

God tier Farm 1021

Chapter 1021: Can't be biased (1)

Xia ruofei did not need to worry about the abalones in the spirit map space. In such a good natural sea environment with rich spiritual Qi, they would definitely grow and grow in the future. When the time came, the sales rights in the United States would be given to shengbang group.

Anyway, as long as it was not an investment, Xia ruofei would still welcome normal cooperation.

What's more, shengbang group had a great influence in the United States, and their sales channels were also very complete. If paradise Corporation wanted to explore the United States market, shengbang group was a very suitable partner.

"Deal!" Tang He was overjoyed. Ruofei, I'll keep an eye on this auction. I've already applied for a flight route for my private jet. I'm going to return to the United States directly, so I'll take my leave first!"

Xia ruofei thought to himself, 'this old man can't be in such a hurry to leave because he can't wait to taste the one – headed abalone, can he?

It was no wonder that Xia ruofei was so suspicious. After all, when Guo Song and the others came over just now, old master Tang did not seem to be in a hurry to leave. Instead, he was just watching from the side. Now that he had obtained two top – Quality one – headed abalones and even applied for the flight route, it was really unreasonable for him to be in a hurry to leave.

However, Xia ruofei would not expose her stupidly. He just smiled and said, ""Since that's the case, I won't keep you! I'll see you out, old Mr. Tang!"

Xia ruofei and Tang He walked side by side to the entrance of the villa. The personal assistant who had already placed the abalone came forward and handed over a cash check with both hands.

Tang He took the check and looked at the amount. Then, he took out a gold pen from his pocket and signed his name on it. He handed it to Xia ruofei with a smile.

The transaction of the two one – headed abalones involved 6 million Chinese dollars. Although it was not a small amount, there was no need to go through an offshore company account. Tang He directly wrote a cash check in Chinese dollars.

After all, this amount of money was equivalent to more than one million USD. The offshore company had more than twelve million USD from the gold Phoebe nanmu transaction and had plenty of funds. In addition, the profits from Paradise Farm and the winery would be settled with the offshore company. Once things got on track, it would be at least ten million USD a month. Hence, Xia ruofei settled this small amount in HxB.

He didn't even want to deposit it into the company's public account. He would just keep it in his personal account for his daily use.

Xia ruofei took the check and put it in his pocket without even looking at it. Then, he sent Tang He to the car and the two waved goodbye.

Xia ruofei watched as the car left the villa's courtyard before he turned around and returned to his house.

As soon as he entered the living room, Xia ruofei heard his phone, which he had just put on the coffee table, vibrate.

He quickly walked over and picked up his phone. He looked at the caller ID and saw that it was MA Xiong from Hong Kong.

Xia ruofei could guess why MA Xiong was calling. He smiled and answered the phone. "Mr. MA, how are you?"

"Xia Sheng! I've seen the photos and videos of your company's dried abalones!" MA Xiong's voice was filled with excitement. "That really gave me a huge shock ..."

On the way back to the hotel, Guo Song had already asked Luo Jiahao to send a copy of the materials they had collected today to MA Xiong.

Guo Song realized that his boss would definitely be interested in these things.

As expected, MA Xiong called Guo Song personally and asked him about the dried abalone in detail.

Guo Song couldn't stop praising the abalones. He even felt that no words of praise could compare to the top – Quality one – headed abalones. It was only when he saw the heavy and huge one – headed abalones placed together with his own eyes that he could feel the strong visual impact.

After MA Xiong understood the situation, he called Xia ruofei immediately without delay.

Xia ruofei joked, "Mr. MA, I think I told you about the dried abalone before!" Did you not trust me before?"

MA Xiong was a little embarrassed. "I naturally have complete trust in Xia Sheng, but I was still shocked when I saw the photos and videos of the abalones with my own eyes ..."

Xia ruofei couldn't help but laugh.

"Xiasheng, I have a presumptuous request ..." MA Xiong asked.

"Mr. MA, I'll reserve two one – headed abalones for you. However, I'm planning to keep the three heaviest ones for the finale of the auction. I hope you can understand ..." Xia ruofei said.

Xia ruofei was well aware of MA Xiong's intention for calling him in a hurry. He had already sold two abalones when Tang He asked for it, so MA Xiong could not be biased. He just had to do it according to Tang He's standards.

Of course, this was the end of the 'back door'. Otherwise, there would only be 25 one – headed abalones in total, which would not be auctioned at all.

MA Xiong was overjoyed, "alright!" Xia Sheng, thank you!"

MA Xiong did not think that Xia ruofei would leave the three largest pets for him. The rarer an item was, the more valuable it would be. The best would naturally be left for the auction.

The main reason MA Xiong called was that he was worried that Hengfeng auction house would be hosting this batch of abalones, so it wouldn't be convenient for him, the boss of Hengfeng, to bid for it.

Otherwise, people would say that he deliberately raised the price. Even if he successfully bid for one or two abalones, the media would definitely question that Hengfeng group bought and sold themselves just to hype up a sky – High transaction record.

?

Chapter 1022: Can't favor one over the other (2)

The best way was to get one or two from Xia ruofei before the auction started.

After seeing the pictures and videos of the abalones, MA Xiong's heart was already itching. As a native of Hong Kong and a super – rich man, MA Xiong had no resistance to the temptation of these high – Quality one – Head abalones.

Before he made the call, he was still thinking about how to phrase his words. After all, Xia ruofei's abalones were going to be auctioned. He didn't expect that before he could say anything, Xia ruofei would take the initiative to leave two for him. He was really good at dealing with people!

That was why MA Xiong was overjoyed.

Xia ruofei chuckled."Old master Ma, you're too kind. This is what I should do. You've helped me so much!"

"It's a win – win situation, a win – win situation ..." MA Xiong said with a bright smile.

"Haha, right, right, right, it's a win – win situation!" Xia ruofei smiled and said,"Mr. MA, why don't you pick some dried abalones when I come to Hong Kong?"

"Alright, alright."

In fact, MA Xiong wanted to fly to San Shan to pick abalones right away. However, Xia ruofei would be going to Hong Kong with the abalones in a week or two. Besides, MA Xiong was a billionaire. It would damage his image if he was too impatient. So, he agreed to Xia ruofei's suggestion.

After ending the call with MA Xiong, Xia ruofei took the initiative to tell Hu Zi's mother about the situation.

When she heard that the abalones were sold for three million Chinese dollars each, she couldn't help but be dumbfounded.

Hu Zi's mother could imagine how precious these abalones were, but the sky – High price still overturned her understanding of prices.

Of course, after she came back to her senses, Hu Zi's mother was happy for Xia ruofei. She really treated Xia ruofei like her own son now. She was genuinely happy that Xia ruofei's career was booming.

Xia ruofei chatted with his godmother for a while. Seeing that it was still early and his godmother was about to start preparing lunch, he picked up his bag and walked towards the general office building not far away.

Since the abalones were going to be auctioned, the packaging would have to be redesigned. Although MA Xiong's publicity team was very professional in this, Xia ruofei still wanted to train the designers in his company.

Xia ruofei did not look for Feng Jing. Instead, he went straight to the big office in the marketing department.

At the moment, the marketing department was in charge of advertising, sales, e – commerce, and other businesses. There was a special art team responsible for product packaging, promotional posters, online shops, and all other work related to graphic design.

As soon as Xia ruofei entered the office, he saw that everyone was working hard in the various booths. Some employees were in a hurry with folders in their hands.

Taoyuan company was a new agricultural product company. The average age of the employees was very low, and the company's welfare benefits were very good, so everyone was very motivated, and the entire company's internal atmosphere was very motivated.

Many employees were stunned when they saw Xia ruofei. Then, they immediately greeted him respectfully.

In the company, especially in the big offices of the lower departments, the employees were very surprised to see this Big Boss who was usually elusive.

"President Xia!"

"Hello, President Xia!"

Xia ruofei also smiled and nodded at them.

He went straight to the art design team's office area. The marketing director, Xiao Qiang, quickly came out of his small cubicle and walked quickly to Xia ruofei.

"President Xia!" Xiao Qiang greeted him from afar.

The big boss almost never came down to the ground, so his sudden visit this time made Xiao Qiang a little nervous.

Xia ruofei smiled."Director Xiao, it's nothing. Go on with your work. I have a small design for the art team to help with."

Xiao Qiang immediately heaved a sigh of relief and quickly shouted,""Little Zhong, come here!"

The head of the art team, Zhong Lingling, was a girl in her late twenties. She was working in front of a computer. She stood up and walked over quickly.

Zhong Lingling was wearing a simple T – Shirt and jeans, and her hair was tied into a ponytail. She still looked like a child.

However, she had a lot of experience in graphic design. She had been working in this field for four or five years after she graduated from secondary school.

She was also Lin Qiao's mentor.

In fact, many people who worked in graphic design might not have a high educational background, and many of them were from secondary or technical schools. However, if they had strong professional skills, their salary would still be very good.

Zhong Lingling was the head of the art design team at paradise Corporation. With the bonus and benefits, she could earn at least seven to eight thousand Yuan a month, which was a high level that was hard for most of the secondary school graduates to reach.

Zhong Lingling came up to them and greeted, "Hello, President Xia! Hello, director Xiao!"

Xiao Qiang said, "little Zhong, President Xia has a design job for your art team. You must transfer the most capable people and bring out your unique skills. Do you understand?"

"Alright!" Zhong Lingling quickly replied.

Xia ruofei chuckled and said, "it's not that exaggerated. It's just a small task. It's very easy." I'll just take a look around and talk to Lingling about work. "

Xiao Qiang definitely wanted to accompany Xia ruofei, but since the boss had spoken, he could only nod and say, "Alright, President Xia. Call me if you need anything!"

?

Chapter 1023: Can't be biased (3)

Xia ruofei smiled and nodded.

After Xiao Qiang returned to his office, Xia ruofei smiled at Zhong Lingling and said, "Lingling, show me your office!"

"Yes, President Xia!" Zhong Lingling said with a smile.

She had a good relationship with Lin Qiao and never hid her skills. She taught Lin Qiao patiently every time. In addition, she was young and had a good attitude, so she was not as nervous in front of Xia ruofei as she was in front of Xiao Qiang.

There were about seven or eight people in the art design team, and they occupied a few booths in the northeast corner of the office. Zhong Lingling led Xia ruofei over and introduced them to Xia ruofei.

Recently, the art team's main work was still on the overall design and beautifying of the flagship store. There were four art designers who were divided up to do this.

The flagship store of heavenly cats was upgraded from Xia ruofei's paradise rotisserie. According to Feng Jing's thoughts, the flagship store of paradise Corporation would be managing all of paradise

corporation's products in the future. In the short term, it would mainly be selling Ironhide Kaede and succulent seedlings.

Xia ruofei immediately saw Lin Qiao who was working hard in front of the computer.

Xia ruofei made a shushing gesture to Zhong Lingling and then stood behind Lin Qiao, watching quietly.

Lin Qiao's computer had the PS software on. It seemed that she was making a promotional poster. She stared at the computer screen, moved the mouse quickly, and pressed the combination shortcut keys with her left hand from time to time. She seemed to be quite familiar with the use of this software.

The little girl was so engrossed in her work that she didn't even notice the person standing behind her. From time to time, she would stop and look at the computer screen with her chin in her hand, deep in thought. Then, she would operate the computer to make fine adjustments to color matching or a certain design element.

Xia ruofei watched for a full six to seven minutes. Zhong Lingling and the art designers who were blocking the area couldn't help but cover their mouths and laugh. Lin Qiao didn't even notice.

It wasn't until she finished adjusting the font of the poster that she let out a long sigh of relief. She stretched her back and moved her sore neck.

Lin Qiao reached out and touched Xia ruofei who was standing behind her.

She was also shocked. She quickly turned her chair around and said, "I'm sorry, I'm sorry ... Brother ruofei! What are you doing here?"

When Lin Qiao saw Xia ruofei, her tone immediately became quite surprised.

Xia ruofei chuckled. "I've been standing behind you for a long time. Aren't you a little too engrossed?"

Lin Qiao blushed and said, "How can you be like this? You didn't even say anything when you came and just stood behind them. Don't you know how scary it is?"

Xia ruofei shrugged and said, "I'm not a Japanese who entered the village. What do you mean by silent?" So many people greeted me just now, even director Xiao from your marketing department came out. You were too focused and didn't hear it. "

"Okay!" Lin Qiao pouted and nodded.

Then, she asked curiously, "brother ruofei, what are you doing here?" Could it be that you, the big boss, have a conscience and are ready to give us poor art designers benefits?"

The girls in the art design team couldn't help laughing and looked at Lin Qiao with envy.

Although Lin Qiao was also their colleague, they knew that Lin Qiao was different from them. Not only was she the younger sister of the company's boss, but she was also a top student who had just been admitted to Heron Island University. Her future was limitless!

Xia ruofei chuckled and said, "what are you thinking?" Of course I'm here to assign tasks!"

Then, Xia ruofei said to Zhong Lingling, "There's an exterior packaging design job that I'll have to trouble you with."

"You're welcome, President Xia. It's our job," Zhong Lingling quickly said.

Lin Qiao was also very interested and quickly said, "Design the packaging? Brother ruofei, let me do it!"

Xia ruofei said, "aren't you starting school soon?" Besides ... You still have work to do!"

Lin Qiao said indifferently, "there are still a few days before school starts!" As for the work on hand ... Which art team doesn't have a few jobs on hand! Now that there are only a few of us and many things to do, we are used to it! He had sinned in his previous life, so he had made a picture in this life! Right, master?"

Lin Qiao turned to look at Zhong Lingling with a smile.

Zhong Lingling smiled awkwardly. This was what the art girls would always say when they joked.

This was because art design work was time – consuming, and design required creativity. When a task was handed to the hands, the process from creativity, planning to specific design was very complicated. If the leader was not satisfied, he would have to redo it.

It was common for designers to redo things. Sometimes, it was normal to do seven or eight drafts in a row for a job.

However, they could joke in private. In front of Xia ruofei, the boss, and Lin Qiao, as his sister, they could say it, but ordinary employees like them could not.

Xia ruofei looked at Lin Qiao helplessly and said, "Lingling, I'll leave the task to you as the team leader. You can decide how to assign the tasks."

After that, Xia ruofei listed out some requirements for the seal of the dried abalone, such as size, style, elements to be included, and the middle part to be left empty to show the real details of the dried abalone.

Zhong Lingling quickly jotted down notes in her little notebook and nodded as she wrote.

She heaved a sigh of relief. Xia ruofei's task wasn't too complicated. If she had done the design herself, she could have completed it in one night. Even if she were to train a newbie, she could have completed it in one or two days.

After Xia ruofei finished, Zhong Lingling immediately asked, "President Xia, when do you want this design?"

"I'll give you three days. Can you finish it?" Xia ruofei asked after some thought.

"No problem!" Zhong Lingling replied with a smile. We'll be able to get the first draft the day after tomorrow!"

Xia ruofei gave him a thumbs up and said, "Alright then, thank you for your hard work!"

Lin Qiao shouted from the side, "master, let me do this!" I'll definitely do a good job!"

Zhong Lingling looked at Xia ruofei hesitantly.

Xia ruofei shrugged his shoulders and smiled. ""I've said it before, you decide for yourself! I'll be leaving first, you guys work hard ..."

With that, Xia ruofei strode out of the office.

Lin Qiao held Zhong Lingling's hand and looked at her expectantly.

In fact, Lin Qiao was already able to complete some design work on her own. However, this was a task that Xia ruofei had personally assigned to her. Zhong Lingling was worried that Lin Qiao was not very familiar with the task and that the final product would not satisfy Xia ruofei. Not only would she have to redo it, but she might also delay Xia ruofei's time.

Zhong Lingling weighed the pros and cons for a while before she said, "How about this! This is a task personally assigned by President Xia. We have to make at least three sets of designs for President Xia to choose from! I'm one, so is Qiao'er, and then ... You're done with the sub – Page for Lihua, right? Then she's one too, let's each make a set!"

"Yes, sir!" Lin Qiao said happily. Then, she eagerly took the notebook that Zhong Lingling had just made and snapped a few photos with her phone. After that, she immediately saved and closed the poster she had just made and created a new SD file. She then skillfully pulled the reference lines and began to design the packaging.

Meanwhile, Xia ruofei strolled out of the marketing department's office. He had wanted to take a stroll back to the villa and wait for lunch, but he bumped into Feng Jing after a few steps.

Feng Rao was stunned for a moment, then she smiled and said, ""Chairman, I was just about to call you! I didn't expect you to be in the office building! Do you have time now? I have something to ask you ..."

?

Chapter 1024: rebuking the square (1)

Xia ruofei smiled and said, "let's go!" Let's talk in my office!"

The two of them returned to Xia ruofei's office. Xia ruofei opened the ice bar and took out some tea leaves to make tea. He smiled and asked, ""Boss Feng, what's the matter? why are you in such a hurry?"

Feng Rao glanced at Xia ruofei and said, ""Chairman, I've been paying attention to the locations for the company's headquarters to move to the city. I've found a few places and wanted to report to you."

The company's headquarters moving to the city was the general trend. After all, Tao Yuan farm's location was too remote and didn't match the identity and image of a big company.

Not to mention other things, just to discuss cooperation or have business partners to visit the company, the first impression would definitely be greatly reduced when they saw that the Paradise corporation's headquarters was actually in a coastal fishing village.

Feng Jing had mentioned it to Xia ruofei a few times, but she knew that Xia ruofei was a little lazy and it was unrealistic to expect him to make the decision on his own. Therefore, she took the initiative to follow up on this matter.

Xia ruofei scratched his head awkwardly and chuckled, "I've been too busy recently and didn't have time to take care of this matter. Boss Feng, tell us about your inspection!"

"Chairman, I've picked two places after a round of inspection and selection ..." Feng Jing cleared her throat and said.

Then, Feng Rao introduced the two places she had chosen to Xia ruofei.

One of the three locations was located in the city center. The advantage was that it had a good location and complete facilities. It was the CBD area of Sanshan city. The disadvantages were obvious as well. It was expensive and the land was a little small. Moreover, the shops were only selling and not renting.

The second plot of land was also within the Second Ring Road. It was in a good location and was a commercial office building project, Hengli Times Square, developed by a well – known domestic real estate company. The price was also quite appropriate. Although the real estate price in Sanshan city changed every day and showed signs of breaking through the sky, overall, the price of about 20000 per square meter was still reasonable. Most importantly, this company also had five floors as self – sustaining assets. If they chose this plot of land, they could also rent it out, which was equivalent to buying it all in one go. If they rented it, the one – time investment would be much less.

After Xia ruofei listened to her carefully, he didn't rush to express his opinion. Instead, he smiled and asked, "Boss Feng, what's your opinion? Which one do you prefer?"

Feng Rao had clearly thought about it before she said, "From a long – term perspective, the office buildings in Heng Li are more suitable. It would be best if we can buy two to three floors ..."

Feng Jing didn't sound too confident. After all, this was an astronomical figure. Based on her understanding of the company's financial situation, she knew that the company didn't have that much liquid funds in its account.

Xia ruofei just smiled and said, "You can continue!"

"If it's difficult to buy it out directly, it's better to rent it first," Feng Rao nodded. Of course, the first location is closer to the bustling city center, which will be more helpful to the company's brand. The problem is that it will also require a large amount of capital. "

Xia ruofei nodded. "Have you calculated the amount of capital needed for each plan?" he asked.

"I've done a rough calculation. The single – story office building in the city center is 2000 square meters, and the unit price is 30000 Yuan per square meter. It will cost 120 million Yuan to buy two floors. This doesn't include the investment for the renovation. I estimate that the total investment will exceed 200 million Yuan."

Xia ruofei smiled without changing his expression and asked, "What about the office building in Hengli?"

“Hengli is priced at 20000 Yuan per square meter due to its location,” said Feng Jing. “The single floor is about 1500 square meters. If it’s here, I suggest you buy or rent three floors at once.”

Xia ruofei nodded and said, “if it’s sold out, it’ll be about 90 million.”

“I haven’t even included the renovation costs.” Feng Rao added.

Feng Rao hesitated for a moment before saying, “Chairman, how about ... We rent the office building first ...”

Xia ruofei smiled. “If you want to do it, do it in one go. I’ll solve the funding problem.”

“That would be for the best, of course!” Feng Rao blurted out.

Xia ruofei laughed and said, “CEO Feng, I can’t make a decision at the moment.” How about this, you can sort out the specific situation of the two locations and send me a copy of the information. In addition, we can find time to go to the site for an on – Site Investigation. ”

“No problem. I’ve already organized the information. I’ll get Liu Qian to send it over to you in a while.” Feng ke said.

She had always been a quick worker. Since she had already reported to Xia ruofei, she must have made the necessary preparations.

Xia ruofei knew Feng Jing’s style. He smiled and said, “Alright,” he said.

“We shouldn’t just limit our vision to these two locations. We can look further!” Xia ruofei continued.

“Chairman, I don’t quite understand ...” Feng Jing said, confused.

Xia ruofei smiled. “I mean, don’t just think about buying office buildings. I think you should also pay attention to whether there are any land in the city that is going to be sold. We can build our own headquarters!”

“Building your own building?” Feng Rao was also shocked.

?

Chapter 1025: rebuking the square (2)

Buying a two – or three – story office building and buying land from the government to build their own building were two completely different concepts.

Not to mention other things, just the capital investment alone was also incomparable.

Especially now that the land was in such a hot state.

Moreover, with the current scale of the Paradise Corporation, if the area of the headquarters building was huge, it would definitely not be used up. This would involve the problem of renting or selling to

other companies. Paradise Corporation had never had any experience in real estate development. As the saying goes, "you can't be a newbie when you're familiar with it". The water in this was very deep.

And if they wanted to use it independently, just like the Ling Ji F & B headquarters, they had to consider the problem of funds and usage rate. If they built it too high and the area was too large, Paradise Corporation would not be able to use it all. There would definitely be a lot of space left idle. If they invested a large amount of funds in the early stages, it would eventually become a waste.

Feng Jing immediately voiced her concerns.

Xia ruofei laughed and said, "CEO Feng, that's why I said we should look further!" It might be enough for now, but it didn't mean it would be enough in the future! Our Paradise Corporation is destined to become a great Corporation that will attract the attention of the entire world, and in the short term, our company will soon set up an overseas business department. As the company expands step by step, if we only purchase or rent two or three floors of office buildings now, we'll definitely face the problem of not having enough space."

Xia ruofei then passed the tea to Feng Jing and continued, ""And don't you think that only by having the entire building to ourselves would it be in line with our company's high – end and classy position?"

Feng Rao couldn't help but burst into laughter. "That's great! However, the funding will be a big problem!"

Xia ruofei chuckled. "Currently, we do not have enough funds. However, whether it's land or building, the funds are not a one – time investment. The construction of this building may last for a few months or even one or two years. With such a long buffer, the funds will not be a problem."

Xia ruofei saw that Feng Rao was still in a daze, so he smiled and said, ""Don't forget, our Paradise Farm in Australia will soon start large – scale planting. I've estimated the output of Paradise Farm at full power, and the profit it can bring to the company every month should be in the tens of millions of us dollars!"

Feng Rao couldn't help but take a deep breath as her beautiful eyes revealed a strange light, ""Chairman, I'm not too familiar with the situation at Paradise Farm in Australia. I know that the profits should be pretty good, but I didn't expect ..."

"That's money for the future. "Xia ruofei laughed and said, " we don't have that kind of capital for the time being. That's why I said that we're not in a hurry and can take our time to investigate. If there's a suitable plot of land or a building for sale, we might as well go and understand it in detail. If we want to do it, we'll do it in one step and do our best!"

When Xia ruofei said this, he was high – spirited and had a sense of rebuking and pointing out the country.

"Understood!" Feng Rao replied excitedly. Chairman, I'll keep an eye on this information!"

"Boss Feng, you won't blame me for not taking this matter seriously, will you?" Xia ruofei asked with a smile.

Feng Rao smiled in embarrassment and said, ""Since the chairman already has a plan, I'm relieved ..."

"Come, come, come, let's have some tea!" Xia ruofei laughed and said, "since I'm free today, I'll let you know about the recent events."

"Alright!" Feng Rao immediately took out her notebook.

Xia ruofei smiled. "First of all, it's about Paradise Farm. I've said it last time. The seeds need to be done as soon as possible. During this time, you guys should communicate more with manager Liang in Australia."

Liang Qichao's identity was a little special. Although he was the person in charge of Paradise Farm, he was not an employee of Paradise Corporation. Strictly speaking, he was the representative sent by Xia ruofei's partner, Tang He. However, Xia ruofei trusted him very much, so he was fully responsible for the work of Paradise Farm.

Feng Jing nodded. "Alright. I've already assigned someone to handle this. I'll report to you as soon as I get any new information."

Xia ruofei nodded and said, "also, the Maya Group in Australia will invest 10 million USD to set up the Paradise charity fund. This charity fund will be jointly managed by the Paradise Corporation and the Maya Group in Australia. The foundation will be under the name of the Paradise Corporation."

Feng Rao was greatly shocked.

As a former senior Manager of one of the top 500 companies in the world, Feng Jing naturally knew of the famous Mei ya group.

She did not expect Xia ruofei to be so capable that he could "swindle" 10 million US dollars from the Meiya group to set up a charity fund. Although the charity fund was jointly organized by two companies, it was named after Paradise Corporation and was also under Paradise Corporation's name. It was basically a free gift.

"Chairman, you're so cool ..." Feng Jing mumbled.

Xia ruofei chuckled and said, "it's a little complicated to explain. Anyway, you just need to know that the establishment of the charity fund was decided by me and the founder of the Meiya group, Mr. Tang Yitian. It's a done deal. When the time comes, the Meiya group will send people over to help us complete the preliminary application for the foundation and other preparatory work. Then, the 10 million US dollars they promised will be transferred to the Foundation's account as soon as possible."

Xia ruofei paused and continued, "So ... Our company might need to do another recruitment in the near future. We mainly need talents in two areas. One is the foreign trade talents who are proficient in foreign languages and foreign laws and policies for the establishment of the overseas business department, and the other is the staff of the charity Foundation. In addition, we can also supplement some management staff for the pharmaceutical factory. After all, after the clinical trials are over, the pharmaceutical factory will start production officially. I'm worried that Xue Jinshan doesn't have enough manpower."

"Alright!" Feng Rao immediately replied. Chairman, I'll immediately organize a meeting with my colleagues in the Human Resources Department to come up with a plan and try to recruit people as soon as possible. "

Xia ruofei smiled and nodded.””I’ll leave the specific matters to you. I’m assured when you do it! Hahaha ...”

Feng Rao couldn’t help but secretly roll her eyes. This guy always talked about slacking off in such a fresh and refined way ...

However, Feng Jing was used to Xia ruofei’s working style.

As a successful career woman, Feng Jing didn’t like her boss giving her too much orders. So far, her work at paradise Corporation had been very pleasant. This was also inseparable from Xia ruofei’s habit of being a boss who did nothing.

“I understand! Don’t worry, Chairman. I’ll get this matter settled as soon as possible. ” Feng ke said.

Then, Feng Rao asked curiously,””By the way, Chairman, I just saw you coming out of the marketing department. What’s the matter today?”

Xia ruofei was speechless,”you’re asking me this as if I’ve been slacking off at home and never went to work ...” But then he thought about it and realized that he really was like that ...

“I was just about to tell you about this!” Xia ruofei said,”I’m looking for a colleague from the art design team to help me design an exterior packaging.”

“The packaging?” Feng Jing’s eyes lit up as she asked,”Chairman, is the company going to release a new product?” Could it be that the jade skin cream can be mass produced?”

Xia ruofei couldn’t help but smile bitterly,”even a strong woman can’t resist the temptation of the jade skin cream!” This wasn’t the first time Feng Jing had mentioned the mass production of jade skin cream to him. It was as if it was a crime not to mass – produce such a good cosmetic product to benefit all women.

Xia ruofei scratched his head and said,”there are still some technical difficulties in the mass production of jade skin cream. It’s not possible for now.” But you’re half right, we do have a new product, and this new product must be a phenomenal one!”

?

Chapter 1026: Taking the initiative to volunteer (1)

As long as they talked about work or new products, Feng Jing would be full of energy. After hearing Xia ruofei’s words, she looked at Xia ruofei eagerly and said,””Chairman, don’t keep me in suspense. Tell me, what’s the new product?”

“CEO Feng, I’m preparing to launch a high – end seafood product this time,” Xia ruofei said with a smile.

“Seafood?” Feng Rao was confused.

During the second expansion of Peach Blossom Farm, the land rented from the village had expanded a lot and had extended to the seaside. In theory, the coastal area was also used by Peach Blossom Farm.

However, the farm had not developed and utilized this area for the time being. There was no seafood cultivation in the farm, and there were no plans for similar projects. Where did the seafood come from?

Xia ruofei smiled and explained, "in the future, I'm planning to bring in high – Quality abalone species and cultivate them in a simulated natural ocean environment. I've already entrusted a friend to carry out the relevant experimental proofs elsewhere. This time, we're launching the experimental products."

Feng Rao immediately understood Xia ruofei's explanation.

In fact, the peach blossom company's development was largely dependent on Xia ruofei's own strength. This was because the core vegetable seeds, Ironhide Dendrobium strips, and even clam fish were all personally handled by Xia ruofei.

Feng Jing was already used to Xia ruofei's methods. It was as if anything he brought out was the best.

This included the fruits planted on the mountain behind the farm. Feng Rao's family had told her that the forest behind the farm used to be contracted by villagers to plant fruit trees. However, due to the water and soil, the fruits were bitter and unpalatable.

However, after planting the 'high – tech fruit seedlings' provided by Xia ruofei, the peach blossom brand fruits that he had harvested last time not only looked extremely good, but also tasted more than one grade better than ordinary fruits of the same kind.

Xia ruofei laughed. "This time, we are going to cooperate with Hong Kong's Hengfeng group. Hengfeng auction house will be hosting an auction in Hong Kong. The item for auction will be the best dried abalone produced by our paradise Corporation."

"Dry abalone ... For auction?" Feng Rao felt that her brain wasn't working well enough.

Xia ruofei nodded. "The abalones I provide are of the best quality. Most of them are above the standard of a one – Head abalone. Of course, we can maximize our profits by auctioning such good things!"

He paused and took a sip of tea. He didn't notice that Feng Rao was already dumbfounded. He continued, "And ... Through the auction, we can also greatly enhance the brand awareness of our paradise Corporation. You know, Hong Kong is very eager to buy the best abalone, I don't believe that those big and small tycoons won't be tempted! Hehe, when it's reported on the news, the whole of Hong Kong will know about our paradise company ..."

After Xia ruofei finished speaking, he saw that Feng Jing was still in a daze. He couldn't help but call out, "President Feng ... President Feng!"

"Ah?" Only then did Feng Rao snap back to her senses.

Xia ruofei laughed and said, "CEO Feng, did you not sleep well last night?" Why did you get distracted while we were chatting?"

Feng Rao blushed in embarrassment, then said in a coquettish tone, "It's all because of you!"

Hearing this, Xia ruofei couldn't help but be stunned for a moment, revealing a strange expression.

Feng Jing quickly realized that her words had a lot of hidden meaning. Xia ruofei had previously teased her about not sleeping well last night, and she had said coquettishly, "isn't it all because of you?" as if Xia ruofei had done something to her last night that caused her to not sleep well.

Feng Rao's face immediately burned, and she couldn't help but feel embarrassed.

The atmosphere suddenly became a little awkward.

Fortunately, Feng Rao immediately said coyly, "Chairman, it's all your fault for releasing such shocking news out of the blue. I'm so glad I didn't have a heart disease. Otherwise, I'd be killed in the line of duty!"

Xia ruofei laughed dryly and said, "CEO Feng, you were a Senior Manager in a top 500 company in the world. How would I know that your psychological endurance is so bad?"

"Then you're blaming me?" Feng Rao pouted and glanced at Xia ruofei.

"It's my fault ..." Xia ruofei laughed.

Feng Rao's tone sounded like she was acting coquettishly, which was completely different from her usual style. She also felt that it was a little ambiguous, so she quickly cleared her throat and asked, "Chairman, can you tell me more about this one – headed abalone?"

As the company's general manager, Feng Jing was keenly aware that this was a great opportunity for the company. If she grasped it well, it was very likely that paradise Corporation would rise to fame overnight.

At present, the Paradise Corporation was already considered to have a small reputation in Sanshan city and even the southeast province. However, when compared to the whole country, whether it was brand awareness or size, it was still a little lacking, let alone in Hong Kong.

If the Hong Kong media reported it and the mainland took the opportunity to hype it up, the effect of expanding the company's brand awareness would be very obvious.

Especially since they were auctioning a rare item like the one – headed abalone this time, if a sky – High price appeared in the auction, the Paradise Corporation would immediately be associated with high – end and distinguished. The saying "Paradise's products must be the best" would unconsciously be deeply rooted in people's hearts.

?

Chapter 1027: Taking the initiative to volunteer (2)

Xia ruofei nodded and poured Feng Rao another cup of tea. He smiled and said, "Come, come, come, sit down and talk!"

When Feng Jing heard the news, she couldn't help but stand up.

After the two of them sat down, Xia ruofei told Feng Rao about the one – headed abalone that was going to be auctioned this time, as well as some of the preparations that had been made.

Initially, Feng Rao was still a little uncertain, but when she heard that Hengfeng group had already sent professionals to identify the abalones and that the employees of the auction house had also come over to collect materials for the pre – Publicity, she immediately felt a lot more at ease.

Especially when Xia ruofei said that Tang He of the United States 'shengbang group and MA Xiong of Hengfeng group had already "used the back door" to order two premium one – Head abalones from him, Feng Jing was completely relieved after hearing that.

Feng Rao thought for a moment and immediately said,"Chairman, this auction is of great significance to our company. I'll immediately ask the marketing department to transfer the best manpower to focus on the packaging design that you requested!"

Feng Rao stood up as she spoke. Xia ruofei quickly gestured with both hands and said,""Sit down, sit down!"

Then, Xia ruofei smiled and said,"President Feng, please calm down!" I've already assigned this job. It's just an exterior design, so there's no need to involve so many people!"

"Chairman, I'm just worried that the people below won't pay enough attention to it," Feng Jing said. "Besides ... If the marketing department takes the lead and forms a team to do this, the final product's quality can be guaranteed! After all, our time is rather tight ..."

Xia ruofei chuckled and said,"you have to believe in our colleagues in the art design team!" President Feng, Zhong Lingling and the others are all professionals in this. I've already made my requirements clear to them, and I believe that they will definitely do a good job!"

Feng Rao could only nod and say embarrassedly,""Chairman, I think I'm a little too nervous. This matter is too important to our company ..."

Xia ruofei smiled."I can understand, but the quality of our products is very good. The outer packaging is like adding flowers to a brocade, so don't be too nervous."

"En!" Feng Rao nodded.

Feng Rao lowered her head and pondered for a moment. Then, she raised her head and said seriously,""Chairman, this auction is very important. I'll apply to go to Hong Kong to coordinate the auction!"

"Is that necessary?" Xia ruofei asked, surprised.

Feng Jing said seriously,"I think it's necessary. After all, it's our company's first time participating in an auction, and we're cooperating with a giant company like Hengfeng. I think we should go and coordinate in advance, especially the layout of the auction venue, the procedures, and media communication. All of these need to be coordinated in advance."

Xia ruofei knew that Feng Jing was worried that Hengfeng restaurant would bully their customers. After all, according to Feng Jing's train of thought, the auction would definitely highlight the publicity of paradise Corporation. If Hengfeng didn't make careful arrangements or deliberately weakened the presence of paradise Corporation, then this good opportunity would be wasted. Although the money would not be reduced by a single bit, it would not achieve the purpose of publicity.

In fact, based on Xia ruofei and MA Xiong's personal relationship, Hengfeng auction house would definitely not do that. As long as Xia ruofei said something, they would not object even if the entire auction house was covered in the of paradise Corporation. However, there were some things that were not easy to explain to Feng Jing.

Hence, Xia ruofei said tactfully, "CEO Feng, should we ... Send someone else?" After all, there are a lot of things to do at home. After you leave ..."

"Chairman, the company is on the right track. It shouldn't be a problem for me to leave for a few days." Feng Jing looked at Xia ruofei and said, "besides, if there's anything important, I can settle it remotely through email. It won't affect my work."

Xia ruofei saw Feng Jing's eagerness to fight and felt that it was not good to dampen her enthusiasm. Hence, after a moment of silence, he nodded and said, "Alright! I can be more at ease with you personally overseeing things. "How about this ... I'll contact Hengfeng. You don't have to go too early. There will definitely be some promotional activities in the early stages. You can go a few days before the auction starts. At that time, you can bring a few assistants along so that you don't have to do everything yourself."

"Okay, thank you, Chairman!" Feng Jing said happily.

"Chairman," Feng Jing continued, "why don't you ... Give me the contact information of the Hengfeng company's organizer? it's best if we follow up on the pre – Publicity and promotional activities."

Xia ruofei replied readily, "sure!" I'll contact them first and tell you later! In the next few days, settle the work at hand and pass down the things that need to be handed over. I don't want it to affect the company's operation when I leave. "

"Understood!" Feng Rao said happily.

"Chairman," she said, standing up, "I'll go back to my office. You should go home for dinner too!"

Xia ruofei nodded. "Okay. By the way ... Remember to ask Liu Qian to bring me the details of the two office buildings."

"I understand, but ... There's no rush to move the company's headquarters!" The auction is the most important thing right now!"

After speaking, Feng Jing stood up and walked out. She stopped at the door and turned around. "Chairman, please take care of the mass production of the jade skin cream! The pharmaceutical factory has already planned to expand the factory and introduce the production line. My idea is that after the official mass production of the heart – nourishing soup and its popularity, we can take advantage of the opportunity to launch the pure natural cosmetic, jade skin cream. This way, we

can maintain the continued popularity of the topic, which is also very helpful for the promotion of the product.”

Xia ruofei could not help but smile bitterly. The attraction of the jade skin cream to women could not be underestimated. She had put aside the matter of the company’s headquarters moving many times, but she still could not forget about the jade skin cream. Even the auction, which was such an important event, could not make her forget about the jade skin cream.

“I will, I will ...” Xia ruofei said with a bitter smile. “I’ll let you know as soon as there’s any progress ...”

“Then I’ll thank you on behalf of all the women here, Chairman!” Feng Jing said with a smile.

Feng Jing waved goodbye to Xia ruofei and left the office with a smile.

Xia ruofei heaved a sigh of relief when he heard the sound of high heels getting further and further away in the corridor. Every time they met, Feng Jing would ask him about the jade skin cream, which made Xia ruofei a little overwhelmed. He decided to work harder for the next few days and study the problem of the mass production of jade skin cream.

Xia ruofei looked at his watch. It was almost time to get off work. He tidied up the tea tray and desk, grabbed his handbag, and left the office. He returned to the small villa.

Hu Zi’s mother had already prepared lunch. Once Xia ruofei returned, Hu Zi’s mother called him over for lunch.

Lin Qiao had already called to say that she would have lunch in the company’s cafeteria at noon. After receiving the packaging design task, Lin Qiao was full of energy. She would definitely have to work overtime again in the afternoon.

Xia ruofei chatted with Hu’s mother as they ate. After lunch, Xia ruofei helped Hu’s mother clean up the dishes and then made tea with her. They chatted for a while.

Xia ruofei knew that what the old man needed the most was company. He had complete financial freedom now, but it was still not enough to live without worry. Recently, Lin Qiao often worked overtime in the company, and Hu Zi’s mother was lonely at home, so Xia ruofei deliberately increased the company and communication.

After chatting for a while, Hu Zi’s mother went back to her room to take a nap. Xia ruofei then tidied up the tea tray and returned to his room upstairs.

Xia ruofei was going to enter the medium to find Xia Qing to discuss the production of the jade skin cream, but he remembered what Feng Jing said in the morning, so he took out his phone and dialed the number of MA Xiong from Hengfeng group.

?

Chapter 1028: Jade skin cream mass production trial (1)

After the call went through, Xia ruofei did not beat around the bush and went straight to the point.

If it was someone else, they would have to worry about whether the other party would be unhappy because it would seem like they didn't trust them. However, Xia ruofei didn't have to worry about MA Xiong.

Of course, Xia ruofei still explained a little.

MA Xiong couldn't help but laugh when he heard that. He couldn't help but tease Xia ruofei about how the CEO of the Tao Yuan company was a beauty. MA Xiong knew that too.

Xia ruofei could only smile bitterly. However, he finally managed to get the contact information of the person in charge of this matter from Hengfeng.

MA Xiong had placed a lot of importance on Xia ruofei's matter. He had directly appointed the General Manager of Hengfeng auction house to be in charge of it. He had to personally check on the flow, plan, and design of the auction house.

The manager of Hengfeng auction house was named Dong Jiajun. He was forty – five years old and had been MA Xiong's subordinate for many years. He was in charge of the Hengfeng auction house's business.

MA Xiong gave Xia ruofei Dong Jiajun's contact information and said that he would inform Dong Jiajun immediately so that Feng Jing could contact him at any time.

After Xia ruofei expressed his gratitude, both parties chatted for a while about the auction before hanging up.

Xia ruofei saved Dong Jiajun's phone number and email but didn't give it to Feng Jing immediately. He knew Feng Jing's style. If he got Dong Jiajun's contact information now, this Beautiful CEO would definitely contact Dong Jiajun immediately and discuss the matter.

It wasn't good to disturb other people's rest at noon.

Hence, after Xia ruofei saved the information, he placed his phone on the bedside table and took out the spirit map scroll from his palm. With a thought, he entered the medium.

The space was naturally a scene of prosperity.

Ever since he had Xia Qing's help, everything in the space had been taken care of in an orderly manner. Furthermore, Xia Qing didn't need to rest or eat. In addition, time flowed 30 times faster in the Archean realm. Some of the more time – consuming work could be completed in the Archean realm, so the efficiency was especially high.

Whether it was the aureum, Dahongpao tea trees, wild ginseng, top – grade Red Arowana, or the herb garden, tea garden, Dendrobium candida, Cordyceps, succulent seedlings, Hornets, or even the Chinese perch and abalones in the space ocean, they all flourished under Xia Qing's care.

Everything in the realm was growing and expanding according to Xia ruofei's plan.

Xia ruofei stood in front of the mountain sea realm's herb garden and looked at everything in front of him. The rich spiritual energy made him feel relaxed and happy. There was even a faint fishy smell in the air that came from the distant space sea. He could not help but feel an endless sense of accomplishment.

With the spirit map space in his hands, Xia ruofei felt very confident.

This place was his Foundation. Even if the Paradise company was gone, even if he became penniless again, he could still live a very comfortable life with the spirit map space.

Xia Qing was busy cutting succulent plants. Xia ruofei had told him to speed up the progress of this work in the near future. The company's flagship store in heavenly cat was about to open. When the time came, the succulent seedlings of paradise would be on sale again, and there would be a huge demand for them.

Seeing Xia ruofei enter the medium, Xia Qing immediately stopped what she was doing and ran over to greet Xia ruofei.

Xia ruofei smiled and nodded. After encouraging him, he said, "Xia Qing, put aside your work for now. I have another matter for you to handle!"

"Master, please give your orders!" Xia Qing quickly said.

"Let's go to the Archean realm!" Xia ruofei said with a smile.

With a flash, the two of them disappeared from the mountain and sea realm, and arrived at the Archean realm where time flowed 30 times faster.

Xia ruofei told Xia Qing about his intention for coming here. Xia ruofei had given Xia Qing time to think about the production process of the Jade skin cream, but he had not been too eager to rush her. Now that Feng Jing had mentioned this several times, Xia ruofei felt that it was better to focus on the production process first, so that he wouldn't feel guilty every time he saw Feng Jing.

Xia Qing had always carried out Xia ruofei's orders to the letter.

But the most important thing was that Xia Qing was only a spiritual puppet. The knowledge she had was fixed. Although she had a certain learning ability, her knowledge was limited.

Xia Qing had never even heard of the flow of a modern production line. It would be impossible for him to do the so – called mass production work.

So, when Xia Qing lowered her head and told Xia ruofei that she had not made any progress, Xia ruofei only smiled and patted his shoulder to show his understanding.

Xia ruofei said, "it's okay. We'll study it together today. You're more familiar with the process of brewing the jade skin ointment. You'll be the main operator. I'll be in charge of testing and recording!"

"Yes, master!" Xia Qing said immediately.

They got to work immediately. The master and servant came to the large wooden shelf placed in the middle of the Archean realm. This was where Xia ruofei stored the Chinese medicine. There were a lot of

them. They were mainly used to concoct the pregnant spirit soup, body tempering soup, and jade skin ointment.

Xia Qing started to pick the herbs skillfully. Xia ruofei also took out a laptop and opened a document. He first entered the amount of the required herbs, the proportion, and the steps of the herbs 'pre – treatment into the document.

?

Chapter 1029: Jade skin cream mass production test (2)

While Xia Qing was processing the medicinal ingredients, Xia ruofei found a timer, a thermometer, and other necessary tools.

Xia Qing gave Xia ruofei a questioning look. Xia ruofei nodded and said, "Let's start!"

Xia Qing immediately put the required herbs into the claypot and poured in the spatial spirit pond water.

The spatial spirit pool water used to brew the ointment was stored in a measuring cylinder with scales carved on it. All the steps of brewing the medicine were completed by Xia Qing while Xia ruofei meticulously recorded the data.

"60 grams of honeysuckle, 30 grams of pearl powder, 40 grams of white Poria Cocos ..."

"Add 1 liter of water ..."

Xia ruofei paid close attention to the process of Xia Qing brewing the medicine while his fingers flew on the keyboard of his laptop, recording every single process.

In order to achieve mass production, the first step was to record the entire process of brewing the medicine, every step, every dose, and other details. Then, they would analyze how to achieve automatic production through a computer – controlled production line.

This was what Xia ruofei was doing now.

The jade skin ointment did not use many types of medicinal herbs, but the process of decocting was very particular, including the order of adding the medicinal herbs, timing, and so on. If one of the steps went wrong, there would be no way to decoct the real jade skin ointment in the end.

Therefore, when Xia Qing was boiling the medicine, Xia ruofei was also very busy. Whenever Xia Qing didn't put in any medicinal material, Xia ruofei would record the time and use a thermometer to measure the temperature.

This was because a computer could not control the heat like a human. It could only control it through some fixed parameters.

The Jade skin cream was roughly divided into three steps.

The first step was to mix some of the herbs with the spirit pool water and boil it. During this period, a few other herbs would be gradually added. At the same time, after the spirit pool water gradually evaporated, water would be added. This process would require adding water about three times.

The second step was to take out the medicinal soup, throw away the dregs, pour the medicinal soup back into the clay pot, and continue to heat it. During this process, there were still the last two medicinal herbs that had been ground into powder to be added. While adding, they also needed to stir at the same time, and the medicinal soup would become more and more viscous.

The third step was to stir it while using fire to boil it. The water would continue to evaporate, and the final product would be a brown paste with a unique fragrance.

If these three steps were controlled by humans, it wouldn't be difficult to cook one portion as long as they didn't get distracted and controlled the fire properly.

However, it would be much more complicated if it was done using a computer.

It was like a simple table in a web page. If it was drawn by hand, it might only take one or two minutes. However, if it was implemented with code, it would take dozens of lines, and the structure was very complicated.

However, it might be faster to draw a single table manually, but it would definitely be faster to draw ten or a hundred tables using a computer. This was because the same code could be copied and pasted, and it was completely a batch operation.

This was also the logic behind the assembly line.

If humans were to simmer it slowly, it might take far less time to brew one or two portions than to research and mass produce it. However, once hundreds or thousands of portions were produced, even if people were exhausted to death, it would be impossible to be faster than machines.

As long as the program was well – tuned, except for a few steps that required human intervention, the rest of the procedures would be completed by the computer in an orderly manner as long as the buttons were pressed. There would be no mistakes or distractions.

If these three steps of decocting the jade skin ointment were to be subdivided, there were twenty to thirty steps, including each addition of materials, adding water, stirring ... Each step required time, temperature, and other parameters to control the heat, which was naturally quite complicated.

As time passed, Xia Qing was very focused on controlling the fire. Slowly, a sweet fragrance began to spread. Xia Qing stared at the ointment at the bottom of the earthenware pot. Finally, he put on the heat – resistant gloves provided by Xia ruofei and took the earthenware pot off the charcoal stove.

"Master, the first batch of jade skin ointment has been made!" Xia Qing said respectfully.

Xia ruofei nodded and recorded the temperature he had just measured with a thermometer on the computer. Then he said, ""Check the quality!"

"Yes, master!" Xia Qing immediately responded.

After Xia Qing carefully examined the Jade skin cream, she raised her head and said, ""Master, this Jade skin cream should be of high grade. It should be at least of middle to high grade!"

Xia ruofei nodded and said, "very good, continue to make the next portion!"

Since it was data recording, it could not be done only once. It needed to be compared with different data to minimize the probability of error.

Xia Qing was only a spirit puppet, so she didn't feel tired. Xia ruofei, on the other hand, was as strong as an ox. He was only recording the data and parameters at the side, so naturally, he was not tired. Thus, the master and servant began the second experiment without stopping.

Of course, Xia Qing's jade skin ointment couldn't be wasted. Xia ruofei asked Xia Qing to scrape it all off and store it in a clean small porcelain bottle.

After washing the claypot, Xia Qing immediately followed Xia ruofei's instructions and repeated the process of decocting the jade skin ointment. Xia ruofei naturally recorded all the data during the whole process.

Time flowed 30 times slower in the Archean realm than the outside world. Hence, Xia ruofei had enough time to do this.

He and Xia Qing had done a total of ten sets of experiments, and the data of each set had been recorded in detail.

Xia Qing was more skilled in brewing the jade skin ointment than Xia ruofei, so she was naturally successful in all ten attempts. Three of them produced the best quality, and the other seven were basically of superior quality.

Xia ruofei noted down the quality of the finished product after each set of data.

After completing 10 sets of experiments, Xia ruofei closed his laptop and patted Xia Qing's shoulder with a smile. ""That's all for today! You've worked hard ..."

"Master, you're too polite ..." Xia Qing bowed slightly.

"You can continue with your work!" Xia ruofei said, "I'll follow up on the mass production of the jade skin cream. You don't have to worry about it!"

"Yes, master!" Xia Qing said.

Xia Qing returned to the mountain and sea realm to continue cutting succulent plants, while Xia ruofei brought his laptop back to his room in the outside world.

He walked to the computer desk and plugged in the laptop's power. After working in the Archean realm for so long, the laptop's battery was almost out.

Xia ruofei noticed another detail. "In the Archean realm, laptops operated according to the time in the space. Hence, half a day had already passed in the system while only a few minutes had passed in the outside world.

Of course, after the laptop was connected to the room's WiFi, it quickly connected to the internet to check the time.

Xia ruofei sat down, turned on his computer, and lit a cigarette. After taking a deep puff, he blew out a smoke ring and started to analyze the data he had recorded today.

It was naturally impossible for the data parameters of ten sets of experiments to be exactly the same. After all, the control of the fire was more of a feeling. Moreover, the fire power of the furnace could not be completely balanced, and the heating speed and so on were also different.

Xia ruofei re – established a table and entered ten sets of data for comparison. With the three sets of experimental data that made the best jade skin cream as the basis, he also referred to the other sets of experimental data and analyzed a set of parameters that he thought was the most reasonable.

Then, Xia ruofei's brain worked quickly. In his mind, the steps of making the jade skin ointment were constantly broken up and combined. He analyzed which steps should be the most optimal for mass production.

As he thought, he typed quickly on the laptop's keyboard.

Time passed by unknowingly. When Xia ruofei heard Hu Zi's mother calling him for dinner, he realized that he had already constructed half of the entire production process.

"Godma, I understand. I'll be right down!" Xia ruofei replied loudly.

Then, he rubbed his sore temples and revealed a satisfied smile. He muttered to himself, "It seems that if I work overtime at night, I will at least be able to prepare the theory. As for whether it will succeed or not, I will have to go to the pharmaceutical factory to test it out!"

Xia ruofei saved the document, closed his laptop, and went downstairs for dinner.

?

Chapter 1030: everything is ready except for the east wind (1)

Xia ruofei only found out that Lin Qiao had not come back for dinner when they arrived at the restaurant downstairs.

She heard from Hu 'Zi's mother that this girl had to work overtime tonight to design, so she had a meal at the company's cafeteria.

Hu 'Zi's mother brought out the dishes and nagged, "This child ... She's about to go to school, why is she still thinking about work all day ..."

Xia ruofei couldn't help but feel guilty. He knew that Lin Qiao must have worked overtime for the vacuum – packed dried abalone design, and it was all because of him!

Xia ruofei laughed dryly, "godmother, I'll tell her off later!" Also, I'll tell her team leader not to give her too much work, and it's best to slowly hand it over. It's time for her to get ready for university."

Hu 'er's mother agreed, "Yes, she can listen to what you say, unlike me, who always finds it naggy ... Ruofei! When Qiao' er comes back, you have to tell her!"

"Woof! Alright!" Xia ruofei said.

After the two of them finished their meal, Xia ruofei helped his godmother clear the dishes as usual.

After she went for a walk on the farm as usual, Xia ruofei returned to his room upstairs and continued to dive into the huge amount of data.

As the research process for the mass production of the heart – nourishing soup was confidential, Xia ruofei had to make the adjustments on his computer.

Therefore, he was quite familiar with this production line. He knew that the production line could automatically complete the functions such as soup residue separation, constant temperature control, automatic stirring, and so on. Therefore, there were no detours in the design steps.

The reason why he spent so much time was to think about automation as much as possible and reduce the number of human intervention links. In addition, he wanted to optimize the links as much as possible. After all, the more steps there were, the greater the possibility of mistakes. Moreover, the transmission link would also be damaged. Whether it was in terms of cost or efficiency, the simpler the steps, the better.

Xia ruofei was busy in front of the computer. The waste paper in the bin that he had crumpled into a ball was getting more and more. Those were the steps he had drawn.

Finally, it was past eleven o'clock at night. Xia ruofei heaved a long sigh of relief and leaned back in his chair. He took out a cigarette and lit it up. His tired face could not hide his excitement.

It was finally completed!

After a night's hard work, Xia ruofei had derived the steps and parameters of mass production on the theoretical level. Although it was not perfect, it had reached the limit of his ability.

Xia ruofei looked at the steps that he had just drawn on the computer screen. He went through it twice in his mind and confirmed that he could no longer optimize it. Then, he clicked the print button and printed out the steps and the document that recorded the key data and parameters.

Then, Xia ruofei deleted all the contents of the document and replaced it with a large amount of meaningless mojibake. He saved it and closed it.

This way, the content he had written before was completely covered.

Then, Xia ruofei changed the file's extension name to DLI and the file name to a similar system – processed file name. Then, he used the file shredding tool to completely delete the file.

He did the same to the diagram.

After all, this computer was connected to the internet. It might not be a problem now, but there was no guarantee that after the Jade skin cream became famous, it would be targeted by people with ulterior motives.

Xia ruofei had developed a habit of being cautious since he was in the Army. He was even more careful after he obtained the spirit map.

After doing this, even if the computer was hacked and the other party could recover the shattered files on the hard disk, it would be difficult to find the file. Even if they found the file, it was impossible to recover the previous data because Xia ruofei had covered it with garbled codes.

This minimized the possibility of a leak.

Of course, there were many ways to hack into secrets, including many imported printers and shredder that were secretly installed with scanning and launching components. There were also many eavesdropping and surveillance devices that were becoming smaller.

However, Xia ruofei felt that paradise Corporation should not be able to enjoy such treatment at the moment. Moreover, he had already checked the printer that he had bought, and the possibility of it being tampered with was extremely low.

Xia ruofei kept the printed document in the spirit map space, took a shower, and went to bed.

The next morning, after Xia ruofei had his breakfast, he sent Feng Jing the contact information of Dong Jiajun from the Hengfeng auction house.

Then, he gave Feng Jing a call and briefly explained Dong Jiajun's situation. He told her that Hengfeng group had already coordinated with him and that she could contact manager Dong directly.

Then, Xia ruofei found the phone number of Xue Jinshan, the director of the pharmaceutical factory, and dialed it.

"Hello, President Xia!" Xue Jinshan respectfully greeted.

"Kanayama, you must be exhausted," Xia ruofei laughed.

Xue Jinshan chuckled and said, "it's good, it's good. General manager Xia, I'm full of energy for this job!" It was a full sense of accomplishment! So what if it's hard and tiring?"

Xia ruofei smiled and said, "not bad, not bad!" I've already told director Feng that the company will be recruiting a new batch of people soon. The pharmaceutical factory will probably start production soon, so I'll ask her to add some manpower to you. If you have any urgent needs for manpower, quickly make a plan and report it to the company!"

"That's great!" Xue Jinshan was very excited to hear this. "Thank you for your concern! We're really short of people here!"
