

God tier Farm 2161

Chapter 2161 Escape from the snake's belly (2)

Xia ruofei gritted his teeth and twisted his body in the water. He dodged the attack by a hair's breadth and did not become the Python's food.

However, the purpleblood spirit Python had already caught up to him, so it was impossible for him to escape.

The purple – blooded spiritual Python was more agile in the water. After missing Xia ruofei in one bite, it swung its huge body towards Xia ruofei without any pause.

If he were to be entangled by the purple – blooded spiritual Python, Xia ruofei would have no choice but to hide in the spirit map space.

He relied on his agility to slip through the gaps between the Python's bodies and then desperately floated up.

Xia ruofei had already realized that if he continued to dive, he would definitely die. In this situation, he might have a chance of survival if he ran up.

The pool was in the shape of an upside – down funnel, and the deeper it went, the wider it became. When it reached the surface of the water, its diameter was only a few meters, and the purple – blooded spiritual Python had to coil its body to accommodate it.

Hence, the closer they got to the surface of the water, the harder it was for the purpleblood spirit Python to display its massive body. Xia ruofei could then take advantage of its small size.

Xia ruofei stomped his feet and floated to the surface.

The purple – blooded spiritual Python had also turned its body around nimbly. The place where it had just been was about a hundred meters deep. The space was already very wide, and the purple – blooded spiritual Python could easily complete its turn.

The speed of the purple – blooded spiritual Python was extremely fast. In just a short while, it had caught up to Xia ruofei.

What was worse was that the suction force from its mouth was very strong, which could greatly slow down Xia ruofei's speed.

Xia ruofei had only floated up for about 20 meters when he felt the water below surge. He subconsciously dodged to the side and saw the huge Python head suddenly swing up. Xia ruofei could even see the White and ferocious snake fangs.

He gritted his teeth and twisted his body nimbly. Then, he stomped hard on the purpleblood spirit Python's body, increasing his speed. The purpleblood spirit Python's attack missed, and Xia ruofei's stomp caused its speed to slow down. The distance between the two of them increased by a few meters.

Just like that, Xia ruofei dodged the attacks of the purple – blooded spiritual Python again and again with the advantage of his small and agile body. It was like walking on a tightrope each time, and he would die in the snake's stomach if he was not careful.

Of course, Xia ruofei had already summoned the spirit map scroll and held it tightly in his hand. If there was no way to hide, he would not hesitate to hide in the spirit map space.

In fact, Xia ruofei was soon in a desperate situation.

When he was about thirty meters above the water, although the purpleblood spirit Python's huge body could not fully display its power, Xia ruofei had little room to move around.

The purple – blooded spiritual Python quickly changed its strategy. It no longer tried to use its body to wrap around Xia ruofei. Instead, it stretched its long body. This way, the resistance in the water was much smaller, and it floated up faster.

More importantly, after the long body was stretched, it was no longer restricted by the narrow space.

The purple blood spirit Python used one method of attack, which was to open its mouth and suck at Xia ruofei.

Finally, Xia ruofei felt that he could no longer float. He and the water around him were falling towards the mouth of the purple – Blood spirit Python, which was one or two meters below him. He could not resist the suction.

He could almost see the light from the water, but Xia ruofei had no other choice.

He made up his mind and with a thought, he disappeared into the pool and hid in the spirit map space.

Almost at the same time, the painting was sucked into the purple blood spirit Python's stomach along with the large amount of water in the pool.

Xia ruofei stood at the entrance of the mountain sea realm's cave, and his expression turned extremely ugly.

He immediately sent out his thoughts and observed that the environment of the spirit map scroll was extremely dark. There was no doubt that he was inside the Python's belly.

Xia ruofei's mind power could even sense some limbs. He knew that the purple blood spirit Python must have eaten many survivors and had not digested them yet.

Although he was very confident in the painting, Xia ruofei was still a little worried. He did not know if the purple – Blood spirit Python's stomach acid would corrode the painting.

Even if the stomach acid had no effect on the spirit map, hiding in the snake's stomach was not a solution!

At this moment, Xia ruofei suddenly had an idea!

He suddenly realized that this might be a good opportunity. 'Isn't the purpleblood spirit Python's skin so tough that even the military dagger can't pierce through its scales?' He didn't believe that the inside of its body could be as hard as its scales!

Xia ruofei also recalled that he had collected a flying sword in the green touring immortal abode. This flying sword was used by Bi Youzi even after he entered the nascent Soul Stage. Its sharpness was not something his original dagger could compare to.

Xia ruofei even felt that if he had taken out the blue immortal sword, he might not have had to run away in such a sorry state. Even the spirit map scroll would have been swallowed into the Python's stomach.

However, this was also good. At least it would be easier to attack from the inside.

Xia ruofei couldn't help but think of the scene in Journey to the West where Sun Wukong entered Princess Iron Fan's stomach. He suddenly felt that that scene was very similar to his current situation!

Xia ruofei did not hesitate. He summoned the blue travel immortal sword from his dantian.

The flying sword, which was emitting a sharp aura, was quietly floating in front of Xia ruofei.

He muttered to himself, "evil creature!" You chased me to such a sorry state and even ate those poor survivors. It's time for you to pay the price!"

With that, Xia ruofei willed the flying sword to disappear from the spirit map. The next moment, it reappeared in the purple – blooded spiritual Python's stomach.

Xia ruofei didn't need to leave the spirit map space at all. He could control the flying sword easily with his mind.

Even if he didn't practice "blue sword technique" and couldn't use some powerful moves, the result of this battle was already determined by the sharpness of the flying sword and the unique position advantage.

Xia ruofei's mind moved and the blue travel immortal sword immediately cut down on the thick meat wall in the purple – bloodied spirit Python's stomach.

When the purple – blooded spiritual Python was swallowing, Xia ruofei had disappeared into thin air. Naturally, he felt very strange. He felt that he had swallowed something, but it did not seem to be a person. At least, it felt completely different from when he had swallowed the survivors outside.

It looked around the pool but did not find Xia ruofei. It then floated to the surface with a trace of doubt.

It had just floated up about seven or eight meters when it suddenly felt a sharp pain in its stomach. It couldn't help but let out a terrible scream, and its body twisted violently.

The water in the pond splashed up like a boiling pot. The purple blood spirit Python writhed and writhed in a frenzy. Even a piece of iron would have been turned into a flat metal sheet if it were to be hit by such an intense pain. However, the stones by the pond were not damaged in the slightest. Instead, the flowers and plants on the shore were all scattered around. It was a mess.

Xia ruofei gritted his teeth as he controlled the blue travel immortal sword to stab and cut at the purple – blooded spirit Python's stomach. There was even one time where the sword had pierced through the Python's body, the tip of the sword coming out from the Python's tough scales.

In an instant, a large amount of blood gushed out of the pool.

The amazing thing was that the blood was all purple. No wonder it was called the purpleblood spirit Python.

After a while, the water in the pond seemed to have been dyed a deep purple.

The purpleblood spirit Python's struggle became even more frenzied, and its hissing continued.

However, no matter how powerful it was, it couldn't do anything about the attack from the inside of its body. It couldn't even Dodge. Moreover, its fragile flesh wall was like tofu under the attack of the flying sword. Everything was a big hole.

This was really a trap.

However, the life force of a purple – blooded spiritual Python was very strong. Xia ruofei had been attacking it for five to six minutes, but its body was already riddled with holes. It was still wriggling around.

In the end, the purpleblood spirit Python's struggles gradually weakened. It then floated motionlessly in the pool, leaving behind a scene of wolves ...

Chapter 2162 Jindan (1)

After a long time, everything calmed down. Even the water that had been stirred by the giant python had returned to its calm state.

Xia ruofei did not dare to let his guard down. He continued to control the blue immortal sword and slashed at the giant python a few times. The purple – blooded spirit Python did not move at all. It seemed to be completely dead. One of the slashes had almost cut off the snake's head. If the giant python was pretending to be dead, then its acting was really good.

With a thought, Xia ruofei appeared in the outside world.

Without touching the water, he tapped lightly on the corpse of the purpleblood spirit Python and flipped over to the shore of the pool. At the same time, he waved his hand, and the blue immortal sword and the spirit map scroll floated in front of him.

At first, Xia ruofei wanted to take a bucket of clean water from the spirit map space to wash them away. The pool outside had been dyed purple by the snake's blood, so it was useless.

However, with a glance, he found that the immortal sword and the spirit map were not stained by a trace of filth, not even a drop of water. So he directly put them into his body with a thought.

Xia ruofei sat down on the grass beside the pond and looked at the motionless corpse of the purpleblood spirit Python. He felt as if he had just survived a disaster.

He used his mind to communicate with Xia Qing, who was in the space, "Xia Qing, I've killed a purpleblood spirit Python. Is its corpse of any value?"

"Master, what's the cultivation level of this purple – blooded spiritual Python?" asked Xia Qing.

"At least the Golden core stage, I guess!" Xia ruofei replied casually.

Xia Qing couldn't help but exclaim, "golden core stage! Master, a golden core purple – blooded spiritual Python is very powerful. You were actually able to kill it!"

Xia Qing was aware of Xia ruofei's cultivation. Even if Xia ruofei's cultivation technique was more powerful and he could challenge those of a higher level, this was still too many levels ...

"I'm lucky!" Xia ruofei laughed.

"Master, the corpse of the purpleblood spirit Python is still very valuable," said Xia Qing quickly. "The most precious thing is its golden core! This was the energy essence that it had cultivated for many years. Also, the gallbladder of a golden core purple blood spirit Python also had high medicinal value. In addition, the snakeskin is very strong, it can ..."

Xia Qing suddenly stopped. As Xia ruofei had already kept the entire corpse of the purple – blooded spiritual Python into the medium, Xia Qing saw that the purple – blooded spiritual Python was riddled with holes. She knew that there was no need to say anything more about the use of the skin.

Xia ruofei was a little embarrassed. "This beast is very lethal. I was afraid that it wasn't completely dead, so I stabbed it a few more times. This snake skin is probably useless now ..."

"With this degree of damage, if it was stabbed at a vital part, it would have been killed with one strike ..." Xia Qing said with a bitter smile.

At that time, Xia ruofei could not care about his vitals. In any case, he just had to fight to the death. It was just a piece of snakeskin that was destroyed, so he had nothing to feel bad about.

"Xia Qing, I'll take its golden core and gallbladder first!" Xia ruofei said with a smile.

With that, Xia ruofei summoned the blue immortal sword from his body and cut open the purple – blooded spiritual Python's stomach.

After the death of the purple – blooded spiritual Python, the defensive power of its outer skin seemed to have dropped a lot. In addition, the blue immortal sword was extremely sharp, so Xia ruofei did not have to spend much effort to cut it open.

He quickly found a fresh snake gall in the snake's stomach. This snake gall was at least ten to twenty times bigger than the ones Xia ruofei had seen on the internet.

Then, with Xia Qing's help, he found a golden core.

The Golden core of the purple – blooded spiritual Python was as big as a volleyball. Xia ruofei could sense that it was formed by pure energy. He felt his heart palpitate when he held it in his hand as if it would explode if he was not careful.

Xia ruofei didn't really care about the snake galls. He asked, "Xia Qing, what use does this golden core have for me?"

"Master, you're cultivating the" great Dao Arts. "This golden core can be directly refined and absorbed!" Xia Qing said with a smile, "the biggest feature of the 'great Dao Arts' is that it is close to the origin. The closer it is to the origin, the more inclusive it is. Therefore, even if master is in a harsh environment outside, his cultivation speed will still be much faster than ordinary cultivators ..."

Xia ruofei nodded his head slightly. He had already realized that regardless of whether it was the “scorching sun Scripture” that he had passed on to his disciple Tang Haoran or the “absolute beginning Heart Sutra” that he had passed on to Song Wei and Ling Qingxue, they were all superior cultivation techniques. However, the cultivation speed of these two cultivation techniques was still far inferior to the “great Dao Arts”.

Even in the combined state, the cultivation speed of the “absolute beginning Heart Sutra” would be hard to catch up with the “great Dao Sutra”.

Xia Qing continued, “this golden core is the essence of energy that the purpleblood spirit Python has accumulated over countless years. If it were a cultivator who had cultivated other cultivation techniques, they might not be able to absorb the energy directly because the energy was too large and pure, or because the attributes were not compatible. However, master has cultivated the “great Dao technique”, so there is no such problem at all. You can just treat it as a spirit crystal or origin crystal. Moreover, the cultivation efficiency will far exceed that of origin crystals!”

“Understood!” Xia ruofei nodded.

He wrapped this golden core with an invisible spatial force and sent it into the small cave. For the time being, he didn’t intend to absorb the Golden core to cultivate. After all, he was still thinking about the survivors of the shipwreck outside and didn’t know if anyone could survive.

Xia Qing smiled and said, “master, this snake gallbladder ... I suggest you use it to brew wine. There are many good wines at the Archean realm. If you use this snake gallbladder together with some medicinal herbs, you can brew a very good medicinal wine!”

Chapter 2163 Jindan (2)

Xia ruofei laughed and said, “sure!” Then I’ll leave this matter to you. Do we have the medicinal herbs you need in our space? If you want to buy it, you’ll have to wait for a while. ”

“These are all commonly used medicinal herbs. The ones planted in the spirit map world are enough!” Xia Qing said with a smile.

“Then I’ll leave it to you to handle!” Xia ruofei said, “and this snake skin, snake meat, if you think it’s useful, you can deal with it. I’ll find time to throw out the rest!”

“Yes, master!” Xia Qing said respectfully.

Xia ruofei checked on the white fox’s condition and realized that it seemed to be in a deep sleep. What was even more amazing was that a Milky – White aura had started to appear around its body. The aura was getting thicker and thicker, almost enveloping it completely. From a distance, it looked like a white cocoon.

Xia ruofei guessed that the White realmfox had reached a critical point and might be on the verge of a breakthrough or evolution. He could easily detect the White realmfox’s condition. Although it was motionless, it was full of vitality. Hence, he was not too worried.

After greeting Xia Qing, Xia ruofei returned to the outside world in a flash.

After all this, the sky was already starting to brighten.

Xia ruofei walked to the boundary of the array and skillfully inserted his vital energy to open the boundary. Then, he flashed out of the array.

Soon, the barrier returned to normal. Xia ruofei checked it and picked up the backpack that he had left in the bushes last night. He then left the pool.

When they left the Azure immortal abode, the stone door had been completely closed by Xia ruofei. Other than the wooden token that he had with him, which he could still enter, even if other cultivators happened to come to the immortal Island and even broke the array boundary beside the pool, they would basically not be able to discover that there was an immortal abode so deep underground.

Xia ruofei was carrying a huge backpack as he sped through the forest.

Along the way, he could see that many trees had fallen, which showed how destructive the purple blood spirit Python had been last night.

However, this was also convenient for Xia ruofei. He did not need to identify the direction. He just had to follow the destroyed area and soon, he arrived at the cliff.

Last night, he had hidden in the spirit map space the moment he jumped off the cliff. That was how he had escaped the purpleblood spirit Python's pursuit. However, the survivors' camp at the bottom of the cliff had suffered.

Xia ruofei stood on the cliff and could clearly see that the campsite had become a raggle. All the houses had collapsed and there were blood splatters everywhere.

He couldn't help but sigh. Although he didn't kill these survivors, it was undeniable that if he hadn't broken into this immortal Island, those survivors might not have been able to leave for their entire lives, but they basically wouldn't have encountered such a disaster.

Xia ruofei did not look for a way out. Instead, he jumped down from the cliff. As he was falling, he tapped on the protruding parts of the cliff and landed on the ground lightly.

He used his spiritual power to scan the area, and his heart sank. There was no sign of life in the surroundings.

Could it be that the survivors were all wiped out?

It was highly possible. After all, the strongest person among the survivors was Puyol. However, even Puyol could not resist Xia ruofei. When faced with the purple – blooded spiritual Python, Puyol was no different from the other survivors.

The only difference was that he was a little faster at escaping.

However, this was an Island, where could he escape to?

As long as the purple blood spirit Python was willing, even if Puyol escaped into the sea, he would still be unable to escape death. In the sea, their speed was not as fast as the purple blood spirit Python.

Xia ruofei still had a glimmer of hope. He followed the direction of the destruction caused by the purpleblood spirit Python and searched.

After passing through the forest, the beach was in front.

It seemed like Puyol and the rest had fled towards the sea as soon as they could last night.

Xia ruofei quickly walked out of the forest and saw Puyol and the rest shivering on the beach.

Including Puyol and the child in his arms, there were only four or five people who survived. Other than the child, the rest were men with stronger bodies.

"Puyol!" Xia ruofei shouted.

Puyol raised his head suddenly. When he saw Xia ruofei, his eyes were filled with disbelief. After a while, he shouted with his eyes wide open, "Daoist immortal! You ... You're still alive ..."

Xia ruofei walked in front of them with a serious expression and said in a low voice, "I'm really sorry about last night ... I didn't expect that Python to escape ..."

Puyol revealed a sorrowful expression and said, "Dead ... So many people are dead...Even John's mom, Linda, is dead...I saw that Boa breaking Linda's body with one bite and swallowing it ..."

Puyol's words made the remaining 3 survivors recall the hellish scene from last night, and their eyes revealed an expression of extreme fear.

Xia ruofei sighed and said, "it's okay ... It's all in the past!" I've already killed that Python!"

"What? Is this for real?" Puyol cried out in surprise.

"Of course!" Xia ruofei said, "you don't have to doubt that. From now on, you don't have to worry about your safety on the island."

"Thank you ... Thank you!" Puyol said. Then, the expression on his face turned a little gloomy as he said, "but it's hard for us to survive ..."

They had been able to live on the island for so many years because of the formation of a small society. Everyone had their own duties and division of labor. Everyone worked hard to survive under Puyol's leadership. Now that so many people had died, there were only four or five survivors left, and there was a child who was crying for food. Survival had become a big problem.

"Don't worry, I'll find a way to get you guys out!" Xia ruofei said.

The eyes of Puyol and the other three survivors lit up. All these years, they had been dreaming of leaving this deserted island and returning to human society. However, Xia ruofei's nonchalant words made them feel that it was not real.

Perhaps the surprise came too suddenly.

"Really? Can I really go back?" One of the survivors muttered.

"Of course!" Xia ruofei said, "I brought internet and GPS devices with me. However, for some reason, the signal is blocked on this Island. We just need to build a strong enough wooden raft and get as far away from this Island as possible. When we get a signal, we can ask for help!"

With an accurate location and the ability to connect to the internet to call for help, the probability of being rescued was still very high.

The survivors, including Puyol, were all in tears.

"I thought I would never see my mother again ..." One of the survivors murmured, "and my dear Jessica, she must have thought I had lost my life at sea ..."

"Wuwuwu ... I can finally go back ..."

"Little John, daddy will be able to bring you home soon ..." Puyol was also very excited.

Xia ruofei looked at them and said, "Alright, alright, let's wait until we're really rescued before we get excited! The most important thing now is to build a big and strong enough raft. Otherwise, if you fall apart in the wind and waves before being rescued, none of you will be able to go home!"

"Yes, yes, yes!" "Lord Divine immortal, let's go and cut down the trees now!"

"Wait!" Xia ruofei called out. He looked at the child in Puyol's arms and said, "Puyol, your child doesn't seem right ..."

The child's face was red and his body was trembling. Xia ruofei reached out and touched his forehead but immediately retracted his hand. "The child is running a high fever! Let's quickly bring down his fever! Let's not worry about the raft for now!"

Chapter 2164 The gospel of the survivors (1)

In fact, after Puyol's child, John, was soaked in the sea last night and was blown by the cold wind on the beach, he had already started to have a fever before dawn. Puyol had been a little confused when he heard that there was hope for him to return to human society.

Now that Xia ruofei had reminded him, he immediately came to his senses and quickly said, "Lord Divine immortal, please save John!"

Xia ruofei frowned and said, "let's leave this place first!" The wind on the beach is too strong, let's find a place to hide from the wind and set up camp first!"

"Yes, yes, yes!" Puyol hurriedly said, "Lord Divine immortal, please follow me!"

After being stranded on the deserted island for so many years, Puyol was already very familiar with the terrain near the camp. Now that the survivor's camp was in a bad state and there was blood and flesh everywhere, he would naturally not return to that sad place.

Hence, Puyol brought Xia ruofei along the beach for a few minutes and arrived behind a huge rock.

There were also a few smaller reefs here, which formed a gap with the large reef in front. It was a bit similar to the structure of a cave, which could block the wind and rain.

After Xia ruofei entered the cave, he found a dry and comfortable place and took down the single – person tent that was tied to the top of his backpack. He set up the tent skillfully and took out a down – feathered sleeping bag from his backpack. He unzipped it and laid it out in the tent.

“Let your child go!” Xia ruofei said, “I should have some fever medicine in my bag. Let me look for it first!”

“Yes, yes, yes! Thank you, Daoist immortal!” Puyol said with tears of gratitude.

Xia ruofei rummaged through his bag and quickly took out a bottle of child – use fever medicine, Meilin, and a bottle of mineral water.

This was naturally taken out from the space. Before he went out to sea, he had purchased a large amount of food, drinking water, medicine, and so on, which were all stored in the space. This bottle of Meilin was also casually bought when he was shopping, and he did not expect it to come in handy here.

The child’s forehead was so hot that he didn’t need to take his temperature to know that he had a high fever. It was definitely right to take the fever medicine directly.

Of course, Xia ruofei could also use a small amount of the spirit Heart Flower petal solution to help Little John recover. However, Xia ruofei was more and more inclined to use conventional medical methods to solve the problem. In John’s case, he could completely lower his fever first. If he had a fever again, he could take some anti – inflammatory medicine and the problem would be solved quickly.

After all, the petals of the spirit Heart Flower were also a precious resource, so he should use them as little as possible.

On this deserted island, fever medicine and antibiotics were extremely precious because they had no ability to produce them. When they first landed on the deserted island, even if they had a small amount of medicine, it would have been used up after so many years.

It could be said that in a place like this, once one fell sick, even if it was a common illness in the outside world, it could be life – threatening. In the past few years, several survivors had lost their lives due to diseases such as pneumonia.

When Puyol saw the special fever medicine, he quickly took it with thanks.

Xia ruofei asked for John’s age and weight. Then, he read the Chinese manual and told Puyol the best dosage. He would leave the rest to him.

Xia ruofei asked Puyol to take care of John first, while the remaining survivors were arranged to return to their previous camp and pack up the tools that could still be used.

The next step was to build a wooden raft, so he would definitely need these tools.

Xia ruofei went to the dense forest and began to cut down some trees for packing. If Puyol and the others were to use their simple tools, who knew when they would be able to get the required wood.

No one had come to this green Immortal Island for many years. Although the core of the island was the green immortal mansion and the trees on the island were ordinary trees, there were many thick trees, some of which were huge enough for several people to wrap their arms around.

Of course, Xia ruofei did not need such large wood. He chose those with a diameter of 40 to 50 centimeters. Even with such wood, it would take a lot of effort for Puyol and the rest to transport it to the beach and assemble it into a raft.

Of course, Xia ruofei was not prepared to let them transport the wood.

Xia ruofei cut the tree with ease. After choosing the wood, he took out the blue travel immortal sword and drew a circle around the bottom of the tree. The tree fell with a loud crash. The cut was extremely smooth.

The trees that Xia ruofei had chosen were roughly the same in thickness so that it would be easier to build the raft.

In a short while, he had already cut down twenty to thirty big trees with ease.

Xia ruofei felt that there should be enough wood, so he kept the wood into the spirit map space.

Then, Xia ruofei went into the forest and used the blue travel immortal sword to cut off many tough and thick old vines. He kept them in his space as well.

After preparing the materials for the raft, Xia ruofei strolled out of the forest. He didn't need to use his hands during the whole process. He used his spiritual energy to control the celestial sword to cut wood and vines, and then kept them in the medium.

He wondered what bi youzi would think if he saw Xia ruofei using his blue travel immortal sword to cut wood.

Xia ruofei kept all the wood and vines in the Archean realm. He wanted to make use of the time flow in the Archean realm to make these materials as dry as possible.

In this case, after the raft was tied up and pushed into the sea, the wood and rattan would expand and tighten when it came into contact with water, making the raft extremely secure.

Chapter 2165 The gospel of the survivors (2)

After the raft was built, it was for Puyol and the others to use, so it naturally had to be as strong as possible.

Even if they were in danger at sea, Xia ruofei was confident that he could save them, but it was still troublesome, right?

Of course, if he were to encounter a Super Storm like the other day, even Xia ruofei would have no choice but to hide in the spirit map space.

If such an extreme situation really happened, Xia ruofei had no choice but to put Puyol and the rest into the medium.

In this way, to ensure that the secret of the spirit map space would not be leaked, Xia ruofei would not kill them, but he would definitely not let them leave the space. Unless his cultivation reached a certain level in the future and he learned some immortal techniques, he would not let these people leak this secret.

Xia ruofei would not consider such probability.

In fact, even if he told Puyol and the others about the risk of never being able to return to human society, they would choose to leave without hesitation. After all, the result would be the same if they stayed.

Rather than living here in pain, it was better to take a gamble.

When Xia ruofei returned to the cave, the other survivors had already returned from the campsite. They brought some tools such as saws and chopping knives. There were no smelting conditions on the island, so these were tools used on the lifeboats back then. They were already rusty. One could imagine the efficiency of working with these tools.

Perhaps it was because he had not taken any medicine since he was born, but John's effect on Merlin was very good. He began to sweat after drinking it, and his fever went down.

Puyol shed tears of gratitude and kept thanking Xia ruofei.

However, Xia ruofei knew that the fever medicine could only treat the symptoms but not the root cause. It was useless to just lower the fever. If the inflammation was not eliminated, the fever would return after the medicine wore off.

Hence, he took out another box of lanqin oral solution from his "backpack" and asked Puyol to feed it to John according to the child's dosage. Yingying was still so young. Xia ruofei felt that he should not use antibiotics if he could. It would not be too late to use it when the inflammation could not go down. Anyway, he had plenty of antibiotics such as cephaloid in his space.

"Alright, let's rest for a day or two, then we'll start building the raft!" Xia ruofei said, "I hope John can get better soon. Otherwise, he can't go out to sea in this condition ..."

Puyol was afraid that Xia ruofei would leave his precious son behind, so he quickly said, "Great divine immortal, John's body is very good. He hasn't been sick since he was born! I'll definitely get better soon!"

Xia ruofei nodded and took out a few bowls of noodles from his backpack. "Don't go out to look for food these two days. My food storage is quite sufficient. You can rest here today! I'm going to walk around the island."

Of course, he didn't want to eat instant noodles with Puyol and the others. There was a lot of good food and wine in the origin space, but he couldn't take them out in front of Puyol and the others. Otherwise, his backpack would become Ding-dong's pocket. If he wanted to enjoy the food, he could only avoid them.

"Lord Divine immortal, let's keep this food for now!" Puyol quickly said. Once we go out to sea, who knows how long we'll drift! I need to prepare more food ..."

Xia ruofei said indifferently, "I still have a large amount of compressed biscuits in my bag. It's enough for a month's consumption for the few of us. These instant noodles are not easy to carry around. Let's just use them on the island!"

"Yes, yes, yes!" Puyol and the others quickly responded, and one of the survivors couldn't help but swallow his saliva.

The food from the civilized world, even if it was just ordinary instant noodles, was a rare delicacy in their eyes.

Xia ruofei looked around the cave. Other than the rusty tools, the survivors had also found some worn – out quilts to keep warm from the collapsed houses.

Xia ruofei thought for a while and threw a lighter to Puyol.””I won’t be coming back tonight. Pick up more firewood during the day and light a bonfire at night to keep warm and to keep out wild beasts.”

“Alright, Daoist immortal!” Puyol replied respectfully.

Xia ruofei thought that after the effects of the medicine wore off, John might have a fever again. Hence, he explained in detail to Puyol about the precautions for taking fever medicine and the eastern medicine, lanqin oral solution, before leaving the cave.

As soon as Xia ruofei left, the survivors immediately pounced on the instant noodles, bread, and other food.

Puyol’s prestige was still very high. He snorted softly, and the survivors quickly stopped. In the end, Puyol arranged for a survivor to go to the nearest water source to get water, while the others went to pick up dry wood to boil water and enjoy the “delicious food”.

Puyol and the rest were enjoying the food. So was Xia ruofei.

He decided to return to the array barrier by the pool because it was absolutely safe inside. He could enter the spirit map space without any worries.

The water in the pool had become clear again. If it weren’t for the weeds and shrubs that were swaying around the pool, there would be no trace of the battle in the morning.

Xia ruofei first looked at the tree above the pool. It was the fruit that had grown on this tree that had greatly increased Puyol’s strength.

Xia ruofei also ate a dark red fruit at the critical moment. However, for a cultivator of his level, the fruit’s effect was not that obvious.

Chapter 2166 The gospel of the survivors (3)

It was obvious that this fruit was very useful for strengthening the body of ordinary people and could even improve one’s cultivation aptitude.

This was because he had just plucked a dark purple fruit and tested it. He discovered that this fruit could nourish the soul.

Although the effect wasn’t obvious to him, if an ordinary person ate it, it would definitely improve their soul greatly, and even improve their cultivation aptitude.

Naturally, Xia ruofei would not let go of such a good thing. He plucked all the fruits from the tree and kept them in the cave in the spirit map space.

After Xia ruofei finished picking the fruit, he went back into the pond. He realized that the tree had grown out from the wall of the pond and its roots were holding onto the wall tightly.

The purple – blooded spiritual Python struggled madly before its death, but it could not destroy the pool. Naturally, Xia ruofei would find it difficult to pull the tree out of the pool.

That was why Xia ruofei gave up on the idea of moving the tree into the spirit map space.

Of course, this was only temporary. When he completely refined the mansion – guarding wooden tablet and returned here, this tree would definitely be taken away by him.

Xia ruofei climbed out of the pool and used his Qi to dry his wet clothes.

Then, he summoned the spirit map scroll and casually stuffed it in a Bush beside the pool. He left a wisp of psyche to be on alert and entered the spirit map space with a thought.

Xia Qing had already taken care of the purple blood spirit Python's corpse. The snake gall, along with a few other medicinal herbs, including wild ginseng, had been soaked in a 150 – kilogram wine jar.

The snake skin was also removed, and the large amount of snake meat was not wasted either. Xia Qing removed the snake meat and put several large plastic sorting boxes into plastic sorting boxes. Xia ruofei bought a large number of large sorting boxes online. He opened the lids one by one and stacked them together. They didn't take up much space, and it was quite convenient to store things in the space.

Hence, Xia ruofei simply took out a big pot and cooked a big pot of spirit snake soup in the medium. He also heated up the braised cooked food he bought before he went out to sea. He opened a bottle of the best Drunken Eight Immortals and began to eat and drink leisurely in the medium.

Xia ruofei stayed in the origin space and did not go out for the whole day. At night, he slept on the azmu yacht in the sea of the origin space.

The next morning, Xia ruofei, who had slept in the spirit map space that was rich in spiritual Qi, returned to the pool feeling refreshed and kept the spirit map scroll.

Then, he passed through the barrier and returned to the beach with ease.

On the beach about one to two hundred meters away from the cave where Puyol and the rest were staying, Xia ruofei used his spiritual power to check and found that Puyol was taking care of John while the other survivors were busy preparing breakfast in the cave. No one came out to look in their direction.

Hence, with a thought, he took out all the wood and vines that had been left to dry in the Archean realm for about a month and placed them on the dry sand.

Then, Xia ruofei walked to the entrance of the cave and said, "Pjoll, you guys hurry up and eat breakfast. Then, the one with the weakest physical strength will stay behind to take care of Little John. The rest of you will follow me to build the raft!"

"Yes! Daoist immortal!" Puyol said excitedly, then ordered without hesitation, "David! You stay and help me take care of the child! He's not running a fever anymore last night, so he doesn't need to take the fever medicine anymore. Later, feed him some bread paste, and then feed him the medicine half an hour after dinner. It's that oral solution, one – third of a bottle is enough, got it?"

Chapter 2167 Leaving_1

David, who was obviously the weakest, quickly said, ""I'll remember! Boss Puyol, don't worry! I'll take good care of John Junior ..."

Xia ruofei stood at the entrance of the cave and said with a smile, ""Our workplace is on the beach not far ahead. If there's anything, just shout and we'll hear it. Don't worry about Puyol!"

Puyol rubbed his hands and laughed drily, ""Yes! Daoist immortal! Then let's go!"

The other survivors quickly took all their tools and followed Puyol out of the cave.

When Puyol and the others arrived at the entrance of the cave, they immediately saw dozens of huge logs of wood and a large pile of old vines on the beach not far away. All of them were so surprised that they couldn't speak. If they were asked to prepare so much wood, it would probably take them more than half a month. After all, it was already very difficult to cut down trees with primitive tools, and such heavy logs had to be transported out of the forest. It would be considered good if they could finish one log a day.

In the eyes of Puyol and the others, Xia ruofei was definitely a God if he could prepare so many wooden materials and rattans in one night.

"Great divine immortal, this ..." Puyol was dumbfounded. "Did you prepare all this by yourself?"

Xia ruofei smiled and nodded. ""Yup! It's too inefficient for you to cut wood on your own. I'm in a hurry ..."

Puyol couldn't help but sweat. They had been trapped on this deserted island for so many years and couldn't leave even if they wanted to. As long as they could leave this place, even if there was only a little hope, it didn't matter if they had to wait a few more days!

But this Daoist immortal clearly didn't think so.

"Don't just stand there, hurry up and get to work!" Xia ruofei said.

"Yes, yes, yes!" Puyol quickly said.

The group of people followed Xia ruofei to the beach and started to work with great enthusiasm.

The only requirement for them to build the raft was that it was strong enough. They had no pursuit for beauty or comfort, so they didn't even peel off the bark. Puyol and the other two were busy cutting off all the branches of the wood, then saw off the thinner parts at the top, cutting out about ten meters of wood.

After that, he chiseled a few circles of grooves on the wood, and then wrapped the old vines around these grooves. He tied the wood side by side tightly, and the prototype of the wooden raft was out.

Of course, as the tools that Puyol and the others used were relatively simple, these tasks took them an entire day. This was the result of Xia ruofei's help. Otherwise, they might not have been able to finish it in two or three days.

With Xia ruofei's participation, the construction of the raft sped up greatly, especially when it came to tying the rattan. Puyol's strength was still passable, and the other two survivors could not tie the rattan as tightly as they could. However, Xia ruofei easily tied the rattan tightly with one hand.

After a day's work, Puyol and the others were exhausted.

As usual, Xia ruofei did not stay in the cave with them. Instead, he returned to the boundary of the array and entered the spirit map space to rest.

The next day, Xia ruofei brought Puyol and the rest to modify the raft. For example, they installed a simple mast so that it could be leveled when it was not in use. Then, the other two survivors used some old cloth found in the camp to sew a triangular sail.

In addition, Xia ruofei had gotten Puyol and the rest to nail a simple deck on the raft with the branches they had cut off.

After all, the raft would get wet after going into the sea. There was a platform for them to place their supplies, and because they had to take a baby with them, it would be much better to set up a tent on the platform when the sea was rough.

After another day of work, the wooden raft was basically completed.

Puyol took the survivors to the ruins of the camp where they had lived for several years and dug out everything that might be useful after going out to sea. In addition, they also went to the water source to get a large amount of fresh water. All the containers that could be used were used. They placed all these things on the raft and used thin vines to secure them.

This wooden raft had more than a dozen logs lined up side by side, about five to six meters wide and ten meters long, which was relatively spacious.

On the simple deck, the supplies were stacked in a triangular shape. The concave part in the middle was Xia ruofei's single tent, which John Junior could stay in.

After a day's preparation, Xia ruofei decided to go out to sea the next morning.

He told Puyol and the survivors to have a good rest tonight, while he returned to the array barrier to rest as usual.

The next day, Xia ruofei left the boundary of the array at dawn and came to the beach.

Puyol and the others were so excited that they didn't sleep for the entire night. They had been looking around at the entrance of the cave since early in the morning.

When they saw Xia ruofei, they quickly walked out.

All the things they needed to bring were carried onto the raft yesterday. Puyol carried John Junior in his arms, and the remaining three survivors followed closely behind. They almost ran all the way to the beach.

Puyol and the rest came to Xia ruofei, their eyes full of anticipation.

Xia ruofei smiled and said, "is everything ready?" Then let's go!"

“Yes!” Puyol said with a trembling voice.

He handed John to David, the thinnest survivor, and then took the other two survivors to the back of the raft.

Yesterday, they had already cut down some branches as thick as fists and laid them under the raft all the way to the sea.

Chapter 2168 Leave_2

Puyol and the two survivors used all their strength to push the raft, and it started to move forward.

This was their hope to return to civilized society! The three of them felt like they had an endless supply of energy. As the wooden sticks reduced the friction below, the speed of the wooden raft became faster and faster. Finally, it rushed into the sea.

Puyol and the others followed behind and quickly stepped on the water to jump onto the raft. They then used the suggested oars to stick into the sand, trying their best to stabilize the raft.

According to his observations over the past few days, this time was about to be low tide. If it was not fixed, the raft would soon float outside.

He chose this time to go out to sea to save some energy.

If it was a high tide, they might row desperately, but the raft would still be spinning around the island!

David quickly jogged over, handed John Junior to Puyol, and then climbed up the raft with some difficulty.

On the other hand, Xia ruofei lightly stepped on the ground and landed on the raft five to six meters away. This unintentional display of his skills had made Puyol and the others full of admiration for him.

Xia ruofei came to the edge of the simple deck and sat down.””Let’s go!”

“Let’s go!”Puyol’s voice trembled. Let’s go!”

He and the other survivor pushed the oars hard, and the raft began to slide towards the sea.

The survivors were both excited and complicated. They looked at the deserted island behind them and thought that as long as they could return to civilization this time, they would never go out to sea again, especially in this damn place. They would never come back for a second time.

Xia ruofei, on the other hand, had a faint smile on his face as he looked at the green Immortal Island. “I’ll be back! By then, I should have completely refined the residence – guarding wooden token ...”

Elder Puyol led the survivors to row the oars with all their might, and the raft gradually left green Immortal Island with the help of the low tide.

The small island became smaller and smaller in everyone’s vision. The survivors paddled hard. At this time, someone inadvertently looked back and suddenly exclaimed,””Everyone, look! The island ... The island ... It’s gone!”

“Don’t joke around. How far did you draw? how could it have disappeared ... Ah! “He’s really gone ...” Puyol shouted.

When they looked back, they could no longer see the deserted island that they had lived on for many years. The view of the sea was very good today, and they could see very far away. How could the deserted island disappear? They had only rowed a thousand meters at most!

Xia ruofei’s face was calm, but he was actually very shocked.

Elder Puyol and the others did not see it, but he had been paying attention to the situation on the island. He was sitting on the edge of the simple deck with his back facing the direction of the raft. It could be said that he had a clear view of the situation on green Immortal Island.

Just now, Xia ruofei clearly felt that the space around green travel Immortal Island seemed to have been distorted and then the entire Island disappeared from his sight.

Xia ruofei had an epiphany and said in his heart, “Perhaps the situation is the opposite. The space we are in is instantly distorted, which is why we can see such a magical scene ...”

In any case, one thing seemed to be clear, and that was that they had now left the range of green travel Immortal Island.

Moreover, because of the mansion – guarding wooden token in his body, Xia ruofei could still vaguely sense the location of green travel Immortal Island. He only felt that the immortal Island was very, very far away from him.

However, no matter what the herb garden was, he could still rely on the trace of the mansion – guarding wooden token to find the green Immortal Island.

At this moment, Puyol carefully said, “Divine immortal, can we see ... If the positioning equipment you brought is back to normal?”

Xia ruofei came back to her senses and nodded. “Alright! You guys continue to row forward ...”

“Okay, okay ...” Puyol said quickly.

Xia ruofei took out the GPS locator. As expected, after turning it on, the GPS found the satellite.

Xia ruofei looked at his current position and couldn’t help but exclaim, “I’ll go ...”

Puyol immediately stopped paddling and ran over to ask carefully, “Daoist immortal, what’s wrong?”

Xia ruofei looked at Puyol and asked with a smile, “I remember you said that the location of the disaster was in the Atlantic Ocean, right?”

“Yes, the cruise ship’s route was in the Atlantic Ocean.” Puyol said.

“Pjoll, can you guess where we are now?” Xia ruofei asked with a smile.

“Could it be ... Not in the Atlantic Ocean?” Puyol asked.

“See for yourself!” Xia ruofei turned the GPS screen to Puyol.

After Puyol took a look, he couldn't help but rub his eyes. He took another look and then exclaimed, "Impossible! How ... How could this be possible? We're actually in the Indian Ocean ... And not far from Australia ... Mr. Deity, this ... This device isn't broken, right?"

"The equipment must be good!" Xia ruofei said.

"That's impossible! We were in the Atlantic Ocean, and although we drifted along with the lifeboats, how far could we have drifted? This place is almost half the earth away from where we were at that time!" Puyol's face was filled with disbelief.

Xia ruofei laughed and said, "Puyol, don't look at this matter with fixed thinking." Have you ever seen an Island that just disappeared? Have you ever seen such a huge Python? Also, have you ever seen someone as strong as I am?"

Every time Xia ruofei asked a question, Puyol would shake his head.

Xia ruofei smiled and said, "that's right." There are many things that can't be explained by science!"

Puyol also felt relieved. He smiled and said, "You're right. As long as we can return to civilization, it doesn't matter if it's the Indian Ocean or the Atlantic Ocean!"

"Hahaha!" Xia ruofei smiled and said, "we're quite lucky. This place isn't too far from the usual sea routes. There might be ships passing by ..."

"I hope so! "Now that the island has disappeared, we can't go back even if we want to. If we can't find help, we'll starve to death or die of thirst here ..." Puyol said.

"Don't worry! With me here, you won't die ..." Xia ruofei said, "alright, put in more effort!"

After Xia ruofei saw their current location, he tried not to use the satellite phone to ask for help. Perhaps he could directly meet a cargo ship passing by. After all, they were not far from the traditional route.

His main concern was that using a satellite phone or the internet would leave traces.

After all, after he found help for Puyol and the others, he would definitely leave before the rescue ships arrived. If he left any traces, it was likely that people would trace them back, and it would be troublesome.

When Xia ruofei discovered that there was someone on green Immortal Island, he had already changed his appearance. Even if Puyol and the rest returned to the civilized society, they would never be able to discover his identity.

Although Xia ruofei could use some technical means to cover up the traces of using the internet, he was not 100% sure. So, he decided to try his best not to use satellite phones or the internet.

With the GPS positioning, Puyol and the others followed Xia ruofei's guidance and headed towards the busy cargo route.

In the evening, Puyol and the others, who had been paddling for the whole day in turns, were exhausted.

Xia ruofei asked David and the others to rest and eat something to recharge their energy.

He called Puyol over and took out five handheld flame signals from his backpack and handed them to him.

Xia ruofei said, "Puyol, this Sea area is very close to the traditional transport route. However, the sea is vast. The probability of encountering ships is very low. These handheld fireworks are very effective at night. You can see them from far away." So, from now on, release a distress signal every few hours, understand?"

Chapter 2169 Leaving without saying goodbye (1)

"Okay, great immortal ..." Puyol said, then asked nervously, "you ... Didn't you say there was a satellite phone?"

Xia ruofei said nonchalantly, "there's a problem with the satellite phone's solar battery. I didn't charge it today. I'll try again tomorrow after the sun comes out." Tonight, we'll use this distress flare first. Maybe ships passing by in the nearby waters will see it ..."

"Okay, okay, I understand ..." Puyol said hurriedly.

"Alright, go and see John Junior!" Xia ruofei said, "everyone should take the time to rest tonight. Just arrange for one person to take turns to stand guard."

"Yes!" Puyol said.

He quickly arranged for everyone to take turns to be on duty. Even if he and the three survivors were to take three hours each, he would not dare to arrange Xia ruofei to be on duty.

After the arrangements were made, Puyol said, "Daoist immortal, please rest in the tent! We will be on duty tonight ..."

Xia ruofei shook his head and said, "John Junior is a little shy. You can sleep in the tent with him." I don't need ..."

After he finished speaking, he walked directly to the front of the raft and sat down casually.

Seeing this, Puyol didn't dare to persuade them. He sent the signal flare to each of the three survivors and asked them to fire a flare signal for each shift when they were on night shift.

Then he put the remaining two into the tent and went in himself.

As the leader of the survivors, Puyol naturally had some special treatment. He arranged for himself to be in the last class, so he could still have a good sleep when he lay down.

In the same way, the first class had a good night's sleep, which was why Dave was the weakest one in the class.

The remaining two survivors also found a relatively dry place at the end of the raft to lie down and rest.

The raft was five to six meters wide, so it was relatively loose for the few of them.

Dave sat in the middle of the raft and started the first shift.

In fact, the main reason for arranging for people to be on duty was to be afraid of extreme bad weather or sharks. If everyone fell asleep, they were likely to die in their daze. Although it was difficult to escape in the vast sea, at least having someone on duty would allow them to detect danger immediately.

Xia ruofei saw that David was the first to pull out the distress signal. Three red flares whistled into the sky and brightened the night sky.

There was nothing to hide on the ocean, and such flares could be seen from far away. They were basically distress signals. If ships saw them, they would definitely come over to check.

After the signal flare was fired, the flames were still spewing white sparks. If it were during the day, a large amount of orange – Red smoke could be seen. If a helicopter came over to check, it would be able to find the target immediately.

In fact, this kind of fireworks for help was similar to the fireworks during the spring Festival, but it was better – made and of better quality. It also took a longer time to set off than the average fireworks, especially the smoke, which could last for a long time.

Xia ruofei lay down at the front of the raft with the backpack on his head. He looked at the stars in the sky and felt the rhythm of the raft swaying with the waves. Slowly, he fell asleep.

That night, everyone on duty would fire a distress flare, so it would ring every three to four hours. Xia ruofei did not sleep well.

After Puyol took over and set off the fireworks for help, Xia ruofei saw that the sky was about to brighten and sat up.

He sat on the simple deck and muttered to himself. He had been firing flares for help the entire night, but no ship had appeared.

It was true that this place was close to the traditional sea route, but the sea was too wide. Ships that traveled by sea all year round might not be able to see other ships on the sea every day. It was normal for no ships to pass by this area for several days.

If no ship found him, he could only use the satellite phone to ask for help.

Although he still had a lot of these flames in his boundless space, he couldn't always take them out from his backpack! The backpack was huge, but it couldn't possibly have an infinite capacity!

Xia ruofei decided to observe the situation for another day. If there was no other way, he would use the satellite to get online for help.

At this moment, Xia ruofei seemed to hear a “tu tu tu” sound from afar.

The sound was very weak, and there was also the sound of waves nearby, so it was a little vague and not very clear.

He turned his head and saw that the three survivors were all sleeping. Puyol was sitting next to the tent doing nothing. Obviously, they did not hear the sound.

Xia ruofei also quickly realized that his hearing was much better than ordinary people – s. Now that the sounds he heard were faint – Puyol and the others must not have heard anything.

Xia ruofei listened carefully and realized that the sound was coming from the southeast. It seemed to be getting closer.

He listened carefully for a while.

It was the sound of a helicopter engine!

Xia ruofei couldn't help but stand up and shout, ""Puyol! Hurry up! Signal flare! Immediately release another one!"

"What?" Puyol was confused."Lord deity, I just finished playing for a while!"

Chapter 2170 Leaving without saying goodbye (2)

"The sound of Helicopter Engines! Did you hear that?" Xia ruofei asked,"it must be a big ship or a military vessel! They saw the distress signal and sent a plane over to check! Hurry up and light the signal flare! Otherwise, the helicopter will turn back when it can't find anything!"

In this vast sea, a helicopter's range would definitely not be able to reach these waters. The helicopters that could appear were definitely carrier – based helicopters, either large cruise ships with complete facilities or warships.

Either way, the chances of Puyol and the others being rescued had greatly increased.

Puyol was also excited when he heard that. Although he still did not hear anything, he believed Xia ruofei's words without a doubt. He quickly went into the tent to look for the remaining help signal flame.

Pjoll held the signal flare tightly in his hand and pulled with his right hand.

With a buzz, sparks flickered, followed by three "Bang Bang Bang" sounds, three signal flares flew into the air.

The light from the fire illuminated Puyol's face, which was filled with anticipation.

Soon, the sound of the helicopter's engine became louder and louder. This time, even Puyol and the three survivors could hear the sound of the engine. Obviously, the pilot of the helicopter had also seen the flames, so there was no need to search and move forward. Instead, he flew directly in this direction.

After a short while, the flashing anti – collision lights on the helicopter appeared in their field of vision, and the sound of the helicopter's engine became louder and louder.

Puyol and the other three survivors couldn't help but shout for help on the raft. The three survivors waved their hands frantically, while Puyol also kept waving the signal stick that was still spurting sparks.

Xia ruofei was the only one who sat on the simple deck quietly. He went through his disguise again and realized that all the items from the civilized society, such as compressed biscuits, mineral water, and instant noodles, were in his backpack. Other than the tent for John Junior, there was nothing from the modern civilization.

The tent was a very popular camping tent he had bought online. The sales of the Skycat agency alone were hundreds of tents every month, so it was impossible to find out his identity through the tent.

In other words, he could disappear at any time.

Of course, Xia ruofei was not in a hurry to dive into the water. Instead, he waited with Puyol and the rest.

After all, it was only the helicopter that was coming over, and it was hard to say if the pilot had noticed them. Xia ruofei would not leave until he was sure that Puyol and the others could be saved.

At this time, sunrise had just risen on the sea.

A red helicopter was getting closer and closer to the morning sun. Puyol and the others were so excited that they were in tears.

The helicopter flew a few rounds above the raft. Considering that the airflow caused by the propeller could easily overturn the raft, the helicopter did not lower its height too much.

Soon, the helicopter dropped a positioning buoy. The pilot reached out his hand and waved at Puyol and the others before leaving.

These buoys would constantly send location signals to guide ships over.

Xia ruofei smiled and said, "Puyol, don't worry!" The rescue ships would arrive soon! You're saved!"

"Yes ..." Puyol sobbed. "Thank you, great divine immortal ... Thank you ..."

David and the other survivors also hugged each other in excitement.

They had been stranded on the deserted island for so many years, and they had just experienced that nightmarish night not long ago. They had almost become the Python's food. These people had truly survived a disaster! That kind of excitement was really difficult to express in words.

Xia ruofei said, "Puyol, after you've been rescued, you must know what you should say and what you shouldn't say. You must know in your heart. If you don't want to be a lab rat, don't mention that mysterious island."

"I understand ... I understand ..." Puyol immediately said. "Lord Divine immortal, but our identities can be investigated. We clearly encountered a sea disaster in the Atlantic Ocean. Now, we have appeared in the Indian Ocean. This is hard to explain ..."

Xia ruofei thought for a while and said, "then tell me that you've drifted to a Nameless Island with the lifeboat. Tell me about the specific situation of the island, especially the situation in the pool. Also, you must not tell me that you ate the fruit. Otherwise, you might be cut into pieces and studied like a lab rat ..."

Puyol couldn't help but shiver and quickly said, "I definitely won't say anything ... I'm the only one who knows about this, so it'll be fine as long as I don't say anything. I'll tell David and the others about the Python, but it's best not to mention it. No one would believe me if I told them about the man – eating

Python that was as thick as a bucket! They might even think that we've been on a deserted island for too long and have developed mental problems!"

Xia ruofei nodded in satisfaction and said,""It's good that you understand! In short, it was less likely for problems to arise if he spoke less. As for the fact that you came out of the island a few years later and ended up in the Indian Ocean, it's just that the island is a little more mysterious, and there's no danger to you."

"Yes, yes, you're absolutely right ..." Puyol quickly said.

Xia ruofei continued,"also, about my situation ..."

"I understand, I understand!" Puyol hurriedly said,"Lord Divine immortal, we won't say anything. Don't worry ..."

Xia ruofei smiled."It doesn't matter to me whether you guys talk or not. However, to save yourselves some trouble, you'd better pretend that I'm not here. Later, you and David will have to tell the same story."

Puyol revealed a puzzled expression and said,""Lord Divine immortal, but when the rescue boat arrives, you ..."

Xia ruofei smiled."You don't have to worry about that. Just tell David and the others!"

He didn't tell elder Puyol that he would leave in a while, and elder Puyol naturally didn't expect someone to jump into the sea in such a vast area without even seeing the rescue team. Therefore, elder Puyol didn't think much and quickly followed Xia ruofei's instructions to find David and the other two survivors. They then started to speak in a low voice.

Xia ruofei, on the other hand, went to the tent on the simple deck and stuck his head out to take a look.

John Junior was sleeping soundly. The raft was probably floating on the sea like a cradle. The little guy had been sleeping most of the time and didn't cry at all.

Xia ruofei reached out and touched John Junior's little face. He smiled and said,""Little guy, we'll be saying goodbye in a while ... I hope that we'll really be able to see you again in the future if we're fated ..."

Xia ruofei sat on the raft with Puyol and the rest. After waiting for almost an hour, a ship finally appeared on the sea level in the distance ...

Although they knew they were saved when they saw the helicopter, they still couldn't help but jump up in excitement when they saw the rescue ship coming. They were waving the clothes they had just taken off as they jumped.

The ship stopped a few dozen meters away from the raft, then lowered a lifeboat and rowed towards the raft.

Puyol and the rest were standing on the raft and looking forward to it. No one noticed that Xia ruofei, who was at the bow of the boat, waved his hand lightly and the backpack disappeared into thin air. Then, he turned around at the bow of the boat and silently dived into the sea ...

As there were supplies and tents on the simple deck, no one on the lifeboat or the cruise ship saw Xia ruofei enter the water.

After Puyol waved his arms around for a while, he turned around excitedly and said, ""Daoist immortal, we finally have to ... Eh? Daoist immortal! God ..."

When the survivors saw this, they also turned their heads and found that there was no one at the bow.

Puyol, David, and the other two exchanged looks and quickly recovered from their shock. Puyol looked at the approaching lifeboats and said in a low voice, ""Listen up, the divine immortal definitely doesn't want to see these rescue personnel. Remember what I told you just now. Never mention the divine immortal, or we won't be able to explain it clearly and it will bring endless trouble ..."

Dave and the others nodded in agreement.

As for Xia ruofei's safety, Puyol and the others, who had seen so many of his magical means, were not worried at all. However, when they saw Xia ruofei leave so quietly, they were more or less a little disappointed ...

Xia ruofei had not gone far. After he dived into the sea, he immediately summoned the spirit map and stuffed it into a gap under the raft's simple deck.

This place was completely covered by wooden boards, and couldn't be seen from the sea.

Xia ruofei entered the space and immediately released his spiritual power to observe the situation above the sea ...
