

God of Life 1201

Chapter 1201: Lord is rich!

Fang Yue ignored Wang Feng.

It seems that Emperor Qin knows some of his details, otherwise, he would never entrust such an almost impossible task to him.

Well, who betrayed him?

"Don't worry about this, let me prepare first!"

Fang Yue also knew that the two of them must be unable to fight the army of the three princes on the Dark Moon plane.

So Fang Yue began to wonder how to use the smallest price in exchange for the greatest victory.

"Where is the army of these three princes now?"

Fang Yue looked at Wang Feng and asked again.

"do not know!"

Wang Feng showed a helpless look: "If we do not have spies and informants in the army of the three princes, we will not be able to grasp their tracks! I know roughly that they will pass through this ruin. There are two ruins. Two spatial nodes, one of them leads to the Dark Moon plane, and the other is the intersection of the Dark Moon plane, the Earth, and the Sirius plane! This time it comes from that spatial node on the Dark Moon plane!"

Fang Yue could not help grinding his teeth upon hearing this.

This is a fart!

Without even knowing where his opponent was, Fang Yue suddenly wondered if the Emperor Qin looked at him and Wang Feng not pleasing to his eyes, and wanted to take advantage of this opportunity to kill both of them, so he arranged such an unreliable one. task.

"Yun Shan, call that Kardashian!"

Fang Yue glanced at Fang Yunshan, and said in an unfriendly tone.

Kardashian is Fang Yunshan's observer, Fang Yunshan naturally has contact information with her.

When Fang Yunshan entered the ruins, Kardashian also entered the ruins.

Sure enough, Fang Yunshan made a contact. Kardashian appeared immediately.

She does not greet the treasures in the ruins. Although the ruins are full of dangers, they will not cause much harm to her.

Greed and fear are often a person's greatest weakness.

When people overcome greed and fear, wisdom will naturally emerge.

"If you have no desire, you are strong!"

Fang Yue sighed involuntarily when he saw Kai Daishan appear again.

"Yun Shan, are you looking for me?"

Kardashian looked at Fang Yunshan, her eyes suddenly lit up.

This Fang Yunshan, she is quite optimistic, even if she can't become a puppet that she has planted in the earth, she can be cultivated as a goddess.

Fang Yunshan shook his head: "It's not me looking for you, it's my brother!"

Fang Yue walked out and said with a smile: "Fang Yue, this is the first time I met, please take care of me."

With a professional smile on Kardashian's face, she said softly or hardly: "It's nice to meet you, but our Galaxy Bank is a dedicated service. According to the rules, I will only serve Miss Yunshan!"

"That's okay! The rules can be avoided! I am Fang Yunshan's brother, and I can communicate with you on her behalf!"

Fang Yue was not angry because of Kardashian's refusal. Instead, the smile remained the same.

He looked like an old fox, and his smile made Kardys's heart more and more bottomless.

To be honest, Kardashian does not want to deal with Fang Yue, not because Fang Yue is not qualified, but Kardashian can't see through him.

Compared to Fang Yunshan, who was like a swath of clear water, Fang Yue was like a deep pool that could not be seen to the bottom.

Kardashian hesitated for a moment before she said: "You can talk to me about anything, but I won't necessarily answer it!"

"no problem!"

Fang Yue saw Kardashian put on a set, straight to the point.

"The Galaxy Bank is open for business! You won't shut out my big customer, right?"

Fang Yue looked at Kai Daishan, showing a smile but not a smile.

Kardashian showed a surprised expression: "A big customer? Where are big customers?"

In Kardashian's eyes, a touch of disdain came out. Even if the earth was packaged and sold to Galaxy Bank, it would not become their major customer.

The level of civilization here is too low. Nothing before.

"The big customer is right in front of your eyes, don't you see it?"

Fang Yue didn't mind opening Dai Shan's eyes and expressions. If he were replaced by him, he wouldn't be too concerned about the earthlings.

"The star crystal used by the Galaxy Bank is a standard unit of currency. You need to store more than a million star crystals at one time to open an account! As far as I know, this earthling has not yet come into contact with the corresponding forces in the galaxy, so there should be no star crystals in his hands. Exist!"

Kardashian looked at Fang Yue arrogantly, and said with some disdain.

"Xingjing? Are you talking about this kind of thing?"

Fang Yue clipped a white star crystal and shook it in front of Kardashian.

The edge of the star crystal reflects the sun's rays.

The arrogant look on Kardashian's face gradually reduced.

"Star Crystal, you actually have Star Crystal? Is it possible that you have already come into contact with other technological civilization planets in the galaxy?"

A look of shock appeared on Kardashian's face.

Although there are many civilization planets in this entire solar system, all of them are civilization systems of level 1 and below, and they are all on the road of cultivating civilization.

The only earth that follows the route of scientific and technological civilization still belongs to a very primitive age, and it is not even close to the edge of Star Crystal Energy.

Fang Yue took out the star crystal, how could she not shock her?

"Can I open an account with a bank by storing millions of star crystals at once? This is indeed not very demanding!"

Fang Yue said to himself naturally, and then took out ten yellow star crystals and put them in Kardashian's hands.

A star crystal is a hundred-digit currency. One yellow star crystal is equal to one hundred orange star crystals, ten thousand red star crystals and one million white star crystals.

Ten yellow star crystals are equal to ten million white star crystals.

Kardashian saw these ten yellow star crystals, and her heart trembled slightly.

Big money!

Local tycoon!

Landlord!

Kardashian has already labeled Fang Yue.

There are indeed many rich people in the galaxy.

However, there are not many people who can produce tens of millions of star crystals at once, and the purchasing power of this star crystal is quite not weak in the universe.

Ten million Star Crystals can already purchase a small spaceship, leave the earth, and travel the galaxy!

"Why? Can't you open an account?"

There was a hint of teasing in Fang Yue's tone.

Kardashian hurriedly said with a smile: "No problem, no problem! Every customer is our God! Thousands of stars can not only open an account with Galaxy Bank, but also become our distinguished one-star VIP customer. Obtain a specific optical brain from Galaxy Bank, and store or recall the star crystal at any time!"

Kardashian is extremely professional, although she basically doesn't deal with VIP clients anymore.

But every customer manager of Galaxy Bank starts from the bottom.

She is very proficient in this business, and she is still faintly happy in her heart.

The foundation of Galaxy Bank is this financing business. Being able to open a card for an ordinary customer can increase her ten business points.

And her customers who sign up for a one-star VIP level can increase her business points by another 20 points.

This Galaxy Bank's business credits are quite precious, allowing her to exchange for internal resources in the bank, and obtain some resources that the outside world cannot buy with Star Crystal at a low price!

Kardashian looked at Fang Yue's eyes immediately changed, this is a gold master!

You have to be friendly and serve well!

Soon, Kardashian completed the account opening for Fang Yue, and then sent an exquisite watch-like optical brain to Fang Yue.

This year, rich is the uncle, and Kardashian feels that he is dedicated to serving the uncle.

"In addition to the traditional savings business, Galaxy Bank should have other businesses! Such as hiring and killing people, purchasing resources or inquiring about news."

Fang Yue revealed his true purpose.

He doesn't know the whereabouts of this dark moon plane, but others do!

Big banks like Galaxy Bank are all profit-making.

As long as it is a profitable business, they do it all.

"It is indeed a corresponding business, but it requires VIP permissions to open! For example, the resource exchange business can convert common resources into star coins, and then deposit them in the Galaxy Bank, but this business requires a two-star VIP It can be opened! And a two-star VIP requires

a storage limit of 100 million stars! If you are inquiring about the news, general information requires a minimum level of Samsung VIP! And a Samsung VIP requires a deposit of 1 billion stars!"

Kardashian introduced Fang Yue in detail.

The gap between VIPs and VIPs of Galaxy Bank is also huge!

There is a tenfold difference in wealth between VIPs of each star.

And the one-star VIP is not good to say, it is just getting started!

"Only three-star VIPs can buy news?"

Fang Yue frowned slightly and hesitated for a moment.

The number of star crystals in his hand is actually not a lot.

The VIP to the second star is enough, but there is still a gap between Samsung.

"This is 90 million star coins, help me deposit it into my account, I'm not very good at this stuff! I'll be upgraded to a second-star VIP first!"

Fang Yue is another local tyrant.

Kardashian was dizzy when the star coin hit.

This Fang Yue is the real rich man!

He took out another 90 million star coins without blinking his eyes!

Two-star VIP, Fang Yue's value in Kardashian's eyes has increased sharply!

These two-star VIPs are already relatively advanced VIPs, and they can barely enter the circle of the real rich in the galaxy!

However, Fang Yue's pace of upgrading VIP has not stopped.

His optical brain has opened the exchange system for common materials and star crystals.

The price is clearly marked above, and the price of white star crystal and low-grade spirit stone is one to one.

There are not many star crystals, but low-grade spirit stones, Fang Yue has them!

Fang Yue stretched out a finger to cut through the void, and the smashing spirit stones rolled out from it, piled up like a mountain.

This time it was not an exaggeration, but it really formed a veritable hill.

The hill is almost 30 to 40 meters high, and the diameter of the site is more than 100 meters.

Then Fang Yue heard the sound of swallowing saliva.

Tyrant!

Landlord!

Rich people!

This time, Kardashian is no longer the only one shouting slogans.

Wang Feng and others have also joined this camp.

Wang Feng didn't know what star coins were, but he knew the value of spirit stones.

He didn't like the low-grade spirit stone.

But if it is a low-grade spirit stone like a small mountain, even his heart will tremble!

Chapter 1202: Big Tyrant

This Fang Yue is definitely a local tyrant.

The real local tyrant!

He has seen a rich man, he has never seen such a rich man!

"One hundred million lower-grade spirit stones, whether to start the redemption process."

Guangnao scanned the low-grade spirit stone like a small mountain, and quickly gave specific numbers.

"Gudong!"

Wang Feng and the others swallowed. There are so many low-grade spirit stones to buy a lot of good things.

"change!"

Fang Yue made the decision almost without hesitation.

The wealth in Fang Yue's account instantly reached 200 million stars.

Kardashian's charming smile is stronger.

Fang Yue's promotion to a two-star VIP gave her another fifty points of business points.

She already regarded Fang Yue as her lucky star.

As the balance on Fang Yue's account increases, her business points will continue to rise.

Immediately afterwards, Fang Yue created eight more identical Lingshi hills, all of which were converted into star crystals and stored in the Galaxy Bank.

One billion stars, three-star VIP.

Kardashian feels that she is almost suffocated with excitement!

The three-star VIP gave Kardashian a one-thousand-point business credit. Putting it to normal, she may not be able to get such a rich business credit for ten years of hard work!

Fuxing!

The rich man!

Hey, I didn't expect such a hidden local tyrant to exist in such an uncivilized place.

Wang Feng felt that his heart was about to jump out of his chest!

He was considering whether to kill Fang Yue and kill Fang Yue.

With so many spirit stones, even Da Neng will be moved!

Three-star VIPs are already regarded as major customers in Galaxy Bank.

Fat sheep!

This is definitely a fat sheep!

Kardashian suddenly realized that she was so stupid, leaving a big client like Fang Yue not to fight for it, and staring at Fang Yunshan every day.

The most important thing about this little Nizi's body is not his brother Fang Yue.

"Now I can buy news! I want to know where the three princes led the 4.5 million army this time have reached?"

Galaxy Bank, but some VIP discounts.

With Fang Yue's opening, Kardashian immediately began to investigate.

"This news does not involve cosmic secrets. Three-star VIP users can buy it, but if you want to buy the news, you can spend one million stars! And this one million stars cannot pass through yours temporarily. Bank account call. Your Galaxy Bank account must be guaranteed to have a deposit of more than one billion stars for a hundred years in order to continue to enjoy the benefits of a three-star VIP. When the number of deposits in your account is less than this number We will automatically adjust the level according to your actual situation!"

Kardashian looked at Fang Yue.

This is a way for Galaxy Bank to control the amount of user deposits. Storage and lending are the two pillar businesses of Galaxy Bank.

As for other businesses, they are all carried out around these two major businesses.

"no problem!"

Fang Tuhao doesn't care about these rules at all.

During the war, the value of a piece of news is above everything else!

What's more, Fang Yue didn't plan to pay for the purchase news.

The reinforcements that destroyed the Dark Moon plane, their wealth is Fang Yue's!

"Here! This is a million star crystal!"

Fang Yue directly took out a million star crystals and handed them to Kardashian.

Kardashian took a deep look at Fang Yue. This kid actually still has Xingjing. Did he go to a technological plane and rob someone's local bank?

Otherwise, who would bring so many star crystals in idle time?

Kardashian quickly brought out the news about the Dark Moon plane.

The news was brief, but it basically located the basic position of the Dark Moon plane army.

Sure enough, they still did not leave in the Demon Realm.

However, the location of this space node is far from where Fang Yue and the others are now. The position of Fang Yue's spiritual qi clone is farther away.

"Probably if you are on your way, it will take three hours to reach this position!"

Fang Yue dragged his chin to think.

However, this action, he is not the main force!

No matter how strong he is, no matter how awesome he is, he can't do an army of 4.5 million! Even if these people are one person with a mouthful of saliva stars, it is estimated that they can merge into the sea and drown him!

The real main force is the group of people led by the spiritual avatar.

But their distance is farther, and their strengths are uneven. When their army arrives, it is estimated that the Imperial Capital has fallen and turned into a wasteland!

Fang Yue stroked his chin.

"If it doesn't work, let's transfer people!"

Fang Yue gritted his teeth and decided to be cruel.

Reluctant that the child can't catch the wolf, this time it gave the reinforcements of the Dark Moon plane a painful blow.

Fang Yue quickly made an estimate. If the army of the Sirius plane and the army of the Zerg race led by the aura clone went all out to drive on, it would take about a day to reach the current location of the dark moon plane reinforcements.

Without delay, the marching speed of the group of people on the plane of Sirius is almost the same as the reinforcements on the plane of Dark Moon, and it is estimated that they will not be able to catch up to the Emperor Kyoto.

"Li Qingyun led three thousand soldiers to come, assist Fang Yue, and delay the march of the Dark Moon plane!"

Just when Fang Yue was still struggling as to what kind of people he wanted to mobilize.

This Li Qingyun led a large number of people here!

Li Qingyun walked in the forefront, his cultivation realm steadily improved by one level, this is the effect of the blood of the stars, the strengthening of the blood, and the energy emitted can assist the breakthrough of the realm.

Li Qingyun arrived, followed by military pickup trucks behind him.

A car is about twenty people, and three thousand people is one hundred fifty two pickups.

This momentum, mighty and mighty, there is quite a feeling of riding the dust!

Fang Yue grinned and said, "This high-ranking military officer is still conscientious. Knowing that the little master is not easy to do, he has found some helpers for the little master!"

Fang Yue's smile was full.

Among other things, this Li Qingyun's personal combat power is not weak, the level of Yin-Yang realm is enough to hold a strong person in the Dark Moon plane in the Yin-Yang realm!

Kardashian glanced at her, her expression a little unkind.

"Only three thousand people, the average strength is only in the second level of the Heaven and Earth Realm. Even if this team encounters the army of the Dark Moon plane, it will also give away food! Mr. Fang Yue, it is better for you to raise your VIP authority to a four-star level. In this case, you can hire the mercenaries of the Galaxy Bank! The mercenaries of the Galaxy Bank are fighting north and south, crusades in all directions, and their reputation and strength are the first-class level in the universe! As long as you pay the price, let alone delaying these dark moons The guys of the plane, even if they are all strangled, it is not impossible!"

Kardashian started to bewitched.

She acknowledged that Fang Yue, a fat sheep, would be able to squeeze the wool.

The three-star VIP level is no longer low.

But Kardashian has a hunch that Fang Yue is likely to have more wealth in his hands!

This is a gold master who has mines in his hands. If he doesn't dig up the mines in his hands, Kardashian feels that he has been a vain all these years!

"Let's talk about it!"

Fang Yue politely refused.

Fang Yue is insensitive to the help of the Universe Bank. This group of people is a group of vampires. Their eyes only have benefits, not good or evil.

A military situation is so expensive.

It is estimated that tens of billions and hundreds of billions of stars will not be able to make a splash when they are hired.

Can Fang Yue use his own army or his own army? What's more, a genius idea has emerged in his mind!

"How about the speed of your military jeep?"

Fang Yue looked at Li Qingyun and quickly understood the situation.

"The terrain here is relatively rough, and there is almost no flat hardened road. The average speed can reach three to five hundred miles per hour is the limit!"

Li Qingyun said with some embarrassment.

The prospective speed of military jeep will seriously slow down Fang Yue's march.

Fang Yue, Wang Feng and others are strong in the Yin-Yang realm. They really speed up the road, and they don't want to talk about a million kilometers in an hour.

"Take a spaceship! Although it's a bit small, but squeezing three thousand people should be able to put it down!"

Fang Yue pondered for a moment.

Open the storage space.

A 30-meter-long spacecraft immediately appeared in front of them.

The spacecraft has a brand new appearance and is equipped with two defensive laser cannons.

Kardashian was shocked immediately after seeing the spaceship.

She couldn't close her mouth from ear to ear, her eyes widened!

Although she has not seen the model of this small spacecraft, she still understands the basic spacecraft configuration.

This should be a basic spaceship model, the level is not very high, but the problem is that this is a spaceship!

No matter how low the model is, its price will not be less than one billion stars.

Luxury!

Tyrant!

Is this Fang Yue really a native of the earth?

Even the dudes of the big family of the galaxy don't have such a thing as a spacecraft!

Because of this thing, ordinary channels can't buy it at all, even if it has Xingjing!

Fang Yue overturned Kai Daishan's perception of him time and time again.

Seeing Kardashian's surprised expression, Fang Yue asked seriously: "Is the spaceship enough to sell in the Galaxy Bank? If so, I can consider buying ten and eight ships!"

Mercenaries are consumables, so Fang Yue disdains it.

But the spacecraft is the next thing to use. The key is that it can be imitated and manufactured by scientists in China!

Fang Yue believes that the ability of Huaxia people to learn and manufacture, and giving them a spacecraft, is estimated to shorten the development time of Huaxia's corresponding fields for hundreds or even thousands of years!

Kardashian swallowed.

Ten ships and eight ships, what a big deal!

However, Kardashian soon calmed down and said with a smile: "Spaceships are taboo items, and there are generally few places in the galaxy to buy them! Galaxy Bank requires VIP VIPs with more than six stars to buy small spaceships. The price if you do, it usually fluctuates between one billion and three billion stars! If you need it, you can first raise your VIP level to six stars!"

"Six-star VIP? Trillion star crystals? I'll forget about this!"

Fang Yue shook his head and rejected Kardashian's proposal.

If all the messy things on him are counted in, trillion star crystals may not be a challenge for Fang Yue!

But Fang Yue was really worried that the people around him would be jealous at that time and jumped out to kill him, and even his friends would not have to do it!

Kardashian breathed a sigh of relief, not knowing how, she felt a little relief in her heart.

If Fang Yue really rushed directly to the six-star VIP, Kardashian would feel incredible.

After all, even the patriarch of some big clans, the Galaxy Bank, cannot reach the six-star VIP status.

Chapter 1203: Transform the spaceship

"For such a small spacecraft, the people who can sit on the hundred and ten are already headed. There are three thousand people here. Fang Yue will not plan to let them stand on the spacecraft!"

Li Qingyun was surprised at first, and then shook his head.

"Wait, I will remodel the spacecraft!"

Fang Yue got into the spacecraft, then ding-dong, reforming.

Soon, the transformation of the spacecraft was completed!

Fang Yue walked out of the spaceship, dusted the non-existent dust on his body, and then reached out to make a gesture of please, the gentleman said: "It's almost done now!"

"Is it all right now?"

Li Qingyun stepped into the spacecraft with a thought of doubt.

Li Qingyun was stunned instantly!

The interior of this spaceship is unexpectedly a cavernous world, containing a small world.

Although this small world is only about the size of ten football fields, it is more than enough to carry three thousand soldiers.

"This... is this space formation?"

Originally, Kardashian, who had no hope of Fang Yue's transformation, saw the amazing changes in the spacecraft, and immediately widened her eyes.

Mustard Sumeru, this is the most iconic method of space practitioners.

The most widely circulated representative works are storage bags and mustard rings.

However, these methods are only the most superficial use of space. As long as there are materials and a layout method, even a Array Master who knows nothing about space methods can be deployed.

However, this space formation is different. It involves spatial changes and various applications, and the gold content in it is more than a thousand times more than that of storage bags and other means.

The general space formation can only store dead objects, while Fang Yue's space formation can accommodate living people.

People who are not proficient in formations, and who have walked a considerable distance in space and heaven, absolutely can't do this!

And just this is enough to make Fang Yue a sweet pastry in the galaxy, solicited by various forces.

With this space formation, the value of this unremarkable spaceship will also increase sharply.

From the value of one billion star crystals, it will at least increase to the value of two billion star crystals!

Kardashian looked at Fang Yue this time, her eyes became extremely complicated.

This matter must be reported!

I found a super genius who also cultivated the formation of space, heaven and path, and reported it to the Galaxy Bank. After confirmation, she will be awarded at least 200 business points!

Kardashian secretly decided at the same time that even if it was to spend his wealth and display some hole cards, he must keep Fang Yue this time.

Even if Fang Yue failed, he could not die in the hands of the Dark Moon plane.

It would be a shame if such a celestial arrogant fell in the battle between the Dark Moon plane and the earth, this kind of low-level battle!

That's right, the duel between the Dark Moon plane and the earth is a low-level duel in Kardashian's eyes.

This identity determines the horizon.

Who is Kardashian?

She is a staff member of the Galaxy Bank. She has stood on the shoulders of giants and has witnessed countless civil wars.

It was like the battle between the earth and the dark moon plane, in her eyes it was like a child playing house.

How many higher-level civilizations have turned into dust in the tumbling and rolling of history.

What is the battle between the earth and the dark moon plane?

With the spacecraft, Fang Yue's marching speed immediately increased by a level!

Everyone got on the spacecraft, at a speed of up to 3,000 kilometers per hour.

At a speed of about ten times the speed of sound, Wang Feng, who didn't know anything about spaceships, showed a look of consternation.

Is this tin monster so powerful?

It can reach a speed comparable to the ordinary Yin-Yang realm!

About five hours later, the spacecraft met the army of the Dark Moon plane.

This is an hour faster than Fang Yue's previously scheduled speed!

The spacecraft quietly landed in front of a gorge that the Dark Moon must pass.

Fang Yue's purpose is to delay the marching time of the Dark Moon plane, rather than relying on these people, the worms rushed up like a tree, and then they were killed by people like melons and vegetables!

"Probably the vanguard of the Dark Moon plane will arrive here for about half an hour! Wang Feng, Li Qingyun, and you two will assassinate the scout sentry on the Dark Moon plane with me! Others, please install these things for me here Okay, hidden in an inconspicuous place!"

Fang Yue took out hundreds of high explosive bombs.

These high-explosive bombs were snatched from the federal arsenal in the Forbidden Land.

Fang Yue moved an arsenal, and there were so many things in his hand! Now it can be used, and a group of soldiers on the Dark Moon plane can be eliminated without a soldier.

"This thing is..."

Kardashian saw what Fang Yue had taken out, and her breathing became slow.

High explosive bomb.

This thing is universal. Its power rating obviously exceeds the level of the existing thermal weapons on the earth for hundreds of years, whether it is energy compression or explosion energy radiation range control!

The level of high explosive bombs is significantly lower than that of X bombs.

But Fang Yue didn't expect this thing to kill many masters.

Killing a master of the Dark Moon Plane's Innate Realm or a newcomer to the Heaven and Earth Realm, it is considered a meritorious deed.

Fang Yue's goal is to make the soldiers on the Dark Moon plane suspicious and fall into panic!

For three thousand well-trained soldiers, installing these bombs without being discovered is simply a catch.

At the same time, Fang Yue and other three masters at the Yin and Yang level also shot at the same time, robbing and killing the outposts of the Dark Moon plane.

The spies go first.

This is a general rule for any army!

If there are no spies to open the way or timely feedback, the large troops behind have no knowledge of the road conditions ahead, which is equivalent to blindness.

The cultivation level of the outposts is relatively outstanding in the general military. They need to be fast, responsive, and have a strong ability to adapt!

This time, there are more than a hundred spies of the three princes, all of them are powerful men above the rotation stage.

However at some point.

All the spies' news suddenly broke!

The spies of the three armies are all dead!

Mingyue Hou's heart stopped beating suddenly, and a bad premonition just arose.

He arrived at the news that all the spies of the three princes coalition forces had fallen, and they all had the spies' soul jade in their hands.

If the soul jade is complete, then life is unharmed.

When the spies fall, the souls are scattered!

More than a hundred spies fell almost at the same time, and they did not even send out any signal for help.

Who on earth can kill their spies so cleanly and decisively?

There is a thick ominous heart in Mingyuehou's heart!

Allied forces of the three princes, Mingyue Hou is actually the strongest of the three princes!

At the same time, he has the largest territory, and he has also dispatched the most people this time.

For this mission, Ming Yue Hou actually didn't care about it.

The earth is just a savage place, and spiritual practice has just started, and no real veteran master has been born.

Mingyuehou can only hear about science and technology civilization, but we also know that the degree of development of the earth is not high.

If it's high, you won't be so embarrassed by the Dark Moon plane!

However, in this wild earth, what is it that can instantly strangle more than a hundred of them?

These people are all elites carefully selected by all parties!

"Slow down the march!"

Mingyue Hou gave the order that the lion fights the rabbit, and it needs to do its best.

Years of experience in slaying wars made Mingyuehou more cautious than others.

Without the spies always reporting the news ahead, they may fall into the trap of others every step of the way.

"Why slow down?"

After that, Jiuyouhou, who was also one of the three princes, chased up.

He questioned Mingyuehou!

Bright Moon Hou is always dressed as a Confucian student, shaking a feather fan, and holding the winning ticket. In him, you will not experience the killing spirit of many years of fighting on the battlefield.

But Jiuyouhou is just the opposite.

Jiuyouhou was dressed in a black robe, like an unfathomable abyss, and his eyes, like a poor wolf and hungry tiger hung in the jungle of the mountain stream, were always ready to go, ready to kill him!

Jiuyou Hou, Mingyue Hou, and Tianling Hou, the territories of the three marquises who set off this time are adjacent to each other.

The three princes were also ordered to form a coalition army to assist the army that besieged China's capital.

However, the relationship between the three princes is not very good. Neighbors, there are always times when they look at each other.

It is common to wipe out guns and compete for resources.

The contradictions among the three parties are not serious, but this time, when the army of the three princes set off on an expedition, the contradictions gradually surfaced.

It is impossible for the dragons to be headless, and whoever listens to this becomes the most important question.

"The spies are all dead, there may be danger ahead! Slow down to avoid danger."

Mingyuehou's tone is not very good, this is clearly the lice on the bald head.

As long as they are marching and fighting all year round, who doesn't know this basic common sense?

"Huh, the Lord meant to let the three armies rush to the place as soon as possible to converge and give the earth's natives a fatal blow! You slow down the march, this is delaying the military situation, what is terrible about the earth's natives? It's just a bunch of chickens! "

Jiuyouhou and Mingyuehou disagree.

Tian Linghou also rushed here at this time, but he stood by and said nothing.

The three princes, his power is the weakest, and the strength is also the weakest. At this time, speaking less is the way to protect himself.

"The army must not be delayed. Since the spies are not there, use the cannon fodder corps to clear the way.

Jiuyouhou finally decided the universe with one word.

He killed people like hemp, he didn't even care about his own life, let alone the soldiers under his command.

Where are the undead in this march?

In Jiu Youhou's black robe, a pair of scarlet eyes were exposed, like blood, especially infiltrating people.

"it is good!"

Mingyuehou looked indifferent, anyway, it was Jiuyouhou's decision, naturally it was the people of Jiuyouhou who were exploring the way ahead!

Dead, he doesn't feel bad!

By the way, I can also slightly reduce the soldiers and horses under Jiu Youhou.

Chapter 1204: Hinder progress

The army continued on.

It's just that the ranking has changed and changed!

Thirty thousand cannon fodder at the innate realm level lined up.

They became the vanguard!

"Sure enough, the army of the Dark Moon plane has changed the marching order!"

Fang Yue, Wang Feng, and Li Qingyun stood on the cliff.

They watched the advent of the Dark Moon army.

To be honest, they didn't care about this shot.

There are potential rules in the confrontation between the two armies. Soldiers against soldiers, and generals!

Where is Fang Yue like this, as soon as he gets started, three powerful men at the Yin-Yang level conspiracy sentries.

The fall of more than a hundred sentinels, for the coalition forces of the three princes, may have been regarded as wounding their own skin and damaging part of their strength.

But if this matter is discovered, and spread it out.

It will definitely cause very bad negative effects.

"Fang Yue, what exactly do you want to do? Even if there is no sentinel, it won't make these people on the Dark Moon plane feel jealous."

Wang Feng persuaded him to speak up.

"This marching war is about losing or not losing! Even if our army is wiped out, we can't violate the rules of the battlefield. If you do this, you will be laughed at!"

Wang Feng counted the number of wars he had experienced before his recovery, hundreds of times that of Fang Yue and Li Qingyun.

The so-called soldier versus soldier, general versus general concept is deeply ingrained in his mind.

Wang Feng felt very guilty. How could he, a powerful man in the Yin and Yang realm, attack the whistle of the rotation realm?

"I think that the birth and death of an ethnic group is stronger than individual glory, not to mention that the situation you mentioned was only when the two armies were in frontal conflict! Now, can we be called an army? Thousands of people regret the army of millions?"

Fang Yue pointed to the Chinese soldiers who were desperately looking for a place to hide their shadows beside the canyon.

Wang Feng was suddenly speechless.

What Fang Yue said seems to be no problem!

But Wang Feng just felt something was wrong in his heart.

Fang Yue continued to say patiently: "As the saying goes, soldiers are not tired of deceit and marching in war. What is most needed is strategy. My method just now is only one aspect of strategy. A general who knows how to use strategy can be regarded as a truly qualified general. general."

Fang Yue took out his own set of theories, but he was flickering.

In fact, Fang Yue did not treat the rules of the battlefield as the same thing as the so-called glory.

When he was overtaken by the Yin-Yang realm powerhouse on the Dark Moon plane in Jingnan, he didn't feel that the people on the Dark Moon plane knew what battlefield rules.

Fang Yue's doing this was nothing more than a tooth for a tooth. What's more, Fang Yue was born as a small nail house, earning the meager allowance every day.

What is the face?

Can it be spent?

If possible, it is estimated that Fang Yue had already spent things like face!

Wang Feng looked at Fang Yue. Although this was a bit weird, it really seemed to make sense.

"Then what are we going to do next?"

Wang Feng is eager to try.

Originally, for this level of war, the strong at the Yin-Yang level usually stood on the platform.

Sometimes, all the people under him died.

They may not really be able to make a move, the strong of Yin-Yang realm, if they don't make a move, once they make a move, the world will break and the stars will shatter.

This time, he finally had a chance to take action personally during the war, and Wang Feng's quiet heart suddenly became active.

It seems that Wang Feng is also a standard warmonger!

Fang Yue couldn't help laughing when he saw Wang Feng's appearance.

"Wait for the show, it's not yet time for us to play!"

The cannon fodder of the 30,000 Innate Realm level reached the center of the canyon, and their expressions became solemn and cautious.

This is a strategically important place, if the other party really has an ambush, it will definitely be here.

The canyon is very narrow, and only a dozen people can pass side by side. If you set an ambush here, you will definitely be one man, and you will never open it!

Vigilant.

Whoosh whoosh!

Rapid arrows sounded in the wind.

The white bony arrow burst out of the air, piercing the necks of the ten cannon fodder on the dark moon plane of the innate realm in the front row.

In front of the canyon, a team of skeleton archers broke out of the ground, only twelve in total.

These twelve skeleton archers are all at the level of heaven and earth.

Their realm is not high, but they are infinitely powerful and tireless.

This team of skeleton archers was naturally summoned by Fang Yue.

The "Death Scripture" he cultivated is definitely the ancestor of the undead summoning a line.

On the ground, a layer of corpses spread out.

The gurgling blood flowed continuously on the ground.

Fang Yue's face was full of iron and indifferent expressions.

This is just the beginning, a prologue!

A row of congenital cannon fodder fell, and then the second row rushed forward.

To be precise, they did not rush up, but were pushed out by teammates behind!

The army of three princes is really too many.

A large number of people is of course the advantage of a large number of people, but there is also a great disadvantage.

That is easy to crowd, especially in narrow places like canyons.

As long as you start to move forward, you are bound to be unable to stop.

Ten people fell, and the ten people behind them had not had time to react, and the second wave of arrows struck again.

The icy arrow pierced the second wave of throat accurately.

The gurgling blood flowed out and dyed the ground red!

The twelve skeleton archers cooperated in an orderly manner, ten were responsible for releasing arrows, and two were responsible for filling positions.

They cooperate with each other and try their best to ensure that no fish will slip through the net.

The death of twenty cannon fodder at the Innate Realm level in succession did not bring any pressure to the advancement of the entire team.

The army of the Dark Moon plane stepped on the corpse of their companions to move on.

There was no trace of sadness or hesitation in their eyes.

The moment they became cannon fodder, they understood their fate.

Killing, or being killed, if you cannot break through, you will eventually become the most inconspicuous corpse on the battlefield.

The bony arrows fell like rain.

Pieces of cannon fodder from the Dark Moon plane at the Innate Realm level fell.

But their team is always in the foreground, using the bodies of their companions as their flesh and blood shield.

The long and narrow passage is not very long, only ten meters away.

The army of the Dark Moon plane died with hundreds of cannon fodder at the level of innate realm, in exchange for the way forward in the ten-meter canyon.

A large number of innate cannon fodder from the Dark Moon plane rushed out from it, brandishing all kinds of weapons in his hands, and charging towards the twelve skeleton archers.

They are not afraid of death!

Death is their destination.

Even if the opponent is higher than their own realm, even if the opponent holds a sharp blade, they still rush forward without hesitation.

Hundreds of people rushed out of the narrowest passage in the canyon, and many more were constantly running outward.

"it's time!"

The corner of Fang Yue's mouth suddenly turned up with an evil smile.

A figure hidden in a black robe slowly walked out behind a huge rock beside the canyon.

His body exudes the rancid stench of a corpse, and he also has a staff made of animal thigh bones in his hand.

The staff dropped.

The body on the ground exploded!

All the energy in the corpse was released at the instant of explosion!

"Lich, corpse burst!"

Wang Feng witnessed the war before him.

The numbers on both sides are extremely asymmetric!

But with the help of geographical advantages and previous surprise plans.

But it immediately achieved great results.

The explosion of hundreds of innate corpses caused the cannon fodder limbs of the Dark Moon plane that just rushed out to fly across.

Ninety percent of them fell into the eternal dark death.

There was a moment of silence in the entire battlefield!

It's not that the cannon fodder of the innate realm is afraid of death, but the movement just now is a bit too big.

Even the earth trembled slightly.

Take advantage of this gap.

The skeleton archer harvested another wave of innate cannon fodder from the Dark Moon plane.

The cannon fodder on the hundreds of Dark Moon planes that had just rushed out became very few.

They fell into the same predicament again.

Need to re-rush out of the narrow canyon!

"It only took a while, the cannon fodder of the Dark Moon Plane's innate realm has already died for thousands!"

Li Qingyun's eyes lit up.

This Fang Yue really has something in war.

Without paying any cost of casualties, just using a canyon channel is to cause the Dark Moon plane to lose thousands of soldiers.

Although it is only the cannon fodder of the Innate Realm, it is already quite rare!

"Huh! Little bugs, what are your teeth?"

On the Dark Moon plane, dozens of practitioners of the heaven and earth realm level rose into the air, wanting to cross the air and attack the skeleton archer and the lich.

"Bang!" "Bang!" "Bang!"

The sound of dull sniper rifle sounded one after another.

Following this, those strong on the Dark Moon plane fell from the air like a kite with a broken line.

Every shot is a hit!

No bullets were shot.

This is not like a war, more like a pre-rehearsed slaughter.

The soldiers brought by Li Qingyun, although their own cultivation base is not high, but they are extremely skilled in the use of thermal weapons.

Fang Yue provided each of them with a sniper rifle returned from the Forbidden Zone.

The ordinary bullets of this sniper rifle can kill the creatures below the peak of the ordinary heaven and earth realm. If it is used with armor-piercing bullets, even the strong in the rotation realm will not be spared.

The skeleton archer's arrows were quite stable, and they kept harvesting waves of cannon fodder on the narrow canyons of the Dark Moon plane.

"Rhythm, this is the person who has mastered the rhythm of the war in the legend! He anticipated everything to happen, and then interlocked, making the Dark Moon plane completely plunged into the quagmire of death!"

Kardashian's eyes lit up.

Although Fang Yue's this was only a starting style, his power had already initially appeared.

On the ground, the corpses of soldiers on the Dark Moon plane are his greatest feat!

In the galaxy, there has never been a lack of war, and an excellent commander is also extremely sought-after.

Especially since this commander is still a Necromancer, he can summon thousands of troops and horses, which greatly consumes the opponent's strength.

"Two thousand!"

Li Qingyun secretly calculated the number of casualties on the Dark Moon plane.

In just a short time, the cannon fodder on the Dark Moon plane had already lost as much as two thousand.

Chapter 1205: Confrontation

Since fighting against the Dark Moon plane, the Earth side has always lost more and less victory.

Even if it is a victory, it is a miserable victory.

When did they raise their eyebrows so much and completely grasp the rhythm of the war in their own hands.

Reaping the creatures of the Dark Moon plane is like reaping straw.

He should record this scene to boost the morale of Chinese soldiers.

"Meet a master!"

The look of Mingyue Hou behind the army was slightly solemn, his spiritual consciousness was covered, and he had a clear view of the battle on the narrow canyon.

Although the sacrifice was nothing but cannon fodder, his ability to plan strategizing and control the battle situation of a thousand miles made him feel shocked.

Every step of their way was calculated and refined by the other party, and they took advantage of the situation to lay out and slyly kill.

"Master? What kind of master, it's just a few cannon fodder that killed us, like this innate cannon fodder, in the territory, I want to convene as many as I want! This kind of little trouble is destined to not become a big climate! "

Jiu Youhou said with a sneer.

Since letting the 30,000 cannon fodder clear the way, Jiu Youhou has not prepared to let these cannon fodder come back alive. They are pathfinder stones and the most humble chess pieces.

"Listen to my orders, speed up the march, break through obstacles, and strangle the enemy!"

Jiuyouhou's call immediately accelerated the speed of the cannon fodder!

They charged forward desperately, completely disregarding their own casualties!

Waves of arrows are harvested, one batch is dropped, and then another batch stands up.

They went forward and succeeded, with a steady stream of numb expressions on their faces, and regarded death as their lifetime destination.

With the casualties of cannon fodder in front, the whole team slowly moved forward.

After sacrificing nearly the cannon fodder from the Innate Realm of the Dark Moon plane, they finally rushed out of the narrow channel again.

"Light cut!"

In order to avoid repeating the same mistakes, in the cannon fodder army on the Dark Moon plane, a beam of dazzling light lifted into the sky and turned into a small sun, which was scattered with radiant light.

The twelve skeleton archers were shrouded in light and the ice melted and the snow melted. This power of light can purify all darkness, the power of death.

This is attribute mutual restraint, if the power of darkness and the undead is stronger, the power of light will also be restrained.

The game set by Fang Yue was cracked, however, there was no surprise on his face.

Originally, this was an appetizer, and it was an unexpected surprise to be able to kill so many cannon fodder from the Dark Moon plane.

"Small vultures, the people on earth have this ability!"

An arrogant look appeared on Jiu Youhou's face.

His pride has not disappeared.

With a bang, a cluster of mushroom clouds appeared as revenge!

This mushroom cloud appeared behind the cannon fodder army, and what exploded was his main army.

The radius of 100 meters was covered, and the high temperature directly melted the soldiers of hundreds of heaven and earth level, becoming a cloud of history.

"Bold!"

Jiuyouhou roared, letting go of his divine consciousness, and wanted to search for the location of this earthling.

However, his spirit has not been released too far.

The dizziness caused Jiu Youhou to withdraw his mind.

He was shocked to find that his spiritual consciousness had been weakened by more than 30% in a short period of time.

"What's the situation? Why is my spirit so weakened!"

Jiuyouhou's face is full of frightened expressions. This physical injury is easy to treat, but the divine consciousness is injured, which is quite serious. The general pill can hardly restore divine consciousness, and can only be accompanied by As time goes by, self-healing slowly.

This will have a great impact on his cultivation.

Jiu Youhou never thought that he would encounter such a dangerous situation on this earth that he thought Yima Pingchuan was like his own backyard.

"This is Mie Shen Gu, a rather special terrain, specifically for Divine Mind. As long as Divine Mind will be devastated immediately and soon."

Mingyue Hou Youyou said.

Normally, Jiuyouhou only knows how to be brave, and simply dismisses all kinds of miscellaneous books.

Mingyuehou had already seen the peculiarity of this place.

But he didn't even want to remind Jiu Youhou that since they were not in harmony, even if they formed an alliance temporarily, he would not be such a good person.

Because Mingyuehou knew that even if he was reminding, this Jiuyouhou would not listen, let alone appreciate him.

If you don't listen, why are you reminding?

It's better to see that Jiuyouhou suffers.

Hundreds of elite warriors at the heaven and earth level were killed under his nose.

For Jiuyouhou's millions of army, it is actually not even damage to the fur.

But this is tantamount to slap him, which is a shame for him.

"The little mouse hiding in the dark, don't let me grab your tail, otherwise, I will make you unable to survive or die!"

If Jiuyouhou was crazy, his anger rushed into the crown, and he vowed to arrest the earthling who had conspired against him.

"The enemy is in the dark, we are in the light, you should be careful!"

Mingyue Hou frowned slightly, he had long heard that Jiuyouhou was crazy and bloodthirsty.

But never thought that this guy is so irritable.

The enemy is dark and I know, this time the most need to consider long-term, find the trace of the opponent.

Then slowly figure it out before you can exchange the least cost for the greatest result.

Crazy like Jiuyouhou would only fall into the rhythm and trap of the opponent.

But Jiuyouhou didn't listen to this at all.

"As long as the other party has a thousand tricks, I will crush him to death with absolute strength!"

Jiuyouhou's voice just fell.

The front of the canyon reappeared.

The figure of the skeleton archer appeared again, but this time it was not twelve, but a hundred!

A hundred skeleton archers, with all arrows.

The white arrow swished through the air.

It was another cold harvest.

The cannon fodder that had just rushed out of the narrow belt of the canyon all fell to the ground, becoming icy corpses.

This time the skeleton archer is more advanced than before.

Their arrows are no longer purely physical attacks. On top of the arrows, there are special effects such as flames, freezing, and lightning.

Not only that, these skeleton archers also mastered multiple arrow methods, each time the bowstring was pulled, they shot several or even dozens of arrows.

These skeleton archers were wiped out, not only did not weaken, but stronger.

In this wave of slaughter, a full two thousand cannon fodder at the innate realm level fell.

Immediately afterwards, I didn't know from which horn came ten Liches of Heaven and Earth level.

Ten liches simultaneously used deadly poison.

Those corpses with abundance of cannon fodder at the congenital level that fell on the ground quickly withered, and all turned into skin and bones.

The green corpse poison became a haze.

These corpse poisons possessed a strong corrosive power. Suddenly, a violent wind blew the corpse poison into the cannon fodder of the congenital realm that had not rushed out of the canyon.

Pieces of people and horses fell like wheat.

In front of the corpse poison, they had no resistance at all, and their flesh corroded, and soon became puddles of pus.

This time it was the creatures on the Dark Moon plane, and the deaths in a large area were as unstoppable as the plague, spreading freely.

"At least tens of thousands of innate creatures have become pus under this corpse poison. Although their cultivation level is not high and cannot pose a fundamental threat to the earth, ants have killed elephants and kept them alive. For the earth, it's not a good thing. Even if Fang Yue's reinforcements to stop the Dark Moon plane failed this time, he made a great contribution. He wiped out more than 10,000 soldiers on the Dark Moon plane and weakened it to a certain extent. The strength of the army on the Dark Moon plane."

Li Qingyun said to himself, his eyes gradually lit up.

Fang Yue is a man who can create miracles. He doesn't believe that Fang Yue's methods will stop here.

This is just a prologue, but it is a good start.

Jiuyouhou's face was completely green this time.

The people on this earth are too insidious, obviously the mastermind is still behind the scenes, and his soldiers have fallen one after another!

If he is completely retreated by the opponent, and his men suffer heavy casualties, this will be an unprecedented fiasco in his personal history.

Fang Yue stood above the canyon, his expression still serious.

He was not proud of killing some cannon fodder from the Innate Realm. This loss was already insignificant for the trilateral vassal coalition on the Dark Moon plane, which claimed to have an army of 4.5 million.

The next plan is the big meal, everything just now is just an appetizer.

"Kill me! Kill, kill, kill! The people in the thirteenth squad are responsible for killing these skeleton archers. If you don't believe them, they will continue to kill, the more you fight!"

Jiu Youhou was roaring crazily, even with a hint of hysteria, his eyes were red and bloodshot, and his body was full of murderous aura.

The thirteenth team led them, and they escaped underground and rushed out of the narrow canyon.

The thirteenth team is an elite team carefully cultivated by Jiuyouhou. Although the number is small, there are only a few hundred people, but each member of the team is of earthly blood and physique! They are proficient in the earth escape technique, and they come and go silently. Every member of the

team is a powerhouse at the rotation level. In order to train them Jiuyouhou, it can be said that they have spent their money!

In front of more than a hundred skeleton archers, all the members of the thirteenth team appeared, and they all looked at Fang Yue with expressionless and numb faces.

"kill!"

The leader of the thirteenth team spoke.

His voice was cold and serious, without any hesitation.

"Finally caught a big fish! Burst me!"

In Fang Yue's throat, a burst of words yelled.

The silhouettes of more than a hundred skeleton archers were blurred and turned into strands of black smoke, returning to the illusory underworld.

At the same time, a beam of white light from the ground rose to the sky and gradually expanded. In the end, the white light enveloped everyone in the third team in the city.

After a while, everyone in the thirteenth team was annihilated in the white light and turned into ashes.

When Jiuyouhou saw this scene, his eyes were cracked.

It's been calculated again, those skeleton archers are just bait.

X bombs had long been buried under their feet, and Fang Yue was worried that the power was not enough, so he buried five of them!

Jiu Youhou felt something stuck in his throat, couldn't spit out the slightest sound, and his heartbeat became no longer normal.

Even the light in a pair of eyes gradually dimmed.

Chapter 1206: Face slapped

This time, he was truly calm.

On the thirteenth team, how much effort and resources he spent, even at this time, even Jiuyouhou, the payer, couldn't measure it.

The thirteenth team was so quietly killed by others, making him really unwilling.

But even if you are not reconciled, what can you do?

But what can you do even if you are unwilling?

One of his elite teams was destroyed, and he has not even seen a single hair of his opponent until now.

Who played the black hand?

Now Jiu Youhou's heart was eager to hide the man behind the scenes who had been hiding in the dark and commanding the earthlings to make trouble for him.

Fang Yue let out a sigh of relief. Five X bombs exchanged the lives of hundreds of Darkmoon Plane Rotation Realm powerhouses.

This deal is a bargain!

Fortunately, there is a strong person in the Rotational Realm of the One Hundred-Lai, if those five X bombs killed dozens of cannon fodder in the Innate Realm, then his just effort would be useless!

"This is the X bomb? This thing is definitely not something the earth can produce! If the earth can make this kind of thing, at least it can enter the sequence of quasi-tech first-class cosmic civilization!"

Kardashian's complexion kept changing.

Where did Fang Yue come from? His breath is definitely a native of the earth.

It was something that was taken out, and it didn't look like an indigenous person at all.

At this moment, Li Qingyun was also stunned.

This Fang Yue is too powerful!

What good things does he have on hand? The level of this weapon has exceeded the current earth for at least hundreds of years.

The destruction of an elite squad made Jiuyouhou also become cautious. It was not that he wanted to be cautious, but that it would not work if he was not cautious!

The calculations of this Earthman who secretly ambush are really too powerful.

If blindly impulsive, it is very likely to fall into his trap and cause greater losses!

"Almost there! Time to retreat!"

Fang Yue said meaningfully, he was here to delay the march of the Dark Moon plane, not to kill the enemy.

Conspiracy this kind of thing, by surprise, use it once or twice, the effect should be fairly good.

If you use it too many times, it is easy for people to develop a defensive heart. Once the other party is prepared, the conspiracy will not work.

After receiving Fang Yue's order, everyone immediately took the spacecraft to leave. Fang Yue had already detected a lot of dangerous places on the way. Even if the army on the Dark Moon plane doesn't damage the soldiers and soldiers, they must cup the bow and snake shadow to scare their courage.

Fang Yue has retreated.

The coalition forces of the three princes have gradually stopped. They slowly explored, and they are no longer rampant as before.

Another batch of cannon fodder at the innate level rushed out of the canyon.

This time, without any obstruction from the skeleton archers, they went very smoothly.

"The crisis is over?"

Jiu Youhou saw the cannon fodder at the innate realm level safe and sound.

His heart was half down.

He just said, these humble aboriginals of the earth, the bugs in the ditch, dare to make such a painless conspiracy!

"The army is out!"

Jiuyou Hou Changxiao said.

The mighty army passed through the canyon.

"Did Mingyue Hou see it? This is our enemy, as timid as a mouse, it's not worth mentioning."

Jiuyouhou said carelessly to Mingyuehou, as if it was not him who had suffered a loss just now.

Mingyuehou glanced at Jiuyouhou.

"I think it's better to be careful! According to my observations, this secretly dormant earthling is thoughtful and very spicy. Don't fall twice in the hands of the same person!"

"No! Who is my Jiuyouhou? The platoon is a genius-like figure, with great military exploits, and the dark moon is famous. Maybe, this time, the people on earth knew that I was here. That's why we sent out such a young generation to delay the marching speed of our waiting, so we should work together inside and outside to conquer the Chinese Imperial Capital! It's a pity that they made the wrong calculation. How could my Jiuyouhou be given such a little difficulty Intimidated?"

When Jiu Youhou spoke, his brows were excited.

The more he brags himself, the more he feels that this earthling is afraid of him, so he sent someone to delay his footsteps.

If you think about it this way, the loss just now doesn't feel distressed anymore!

Just at this time.

boom! boom! boom!

There were violent explosions one after another.

Jiu Youhou's face was instantly white.

Face slapped, face slapped!

Just out of the canyon, his army bloomed again.

This time it was a high-explosive bomb installed by Fang Yue's soldiers.

These high bombs are relatively scattered, and the number is quite large, at least two thousand have been exploded.

Some are within the range of the cannon fodder regiment, while others are within the range of elite fighters in the world.

Every high-handed bomb will at least cause dozens or even hundreds of casualties.

The location of the explosion center, the energy density is extremely high, even the strong in the world will be killed, and within the radiation range of the explosive power of the surrounding bombs, there will be heavy casualties, and the entire army will not be destroyed, but the survivors are also suffering. Serious injuries will delay the marching speed of the entire army!

According to preliminary estimates, the explosion of more than two thousand high-explosive bombs caused Dark Moon to lose more than 10,000 men and horses, causing serious injuries to seven or eight thousand people!

This is a slap in the face!

This Jiuyouhou took a bite of a young man, and took a bite of the bugs in the stinking ditch.

As a result, he fell into the hands of people he dismissed again.

This level of loss made his chest explode!

"Don't let me catch you! Otherwise, I will let you shatter your body!"

Jiuyouhou screamed, and even his breathing became completely heavy.

After another set of twists and turns, the army of the dark moon plane that had been bombed by Fang Yue and was about to become nervous, slowed the marching speed by about 30%.

They were walking on thin ice, trembling.

Whether this can arrive safely is already ranked second.

If it goes on like this, the ghosts under the castle who really come to the Imperial City know how many people will be left!

"I lost almost 30,000 horses!"

Even if it is cold-blooded like Jiuyouhou, I feel blood dripping in my heart.

Population is their greatest wealth. Production, military, construction, and other territories are supported by the development of their territories, all based on population!

The next march of the army on the Dark Moon plane is extremely difficult. If you don't know where to go, there will be high-explosive bombs and bursts.

Their marching route has been thoroughly mastered by Fang Yue.

There are ambushes everywhere, traps everywhere.

In some dangerous places, there will be evil ghosts, dragging away a few injuries, or there are some weird things that cannot be prevented, and the elites of the Dark Moon plane will be dragged away alive.

After a mere thousand kilometers away, the army of the Dark Moon plane was exhausted physically and mentally, and their breathing became heavy.

The army that was originally full of morale has now become a weary division.

During this thousand kilometers, the coalition forces of the three princes on the Dark Moon plane have reduced 200,000 troops.

They wander in various traps, and various bizarre ways of death will appear.

The army of 4.5 million has become a number of 4.3 million.

Their marching speed was about half slower than before.

In this army, everyone is in danger, and even the strong in rotation are hard to escape.

The cannon fodder is the part of the people with the best mentality, anyway, they came with the belief that they will die.

If you can go back alive, even if you make money, if you die, that's normal.

At this moment, Jiuyouhou no longer had the arrogant look he had before, he became cautious and suspicious.

Once he stepped on an X bomb, the bomb exploded, and the armor on his body was burned out and cracked. If he hadn't reacted in time and dodged, even if he was as strong as him, he would suffer a certain amount of trauma!

"Damn fellow, don't let you appear in front of me, otherwise, I will let you know what is better than death!"

The ears of Jiuyouhou's howling reinforcements were almost puffed up.

This Jiuyouhou was ambushing this once.

But so far, he has not even caught Fang Yue's hair.

This Jiuyouhou roared no one hundred times, right?

Isn't he tired?

Do you want to take a break?

This Jiuyouhou is not tired, all three armies are tired!

But after this dry roar, a lonely figure appeared in front of them.

Fang Yue's puppet **** stood silently in the wind and sand, and there was a hint of coldness on his cheeks.

Hengdao immediately, face the enemy from all directions!

For some reason, even the soldiers on the Dark Moon plane felt a sense of desolation and coldness in their hearts.

"This Fang Yue is crazy, didn't he just say to ambush? Why did he stand up on his own initiative!"

In the beginning, it was nothing.

However, after the enemy troops on the plane of the 200,000 Dark Moon fell, Li Qingyun had gradually realized the advancement of Fang Yue's ambush travel tactics.

The people of this dark moon plane come from a world of pure practitioners.

They have not even touched the lowest level of technological civilization.

For high-tech weapons, they couldn't find a way to deal with it for a while, which resulted in the army of these dark moon planes only being able to fill the technological gap with their lives.

The army of a full two hundred thousand dark moon planes was destroyed, what a great battle feat.

Before that, Li Qingyun couldn't even think about it.

Following this rhythm, when the army of the Dark Moon plane leaves the ruins, at least five to six hundred thousand people will be lost. Moreover, their marching speed will at least be reduced, and the task of delaying reinforcements on the Dark Moon plane can also be successfully completed.

And why is Fang Yue running out at this time?

Do you want to ruin the great situation?

"Don't you want to kill me, Jiuyouhou? Come now! The little master is waiting for you here!"

At Fang Yue's feet, there was boundless yellow sand. A playful expression appeared on his face.

Faster than expected, the army of the Sirius plane and the army of the Zerg have arrived!

He finally has the capital for a decisive battle with the reinforcements of the Dark Moon plane!

Chapter 1207: Five Elements Knife

The men and horses on the Dark Moon plane were indeed strong, but they were all stubborn, declining, and exhausted, and they had reached a period of exhaustion at this moment.

Now their true combat power is probably less than 80% of their heyday.

This is the most appropriate time for a big battle.

"Boy, do you dare to show up?"

Jiu Youhou couldn't help being furious. What was shocked was that he thought that the mastermind behind this earth was behind him, so he could put a cold arrow behind him. Unexpectedly, he actually showed up and stood in front of him.

Angrily, his Jiuyouhou's prestige is so great, he is not afraid, does this guy not put him in his eyes?

"Pray for a battle before the three armies!"

Fang Yue didn't talk nonsense, just called Zhenzhen.

This is called a formation. According to the rules, the opponent must respond.

Soldiers against soldiers, against generals!

Before the two armies clash, it is normal for the generals to fight.

If the Lord will fall, it will be convenient for the dragons to have no leader.

At that time, it can be defeated in one fell swoop, effortlessly.

But Jiuyouhou looked at Fang Yue, but hesitated in his heart.

This guy was so shrewd and insidious just now, strategizing, would he now confront them head-on?

However, after pondering for a while, Jiuyouhou still stood up, their army was on the side, 4.3 million people, and Mingyuehou and Tianlinghou were standing for him, he was not afraid of this guy tossing out any tricks!

When Jiuyouhou walked out, the surrounding sky was shaking. With a spear on his back, he stepped through the void step by step, and his black robe violently danced in the wind.

There is no expression fluctuation on Jiu Youhou's face, he is unsmiling, his eyes are as deep as water.

The Jiuyouhou entering the fighting state is different from any time before. He respects any opponent, and will not despise the opponent because of his weakness and youth.

He has absorbed the previous mistakes and realized that because he underestimated the enemy, he almost made a big mistake, so he was very cautious in every step. His perception was all over his body, and he was wary of ambushes. All the disturbances would be reflected in his mind!

"As a prince, stand with you personally, boy, your face is big enough!"

Jiu Youhou looked at Fang Yue, and a wave of expression appeared on his gloomy face. His eyes looked at Fang Yue with complicated light.

"The earth is dead after all. Are you willing to devote yourself to my command and become a soldier of the Dark Moon plane? Although I can't guarantee your prosperity and prosperity, and your life safe, at least, in the dark moon plane camp But it is much safer than the earth! Even if the earth can still survive, it can survive several catastrophes. The seal of this space is about to open, and the strong of the leader can come. In the earth, there are several strong of the leader. Can you compete with the Dark Moon plane? Isn't it a one-sided slaughter in the end? I pity you as a talent, and I hope you can become my deputy. Don't let down my ardent hope for you!"

At this time, Jiu Youhou had the idea of Ai Cai, and wanted to recruit Fang Yue and accept him as his subordinate.

Fang Yue couldn't help being speechless. This Jiuyouhou's heart was really big enough. After suffering such a big loss under his hand, he still had the intention to recruit him, but Fang Yue did admit that this Jiuyouhou was born. A big mind is better than many famous generals on earth.

"Thank you for the love of Jiuyouhou. Fang Yue knows he is not talented. I am afraid that he will live up to Jiuyouhou's high hopes. In this battle, Fang Yue knows that it is very likely that he will hit the rock with a pebble and will eventually die on the battlefield. In battle, even if you die in battle, you will die well!"

Fang Yue's words were sonorous, without the slightest hesitation or hesitation.

His voice fell, and Jiu Youhou couldn't help but sigh softly.

"If this is the case, let's fight! I want to learn how the indigenous people born in the earth will cultivate to the level of Yin and Yang realm!"

Jiu Youhou glanced at Fang Yue.

"Since you are a junior, then I will let you three tricks, lest you get killed by one of my tricks, and you will cry when you get to the underworld, saying that you have been killed by me before you make a move!"

I don't know if it was Fang Yue's compliment that caused Jiu Youhou's arrogance to rise again and become underestimated, or whether Jiu Youhou really wanted to see Fang Yue's fineness.

Jiuyouhou asked Fang Yue to take the first step to see what kind of waves Fang Yue could make.

"Then offend!"

Fang Yue cut out suddenly.

This knife is extremely simple, but in the light of the knife, the five elements change, cycle endlessly, and the five elements grow together. As Fang Yue's sword becomes stronger and stronger, there is a taste of wanting to tear the world and destroy the ten directions!

"Senior laughed. This is a five-element knife that the younger generation has thought about. The knife contains the five elements and has five powers. The power of the five elements is endless. In the knife, it will derive its own domain and give birth to its own world! Trapped in it, maybe even some of the seniors in the Yin-Yang realm who have been famous for a long time can't get out of it smoothly."

Although Fang Yue smiled, in his smile, Jiu Youhou felt a chill that deepened his bones.

This style is very strong just by hearing Fang Yue's introduction.

The five elements grow together and form a world of its own.

The rules and principles contained therein are not complicated, but they are difficult to crack.

"Ming Yuehou, do you think Jiuyouhou will lose?"

Behind the coalition forces on the Dark Moon plane, Tian Ling Hou asked Ming Yue Hou. He did not deliberately lower his voice, nor was he afraid that Jiuyouhou would hear it.

In fact, the real individual strengths of the three marquis are not very different.

It's just that Tian Linghou is relatively low-key, he rarely has surprising deeds, and his chassis is the smallest of the three marquis, everyone thinks that he is in a relatively weak position among the three marquis.

But in fact, this is not the case.

Mingyuehou had a little understanding of Tianlinghou before.

The route taken by Tianlinghou was different from the usual route in the Dark Moon plane, and his contacts were the most extensive among the three marquis. He is very knowledgeable and has profound research accomplishments in many fields.

Although the cultivation base is low and the territory is less, this does not affect the strength of Tian Linghou.

Mingyuehou once heard that this Tianlinghou had run the formation ten years ago and defeated an old demon at the pinnacle level of the Yin and Yang realm. In the end, the old demon fled, and probably did not escape Mingyuehou's palm. , Was finally caught alive by him.

If this news is true, then the true strength of this Tianlinghou would be quite terrifying.

And at this time, Tian Linghou had chosen such a sensitive time to speak on such a sensitive topic, so Tian Linghou had to doubt his intentions.

"Undefeated, you and I know the strength of Jiuyouhou. Although he has not yet reached the ninth level of Yin and Yang, he has reached the peak of the eighth level of Yin and Yang. He has fought on the battlefield all the year round and he was born to death. , I have mastered a lot of amazing methods in life and death trials again and again! In terms of trump cards and strength, I think Jiuyou Hou is better than most of the prince-level powerhouses on the Dark Moon plane! Fang Yue is just a barren number A humble native on the thousand-year-old earth, even though there are some calculations, it is impossible to defeat Jiuyouhou head-on!"

Mingyuehou's words were half true, and the more he thought about it, the more frightened he became.

What does it mean that Linghou said this at this time?

The real crisis does not come from the earth.

They have hundreds of troops under their command, the main force is not damaged, and only a little fur is lost.

Even if Fang Yue had the means to reach the sky, it was impossible to subvert their entire army by one person.

But if there was a civil strife in Linghou this day, it would be impossible to predict the consequences.

Although Jiuyouhou was fighting with Fang Yue, he watched and listened to all directions. He naturally listened to the discussion of Tianlinghou and Mingyuehou without fail.

His face remained unchanged. Continue to concentrate on fighting Fang Yue.

Fang Yue's five-element knives are indeed quite amazing. Although each of the five-element rules only shows the second level of realm, the five elements are constantly intertwined.

Cut with a single knife, its momentum continues.

Jiu Youhou drew out his spear and pierced it towards the knife light.

With a click, the Five Elements Sword was pierced by a spear at a certain running node, and it burst into pieces.

"The Five Elements Knife, the five laws are intertwined, although it can continue to rise and die, but after all, it has not reached the level of the integration of the five elements! Their connection is still jerky, if it falls in front of the general Yin-Yang realm power, it may be regarded as a lore. There is no flaw, but I have been on the battlefield for so many years, how can I not even see this flaw!"

A look of arrogance appeared on Jiu Youhou's face.

He didn't pay too much attention to this kind of small carving skills.

Skills are skills after all, even no matter how subtle they are, there are flaws.

Only absolute strength can achieve true crushing and life.

After all, Fang Yue's years of cultivation are too short, and he has gone aside!

Before Jiuyouhou's proud face faded.

Fang Yue was already accumulating his strength again and used his sword.

The same is the Five Elements Knife, the five kinds of brilliance are constantly circulating.

Within a radius of several thousand meters, there was a heavy sense of oppression, as if the sky was collapsing, and ten thousand ways collapsed!

Fang Yue had a sword, his sword technique was very simple and straightforward.

The same five-element knives are used in a different style.

Because the five elements and five principles contained in all these five element knives have reached the level of the second peak!

Cut out with a single knife, its power is ten times stronger than just now!

The power of the five elements circulates continuously.

Aroused the vibration of the rules of the world.

Jiuyouhou's face was almost green.

What kind of attack is this!

Compared with the current knife, the knife he broke just now is a toy knife!

The cannon fodder army of the trilateral vassal coalition has withdrawn from a distance of one thousand meters to prevent it from being strangled by the aftermath of the battle of two powerful men of Yin and Yang.

According to normal circumstances, as long as the two were not deliberately, they should not be affected by the aftermath of the battle, but the battle between the two was an abnormal sequence this time.

Fang Yue's five-element sword led the world, and within three kilometers of it was not considered a safe resistance.

Puff puff.

Under the influence of Fang Yue's sword technique, tens of thousands of cannon fodder at the innate level of the Dark Moon plane was directly shattered by the strong pressure, turning into a cloud of blood fog.

Their death perfectly explained the true meaning of the immortal fight and the suffering of mortals.

This battle quickly changed Jiu Youhou's expression.

Can this **** kill?

This Fang Yue is unruly!

Chapter 1208: Jiuyou hit

Now, Jiuyouhou regrets a bit.

Knowing that this would be the case, he shouldn't have promised Fang Yue three moves.

But the awesomeness that he blows out, even if he is kneeling, he has to complete it.

Jiuyouhou didn't dare to pierce the spear lightly like last time and penetrate Fang Yue's knife.

There are no flaws in the Five Elements Sword this time.

Although the five elements were not united into one, the power of the five rules suddenly increased several times.

No matter how he underestimated the enemy, he was afraid that he would not be able to catch it with a single sword, and even his own life would be lost.

The sword technique that can provoke the general trend of the world is not so fun.

I really can't hold it, saying that killing him is a matter of minutes!

"Jiuyou strike!"

In Jiuyouhou's throat, a hoarse voice came out.

He hasn't made any moves yet.

Bang Bang Bang, the thousands of cannon fodder at the Innate Realm level behind him unexpectedly exploded again.

But this time it really has nothing to do with Fang Yue.

He neither planted landmines nor displayed coercion from heaven and earth.

These cannon fodder soldiers on the Dark Moon plane were exploded by Jiuyouhou himself!

Those corpses that burst into pieces, the blood mist that was generated merged into Jiuyouhou's Jiuyou hit.

The tip of his spear rose a little scarlet, and that was a blow cast by the lives of thousands of cannon fodder from the innate realm.

Not hurt the enemy, hurt yourself first.

Among the three, Jiuyouhou was actually the real iron-blooded prince.

The power of Jiuyou's blow suddenly doubled.

The tip of the spear pierced out, forming a blood-colored black hole, and the black hole and the Five Elements Sword collided with each other.

One swallowed all things, the other continued to rise and die, the two restrained each other, and for a while, they were in a stalemate!

"Jiuyouhou is indeed Jiuyouhou! Resolute and cold-blooded."

Mingyue Hou, who was behind the army, was also involuntarily chilling in his heart.

Even his own people can be treated like this, no wonder someone reminded him a long time ago that he must be careful of Jiuyouhou.

"Annihilate!"

Fang Yue glanced at the Five Elements Sword that was stalemate with the blood-colored black hole.

The Five Elements Sword burst into pieces with Fang Yue's voice, as if a small world collapsed. It ends up with the blood-colored black hole, leaving the surrounding space to pieces, and finally returns to nothingness and dissipates completely!

"One more trick!"

Before Jiu Youhou could speak, Fang Yue spoke first!

Jiuyouhou's face flushed with suffocation, he just wanted to open his mouth to repent, but Fang Yue choked back.

He loves to brag, and those who love bragging have one characteristic, or in other words, to be sure, that is good face!

Fang Yue said, how embarrassed he to go back.

That's it, let this kid feel proud, take the last move, and understand this kid for the last time!

The same starting style, the same coercion of heaven and earth.

But this time Jiuyouhou did not say anything, he was the first to attack.

His war spear kept piercing, like dense raindrops.

It was not that Jiuyouhou didn't want to give Fang Yue a chance to make a move, and justifiably killed him.

But this kid is too bad.

With the last cut, it was ten times stronger by the one just now!

Five elements knife!

It is still the Five Elements Sword!

But the rules that make up this sword turned out to be the power of the five third-level laws.

The three-tier domain of the law is its own!

It really seems to be scolding!

With the five-layer domain superimposed, this five-element sword is no longer a five-element sword.

It should be called the Five Elements Domain!

Is this really a yin and yang level practitioner who came out of a barren land?

Is he really as vulnerable as the legend?

Your uncle, the level of comprehension and application of this law can be walked sideways in the Yin and Yang realm of the Dark Moon plane.

Even if it is a strong master in the master realm, there are a few who can comprehend the realm of the great!

The tip of Jiuyouhou's spear fell like a fine raindrop.

He wanted to encircle Wei and save Zhao, and let Fang Yue return to defend this trick, without completely completing the Five Elements Sword!

But Fang Yue didn't realize it, as if he had given up his defense.

Before the tip of the spear fell, thousands of cracks had appeared in his body.

This is the power of the rules in the Five Elements Sword is too strong, and his puppet body can no longer support a phenomenon that just showed!

The tip of the spear fell, and Fang Yue's puppet became a fan.

But that cut has been completed, and it was completely cut down with great vigor!

"Damn fellow, do I have such a big grudge against you? You are desperate to kill me!"

Jiuyouhou sensed a life-and-death crisis, and he gave a long whistle.

All the cannon fodder under his command in the rear was smashed into pieces and turned into a cloud of blood mist, which changed into an extremely strong blood-colored armor on his body!

However, this blood-colored armor was easily torn apart by Fang Yue's Five Elements Sword as if it were paper paste!

The armor formed by the lives of tens of thousands of people couldn't bear the slight stroke of the Wuxing Sword from Shang Yue.

"No, this power is not enough. The power of the law is far from being offset by the quantity!"

Jiuyouhou shouted again.

This burst of 50,000 heaven and earth level elite martial artists.

Their flesh and blood souls formed armor, protecting the vital points of Jiuyouhou.

This time, Jiuyouhou barely saved his life.

But his internal organs were still severely damaged when the Five Elements Sword came to him!

The power of the Five Elements Sword was wiped out, but Jiu Youhou's face was already pale as paper.

His strength is still less than 70%, and his internal organs are lingering. It is estimated that there is no hope of recovery if he has not cultivated for ten or eight years!

"Fang Yue is dead? In order to kill Jiu Youhou, he chose to die together?"

Li Qingyun's eyes widened, and even stopped breathing.

Li Qingyun didn't know what happened, her chest was a little blocked.

Fang Yue traded his own life for the severe injuries of Jiuyouhou, in exchange for countless creatures on the Dark Moon plane and fell. According to the truth, this is not a big defeat. It has already defeated those on the Dark Moon plane. Resolute!

However, in Li Qingyun's heart, the fall of these 300,000 Dark Moon planes soldiers was no match for Fang Yue's life.

It is a pity that Fang Yue would choose this method to end his life, it is a pity!

But before Li Qingyun was finished, the endless billowing dust and smoke came.

"The rebels of the daring Dark Moon plane set up an ambush here to prevent me from waiting for my way!"

There was a loud shout.

Immediately afterwards, a group of black men and horses had arrived in front of the army of the Dark Moon plane.

The two armies face off.

Jiuyouhou was stunned.

I'll go. We were robbed. This one is about to leave.

Who is blocking your way?

Xu Jingtian spoke.

He was abandoned by Fang Yue outside the space node before, and after a long time he caught up, and followed Fang Yue with a shy face.

He happened to be in a stomach of fire right now.

As a result, I saw this team from the Dark Moon plane. How many people are there in this team?

Anyway, it was a piece of black, with no end in sight.

But leave him alone!

Anyway, as long as the people on the Dark Moon plane are their enemies on the Sirius plane!

Killing is a meritorious service, and their heads are the military merits of the Sirius plane!

Jiuyouhou's face turned black.

Having said that, let us go to the Imperial Capital to help, how come a group of people from the plane of Sirius came out on the way!

These people are poor and hungry, but they are different from Fang Yue just now!

No matter how strong Fang Yue is, he is at best alone. But the number of people in this group is at least hundreds of thousands or even millions.

With this fighting, they can win, but the price is extremely heavy, and they are exhausted teachers, and working with these elites must be at a loss!

"This Xiongtai really misunderstood!"

Jiuyouhou forced a smile.

Want to explain, try not to conflict with the men and horses of the Sirius plane under Xu Jingtian.

But he hadn't spoken yet, a familiar figure slowly walked out from behind Xu Jingtian.

Jiuyouhou's eyes are red!

Fang Yue, goodbye Fang Yue!

Hasn't he been killed? How could it still appear in the army on the plane of Sirius!

Jiuyouhou was exactly the expression of a dog.

He didn't want to have another fight with Fang Yue.

Before Fang Yue fell, it wasn't because Fang Yue was weaker than him. The five Five Element Laws had all reached the third level. If they were still weak, then the other Yin and Yang realms would simply be impossible to live.

To be precise, Fang Yue collapsed himself to death.

That physical body was too weak to withstand the attack of that series.

"Fuck me, kill Fang Yue!"

The so-called meeting of enemies is extremely jealous.

Explanation? Also explain a fart! Fuck him, this Fang Yue just owes it!

Jiuyouhou's words turned and directly ordered his men to charge!

Xu Jingtian's mind is a little broken. The prince of the Dark Moon plane has his mind. I still have to explain it just now, so it is easy to discuss, but now, how can it become a direct fight!

However, I can't control that much, the Dark Moon plane and the Sirius plane were originally feuds.

Even the explanation is nothing good.

"Chong, Chong, Chong! Kill these puppies!"

Xu Jingtian ordered his men to charge.

The two armies clashed, and a truly vigorous war began.

Li Qingyun, who was watching, had completely turned into a melon-eating crowd, as if nothing happened to them anymore. The people on the plane of Sirius and the plane of Darkmoon went straight to work. No matter what, the reinforcements of these dark moon planes will be greatly injured.

"Duck! Duck!"

Fang Yue didn't know where he made a big banner of Yin and Yang level. The banner was waved and the situation changed color!

Pieces of starlight fell down and bathed on the Sirius plane fighters. They felt full of power, at least 30% more than usual.

"May Sirius be with you!"

Fang Yue looks like a **** stick, pray and bless them!

"Fang Yue, no matter how you got into the army of the Sirius plane, you will definitely die this time!"

Without saying anything, Jiuyouhou flew towards Fang Yue. The flames on his body burned, which was an expression of his inner anger.

Fang Yue hasn't waited for a shot.

Xu Jingtian stood up, no matter whether he was Jiuyouhou's opponent or not, let's do a fight first.

Before, Fang Yue flinched when he was in danger and was almost kicked out of the team. This time, if he hides and hides again, it is estimated that Fang Yue can kill him afterwards.

"Give you a chance. This is the grievance between Fang Yue and I. It has nothing to do with the plane of Sirius and the plane of Dark Moon. If you leave now, I can leave it alone. If you continue to stand in front of me, believe it or not, I will slap it. Damn you!"

Jiu Youhou didn't even put Xu Jingtian in his eyes.

At the level of Yin Yang realm, Jiu Youhou didn't dare to say that he was the top, but at least he had entered the first echelon. He generally dismissed those who were less than his level.

Xu Jingtian refused to give up, but if he put it in the usual way, he would definitely be persuaded.

But this time there is someone behind him!

Fang Yue supported him, this was a big boss who even dared to regret even the strong of the leader realm.

Chapter 1209: Mighty

When Jiuyouhou saw Fang Yue's brain was about to burst.

It's this kid who made himself slap in the face like this, was seriously injured and suffered heavy losses!

"This is the messenger of the Sirius God on the plane of Sirius. Every soldier on the plane of Sirius has the obligation and responsibility to protect him!"

Xu Jingtian said righteously, and he also deliberately amplified his voice so that Fang Yue behind him could hear clearly.

"Go away from me!"

Jiuyouhou's spear swayed and landed on Xu Jingtian's armor, and Xu Jingtian's armor made a bang. Almost cracked!

The strength of this spear was so powerful that even the armor of the Yin and Yang realm could not resist it.

"May Sirius give you endless blessing!"

Fang Yue still had the expression of a divine stick.

He came on Xu Jingtian's body with healing witchcraft, and there are still some life-line rules hidden in the witchcraft.

This witchcraft fell and bathed in Xu Jingtian's body. Xu Jingtian's originally trembling internal organs immediately returned to normal, and even under the nourishment of the rules of life, there were some signs of becoming stronger!

Xu Jingtian was madly surprised!

No loss is the messenger of Sirius God! Every divine technique is so powerful, his physical body is already quite powerful, and he needs countless elixir to nurse him further.

And Fang Yue's magical technique not only cured his physical injuries, but also made his internal organs stronger, at least worthy of decades of hard work and tempering!

Xu Jingtian's heart is more confident.

With Fang Yue's support, what is he afraid of!

Xu Jingtian flew back.

"The majesty of the envoy cannot be tarnished!"

Xu Jingtian was awe-inspiring, and then there was a crazy cry in his heart.

"You smoke me! You smoke me! If you smoke me again, the divine envoy will perform magical skills to heal me again!"

Xu Jingtian's heart is incredibly cheap.

Jiu Youhou was slightly surprised, he knew how powerful his spear was just now.

Xu Jingtian was wearing armor at the Yin-Yang level. The armor was undamaged. Any attack on Xu Jingtian's body would be reduced by 70%!

The strike just now seemed random, but in fact, behind him was an elite warrior who exploded hundreds of heavens and earth realms, using their flesh and blood as sacrifices, bursting out the Jiuyou strike.

However, Fang Yue's spell fell, and this guy was cured.

What on earth is this Fang Yue who is proficient in so many methods!

Jiu Youhou looked at Fang Yue again, his eyes were slightly warm.

This guy must die, if he does not die, he will definitely become a confidant of the Dark Moon plane in the future.

But wait.

Jiuyouhou suddenly thought of a rather crucial question.

"You said Fang Yue is a divine envoy on the plane of Sirius?"

Jiuyouhou suddenly stunned.

This is really unscientific!

This guy is a standard native of the earth, how could he become the messenger of Sirius?

Nani appeared on Jiu Youhou's forehead.

Xu Jingtian said calmly: "Fang Yue must be the divine sense of my Sirius plane. He knows divine art and possesses divine power. He is not a divine envoy, who is a divine envoy?"

"He still has supernatural power?"

Jiuyouhou's eyes widened.

Fang Yue, who had no divine power, could already fight him to death.

If Fang Yue had divine power, wouldn't he be able to instantly break through to the same realm as him, even a level higher than him?

"That's right! I have supernatural powers, I wanted to hide it, but in the end I gave you a surprise. I didn't expect Xu Jingtian to expose it for me!"

Fang Yue sighed quietly.

His palm was lifted up.

A drop of divine power emerged.

Diablo's divine power is like a black hole, constantly rotating, as if it can swallow all the light in the world.

"The lower power! Retreat, retreat quickly!"

Jiuyouhou immediately became calm.

A drop of divine power may only be able to provide Fang Yue with one blow or two blows, and cannot control the outcome of such a huge war.

But Fang Yue can use this lower power to kill him!

If you ask Jiu Youhou, the victory of this war is more important than his life.

Jiuyouhou must say that his life is more important!

If the war is lost, he can make a comeback, but if he fails, he will probably report to King Yan!

"Want to go? Is it too late!"

Fang Yue took divine power, and his realm suddenly rose to the peak of Yin-Yang realm. There are rules suppressed here. No one can have a realm above the leader level, but even so, it is enough to cooperate with Shangyue's law comprehension!

"Jiuyou strike!"

Jiuyouhou turned around and tried his best to perform Jiuyou's blow, and hundreds of thousands of elite warriors at the level of heaven and earth blew themselves to death.

However, Fang Yue's palm was already falling down with the old god.

The five fingers respectively contain the five elements of divine power and five laws.

When Wuzhishan fell, Jiuyouhou's Jiuyou strike collided with it frontally!

Wuzhi Mountain was slightly dim, and Jiuyou's blow was shattered.

The five laws of Wuzhishan circulated endlessly, and soon restored its own luster.

Then there was a bang, and Jiu Youhou was suppressed, his tendon broke and fractured.

Jiuyouhou's breathing became hurried.

This kid is too cruel.

This is going to kill his rhythm every minute!

However, seeing Fang Yue's breath of divine power quickly receding, giving Jiu Youhou a glimmer of hope.

Divine power, which lasts for a short period of time, although it seems extremely powerful, it is just one blow.

He can fight back if he doesn't kill him.

"Fang Yue, you can't kill me, today is your end!"

Jiuyouhou shouted and yelled loudly.

Xu Jingtian looked at Jiuyouhou pityingly.

Dude, you made the same mistake as I did before.

But if Fang Yue only had a drop of supernatural power, do you think I would be convinced by him?

The next moment, Fang Yue smirked.

A drop of divine power appeared in his palm, and the dark breath swept across all directions and swallowed the universe.

Even the well-informed Kardashian next to him is going crazy.

What is the origin of this Fang Yue!

Does he know how much this lower power is?

In Galaxy Bank, only 2 billion star crystals can buy one drop of subordinate power, and VIPs with six stars or more are required. Each person is limited to one drop per year. Do you understand that?

It's not that Galaxy Bank is deliberately driving up prices, it's that Galaxy Bank doesn't have much inventory either!

Kardashian was about to chop the ground under her feet.

This Fang Yue is absolutely crazy, crazy!

"You still have divine power, why do you still have divine power? This kind of thing, even the gods generally don't give too much, because even if the divine power is gathered from the divine residence, it is not easy!"

If Jiuyou Hou Zhuang is crazy, he has established a magnificent military exploit on the plane of Dark Moon, acting on thousands of people, and he is not willing to exchange a drop of his divine power.

But this Fang Yue was good, and even used his supernatural power as water.

With one drop and one drop, does the mansion behind you know you are so extravagant?

There was a hint of hatred in the eyes of Jiu Youhou looking at Fang Yue.

I knew you were so rich. Give me some. I promise to take my turn and leave, return to the Dark Moon plane, and farm and raise pigs honestly, okay?

This time, Fang Yue didn't give Jiuyouhou a chance.

He cut out the Five Elements Sword again, leaving Jiuyouhou who was suppressed under the Five Elements Mountain nowhere to hide.

He was slashed to death by Fang Yue and his head fell to the ground. Fang Yue stripped away his belongings almost without hesitation, and then sacrificed the corpse.

The fresher the corpse, the better the effect of the sacrifice.

After a long time, the energy and blood are drained, the value will not be so great!

A prince of Yin and Yang level has fallen.

This is almost an earth-shattering event.

There are a lot of abilities in the Dark Moon plane, but there are very few who can truly enshrine them.

The Yin-Yang realm masters of the first echelon like Jiuyouhou have great hopes that they can sprint to the realm of the leader level!

He fell, even if it was placed in the Dark Moon plane, it would cause a lot of waves.

When Xu Jingtian saw Jiuyouhou's end, he secretly rejoiced in his heart. Fortunately, he knew how to see the wind as the rudder. Otherwise, he would be destroyed by the angel of the Sirius God!

The three princes led their troops on the expedition, but one was beheaded on the way.

Moreover, Jiuyouhou's subordinates had already damaged nearly half of the men and horses, and a large part of them were killed by Jiuyouhou's Jiuyou strike and became sacrifices.

"The God Envoy is mighty!"

"God is domineering!"

"God is wise!"

Various shouts came from the army on the plane of Sirius.

Before the two armies, behead the enemy generals, which is a sign of laying the foundation for victory.

The army was defeated like a mountain, and Jiuyouhou fell. All of Jiuyouhou's men were demoralized and defeated.

Taking the opportunity, Mingyuehou and Tianlinghou are both recruiting and collecting Jiuyouhou's men. These people are veterans who have fought on the battlefield, and recruiting them can quickly increase their strength.

"Do you two princes still need to continue the battle?"

Fang Yue walked out of the army on the plane of Sirius, smiling at the corner of his mouth, behind him, there were eight drops of supernatural power floating.

Mingyue Hou couldn't help but sweat.

Threat, this is Chi. The threat of nakedness. But if Fang Yue really hits them, can they really hide it?

the answer is negative.

Fang Yue spent two drops of lower power to kill Jiuyouhou, and it was also easy to kill them.

What's more, in the overall situation, they no longer have much advantage.

Didn't you see Fang Yue behind?

There are people too!

The Great Army Mountain on the plane of Sirius whistled a tsunami, really rushing up, killing them was just like playing.

"This time we admit it!"

Mingyuehou spoke, and a bitter smile appeared on the corner of his mouth.

Originally thought this was a mission without any danger, but they expected that they would have a big deal before they officially arrived on Earth.

Jiuyouhou fell.

He is willing to give up.

Tian Linghou looked at Fang Yue, a strange light flashed in his eyes.

"This victory or defeat is a common matter of the military family, you two don't have to worry about it! However, since it is a loss, then you have to save money for life. We Fang Yue also want more. Your family can always get the tens of billions of low-grade spirit stones Come out!"

Fang Yue went to war this time and it cost a lot.

Always find some place to subsidize it.

Mingyue Hou opened his eyes wide: "Fang Yue, don't have to make an inch of it. This time we accept the plant, turn our troops back, and return to the Dark Moon plane to give the earth a chance to breathe! If you are aggressive again, be careful that we die!"

Mingyue Hou was unwilling to be blackmailed by Fang Yue.

Ten billion spirit stones are not a small number for him!

Chapter 1210: Buy technology

Fang Yue glanced at Mingyue Hou, and sneered: "This fish can die, but the net may not be broken!"

Fang Yue's voice fell, and the zerg army overwhelmingly appeared vast and boundless.

They intercepted the path of the army on the Dark Moon plane and the army on the Sirius plane formed a momentum of flanking back and forth!

Mingyuehou's heart almost stopped beating.

The Zerg actually joined in?

How many hole cards does this earth hide?

Mingyue Hou also understood that they had lost this time, completely lost.

If they were only on the plane of Sirius, they still had hope of a fight. But with the addition of Zerg, they don't even have the strength to struggle.

"Okay! Mingyuehou and I's family of tens of billions of low-grade spirit stones, let us go!"

Tian Ling Hou's incomparable fruit is broken.

Fang Yue smiled and said: "A person who knows the current affairs is a good man."

In the end, Fang Yue pitted the princes of the two dark moon planes each with a billion spiritual stones and let them leave.

Seeing the army fled, Fang Yue's heart was full of accomplishment.

Oops, this resulted in 20 billion Lingshi, so many Lingshi, but how to spend it!

Fang Yue's whole person is stupid.

It is difficult for Kardashian to connect the guy with his eyes full of spirit stones and the bold general who had just strategized and won a thousand miles.

However, Kardashian no longer dared to show the slightest contempt for the other party, Yue, or cold eyebrows.

After all, this uncle is an out-and-out gold master.

Not to mention Fang Yue's supernatural power, just the compensation for those wars is an astronomical figure.

Twenty billion Lingshi, my deed.

This is a big deal, and if you deposit it in your Galaxy Bank account, you will instantly rise to the sky and become a four-star VIP with honor and glory.

Four-star VIP, even in the Galaxy Bank, can be regarded as a middle-level figure!

Their words have a certain weight in the Galaxy Bank, and their opinions can be presented to the top of the bank!

"Mr. Fang Yue, are you ready to deposit the 20 billion Lingshi you just bought into the Galaxy Bank to increase your VIP level."

Kardashian chased after her and asked Fang Yue respectfully.

At this time, Kardashian still has the arrogant, arrogant, and arrogant expression before half a minute.

The rich is the uncle.

Then Fang Yue is the uncle in her eyes!

"In the Galaxy Bank? Why?"

Fang Yue looked at Kardashian curiously, revealing a deep puzzlement: "With so many spirit stones, a little operation can produce greater wealth, and now the earth needs this spirit stone to enhance its overall strength. Give you these spirit stones, what can I use to develop the earth?"

In a word, Fang Yue almost didn't choke Kardashian to death.

You guy is a bit too powerful!

In order to become a VIP of Galaxy Bank before, I ignored you, you all came to talk to me, and now you are actually planning to turn your face and deny you!

Ok!

It seems that the VIP guests of the Galaxy Bank are all virtuous with this face, I admit it.

Kardashian struggled for a long time and finally decided to accept her.

She patiently said: "A four-star VIP has many benefits. Its permissions can be further expanded and you can purchase a lot of things that cannot be purchased by a Samsung VIP. And a four-star VIP can also participate in the galaxy once every ten years. Small auctions, the things on the auctions are also rare and valuable! More importantly, four-star VIPs can purchase some basic technologies of scientific and technological civilization. With these basic technologies, The earth soars into the sky, greatly reducing the speed of scientific and technological civilization!"

Kardashian was ready to say goodbye early!

Fang Yue was finally stunned. The Galaxy Bank is indeed the Galaxy Bank. The preparation is thoughtful and detailed, and the bait used for fishing is different from that of other forces.

Basic technology!

What a valuable thing!

These five words are simply worthless to those who practice martial arts civilization.

But for a semi-technical civilization like the earth, it is simply priceless.

It is possible that the introduction of a technology can increase the development speed of the earth several times or even ten times!

"Oh, what kind of technology can you probably buy with these four-star VIPs?"

Fang Yue looked at Kardashian with great interest. If the price is right, he is really ready to buy some high-tech technology for China.

"According to my observations, the earth is now in its infancy! The technology in some basic fields is still very imperfect, such as the high explosive bomb you just used, in order to release the energy in a small area as much as possible. Therefore, energy compression technology is used in it! This kind of technology, our Galaxy Bank can provide information, the price of a piece of information fluctuates between one million stars and two million stars. The price fluctuations are based on technology It's a comprehensiveness!"

Kardashian said to Fang Yue, the logic is extremely clear.

Fang Yue looked at Kardashian and thought about it a little bit. If this information were put on the earth, it could bring a revolutionary breakthrough with the power of thermal weapons.

"You just said it was data? Are there other service models?"

Fang Yue keenly caught a key word, and when he moved, he immediately discovered the mystery.

"Yes, in addition to data, there are also expert services. Simple data, information, and formulas. It will take at least a month to really research these basic technologies and apply the technology. It will take at least half a year to finally experiment and transform to the military. According to my understanding of the earth's scientific and technological civilization, it will take at least one year! A basic technology from learning to application requires huge manpower and material resources. Financial resources, and if you spend 5 million stars, let my Galaxy Bank experts come forward to know in person, and guarantee that the energy compression technology can be maturely used in the military field within half a month!"

Kardashian talked freely.

Five million, one expert, one technology! This Galaxy Bank will really do business and make a war fortune!

But in this situation, does he have other options?

Fang Yue couldn't help but smile, and gave the earth a year to transform and utilize technology, when the day lilies were cold!

"Buy! Fang Yue's technology must be bought! Isn't it five million spiritual stones? Our military can pay this money!"

Li Qingyun joined in at this moment, and he was sad for a long time just now because of Fang Yue's fall.

It turns out that everything is fake!

But at this time, there was no time to talk to Fang Yue.

As a member of the military, Li Qingyun knows the situation of China's military best. This energy compression technology is indeed a relatively cutting-edge field.

Even if China today mobilizes all its strength and uses it for full research, there will be no breakthrough progress in less than ten years.

Five million Lingshi is worth a mature technology!

Fang Yue glanced at Kardashian sideways.

"A technology of five million stars is indeed not expensive! But I am afraid you will have follow-up methods! Can we make high-explosive bombs with this space compression technology? I am afraid it is not necessarily!"

Fang Yue's words broke Kardashian's careful thoughts.

Kardashian smiled slightly, not embarrassed.

"It deserves to be a distinguished four-star VIP. One sentence hits the core of the problem! This energy compression technology is only part of the craftsmanship of high-explosive bombs, as well as heat-resistant and pressure-resistant supramolecular materials, and Karpo particle transformation technology. Wait until 13 technologies are complete before you have the basic conditions to make a high-explosive bomb!"

Kardashian is like a delicate little fox.

Fang Yue showed such an expression as expected.

"Then how many stars do you need to buy the thirteen technologies you just mentioned?"

"The price of each technology is not the same. If you simply use the information, you can actually buy one hundred and fifty million stars in a package, and if you are guided by an expert, you need at least 400 million stars! Of course, buying these technologies is definitely a thing. Excellent value for money. Because every technology can be widely used in various fields, and not just can be used to make equipment weapons!"

"More than four billion spirit stones!" Li Qingyun immediately stunned when he heard the song number. This is an astronomical number, and it is at least unaffordable for the current earth. If he really has so many spirits in his hands Shi, his first choice was also to cultivate a large number of masters in the world of heaven, earth, and rotation, not to develop technological civilization.

Technological civilization has its inherent drawbacks, and it needs to reach a very high level before it can pose a threat to the powerful above the Yin-Yang level. Humans have unlimited potential, and they have

cultivated some Tianjiao of Heaven, Earth, and Rotating Realms. I don't know when someone suddenly realizes or has a fairy relationship, reaching the level of Yin and Yang in one step!

More than four billion spiritual stones, this is definitely not a small number, at least for the earth that has just regained aura and lacks resources, it is enough to make many big men feel trembling.

"There are so many technologies exchanged by more than four billion spirit stones, well, some are not worth it."

Fang Yue made a plan, his own money was not brought by the wind.

Moreover, the problem of the earth still needs to be solved by the earth itself.

He can't fill this bottomless hole alone.

Kardashian was a little bit disappointed, originally thought it was a very tempting condition.

But who knows, this Fang Yue wouldn't be hooked at all!

"Are there any original high-explosive bombs?"

Fang Yue suddenly spoke again.

Kardashian hesitated for a moment, and then said: "Yes!"

"Bring me a bomb that is five years advanced than the current stage of the earth's civilization. I want to bring a thousand! These things can be used as samples for the scientists of China to study and imitate. If you encounter problems, come to me again. !"

Fang Yue changed a way. He came to purchase samples that could study the earth's civilization and let earth scientists study and imitate them, and overcome technical difficulties. In this way, it can also form a kind of training for earth scientists. Let them not rely too much on external scientific and technological information.

Kardashian nodded and said: "The CT1 bomb is probably five years ahead of the current military on Earth. The price of a bomb is one hundred stars!"

The price of weapons of scientific and technological civilization is relatively low, because they can be mass-produced, and the cost of manufacturing is relatively low.

"That is two thousand star coins. Take it from my account! Give things to Li Qingyun and ask him to bring the CT1 bombs to Huaxia scientists for research. However, Li Qingyun, you have to remember, these things are Huaxia Yes, the researched technology is also Huaxia, some things can contribute, some things cannot!"

Li Qingyun nodded immediately, and Fang Yue's method was pretty good.
