silently, not knowing how to respond.

Compared with Chris, Joule had to admit that Fang Yue was more like a general in the war years, courageous, unrestrained, and even that kind of banditry.

"If it is true as you said, then your military merits this time will definitely be expensive. However, as an officer, I remind you that this military merit can be exchanged for weapons, powers, and even wealth. But the ranks and positions in the army, Don't expect too much. Everyone standing in your seat has a deep background and foundation. Becoming famous in World War I has always been just a beautiful fairy tale!"

Joule gave Fang Yue a deep look.

Fang Yue clasped his fists: "Thank you for your advice."

Joule's men didn't move the spoils at all, but instead helped Fang Yue and others transport the spoils to the new camp and exchanged them into a pen of military merit.

Two days later, the military merits were proofread out.

Fang Yue and Cole each had a lot of military merits.

Fang Yue's military merit reached a terrifying 3,750 points.

And Cole's military merits also reached 832.

Cole didn't kill many enemies, mainly because Fang Yue was fighting hard, and Cole was already quite satisfied to be able to get these military points.

The redemption list of military merits also appeared at the same time.

A corporal to be promoted to a sergeant requires 10 points of military merit.

Sergeant promotion requires 50 points of military merit.

The promotion of a sergeant to a lieutenant requires 200 military merits.

The promotion of a lieutenant to a lieutenant requires 500 military merits.

The higher the promotion, the more exaggerated the number of military merits required.

But this is only part of it.

If you want to be promoted to an officer, you need to use military merit to exchange positions in addition to a simple military rank.

The military merit required to become a squad leader is 50 military merits.

The military merit required for a review of the deputy platoon leader is 200 military merits.

The military merit required for an audit platoon leader is 500 military merits.

This step-by-step promotion requires the support of massive military exploits.

Fang Yue's ambitions this time are not big, that is, he wants to be a platoon leader first, and with such a few hundred people in his hands, he has a real position in the army.

"This promotion to a platoon leader requires thousands of military exploits. If this is a camp, how many evil monsters must be killed!"

Fang Yue's eyes hurt, and this special mother's demand for military skills is too exaggerated.

At this moment, Joule pushed the door in and he looked at Fang Yue with a smile: "In addition to killing evil monsters, there are many ways to gain military merit. For example, donating star crystals can exchange 10,000 star crystals for a little military merit. . For another example, if you perform well in usual training, you can also get a certain amount of military merit. The contribution of scientists, the

number of military merits obtained is also very exaggerated. Sometimes, many years of birth and death may not be worth a share. Scientific and technological contribution."

Joule's last few words meant something.

Chapter 1088: Deputy post?

He must have watched Fang Yue's battle video. The matter of the Star Cannon and the Little Devil was naturally unavoidable.

Of course, Fang Yue was not even prepared to hide Joule.

If you really want to conceal it, you won't be able to get any useful information even if Joule's deliberate efforts are made.

"The commander of the battalion came just right. What rank and position do you think I can get with this military merit exchange?"

Fang Yue looked at Joule with a smile.

He knew that the new technology in his hand was absolutely what Joule had dreamed of.

For a planet based on technological civilization, new technology is equivalent to fresh blood.

Perhaps, some of the basic technologies contained in this star artillery and biotechnology can give scientists inspiration, by analogy, and set off a new technological revolution.

"In terms of your record in the previous battle, it is definitely more than enough to exchange for a lower rank and become a deputy platoon commander, but if you want to transfer to a main post, the qualifications are not enough! This military has military rules, Military merit is just a general rule. There are also backgrounds, seniority, personal connections, etc., all of which you need to consider!"

Joule was blunt.

These things are actually hidden rules on the table.

Being able to fight proves that you are brave.

But brave people may not be suitable for officials.

"Deputy?" Fang Yue frowned, he was not satisfied with the arrangement of this position.

Deputy position often means more life and less power. Sometimes if there is a conflict with the concept of the principal position, you may be isolated by the other party.

Fang Yue still understands the ways in officialdom.

Joule was not surprised by Fang Yue's expression.

"After all, you have no background, can fight a battle, rely on meritorious deeds, from a most ordinary corporal soldier to a deputy platoon commander is already a step to the sky. People must understand and know enough. Of course, if you can contribute I can recommend some family backgrounds for some of the technology of some alien civilizations. At that time, it will not be impossible to become a platoon leader."

Joule diagram is indifferent, the so-called background and the limitation of contacts are all excuses, what he wants is a deal.

Take away the black technology in Fang Yue's hand, and give Fang Yue a decent position.

Fang Yue sneered, and did not take the move: "Master Joule, I eat everything, but I don't want to eat the threat of others. From deputy platoon leader to platoon leader, it's not worth the price. If Commander Joule insists, Then there is nothing to talk about."

"Then what do you want?"

Asking prices all over the sky and paying the money back on the ground is the rule of trading.

Fang Yue's refusal did not make Joule's face show any irritation.

"A piece of electrical circuit knowledge or a piece of biotechnology information, in exchange for the post of platoon leader, and give me one hundred thousand stars."

The star crystal is the foundation of the science and technology civilization of the energy federation. It is a universal energy material.

If the number of star crystals is insufficient, no matter how clever technological weapons are, they will all be scrap iron.

"A piece of circuit knowledge or a piece of biotechnology information in exchange for the position of platoon leader and 100,000 stars? The lion speaks loudly, young man, you really don't know how to converge!"

Joule snorted coldly, a fierce glow appeared in his eyes. He couldn't feel any sincerity in the price offered by Fang Yue.

"What do you know as a martial artist? Either one of the two is sufficient for the forces behind you to lead others in the corresponding technology field for three to five years in the same generation."

Fang Yue was not in a hurry.

It was really relying on marching to fight, and slowly improving his status in this world was too slow.

Moreover, his cultivation realm is limited, and there is still a way to encounter evil creatures in the rotation realm.

If you really encounter a creature with evil thoughts at the Yin and Yang level, it is estimated that you will lie down without using the power of the deity.

"Commander Joule, I advise you to find the scientist in the family power behind you and let him see if the price I offered is worth it or not."

Fang Yue said with a smile, Joule suddenly discovered that it was originally his home court, but Fang Yue unconsciously took the initiative, holding the rhythm of the negotiation tightly in his own hands.

Drips of cold sweat wet Joule's back.

When dealing with Fang Yue, his Lao La felt as if he was a child fighting against an adult.

"Okay!" Joule didn't hesitate, turned on the communication equipment and called the family scientist.

Soon, an old man in a white coat came hurriedly. His hair was white and messed up like a bird's nest.

"Master Pasteur."

When he saw the scientist, Joule leaned slightly, even if it was his captain, battalion commander, and even if he was a powerhouse at the rotation level, his methods were amazing, but in front of Pasteur, he still maintained respect and behaved. Like a child.

Pasteur with his hands behind his back and Joule, Pasteur is more like a sophisticated general.

"Where is the thing? Show me."

Pasteur's gaze traversed the room, and he hadn't looked at Fang Yue since he entered.

"With me, but you haven't agreed to my terms, why should I show you?"

Fang Yue's smile remained the same. He had expected the overbearing power behind Joule.

But he is not a soft persimmon. If he shows the slightest weakness, it is not a deal, but a murder.

"You, a martial artist also knows science?"

Pasteur sneered.

Fang Yue's sneer at Pasteur gave rise to a slight resentment in his heart.

"The person in the white coat may not be a scientist, and it may be a liar."

Fang Yue sneered.

But Pasteur's face became gloomy.

"Boy, who do you say is a liar?"

"If you think you are yourself, then I can't do anything about it. In my heart, scientists are humble and pious. They will never judge people by their appearances like you."

There was a contempt in Fang Yue's smile.

Pasteur laughed suddenly, as if nothing had happened before.

"I like you, brave little guy. Tsk tsk, no one dared to speak to me like this anymore!"

Pasteur's laughter was a little cold.

But Fang Yue didn't care, whether he was a ghost or a monster, what the two of them had to do was just a deal.

"You don't believe us, and we don't believe you at the same time! Such mutual suspicion will definitely be unable to achieve the goal of cooperation in the end. How about the sincerity of one of us first? This is fifty thousand star crystals, which is considered us Deposit."

Pasteur threw five orange star crystals to Fang Yue.

The exchange ratio between star crystals is one to one hundred.

White has the lowest grade, followed by red, then orange.

Five orange star crystals are worth fifty thousand white star crystals.

Fang Yue put away the orange star crystal, then blew a whistle.

He took out a piece of white paper, then got a drop of water on his finger and graffiti.

Suddenly, the paper burned, and a thunder of the thickness of chopsticks burst out.

"What is this? The power of ghosts and gods?"

Joule widened his eyes and exclaimed involuntarily.

"If possible, I would prefer to call it the energy intersection of potential and field." Fang Yue said seriously.

At this moment, Pasteur was shocked. This is the most cutting-edge topic they are studying.

However, the interlacing of potential and field energies can excite the mighty power of heaven and earth elements, all of which are in the theoretical stage. They haven't even come up with a hypothetical plan yet, and this young man has already mastered the power they dream of.

This is simply incredible.

"This is the first circuit information I mentioned. Do you two feel satisfied with this power?"

Fang Yue leaned slightly. As early as the Deep Blue Planet, he already knew that these so-called sciences and runes were all people's perceptions of the same phenomenon in this world at different levels.

Different routes, but the same goal.

"Only this piece of circuit science information is at least five years ahead of this era, value, value!"

Pasteur was extremely excited.

For a scientist, there is nothing more exciting to discover a new unknown.

"The second article, biological information, well, this may be a bit abstract for you!"

Fang Yue took out a needle tube, which was still swaying with purple liquid.

The liquid reflected a hint of coquettish light in the sun.

"Bring me a little white mouse, thank you!"

Fang Yue's voice became polite and elegant, not at all like the market merchant who had just bargained.

Soon, a healthy and lively mouse was sent.

Fang Yue didn't hesitate to insert the needle into the artery of the mouse's fragile neck.

The purple liquid was slowly pushed into it.

The expression of the mouse became wilted.

But soon, the mouse's body began to swell, and within a few breaths, its volume was more than three times larger than just now.

"Squeak!"

The white mouse jumped wildly, and its white legs easily overturned a ten kilogram safe in the room.

"The primary genetic medicine can activate a part of the potential of genes hidden in the human body. Ten medicines can be used by yourself to improve your strength, or you can use them as experimental samples. If they can be put into mass production, you will get A group of burly and powerful genetic warriors."

"Oh my God! Has the key to genes been mastered? Unexpectedly, our pride is composed of arrogance and self-righteousness. Ten years ago, we discovered that there is a genetic treasure house in all animals, but this gene The door of the treasure house is closed tightly. If we can open the door of this gene treasure house, we can all obtain extraordinary power from it. But while we are researching, we have already grasped the key to open the treasure house and opened it smoothly!"

Pasteur kept exclaiming that the contempt and disdain in his eyes had now become god-like worship.

"Please forgive me for my disrespect, those I was some of my mean little tricks. To express my inner apology, I decided to each give you a personal particle cannon that is easy to carry."

Pasteur's apology made Fang Yue a little flattered.

Chapter 1089: Pasteur

The level of technological content of individual particle guns has exceeded Fang Yue's cognition.

It is about the same size as an ordinary hand cannon, but it has a miniature plasma launcher.

Individual particle cannons have a range of almost two kilometers or less, but in terms of power, they are not inferior to the giant particle cannons placed in the base.

Even the evil creatures at the rotation level can be killed with one hit after being locked.

This thing, if you want to buy it, besides Xingjing, there are also corresponding official positions, military ranks and even military industry.

"you are very welcome!"

Fang Yue laughed, but he put the person waiting for the particle cannon in his heart.

Sure enough, this Pasteur is so sophisticated and knows how to win people's hearts.

He began to suppress it with arrogance. Once he found that the technology provided by Fang Yue was really valuable, he immediately turned his head to please him.

Moreover, Pasteur's handwriting is very large, and generally even battalion commander-level officers will not be equipped with personal killing weapons such as particle cannons.

"However, both of these technologies are available or not. At the price, we will naturally satisfy you."

Technology represents the future direction.

In comparison, military merit, weapons, and official positions are much lower in value.

"How do I want the position of a deputy battalion commander? The rank, lieutenant is fine!"

Fang Yuemi stared, the deputy commander, even if he had no real power, but his seat was here.

He can get in touch with more advanced generals, and it is also convenient for him to complete the tasks assigned to him in the forbidden place when he descends-contact the world commander and above tasks to get a good impression.

This world belongs to the existence of the scientific and technological world that naturally does not lead this position.

But if you compare it carefully, the commander is actually the position of the group leader.

Soldiers cannot leapfrog in contact, but if the deputy battalion commander wants to contact the regiment commander, it will not be too difficult.

"Deputy?"

Fang Yue's choice made Joule somewhat unexpected.

In fact, the position of deputy battalion commander just sounds glamorous, and the actual authority is not as good as an ordinary platoon commander.

The position of the deputy battalion commander is in charge of a certain aspect of military affairs. This military affairs can be the selection, appointment and dismissal of personnel, which is fat and oily, but at the same time, it may also be investigation, logistics, and so on.

The deputy battalion commander needs to follow the command of the main battalion commander.

In this respect, where is this deputy battalion commander's free and comfortable platoon commander.

"Yes, deputy battalion commander, from the platoon commander to the battalion commander, you will have to take the deputy battalion commander sooner or later. Now there is a chance, it is better to do it in one step.

Fang Yue's words immediately dispelled their doubts.

It turns out that Fang Yue is an official fan, but those who are greedy are easy to solve.

What they fear the most is not the greedy person, but the kind of person who has no desires and desires. That kind of person feels like a mouse dragging the bastard, unable to start.

"The position of deputy battalion commander is not easy to do. Fang Yue, you have to think carefully! There are five deputy battalion commanders of mine, and they are already full. If they are deployed, they may be among other troops. That's not my person. When the time comes, even we can't help you!"

Joule deliberately showed a look of embarrassment.

Fang Yue said generously: "This is no problem, I can solve my problem myself."

As soon as Fang Yue's words were uttered, Joule immediately remembered that this Fang Yue was the one who could lead this platoon of men and horses to solve an animal tide.

"Deal!"

Pasteur can't wait.

Even Fang Yue's conditions were unacceptable. He also wants to win these two new technologies.

This thing is now his lifeblood.

Pasteur spoke, and Joule had no choice but to agree.

"Young man, I know your way to reach the sky and it depends on the alien technology in your hands. There are more than these two. However, I hope you can still choose to cooperate with us if you have other alien technologies in your hands."

Pasteur glanced at Fang Yue deeply.

Fang Yue suddenly patted his forehead.

In vain, he is usually shrewd, but now he is confused.

"Are you backed by military officials above the regiment level? If so, I have a ruthless please."

Fang Yue spoke.

Pasteur was a little surprised. He thought that the transaction was over and Fang Yue wouldn't say anything more.

"Behind us is the Tianshen Biopharmaceutical Company. The background in the military and the government is not small. Naturally, we have the regiment-level officials you mentioned! However, if you want them to meet you alone, I am afraid there are some Difficulty, as you know, officials above the regiment level are already regarded as big officials in the Federation. All of them hold real power, and every move, every word and deed will attract the attention of all parties. If you want to assassinate, in case he If you die here, the entire Federation will be shaken."

Pasteur constantly emphasized the status and strength of the officials above the regiment level.

"You don't need to say this, I understand everything. I just want to have a familiar face in front of my future boss. It doesn't matter who is there. Of course, if it's best, don't use people outside of your Celestial Biological Company."

Fang Yue's conditions were not excessive at all.

Pasteur thought for a while and immediately agreed. No matter what medicine was sold in Fang Yue's gourd, he actually didn't care much.

Every officer above the regiment level is at least a level three or more cultivation base in the rotation realm, and their martial arts have reached a fairly advanced realm.

Before danger comes, they can make a whim.

Such a person is simply a hundred times more difficult to entangle with evil-minded creatures of the same realm.

I have to say that Pasteur's efficiency is very high. He directly contacted the high-level of the Celestial creature to explain the situation here.

After the senior officials of the Celestial creatures learned about the situation, they soon dispatched a regiment-level senior official.

"This time, our Celestial creature arranged for you to meet with your future boss, Yan King Alpha of the 12th regiment. Young man, I have to say, your luck is pretty good. You just wanted to meet the senior military officer, this Lord Yan is just free."

Pasteur really opened the chatterbox, and he didn't know the ruthlessness and indifference on the surface, he talked endlessly. There is no unfamiliar feeling.

Fang Yue was also a little helpless about Pasteur's familiarity.

But fortunately, the Yan King Alpha had no habit of procrastination. He acted vigorously and soon came to the barracks.

Alpha is 1.8 meters tall and well-proportioned, with no exaggerated muscles or burly figure.

With an inch head and fair skin, he looks a bit like a big street boy who likes to play basketball in high school on earth.

His eyes were pale blue, clear, without the slightest smell of fireworks.

Alpha came by himself, and the guard stood guard at the gate.

Alpha is very confident of his own power, or that he understands in his heart that if he can't even deal with the danger himself, no matter how many people come, it is no use.

"Meeting for the first time, introduce yourself, Alpha, the leader of the 12th regiment, some people like to call me King Yan."

King Yan's attitude is very gentle, if you change to anyone else, you will definitely feel flattered.

But Fang Yue understood that the more such a person, the more terrifying.

His surface is a calm river, but there are turbulent undercurrents hidden in it, and the waves are constant!

"Fang Yue."

Fang Yue introduced himself, neither humble nor overbearing.

"I heard you want to see me?"

Alpha still maintained a polite smile.

He couldn't refuse the request of the **** creature.

Because he was able to achieve this position, half of the credit came from the **** creatures.

"Yes, I want to see you, a small gift, disrespectful."

Fang Yue took out a piece of talisman paper on which was a talisman painted with vermilion pen and ink.

The strokes of this Fuluo are weird, and it is impossible to tell how many interlaced strokes are in it simply with the eyes.

"this is....."

Alpha felt a touch of earth on the yellow paper.

"A product of the combination of potential and field can partially mobilize the power of the earth. If you don't want it, you can give it to Pasteur. I believe he will gladly receive this gift."

Fang Yue glanced at Pasteur, and as expected, there was a superb light in Pasteur's eyes looking at the talisman.

This is another completely different circuit system, and the principles of the field and potential contained in it are completely different from the one that Fang Yue wanted to trade with him before.

"Alpha, take him!"

Pasteur couldn't help but reminded him.

There was a slight emotional fluctuation on Alpha's face. He looked at Fang Yue with interest: "I don't know what you gave me this thing for? Although, I don't know the purpose of this thing, but in Pasteur In his eyes, I can see the light of greed and desire. So this thing must be a treasure, and even its value will make the **** creatures move."

Alpha did not heed Pasteur's bewitching.

Although Pasteur's position in the **** creatures is quite high, he is also considered a pivotal existence among the **** creatures.

In terms of status, Afar and Pasteur are actually at the same level, but they belong to different systems.

Therefore, there is no right to command and order between each other.

"Of course I am giving you the same meeting ceremony! Didn't Pasteur tell you? I will be your subordinate in the future. As a subordinate, bribe your boss, isn't this a matter of course?"

Fang Yue looked like a matter of course.

Alpha's smile is even brighter.

"Contact with officials above the commander level of the federal military and get a good impression. Upon completion of the mission, you will receive 500 bonus points and a good impression card."

Fang Yue had heard the prompt of that indifferent voice.

"The three main tasks are completed and you can choose to return. Will the caller return?"

"no!"

Fang Yue chose a no without hesitation.

Chu Yaoyao once said to Fang Yue that the difficulty of the main task is relatively low and the rewards are relatively small. Every forbidden place can be called a rich treasure for endless exploration.

The more side missions opened up, the greater the chance.

"The caller chooses to stay in this world. The caller can choose to return at any time within 90 days. If the caller does not return after 90 days, he will be forced to return."

The indifferent voice fell.

Fang Yue continued to talk to Alpha.

Chapter 1090: Deputy Battalion Commander

But at this time, Fang Yue's mentality was completely different, and he was almost invincible at this moment.

Once in danger, he can choose to return immediately, unless he is instantly killed by someone, and he can't even pass on the idea of returning.

"You are a very interesting person to be able to speak so confidently about those things that are not on the stage."

Alpha gave Fang Yue an interesting comment.

The Joule beside him was stunned.

This Alpha has always been known for his indifference. He uses soldiers like a god, but he rarely has personal feelings.

Soldiers, to him, are like pawns on a chessboard. In order to win, they can make no compromises or even sacrifice.

And Alpha actually gave Fang Yue a very interesting evaluation, which surprised Joule.

"I accepted this thing, and it's considered a favor from me. If there is any need in the future, I can speak and I will help you once within my ability."

Alpha took Fang Yue's favor.

Afterwards, Fang Yue and Alpha talked for a few more words. Alpha had something to leave. Alpha is usually very busy, and it was an accident to be able to take time to talk with Fang Yue.

For the remaining three days, Fang Yue spent leisurely.

Three days later, Fang Yue took office and became the deputy commander of the 7th Battalion of the 12th Regiment.

After the transfer, Fang Yue also exchanged all the thousands of military exploits he had left into various powerful high-level weapons.

The value of military merit is quite high and the purchasing power is extremely strong.

Many things on the market that cannot be purchased with Star Coins can be exchanged for military merit.

Fang Yue's accusation was also made clear. He was in charge of logistics and armaments, as Fang Yue expected.

The logistical armament is considered a fat difference, and the risk factor is also extremely high. The logistical armaments of a battalion, other than just star crystals, are worth millions.

This is the standing star crystal, not during the war. If there is a war, the number of this star crystal will increase by about ten times.

In addition, various styles of weapons are extremely valuable, and the battalion-level armament is far from comparable to the previous platoon-level camps.

There are as many as a hundred plasma cannons.

There are even more powerful lightning annihilation black artillery than plasma cannons.

Thunder light annihilates the black artillery, and even evil creatures at the Yin and Yang level can pose a threat.

However, it takes a long time to prepare each time the Lightning Annihilates the Black Artillery, and the energy cost will make people feel distressed.

Therefore, this thing is generally a shocking equipment, once the thunder light annihilates the black artillery on the field, it also means that the battle has reached a critical juncture.

The position of the deputy battalion commander in charge of military affairs is a fat and scarce one. I don't know how many people are jealous.

There must be an element of the biological operation of the gods in it.

It should be the high level of the Celestial creature that realized the key to Fang Yue's grasp of technology, so he didn't want to offend Fang Yue in this respect.

"Commander Fang, you are here!"

The head of the logistics department in charge of logistics is a somewhat greasy middle-aged man. He has a big belly and a greasy face. The other side nodded and bowed, with an indescribable wretchedness.

But Fang Yue did not underestimate the director of this logistics office.

Most people who don't have the ability to drill the camp absolutely can't do this position.

"Liu Kuan?"

Fang Yue contrasted according to the names on the roster.

"Hey, exactly, exactly."

Liu Kuan nodded repeatedly, his face was filled with flattering smiles.

Every time he receives a new boss, he is always frightened. If he meets a good talker, if it is a dumbfounded and vacated the lawsuit eight hundred years ago, he might be planted on it.

"Don't be nervous, I am not interested in you. As for the bad things about you, as long as it doesn't affect my normal work, I don't bother to take care of it."

Fang Yue waved his hand to show that he was not interested in Liu Kuan's affairs.

Liu Kuan let out a sigh of relief. It seems that this is not an eventful master.

"But I am very interested in the one behind you, I am a little curious, why is there still a Medusa in the arsenal!"

Fang Yue's tone was heavy, his index pointing slightly in the air.

The void shook, ripples spread.

In the shadow of the arsenal, a graceful figure emerged.

The black gauze skirt can't conceal the rugged graceful figure. There was a hint of coldness in the erect pupils.

Her long green hair fell apart, and her long hair could not be automatic, and the phantoms of pythons appeared from time to time.

The Medusa family is considered to be a very widely distributed ethnic group in the world.

Every tribe has a natural talent for petrification.

The royal family of Medusa, the blood in the body is even more comparable to the blood of the earth.

The ground-level bloodlines are already extremely strong in the bloodline talent. Even when Fang Yue was in the Xuanhuang world, some creatures with only the peak bloodlines of the Xuan-level were taken to the sky by the forces behind them and treated them as baby bumps.

"I didn't expect to be able to meet an elector here!"

That Medusa's figure was enchanting, smiling like a flower, and a glamorous face that made Liu Kuan beside Fang Yue sluggish.

This Medusa is born with charming magical powers, and a smile can make people fascinated.

"I can't sense the breath of the caller in your body. Are you not the caller or are there any prices on your body that can shield the detection of forbidden places?"

When the callees meet, they will generally have a sense of mutuality.

This is the case between Fang Yue and Cole, for example.

However, this Medusa was standing in front of Fang Yue alive, and the taboo was that there was no hint of Fang Yue.

This made Fang Yue couldn't help showing a touch of surprise.

The callers walking in this forbidden place shouldn't have an identity shielding item on everyone's body.

"Yeah, I didn't expect you as a newcomer to know quite a lot, but you can rest assured that I am not the elector, or that I am not the elector now!"

There was a hint of playfulness in Medusa's voice.

"In a way, you can call me a stowaway."

Medusa solemnly introduced her identity, and Fang Yue's heart instantly felt not calm.

"Stowaway?!"

Fang Yue held his breath for an instant, and looked at Medusa with his eyes.

Stowaway, the name Fang Yue is no stranger to Chu Yaoyao introducing such an identity to Fang Yue before entering the Forbidden Land.

If it is the elector, a normal citizen in a forbidden place, and each has its own ID, then the stowaways themselves are illegal illegal households.

They enter the forbidden place in various weird forms and are not bound by the forbidden place.

They do not need to complete various tasks to enter and exit the forbidden places at will, and they can even hunt down the callers to obtain the enhancement they have obtained.

However, according to Chu Yaoyao, the number of smugglers appeared very rarely. I did not expect my luck to be so good. The first time I entered the Forbidden Land, I encountered such an arrogant smuggler.

"How about, little brother, are you still afraid? Huh, unfortunately, it's useless for you to be afraid! We stowaways are originally a group of unearned people who hunt and kill the callers, seize your opportunities, and then strengthen ourselves."

Medusa's voice rang in the wind.

Fang Yue's figure became gradually blurred.

"Does a stowaway who have just entered the rotation realm really want to hunt me? Don't be a hunter, but a prey in the hands of others."

Medusa did not panic.

"This arsenal has already been laid out by me, and it is difficult to escape even if you pierce your wings. Isn't Fang Yue? Depending on your performance, in terms of layout, you are really good and very smart. But, can you? I thought that if you became the deputy battalion commander in charge of logistics, there is also a part of the contribution of our smugglers? If it weren't for our help, you would naturally have no problem with the help of the **** creatures. But, you want It's hard to get the fat shortage in charge of military logistics!"

Medusa's voice was calm and confident.

In the arsenal, countless silk threads were intertwined closely, and Fang Yue's figure was forced to manifest under the screaming voice.

Fang Yue's arms and thighs were still burned by silk threads.

Fang Yue fell to the ground, staggering, and there was a trace of hatred in his eyes towards Medusa.

"What is this!"

Fang Yue gritted his teeth, this was the first time he was seen hiding in hiding.

Without using space and heaven, he cannot truly disappear from this world.

What I just performed was just a concealment technique in witchcraft, which allowed the body to merge with the world, and the color and breath reached the same level. It was just a method that was difficult to capture with the naked eye or the spirit.

"This is a unique magical tool of our Medusa clan. There is a net of heaven and earth. Once this thing is unfolded, it can cover a party, and any creatures in it will have nowhere to hide. How about this thing for you! My little pity?"

Medusa's laughter was even more wanton.

In her eyes, Fang Yue is a turtle in the urn.

Fang Yue took a deep breath.

He calmed down his emotions.

"Since there is nowhere to hide, let's fight head-on!"

"Look at the trick, wind sword technique!"

Fang Yue's finger pointed towards Medusa in front of him a little further away.

Whoosh! Whoosh! Whoosh!

Seven wind knives burst out at the same time, splitting into Medusa's body.

"Brother, are you really that cruel?"

Medusa was eager to weep, and looked like a pitiful little girl.

While speaking, the seven wind blades were hovering in mid-air, as if they were eternally solidified.

"Anti-kill!"

Medusa's red lips opened slightly. Two cold characters spit out from her mouth.

Feng Jian rolled back and flew towards Fang Yue's direction.

"broken!"

Fang Yue moved his palm, the same seven wind blades appeared and the wind blades that were controlled by Medusa, but returned, collided, and the two were annihilated.

"What kind of hands-on is this? Can I control my wind blade?"

Fang Yue's eyes involuntarily showed a look of surprise.

This Medusa's hand makes my heart hairy.

If all such methods can be controlled by Medusa, they will return.

Then there is no need to fight this battle.

"Little brother, why, are you fascinated by my beauty?"

Medusa twisted her graceful figure, and had to admit that her figure did indeed have a strong charm.

But in the face of life and death, these all become indifferent.
