

## God tier Farm 2141

### Chapter 2141 A pool (2)

Ollis's strength was not much different from Puyol's. He used to be a sailor on a cruise ship. When Puyol was in power, he was mainly roped in. Basically, he was Puyol's assistant in this survivor camp.

It had not been easy for Ollis to "become a proper leader", but Puyol had returned. Of course, he was not satisfied. In addition, he had also used benefits to rope in a few people. Moreover, his own strength was not much weaker than Puyol's. Hence, a conflict occurred as soon as Puyol returned.

It was during this conflict that Puyol kicked Ollis in the abdomen and sent him flying a few meters. His entire abdomen caved in, and he died on the spot.

Only then did Puyol realize that his power had suddenly increased by many times.

Puyol didn't want to kill Ollis at first, but this unintentional kick ended Ollis's life. In the eyes of the other survivors, this was undoubtedly very brutal, and it also displayed Puyol's absolute strength.

Since then, Puyol had completely taken control of the small society formed by the survivors and became the absolute king of the camp.

Of course, Puyol still had a lingering fear of that pool, especially that terrifying Python. It made Puyol flinch. He also strictly ordered the other survivors not to get close to that area. That small pool had also become an absolute forbidden zone on the island.

Xia ruofei's eyes lit up when he heard this.

Puyol did not know what had happened, but Xia ruofei could roughly make out the situation from his description.

He was almost certain that the pond that Puyol had mentioned was protected by an array. The fruit that Puyol had eaten was definitely not simple. It could actually produce true energy in an ordinary person's body. This was definitely a very precious spirit fruit in the cultivation world.

Xia ruofei guessed that the reason why Puyol was able to take one or two steps forward and pick the fruit was that the boundary had been in existence for too long, causing some minor problems in the operation of certain parts.

At the thought of this, Xia ruofei was filled with curiosity and anticipation about the pool that Puyol had mentioned.

However, he did not rush to the pool to check it out. Instead, he continued to ask, "Puyol, other than this, did anything strange happen to you after living on the island for so many years?"

Puyol thought for a moment and said, "we've been mainly active on this side of the island these past few years. There are many places on the island that we haven't set foot on. We've been like this every day. We're just struggling to survive ... If there's anything strange ..."

Puyol frowned and thought hard, then said, "There's one thing ... I don't know if it counts ..."

Xia ruofei took out a bowl of noodles from his backpack and handed it to Puyol. He said with a pleasant expression, "It doesn't matter, tell me first! What you said just now was very helpful to me. This is your reward!"

Puyol took the ordinary instant noodles in a barrel as if he had obtained a treasure. He repeatedly expressed his thanks and then said, "Great immortal, it's like this ... On a few days every month, there will be a very strange sound coming from the forest. It's a little like the cry of a beast, but not very much like it ... At first, we were quite afraid, but we slowly got used to it ..."

Xia ruofei raised his eyebrows and said, "Oh?" What was the exact date? Are there any patterns?"

Puyol smiled bitterly and said, "great divine immortal, we didn't record the time and date on this deserted island. I don't know the exact date. However ... I'm sure that when the beast roar appeared, the moon in the sky was very round."

Xia ruofei nodded thoughtfully. This meant that it was the night of the full moon. Were there any exotic beasts out on the night of the full moon?

Things were getting more and more interesting ...

Xia ruofei thought for a moment and said, "Pjoll, I'll have to trouble you to bring me to that pool to take a look!"

Puyol's face turned pale when he heard that. He said, "Lord Divine immortal, that Python is really very terrifying. My legs go soft when I think about what I experienced that day ... It's better not to provoke it for no reason, right?"

It was obvious that Puyol had been scared out of his wits by the Python.

Xia ruofei smiled. "Don't worry. Just lead the way for me. As long as you can see the pool, you can come back. I won't let you take the risk."

Although Xia ruofei's tone was gentle, it did not leave room for discussion. No matter how unwilling Puyol was, he did not dare to go against Xia ruofei's wishes. He could only nod with a bitter face.

"Very good, let's set off now!" Xia ruofei said with a smile.

"Yes!"

Puyol stood up and pulled out an old backpack from under the simple wooden bed. He put the Cola and the noodles in it and carried the backpack on his back before leaving the wooden house with Xia ruofei.

The other survivors, including the three women of Puyol, stood in the open space in the middle of the camp, waiting uneasily.

The moment Puyol came out, he said to everyone, "You guys go do what you should be doing! I'll take this Lord to a place!"

With a faint smile on his face, Xia ruofei walked out of the shabby camp with Puyol. The survivors looked at Xia ruofei in awe. It was not until the two of them disappeared into the woods in front of the camp that they started to work again with a nervous mood.

On this isolated island surrounded by the sea, it was impossible for these people to even escape. There were no laws or morals here to restrict them. Whoever had the bigger fist was the boss.

Without a doubt, Xia ruofei's fist was the biggest. These survivors were used to the rule of Puyol. Although their days were tough, at least they didn't have to worry about their lives for now.

Now that it was Xia ruofei's turn, they did not know what their fate would be like. Hence, they were all very uneasy.

Xia ruofei naturally did not care about the thoughts of the survivors. His mind had long flown to the mysterious pool.

Puyol led Xia ruofei through the dense forest. As they had not dared to come near this area for many years, Puyol could only remember the general direction. Hence, their speed was not particularly fast. He would stop from time to time to observe the surrounding environment. He would continue after a careful identification.

Xia ruofei didn't rush him and just followed unhurriedly behind him.

Of course, with so many mysterious things happening on this Island, Xia ruofei did not dare to let his guard down. He was on high alert the entire time and his mind power was spread out at any time. Once there was any movement in the forest, he would be able to detect it immediately.

To Xia ruofei's great anticipation, the white fox in the space was also very excited. Through its rich body language, it told him that as he continued to move forward, the aura of the world stone became stronger and stronger. Obviously, if Puyol did not lead him the wrong way, that pool could very well be where the world stone was.

Xia ruofei followed Puyol and fumbled through the dense forest for about an hour. Puyol parted a patch of grass and suddenly stopped in his tracks. His face revealed a trace of fear.

Xia ruofei saw that Puyol had stopped and immediately peeked over to take a look.

There was a pool of water about five to six meters in diameter about twenty to thirty meters ahead of him.

The water in the pool was just as Puyol had said. It was dark blue in color, like a pure sapphire embedded in the forest.

It was very quiet around the pool. There was no sound of insects that could be heard in the forest at any time. It was as if this was a forbidden area. Even the small animals in the forest stayed away from it, which was a little strange.

Puyol said in a trembling voice, "Daoist immortal, it's that pool in front ..."

Chapter 2142 Array (1)

Actually, there was no need for Puyol to say it. When Xia ruofei first saw the pool, he already had the answer in his heart.

He said indifferently, "very good!" Puyol, you've completed your mission. You can return now ... This is your reward!"

With that, Xia ruofei took out a pile of biscuits, bread, Coke and other food and drinks from his backpack. He even gave two packs of cigarettes. Puyol's eyes lit up when he saw it. He even temporarily forgot about the fear he had for the pool and the Python in it.

"Thank you!" He said excitedly. Thank you, Daoist immortal ..."

Puyol hurriedly put all the things that Xia ruofei had given him into his backpack. He even carefully put the two packs of cigarettes into his pocket as if he was holding two precious diamonds.

"Oh, right. Before I go back, I don't want anyone to appear within a 500 – meter radius of this pool, including you," Xia ruofei said indifferently.

"Understood!" Puyol quickly replied. Understood! Don't worry, Daoist immortal! Even if you asked us to come, we wouldn't dare to come! After I go back, I'll restrain my subordinates and stop them from entering the forest to hunt without your order!"

Xia ruofei didn't want to be disturbed by others, so he marked out a forbidden area with the pool as the center and a radius of 500 meters. Puyol had sealed off the entire forest. Of course, Xia ruofei was happy to be in peace.

He nodded with satisfaction and said, "yes!" Then you can go back first!"

Puyol did not want to stay here for a long time. He always had a feeling of fear and trepidation by the quiet pool.

After Xia ruofei spoke, he felt as if he had been pardoned. After turning around and taking two steps, he turned back and carefully said, "Divine immortal, please be careful. That Python is really scary. If it's not necessary, please don't provoke it ..."

Puyol still had a glimmer of hope that this time, the "God" would take him away from this deserted island and return to human society.

This was much more important than the biscuits and drinks in his backpack.

If the "Daoist immortal" was accidentally buried in the snake's stomach, then wouldn't his little hope be in vain?

Xia ruofei smiled and said, "I see. Thank you for your reminder!" Puyol, you should leave ..."

Although Xia ruofei's tone was gentle, Puyol's heart skipped a beat. He quickly said, "Yes! Yes! Yes!"

Then, he hurriedly turned around and went into the forest. Soon, he was far away from this area and quickly headed in the direction of the camp, not even daring to look back.

Xia ruofei's spiritual power had been spreading out to Xuanji. Next, she needed to get close to the pool to observe the array boundary at a close distance. She even needed to make some attempts to prevent Puyol from coming back and secretly peeking from the side, although the possibility of this was extremely low.

After confirming that Puyol had left without looking back, Xia ruofei did not approach the pool immediately.

He immediately took out some Jade and other materials for setting up the array from the spirit map space. He set up some alarm arrays in a radius of about ten meters around the pool. Once the array was touched, he would be able to detect it immediately.

There wasn't even the sound of insects nearby. Xia ruofei had used his spiritual power to investigate carefully. It was indeed dead silent. There weren't even insects, let alone hares, foxes, and other animals. If the array was triggered, it was basically the survivors in the camp who had broken in.

After setting up the realm formation, Xia ruofei carried his backpack with one hand and carefully approached the pool.

When he was two to three meters away from the pool, Xia ruofei threw his backpack on the ground. Then, he kept his mental power alert and circulated his genuine Qi in his body according to the main points of the great Dao Sutra. He continued to move forward carefully.

In this state, if there was any danger, Xia ruofei would be able to react in time and burst out with his strongest attack.

In fact, when Xia ruofei's spiritual power probed in the direction of the pool, he had already discovered something different. When he was one meter away from the pool, his spiritual power encountered an invisible barrier and could not penetrate it at all.

There was nothing there, and he could see everything in the pool. On the other hand, his spiritual power, which was difficult to block with material obstacles, could not break through at all.

If Xia ruofei closed his eyes and used his spiritual power to look, he would not be able to find the pool. He would only sense that there was a blind spot in that direction.

It was a strange situation, but it was within Xia ruofei's expectations.

He walked to the invisible barrier step by step and tried to reach out.

A gentle resistance came and Xia ruofei's palm could not move forward at all.

He injected genuine Qi into his arm and gradually increased his strength.

That invisible resistance was also increasing at the same time. With the use of true Qi, this kind of force could even move a truck. However, in the face of this invisible resistance, it was completely useless.

The resistance was like water waves. It was not hard at all, but it was very tough. No matter how much strength Xia ruofei used, the array only caved in a little. When Xia ruofei removed his hand, it immediately returned to its original state.

Xia ruofei was not unfamiliar with this situation. In the cave in the spirit map space, there were several protective barriers like this. His human and earth talismans were taken out of the barriers.

## Chapter 2143 Array (2)

The method to break the barrier was not complicated. To put it bluntly, it was to break it with force.

Today, he planned to try the same method.

Xia ruofei gritted his teeth and the true Qi in his body suddenly sped up. Then, he took a bow stance and all the muscles in his body tensed up. All his strength was concentrated on his right fist. After a loud shout, he waved his fist and smashed it against the invisible barrier.

Xia ruofei had gathered all his strength in this punch, and it even made a piercing sound.

The fist landed on the invisible barrier and Xia ruofei could clearly feel the entire barrier caved in.

However, before Xia ruofei could show his excitement, the barrier emitted a visible light. Then, Xia ruofei felt a huge rebound force and he was sent flying.

Xia ruofei crashed heavily into a tree, making a dull sound.

The pain in his back was secondary. Xia ruofei's right fist felt as if the bones were about to crack. His entire right arm could not help but tremble slightly.

Xia ruofei couldn't help but gasp.

He shook his fist, and it took a long time for his fist to recover.

In fact, when the rebound force came, Xia ruofei realized that he had done something stupid.

Although he had broken the small enchantment by force in the spatial cave, he did not break it by brute force. Instead, he mainly relied on his spiritual power to mobilize the invisible spatial force and constantly increase the power before finally breaking it.

This kind of barrier was extremely tough, and there was no way to break it with an instantaneous burst of power.

Although there was no invisible spatial force in the outside world that Xia ruofei could use and he could only use his genuine Qi to break it, he should not have chosen to concentrate all his strength and burst it out in an instant.

However, judging from the situation just now, even if he gradually increased his strength, it would be very difficult to break this enchantment.

Xia ruofei could not help but feel troubled.

He clearly knew that there was a high possibility that there were world stones in this pool. Furthermore, there might even be other opportunities. Yet, he could only watch helplessly. He could not enter at all.

He thought hard for a long time and finally thought of a possibility. Puyol had once accidentally entered the boundary by one or two steps, which meant that the boundary might have been damaged to a certain extent due to the passage of time.

In that case, if he could find the damaged spot where Puyol had entered the boundary back then, the difficulty might be reduced by a lot.

Thinking of this, Xia ruofei had a new motivation.

He immediately got into action, trying bit by bit along the invisible barrier that was one meter around the pool.

The sky was getting dark. Xia ruofei had been trying for more than two hours by the pool. Even though he had not found anything yet, he was patient enough.

Even an ordinary person like Puyol could take one or two steps in. As a cultivator at refined Qi Level 6, there was no reason for him to be inferior to Puyol.

Unless this array barrier had the ability to self – Repair.

The possibility of this was extremely low and could basically be ignored. If the enchantment could repair itself, Puyol wouldn't have been able to walk in so coincidentally back then.

Finally, after two and a half hours of trying inch by inch, Xia ruofei found a spot where the energy of the barrier was obviously much weaker.

Actually, it was only a matter of time before they found this location. Xia ruofei was just unlucky, so he took so long.

When he felt his mind power Probe over, he found that the resistance of the enchantment was significantly reduced at a certain spot. He knew that this was most likely the spot where Puyol had accidentally entered the pool.

Xia ruofei's spirit was lifted. He quickly controlled his spiritual power to pass through the crack.

The next moment, he felt a chill as if it could even freeze his mind power.

Of course, this feeling was not very comfortable. Xia ruofei endured the discomfort and scanned the area with his spiritual power.

Other than the fact that the temperature of the water was a little low, there was nothing special about it.

However, Xia ruofei still made great progress. He could sense many complicated array runes carved on the side of the pool. The pool was the center of these array runes and all the array runes would eventually return to the pool.

Xia ruofei's array skills had improved greatly. He had spent a lot of time studying array skills. At the same time, he had processed a large number of basic materials for refining spiritual puppets and carved countless array patterns. His array skills had also improved.

Although Xia ruofei had never seen this formation before, he could still deduce the general principle of this formation from the formation patterns.

The more one studied arrays, the more one would feel that their knowledge of arrays was lacking.

Xia ruofei had only scratched the surface of this broad and profound knowledge. However, most of what he had mastered were basic knowledge of arrays, so even though the array he saw today was very complicated, he could still try to analyze it from the most basic array structure.

In fact, no matter how complicated each formation was, it was made up of countless basic formations after being broken down. This included the internal formation of the spiritual puppet that Xia ruofei had not been able to complete yet.

When he sensed the array pattern, Xia ruofei quickly immersed himself in it. He was not in a hurry to try to break it apart 'with his genuine Qi.

He had considered the terrifying Python that Puyol had mentioned. From Puyol's description, Xia ruofei could not determine the Python's strength. However, he was sure that the Python could not leave the array's range. If he were to use brute force to break through the formation, the Python might be able to break free from the formation's restrictions.

It would be fine if the Python's strength was average, but if Xia ruofei was no match for it, the survivors on the island would have no hope of survival if such a terrifying monster was released.

As for Xia ruofei, he could only run for his life. He could forget about coveting the opportunity in the pool.

On the contrary, if he were to enter the boundary by analyzing the principle of the formation, Xia ruofei would still have an escape route if he could not defeat the Python. As long as he retreated out of the boundary, he would be safe.

After making up his mind, Xia ruofei was no longer in a hurry. He sat down beside the barrier and used his spiritual power to check the situation of the array pattern through a small crack in the barrier. At the same time, he sketched out the array pattern in his mind and started to deduce it.

Xia ruofei entered a state of extreme concentration. His solid array Foundation was his biggest help.

"The combination of a basic trapping array and a defensive array can actually produce such an effect?"

"This array pattern is very special. It seems to be able to connect several small – scale basic array formations!"

"Why are there two array patterns with completely opposite attributes combined together? and the degree of fusion is so high?"

.....

Xia ruofei mumbled to himself as he analyzed the situation. Sometimes, he would even use his fingers to gesture in the air.

In his state of concentration, he had no concept of the passage of time.

The sky had already turned completely dark, especially in the forest, which was pitch black.

Through the gaps between the leaves, a full moon hung high in the sky.

Xia ruofei was completely oblivious to this and did not even realize that the moon was already quite round today ...

As time passed, Xia ruofei sat on the ground like a clay statue, unmoving.

He had been in this state for a very long time. In the beginning, he would still use his fingers to draw all sorts of array patterns in the void. Later on, he didn't even move his fingers and just sat there quietly.

The dark night gradually passed, and the sun rose above the sea. Rays of sunlight began to shine down on the mountain forest. Xia ruofei was still sitting cross – legged without moving.

For the entire day, Xia ruofei did not move an inch. He was completely immersed in the profound array Dao.

As the sun rose and set, Xia ruofei's second night on the island came.

Xia ruofei, who had been sitting there for more than ten hours, raised his eyes and looked surprised.

"I understand!" Xia ruofei couldn't help but wave his fist and said excitedly, "so the direction of the research was wrong from the beginning! The two sets of formation patterns that are like twin sisters are the core and key to the entire formation!"

Chapter 2144 Disaster of the giant python (1)

Initially, this formation was like a thick fog in Xia ruofei's eyes. No matter how he analyzed it, he could not find any clues. But now, it was completely different.

When he discovered the uniqueness of the Twin array patterns, it was as if he had suddenly found the end of the thread in a mess. Many questions that he had in the previous ten to twenty hours of analysis seemed to suddenly become clear.

"So that's how it is!"

"It's not complicated even if you understand it!"

"These two basic array runes can actually be used like this ..."

Xia ruofei kept muttering to himself in amazement. He was getting more and more familiar with this array that could form a tough barrier.

It was like a complicated math problem. Before finding the solution, one might not even understand the problem. One would not know what to do with the conditions given in the problem.

And when a flash of inspiration appeared in his mind and he found the correct way to solve the problem, he would find that the known conditions given in these problems were actually useful, and it required very clever skills to use them.

Then, in the process of solving the problem, when he was close to the correct answer step by step, the sense of achievement was unparalleled.

Xia ruofei was in such a state. He had almost forgotten the passage of time and was completely immersed in this ingenious array.

As the analysis went deeper, the formation that was originally covered by a veil became clearer. After the fog was cleared, Xia ruofei's eyes became brighter.

In fact, Xia ruofei was able to analyze the principle of this formation not only because he had a solid foundation in formation theory, but also because of luck. The most important thing was that this formation had existed for a long time, and it was even slightly damaged due to the time.

It was because of this small damage that Xia ruofei's spiritual power could enter the formation. Otherwise, no matter how solid his Foundation of formation theory was, it would be useless.

Time passed by quietly. After two hours, Xia ruofei finally let out a long breath and stood up.

After a day and night of non – stop analysis, he finally completely understood the principle of this formation.

During this process, Xia ruofei's array skills had also improved greatly. This was because there were many applications of basic array patterns in this array that Xia ruofei had never heard of before. Not only did they successfully combine with each other, but there were also ready – made combinations that provided verification. It was like a treasure vault. Xia ruofei felt that many parts that he did not know about when he was preparing the parts of the spiritual puppet had suddenly been understood after one day and one night.

This could be considered an unexpected surprise.

He had only wanted to try his best to crack this array, but he didn't expect it to be so helpful to his array Dao. When he dealt with the materials for the spiritual puppet later, it would be much easier for him.

Xia ruofei couldn't help but feel emotional. It seemed that the practice of array Dao still needed to be improved through practice! It was like the sea of questions tactic before the college entrance examination. In fact, it was to come into contact with different types of questions as much as possible and learn different ways of thinking to solve the questions. In the end, it was the effect of understanding all the questions.

However, the cultivation environment on earth was harsh now. Cultivators were hiding somewhere to cultivate. At least, Xia ruofei rarely encountered them. Where could he find so many examples to learn from? That was a real problem.

Xia ruofei felt that he should go out more often in the future, just like this time. If he could find the relics left by the senior cultivators, it would definitely be of great help to him.

Of course, these thoughts only flashed through Xia ruofei's mind. The most important thing now was to enter the formation and explore the mysterious pool.

After understanding the principle of the formation, this extremely tough formation was no longer an obstacle to Xia ruofei.

He rested for a while to adjust his condition, then confidently walked to the transparent array barrier.

This formation was extremely exquisite. It combined the functions of a trapping formation, an illusionary formation, and a protective formation, with the outermost protective barrier as the main layer.

After he reached out and touched the boundary of the array, his mental energy quickly probed in, and he skillfully found the node of the array.

Xia ruofei's thought process was also very clear. It was to first break the illusion array in the array. According to Puyol's description, there was a terrifying Python in the array. Under the cover of the illusion array, what the naked eye could see might not necessarily be the real situation inside the array. Therefore, Xia ruofei would definitely not enter the array without breaking the illusion array.

The existence of the protective barrier was no longer an obstacle to Xia ruofei. On the contrary, it was a form of protection. If Puyol was right, the Python should be blocked inside the barrier.

Xia ruofei's spiritual energy accurately found the node of the illusory formation. He transferred his genuine Qi into it. The next moment, the fog that shrouded the area of the formation was lifted.

From the outside, what he saw was a blue pool with nothing beside it.

However, after the illusory formation was broken, the true appearance of the pool was revealed.

There was a pool of blue water with a faint white mist. There were also pieces of ice on the surface of the water. It was obvious that the temperature of the water was very low.

#### Chapter 2145 Calamity of the giant python (2)

A huge Python was coiled in the middle of the pool. The Python was as thick as a bucket. As it was coiled together, its length was unknown. However, it was definitely the largest snake that Xia ruofei had ever seen.

The Python was obviously not affected by the illusion. It spat out a scarlet red snake and stared at Xia ruofei with its cold eyes. Being stared at by such a huge Python, Xia ruofei still felt a chill from the bottom of his feet even though he knew that the Python could not come out of the array.

Especially when he thought about how the Python had been right in front of him for the past day and night, and how it was very likely that it had been staring at him, Xia ruofei felt a chill down his spine.

He steadied his mind and continued to observe the environment within the formation.

In addition to the Python, there was also a small tree in the pool. The part of the tree that was exposed above the water was about three meters high, but the crown was very lush, almost covering the entire range of the array, like a large umbrella over the pool.

Xia ruofei had yet to enter the formation, but he could already feel that this tree was not ordinary. Every leaf was full of vitality, and there were more than a dozen fruits hanging on the tree. Every one of them was emitting a strong and alluring fragrance.

Xia ruofei's eyes brightened. He could guess that Puyol must have eaten one of the fruits.

The reason for this was that the fruits hanging on the tree had two different colors. One of them was dark red, and its shape and size were exactly the same as what Puyol had described. The other fruit was dark purple. The two fruits were almost exactly the same except for the color.

There were about seven or eight fruits of each color.

Xia ruofei scanned the fruit with his spiritual power and could feel the rich energy in the fruit. He was sure that the two – colored fruits were ripe and not the same fruit when it was ripe or unripe.

It was indeed a strange thing for the same tree to have two different kinds of fruits of different colors, and each one of them contained such an alluring aura.

Modern people could make a pot of flowers bloom with colorful colors through grafting or genetic technology, but this tree was obviously formed naturally.

Xia ruofei guessed that there might be a branch growing on the damaged part of the formation, and there was a dark red fruit hanging on it. Puyol took a step in and reached out to pick it.

It had to be said that Puyol's luck was really heaven – defying.

Xia ruofei looked at the fruits on the tree greedily, but he quickly turned his attention to the Python.

With the Python's protection, these fruits were simply invisible and untouchable, like Flowers in the Mirror and the moon in the water.

Xia ruofei couldn't help but have a headache.

The Python emitted a dangerous aura, which made Xia ruofei feel very threatened.

He was sure that not only was Puyol unable to fight back against the Python, even he himself was probably not the Python's match.

The difficulty was greater than he had imagined.

Before Xia ruofei came, he had a glimmer of hope. After all, Puyol was just an ordinary person with good skills. The Python that was so powerful that it was undefeatable in Puyol's eyes might not be that difficult to deal with for a cultivator like him.

Now, this fantasy was shattered.

It would be difficult for him to gain any advantage against this Python.

However, it was not easy for him to analyze the formation thoroughly. There were still more than ten alluring spiritual fruits in the pond. More importantly, the realm stone that he and the White realm Fox desperately needed was most likely in the pond. Xia ruofei would not allow himself to return empty – handed.

How should he deal with this Python? Xia ruofei was also deep in thought.

Unknowingly, the moon in the sky gradually came to the top of their heads.

At this moment, the Python that had been staring coldly at Xia ruofei moved.

Xia ruofei was shocked. He subconsciously took a step back and got into a defensive position.

However, the Python only glanced at Xia ruofei before it shifted its position and raised its head.

Xia ruofei could even see a hint of mockery and disdain in the Python's eyes.

To be looked down upon by a snake ... Xia ruofei was speechless.

He was quickly attracted by the situation inside the array. He saw the Python open its mouth towards the moon in the sky, and then a bright light fell from the sky, accurately entering the Python's mouth.

The Python seemed to enjoy it very much, its tail happily slapping the water surface, and at the same time, it let out an excited cry!

“It’s absorbing the moonlight!” Xia ruofei muttered to himself in shock.

It was obvious that the Python was the one that Puyol had mentioned that terrifying cries could be heard from the forest during the roundest days of the month.

Xia ruofei did not find it strange that a snake could make a sound. After all, it was a Python that could absorb the moonlight.

The demons in fantasy novels could even transform into human forms! What was so strange about a snake making a sound?

The Python obviously did not think much of Xia ruofei. In its eyes, this human was too small. Besides, with the protection of the array, it did not need to worry at all. This human would not be able to enter.

Hence, even though Xia ruofei was outside the array, the Python continued to absorb the moonlight as if there was no one else around.

Xia ruofei’s heart skipped a beat. This might be an opportunity!

Chapter 2146 Disaster of the Anaconda (3)

This Python was currently concentrating on absorbing the moonlight. If he quickly entered the array, he might be able to give it a surprise attack!

Although he could feel how terrifying the Python’s aura was, Xia ruofei would not be satisfied if he did not try it for himself.

At the very least, there was this protective barrier. Once his life was in danger, Xia ruofei could still escape from the barrier.

Most importantly, if it was any other time, Xia ruofei might not even have a chance. The Python would only be absorbing the moonlight for a few days. If he did not grasp this opportunity, he might have to wait for a month.

Xia ruofei obviously could not wait that long.

Thinking of this, Xia ruofei quickly made up his mind. His eyes revealed a trace of determination. With a flip of his hand, he took out the sharp military armor that had accompanied him for many years from the space. He circulated his whole body’s genuine Qi and poured it into the dagger.

After adjusting himself to his best condition, Xia ruofei began to carefully use his spiritual power to guide his genuine Qi to open the node of the protective array.

Xia ruofei had already memorized this formation by heart. He easily found the core node of the protective formation. As long as he poured his genuine Qi into it, the protective boundary would open.

Xia ruofei looked at the giant python again. He gritted his teeth and transferred his genuine Qi to the nodes of the formation.

The giant python was focused on absorbing the moonlight and did not pay any attention to the tiny human beside it.

Xia ruofei could feel the protective barrier melting away rapidly.

It was now!

He knew that the wisp of true Qi could only last for one or two seconds at most, and then it would be exhausted and the protective barrier would be formed again.

Xia ruofei did not hesitate. He stomped on the ground with his right foot and shot into the array like a bolt of lightning, pouncing on the giant python.

He also raised the dagger in his hand, which was shining with a cold light, and stabbed it at the Python's seven – inch area.

Hit where it hurts. Xia ruofei didn't know if this rule would work on a Python with a high cultivation level. In this case, he could only try.

The giant python only reacted when Xia ruofei was right in front of it.

He discovered that this ant – like human had actually barged into the array's range and couldn't help but be somewhat astonished.

In that moment of distraction, Xia ruofei's dagger had already stabbed into its vital spot.

Ding! Xia ruofei's heart skipped a beat.

The Python's scales were extremely hard. The military dagger that was infused with true energy only left a white mark on it. It could not even break through its physical defense.

Xia ruofei's reaction was also very fast. When his first attack failed, he immediately used the force to flip and rush out of the formation. At this time, the formation had not yet reformed and he still had time to escape.

Xia ruofei didn't forget to use his spiritual power to sweep up the Crimson fruit that was closest to him. As he escaped out of the formation, he quickly kept the fruit into the space.

However, the Python had already reacted.

The Furious giant python let out a long roar. Its head suddenly stood upright, and its coiled tail suddenly stretched out. With a swishing sound, it swung it at Xia ruofei.

The Python's speed was beyond Xia ruofei's expectations.

In addition, he was only borrowing the force to roll out, so his speed was definitely not as fast as his full – speed sprint.

The thick tail of the Python hit Xia ruofei hard.

Xia ruofei felt as if he had been hit by a train. He spat out a mouthful of blood and almost passed out.

However, the snake's tail whipped Xia ruofei's speed and he was thrown out of the formation's range.

He fell heavily to the ground, feeling that his ribs might have been broken, and his internal organs seemed to have shifted.

Before Xia ruofei could celebrate his escape, he was horrified to see that the Python was flying at an extremely fast speed. Before the formation could be completed, it was chasing after him aggressively.

The entire process only took two to three seconds. The Python's reaction speed and movement speed were far beyond Xia ruofei's expectations. He could not even use the array to protect himself.

He was in danger now!

Xia ruofei felt all the hair on his body stand up. He took out the Crimson fruit he had just picked from the space without hesitation and stuffed it into his mouth without thinking. He had heard from Puyol that the Crimson fruit could not only strengthen the body, but it could also greatly promote the recovery of injuries.

Xia ruofei was a cultivator and his body was many times stronger than that of Puyol. Although the giant Python's attack had injured him, he had not lost his ability to move.

In this extremely dangerous situation, Xia ruofei knew that if he could increase his strength and recover faster, it would be crucial for him to save his life.

Of course, he did not have time to hesitate. After stuffing the dark red fruit into his mouth, Xia ruofei turned around and fled into the forest without hesitation.

The giant python had subconsciously chased out in a fit of rage, but it hadn't expected to really leave the range of the array. It couldn't help but feel a little surprised that it had been trapped in this array for who knew how many years, and now that it had rushed out, it was really a little stunned.

However, after Xia ruofei took out the fruit and swallowed it, the Python's hostility was triggered again.

This was the spirit fruit that it had guarded for countless years, and it had actually been stolen and eaten by this detestable ant. How could it be tolerated?

A few years ago, there was an ant who was lucky enough to obtain a spiritual fruit from the damaged edge of the array. However, the ant today was even more hateful. He had actually barged into the array to steal it. How could the giant python allow Xia ruofei to leave so easily?

It immediately wriggled its long body and chased after Xia ruofei.

Although the Python was moving on its stomach, it was not slow at all. In fact, it was even faster than Xia ruofei.

Xia ruofei still needed to avoid the trees and other obstacles, but the giant python was like a heavy tank, crushing everything in its path. It slithered out a path in a straight line.

In the dark, Xia ruofei had no way to determine the direction. He subconsciously followed the route that was the easiest to escape.

Of course, he would also change directions from time to time. After all, the Python's body was huge, and it moved in a slithering manner, so its reaction was relatively slower.

But even so, the giant python was still getting closer and closer. After a while, Xia ruofei could even hear the hissing of the giant python, Yuuko, and the stench that made him a little dizzy ...

#### Chapter 2147 Return of the spear (1)

After Xia ruofei had consumed the dark red fruit, he felt that the true Qi in his body had become richer and his recovery speed had increased. However, it was still a drop in the bucket.

After all, he was different from elder Puyol. Elder Puyol was just an ordinary person at that time, so the effects of the dark red spiritual fruit were naturally much better. On the other hand, Xia ruofei was a cultivator at refined Qi Level 6, so the strength of his body was something that elder Puyol could not compare to.

The stronger one's body was, the faster one's recovery would not be. On the contrary, it would be more difficult. After all, the amount of energy required to recover to the state of Puyol and Xia ruofei was completely different.

Xia ruofei felt a deep threat of death.

This was the second time he had such a feeling in his 20 years of life.

The first time was when he was serving in the lone wolf assault team. Once, he was separated from his team when they were trying to break out of the siege. He was surrounded and almost ran out of ammunition and supplies. The enemy's numbers were more than his.

That time, he managed to escape from the enemy's pursuit despite being covered in wounds.

This time, the situation was countless times worse than that time.

Xia ruofei had almost activated all of his potential. His speed was even faster than his usual fastest speed.

The giant python was also at odds with Xia ruofei and was chasing after him.

As he was flying forward, Xia ruofei suddenly felt a sense of danger. He jumped up almost subconsciously, grabbed a branch in front of him, and swung forward.

Almost at the same time, the giant Python's tail swung over with a whistling sound.

Xia ruofei dodged the powerful attack by a hair's breadth.

The snake's tail broke a few trees and then hit a rock heavily, breaking the rock into pieces.

Xia ruofei saw this from the corner of his eyes and couldn't help but feel his heart jump.

The giant Python's furious attack was clearly much more powerful than the one in the formation.

If Xia ruofei did not have an almost instinctive sense of danger and subconsciously chose to jump to avoid it, this attack would have been enough to break his bones and kill him on the spot.

The giant python had stopped to launch this fatal attack, but its speed had been affected. The distance between Xia ruofei and the Python had increased.

However, Xia ruofei also knew that this was not the way to go. He would run out of energy sooner or later. As for the giant python, it seemed to have more energy than him.

Xia ruofei judged that this giant python was at least in the Golden core stage. Otherwise, it could not have such terrifying strength.

I can't keep running like this. I have to think of a way as soon as possible ...

As Xia ruofei fled, his brain was spinning rapidly to think of a solution.

At this moment, Xia ruofei suddenly saw a cliff in front of him. The cliff was not very high, only about ten meters. He could even see a bonfire at the bottom.

Xia ruofei suddenly realized that he had escaped to the survivor camp in a panic.

If the survivors with green faces were to encounter this giant python, it would definitely be a one – sided massacre. There was no chance of survival.

However, Xia ruofei could not change his direction anymore. The cliff was slightly protruding, and his escape route had been completely blocked by the Python.

In a split second, Xia ruofei could only shout in English, ""Puyol! Hurry up and escape with everyone! The Python had run out! Hurry up! Run into the sea!"

The survivors could only escape into the sea to save their lives. After all, there was only a small forest between the survivor camp and the sea, and after passing through the forest, they would reach the beach.

The night on the island was very quiet. Xia ruofei had used his true energy to shout, so the people in the camp heard him very quickly.

Pjoll's legs almost went soft when he heard that. His survival instinct made him jump out of bed at once, and he shouted for everyone to escape. He could not care about the three women anymore. He picked up his child and ran wildly in the direction of the beach.

While Xia ruofei was warning the survivors, he didn't dare to stop. If he slowed down even a little, the giant python would catch up.

He did not hesitate in front of the cliff and jumped down.

When they encountered this cliff, Xia ruofei's first thought was to warn the survivors. At the same time, he had a flash of inspiration and found a way to escape.

When he flipped over the cliff, Xia ruofei had already summoned the spirit painting scroll from his body and held it in his hand.

His body was falling rapidly under the influence of gravity. Although it was dark, Xia ruofei's eyesight still noticed a crack in the mountain wall.

He used one hand to grab the mountain wall to slow down the speed of his fall. At the same time, his right hand accurately stuffed the spirit map scroll into the gap.

Then, with a thought, Xia ruofei disappeared from the outside world and hid in the spirit map space.

The survivors below were all running for their lives, and no one noticed what was happening on the mountain wall above them. Even if someone looked over, they might not be able to see clearly what was happening on the mountain wall at night.

After Xia ruofei entered the medium, he placed his hands on his waist and panted heavily.

#### Chapter 2148 Backstabbing (2)

Just now, he had really used all his strength without holding back. Now that he had stopped, he felt as if his lungs were burning. The muscles of his entire body, especially his leg muscles, were sore and weak. Even his calves and stomach were trembling.

As he panted, he did not forget to use his spiritual power to check the outside world.

The giant python chased after Xia ruoxin as she leaped off the cliff and crashed into the simple wooden house in the survivor's camp.

The wooden houses fell apart without a doubt, but the thick – skinned giant python was not injured at all.

However, it immediately discovered that the aura of the ant who had run so fast had completely disappeared.

The giant python hissed, and its tail swept around the survivor camp like a huge whip, suddenly turning the camp into a mess.

However, Xia ruofei was hiding in the spirit map space. How could there be any aura outside?

As for the spirit painting, in the eyes of the giant python, it was no different from the mountain rocks. It was just a dead object.

If the scroll had suddenly appeared on the ground and Xia ruofei had disappeared at the same time, it might have been suspicious.

However, as Xia ruofei was falling from the cliff, he had stuffed the painting into the crack in the mountain wall and hid there. The giant python had not noticed him at all. Moreover, the painting was hidden very well in the crack. It did not expect Xia ruofei to be hiding there.

The giant python could not find Xia ruofei, but it did find the survivors who were running away from the forest.

In the eyes of the giant python, these survivors were the same kind as the ant just now.

After losing Xia ruofei, he naturally vented his anger on the survivors.

The giant python roared and its huge body suddenly leaped forward, chasing after the survivors.

The survivors who were running slower could already see the terrifying body of the giant python and could not help but scream in despair.

Xia ruofei could see everything clearly with his spiritual power but he could not help at all. He could only watch.

Because he knew that he would only be courting death if he went out.

Xia ruofei could not help the survivors.

In fact, he had really considered how to bring the survivors out of the island when he left.

When he landed on the island and discovered people, he had already changed his appearance very carefully. He did not have to worry that these people would reveal his identity after returning to society.

Of course, he naturally couldn't take out a yacht from the space to transport the survivors out. But with his strength as a cultivator, he could cut enough wood on this deserted island to make a strong raft and take them out of the range of the island. Then he would try to use GPS positioning and call for help with the maritime satellite phone. There was always a way to save these people.

When the rescue ships arrived, he only needed to sneak out of the sea and take out the yacht when no one was around. No one would know that he was the one who did it.

That was Xia ruofei's plan, but it was meaningless to say it now. He even saw the giant python swallow the last survivor. Among the survivors who were running in all directions, only a few could escape from the Python.

Xia ruofei sighed and retracted his spiritual perception. He could not bear to watch any longer.

At this moment, Xia ruofei's body trembled. He suddenly realized that this was an opportunity.

The giant python had gone to chase after the survivors, and he wouldn't be able to help even if he hid here. If he ran out now and quickly returned to the pool, wouldn't he be able to directly enter to pick the spirit fruits and find the world stone?

Most importantly, with the protection of the array, even if the Python came back, it could not enter.

Thinking of this, Xia ruofei no longer hesitated because he knew that the opportunity was fleeting. Now was not the time to be sad for the survivors.

He made a prompt decision and directly returned to the outside world with a thought.

Xia ruofei agilely grabbed a crack in the mountain wall and kept the painting in his body. He then climbed up the mountain like an agile monkey. Without stopping for a moment, he flew towards the direction of the pool.

Xia ruofei was racing against time, and so were the survivors.

Although they had no other way to escape on this Island surrounded by the sea other than jumping into the sea, their survival instincts still urged them to run wildly in the direction of the sea.

Even if he were to be drowned in the sea, it would be better than being swallowed alive by the giant python!

The giant python was extremely fast and swallowed seven or eight survivors in a short time. It didn't even chew and just swallowed them in one bite.

In the end, only a few people, including Puyol, escaped to the beach.

They all fled into the sea like crazy, and then swam out with all their might.

In the past few years, it was not that Puyol and the others had not thought of building their own rafts to leave. They had tried before, but simple rafts could not withstand the waves at sea at all. Moreover, they found that there were no ships passing by in the surrounding area, and there were no other islands nearby. Taking a raft to escape was no different from a fool's dream. The final result would definitely be to be buried in the stomachs of fish.

Now that there was a terrifying giant python behind them, Puyol and the others could not care about anything else. Even if they did not have a wooden raft, they would have to swim out first.

### Chapter 2149 Backstabbing (3)

The giant python stopped when it reached the beach. Perhaps it was because it had eaten its fill, or perhaps it was afraid of the sea, or for some other reason, it did not go into the sea to continue chasing. Instead, it looked at Puyol and the others who were swimming desperately, spat out its snake luck, and turned back.

Puyol and the others swam for a long time before they mustered the courage to turn around. They realized that the giant python had not caught up to them. Instead, it had turned around and gone back. They could still see the giant snake's tail flash in the forest before it disappeared.

Puyol and the others stayed in the sea for a long time. In the end, they were too cold to do anything. They would freeze to death if they continued like this, so they mustered up the courage to walk upstream. At least for the time being, there did not seem to be any danger on the beach.

After Puyol and the others returned to the island, they did not dare to continue returning to the camp. They all trembled on the beach and hugged each other for warmth.

Because here, once the Python appeared, they could still escape into the sea. If they returned to the camp, they might just be caught by the Python!

Xia ruofei did not know how long the giant python would be outside and whether it would return to the pool. He could only try his best to fight for every second.

He poured true Qi into his legs and ran through the forest.

A practitioner's memory was very good. Although it was only Puyol who took him on a trip, and it was night time, he could still accurately find the route during the day.

After a while, the pond appeared in Xia ruofei's sight again. The array had returned to normal.

Xia ruofei couldn't help but sigh. If the array had recovered a second earlier, the giant python wouldn't have escaped and the survivors wouldn't have suffered.

However, there were no ifs 'in this world. Now that the consequences had come to this, Xia ruofei did not have time to feel guilty. He quickly went to the formation and found the node of the formation with ease and injected his genuine Qi.

The protective barrier immediately melted. Xia ruofei flew into the formation without hesitation.

The first thing he did was to use his mental power to roll up the dozen or so spirit fruits on the tree and put them all into the space.

At this time, the array barrier had already begun to recover.

Xia ruofei looked at the tough formation and felt more at ease. At least they were safe here.

Of course, he didn't drag things out because of this. After all, if the giant python returned, even if it couldn't enter, he wouldn't be able to leave if it guarded outside the array.

It would be best if he could find the world stone before the Python returned and leave in the other direction as quickly as possible.

Xia ruofei asked the white fox.

The little fellow pointed out with absolute certainty that there was definitely a world stone within the pond.

Actually, Xia ruofei had a Jade Leaf on him as well. It was just that the range of the Jade Leaf's detection towards the world stone was smaller. However, the Jade Leaf did not have any reaction at all. He was standing right beside the pond! At such a close distance, if there really was a world stone, it was impossible for the Jade Leaf to not have any reaction.

Xia ruofei still had some doubts about the White realm Fox's words. However, the area of the formation was not large and everything could be seen at a glance. Other than the bottom of the pool, there was no other place where the realm stone could be hidden.

Xia ruofei thought for a while and decided to go into the water.

He put away his mobile phone and other electronic devices into the spirit map space. Then, with the dagger still in his hand, he jumped into the pool.

The water was bone – chilling and Xia ruofei could not help but shiver.

With Xia ruofei's body, he wouldn't feel cold even if he was bare – chested in the winter. However, the water in the pool could make him feel a bone – chilling cold. It was obvious how low the temperature was.

But the amazing thing was that with such a low temperature, the water should have been completely frozen. In fact, except for a small layer of floating ice on the surface of the water, the water was still in a liquid state.

Xia ruofei was sure that the temperature of the water was below zero.

However, he didn't have time to investigate this. After swimming like water, he immediately dived down.

He held the dagger in his mouth, held a waterproof flashlight in one hand, and paddled with all his might with the other hand. His legs quickly drew water, and his body quickly dived into the deep pool.

Not only was the pool extremely cold, but it was also so deep that one couldn't even see their own fingers after diving two or three meters down. There was only the pillar of light from the flashlight, but all they could see was the pool water.

The white fox in the space was extremely excited. It kept squeaking and gesturing, telling Xia ruofei that the realm stone was just below and asking him to speed up.

Xia ruofei didn't expect the pond to be so deep.

In a short while, he had already dived nearly a hundred meters.

Xia ruofei did not carry any breathing equipment or flippers. This depth was close to the world record for freediving.

Of course, as a cultivator, Xia ruofei's ability to withstand water pressure and the time he could hold his breath was much better than those freedivers. He could even use the great Dao Sutra to form internal breathing and stay underwater for a longer time.

Hence, even after diving so deep, Xia ruofei still felt at ease.

In fact, what was more unbearable to him was not the water pressure or the suffocation, but the temperature.

As the depth increased, the temperature of the pool became lower and lower. He didn't wear a professional diving suit to keep his body temperature, so his skin felt like it was being pricked by needles when it came into direct contact with the water. This was a reaction to extremely low temperatures.

Xia ruofei had to quickly circulate his genuine Qi to resist the low temperature of the water. Otherwise, even he might be frozen.

In this way, the consumption of true Qi would be greatly increased.

The most important thing was that he didn't know when he would reach the bottom of the pool. The pool looked like a pitch – Black bottomless pit.

And the giant python could return at any time.

Xia ruofei could not help but feel anxious.

However, since they had already come this far, Xia ruofei could not back down. He could only grit his teeth and continue to dive.

110 meters, 120 meters ...

As the depth increased, Xia ruofei felt that his hands and feet were starting to go numb. Even if he circulated his genuine Qi, the effect was not as obvious.

And the suffocating feeling was getting stronger and stronger.

Xia ruofei had to give himself some time to resurface. He decided to dive a little deeper. If he still had not reached the bottom, he would resurface to warm himself up first.

At this moment, Xia ruofei suddenly felt the leaf in front of his chest start to emit a warm feeling

Chapter 2150 A different world (1)

Xia ruofei, who was already thinking of backing out, was suddenly reinvigorated.

Sensing that the Jade Leaf had reacted, it meant that he was not far from the world stone. He adjusted his breathing according to the “great Dao Arts” technique and used his legs to draw water with all his might to continue diving.

Even though the strong light from the flashlight could only shine on the water and the bottom could not be seen, Xia ruofei was very motivated.

The water was getting colder and colder. Xia ruofei’s teeth started to clatter.

To be able to make a cultivator so cold, one could imagine the temperature of the water.

Under such circumstances, the consumption of genuine Qi was also shocking. Even though Xia ruofei’s “great Dao scroll” was a top – tier technique and his genuine Qi was much thicker than other cultivators of the same cultivation level, he could not withstand such consumption. Gradually, he felt that he was beyond his power.

Of course, at this point, he would not give up so easily.

Xia ruofei had already made up his mind. If he really couldn’t hold on any longer, he would enter the spirit map space. That way, not only would he be able to breathe, but he could also use the difference in the flow of time to meditate and recover his true Qi. He believed that within a short period of time, the spirit map wouldn’t be damaged in such an extremely cold environment. Similarly, it wouldn’t deviate too much from its original position.

However, Xia ruofei did not take out the spirit map scroll immediately. He still wanted to challenge his limits.

After diving for another 50 meters or so, the surrounding water pressure was already very shocking. If it was an ordinary person without professional training, their lungs would have been seriously injured.

Just as Xia ruofei was gritting his teeth and preparing to continue diving, the white fox in the space squeaked and gestured to Xia ruofei.

Xia ruofei had always maintained a telepathic connection with the spirit map space. Naturally, he was able to sense the signal sent by the white fox at the first moment.

“Swim to the left?” Xia ruofei said to himself.

The white fox signaled him to stop diving and swim to the left. Xia ruofei was slightly happy. Did this mean that he was already close to the world stone?

No matter what, swimming horizontally was at least better than diving. Xia ruofei judged that if he continued to dive, he would only be able to go down 50 meters at most. Whether it was the water

pressure or the low temperature underwater, it should be at the limit of what his body could withstand. By then, even if he hid in the medium to recover his true energy, it would be difficult for him to go any deeper.

If he swam horizontally, he could still hold on for a long time by relying on internal breathing. Even if he couldn't hold on, he could continue to swim underwater as long as he took a breath in the space.

He had thought that he would need to dive to the bottom of the pond to find the world stone. However, Xia ruofei's heart was beating like a drum as he had no idea when he would be able to see the bottom of the pond. Now, he could finally heave a sigh of relief.

Xia ruofei immediately turned his body and swam to the left. At the same time, he shone the flashlight in his hand forward, trying to see the situation ahead as much as possible.

The bottom of the pool was much bigger than Xia ruofei had imagined. He swam to the left for at least 20 to 30 meters, but he still could not see the wall of the pool.

It was obviously in the shape of an upside – down funnel, because from the shore, the pool was not so large at all. On the contrary, it grew larger and larger as it went deeper.

Xia ruofei could feel that the sensory Jade Leaf on his chest was getting hotter and hotter. This made him feel more at ease because this meant that he was getting closer and closer to the world stone.

The white fox in the space became more and more excited.

Xia ruofei continued to swim forward for more than 20 meters. Finally, under the strong light of the flashlight, he saw the strange rock wall of the pool. About two meters in front of him, there was a dark cave.

“Squeak! Squeak! Squeak!” The White realmfox jumped and cried, gesturing with its forelimbs.

“You want me to enter that cave?” Xia ruofei asked.

The white fox immediately nodded its head like a chicken pecking at rice. If a little girl saw it, she would definitely be overjoyed.

Xia ruofei didn't hesitate. He quickly drew the water with his legs and dived deeper, swimming towards the hole.

Under the strong light of the flashlight, Xia ruofei gradually saw the appearance of the hole.

It was about one meter in diameter and looked like a very regular circle. The edge was also very smooth, which was completely different from the pool wall he had just seen.

There was no doubt that this hole was man – made.

What kind of person could dig such a regular stone cave at a depth of nearly 200 meters? Xia ruofei couldn't help but be amazed.

He didn't dare to be neglectful at all. His mental power had long spread out, and the little remaining true Qi was also stirred up, ready to deal with unknown dangers at any time.

It was dark inside the hole, and he couldn't see what was going on inside. It was also difficult to extend his spiritual power in. This was similar to the situation he had encountered in the strange white fog before he had come to this Island.

Xia ruofei switched to holding the bright flashlight in his mouth and holding the dagger in his right hand. He paddled back with both hands and swung his legs. His body glided lightly in the water and entered the narrow stone cave.

He felt as if he had passed through an invisible membrane. The inside of the cave was dry, without even a drop of water.

Xia ruofei was still in the diving position. He was not prepared for it and fell to the ground.
