

God of Life 2221

Chapter 2221: Tower of the Void

The old man's description of the Tiandao Pavilion is still a bit vague, but Fang Yue has roughly outlined what kind of existence this Tiandao Pavilion is in his mind. This is a force formed by a group of research madmen.

Anyway, Fang Yue understood the existence of Tiandao Pavilion this way!

"it is good!"

Fang Yue agreed to the old man's invitation. Such a force might have its own trial token.

Even if there is no trial token, ordinary people like this force don't dare to offend, it shouldn't be a difficult task to get trial tokens from other forces!

"The success of this experiment is of epoch-making significance. I can call the shots and reward you with two thousand heavenly deeds!"

The old man handed an identity token to Fang Yue.

"This is your identity token, which contains some precious materials and material information of Tiandao Pavilion. If you want to redeem it, just start a conversation from this token!"

Fang Yue took the token, and he found that the tokens in his hand were almost piled up.

He started from the Ten Thousand Worlds Universe, and he didn't know how many different power organizations, large and small, had joined.

Fang Yue felt a little dumbfounded. He seemed to have not spent a long time in every organization.

Perhaps the longest is the Human League!

Fang Yue pinned the token to his waist, and then asked, "I want to participate in the trial of the Void Tower. I don't know if Senior will arrange it?"

The old man looked at Fang Yue in surprise.

"Isn't it good to be an academy with your talents? Go to the Tower of Void, that's where the no-brained Wufu goes!"

The old man seems to be quite contemptuous of the Void Tower.

Fang Yue smiled bitterly and said: "Senior, I'm just a sideline in runes, formations, and bloodlines. What I really pursue is strong combat power! At least, if I can break into the Saint Realm level, This lifespan can be extended a lot, and with more lifespans, we can have more time and energy to explore the mystery of runes!"

The old man pondered for a moment, and he felt that what Fang Yue said also had some truth.

"It seems to be like this! Well, I can accompany you to the Void Tower! For a guy like you, entering the Void Tower will definitely make some noise! In order not to attract attention, I let my old friend come to block the movement in the Void Tower!"

"Remember, my name is Ostaf! From a certain point of view, you can be regarded as mine! If someone asks about your identity, you can say that you are a first-level laboratory worker of Tiandao Pavilion! Tiandao Pavilion, in ordinary people's eyes, seems to be just a research institution of a non-governmental organization, but creatures at the level of true immortals and above can probably vaguely know what the existence of my Tiandao Pavilion means!"

The old man was afraid that Fang Yue would be bullied after he went out. After all, in the old man's impression, the experimenter was generally a lady who didn't get out of the door and didn't step up!

They may have amazing talents in experimentation and research, but they are all amazing in terms of fighting.

Finally, Tiandao Pavilion has absorbed a new member with research talent.

Ostaf didn't want Fang Yue to be slaughtered!

Fang Yue nodded like a chicken pecking at rice.

It seems that the identity of Tiandao Pavilion is really extraordinary.

Ostaf closed the door of the cabin, and then dragged Fang Yue to a Void Tower in the East Eighth District.

"This Void Tower is a place of trial and growth in the eyes of many people, but if you reach a certain level of identity, you will understand that this Void Tower is actually a place where the city of a thousand towers consumes the power of the void. The city of a thousand towers is connected to the void, and the will of the tower body represents the will of this world to a certain extent! The void creatures you kill in the city of a thousand towers will be decomposed into flesh and soul and energy by the city of the thousand towers. Absorb and strengthen the will of this world! At the same time, the world will of the city of a thousand towers will feed back a certain amount of power to the passer! This is a virtuous circle! Everyone in this Void Tower will enter after breaking in to an independent space, in that space you will face the void creatures independently! The higher the number of layers, the stronger the strength of the void creatures you face. If you lose, you must shout Give up, the will of the Void Tower will teleport you out!"

Some mothers-in-law said Ostaf.

He is really optimistic about Fang Yue.

In Ostaf's view, killing the void creatures in the Void Tower and consuming the power of the void are extremely important, but those are the tasks that the martial arts should complete.

Research geniuses like Fang Yue shouldn't accept this kind of fighting.

Fang Yue nodded.

His knowledge of the Void Tower has risen to a higher level!

Then Fang Yue came to a tower of void.

The tower of the void is extremely tall, descending from the earth and connecting with the void.

Under the Void Tower, a middle-aged man in dark red armor was sitting cross-legged under the Void Tower.

He is the guardian of this Void Tower, and the aura fluctuations on his body turned out to be a true fairyland level cultivation base.

"Temuda! Long time no see!"

Ostaf greeted the gatekeeper kindly.

Although Ostaf kept saying that he despised Wufu, he still respects some warriors who use their lives to defend the city of a thousand towers!

"long time no see!"

The guardian showed a happy look.

"Last time you drew talented runes for the five sergeants of our guard army, which increased their combat effectiveness by nearly 50%. They killed twice as many void creatures in the ordinary days! It was really mighty. !"

Tidamu said very happily.

Ostaf looked at Titanium's face with an unusual blush.

"Tidamu, are you injured?"

Ostaf frowned slightly.

Ostaf doesn't have many friends, he is a quirky nature, and most of his time is spent in the laboratory.

But for Tidamus, one of the few friends, Ostaf cherished it.

"It's okay! Entered into the Void Tower two days ago and killed a real immortal second-tier devouring ancient beast. It was sneak attacked during the battle and suffered some injuries!"

Tidamun said indifferently.

He straightened his chest.

However, afterwards, Temu Damu coughed twice and vomited two bright blood flowers.

"You still said that you were not injured? What is your situation?"

Ostaf questioned worriedly.

Being hurt to this point as a strong man in the real fairyland already means that the injury is extremely serious.

"It's okay, just take a rest for a while! The gang of Void creatures have been aggressive recently! If they don't give them a color, they really dare to kick their noses!"

Tidamu waved his hand and said.

He didn't care about his injury.

"Forget it, forget it! Don't care about you! For guys like you, I don't listen to you if I persuade you! I still have a jade ring pill here. You refine it. This pill is a restoration pill at the virtual fairyland level. At least it can be equivalent to your own healing effect for three months!"

Ostaf had no choice but to take this guy out, and finally had to take out a precious Yuhuan Pill to heal Tiedam.

The higher the level of the pill, the higher the cost of making it. Generally, the strong in true wonderland are reluctant to use the pill at the real fairyland level to heal their injuries. The pill at the virtual fairyland level is already very luxurious!

"By the way, where are the five little guys I transformed? Let me see how they are now! The runes I carved into them have any side effects!"

Ostaf said enthusiastically.

Tidam's face was slightly gloomy.

"They are all dead!"

"Dead? How did you die?"

The smile on Ostaf's face suddenly froze.

"War dead! Ended with the void creatures! During this period of time, the void creatures had a strong impact, and the Void Tower was about to be overwhelmed. I could only use the lives of some true defenders to kill the void creatures. To relieve the pressure on the Void Tower!"

There was a touch of sadness in Tidamu's eyes.

Let his soldiers go to death, this is his incompetence as a general!

But in the face of the current situation, he is somewhat helpless!

As a soldier, death in battle is also their fate.

Ostaf's time felt a sense of solidification in the air!

"Is this situation really bad enough?"

Ostaf has lived peacefully in this city of a thousand towers for thousands of years, and he has known Temuda for thousands of years.

In Ostaf's impression, guarding the tower of the void was an easy job.

He had never thought that the battle in this void tower would have such a tragic day.

"Since last month, the riots of the void creatures have become violent. Every tower of the void is facing tremendous pressure, and the pressure on the border has also increased sharply! The above has begun

to consider whether to put some void creatures into it. In the city of a thousand towers, it's time to relieve the pressure of the Void Tower and the Borderland!"

Titanium shook his head slightly.

He did not expect that the pressure this time would be so great!

"Forget it! The high-level issues in the City of Thousand Towers are not something that I, a researcher, can influence and involve! You should solve these issues by yourself! This time I brought a little brother who was just recruited by Tiandao Pavilion! He is now a first-level experimenter. He wants to have a trial in the city of a thousand towers. Of course, the results of the trial do not want to be passed on!"

Ostaf slapped Fang Yue's shoulder and introduced.

Tidamu couldn't help showing a bright smile.

"The Heavenly Dao Pavilion has not officially recruited members for four or five years! It seems that this little brother is really good! However, if the master level is cultivated, it is best to experience it only on the first three floors of the Void Tower. Just one click! It is too dangerous for you to enter the fourth level and above, requiring at least Saint-level combat power to enter!"

Tidamu kindly suggested.

Fang Yue nodded obediently.

Entering the tower of the void, which floor he enters, it is not the Tidamu that has the final say!

"Void creatures in the Void Tower have different characteristics. When you enter the Void Tower, you must be careful not to overturn the ship!"

Ostaf stared again.

In this city of a thousand towers, countless people die in the tower of the void every year.

Not that there are no strong ones among them.

It's just that this void creature is more brutal!

Fang Yue nodded again, and then he stepped into the Void Tower!

Seeing Fang Yue entering the Void Tower, Tidamu smiled and said, "I don't know how long the little guy you brought this time can support!"

"I think his strength may exceed your imagination!"

Ostaf said.

Chapter 2222: Enter the tower

"Why see?"

Tidamu was surprised: "It's nothing more than a little guy at the master level! How strong can it be?"

"According to my observations, he is proficient in space heaven and life heaven, and he also has unique insights into the rune line! As long as he is not an idiot in combat, he can at least display the combat power of the Great Sacred Realm!"

Tidamu couldn't help but his expression stiffened slightly.

"No way! The eighth floor of this Void Tower is in a state of riot. If he enters, he may be in danger of life!"

Tidamu said eagerly.

However, it is too late for him to stop Fang Yue!

Fang Yue stepped into the Void Tower.

The first level is a vast world!

Fang Yue was in a corner, surrounded by two void creatures at the Yin and Yang level!

The two void creatures looked like savage bulls, and the moment they appeared, the opponent Yue suddenly burst into a strong fighting spirit.

However, absolute strength represents an absolute gap!

Fang Yue just glanced at these two void creatures at random, and then their bodies burst into blood mist and were swallowed by the void tower!

Two strands of refined qi and blood descended from the void, submerged into Fang Yue's body!

Fang Yue felt that his clone had a slight improvement!

"This is the reward of the Void Tower? It looks good! This refined pure qi and blood can slightly improve my strength and it is the same as the strength that I exercised. There is no need to worry about unstable realm. risk!"

Fang Yue's smile was open, and he didn't expect this Void Tower to be a good place to improve his strength!

He is worried that he has no place to quickly improve his strength. This place is just right for him to spawn monsters and fight experience!

Fang Yue looked at the Void Tower, the vast expanse, and almost all the void creatures at the Yin and Yang level in the first layer!

"kill!"

Fang Yue's voice fell, and the void creatures at the Yin and Yang level were directly crushed.

Hundreds of void creatures at the Yin and Yang level were killed instantly by him.

At the same time, hundreds of pure qi and blood descended and fell into Fang Yue's body.

Fang Yue felt that the power that these qi and blood had added to him was vaguely equivalent to his day-long practice!

"Not bad!"

Fang Yue walked in the first level like a leisurely garden. He killed the void creatures at the Yin-Yang level and crushed them!

Soon, Fang Yue killed three thousand yin-yang-level void creatures, and then they were teleported to the second floor of the void tower!

This Void Tower also has limitations!

To enter the next layer, you can choose to actively enter the next layer after killing ten void creatures of this layer, or passively transfer to the next layer after killing three thousand creatures.

Although everyone entered from the first floor.

But most people rarely stay on the first floor!

The difference between the realm of this trialer and the void creature will cause the reward of the void tower to decrease.

And the difference in realm is small, it is exhausting to kill the void creatures!

The general tester of the leader realm is basically tired by killing a hundred void creatures!

There is a void creature like Fang Yue, killing a Yin-Yang-level void creature is as simple as eating and drinking water!

"Three thousand essence and blood pills!"

Outside the Tower of Void.

Longan-sized pills flew out of the tower and fell into Ostaf's hands.

The essence and blood pill is an elixir at the Yin and Yang level. It can replenish the energy and blood in the body consumed by the warrior during the battle. The effect is excellent!

Trialists conduct trials in the Void Tower, and the corresponding forces will also receive certain rewards.

"This Fang Yue should have killed three thousand Yin-Yang-level void creatures before stepping into the second level!"

Ostaf stepped into the Void Tower more than once, knowing the rules of the Void Tower very well!

"Not bad! Boy, a bit aggressive!"

This Fang Yue killed a Void creature, the pressure on this Void Tower is a bit smaller, and the pressure of suppressing the Void creature will be reduced after the True Defender!

Fang Yue's killing of three thousand Yin-Yang-level void creatures would be a slight help to their guards!

However, the real enemy of the guards is not the void creatures at the Yin-Yang level, but the higher-level existence!

Second floor.

Fang Yue discovered that the levels of the surrounding void creatures had changed. The weakest void creatures were all at the peak level of the Yin-Yang realm, and most of the void creatures were at the master realm level!

The highest among them even has the fifth and sixth levels of the void creatures in the leader realm.

Fang Yue continued to squeeze the wool without saying a word!

Killing one Void creature at the master level is worth the reward for killing twenty Void creatures at the level of Yin and Yang! Even the reward for beheading the fifth and sixth levels of the void creatures in the leader realm is equivalent to beheading three. Reward for forty yin and yang level void creatures!

Fang Yue knows that each level of killing void creatures has a maximum limit, so he learned **** this time, specifically looking for a strong killer!

It is still crushed, without pressure!

Fang Yue killed 3,000 Void creatures at the Master Realm level with a cup of tea.

The strength of pure qi and blood fell.

The power of rewarding Fang Yue's energy and blood in this short period of time is equivalent to Fang Yue's three years of penance!

Fang Yue was sent out again, to the third floor.

And outside Ostaf's hands there were 3,000 more pill at the level of the leader-five spirit pills.

The Five Spirit Pill can nourish the internal organs and enhance the internal organs potential of practitioners!

This five-spirited Ostaf is not rare.

He was going to return all the rewards Fang Yue got when he broke through the barriers to Fang Yue.

The key is that Fang Yue killed another three thousand Void creatures at the master level.

Are all the little guys so cruel these days?

Fang Yue himself is also at the level of the leader realm, and it is unrelenting to kill creatures in the same realm!

"It would be great if all the people who break through the barrier can be like Fang Yue! Such a guy will give me a bunch, and the pressure on my guard can at least be reduced by most!"

Tidamul laughed, it seemed that his injuries were mostly healed!

The main force of the guards is at the level of the leader realm and saint, and they usually need to pay a lot of price to kill three thousand empty creatures at the level of the leader realm.

Unexpectedly, Fang Yue would kill him within the time of the tea.

This Fang Yue is already contributing to the city of a thousand towers!

The third level will be cleared soon!

Void creatures at the pinnacle level of three thousand cult masters were killed!

A large amount of elixirs fell into Ostaf's hands.

At this moment, there was a strange expression on Ostaf's face!

"I feel that the pressure on this Void Tower has been reduced a lot! I originally thought Fang Yue was a researcher who was not very good at fighting, but now it seems that I am thinking badly! Even at the Great Sacred Realm level. It takes a lot of effort to kill three thousand cultivators at the pinnacle level of the cultivator, and there is even a danger of injury, but this Fang Yue killed three thousand cultivators at the pinnacle level with a little pause. Not at all! Now it seems that his strength is beyond my imagination!"

Ostaf became more and more interested in Fang Yue.

He had long seen that Fang Yue's age should not be very large.

Xiao Xiao has achieved such an achievement in Rune Road, and he is not weak in combat. This Fang Yue is definitely a rare talent!

"The bodies and souls of the void creatures at the pinnacle level of the three thousand cult masters are refined by the will of the void tower, and it also supplements some of the power consumed by the void tower in recent days! One of them loses and the other grows, this void tower is indeed more stable some!"

Titanium nodded slightly.

"If Fang Yue can return safely from the Void Tower, my guard must reward him!"

Tidamu's voice just fell.

On the fourth floor of the Void Tower, the saint-level elixir was sprayed one after another. shoot out.

Fang Yue's killing of saints is still like cutting grass!

On the fourth floor of this Void Tower, although the void creatures have reached the level of the Saint Realm, they are almost all suppressed below the third level of the Saint Realm!

A large number of sage-level void creatures were killed.

At the same time that every void creature was beheaded, the drop of qi and blood power would make Fang Yue stronger.

When clearing the third floor of the Void Tower, the power of blood in Fang Yue's body was already surging, pushing his cultivation realm to the seventh floor of the leader realm!

Fang Yue has a solid foundation, and even a small level of improvement in his cultivation level represents a huge progress!

"This Void Tower is really a good place. It has no side effects at all to improve the cultivation base by killing!"

Fang Yue couldn't help being excited!

He continued to kill in the fourth floor of the Void Tower!

Strands of incomparable strength of Qi and blood fell from the void and penetrated into his body.

Fang Yue's physical body continued to strengthen, and his cultivation level was slowly increasing!

When Fang Yue reached the 2999th head, he suddenly stopped the war knife in his hand.

"If this kills three thousand heads, it will be forcibly teleported to the fifth floor by the Void Tower! The opponents I face must be stronger! This also means that the Void Tower has a limit to my improvement! Maybe I will kill it. When the opponent is a true fairyland-level void creature, I have to be forced to leave this void tower!"

"How can I get more benefits in this Void Tower?"

Fang Yue couldn't help but fell into contemplation.

He came to this city of a thousand towers to find an opportunity to promote the clone of flesh and blood to the saint state. Originally, he prepared a large number of corpses in the storage space and wanted to refine it in the city of a thousand towers!

But now, Fang Yue sees new hope and can lift himself up in this Void Tower, squeeze the wool, and squeeze himself into the realm of saints.

As for those corpses, they can be used as strategic materials and used as consumables at the level of being elevated to the Saint Realm!

He wants to be promoted to a saint from the pinnacle level of the leader, and the obstacles he faces are unimaginable!

If you don't leave behind and get promoted rashly, you might not know how you died!

"If I were to kill multiple void creatures at the same time at the last moment, maybe the limit of kills could exceed three thousand!"

Fang Yue's eyes lit up, and he came up with a way, but as to whether it would be successful, Fang Yue himself couldn't decide!

But just do it!

Fang Yue immediately carried out wanton arrests in the fourth floor of the Void Tower.

Soon he captured more than a thousand sage-level void creatures.

Immediately afterwards, Fang Yue slashed.

Those sage-level void creatures lined up to eat fruit.

It was all chopped up by Fang Yue with a single knife, his body burst, and his soul ascended to heaven!

At the same time, a thousand strands of incomparable vitality fell and fell into Fang Yue's body.

Fang Yue felt his physical body swell, and his blood was overwhelming, like river water, flooding and rolling!

Chapter 2223: Harvest

At the same time, the Void Tower shook violently!

At the same time, refining the body and soul of a thousand-headed saint-level void creature is also a big supplement for the Void Tower!

Thousands of pills are sprayed from it. It shot out and fell into Ostaf's hands.

"Four thousand pills! What exactly did Fang Yue do in the Void Tower? Why, he was able to break through the limit of killing three thousand void creatures and received four thousand fourth-tier rewards!"

Ostaf gave a look of astonishment.

The reward rules of this Void Tower remain unchanged.

Killing three thousand creatures will be sent to a higher level!

I have never heard of someone who can kill four thousand creatures before sending them away!

"This guy is really a ghost, and he has mastered the loopholes of this Void Tower in a short time!"

The corners of Temuda's mouth twitched. As the guardian of the Void Tower, how could Temuda not know the loopholes in the rules of the Void Tower. If he could kill many creatures instantly at the last minute, then the extra creatures would be rewarded according to the rules!

This Fang Yue actually killed a thousand void creatures at the same time at the last moment of the fourth floor!

And all of them are void creatures at the Saint level!

Is he at the level of the leader?

Hell the leader of the world!

Temuda has seen many practitioners at the master realm level, but he has never seen such a sturdy master realm!

"This can also squeeze wool!"

Ostaf couldn't help but smiled bitterly: "This kind of technique is probably something that most people have never thought of. It's good for ordinary people to pass the level smoothly. Some will challenge the killing limit of the Void Tower for that reward!"

Immediately, Fang Yue stepped onto the fifth floor of the Void Tower!

The creatures on the fifth floor of the Void Tower have all reached the level of the fourth to sixth floors of the Saint Realm! These void creatures appeared in groups, and some even knew how to fight together. Even if Fang Yue killed, it was no longer as smooth as the previous layers!

"Void creatures in the Saint Realm are almost always witty, ignorant, and they only know that they rely on instinct to kill, but once they reach the level of the Saint Realm, this aspect of wisdom will increase by leaps and bounds! Saint Realm fourth! The level and above have mastered the complex language and can carry out some meticulous cooperation! Together, the difficulty of killing will increase!"

Fang Yue no longer knows how many void creatures have been killed in the Void Tower. Now, he has a very good understanding of void creatures, and even has a preliminary understanding of how many ethnic groups there are!

Fang Yue's face was cold and he walked on the corpse of the void creature.

This time his killing speed in the Void Tower has slowed down a lot. In the process of beheading, he also needs to be careful about sneak attacks. Naturally, he is not afraid of sneak attacks by two saint-level void creatures.

But once the number of void creatures breaks through one hundred, the combined attack will become extremely terrifying.

There is a kind of void creature called the Void Blade. They look like a mantis, but the Void Blade can swing the sickle arm and slash the attacks of breaking the void. This kind of attack is an invisible and innocent void blade that can be used at the same frequency Overlay! The blade of the void is superimposed on hundreds, and its power is no less than a blow from the peak of the void and the blade of the void is extremely strong! Even the strong in the real fairyland need to be treated with care!

Fang Yue was accidentally attacked by more than 300 Void Blades, and he was almost killed until his body burst! From then on, Fang Yue became more careful, even in the face of some sage-level void creatures, he did not dare to be careless and careless!

"Is this the enemy faced by the last era of civilization? It is indeed powerful and terrifying! If this void creature really unites to form a legion, the battle formation of all races may not be comparable to this terrifying talent!"

Fang Yue said to himself.

He is assessing his strength in combat.

Fang Yue even suspected that following this rhythm, he might not be able to smoothly pass the void creature level of the virtual fairyland!

On the fifth floor, Fang Yue dared not squeeze too much wool.

He was worried that he would catch too many void creatures alive and put together it would attract a large number of siege from other void creatures!

In the end, Fang Yue just captured five thousand void creatures from the sixth layer of the Saint Realm alive, and put them together, killing them with a punch.

Then he was teleported to the sixth floor.

When Ostaf looked at the five thousand saint-level pills that came out of his arms, he was completely stunned!

Titanium is also doubting life!

"What's special, my guards have killed as many void creatures in the Void Tower during this time than Fang Yue has killed! Are the void creatures in the Void Tower all cabbage? From the fourth to the fifth floor, shouldn't it be a hurdle? The wisdom of the void creatures is born, and they already know how to combine into a battle formation! Even the strong of the virtual fairyland must be careful when entering it, and dare not want to kill! But this side How did Yue feel as if he had entered his back garden, crushed by!"

Titanium originally felt that his subordinates used their lives to kill the void creatures to protect the safety of the city of a thousand towers. It was great, heroic, and heroic!

But now, he suddenly felt like he was a weak chicken, a silly fork!

That is a sage-level void creature, they need to walk on thin ice carefully when they see it!

But Fang Yue's painting style is totally different!

Now the pressure on this Void Tower is suddenly reduced!

As a guardian, Tidamu can even feel the central will of this Void Tower is obviously improving!

"Is this Fang Yue not afraid that I will run away with his pill? I really don't care about this sage-level pill, but if there are so many, even sages will be moved!"

Ostaf looked at these white elixir of immortality, he felt a heartbeat!

Sixth floor!

The strength of the void creatures has indeed improved a lot!

Even some of the void creatures have reached the peak level of the Saint Realm!

Void creatures have higher wisdom and stronger cooperation!

Void creatures that can cause danger to the strong in True Wonderland are no longer a simple Void Blade!

There are scaly creatures and dark behemoths that can be combined to become defensive warriors. Fifty of them can form an energy wall to resist the magic of the real fairyland powerhouse!

There are also jumping mice, jumping around in the void, fascinating, extremely difficult to kill.

This jumping mouse has its own ability to attract hatred, and he can bring other creatures through the void!

This is simply an old vanity driver, no one knows where he will appear next moment!

Maybe it was behind you, a surprise attack, killing you!

"It's really not easy for practitioners in this city of a thousand towers to fight the void creatures up to now!"

The abilities of the void creatures are simply strange, and even as the void creatures' own strength increases, their instincts will have more changes.

A faint thoughtful look appeared on Fang Yue's face.

He began to study the source of the magical powers of these void creatures.

Originally, Fang Yue hadn't thought about this problem, but Ostaf's understanding of runes gave Fang Yue a lot of inspiration.

If he can find the source of these void creatures' supernatural powers, and transfer to his own hands. Body, then the strength of his army can be greatly improved!

Void creatures whose realm is too low have no research value, and their magical powers have not yet been revealed.

Above the saint level, the power of this void creature has only gradually emerged!

Fang Yue is no longer simply killing the void creatures but capturing them alive and using them as experimental subjects!

Fang Yue began a new plan. He began to capture a large number of void creatures alive, and then sealed them and threw them into an independent dimensional space.

Anyway, the sage-level void creatures can live for thousands of eight hundred years even without food and water!

Fang Yue began to hunt the void creatures aggressively. The void creatures he captured and sealed alive were not within the measurement range of the Void Tower!

Therefore, Fang Yue captured about eight thousand saint-level void creatures alive, and this void tower did not send him to the seventh floor!

After the work of capturing alive was completed, Fang Yue only started the killing to obtain the reward of the Void Tower.

Soon, Fang Yue completed the killing mission and killed another five thousand void creatures in the final blow!

Massive energy of Qi and blood poured into Fang Yue's body, and his cultivation realm broke through again to reach the eighth level of the leader realm!

The blood beads in the body are beating lively!

Fang Yue could clearly feel that he was becoming stronger.

Before entering the Void Tower, his flesh-and-blood clone was able to stand undefeated against the strong in the second level of True Wonderland. He had to use some unconventional means to kill the opponent.

And now, he can at least compete against the strong on the third floor of True Wonderland, and even if he has the opportunity, he can kill the opponent.

The level of the true fairyland, step by step, the gap in combat power is difficult to measure with reason!

From the second floor of the true fairy to the third floor of the true fairy.

Fang Yue's combat power has achieved a qualitative leap!

These are the benefits and growth that the Void Tower brought to Fang Yue.

"It's a pity that the number of void creatures that can be killed in each layer of the Void Tower is limited, otherwise, I can kill all the void creatures!"

Fang Yue revealed a touch of fierceness!

Then he stepped into the seventh floor of the Void Tower.

The void creatures inside have reached the level of the first and second levels of the Great Sacred Realm!

The higher the tower of the void, the smaller the span of the strength level of the void creatures in it!

However, after reaching the seventh floor, Fang Yue could clearly feel that the number of void creatures on the seventh floor in the Void Tower had been significantly reduced!

Obviously, the number of this void creature is rapidly decreasing as the realm increases!

However, each layer of the Void Tower is vast, and it is okay to gather enough void creatures to kill!

The strength of the void creatures at the Great Sacred Realm level is another qualitative leap!

Some of these void creatures have been able to transform into the appearance of the creatures of all races and master the supernatural powers of the creatures of all races!

The fluctuations of the life breath of the creatures of all races that they pretended were the same as those of all races.

Chapter 2224: Eighth floor

"No wonder there are void creatures in this city of a thousand towers! It turns out that these guys are so good at disguising! And the void is endless, the void creatures are endless! The impact of the void creatures will cause a large number of void creatures to enter the city of a thousand towers! These void creatures can make up for the previous loss, maybe now the void creatures have cultivated an unimaginable power in the city of a thousand towers, so that all the races in the city of a thousand towers have to compromise!"

Fang Yue's killing remains!

The number of void creatures he caught alive this time was not as large as in the sixth floor.

The void creatures on the seventh floor have stronger independent wills. One can't hold the seal and explode directly, so the difficulty of the seal is greatly increased!

Fang Yue began to slow down the pace of marching gradually on the seventh floor of the Void Tower, and it took a full day to seal more than 300 large-sacred-level void creatures. In this process, more than 700 void creatures can explode! In the end, Fang Yue was annoyed, and all of them were killed without sealing them!

Outside of the Void Tower, Ostaf and Titanium also experienced a rising and falling moon!

For creatures of their level, the time of a day is just a blink of an eye!

"This Fang Yue has been in the Void Tower for more than a day! He won't be in any danger!"

To be honest, Ostaf still cares about Fang Yue.

Fang Yue's combat power is second, the key is that this guy's talent in rune research is unmatched by others!

"Dangerous? I think if he takes action, others are more dangerous!"

Titanium glanced at Ostaf.

This is really messy relationship.

Didn't you see that this big brother killed more than 700 void creatures of the Great Sacred Realm level on the seventh floor?

This is about to catch up with the last time they tried their best to eliminate the void creatures.

Now Tidam had the idea to fool Fang Yue into their guard!

This is an absolute killing embryo.

He has been a guard next to this Void Tower for so many years and rarely sees such a murderous guy!

How many people has Fang Yue killed?

Titanium felt a little numb.

After Fang Yue no longer decided to capture it alive, the speed of this void creature's death increased significantly.

After about half a day's work, Fang Yue's journey to the seventh floor of the Void Tower was sprayed with another 3,000 large holy realm-level pill. Shoot and end!

Eighth floor!

As Fang Yue stepped into the eighth floor, Tiedamu's numb expression immediately became sober.

not good!

This guy is really on the eighth floor!

Some time ago, the void was in turmoil, and the rules of the eighth layer had some changes. Some void creatures that exceeded the limit of the eighth layer may also be dormant in the eighth layer!

I hope that Fang Yue is okay!

Tidamu put his hands together on his chest and prayed silently for Fang Yue.

The moment Fang Yue stepped onto the eighth floor, his hair instantly exploded.

A powerful sense of danger swept over!

At the next moment, a silver light fell from his neck.

Fang Yue turned over and clamped the silver long sword with both hands.

"Damn it!"

Fang Yue's long sword with both hands was an empty-handed move.

The long sword burst into pieces and turned into iron pieces scattered all over the place.

But while Fang Yue was blocking the long sword, a cold demon claw caught his chest.

Fang Yue couldn't help vomiting blood!

Why doesn't this eighth layer play cards according to the rules!

According to the truth, this eighth layer should be the gathering place of the third and fourth layers of the void creatures.

But the two void creatures that attacked him all reached the level of true wonderland!

One of them turned into a human form, quite clever in swordsmanship and moves. The other has become a demon, with claws sharper than a knife!

This is the second time Fang Yue was injured after entering this void tower!

"The smell of blood is so strong, I don't know how many creatures this guy slaughtered me in the Void Towers below!"

One of the void creatures in the true fairyland said bitterly. They can also communicate in the Void Tower.

They vaguely knew that Fang Yue had killed countless in the next few layers of void towers, so they waited hard at the entrance of the eighth floor and killed them in secret!

This Void Tower is definitely not a place of peace!

You must pay a corresponding price if you want to break through!

Originally, Fang Yue should be sniped only in the Void Tower at least ten stories above.

But unexpectedly, because of the riots on the eighth floor, some void creatures that exceeded the limit of the eighth floor were attacked. Fang Yue faced some unexpected crises ahead of time!

"Substitute technique!"

Fang Yue reluctantly cast his spells, his original position was replaced by a puppet!

The puppet burst into pieces, and Fang Yue appeared ten meters away.

The puppet died, but the wound on his back was still there.

A wound with deep bones appeared in the vital part!

Fang Yue's heart is even clearly visible from behind!

Tick.

Tick.

Tick.

Drops of blood dripped from his wound.

Fang Yue's face was as pale as a piece of gold paper.

"The Way of Life, Chain of Order!"

Fang Yue gritted his teeth, drops of life force emerged from him, and the life force melted away, turning into dots of green light that penetrated into the wounds in his body!

Fang Yue's wound healed quickly at a speed visible to the naked eye.

If it is a strong person in the ordinary leader realm, even if it is life-threatening trauma, a tenth of the life force is enough to heal him.

However, Fang Yue's physical body was too strong, and only nine drops of life force were released to temporarily heal the wound.

If he wants to heal his injuries completely, Fang Yue still needs a lot of flesh and blood power as a supplement.

"escape!"

Fang Yue took a deep look at these two true fairy-level void creatures. Without a word, he turned and ran!

The emptiness of these two true fairyland level creatures are all in the third level of true fairyland.

If it is single-handed, he will still be restrained when he meets one, but if both ends are played, he needs to use some hole cards to restrain and contend.

However, Fang Yue was even more worried that if there were two true fairyland-level void creatures around here, wouldn't there be a third and fourth head?

Once caught in the siege, he may not even have the ability to escape!

Fang Yue's figure flew towards the depths of the Void Tower like thunder and lightning.

And the two true fairyland-level void creatures glanced at each other, and chased after Fang Yue's **** smell left in the void.

This Fang Yue's strength also exceeded their expectations.

How strong are the beings at the master level?

Originally thought that the two of them attacked, it was foolproof.

But unexpectedly, this little fellow of the human race actually ran away!

The eighth floor of this Void Tower is not all the void creatures in the real fairyland, like them, it is already the existence of the pyramid tip! If Fang Yue were to really kill on the eighth floor, the strength they continued on the eighth floor would soon dissipate.

"Kill the void creatures that exceed the eighth layer limit!"

A magnificent consciousness penetrated into Fang Yue's sea of knowledge.

Fang Yue could clearly sense the will of this void tower represented by this voice.

This is a task set by the Void Tower for Fang Yue!

"Damn it! The chase is really fast!"

Fang Yue didn't expect these two true fairyland-level void creatures to catch up with their ghosts!

As Fang Yue ran away, he took out the corpses of a strong man from his storage space and absorbed the flesh and blood essence to repair his wounds! A trace of blood gradually returned to his face!

"Want to chase me, can you catch up?"

Fang Yue's figure flickered.

The gray figure of the two great sacred realm levels emerged from his body.

These two gray figures at the Great Saint Realm level have all changed to become his appearance, and the breath and taste are the same as him!

The two gray figures ran in different directions.

However, the true celestial among these two void creatures is still the opponent Yue Qin chasing after him!

When they injured Fang Yue, they planted a brand of void on Fang Yue's body!

As long as the emptiness remains, they can easily distinguish Fang Yue's identity!

Fang Yue laughed miserably: "Perhaps it is really going to be faced this time!"

Fang Yue realized that his method of distracting the other's attention didn't work!

As a result, Fang Yue suddenly stopped his figure!

He punched!

A thunder dragon with a length of tens of meters was born in the void and slaughtered one of the void creatures at the real fairyland level!

Since you can't hide, let's fight!

The Thunder Dragon summoned by Fang Yue was born. It raised its head, and a loud dragon chant summoned waves of thunder in the void!

The two true fairyland-level void creatures didn't even dodge, they braved the thunder light to move forward, and would rather kill Fang Yue if they were hit by the thunder light.

In comparison, the fighting will of this void creature is much stronger than the true immortal of the ten thousand race.

If the true immortals of the ten thousand races encounter this situation, they must protect themselves.

They cherish life and do not want to be hurt by the slightest!

And this void creature would rather die than kill the opponent!

Thunder Dragon swinging its tail!

A huge tail swept towards one of the true fairyland-level void creatures. The silhouette of the void creature flickered, and it escaped the full blow of the Thunder Dragon!

Even if most of the void creatures have never understood the way of space and heaven, they still know some methods in space!

This space flickering, it is a natural endowment that represents the void creature.

The two void creatures in the true fairyland fought back and forth, trying to kill Fang Yue!

"kill!"

Fang Yue knew that he really had nowhere to run this time!

He suddenly slammed his fist towards the void creature on the third level of the true wonderland!

Fang Yue's blood boiled, running through the void like a long river!

His blood burned like a raging fire, directly hitting the void creature.

However, this void creature is wearing a black cloak!

A faint gray energy exuding from this cloak actually blocked Qicheng's strength!

Although the remaining 30% fist strength also knocked the void creature back several meters, it was no longer able to harm the physical origin of the void creature!

And another void creature in True Wonderland had already seized the opportunity to attack Fang Yue.

A beam of silver light penetrated the void and turned into a spear directly piercing Fang Yue's heart.

This time Fang Yue was prepared, and another wall appeared in front of him.

The earthy yellow earth element emits a solid light.

There was a blast of silver light beams colliding with the soil wall, and the two sides impacted intense energy ripples.

However, a spider-web-like crack appeared on the dirt wall.

But the damage of the earth wall is limited to this!

This earthen wall is attached with the Tao of the Earth, which represents solidity and thickness, capable of resisting all attacks.

It is the best choice to use the way of the earth to carry on Fang Yue!

At the same time, Fang Yue bullied himself closer and punched again.

Chapter 2225: Appalling record

The phantom of a real dragon solidified in the air.

Fang Yue's boxing strength broke out again!

With a bang, Fang Yue's fist shadow penetrated the chest of the void creature that summoned the spear!

In melee combat, Fang Yue has an absolute advantage!

His strength is terrifying, especially when he continuously breaks through the realm, his physical strength has been strengthened again!

Fang Yue can smash the void with one punch.

The void creature did not give up attacking Fang Yue because of pain.

On the contrary, his offense was even more fierce, with purple rays shining in his eyes. After coming out, the purple light fell on Fang Yue's shoulders.

Fang Yue's shoulders exploded directly! Blood mist lingers!

"This void creature is too fierce! It's not afraid of life and death at all!"

Fang Yue was also in pain, his arms almost kept calling.

However, Fang Yue is not a cowardly person. He gritted his teeth, and from his body, a gray figure of the virtual fairyland level emerged. This gray figure of the virtual fairyland level was constantly devouring the flesh and blood of the strong. Now he has It has the strength comparable to the powerhouse of the eighth layer of the virtual fairyland!

Fang Yue can only slightly affect his will, but can't completely control his choice!

If it wasn't for any reason, Fang Yue wouldn't release it!

This gray figure was stunned for a moment, then glanced at Fang Yue, and finally did not choose to attack, but slaughtered the void creature on the third layer of True Wonderland.

Fang Yue's fist pierced through the opponent's chest.

The strong smell of blood made this gray figure excited!

He lunged at the opponent and opened his mouth wide.

The gray creature attached to the void creature and sucked greedily. Sucking the blood of the real fairy!

The void creature quickly weakened.

If this gray figure did not resist, I am afraid it would soon be able to completely **** up this true fairyland-level void creature.

The void creature had no choice but to return to defense and cast a secret technique to expel the gray figure in the body.

The energy of the void creatures was slightly dispersed, and Fang Yue's shattered shoulder blades grew again.

Fang Yue directly took out ten drops of life essence and blended them into the two wounds.

At the same time, the power of flesh and blood fell down in the void, and penetrated into the wounds on his shoulders.

The wound healed, the flesh and bones were reborn, and Fang Yue became alive again.

Fang Yue is the kind of most disgusting enemy.

I am not afraid of you hitting me!

A strong resilience comparison!

In the blink of an eye, I will be able to fully recover, and all your efforts will be wasted.

Fang Yue looked at another void creature. Without saying a word, he summoned a scarlet spear at the level of a virtual fairyland!

This thing is also Fang Yue's disgusting guy!

The scarlet spear burst out of the air and directly pierced the brow of the void creature.

The void creature sneered. Although he was in a human form, his own deity appeared at this moment.

He was transformed into a three-headed monster, with black fish heads on both sides, but a golden dragon head in the middle!

The golden horn above the golden dragon head in the middle gave light, and a silver light slammed into the spear!

The spear smashed into blood mist and penetrated towards the void creatures.

This blood fog is simply impossible to guard against! Spreading into the limbs of the void creatures, blood lines formed, eroding the body of the void creatures!

The void creature couldn't help showing a look of pain!

He had to allocate 10% of his power to suppress this **** energy!

The scarlet energy seems to be more corrosive to the void creatures, even the void creatures of the real fairyland level have to be prepared!

Both void creatures were wounded, and their strength was restrained.

On the other hand, Fang Yue was attacked and hunted down again, but now he is still alive, and there are no scars on his body!

Strands of flesh and blood power continued to fall from the void and into Fang Yue's body.

Fang Yue's cultivation was raised unscrupulously!

All this is the reward brought to Fang Yue from the gray figure killing the void creature!

"Aren't you all chasing me? Why do you think I am so bullied?"

Fang Yue sneered at the two void creatures.

It was the first time that Fang Yue was beaten so badly. He was always attacking and calculating others. When did he start being calculated!

The two void creatures looked at each other, and they both saw a look of shock in each other's eyes.

Two true fairyland-level void creatures chasing and killing a Human Race kid should be a task that should be caught by hand, but now they are all passive!

Now that one is making trouble, both of them may have to be planted here!

And Fang Yue's expression became more and more excited.

"I really don't know, if I kill you two of the Void Towers here, what kind of rewards can I give me? This breakthrough realm, one layer needs more energy than one layer! According to normal calculations, I will be here. Killing five or six thousand void creatures at the Great Saint Realm level on the eighth level may not be able to push me to the ninth level of the Leader Realm! However, if the real immortal was killed, it would be another matter! "

Fang Yue was against the guest, and had already targeted the two void creatures who had been half-crippled by him!

"kill!"

"kill!"

The two void creatures glanced at each other, and the two actually chose to join hands, and the two true fairyland-level void creatures turned into yin and yang forces.

One is the sun, like a blazing fire, and the other is the sun, like a full moon above the night sky!

Yin and Yang followed, and the aura of the two skyrocketed instantly.

Together, there is a vaguely breath of real immortal five-layer powerhouse!

A round of Yin-Yang Tai Chi is rolling towards Fang Yue!

At the level of the true fairyland, the void creature's comprehension of heaven, earth and Taoism is no weaker than the human race of the same level.

Yin and Yang symbiosis, the world is invincible!

Fang Yue's eyelids moved slightly, which reminded him of the yin and yang treasures, which ranked in the top 20 among the three thousand treasures.

It is also one of the three thousand treasures, the Juli technique is only ranked at the bottom of the three thousand treasures, but this huge technique has already benefited Fang Yue a lot.

And the power of the top 20 yin and yang treasures is naturally self-evident!

Fang Yue didn't dare to resist it.

The combat power of the fifth level of True Wonderland is far from comparable to that of creatures of his level.

Fang Yue's figure flickered, avoiding the crush of the Yin and Yang Dao Tu.

The next moment, Fang Yue appeared a hundred meters away, and he squeezed the seal, and a scorching sun burst out of his hands.

A round of sun fell from the horizon, directly blasting the two void creatures in the real fairyland.

The day of the fall collided with the yin-yang road map, and a yin force covered the sun.

The sun melted and disappeared.

However, the power of the Taiyin consumes part of the energy when counteracting the power of the Taiyin, and the original balance of Yin and Yang is instantly broken.

The two void creatures separated instantly.

Fang Yue's mouth showed a smile like that.

"The yin and yang technique is not so easy to master! You need to brew a little true yang in the lunar yin, and a little true yin in the sun! Only in this way can you achieve the effect of yin-yang transformation, and the effect of yin and yang. It's just a vain style!"

Fang Yue had already seen through the details of these two void creatures.

How can the Yin and Yang Dao Map be so easy to control? Even though there are three thousand treasures among the ten thousand races, there are very few who can truly understand the true meaning of it.

The two void creatures in the true fairyland separated, and they all vomited blood.

The treasure was broken, and they received a strong backlash. They were originally injured, and now it is even worse.

"Do you really think I can't kill you?"

Fang Yue gritted his teeth!

He refined three drops of mid-level supernatural power in one go!

His blood was burning like a god, and the noisy fire burned into the sky, causing the ground under his feet to shatter and crack!

Fang Yue's cultivation base has progressed by leaps and bounds, and he has risen straight to the eighth level of the Saint Realm. Although this increase in strength is a bit vain, his combat power has also gone further, reaching a level comparable to that of a real immortal fourth-level powerhouse!

"Reincarnation! Cut!"

Fang Yue held the saber of reincarnation in his hand, and cut it down suddenly.

The surging river of time is looming, and an ancient demon **** seems to come from the end of time!

"Do not!"

One of the void creatures opened his eyes wide, and he seemed to see his ancestors coming from the end of the long river of time. That is where his faith lies and the direction he pursued throughout his life!

The void creature lost all resistance, and his spirit appeared in a trance.

At this moment, the sword is coming!

The void creature was smashed into pieces by Fang Yue and cut in half!

The gray figure in his body jumped out and pounced on another void creature in the true fairyland!

In the sky, the blood pours down, the vision falls, and the wind whispers like weeping!

A void creature in a true fairyland fell, and his body faded in the void.

The body sacrifices, the soul swallows.

At the same time, a pillar-like power of qi and blood penetrated through the world, covering Fang Yue's body!

Fang Yue's blood, which was already boiling, became more vigorous!

He broke the realm one after another from the eighth level of the leader realm and rushed straight to the top level of the leader realm!

With the blessing of three drops of mid-level divine power, Fang Yue's cultivation base went one step further. He reached the fifth level of the true fairyland combat power, overlooking the remaining true celestial creature of the void, like a lofty divine mansion overlooking the mundane general.

The Void Tower shook slightly!

A pill was born from the top of the tower. There are nine pill with golden light. Each pill is at the peak of the virtual fairyland. When the nine pill are stacked, it forms a true fairyland pill!

"The pill was born! The tower shook! This Fang Yue actually killed a void creature on the third floor of True Wonderland on the eighth floor!"

Titanium's eyes widened, and even the eyeballs were about to come out!

The void creatures of the true fairyland level are so powerful, each one has the courage to be brave, even if the practitioners of the same level fight with them, they will lose more and win less, and this Fang Yue is the level of the leader. Kill a real fairyland-level void creature.

However, Tidam had not recovered from the shock.

This Void Tower shook again.

Another nine imaginary peak-level pills fell from the sky and fell into Ostaf's hands.

Ostaf's hands trembled, and the shock in his heart was like turbulent waves!

What kind of monster did he bring?

The level of the leader realm killed two real fairyland level void creatures one after another...

This gives people a dreamy feeling!

Chapter 2226: Void Battlefield

Let Ostaf give birth to an unreal feeling!

When did the void creatures become so weak?

Ostaf was thinking about this more complicated problem in some downtime!

At this moment, Fang Yue had just killed the second true fairyland-level void creature in the Void Tower.

The rain of blood in the sky became bigger.

The blood rain came to the world, this was an affirmation of the real fairyland powerhouses, and at the same time it was seeing them off.

Another thick column of qi and blood fell into his body.

Fang Yue's this time has really reached the extreme level of the leader of the leader, he feels that he is only a layer of window paper from the saint.

However, Fang Yue did not immediately choose to break through.

The tower of the void is full of dangers, and there are void creatures everywhere. The ghost knows whether there are any true fairyland-level void creatures around here. If there is, the opponent will

make a trick when he breaks through. Dao flesh and blood clones are basically able to report to Lord Yan!

Fang Yue stored 70% of the excess energy in the qi and blood column in the **** relic in his body.

The blood-colored relics shone with a faint blood-colored brilliance.

These blood-colored relics are like small black holes, greedy, and don't know how much energy they can hold.

In addition to the reward of qi and blood for killing two void creatures of the true fairyland level, a light golden breath of the thickness of chopsticks fell into Fang Yue's body in this void tower!

The quality of this pale golden aura is extremely high, as if it fits Fang Yue naturally and blends into Fang Yue's body.

However, Fang Yue didn't know what effect this thing had, but he instinctively felt that this pale golden aura was only good for him, not bad! This is definitely a high-end product that surpasses the power of vitality after refining, but I don't know the purpose for the time being!

This pale golden breath is the extra reward given to him by the Void Tower after he killed the void creature!

Guard the rules of the Void Tower, set things right!

Afterwards, the void dropped intermittently the power of Qi and blood.

This is exactly the benefit that Fang Yue's two gray clones released after killing the void creatures!

However, Fang Yue did not show any expression of joy now.

Instead, his eyes became quite serious.

He faced the gray figure face to face.

After absorbing the power of the flesh and blood of the void creatures, this gray figure had already broken through to the peak of the Void Wonderland.

Even this gray figure was already surrounded by a faint fairy air, and the tips of his toes had stepped into the real fairyland.

The stronger the strength, the stronger the independent will.

This gray figure has gradually lost control!

For Fang Yue, this is definitely not good news!

A half-step true fairy, the gray figure out of control may be more difficult to deal with than the void creatures of the true fairyland level.

This guy's growth is too strong, and he has inherited part of Fang Yue's methods and strength.

If he really turned his face, Fang Yue worried that he wouldn't be enough for the other party.

"How about a cooperation?"

Fang Yue rubbed his temples and said weakly.

"How to cooperate?"

The gray figure Fang Yue remained vigilant, but he had no intention of killing.

From a certain perspective, he was separated from Fang Yue's body, and Fang Yue can be called his creator or father.

In the absence of blood and blood, the gray figure is unwilling to turn his face with Fang Yue.

"I give you an opportunity to continue to be strong, and then how do you help me?"

Fang Yue couldn't think of any other cooperation conditions besides this.

"If you want to become a real real fairyland powerhouse, simply devouring is not enough to satisfy you! You need to cast your own fairy body and I can help you throughout the process! This fairy body is different, the ultimate achievement It is also different! And the stronger the immortal body that is cast, the more immortal energy is needed. I have immortal stone in my hand to help you continue to grow! Until I cast a fairy body of your own!"

In order to express his sincerity, Fang Yue even handed a low-grade fairy stone directly to the gray figure!

The gray figure hesitated a little, then nodded and agreed to Fang Yue's request.

"I already have my own independent will, and I also have my own name!"

The gray figure made a request again.

Fang Yue couldn't help being stunned. Such a simple request was simply too easy to satisfy.

"How about you call Fang Shan from now on?"

"it is good!"

The gray figure thought for a moment, and then smiled brightly.

"I just reached the peak of the virtual fairyland and touched the boundary of the true immortal! I need to return to your body to continue to understand the true meaning of the true immortal! If you need to fight at any time, you can summon me!"

The gray figure has just been born with a pure mind, and his biggest dream is to have his own independent name.

This condition has been met, and he can continue to return to Fang Yue's body with peace of mind!

For the gray figure, Fang Yue is his mother, and he feels most comfortable.

The problem of the gray figure is solved.

Fang Yue couldn't help but let out a sigh of relief. What he was most afraid of was that the gray figure appeared against him.

Now it seems that his worry is excessive!

The gray figure grows to such a point, it is tantamount to giving him an extra helper at the peak level of the virtual fairyland, and even if this helper breaks out of his own strength, he can fight against the new creatures in terms of combat power!

Afterwards, Fang Yue withdrew the two large sacred-level gray figures that he had released. He had to strictly control the growth rate of these gray figures. If each of them had their own independent will, the nine dragons might be different. A few guys with rebellious heart appear, then he is in trouble!

Fang Yue continued to walk in this eighth level. This eighth level was not as dangerous as he had imagined. Most of the void creatures were still in the third and fourth levels of the cultivation level of the Great Sacred Realm! Only a few are left over from the last riot that exceed the containment limit of the eighth floor of the Void Tower.

These guys who exceed the containment limit of the Void Tower are also Fang Yue's key hunting targets. Their realm is higher, and after hunting, Fang Yue will get even greater benefits! By hunting down a void creature of the virtual fairyland level, Fang Yue's energy and blood power is equivalent to the sum of killing nearly a hundred void creatures of the great sacred realm level!

More valuable, Fang Yue can get extra rewards for hunting these super-ranged void creatures!

Fang Yue spent three full days hunting and killing seven or eight thousand void creatures on the eighth floor of this void tower.

The weakest of these void creatures is the fifth level of the Great Sacred Realm, and the two powerful ones are the second level of the true fairyland! However, as Fang Yue's cultivation level improved, his combat power advanced, and the gray figure's cooperation, the void creatures that fell to the second level of True Wonderland were no longer Fang Yue's opponents!

In addition to the two void creatures on the second level of the True Wonderland, Fang Yue also killed the five void creatures on the first level of the True Wonderland. The dregs that have not even completed the casting of the fairy body can no longer be released by Fang Yue. In the eyes!

As for the void creatures of the Void Fairyland level, Fang Yue did not have complete statistics, but Fang Yue roughly calculated it. There are always more than 3,000 void creatures at the Void Fairyland level, and the rest are all void creatures at the Great Sacred Realm level. The above is a kind of addition.

The power of blood in Fang Yue's blood-colored relic is surging, and the power contained in it is even five times that of Fang Yue's deity!

However, Fang Yue was still dissatisfied. He didn't know what danger he would face when he wanted to step into the Saint Realm level. Naturally, the more backhands and accumulation, the better!

Including the light golden aura in his body has changed from one to nine at this moment!

Each light golden breath has the thickness of chopsticks, which are scattered on Fang Yue's forehead, limbs, spine and other vital parts!

Fang Yue vaguely felt that the rewards of this Void Tower would not be aimless, and these pale golden breaths might be of great use in the future!

Just as Fang Yue was about to continue cutting leeks and killing the void creatures that entered the Void Tower in violation of the rules, the voice of the Void Tower rang in Fang Yue's mind.

"The mission is completed. The void creatures that entered the Void Tower illegally have been killed 80%, and the remaining 20% of the void creatures have been expelled under the suppression of the Void Tower!"

The voice of the Void Tower fell.

Fang Yue realized that his welfare journey was completely over!

When the Void Tower was completely restored to its normal state, he could only continue to slay the void creatures at the Great Sacred Realm level, and then exchange the power of Qi and Blood!

A faint look of loss flashed in Fang Yue's eyes.

But this result is expected!

This wool will be worn out one day!

Void creatures that entered illegally in the Void Tower will always be killed by him one day.

His gains are not small, and they are worthwhile!

Especially this pale golden breath is quite precious, Fang Yue has a hunch that one day this kind of breath will be of great use!

Soon, Fang Yue was teleported to the ninth floor of the Void Tower with his record of killing 6,000 large-scale void creatures!

As the guardian of the Tower of Void, Tidamu could clearly feel that the eighth floor of the Tower of Void had been restored to its normal state under Fang Yue's efforts!

Now that the tower of the void is so powerful, after absorbing a large number of void creatures, especially those of more than a few true fairyland levels, this void tower has reached its peak state!

Immediately afterwards, the ninth, tenth, and eleventh floor Fang Yue passed smoothly!

These void towers are all void creatures at the Great Sacred Realm level. For Fang Yue today, the void creatures at the Great Sacred Realm level are no longer a threat, and even Fang Yue still has leisurely sentiment and grabbed some living specimens back!

When Fang Yue stepped onto the eleventh floor of the Void Tower, he felt that the aura around him was a bit wrong.

The Void Tower on this level is unprecedentedly vast.

There is an endless starry sky all around, and there are big stars up and down in the distance!

The Avenue of Stars in Fang Yue's body was eager to try, and there was an urge to break away from his body at any time!

"Has Fang Yue stepped into the void battlefield?"

Augusta gave a hesitant expression.

"It should be like this! Didn't you tell him that the eleventh floor of this Void Tower is the Void Battlefield?"

Chapter 2227: be cheated

Tidamu looked at Osguta. After Fang Yue cleared the void tower on the tenth floor, he should have chosen to return.

However, they waited for a long time but did not wait for any movement!

Not to mention that Fang Yue teleported out of the Void Tower, not even a ghost shadow!

There is only one explanation for this situation, that is, Fang Yue has entered the void battlefield!

"Damn fellow, although Fang Yue is powerful, but after all, he is only a junior at the leader level. How can you let him step into the void battlefield?"

Titanium looked at Augusta reproachfully!

Augusta showed a solemn expression.

"At the time, I saw Fang Yue only had the level of the leader realm and thought that he should come out when he was in the tower of the void. Who knew that he could kill the tower of the void on the tenth floor and step into the battlefield of the void? Now I apply to enter the Void Battlefield to bring Fang Yue back! Your Void Tower corresponds to the K12 area, right! I'm applying to go now!"

Augusta also had a guilty conscience and was at a loss. After he was killed in the tenth floor of the void, he did not enter the eleventh floor of the void tower, but would be teleported to the void battlefield. The void creatures suppressed by the Void Tower can only reach the level of the Great Sacred Realm. No matter how strong the void creatures are, they cannot break into the Void Tower!

The battlefield of the void is where the city of a thousand towers and the void civilization battle!

The Tower of the Void will brand the testers who have pierced the ten-story tower.

The void creatures killed by this tester can still be sacrificed directly to the Void Tower! At the same time, the Void Tower will also provide a steady stream of energy feedback for the testers!

However, there are very few practitioners who can defeat the Void Tower.

Therefore, most of the people who came to the battlefield of the void through the tower of the void are guards who directly teleported to the battlefield of the void through the tower of the void.

The guards can enter the void directly without going through the ten-level trial of the Void Tower! They hunted the void creatures in the void battlefield to obtain precious materials and ores, and in this way eliminated the vitality of the void creatures to reduce the pressure on the city of a thousand towers.

Fang Yue didn't know anything about this void battlefield, and there was no introduction to this void battlefield in his strategy.

After all, among the people who enter the city of a thousand towers, very few people squeeze their wool to his extreme.

Every layer has to kill at least three thousand void creatures before they stop!

The energy feedback of the Void Tower is of course precious, but for those with a high level, the amount of energy feedback is not enough to arouse his interest. Those with a low level can't directly kill the Void Tower like Fang Yue. That's why there is no record in the outside world that the Void Tower will enter the Void Battlefield after it has broken through ten floors!

However, Fang Yue didn't have the slightest fear when he stepped into the void battlefield. Instead, he had an urge to try.

Because this is his first time fighting in the void, the Avenue of Stars in his body is particularly active.

After entering the ninth level, Fang Yue's many Taoisms were in a state of stagnation!

The nine floors are perfect, and the ten floors are perfect.

The nine layers are a shackle and bottleneck for most practitioners.

How easy is it to reach the tenth level of Consummation!

At this moment, Fang Yue felt that the law of the Avenue of Stars that he had been stagnating for a long time had a slight bottleneck. For the first time, he observed the stars so close and touched the stars and various cosmic rays!

"A particle of dust can also evolve into a huge star! Stars expand to the extreme and they will become black holes and swallow all things in the universe! Originally these are rigid knowledge in textbooks, but when you really see and feel them, you can appreciate it. To this star universe is so vast and daunting!"

Fang Yue said to himself.

At this time, Fang Yue heard a voice.

"Hey, what are you doing here? Void riots are taking place in the K12 area, and now you have been forcibly called up!"

A saint-level sergeant in a light blue armor appeared behind Fang Yue.

He saw Fang Yue looking at the stars stupidly and smirking, but he didn't feel angry.

How can anyone now enter the void battlefield!

The guy in front of you is clearly a silly person, OK!

Seeing Fang Yue's smirk, the sage-level sergeant looked disgusted.

Fang Yue didn't refuse, he also wanted to see what this void battlefield looked like!

Perhaps he can fully experience his Avenue of Stars in this void battlefield. If this is the case, he would be a worthwhile trip!

Fang Yue followed the sergeant to a teleportation formation.

"This is the teleportation formation that can lead to the outpost of the Void Battlefield! You only need to move it a little bit. The mental power in the body can be teleported to the outpost of the Void Battlefield, which is the outer area of the core battlefield, as long as you can Kill enough three void creatures in the same realm as you, even if you have completed this year's military mission, you can choose to return here! Of course, if you want to become famous and develop in the army, your goal is not just to kill one. Two void creatures are as simple as that! You have to do your best to kill more void creatures and even the leaders of the void creatures to reflect your value, and exchange your merits for your bright future!"

If this sergeant's encouragement were replaced by a passionate young man in the city of a thousand towers to listen, he would indeed be greatly encouraged. During the instigation, he would take up his weapon to fight the void creatures desperately, and then exchange blood and life for it. Great feat.

But this kind of talk was just a bunch of nonsense in Fang Yue's ears.

I am not prepared to live long in this city of a thousand towers, it is not rare for you to give me meritorious service!

What I seldom is the chance of the power of the stars in this void battlefield!

Fang Yue nodded honestly, pretending to be infected by the non-commissioned officer's words, and then resolutely stepped onto the teleportation formation!

When Fang Yue stepped onto the teleportation formation, his figure disappeared in the teleportation formation.

The sergeant showed a disdainful expression: "Idiot, there is another one to die! I really don't know what kind of rewards and rewards the Void Clan will give me this time! Although the cultivation base of the master realm is lower, but after all It's a personal head!"

The sergeant smiled evilly. He is a spy of the Void Clan, deliberately abducting some wandering skirmishers in the Void Battlefield to throw them into the Void Clan's trap to kill!

It's just that he didn't expect that what he sent to the Void Clan was not a sheep, but a demon with fangs!

Fang Yue felt something wrong when he stepped onto the teleportation formation.

The other section of this teleportation array is connected to a deadly place, not the outer battlefield that the sergeant calls.

"Damn it, you lied to me!"

Fang Yue reacted, but he had reached the end of the teleportation formation!

This is a one-way teleportation array, unable to return to the original path.

Fang Yue's feet landed, and he immediately felt that the surrounding gravity showed a hundredfold increase!

This is an asteroid that has collapsed.

If he were to be a practitioner of another master level, it would be extremely difficult even to be able to move normally on the asteroid.

After all, Hundredfold Gravity is not only testing the strength of the practitioner, the pressure caused by this gravity on the viscera of the practitioner is also not to be underestimated.

However, Fang Yue walked freely on this asteroid, because he had already penetrated the secret of magneto-gravity in the laws of the earth.

Even if the gravitational force under his feet is strong, he can easily offset it by turning the law of gravity slightly.

"That senior official is out of ten. Nine is the spy of the Void Creature planted in the City of Thousand Towers Army, and even that guy himself is disguised as a Void Creature!"

Fang Yue's mind is not stupid, but he was a bit sloppy before!

He credulously believed the non-commissioned officer's words, so he fell into this trap!

At this moment, a long sword thin as a cicada's wings pierced out of the void.

The appearance of this sword is extremely abrupt, making people hard to guard against!

Fang Yue sideways slightly avoided the attack of this long sword.

"Shadow of the Void! Damn it!"

Fang Yue took a breath.

His palm plunged into the void, and it seemed that the palm sounded in the air, but Fang Yue's five fingers were closed, and there was a cracking sound.

A mantis-like void creature fell from it, and its neck twisted into a weird arc. This void shadow was easily killed by Fang Yue!

The shadow of the void at the saint level has fallen.

A wisp of pure blood fell into Fang Yue's body, and the corpse of the shadow of the void faded and disappeared, becoming a supply of the tower of the void!

However, the power of energy and blood gained from killing the void creatures in the Void Station is one and a half times that of killing the void creatures in the Void Tower! And the belongings of this void creature were not swept away by the Void Tower!

The void battlefield is more dangerous!

The greater the danger, the deeper the chance!

Fang Yue swept away the belongings of this Void Shadow. This is a treasure belonging to creatures in different civilization systems. Some of these items may not be possessed by other ethnic groups!

Fang Yue continued to move forward. There are no signs of life activity in this collapsed star. Its gravity is too high. Generally, only creatures above the Saint level can move in this star. Don't shit, ghosts are willing to live here!

"Is this void creature's trap only this saint-level void shadow? If that's the case, it looks too much at me!"

Fang Yue curled his lips, he could kill the shadow of the void with his hands, but Fang Yue instinctively felt that since this void creature was deliberately deceiving him here, it shouldn't be that simple!

"You have been surrounded! Quickly surrender and become the servants of my void clan, we can spare you not to die!"

Fang Yue suddenly turned around!

He saw that he was actually surrounded by void creatures.

This void creature came and went without a trace, as sensitive as Fang Yue did not catch the traces of them!

Chapter 2228: Void Mirror

Looking around, hundreds of void creatures surrounded himself in the center! The lowest cultivation base of these void creatures is at the level of the master realm! The backbone of them are all void creatures at the saint level, and there is a leader of the void creatures at the pinnacle level of the great saint!

Fang Yue was stunned!

Is this here to form a group to die?

He is worried that the void creatures are not enough to kill!

Didn't kill enough in the Void Tower, is this to compensate him?

And the void creature at the pinnacle level of the Great Sacred Realm looked disgusted.

"This human spy is not useful! It took a long time to get a guy from the top level of the leader realm. He has small arms and legs. Such a bit of meat is not enough for us!"

The void creature at the pinnacle of the Great Sacred Realm didn't pay attention to Fang Yue.

Even if he saw it with his own eyes, Fang Yue killed a sage-level void shadow in the void.

The shadow of the void is notorious for attacking high and crisp, good at hiding, killing a shadow of the void is nothing.

"Since you have delivered it to your door! Then I'm not welcome!"

Fang Yue showed a cruel and evil smile, he was like a tiger entering a flock!

Looking around, all the void creatures are his resources!

Killing these void creatures, the vitality and blood rewarded by the Void Tower is equivalent to the result of his hard work for decades!

Fang Yue, a hungry tiger rushed towards the void creature to kill!

The two saint-level void shadows are oncoming.

The long sword pierced all towards Fang Yue's killing.

However, the long sword as thin as a cicada wing stabbed Fang Yue's body, but it wiped out a string of sparks.

The blade was curled up, and no opponent Yue caused any harm! And Fang Yue's hands rushed, strangling their throats at the same time.

Click, click!

Both void shadows fell at the same time.

The leader of the void creature at the great sacred level also had an ominous premonition.

He finally didn't dare to despise Fang Yue, the expression on his face also had a solemn taste-this guy in front of him might not be easy to deal with!

The defensive power of this Void Shadow is indeed not flattering, but the Void Shadow's offensive power is also outstanding.

In general, even the creatures at the peak of the Saint Realm or even the new Saint Realm level dare not resist the attack of this Void Shadow, let alone Fang Yue's physical body to resist!

Fang Yue's physical body is so strong that even the sharp blades of the shadowy people can bend.

"This time it's hard stubble!"

The leader of the Great Sacred Realm peak in the phantom creatures never had the slightest retreat.

On the contrary, only this kind of powerful guy will have a more sense of accomplishment if he kills it. If it is just an ordinary human tribe bishop's main realm ant, he will not bother to pay attention!

"Formation! Combine! Void Blades join forces to kill him!"

Said the command of the void creature at the pinnacle level of the Great Sacred Realm with ease.

However, the void creatures behind him did not move with his command.

"Set up! Fight together! Don't you have ears?"

The strong man of the Great Holy Realm among the void creatures said in anger.

The class of the Void Clan is steep, and no one has ever dared to disobey his command!

However, this time, his shouting had failed again.

The Great Sage of the Void Clan slowly turned his head, but saw that the dozens of Void Blades behind him had turned into human skin and landed slowly!

On the bodies of those Void Blades, heads of gray figures were culled out!

They absorb the flesh and blood essence of the Void Blade, and kill it!

Fang Yue felt that a crisis was coming, and there was no time to waste time with these guys, so he released dozens of gray figures at the level of the Great Sacred Realm to kill these void creatures!

"East!"

Fang Yue's eyes fell to a certain position in the east!

He could clearly feel that his sense of crisis came from that position!

"What the **** is this!"

The void creatures at the Great Sacred Realm level obviously felt a strong crisis coming!

However, the source of his crisis was not the eastern position that Fang Yue sensed, but the gray figures in front of him!

This is a weird creature that can erode into the bodies of void creatures and quickly devour their flesh and blood essence!

This void creature at the pinnacle level of the Great Sacred Realm finally realized that the opponent he faced this time was not a weak sheep, but a hungry wolf in sheep's clothing!

However, his consciousness was too late!

Under the strangulation of the gray figure, all the void creatures have become the tonic of the gray figure.

The power of qi and blood came one after another, but it was obvious that the reward of the power of qi and blood given to Fang Yue by the void creature strangled by the gray figure was much weaker!

Because the flesh and blood essence in these void creatures have been swallowed up by the gray figure!

Therefore, there is not much energy in the sacrifice of their flesh and blood, and the feedback to Fang Yue is naturally much less!

However, Fang Yue couldn't take so much into consideration at this time!

Because he felt that the crisis from the East was becoming stronger and stronger!

Fang Yue's spiritual thoughts covered the past.

He can clearly detect that a volcano is slowly recovering at that location!

At the same time, one after another, the void creatures gathered towards that location!

And the aura of the void creatures gathered this time is stronger than the other!

Among Fang Yue's perceptions, the weakest ones are the void creatures at the virtual fairyland level, and there are many powerful void creatures at the true fairyland level!

This seems to be a grand gathering of void creatures and the meaning behind it is hard for Fang Yue to guess!

"Keep alive!"

Fang Yue wanted to stop the gray figure, he wanted to understand the source of the Eastern changes from the mouth of the void creature.

"Forget it!"

Fang Yue turned his head, he found that the gray figure was moving a little fast.

This void creature has all turned into pieces of human skin!

Let alone alive, even the corpse of a flesh and blood void creature is gone!

Fang Yue's brain hurts a bit, he is reflecting on whether he has done a bit too far!

Killed so cleanly, I want to catch my tongue then. It is not easy to understand the situation first!

If Fang Yue's thoughts were known to these void creatures, they would probably jump out of human skin angrily.

Our void creatures are also dignified, and they can be killed, not insulted!

The void creatures were dead neatly and cleanly, and Fang Yue didn't plan to look for another tongue. When he turned his head, he simply sneaked in the direction of the volcano. With so many void creatures going, there must be an opportunity for existence in that place!

Regardless of what the chance is, I will talk about it first.

Fang Yuebing looked for the direction of the volcano with the thought that he would rather kill by mistake and not let it go.

At this time, Augusta, who had gone through a series of processes, finally came to the void battlefield.

As a big boss in the city of a thousand towers, Augusta needs to go through an extremely cumbersome process to enter the void battlefield!

Augusta came to the battlefield of the void, with a hint of worry on his face!

Because his spirit was swept away, there was no Fang Yue's breath.

"There is less than half a Zhuxiang's time before and after this. Where can Fang Yue go?"

Augusta was a little bit anxious, if Fang Yue really stepped into the heart of the void battlefield, it would be bad!

Although Fang Yue's combat power was astonishing, in the core area of the Ten Thousand Clan battlefield, there were not only the powerhouses of the Void Clan's Spirit Fairyland and even the Da Luo Jinxian level, but the natural environment there was also quite dangerous.

It is nothing new to say that Fang Yue died inside. In recent years, the battle in the void battlefield has become more and more fierce, and even the strong in the spirit fairyland has fallen into more than one!

"Tiemuda! Help me find Fang Yue! If he is dead, it will be impossible for my Talisman Tao to make progress in a short time!"

Augusta anxiously asked for Temuda beside him.

What Tiemu Da came from was not the real body but a puppet clone of the virtual fairyland level.

Timudan is the guardian of the Void Tower. He has an important responsibility. It is impossible for him to stay at home and do experiments, write and paint, or be in the thousand towers. Wander around the city and the void battlefield!

"I can use the Void Realm to look back through time to see what happened in this space! But you also know that every time this Void Realm is used, it consumes a lot of money, at least three low-grade fairy stones!"

Temuda hesitated. This Void Mirror is a strategic existence. If it is used by Augusta privately, the expenses incurred will definitely not be out of the military expenses!

"Three low-grade immortal stones! This is no problem! As long as Fang Yue can be found, I would also like to produce 30 low-grade immortal stones!"

Hearing the road in the morning, death can be done at night.

For Augusta, Fang Yue may become the key to his future comprehension of the way of runes.

Fang Yue's Tao is different from him, but it is because of the difference that it is meaningful to learn from.

Augusta's eyes gleamed, and he threw three low-grade immortal stones casually.

"Really willing!"

Augusta chirped and said to himself.

The fairy stone is a strategic resource. Practitioners above the true fairyland need to use this thing when practicing, and the higher the cultivation level, the greater the demand for the fairy stone.

This Fang Yue is just a junior at the level of the leader, although the level of combat power has changed a bit. Although it is not a relative or a reason, Augusta would not spend the fairy stone in a hurry to find Fang Yue.

"Void Mirror, open!"

Even Augusta didn't have any comments, and Tidamu, who had the immortal stone, directly opened the Void Mirror.

In the mirror, a scent of Fang Yue was injected into it.

The surrounding area immediately showed Fang Yue's figure when he was just teleported out of the Void Tower!

"This Fang Yue really appeared here! However, he was later led away!"

Looking back in time, everything that has just happened is vividly visible and presented.

This Void Mirror really lives up to his name!

"Go to this direction!"

Titanium and Augusta walked in the direction indicated by the Void Mirror.

This void mirror kept flickering, and the two figures kept moving.

Soon they came to the teleportation formation. At this moment, the human spy was still waiting for the next target.

However, instead of waiting for the fat sheep, he waited for two death-like existences.

"Is this guy who flicked Fang Yue into that teleportation formation?"

The horror of Augusta's breath descended instantly and completely enveloped the spies of the human race.

Chapter 2229: Star creatures

The human spy was like a falling ice cellar, looking at Augusta with horror.

"grown ups....."

"Say, where does your teleportation formation lead?"

Augusta's voice was cold and merciless. Spies are the most hated group in the city of a thousand towers.

If it were not for the presence of spies, the situation in the city of a thousand towers on the battlefield of the void would be several times better than it is now!

How many powerhouses in the city of thousands of towers are all buried in the hands of these unscrupulous spies!

"The core of the void battlefield, the realm of stars!"

The human spy said tremblingly, and there was a commotion in his pants.

He was frightened by Augusta and peeed!

I'm not just a small spy at the level of a saint, He De, how can I invite a boss of this level to personally interrogate!

Augusta snorted coldly: "In the realm of stars, your teleportation place is far enough!"

With a flutter, the head of the human spy was squeezed by Augusta, the plasma burst, and the starry sky was scattered!

Augusta is a scientific researcher.

But the scientific researchers do not mean that he has no temper or strength!

Tidamu next to him knew that this boss was the real boss hidden in the city of a thousand towers.

When it comes to combat power, the strength of his true wonderland can only be his younger brother in front of Augusta!

The reason why this Augusta is not well-known is that almost all the guys who have seen Augusta shot are dead!

Augusta shot, never left alive, let alone alive, not even a whole body was left!

"The realm of stars! The core realm of the K12 battlefield! There are hundreds of millions of stars floating in that place, and any kind of danger may exist! Even if the peak power in the real fairyland goes, there are no shortage of fallen people! This Fang Yue still It really doesn't make people worry!"

Augusta sighed.

He had guessed before that Fang Yue must have been teleported away!

This void peripheral battlefield, he couldn't find a place where he slapped so much, he must have gone to the core battlefield.

"Can we go to that place? If we are discovered, we will inevitably be besieged! You and I are naturally not afraid of being killed, but if you can't kill, you will be trapped in a dangerous situation. It's also a troublesome thing!"

In the void battlefield, the most dangerous thing is not the void creatures, but the messy environment of the void battlefield!

All kinds of dangerous places emerge in endlessly, and there are some purgatory and prisons left by other civilizations!

In the City of Thousand Towers, there used to be a great Luo realm powerhouse who was trapped in the void battlefield for three thousand years. If it weren't for a ranger who occasionally encountered the seal that banned this great Luo realm powerhouse, I'm afraid now. A powerful man in the Great Luoqing is still eating farts in the seal!

"Catch two void creatures at the real fairyland level, and talk to the seniors of the void clan!"

Aosta shares did not rush into the transmission array.

The rule of this void battlefield is that the stronger the creature, the stronger the opponent it faces.

He and Tidamu are not weak, but because of this, they are more likely to encounter strong enemies.

Don't be able to save Fang Yue when the time comes, and if the two of them get in again, it would be really bad!

Therefore, the most appropriate way is to use "transactions" to make the void clan compromise and actively let Fang Yue come out.

The two looked at each other, and then walked towards the periphery of the void battlefield. They began to sweep to see if there are true fairyland-level void creatures worth catching alive.

At the same moment, Fang Yue had already sneaked into the foot of the volcano.

The cultivation base aura of his master realm is simply a natural disguise, no one doubts or pays attention at all!

The weakest of the void creatures present were all at the peak of the Great Sacred Realm. The virtual immortal was like a forest, and the true immortals exceeded ten.

His breath is like an inconspicuous little ant among a group of mammoths. Who would spend energy to pay attention to him!

Fang Yue's eyes were very thief, his eyes constantly swept around!

The smell of sulfur in this place is very strong, a bit of purgatory, and the elements of fire and earth are quite active!

Fang Yue continued to analyze the geomorphic features of this place.

In the crater, the dangerous atmosphere is getting stronger and stronger.

"Puff!"

"Puff!"

"Puff!"

The whole volcano is beating with some inexplicable melody!

Fang Yue raised his eyebrows slightly.

He finally realized what was wrong with this place!

This volcano seems to be a living creature, and its beating is more like the heartbeat of a behemoth who just woke up from a deep sleep!

I rub, if this whole volcano is a huge creature, then it is really nonsense!

The volcano is connected to the core of the earth!

Isn't this monster a star creature?

Fang Yue's knowledge of celestial creatures was also known from the strategy.

Void creatures are quite picky eaters, flesh and blood creatures are just their desserts after meals, and all kinds of rare minerals and metals are their favorite!

And the most favorite meal of the void creatures is the star creatures, which are born from the nucleus of the stars.

A star crystal nucleus is often formed in the body of a star creature. This star crystal nucleus is the source of power of the star creature, and a lot of star laws are brewing at the same time!

If the void creature can smoothly swallow or refine a star core, its own strength will often show a surge of leaps and bounds!

However, as far as the stars are creatures, there are almost no weak ones.

The number of such creatures is small, but the individual's combat power is extremely strong.

The starting point of star creatures always starts from the level of true wonderland!

If you want to hunt the celestial creatures, unless you are sure of it, every time the void creatures will suffer a large number of casualties.

The star crystal nucleus, the star creature, almost no such things exist in the civilization era where Fang Yue lived!

Fang Yue is eager to try the star creatures and the star core!

Fang Yue found a place and sat cross-legged. His mind was tranquil, like a calm lake. He began to silently realize the rhythm of the heartbeats of the stars in this volcano, and he felt the pulse of stars from this simple frequency !

"Puff!"

"Puff!"

"Puff!"

Gradually, Fang Yue felt that there was only one voice in the world, and he also tried to adjust the frequency of his heartbeat and the beating of the star creature to the same tone!

"I seem to have touched the pulse of this star! I felt the hot lava flowing in the veins of the earth! This magma is surging like blood in a human blood vessel! It is warm and rich!"

Fang Yue had a slight resonance with this world, as if he and this planet had become a whole.

The pulsation of this planet is extremely mysterious and mysterious. Every pulsation of the earth can make his physical body temper and become more solid!

Fang Yue did not find a way to break through the ninth floor of the Avenue of Stars, but he unexpectedly discovered the fusion point of Avenue of Stars and Avenue of Earth.

This earth pulsation is not only a part of the great road of earth, but also a part of the power of stars.

Dao is merged. The most feared thing is that there is no breakthrough point. Once there is a breakthrough, these two different daos can explode and merge quickly!

Fang Yue was completely forgetful of himself, and the things that happened around him had nothing to do with him, and the passing void creatures could not find Fang Yue's existence even if they passed by Fang Yue!

At this moment, Fang Yue has perfectly integrated with this planet. If someone sees Fang Yue, they will subconsciously treat him as a rock!

The progress of the two fusions is rapid.

The first layer of the Avenue of Stars and the Avenue of Earth is merged...

The second layer of fusion...

The third layer of fusion...

Fang Yue is completing the process of fusion of Taoism and principles that others may not be able to complete for thousands of years in the pulse of the earth again and again.

The star creatures in the volcano have completely awakened.

A black ape pops out of the magma!

This ape has a height of ten meters, and the hair on its body is black and shiny!

His breath is terrifying, and as soon as he appears, the void creatures below the virtual fairyland are directly vomited blood!

Wherever he passed, within a hundred meters of a radius, the powerhouse of the Great Sacred Realm could not get close!

Once you get close, you might be crushed into meatloaf by the breath of this ape!

The strength of the monkey is so strong that it exceeds people's imagination.

"This monkey at least has the cultivation base of the spiritual fairyland!" The face of one of the void creatures at the peak of the true fairyland changed slightly, and he whispered.

The faces of other void creatures changed!

If this monkey is really comparable to the immortal, even if they want to besiege, they will have to pay a huge price.

"Keep him! I have already notified that the spirit immortals in the clan will come soon! There is a strong man in the spirit fairyland sitting in town, plus so many true immortals and imaginary immortals, it shouldn't be for killing this star creature Question! According to the truth, this monkey should be ignorant at a young age. Although he has a strong body, his combat experience and methods should be seriously insufficient!"

The void creature has already made up his mind, and must let this monkey stay here forever.

Otherwise, once the monkey leaves the volcano, he will be like a dragon into the sea, and it will be difficult to find again.

This void creature feeds on star creatures, but in the eyes of star creatures, this void creature is also a rare delicacy!

If there is a chance, this monkey will definitely not let go of hunting and killing void creatures as his evolutionary resource!

At this moment, Fang Yue finally recovered from the state of enlightenment.

His Dao of Earth and Dao of Stars have merged into the fifth level in a short period of time, but the inspiration of the connection point of this earth pulsation has also been exhausted. If he wants to continue to merge, he needs to find other fits. point!

Fang Yue couldn't help holding his breath when he saw the situation in front of him.

This is definitely a fight between gods!

If his small body rushes up, ten of them are not enough for others to kill.

Obediently, these void creatures have dispatched twelve real wonderland powerhouses, two of which have even reached the peak level of true wonderland, only one step away from the level of spiritual wonderland.

The difference between Fang Yue and them is the difference between a 100-level large and a 10-level trumpet.

Chapter 2230: Fish in troubled waters

After this true fairyland, the gap between each small realm was bigger than the previous big realm.

Even if Fang Yue uses the mid-level divine power blessing, at most it is the real immortal fifth-level cultivation base combat power. When encountering this kind of combat power at the top of the true fairyland, basically those who died by hitting a rock with a pebble did not know how they died.

Fang Yue secretly prepared to sneak off.

This star crystal nucleus is definitely a good thing, but he also has to get it.

Didn't you see that this celestial creature is a super powerhouse at the spiritual fairyland level?

Being able to perceive the earth's pulsation, and fusing the way of the stars with the way of earth, Fang Yue is already a rewarding trip!

Fang Yue was about to sneak away.

However, this battle between star creatures and void creatures has broken out!

The volcano at the foot of the monkey exploded directly, and endless magma rolled and spread thousands of miles.

A number of real fairyland-level star creatures jumped out of it. The stellar creature bred in this volcano is not just the monkey!

A total of eighteen void creatures emerged from the volcano. Each star creature was at the level of true fairyland, and all of them were strong among true fairy creatures. Among them, the weakest void creature was the first in true fairyland. On the third floor, even the ninth floor of True Wonderland is powerful.

Moreover, the billowing magma fell from the sky, covering a radius of 3,000 kilometers, and each group of flames wrapped this huge meteorite.

This meteorite hits the ground and can smash the earth.

This scene gives people a sense of destruction!

"I wipe! Can't run away!"

Fang Yue was panicked and felt like a catastrophe is imminent.

Among other things, this volcano explosion is equivalent to a spiritual fairyland powerhouse's full shot.

The flame-wrapped rock is **** magma, and even the strong in the real fairyland dare not resist. Within the scope of the meteorite, the rules of time and space are chaotic, and Fang Yue can't teleport away.

"Scatter!"

A group of flames the size of a human head fell on Fang Yue. Fang Yue let out a low roar, and the flame dissipated, leaving only a rock stone the size of an adult's fist.

"Baby! This is the essence of stars!"

Fang Yue's breathing suddenly became heavy, and his eyes were red.

Originally, his thoughts about running away faded instantly!

This catastrophe will have a blessing after death. He is talking about his current situation. This star essence is the concentrated solidification of the power of the stars. I don't know how much power of the stars is contained in it.

The magic weapon at the peak of the virtual fairyland, as long as a small amount of the essence of the stars can be refined, it can absorb the power of the stars, slow the essence, and hopefully transform into a fairy tool! And if the number of star essences is enough, you can even directly push the magical tools of the virtual fairyland to the level of the true fairyland!

And this celestial essence can assist Fang Yue to comprehend the laws of stars! Although this is extremely extravagant, if the bottleneck can be broken and the Avenue of Stars can be promoted to completion, it will be worth the price no matter how great!

Fang Yue stuck out his palm and directly took that star essence into his hand.

Then he looked around and started looking for the essence of stars!

Fang Yue discovered the preciousness of this star essence, as did the void creatures.

Void creatures need this star essence more than Fang Yue, this thing can become their evolutionary resource.

However, this void creature does not have Fang Yue's ability, and can disperse the flames on the meteorite with a roar.

Many void creatures were wounded by the flames.

From the heyday, he quickly entered the half-worn state. The void creatures of the Void Fairyland level were inferior to Fang Yue, and now they are even killed by Fang Yue!

Their corpses were refined by the Void Tower, and the powerful energy of qi and blood fell on Fang Yue's body!

Fang Yue quickly searched the void creature's legacy, not even leaving them a single hair.

Pieces of star essence fell into Fang Yue's hands, the smaller ones were only the baby's palms, and the larger ones were already comparable to the grinding disc!

Fang Yue's eyes are almost red!

Where is this picking up meteorites, it is clear that they are picking up money again!

However, he was swaying wildly on the verge of death.

All around are creatures of the real fairyland level, except for the void creatures which are stars creatures, none of them are good stubbles.

And among them, there are so many powerhouses in the true fairyland that are heinous, and the powerhouses in the true fairyland and the spiritual fairyland where the dragons see the head and the end are now appearing without money!

A true celestial three-layer star creature suddenly appeared in front of Fang Yue.

It stared at Fang Yue, with a faint color of doubt in its eyes.

This guy's appearance is not of the same kind at first glance, but there is a hint of star power on his body as if he is their compatriot!

The brains of the star creatures are not very easy to use, they are still in a relatively ignorant state just after birth.

Upon seeing this, Fang Yue suddenly exuded a powerful atmosphere of the Avenue of Stars.

Phantoms of stars floated up and down around him.

In terms of breath, Fang Yue at this moment is more like a star creature than a star creature.

"My own people! All my own people!"

Fang Yue said furiously.

Fang Yue's heart was tight, and he didn't know whether this star creature would be fooled. So he is ready for the second hand, and the Samsara Knife is already ready to go. As long as this star creature turns his face, he will be greeted with a slash.

The star creature hesitated for a moment, and then showed a kind smile: "Your own person! You are very face-to-face. Maybe you are a stellar creature wandering away. As a compatriot, I kindly remind you! The weakest star creature like you Well, don't participate in this battle, well, it is like a whirlpool that will strangle all the weak who participated! We are just bait! The real strong still lurks in the dark and never shot!"

This star creature naturally complemented Fang Yue's origins.

A faint smile appeared on Fang Yue's face.

sensible!

The way is right!

Only in this way can we live long!

Fang Yue took an admiring look at the star creature, and then continued to pick up the star essence on the ground.

The words of this celestial creature are actually quite rich.

This is a trap!

A trap for void creatures!

Void creatures and star creatures hunt and prey with each other, and the hatred between the two parties can be said to be uncommon.

It is normal for this void creature to prey on celestial creatures.

Star creatures are also expected to find a way to counter-kill.

But I didn't expect that this seemingly honest star creature turned out to be a group of old men.

Fang Yue's movements gradually slowed down, maybe this time he can take advantage of the struggle between the two ethnic groups!

It's even a good choice to be promoted to the level of Saint Realm on this star. Fang Yue has already mastered the earth's pulse of this planet just now, and he can use the core power of this star to improve his combat effectiveness!

Fang Yue's eyes narrowed, and his heart had already flashed many choices!

How could he not profit from such a wonderful battle?

This celestial essence is just one of them. If he can get the void creatures beyond the real fairyland level of his killing range, he will really make a lot of money!

As soon as Fang Yue and the star creature separated, he was stared at by the void creature.

The logic of the void creatures is very simple. If they are not their own people on this planet, they are definitely enemies.

What's more, this guy just sneakily connected with the star creature, then the answer is quite certain!

This guy must be a celestial creature.

Since it is an enemy, there is no choice but to kill him!

A Void Blade at the pinnacle level of the Void Fairyland suddenly launched a sneak attack on Fang Yue.

A blade of shattered void appeared in front of Fang Yue in an instant.

"I wipe it! These star creatures are not enough for you to be busy, and there are still leisure and leisure to bring me trouble!"

Fang Yue was swearing directly!

The void creatures at the peak of the virtual fairyland are not terrible, but they are also the existence of the peak of the virtual fairyland after all, and it is a very difficult task to kill the opponent silently.

But as soon as their fighting made a move, it attracted the attention of other void creatures, and the next time Fang Yue had to face the siege of the true fairy-level void creatures!

Now it's a fight between gods, and he, a mortal, doesn't want to be implicated!

Fang Yue looked at the fire and rain in the sky, his eyes rolled, and he noticed for a while.

Fang Yue's hands were imprinted, and he cast his spells, pulling the meteorite towards the blade of the void at the peak of the virtual fairyland!

In this meteorite rain, the meteorite summoned by Fang Yue was not conspicuous.

Fang Yue smashed the blade flying towards him with one palm, and at the same time, a meteorite with a diameter of nearly ten meters fell towards the direction of the blade of the void.

Void Blade showed a look of disdain.

How could such a clumsy method hit his body.

The Void Clan is known for being good at the power of space, it only needs him to use a little method...

Nani?

Because the space around Mao was blocked, I couldn't teleport!

Void Blade instantly panicked.

Can't teleport, he is a living target!

Before Void Blade could figure out the reason, the howling meteorite hit him!

The meteorite burst, a sea of flames spread suddenly, the blade of the void was burned alive, and his body exudes a smell of cooked meat.

Fang Yue's meteorite is more terrifying than the meteorite that fell from the sky!

Among them are two different roads, the road of soil and the road of fire.

After the meteorite exploded, the sea of fire gave birth, the flame was the legendary five-color fire, and even true immortals could burn to death, let alone the crispy void blade at the peak of the virtual fairyland!

Of course, this is not to say that Fang Yue's strength is stronger than the monkey in the spiritual fairyland that summons the meteorite.

But because the monkeys used a group of continuous attacks, and Fang Yue used a single attack, the energy consumed by the two was not an order of magnitude at all!

Fang Yue watched the raging fire continue to burn, and the body of the Void Blade was quietly swallowed by the Void Tower.

Another powerful qi and blood power descended.

This Void Tower is a real treat this time!

In a short period of time, it has swallowed dozens of void creatures of the Void Fairyland level through Fang Yue, and this is not even the ones that Fang Yue killed in the Void Tower!

"so close!"

Fang Yue wiped the sweat bead on his forehead. In fact, he was ready to retreat.

Now his only advantage is that his breath is weak, not enough to attract the attention of those big guys, and because the enemy is in the dark, he has the advantage of sneak attack!

Once his strength is put on the surface, it is the result of being bombarded and smashed!
