

God tier Farm 1031

Chapter 1031: everything is ready, only lacking the eastern wind (2)

"Everything will get better. We're still in the entrepreneurial stage! All of you are the first generation of entrepreneurs in the pharmaceutical factory!" Xia ruofei said, "but ... You have to pay attention to the cultivation of talents, especially those with potential. Help them and let them mature as soon as possible. After recruiting new people, I hope that the old employees can have a few more backbones who can take charge!"

"Understood!" Xue Jinshan replied seriously. President Xia. "

Then, Xia ruofei asked, "Kanayama, how's the production at the pharmaceutical factory?" Is it difficult to supply clinical trials to various hospitals?"

Xue Jinshan chuckled. "Director Xia, at present, the two production lines are not running at full capacity. In addition to supplying the designated hospitals for clinical trials, we can also keep some stock every day!"

"Not bad, not bad!" Xia ruofei nodded in satisfaction.

"But ..." Xue Jinshan suddenly changed the topic and said, "two production lines are definitely not enough for the official production. I've already reported to the company, hoping to bring in two more production lines. Of course, even if we introduce a production line, there won't be enough skilled workers, and the production capacity will definitely need to climb ..."

Xia ruofei said, "I've read the report on the introduction of the production line. The company should approve it soon. Let's get the hardware facilities ready first and train the workers step by step. I believe that even if we officially start production, the market demand will also have a climbing period. It's impossible for it to grow explosively."

Xue Jinshan chuckled and said, "director Xia, that might not be the case ... Heart – nourishing soup is different from other medicines. Its effects are too obvious, and it's currently the only medicine in the world that can effectively treat autism. In addition, it's also listed as a guided drug by the Wei family planning Commission. I don't think there's much time left for us in the market. It's likely that demand will exceed supply!"

Xue Jinshan paused for a moment and continued, ""Even though Europe and the United States don't recognize the effectiveness of Chinese medicine, I believe that after it becomes famous, even if they can't buy it locally, those families with children in Europe and the United States will all come to China to buy it!"

Xia ruofei thought for a moment and said, ""If we have such an expectation, then we should just introduce a few more production lines. I think the factory area is big enough!"

"That's great, of course!" Xue Jinshan happily replied. I can't wait to get everything done in one go!"

Xia ruofei said, "then, you can do some more verification and see which production lines are suitable. Also, you can start to recruit workers on your own. Recruit more when it's appropriate. While it's still a

trial production, quickly train the workers and let the old guide the new. This way, when the production lines are in place, there won't be a shortage of manpower."

"Understood!" Xue Jinshan replied.

"Kanayama, there's one more thing I need your help with," Xia ruofei said with a smile.

"Director Xia, please tell me if you have any tasks!" Xue Jinshan quickly said.

Xia ruofei didn't answer directly. Instead, he asked, "If we stop one of our production lines for at least one or two days, at most five or six days, will it affect the supply of drugs for clinical trials?"

Xue Jinshan was stunned for a moment, then quickly made an estimation and said, "It shouldn't be a big problem. After all, we haven't been producing it at full capacity yet. If we stop one production line, the other production line will run at full capacity. In addition, we still have a lot of drugs in stock. We can guarantee that there will be no problem with clinical trials!"

Xia ruofei immediately replied, "very good!" Kanayama, shut down one of the production lines in the morning and organize a team to clean the production line!"

Xue Jinshan immediately realized what was going on. He quickly asked excitedly, "President Xia, could it be ... A new product?"

Xia ruofei laughed and said, "we can't talk about a new product yet. We still have to see if the experiment is successful." Kanayama, you have to keep this a secret for now. You can't even tell boss Feng, understand?"

Xue Jinshan instantly felt his blood boiling.

He had witnessed the miracle of the heart – nourishing soup with his own eyes. He had a blind trust in Xia ruofei. Now that Xia ruofei was going to test the new product, he was full of anticipation.

"I understand! President Xia, I'll find a few trustworthy employees to clean the production line and make sure they won't spread the word!" Xue Jinshan said.

"Mm! Also, go and purchase a batch of medicinal herbs immediately. I'll send you the specific list and quantity later. " Xia ruofei said.

At this stage, the raw materials needed to produce the heart – nourishing soup were mainly purchased. Hence, Xue Jinshan was more familiar with the medicinal material suppliers. Xia ruofei simply handed this task to him.

Although there were also medicinal herbs in the spirit map space, the consumption of medicinal herbs for a mass production experiment was tens to hundreds of times that of a manual brewing. Naturally, they had to purchase other medicinal herbs.

Of course, Xia ruofei would not reveal the prescription. He would definitely add a batch of unrelated herbs to the list.

"Yes, director Xia!" Xue Jinshan replied without hesitation.

“Shut down, clean the production line, and purchase medicinal ingredients. How long will it take to complete all these?” Xia ruofei continued.

“General manager Xia, give me half a day and I’ll be able to settle everything!” Xue Jinshan said without hesitation.

“Very good! Then I’ll come to the factory in the afternoon!” Xia ruofei said.

After hanging up, Xia ruofei sent Xue Jinshan a list of medicinal herbs.

About half of the herbs were for making the jadeshi ointment. Of course, Xia ruofei did not choose the other herbs randomly. They were basically used to make the pregnancy soup and the body tempering soup. This way, they would not be wasted.

?

Chapter 1032: everything is ready except for the east wind (3)

.....

Xue Jinshan was very efficient. He called Xia ruofei at around 10 in the morning and told him that everything was ready.

Xia ruofei had finished his lunch early and informed Hu Zi’s mother. He then left the farm and drove straight to the pharmaceutical factory.

When Xia ruofei arrived at the heart – nourishing soup production workshop, Xue Jinshan was already waiting at the door.

Before Xia ruofei could get out of the car, Xue Jinshan quickly walked up to him and opened the door for Xia ruofei. He said, “Director Xia, the production line and medicinal ingredients are ready!”

Xia ruofei nodded and said, “thanks for your hard work, Kanayama!” Let’s go in and talk!”

Xia ruofei and Xue Jinshan went to the production workshop. The two production lines were located in two separate sterile factories. One of the factories was still producing in full swing, while the other was quiet.

Xia ruofei came to the control room. The veteran on duty today was called Liu Lin. When he saw Xia ruofei, he immediately stood at attention and shouted, “Brother Xia, you’re here!”

Xia ruofei nodded and said, “Liu Lin, take your brothers outside to relax!” I’ll look after this.”

“Yes!” Liu Lin immediately replied.

He knew that Xia ruofei was going to do something to the control computer. For these veterans who had the confidentiality regulations carved into their bones, they naturally knew what it meant to “not see what they shouldn’t see”. So, he immediately left the control room with the other two veterans.

Seeing this, Xue Jinshan was also preparing to leave the control room. Xia ruofei stopped him and said, "Kanayama, take a few employees with you to process the herbs!"

Xia ruofei gave him the names of a few medicinal ingredients and told him about the preparation method. Then, Xue Jinshan left the control room with his men.

Xia ruofei went over to the control room and locked the door. Then, he blocked the surveillance camera. The camera was aimed at the control computer. Usually, there would be veterans who would monitor it 24 hours a day. Now that Xia ruofei was going to design the program of the production line, he naturally had to block the camera.

After that, Xia ruofei took out the step – by – Step flow chart and data parameters that he had worked on last night. He created a new control process on the control computer.

The entire production process had been simulated in Xia ruofei's mind countless times, so he was very familiar with the settings.

Of course, after the breakdown and optimization of the jade skin cream, the brewing process was very complicated. It involved the time, temperature, and other parameters. Every step and every parameter had to be manually entered and checked repeatedly. So even though Xia ruofei was very familiar with it, it still took a lot of time.

The control room was quiet, with only the clicking of the mouse and the tapping of the keyboard. Time passed by quietly.

It was not until four in the afternoon that Xia ruofei finally massaged his sore wrist and let out a long sigh.

After half an afternoon of hard work, he finally converted all the theoretical steps he had constructed into lines of code in the control computer. Of course, the code was modular and Xia ruofei did not have to type it out one by one.

Xia ruofei followed the flow chart that he had drawn and checked the parameters from the beginning to the end. After confirming that there were no mistakes, he sealed it and stored it.

Then he stood up and opened the door of the control room. He looked out and shouted, "Jin Shan, come here!"

?

Chapter 1033: Strict standards (1)

Xue Jinshan had already processed the herbs according to Xia ruofei's instructions. He was chatting with a few veterans who were in charge of the security of the control room.

In fact, Xue Jinshan didn't dare to go far for the entire afternoon. He was supposed to patrol the workshop that was producing the heart – nourishing soup a few times, but today he handed it over to the Deputy Director.

When he heard Xia ruofei's voice, he immediately responded loudly and walked over quickly.

Xia ruofei waved at the three veterans and said, "Liu Lin, you guys can continue with your shift!"

Then, he turned to Xue Jinshan and said, "Let's go. Take me to the herb preparation workshop."

Xue Jinshan quickly led the way and brought Xia ruofei to the herb preparation workshop.

He had specially found a separate room to store the medicinal ingredients that Xia ruofei had asked him to buy at the last minute. He had personally brought a few of his most trusted employees to process the medicinal ingredients.

"President Xia, these are the medicinal herbs you wanted. Please take a look and see if the quantity and type are correct." Xue Jinshan said respectfully.

These medicinal herbs were placed in different categories. The few medicinal herbs that Xue Jinshan and his men had ground were placed separately at the side, and they were also labeled accordingly.

Xia ruofei glanced at it and had an idea. He nodded and said, "Not bad, not bad. Kanayama, we might have to work overtime today. Take a few trustworthy and skilled workers with you and stay behind."

Xue Jinshan knew that Xia ruofei was going to deal with these herbs, so he quickly said, "Alright, President Xia. We'll wait for you outside!"

Xia ruofei nodded. Xue Jinshan immediately left the room and closed the door.

After Xue Jinshan left, Xia ruofei did not immediately process the medicinal herbs. He had long developed a habit of being cautious and careful, so he first checked the room very carefully to make sure that there was no monitoring equipment.

Even though Xue Jinshan was a trustworthy employee, Xia ruofei did not let his guard down.

Xia ruofei was already very experienced in counter – reconnaissance, and now that he had strong mental power, if there was any spy device in the house, it would be exposed. He quickly checked it and confirmed that it was safe.

Then, Xia ruofei walked to the herbs.

According to the minimum standard of feeding these medicinal materials to the production line, they could be produced almost three times. Of course, about half of these medicinal materials were completely useless for the Jade skin cream, but many of them could be used for the refining of the pregnancy soup and body tempering soup.

Hence, the first thing Xia ruofei did was to pick out all the unrelated medicinal herbs. Of course, he kept all the herbs that were related to the pregnancy soup and body tempering soup in his interspace.

Xia ruofei threw the rest of the useless herbs into the grinder and threw them aside.

Then, Xia ruofei started to process the herbs needed to make the jade skin ointment.

Other than the medicinal ingredients that Xue Jinshan had brought people to grind, the rest of the process, according to Xia ruofei's design, had to be divided into three batches.

Xia ruofei mixed the ingredients from the same batch together and crushed them. Then, he divided them into three portions and labeled them.

Most of these herbs were roots, leaves, and the like. After a certain degree of crushing, they were mixed together. Unless someone used a special instrument to analyze them, it was basically impossible to restore their composition.

After processing the medicinal herbs, the sky outside gradually darkened. However, the workshop next door that produced the heart – nourishing soup was still working, but the workers were taking shifts to rest.

Xia ruofei opened the door and called Xue Jinshan and a few skilled workers in. He explained the trial production process to them in detail.

Of course, it was mainly the processes that required human intervention. The other processes such as heating, adding water, stirring, and separation were highly confidential and were automatically completed by the central computer. Xia ruofei naturally did not have to explain too much.

There weren't many parts that involved manual labor, and it wasn't complicated either. Xue Jinshan and the others recorded it down very seriously, then nodded to show that they had remembered it.

Hence, Xia ruofei said, "that's good. Kanayama will assign work to everyone. Then, each of you will receive a set of raw materials. Everyone, please take your places!"

"Alright, director Xia!" Xue Jinshan's voice was slightly excited.

Although he didn't know what the new product Xia ruofei was testing was, with the heart – nourishing soup, Xue Jinshan was full of anticipation for the new product.

He was no longer a fresh college student. After this period of experience, his working ability had greatly improved, and his prestige in the pharmaceutical factory was also very high.

Xue Jinshan quickly assigned the tasks. Every worker had a corresponding job, and he was responsible for overall coordination and inspection, as well as handling emergency situations.

The workers brought the raw materials to their assigned positions, while Xia ruofei brought Xue Jinshan back to the control room.

"Everyone, report on your preparations!" Xue Jinshan picked up the control room's walkie – talkie and said in a deep voice.

"Work desk 1 is ready!"

"Work desk No. 2 is ready!"

.....

Xue Jinshan turned his gaze to Xia ruofei.

“Let’s begin!”Xia ruofei nodded.

With that, Xia ruofei opened the sealed production program on his computer, double – clicked to run it, and then pressed the green button on the interface.

?

Chapter 1034: Strict standards (2)

Each work station had a corresponding indicator light. When the workers saw the indicator light turn on, they poured the raw materials they prepared into the feed port.

The entire production line began to operate under the computer’s control.

With the roar of the machine, the raw materials were sent to the high – pressure stainless steel tank by a conveyor belt, and then the distilled water began to slowly pour in.

Xia ruofei had already set the amount of water to be poured in according to the ratio.

These medicinal materials were slowly heated and stirred in the high – pressure tank. The first jaded skin cream test production had officially begun.

Xia ruofei stared at the control room, while Xue Jinshan began to patrol the various work stations of the production line.

As the indicator lights continued to light up, the workers at the various stations also carried out the corresponding operations.

Finally, the few medicinal materials that had been ground into powder were slowly added through the last feeding mouth.

The medicinal ingredients were constantly stirred in the high – pressure tank, and the water content began to slowly evaporate.

The green indicator light on the control computer that represented the completion of production flickered a few times and then lit up.

Xia ruofei stood up with a trace of excitement and went to the material outlet with Xue Jinshan.

He saw a stainless steel container containing a brown paste that was still steaming. He could smell a familiar fragrance from afar.

Xia ruofei couldn’t help but speed up and walk closer to check.

He reached out and touched a little of the ointment produced by the assembly line, carefully observed its color, deeply sniffed the smell, and finally even stuck out his tongue to lick it and taste it.

Although the jade skin cream was a cosmetic product, it was made of pure Chinese medicine. It could be said to be food – grade, and there would be no problem even if it was taken.

Xia ruofei frowned slightly. Although the jade skin ointment looked similar to the products he made by hand and had the same fragrance, Xia ruofei could clearly feel that there were some granular substances in it, which were different from the finished jade skin ointment.

Obviously, the product this time did not meet Xia ruofei's expectations.

However, Xia ruofei was mentally prepared for this. The brewing process of the jade skin ointment was rather complicated. It involved many steps. He had spent almost an entire night yesterday to complete the theoretical construction of the production process. If the first trial production could be a great success, he would definitely be lucky.

In fact, in order to achieve mass production, it was necessary to go through many experiments and constantly fine – tune the parameters to find the best effect.

Xue Jinshan saw Xia ruofei's frown and his heart sank. He asked nervously, "President Xia, the product doesn't meet your requirements?"

Xia ruofei smiled and said, "I'm not at my best state, but it's okay. It's just an experiment!" It's impossible to not take any detours. I'll go and make some minor adjustments to the parameters!"

After that, Xia ruofei thought for a while and said, ""Take a sample of this first experimental product and label it. Oh right ... Prepare a sample for me too."

"Alright, director Xia!" Xue Jinshan quickly said, then gestured to a worker.

The worker immediately began to sample the product.

Xia ruofei turned around and walked back to the control room. He used the USB drive to copy the program that he had backed up into the control computer. The program in the computer had been sealed and could no longer be modified.

Xia ruofei had specially prepared this USB for confidential work. It was never connected to the internet. Even computers that had been connected to the internet before would not connect to it even if the network cable was unplugged.

This was all for the sake of secrecy.

Xia ruofei deleted the solidified program and opened the program that he had copied from the USB drive. He started to think about the complicated parameters and links.

After a while, Xia ruofei heard a knock on the door.

He minimized the program's editing interface, then got up and opened the door to the control room.

Xue Jinshan was standing at the door with a wide – mouthed glass bottle in his hand. "President Xia, this is the sample you wanted!"

Xue Jinshan knew that Xia ruofei wanted to modify the production program, so he did not follow Xia ruofei to the control room. Now that Xia ruofei had opened the door, he lowered his eyes and did not even glance at the control computer in the room.

As the factory director of the pharmaceutical factory, Xue Jinshan's position was still very proper. He was working for Xia ruofei. He would never try to get in touch with such core secrets. He would not even think about it.

Xia ruofei took the glass bottle with a smile and said, "Alright, thank you Kanayama!"

Xia ruofei then put the glass bottle into his pocket.

"You're too kind, President Xia. I'll be on standby in the workshop!" Xue Jinshan said.

Xia ruofei smiled and nodded. By the way ... It'll probably take a long time for me to adjust the program, so get someone to prepare some supper! It's also very hard for the workers and Masters to work overtime!"

"Alright, director Xia!" Xue Jinshan replied, then turned around and left the control room.

Xia ruofei closed the door and sat back in front of the console.

He first sent the bottle of sample into the spirit map space and communicated with Xia Qing with his spiritual sense, asking her to check the color of the jade skin cream produced by the assembly line.

The result was just as he had expected. After Xia Qing's inspection, this sample could only be said to have barely been successfully brewed, but the quality was very ordinary, and could be considered a low – grade product.

Although the brewing process was considered a success and the product would have its own medicinal effects, Xia ruofei was determined to take the high – end route. Naturally, he would not allow the production to be shoddy. Hence, he took out the glass bottle with the sample from the space and began to analyze the process.

He mainly adjusted the time, temperature, volume, and other parameters according to the situation of the jade skin ointment produced this time.

This kind of adjustment would not be done by luck. It was built on the knowledge of the entire program link and parameters. After analyzing the product, they would come up with a parameter modification plan that was most likely to affect the product quality.

Hence, Xia ruofei thought for a long time before he started to adjust five of the parameters in one go.

Then, Xia ruofei backed up the second version of the program into a USB drive and sealed the program on the computer. Then, he picked up the walkie – talkie and communicated with Xue Jinshan, who was in the workshop.

The second production test soon began.

After another hour of waiting, a batch of finished products was produced.

There were still many flaws in the product this time. Xia ruofei realized that the parameters he had adjusted did not seem to have any obvious effect.

Hence, he quickly began to analyze and make adjustments again.

Although the results were not ideal, Xia ruofei did not give up.

It was common for this kind of experiment to fail eight to ten times. Xia ruofei had enough patience to slowly grind it out.

The third production test officially began more than an hour later. When the production line completed all the procedures, it was already past 11 O' clock at night.

The effect seemed to be good this time. The particles in the ointment were significantly reduced.

It was already very late, and the medicinal herbs prepared for the day had all been used up. Hence, after Xia ruofei asked for a sample, he let Xue Jinshan and the rest go back to rest.

He then told Liu Lin and the other veterans to pay attention to the security guards in the control room, and then drove away from the pharmaceutical factory.

On the way, Xia ruofei sent the third produced sample into the spirit map space for Xia Qing to examine.

Just as Xia ruofei had predicted, the jade skin ointment had reached the level of a medium – grade ointment. Although it still did not achieve the effect that Xia ruofei had expected, at least it was developing in a good direction.

Xia ruofei did not feel dejected because the results of the three experiments were not ideal. On the contrary, he was full of confidence because he knew that he had found the root of the problem. All he needed was more time and more experiments to adjust and improve the parameters step by step.

He had already instructed Xue Jinshan to prepare ten more portions of medicinal ingredients according to today's list.

Xia ruofei had already decided to spend the next few days in the factory. He would not make do with it until he had adjusted the production process of the jade skin ointment to a near perfect state.

?

Chapter 1035: success (1)

Xia ruofei spent the next week in the pharmaceutical factory.

Every day, he had to take Xue Jinshan and the others to carry out at least three to five experimental productions. He spent most of his time in the control room, constantly analyzing the research data according to the effect of the sample and making fine adjustments.

Sometimes, when a set of data was only adjusted by two decimals, Xia ruofei would re – organize the experimental production. He was extremely detailed.

Of course, even so, Xia ruofei only spent four days to adjust the data parameters to a relatively satisfactory degree.

In the remaining three days, one day was used to verify the stability of the program. A total of more than a dozen sets of production tests were carried out. Each sample produced was at least above – average in quality. Even if there was a slight deviation, it would never fall to the level of a mid – Quality product.

Xia ruofei could finally breathe a sigh of relief when the trial production reached this stage. It was basically a success.

In the other two days, Xia ruofei's task was very simple. He was doing a dilution research on the jade skin ointment.

This might sound ridiculous, but it was a necessary research.

First of all, because the full version of the jade skin cream was so heaven – defying that it had even reached a shocking level, it was fine to give some to relatives and friends in a small range, but it was better to keep a low profile when it was sold to the public worldwide.

Of course, the more important reason was that this mass – produced version of jade skin cream was essentially a commodity.

The ultimate attribute of a product was naturally to profit.

If he wanted to make a profit, he had to ensure that the effect was far better than similar products. He had to try his best to make the effect not too prominent. Only then could he have a long – term plan.

Of course, at the same time, they also had to ensure the diversity of the products and distinguish them into different grades and types.

Therefore, it was quite necessary to dilute the jade skin ointment and develop a variety of products.

In this aspect, Xia ruofei mainly relied on Xia Qing.

After all, Xia Qing's understanding of the jade skin cream was far better than Xia ruofei's. So when the mass production test had just begun, Xia ruofei had been very farsighted and made Xia Qing start to think about adding some ingredients that would not cause a conflict in the medicinal effects.

Xia Qing did not let Xia ruofei down.

In the past few days, Xia Qing had quickly come up with several plans.

These plans were all on the premise that the jade skin cream had already been produced. Some other ingredients were mixed in, so that the jade skin cream would be diluted without affecting the medicinal properties.

These redundant ingredients included honey, milk, egg white, mung bean powder, pearl powder, and so on.

At the same time, Xia Qing also added rose, Jasmine, lilac, and other ingredients according to Xia ruofei's requirements, so that the jade skin cream had a variety of colors and smells without affecting the efficacy.

After two days of continuous trial production, a conservative estimate was that six or seven different types of jade skin cream could be developed. Each type could be divided into different grades according to the concentration of active ingredients to distinguish the consumer group and adopt different pricing strategies.

Of course, this was only Xia ruofei's initial experiment. His purpose was to verify the feasibility.

Before the jade skin cream was ready to be launched on the market, the marketing department would also participate in the analysis to finally finalize the product, confirm the waves of launch, pricing strategy, and so on.

The marketing department would also organize a special team to promote and package each series of jade skin cream. Many cosmetics and skin care products on the market were actually like this. They had similar functions, but they were exaggerated to the extreme. There were all kinds of all – Natural and no – Add products, all kinds of plant essence ... In any case, they could come in any way they wanted, and consumers just happened to like this set.

The effect of the jade skin cream was naturally very good. An appropriate advertising package was only an addition to the brocade, not a deception to the consumers.

Of course, the automatic production line produced the pure Jushi ointment. Some other additives were processed later. It was basically Semi – Automatic production, not entirely manual operation.

After a week, Xia ruofei had basically solved the problem of mass production of jade skin ointment.

Just the medicinal materials for the experiment alone cost more than 100000 Yuan.

Of course, Xia ruofei didn't feel bad about spending this money. Instead, he felt that it was worth it.

There was still a period of trial production. After the production line was stable, they had to set up a set of quality inspection indicators, apply for approval, and a series of other tasks. Of course, Xia ruofei did not have to do all these by himself.

Although the approval of skin care products was also under the jurisdiction of the drug Administration, it was much simpler than that of drugs, and there was no such complicated clinical trial process. After all, drugs were used to treat diseases, and they had to be eaten, so it was not too much to be cautious.

As for the confidentiality of the prescription, Xia ruofei had already considered it.

The types of medicinal herbs used in the jade skin cream could not be completely kept a secret. After all, to carry out mass production, a large number of raw materials needed to be purchased. It was best to cooperate with the surrounding villagers and ask them to plant the medicinal herbs. The peach blossom company would be responsible for buying back the herbs. In this case, it was almost impossible to keep it completely confidential.

What Xia ruofei could do was to arrange for a few trustworthy veterans to be in charge of the purchase of raw materials with Xue Jinshan. In addition, when they cooperated in planting, try to find as many

villagers as possible. It would be best if they did not come from the same area and let them plant different kinds of medicinal herbs.

?

Chapter 1036: success (2)

In addition, among all the raw materials, one of them was called “green maple vine,” which was used in a very small amount. However, it played a role similar to a catalyst and played a very crucial role in the whole process of brewing.

The most important thing was that the green maple vine was added together with the herbs that Xue Jinshan had brought people to help Xia ruofei grind in the first production test. They were ground into powder and added in at the last stage.

Because the amount was small, Xia ruofei had considered the need to keep it a secret and did not let Xue Jinshan and the others know about it. Later, when he processed the medicinal herbs alone, he ground it and added it.

Green maple vine wasn’t a common Chinese medicine, but it wasn’t hard to obtain.

The amount required to brew the jade skin ointment was also very small. Almost every production at full capacity only required about 100 grams. Hence, this medicinal herb was almost naturally produced for Xia ruofei’s exclusive control of the prescription.

It was very easy to plant the green maple vine, and the yield was extremely high.

Xia ruofei had already decided to open up a large area in the spirit map space to plant the green maple vine. He would provide the medicinal herbs with the ground green maple vine every month, and then specify the proportion of the green maple vine to Xue Jinshan. Then, he would appoint a veteran in the pharmaceutical factory that he could absolutely trust and let this veteran manage it directly. Basically, the possibility of the secret being leaked would not exist.

Taking ten thousand steps back, even if there was an extremely low probability of a leak in this segment, the entire production process had already been completely sealed and solidified in the control computer. Unless the entire computer’s hard drive was stolen and cracked by an expert hacker, there was still a possibility of bypassing the software’s self – destruction program and cracking the production process.

However, the probability of such a thing happening was almost negligible.

After the first phase of the trial production was completed, Xia ruofei specially reserved a banquet at Ling Ji restaurant and treated Xue Jinshan and the other workers who had worked with him for a week to a good meal. Then, he gave each of them a 2000 – Yuan red packet out of his own pocket.

.....

During the week, Feng Jing had been in constant contact with Dong Jiajun of the Hengfeng auction house in Hong Kong.

The auction was set to be held in five days.

There were a lot of things to do in the company every day, so Feng Jing naturally couldn't go to Hong Kong so early. However, she was involved in the warm – up and planning of the auction and gave many constructive suggestions.

With Feng Jing and Dong Jiajun's cooperation, Hong Kong was in an uproar.

Four days ago, the Hengfeng auction house had put up a notice of the auction on the banner on the official website.

On the banner seat, which took up almost two – thirds of the front screen of the website, was a poster carefully designed by the auction team.

The content of the poster was clear at a glance. It was a person holding a huge dried abalone. The person who was used as a reference was Guo Song, who had gone to Xia ruofei's house to appraise the one – headed abalone that day.

The camera accurately captured the shock and disbelief on the face of this expert, who had been in the seafood industry for more than 20 years, when he saw the top – Quality one – headed abalone.

Luo Jiahao, the employee in charge of publicity at the auction house, had taken a lot of pictures and videos of the one – headed abalone. In the end, the publicity team had a video conference with Feng Jing to discuss a plan. After Feng Jing's suggestion, everyone finally chose the picture that Luo Jiahao had subconsciously taken.

Of course, the background of Xia ruofei's house had been removed with Photoshop. There was only Guo Song and the big abalone in his hand. The background of the photo had a simple and elegant Chinese style, which made the top – Quality one – headed abalone stand out even more.

This photo was about two – thirds of the poster in ink style, and it was very prominent. The blank part was a few large words in calligraphy: It was an unparalleled, precious, top – grade one – Head abalone.

The time and place of the auction, as well as other things to take note of, were written in small font below.

On the top right corner of the poster, the s of Tao Yuan company and Hengfeng group were placed side by side, appearing very eye – catching.

If you clicked on the poster, you would jump to a special page specially made for the auction.

The information on the page was much more abundant.

There was information on the auction items, an introduction to the auction, an introduction to paradise Corporation, the registration method for the auction, entry requirements, and so on. Of course, this special page also contained a large number of photos and edited promotional videos.

The layers of top – Quality one – headed abalones on the page were quite a visual impact.

The less than three – minute promotional video had been carefully edited by the Hengfeng group's advertising department's experts. It presented the perfect figure of the one – headed abalone from various angles. It was said that the magnetic Cantonese baritone was the voice of the most famous male Anchorman in Hong Kong, Liu Wendong. Hengfeng group had specially hired him to dub the video.

When the promotional video was posted on the website, it also began to broadcast on major television stations in Hong Kong during prime time.

Of course, the TV station was broadcasting a 15 – second cut version. If it was the full version, the advertising fee would be huge.

At the same time, the advertisements for the auction also appeared in many of Hong Kong's train stations, large screens in public squares, shopping malls, building elevators, and other places with a high flow of people.

Several major newspapers in Hong Kong also published full – Page advertisements at the same time.

?

Chapter 1037: success (3)

Almost overnight, the news about this auction, which might be the first auction in the history of Hong Kong, swept across the entire Hong Kong.

The publicity and promotion of this auction, from outdoor billboards to TV stations, from paper media to internet media, covered almost all age groups that were used to obtaining information through various means.

As the saying went, "it's hard to buy a two – headed abalone with a thousand pieces of gold" was once widely spread in Hong Kong, and the Hong Kong people were very interested in high – Quality abalones. Therefore, it was no surprise that this auction immediately became the most popular topic of discussion among the Hong Kong people.

In fact, it was Feng Jing's idea to carry out this carpet event.

In the beginning, Hengfeng auction house thought that such a high – end item like the one – Head abalone didn't need to be promoted to the public. After all, most ordinary people couldn't afford such an expensive abalone.

Therefore, the first idea of the publicity team at the auction house was to prepare a banquet and invite the upper class of Hong Kong to attend. Then, they would announce the news of the auction at the banquet.

As for the advertisements in the newspapers and on television, they would also be put out, but they would definitely not cover all areas like now.

However, Feng Jing was very clear about what paradise Corporation needed. Under her insistence, the Hengfeng auction house's manager, Dong Jiajun, received instructions from MA Xiong to satisfy paradise corporation's requirements as much as possible. Therefore, the publicity plan was finally changed to this.

Although the promotion was for the public, the upper class of Hong Kong was not isolated from the world. They quickly learned about the news through various channels.

The junkmen, super – rich people, government officials, and young masters and socialites were even more shocked. Some of the rich and famous people who were on the same level as MA Xiong called him one after another to verify.

MA Xiong patted his chest and guaranteed that their publicity was not fake. He even personally invited these celebrities to attend the auction.

Some people who were slightly lower in social status than MA Xiong also inquired about this matter through their own information channels.

One – headed abalone became the hottest topic in Hong Kong.

At the same time, the company that provided the top – grade one – headed abalones for the auction had also gone from a small company in Hong Kong to a well – known company overnight.

Of course, other than the socialites who could directly ask MA Xiong for confirmation or had other information channels, most ordinary citizens were actually skeptical. After all, two – headed abalones were very rare these days, let alone one – headed abalones that only existed in legends.

Many people thought that this domestic company was hyping up the news, and there were many voices of doubt on the internet.

However, all of this was within Feng Jing's expectations. If there were doubts, there would be a topic to talk about and it would be able to maintain its popularity. So, she couldn't wait for the doubts to be louder!

This was just like how some celebrities created scandals. Sometimes, negative news might not be a bad thing.

More than half of Hong Kong was in an uproar because of the news of the one – headed abalone auction. Feng Jing was finally ready to go to Hong Kong in person.

She had to personally oversee and coordinate the next step of publicity, as well as the layout and flow of the auction.

That morning, Feng Jing didn't go to her office. Instead, she booked a direct flight to Hong Kong in the afternoon. Everything at the company had been arranged, so she slept in and was preparing to pack her luggage.

Just as Feng Jing was enjoying her rare moment of relaxation in bed, her phone by her pillow vibrated. Xia ruofei's name flashed on the screen ...

?

Chapter 1038: surprised and happy (1)

Feng Jing rubbed her sleepy eyes and answered the call. "Chairman ..."

Xia ruofei heard the fatigue in Feng Jing's voice and quickly asked, "Boss Feng, what's wrong? Are you not feeling well?"

Feng Rao felt Xia ruofei's concern and her heart warmed. She yawned and said, "It's fine. I'm just a little tired from video calling Hong Kong two days ago."

"Don't work too hard!" Xia ruofei frowned and said, "your body is your own. You must know how to cherish it!"

Feng Rao smiled and said, "I know!" Chairman, you're calling so early in the morning. Do you have any instructions?"

Xia ruofei chuckled and said, "I had something to do, but ... You should rest first!" We'll talk about it later!"

"Don't!" Feng Rao sat up from the bed and said. She was already awake, so she couldn't fall asleep even if she lay down! Besides, I'm going to Hong Kong this afternoon, so you can tell me now if you have anything to say!"

Xia ruofei didn't expect Feng Jing, who had always worked overtime and was never late or left early, to give him half a day off today. Furthermore, he had to call her at this time and disturb her sleep, so he couldn't help but feel a little embarrassed.

"Boss Feng, since you're already up, why don't you accompany me to the pharmaceutical factory this morning?" he laughed dryly.

"A pharmaceutical factory?" Feng Jing was a little confused. "Chairman, did something happen at the pharmaceutical factory?"

When Xia ruofei was researching the production of the jade skin cream, he specifically instructed Xue Jinshan and the others not to reveal it to Feng Jing in advance. He wanted to give Feng Jing a surprise.

On the other hand, the work at the pharmaceutical factory was usually done step by step, and Xue Jinshan managed it well, so Feng Jing rarely asked about it. She only read the daily reports.

Hence, Feng Rao did not know that Xia ruofei had already solved the problem of mass production of jade skin ointment with Xue Jinshan and the rest.

Although Xia ruofei left early and returned late this week and almost never went to the office, he was used to being lazy. Feng Jing didn't feel that there was anything wrong with it. If Xia ruofei went to the office every day, she would feel that it was a little abnormal.

Xia ruofei said mysteriously, "you'll know when you get there!" Boss Feng, I'll be waiting for you at the company complex in an hour!"

Xia ruofei hung up the phone with a smile.

He mainly considered the fact that Feng Jing was a girl, so it would take more time for her to get out of bed, wash up, and dress up than men. Also, there was a test birth in the morning, so an hour or so was enough time. There was no need to rush.

When Feng Jing heard the busy tone from the phone, she couldn't help but reveal a coquettish expression. She muttered to herself, "You still kept me in suspense ..."

However, she still got out of bed quickly and went to the bathroom to wash up in her loose pajamas.

After Xia ruofei finished the call, he went to his room and turned on his computer to surf the internet.

He was pleased to find that many local media had also noticed the reports about the one – headed abalone auction in Hong Kong and had reposted them.

Especially the media in the southeast province, because of the peach blossom company, they paid a lot of attention to this matter.

Many local media outlets in San Shan had also taken pictures of the Hong Kong media reports and even made some additional reading content, mainly introducing the situation of the Paradise company, the recently popular paradise vegetables, the previously very popular Paradise Fruit, and the iron – Skin maples, etc.

Xia ruofei's interest was piqued. He couldn't help but browse the local forums.

Sure enough, there were more discussion posts about the Paradise Corporation than usual.

Obviously, the auction had not started yet, but the effect that Xia ruofei and Feng Jing wanted to see was already starting to show.

Xia ruofei was browsing the web with a smile on his face. Suddenly, the phone on the computer table vibrated.

"Chairman, I can leave now!" Xia ruofei picked up the call and heard Feng Jing's voice.

Xia ruofei raised his hand and looked at his watch. Less than half an hour had passed, and he couldn't help but feel surprised.

He smiled and said, "I didn't expect you to be so fast!" That's great ... Wait for me downstairs, I'll drive over!"

With that, Xia ruofei turned off his computer and got up to change his clothes. Then, he took out his phone and dialed Xue Jinshan's number as he went downstairs.

After the call went through, Xia ruofei said, "We'll be leaving soon. Are you ready?"

Xue Jinshan's voice came from the phone, "Don't worry, President Xia, everything is ready!"

"Alright! I'll see you later!" Xia ruofei said.

He drove the Knight XV SUV to the complex, picked up Feng Jing, and drove out of the farm.

On the way to the pharmaceutical factory, Feng Rao could not hold back her curiosity and asked Xia ruofei why he was there.

However, Xia ruofei kept smiling and did not answer. Feng Jing was so angry that she rolled her eyes at Xia ruofei. However, the anticipation in her heart grew stronger.

After arriving at the factory, Xia ruofei drove straight to the production workshop.

Xue Jinshan was already waiting outside the workshop with a few skilled workers. As for the Veterans, they were all at their posts. The central control room was the most important place. Xia ruofei had specifically instructed them to be there 24 hours a day.

“President Xia, President Feng!” Xue Jinshan chuckled as he came forward and said, “welcome to the pharmaceutical factory to guide our work!”

?

Chapter 1039: surprise and joy (2)

Feng Rao could not help but glance at Xue Jinshan and asked, “Jin Shan, what are you and the chairman up to? You pulled me here for no reason ...”

Xia ruofei laughed and said, “Mr. Feng, please calm down!” You’ll know in a while ...”

After that, Xia ruofei beckoned for everyone to enter the workshop.

The production line for the trial production of the jade skin cream was ready. The medicinal herbs were prepared in advance, and the workers were in position.

Xue Jinshan cast a questioning look at Xia ruofei. Xia ruofei nodded slightly, so Xue Jinshan said in a clear voice, “Begin!”

A worker in the central control room pressed a button, and the workers on the production line immediately added the first batch of medicinal materials into the feed port. The entire production line began to run.

Feng Rao was a little confused and couldn’t help but ask, “Chairman, you specifically called me over just to watch them produce the heart – nourishing soup?”

In fact, the process of producing Yangxin soup and jade skin ointment was quite different. However, Feng Jing didn’t know much about the production process of pharmaceutical factories. After all, Yingying wasn’t in the technical field. So far, she hadn’t thought about jade skin ointment at all. She had completely assumed that they were producing Yangxin soup because these two production lines produced Yangxin soup every day.

Xia ruofei smiled and said, “chief Feng, don’t be so anxious!” Since you’re already here, why don’t you take a look at the workers’ operations and check the workshop environment? you’re the company’s general manager, so you should come and inspect more often!”

Feng Jing didn't know whether to laugh or cry. She still had to pack her luggage in the morning! Moreover, she still had a lot of ideas about the preparation of the auction. She wanted to sort them out before she set off so that she could contact Dong Jiajun as soon as she arrived in Hong Kong. How could she have the time to "inspect" the pharmaceutical factory now?

What was wrong with the chairman today? Feng Rao couldn't help but mutter in her heart.

However, Xia Ruofei was her superior, and Xia Ruofei was right. The pharmaceutical factory was under the company. As the General Manager, she had to pay attention to it. Since she was already here, she couldn't show her impatience. Otherwise, Xue Jinshan and the others would think that she didn't value the work in the pharmaceutical factory!

This was very demoralizing!

Hence, Feng Jing could only look at Xia Ruofei helplessly and nod. "I understand, Chairman ..."

Xia Ruofei laughed in his heart, but he did not point it out. He just stood in the workshop and watched with a smile.

Sometimes, Xia Ruofei would even go to the workers and look at the instruments and screens on the panel. It was like a leader doing an inspection. He could not understand it, but he had to pretend to be interested.

Feng Rao followed behind Xia Ruofei, confused.

The production line was running in an orderly manner. The production process had been repeated dozens of times in the past seven days, and the workers had long been familiar with this process. The stability of the production line had been adjusted to a high level, so no one had any psychological pressure.

In the midst of the dull rumbles, time passed by.

The workers there were fully focused on their own duties, and all kinds of indicator lights lit up from time to time. Some parts that required manual operation were also accurately completed by the workers under the guidance of the indicator lights.

About an hour later, the last large bag of raw materials that had been ground into powder was put into another feeding port. The production of jade skin ointment had entered the final stage.

This big bag of powder – like medicinal materials was a mixture of several medicinal materials, including the green maple vine, after grinding.

In the future, after production, Xia Ruofei would give the green maple vine powder to the pharmaceutical factory and the pharmaceutical factory would mix it in according to the ratio.

After a while, the indicator light at the discharge port of the production line turned green.

After another two minutes, a stainless steel container was transported out.

Xia Ruofei laughed and said to Feng Rao, "President Feng, let's go! Let's go and take a look!"

Feng Jing followed Xia Ruofei to the stainless steel container.

When she was about six meters away, Feng Rao suddenly stopped. She sniffed hard, and her beautiful eyes gradually widened.

Because she had already smelled a familiar fragrance.

Seeing that Feng Rao had stopped, Xia ruofei couldn't help but stop. He turned around and smiled. "Boss Feng, come here!"

Feng Rao's face gradually became excited as she muttered, "Jadeshi ointment ... Jadeshi ointment ... It must be jadeshi ointment!"

After she finished speaking, she dashed past Xia ruofei and pounced on the stainless steel container.

Xia ruofei was stunned for a moment, but then a smile slowly appeared on his face. He quickened his pace and walked over.

Feng Rao came to the stainless steel container. The unique fragrance of the jade skin ointment became stronger. She became even more excited when she saw the brown ointment – like substance inside.

She didn't even care that the jade skin ointment was still a little hot. She directly reached out and touched a little, put it to her nose, and took a few deep breaths. Then, she carefully applied it on the back of her hand.

The jade skin ointment was applied evenly, and a familiar cool feeling came from the back of her hand. Soon, the small amount of jade skin ointment was absorbed by her skin.

Feng Rao took out a tissue and wiped away the layer of jade skin cream on the back of her hand. She then reached out and gently stroked the back of her hand. The smooth feeling was very familiar to her. Every time after Yingluo used the jade skin cream, her face would feel the same.

Feng Rao suddenly turned around and looked at Xia ruofei. "Chairman, has the jade skin cream been mass – produced?"

Xia ruofei smiled and nodded.

"What's the quality of the product? Is it any different from the artificial jade skin cream?" Feng Rao asked.

Xia ruofei chuckled. "After almost a week of testing, the quality of the products has stabilized. Basically, it can reach the upper – Middle grade. There's no problem selling it in bulk."

The biggest difference between manual brewing and mass production was the stability.

If the Jade skin cream was brewed manually, perhaps the control of the fire was a little more accurate, or the state of the brewing was a little better, then the quality of the final Jade skin cream would be very high. If it was the opposite, it would be a little worse.

As long as the parameters were in place, the quality of each batch of products would be stable.

Feng Rao was stunned for a moment, then she let out a scream of surprise. She couldn't help but rush forward and hug Xia ruofei. She excitedly said to Xia ruofei, "Chairman, you're too awesome! That's too awesome!"

Xia ruofei was shocked by Feng Jing's reaction. He did not expect her to be so agitated. He did not know how to react.

Xue Jinshan and the others couldn't help but widen their eyes. Then, they revealed a meaningful smile.

"Boss Feng, calm down ... Calm down ..." Xia ruofei quickly whispered. "Jinshan and the others are right there!"

Feng Rao realized that she had lost her composure. She quickly let go of Xia ruofei and her face flushed.

Feng Rao was a little embarrassed as she glared at Xia ruofei and said, "Chairman, why did you deliberately hide the mass production experiment from me?"

"I just wanted to give you a surprise!" Xia ruofei shrugged.

"Surprise? 'It's more like a shock ...' Feng Jing couldn't help but whine, 'the company's most important phenomenal product is being developed, and I, the General Manager, have no idea about it. Chairman, you're too much ...'"

Xia ruofei laughed dryly, "hehe ... Weren't you busy with the auction these few days?" Besides ... I didn't expect the mass production experiment to go so smoothly. I thought it would take at least ten days to half a month!"

Although Feng Rao was a little embarrassed, her strong woman nature made her quickly immerse herself in excitement.

"Chairman," she said impatiently, "once the jade skin cream is launched, it will definitely be a domineering product in the skincare industry. I suggest that we immediately gather the company's key leaders for a meeting and fully deploy the production, sales, and publicity of this heavyweight product!"

Xia ruofei laughed. "There's no hurry. President Feng, let's go to the lounge and sit down. I'll tell you the results of the experiments over the past few days!"

?

Chapter 1040: a good show begins (1)

Only then did Feng Rao recover slightly from her excited state. Xue Jinshan quickly stepped forward and said, "President Xia, President Feng, the reception room is ready!"

"Then let's go!" Xia ruofei said with a smile.

The three of them came to the administrative building not far from the production workshop.

The reception room on the second floor was ready. The air conditioner had been turned on in advance, and seasonal fruits, tea, and drinks were placed on the side table. There were also several female employees guarding the venue.

After Xia ruofei sat down, he smiled at Xue Jinshan and said, "" Jinshan, let these employees go back! We're family, there's no need to be so Grand ..."

Xue Jinshan nodded and motioned for the female employees to leave.

After seeing the employees close the door of the meeting room, Xia ruofei told Feng Jing about the trial production this week.

The more Feng Jing listened, the more excited she became. She had thought that Xia ruofei had only overcome some bottlenecks in the mass production process and could achieve initial automation in the production process. In fact, it was already amazing that he could achieve this in such a short time.

What Feng Jing did not expect was that Xia ruofei had done far more than she had expected.

Not only had they achieved stable mass production, but they had also developed a variety of products and grades.

It could be said that Xia ruofei had completed all the R & D work by himself. The jade skin cream's product line was already very complete. The next step was almost the work of the marketing department.

The marketing department had to design the waves and frequencies of these products, study the pricing strategies and sales models of different grades of products, and tailor – make different advertisements for each category.

After hearing Xia ruofei's introduction, Feng Jing was dumbfounded. After a while, she said, "" Chairman, you ... How did you do it? A complete product line was developed in seven days? Oh my God ..."

Normally, even an experienced research team would need months or even years to develop a mature product.

Even if Xia ruofei was the owner of the secret recipe of the jade skin cream, it was not something that could be done overnight to develop such a complete product series.

Not to mention that it had already achieved mass production?

Xia ruofei laughed and said, "boss Feng, how many times have you given instructions?" How would I dare to slack off? He must be working overtime! I ... I used too much force all of a sudden ..."

Xue Jinshan couldn't help but laugh out loud.

However, he was quite impressed with Xia ruofei because he had accompanied him throughout the seven days. He knew very well how much work Xia ruofei had done in those seven days.

Xia ruofei was so engrossed in his work that he almost forgot himself, which made Xue Jinshan speechless.

Adjusting the analysis parameters and data, experimenting again and again was very boring. Xue Jinshan was very clear that after seven days of continuous work, an ordinary person would not be able to stand it. However, Xia ruofei was as if nothing had happened.

Success was not by chance! Xue Jinshan couldn't help but think.

Feng Rao could not help but look at Xia ruofei and said, ""How would I dare to instruct you, the chairman? It's more like you're giving me instructions ..."

Xue Jinshan's eyes almost fell out of their sockets. Ever since he had joined the company, Feng Jing had given him the impression that she was a capable and capable woman. Even when she was assigning tasks, she spoke very quickly and was almost unsmiling. He did not expect to see her acting like a little girl in front of Xia ruofei twice in a row.

Xue Jinshan couldn't help but cast a meaningful look at Xia ruofei.

Xia ruofei and Feng Jing didn't realize what was wrong. As they got closer to Yingluo, Feng Jing became more and more real in front of Xia ruofei. Xia ruofei had gotten used to her coquettish tone.

Xia ruofei laughed. "If it weren't for your constant inquiries about the jade skin cream, I wouldn't have had the determination to tackle the technical challenges!"

Feng Rao couldn't help but roll her eyes at Xia ruofei. "You're still talking! This company is yours, okay? As a boss, you're not even as dedicated to the company as a part-time girl like me. Really ..."

"Hey! You're the company's general manager! You'll get a year-end bonus!" Xia ruofei said, "shouldn't we have a little more sense of ownership?"

"Then you're still the boss of the company!" Feng Rao immediately said.

Xue Jinshan saw that the tone of the two people was becoming more and more flirtatious. He couldn't help but feel uneasy. He cleared his throat and said with a dry smile, "President Xia, President Feng, why don't I ... Leave for a while?"

Only then did Feng Rao realize that something was wrong. She glared at Xue Jinshan and said, "Why are you avoiding me? There's nothing between the chairman and me that's shameful ..."

Xue Jinshan couldn't help but chuckle.

Xia ruofei coughed and changed the topic. ""Jinshan, you'll have to work harder these days. You can't relax on the coordination of the clinical trials. You also have to hurry up with the daily production tasks in the factory. At the same time, you also have to prepare the materials and get the sales approval for the jade skin cream as soon as possible!"

"Yes!" Xue Jinshan immediately replied with a serious expression. President Xia, I'll immediately organize people to sort out and summarize the relevant materials. In addition, I'll also go to the drug Administration to understand the situation in advance. The approval of the cosmetics should be relatively easy!"

Xia ruofei nodded. "You'll be fully in charge of this. If you have any difficulties, you can look for President Feng!"

"Chairman, are you going to be a hands-off boss again?" Feng Jing couldn't help but ask.
