

God tier Farm 2431

Chapter 2431 The space is upgraded again (2)

Xia ruofei did not explain much. He immediately reinforced the space cage outside the mobile house a few times and shielded it. The membrane wall of the cage turned from transparent to milky white, completely blocking the vision from the inside to the outside.

Then, Xia ruofei moved the space cage that imprisoned Liu chengfeng to the side of the mobile house and strengthened it to a certain extent.

Xia ruofei did this to prepare for the spirit map space to absorb the world stone.

The world stone this time was the size of a basin. After the spirit map scroll had completely absorbed it, it was possible for it to evolve and upgrade again.

In order to prevent any chaos during the upgrade, Xia ruofei had called everyone back to the mobile house in advance and had specially strengthened the space cage.

Then, Xia ruofei called Xia Qing and the realm Fox Bai Qingqing out and told them that the spirit map space would absorb the realm stones again, which might cause the space to upgrade. He asked them to keep quiet and pay close attention during the whole process.

In particular, he warned Bai Qingqing not to cause any trouble during the process, or he would not be polite to her.

Xia ruofei then ordered Xia Qing to keep an eye on Bai Qingqing.

In this spirit map space, Xia Qing had the highest authority other than Xia ruofei. She could also mobilize the invisible force of space. If Bai Qingqing really caused trouble, Xia Qing would still be able to subdue it.

Bai Qingqing protested with dissatisfaction.

It was mainly because Xia ruofei did not share any of the harvest with it.

Of course, this was also because Bai Qingqing had not been of any use in the process of obtaining the world stone. Another thing was that the realm stone he obtained this time was huge. If he were to cut it into smaller pieces like before, he would not mind giving Bai Qingqing a few pieces as long as he could ensure that the space could be upgraded.

Bai Qingqing's protest was naturally in vain.

After giving his orders, Xia ruofei left the medium in a flash.

After returning to his bedroom in the courtyard house, Xia ruofei used his mind to establish a connection with the spirit map. At the same time, he removed the protective screen around the huge world stone that had been stored at the Archean realm and gave the spirit map space an order to absorb the world stone.

Xia ruofei could feel that the entire spirit map space seemed to have a consciousness of its own. It was cheering and jubilant. Then, a suction force appeared and the huge world stone suddenly floated in the air.

The mysterious spatial energy within the world stone was also rapidly absorbed by the spirit map picture scroll.

Xia ruofei had been watching the whole process nervously. He was also praying in his heart, hoping that the spirit map space could be upgraded successfully this time.

The acquisition of a world stone was often a serendipitous event. If the space still could not level up after absorbing all the world stones, then it was unknown when he would be able to obtain another world stone.

The spirit map space had evolved to this extent. If it only relied on absorbing Jade to replenish its energy, the demand would be huge. Even if Xia ruofei had plenty of money, the Jade on earth was limited. It was not guaranteed that money could buy enough Jade.

Moreover, such a large – scale purchase of raw jade materials without engaging in any Jade business would definitely attract the attention of people with ulterior motives.

Hence, after a few upgrades, Xia ruofei had given up on the idea of using Jade to “feed” the spirit map space.

The world stone was huge, and after the spirit map space absorbed it for a long time, its color only faded slightly. At the same time, one or two tiny cracks appeared on its surface.

Xia ruofei had experienced this process many times so he was very clear that the mysterious energy contained in the realm stone was far from being fully absorbed.

He couldn't help but be filled with anticipation. The more “firm” the performance of this world stone was, the higher the possibility of the spirit map space directly upgrading after absorbing it.

The absorption process was long, but Xia ruofei was not impatient at all. In fact, he even hoped that the longer the process was, the better.

More than two hours had passed. The color of the basin – sized world stone was getting fainter and fainter. More and more cracks had appeared on it, almost covering the entire surface of the world stone.

Xia ruofei knew that the energy contained in the world stone was almost used up.

However, the spirit map space still showed no signs of upgrading. Xia ruofei couldn't help but feel anxious.

At this moment, the world stone's exterior had already turned grayish – White, and it would occasionally emit light cracking sounds. Small stone fragments would constantly fall off from the surface, indicating that its energy was about to be exhausted.

Xia ruofei sat on the bed in his bedroom with an anxious look on his face. His mind was still connected to the space, and he was constantly sensing the situation in the space.

The feeling of disappointment gradually grew.

Seeing that the realm stone was starting to fall apart, Xia ruofei sighed to himself. It seemed like his wish to upgrade the realm was going to be in vain.

However, just as the entire world stone broke into small pieces and fell down, the spirit map space absorbed the last wisp of energy from the world stone. Then, the entire space trembled slightly. Even Xia ruofei's mind was shaken.

Xia ruofei's mood was like a roller coaster. All his disappointment was swept away, and his face showed joy. He was too familiar with this feeling. Every time the spirit map space was upgraded, he would experience a similar shock. This time, the shaking seemed to be more intense.

Xia ruofei immediately felt the entire spirit map space trembling slightly. His spiritual connection with the spirit map space was also affected. Although it was not completely cut off, it was still faintly discernible. He could not sense the situation inside the space clearly.

Xia ruofei kept his thoughts to himself and sat in the bedroom, waiting.

Time always passed very slowly during the process of waiting.

Xia ruofei was both anxious and expectant. He couldn't help but use his mind to establish a connection with the spirit map space. However, the upgrade seemed to take a long time. It took two hours, but the connection between Xia ruofei's mind and the realm was still unclear. This meant that the realm was still in the process of upgrading.

After that, Wu Qiang went outside to invite Xia ruofei for dinner. However, the spirit map scroll could not be kept in the body during the process of upgrading. Naturally, Xia ruofei was not at ease leaving the spirit map scroll in the bedroom. Hence, he told Wu Qiang that he was not hungry and would not be having dinner.

In reality, Xia ruofei was not in the mood to eat. All his thoughts were on the spirit map space.

Xia ruofei waited until 10 O' clock in the evening before he established a telepathic thought connection with the spirit map space.

This meant that the spirit painting scroll had already completed the upgrade process.

Calculating the time, this upgrade had actually taken six to seven hours, several times longer than the last time.

This made Xia ruofei look forward to it even more.

When he re – established the spiritual connection with the spirit map space, the first thing he felt was that the connection was much clearer than before.

It was as if a normal screen had suddenly changed to a 4K HD screen.

Before he entered the space, Xia ruofei noticed an obvious change.

Perhaps it was because the connection between their minds had become closer, or perhaps it was because the spirit map scroll had changed after it had been upgraded, Xia ruofei realized that he could control the spirit map scroll to change its appearance.

Of course, no one would tell Xia ruofei about this, but he had this feeling.

Xia ruofei immediately tried it.

Sure enough, with just a thought, the spirit painting scroll began to shrink in front of his eyes. In the blink of an eye, it turned from a normal – Size ancient painting scroll to a pocket – sized scroll that was only a few centimeters long.

Ever since Xia ruofei had obtained the scroll, it had always looked simple and unadorned. Even when he was able to store it in his body, he could not change its appearance. Every time he took it out of his palm, the scroll would still look the same.

This change greatly piqued Xia ruofei's interest. He was no longer satisfied with just changing the size, so he began to try to change the spirit map into something else.

Chapter 2432 Linglong tower (1)

Xia ruofei's heart skipped a beat as he tried to imagine how he wanted the spirit map to change.

The scroll, which was only a few centimeters long, began to transform under Xia ruofei's gaze. Soon, it turned into a lifelike leaf.

Xia ruofei's interest was immediately piqued. Like a child who had just gotten his favorite toy, he even temporarily put aside the thought of entering the space and continued to try to transform the spirit map.

Stones, bricks, teacups, USB drives ...

The spirit painting scroll obediently changed its shape under Xia ruofei's command.

As the shape changed, Xia ruofei also tried to make it bigger or smaller.

Soon, Xia ruofei found a pattern.

First of all, no matter how the shape changed, Xia ruofei could feel that the essence of the spirit map scroll had not changed. Its original form should be an ancient scroll, and the changed appearance was similar to a smokescreen.

In addition, it couldn't become bigger or smaller without any limit, and there was a limit.

Xia ruofei tried to shrink the scroll and realized that it could only be one centimeter long at most. This was the limit of its original form. If it were to change into something else, it would reach its limit even faster. It would be about two or three centimeters in diameter and could not be reduced any further.

Xia ruofei guessed that this was related to the level of evolution of the spirit map. Perhaps it was related to the closeness of his mental connection with the spirit map or perhaps it was related to his spiritual power cultivation.

He should be able to continue evolving in the future.

Besides, Xia ruofei also realized that when the spirit painting transformed into something else, it would consume his spiritual power to maintain it. Of course, it did not consume too much spiritual power. With his current spiritual power cultivation, it should not be a problem to maintain it for 10 to 20 hours.

No matter what, the change in the spirit painting made Xia ruofei very surprised.

To a certain extent, the spirit painting scroll could be considered Xia ruofei's divine tool for escaping.

When they were at Green Immortal Island, Xia ruofei had used the spirit map scroll to escape the pursuers of the purple – blooded spiritual Python.

Ever since he had heard about the cultivation world from Liu chengfeng, Xia ruofei had always felt a sense of urgency and danger.

Especially some of the higher – ups in the sect, most of them were golden core cultivators. Xia ruofei could not fight against them at all.

The law of the jungle had always been the rule of the cultivation world. Xia ruofei had a feeling that he would have to deal with the cultivation world in the future. Meeting Liu chengfeng this time might just be the beginning.

If he provoked an enemy he couldn't fight against for the time being, then the special function of the spirit map scroll would be particularly important.

In the past, the spirit map scroll could not change its shape and always looked like an ancient scroll, which had certain limitations. With this new function, Xia ruofei had more protection when he needed to escape from the enemy's pursuit.

He could completely change the appearance of the spirit map scroll and integrate it into the environment. Then, he could hide in it, and the enemy would not be able to find him in a short time.

Especially in today's cultivation world, space magic weapons were almost extinct. Space magic weapons that could hide living people were even rarer. Even when the cultivation world was very prosperous, this kind of magic weapon was extremely rare.

Today's cultivators could hardly think of anyone who could hide in a space treasure.

As long as the exposed painting was not discovered by the enemy, Xia ruofei's safety would be guaranteed.

Xia ruofei was very satisfied with the changes that had occurred after the evolution of the spirit map.

With some anticipation, he restored the spirit map scroll to its original form and entered the space with a thought.

Every time the spirit map space was upgraded, Xia ruofei would habitually enter the Archean realm where time flowed 30 times faster to see if there were any changes here before going to the mountain sea realm.

Of course, the time he stayed here each time was relatively short. That was because the size of the Archean realm had not expanded for a long time. After the space had been upgraded and evolved, other than the spirit Qi becoming denser, there were basically no other changes.

This time, Xia ruofei entered the spirit map space's Archean realm first.

The first thing he felt was that the spirit Qi in the space had become denser. This was within his expectations and was not a surprise.

Xia ruofei casually glanced at it as if he was doing official business, and then prepared to move to the mountain sea realm.

Normally speaking, every time the spatial realm leveled up, the greatest change would be in the mountain and sea realm.

However, this was completely out of Xia ruofei's expectations.

When his gaze swept across the pool in the middle of the Archean realm, he was instantly stunned. He could no longer shift his gaze away.

Xia ruofei's eyes were wide open as he stared in the direction of the pool.

In the center of the spatial spirit pond, there was a crystal clear Jade Pagoda!

The Jade Tower had nine levels, and four Jade bridges were connected to the land outside the pond from four directions.

Both the Jade Pagoda and the Jade Bridge were small and exquisite.

The four Jade bridges could only allow one person to pass through, and each level of the Jade Pagoda was about 1.5 meters tall. From the outside, it was impossible to tell if it was hollow. Even if one could enter, most adults would have to bend down to enter.

On the second floor of the Jade Pagoda, there was a small plaque with three ancient scripts of the exquisite Pagoda carved on it.

Chapter 2433 Linglong tower (2)

Xia ruofei's heart could not help but beat rapidly. It had been a long time since there were any changes to the Archean realm. The Linglong Pagoda that suddenly appeared this time definitely did not appear for no reason. It must have a very important function!

Although he really wanted to find out what was going on, Xia ruofei did not rush over. Instead, he sent a telepathic message to Xia Qing, asking him to come over immediately.

After Xia Qing received Xia ruofei's orders, she immediately flashed and arrived at the Archean realm.

When Xia Qing saw the Linglong tower in the middle of the pool, she revealed a smile and said, "Congratulations, master! The Linglong tower has evolved in the spirit map world, which will be a great help to master!"

Xia ruofei's face was filled with joy as he asked, "Xia Qing, give me a good introduction to this Linglong Pagoda!" It's located at the center of the Archean realm, and it's obvious that it's not an ordinary item. I'm filled with anticipation!"

"Yes, master!" Xia Qing said, "actually ... The appearance of the Linglong Pagoda is a dividing line for the spirit map world ..."

"Oh?" Hearing this, Xia ruofei's interest was piqued. He quickly asked, "why do you say so?"

"Master, although the spiritual Qi in the spirit map world was very rich, did you feel that it was lacking in some spiritual movement?" Xia ruofei smiled and asked, "and you must remember that I reminded you not to cultivate in the spirit map world for a long time to avoid damaging the foundation of the spirit map world, right?"

"Of course I remember!" Xia ruofei nodded.

Xia Qing smiled and said, "the reason why there is such a restriction is that the spirit map world has not evolved enough. In the past, although the spirit Qi in the spirit map world was getting richer and richer, it was actually consuming the foundation of the spirit map world itself." Fortunately, master didn't plant too many spirit grasses and spirit medicines. The crops and medicines of the secular world don't consume too much of the spirit map world. "

Xia ruofei couldn't help but raise his eyebrows and ask, "So ... After the space evolved, this situation has changed?"

"Yes, I am!" Xia Qing pointed to the Linglong Pagoda in the center of the spirit pool and said, "the Linglong Pagoda is actually the center of the array of the entire spirit map world. The appearance of the Linglong Pagoda means that the spirit map world's formation has been further activated. "

"There's an array in the spirit map world?" Xia ruofei asked curiously.

Xia Qing smiled and said, "of course. The entire spirit map world is shrouded in a large array. This array contains an extremely complex time and space Array. This array is gradually activated, so the space of the spirit map world will continue to expand."

Xia ruofei nodded. "I understand now ... So, the appearance of the Linglong tower means that a part of the key formation has been activated?"

"Yes!" Xia Qing nodded. Master, the appearance of the Linglong Pagoda means that a key function of the spirit map world has begun to resume operation. "

"What function?" Xia ruofei asked.

He had a faint feeling that the "key function" that Xia Qing had mentioned should be related to spirit Qi.

"Master, this part of the function of the formation, simply put, is that the spirit map world has restored its energy exchange with the outside world. Now, the spirit map world can absorb energy from the outside world and transform it into spiritual Qi." Xia Qing said.

"The outside world?" Xia ruofei subconsciously frowned and said, "but the cultivation environment outside is already very poor. The spiritual Qi is very thin."

“Master, the outside world I’m talking about isn’t the outer space you live in, but the chaotic region outside the spirit map world,” Xia Qing said with a smile.

Xia Qing paused and continued, “the chaotic region is full of chaotic Qi. This is the most original Qi. However, in most cases, the chaotic Qi can not be directly absorbed and utilized.” This part of the formation that was activated in the spirit map world could continue to absorb the chaotic Qi in the chaotic region and transform it into spirit Qi to maintain the concentration of spirit Qi in the space. This means ...”

Xia ruofei’s eyes brightened as he continued Xia Qing’s words, “This means that I can cultivate in the spirit map world from now on!”

Xia ruofei nodded with a smile. “Yes. At least with master’s current cultivation, the speed at which the spirit map world’s formation converts and absorbs the chaos Qi is sufficient. Master should be able to replenish the spiritual Qi in time if you cultivate in the space.”

Xia ruofei couldn’t help but smile bitterly. Was he being looked down upon because of his low cultivation level?

No matter what, being able to cultivate directly in the spirit map space was definitely a great thing for Xia ruofei.

Although he could use spirit crystals or origin crystals to cultivate in the outside world, he would try to save such precious cultivation resources as much as possible. After all, for the sake of safety, he couldn’t bring Song Wei, Ling Qingxue, Li Yifu, Tang Haoran, and the others into the medium to cultivate in the short term. It was naturally the best choice to leave spirit crystals and origin crystals for them to use.

Secondly, with the density of the spiritual Qi in the space, if Xia ruofei cultivated directly in the spirit map space, the effect would be better than cultivating with crystals.

As for the third point, he could naturally use the 30 times faster time flow at the Archean realm to rapidly increase his cultivation level.

After learning about the situation in the cultivation world, Xia ruofei felt a sense of urgency and realized that time was precious.

Xia ruofei laughed and said, “Xia Qing, the upgrade of the realm this time is really timely!”

“Master has done very well,” Xia Qing nodded with a smile, “the spirit map world’s evolution has always been very fast. That’s right, the appearance of the Linglong Pagoda not only marks the activation of the spiritual energy conversion formation in the spirit map world, but it also has infinite wondrous uses. As for the specific functions, I’ll leave it to master to discover them yourself!”

Xia ruofei laughed, “you’re still keeping me in suspense!”

Xia ruofei didn’t mind. Since Xia Qing didn’t say anything, he naturally wouldn’t force her. Moreover, although Xia Qing didn’t clearly tell him about the tower of delicacy’s function, since he was asked to discover it himself, it at least meant that the tower of delicacy was safe for him, and it was unlikely that any dangerous accidents would happen.

Xia ruofei laughed and said, “good!” Then I’ll try out the magical effects of this Linglong Pagoda!”

With that, Xia ruofei lifted his legs and walked towards the Jade Bridge in his direction. Xia Qing, on the other hand, stood on the shore and watched with a smile.

Xia ruofei reached the Jade Bridge in a few steps. He took a deep breath and stepped on it.

Nothing strange happened. The Jade Bridge was still connected to the exquisite Jade Pagoda in the center of the pool.

The Jade Bridge was in the shape of an arch bridge. Xia ruofei had to go up nine steps, walk forward, and go down another nine steps to reach the Linglong tower.

Xia ruofei did not stop and continued to walk up the stairs.

However, he soon realized that something was wrong. With every step Xia ruofei took, he felt that the Jade Bridge seemed to widen.

Originally, this Jade Bridge could only accommodate one adult. If two people were to walk opposite each other, they would have to walk sideways to cross.

After Xia ruofei had taken three or four steps, the Jade Bridge had grown to more than two meters wide. It was enough to accommodate three or four people walking side by side.

Xia ruofei couldn't help but click his tongue in wonder. He continued to walk up the stairs.

After he had finished the ninth step, the width of the Jade Bridge had reached about six meters.

Xia ruofei couldn't help but look back. He suddenly realized that the Kasaya didn't seem to have become wider because of the Jade Bridge. It was because he had become smaller.

He saw that the shore of the pool was at least a dozen meters away from him, but in fact, he felt that he had only moved forward two or three meters. In addition, he saw Xia Qing standing on the shore. At this moment, she was like a giant in his eyes. Everything, including the grass by the pond and the Da Hong Pao tea trees in the distance, had been magnified several times in his eyes.

Xia ruofei quickly came back to his senses. Perhaps it was not that the Jade Bridge had widened or that he had become smaller, but that the space had changed.

The space within the painting was so large that it was not surprising that the Jade Pagoda and Jade Bridge within the space had been integrated with the laws of space.

Therefore, the Jade Pagoda, which looked like it was only one meter tall from the shore, might actually be much higher.

Chapter 2434 The Jade pillar array (1)

As the spirit map space continued to evolve and upgrade, Xia ruofei felt that this space – Type magical treasure was more and more magical.

Sometimes, he would even wonder if this was really something that could be created by man.

If the painting was truly the work of Shanhai Zhenren, then he was definitely a powerful being. His cultivation had probably reached a height that Xia ruofei could not even imagine.

Xia ruofei raised his head and looked at the Linglong Pagoda, which was now 50 to 60 meters tall. He took a deep breath and walked down the Jade Bridge.

After walking on a Jade – paved road, Xia ruofei arrived at the Linglong tower.

Right below the plaque on the second floor was the tightly shut door of the Linglong tower.

Xia ruofei looked at the crystal – Clear door of the Linglong tower and walked up three steps.

Xia ruofei stood in front of the Linglong Pagoda's door. Just as he was about to push the door, the door that was glowing with light suddenly opened.

Xia ruofei was stunned for a moment. He muttered to himself, ""An automatic door with a sensing function? It's so advanced!"

Of course, Xia ruofei knew that there were many formations that could achieve this function. Besides, he was the owner of the spirit map space. It was normal for him to be unobstructed in the space. He teased her to ease his tension.

Xia ruofei knew very well that since Xia Qing didn't stop him from exploring the Linglong tower, it meant that even if there was some danger inside, it wouldn't be life – threatening. So, even though he was a little nervous, he was still confident.

Since the door had opened by itself, Xia ruofei did not hesitate and walked into the tower.

As he walked into the Linglong tower, Xia ruofei felt as if the stars were moving as he usually did when he entered the space.

As soon as Xia ruofei entered the Linglong tower, a faint light suddenly shone down from the top of his head. The light went through Xia ruofei's body, giving him a shock. Fortunately, he did not feel any discomfort.

In fact, he still felt that there was something strange. When the glimmer of light penetrated his body, he felt as if he was being spied on. However, this feeling was very weak. If his spiritual power had not broken through to the spirit gathering realm, he would probably not have noticed it at all.

Xia ruofei didn't care about the faint light. Since he was already being spied on, he would just treat it as an X – ray.

He looked around, and even though he was already mentally prepared, he still revealed a trace of surprise.

Looking from the side of the pool, each level of the Linglong tower was only about 1.5 meters high. Even adults had to bend down to enter and exit.

When he reached the bottom of the tower, he felt that the Linglong tower had expanded a lot. Each floor was about six to seven meters high, which was equivalent to two floors.

However, when he walked into the Linglong tower, he found that it was a space of its own. He couldn't even see the ceiling when he looked up, and the area inside was much larger than what he saw from

outside the tower. In the fog, he couldn't see the walls of the Linglong tower in any other direction except for the wall behind him and the door.

The Almighty who created the spirit map world must have had high attainments in space! Xia ruofei muttered in his heart.

Xia ruofei quickly observed his surroundings and realized that the first floor of the Linglong tower was empty. There was nothing special about it.

On the wall next to the tower's door, a large character "3" slowly appeared, shining with a faint golden light.

Xia ruofei did not understand what the "three" meant.

If it was a floor, it should be "one"! Because this was the first floor!

Xia ruofei decided not to think about it since he could not figure out the secret behind it.

Anyway, the entire Linglong tower was his. The spirit map and painting scroll were usually kept in his palm, so it was very convenient to come in here. If one time didn't work, he would try a second or third time. He believed that as he fumbled around, these questions would be solved very quickly.

Xia ruofei looked forward and saw that a few meters ahead, there was a white fog rising. In the blink of an eye, he could no longer see anything further. Other than the area near the gate of the Linglong tower, the rest of the area was shrouded in the White fog.

The White mist seemed to have a life of its own and would not invade the area he was standing on.

There seemed to be an invisible boundary three to four meters away. No matter how the White fog rose and changed, it could not cross the boundary.

Xia ruofei could see that there were Jade pillars on the ground in the White fog.

Xia ruofei took a few steps forward to the boundary so that he could see it more clearly.

He found that these Jade pillars were long and distributed in an area about five or six meters wide. They kept extending forward and soon disappeared into the fog. He couldn't see how long they were from this end.

The distribution of these Jade stakes did not have any special pattern. As far as he could see, some of the Jade stakes were only 20 to 30 centimeters apart, and some were more than a meter apart. It was as if they were randomly distributed.

Xia ruofei looked at it for a while but couldn't find any pattern.

However, even if there was no pattern, the situation was quite obvious. He was required to pass through these Jade pillars.

Xia ruofei guessed that this was a test.

He pondered in his heart for a while, but he still couldn't figure out the difficulty of this test. In any case, from the area he could see so far, let alone a cultivator who was about to reach the ninth Qi layer, even an ordinary person should be able to pass it easily as long as they were careful.

Chapter 2435 The Jade pillar array (2)

Unless the gap between the Jade pillars became wider after they went deeper.

However, if that was the case, would it only test one's jumping ability? Xia ruofei felt that it was impossible.

After much thought, Xia ruofei felt that there was no harm in trying it out. Otherwise, he would not be able to figure out the mystery of the Jade pillar array.

So he stood in front of the boundary, adjusted his breathing, and then took a deep breath. He took a step forward and stepped on the Jade pillar closest to him.

When Xia ruofei entered the Linglong tower, he had already realized that he could not use the invisible spatial force here. To be more precise, he could not feel the spatial laws here.

It was obvious that the rules inside the Linglong tower were different from the rules in the other parts of the spirit map space.

Hence, Xia ruofei could only rely on his own strength to pass the array of Jade pillars.

Xia ruofei thought that it was normal. If he could use the invisible spatial force here, wouldn't he be invincible? He could even teleport there directly, so what was the point of setting up the Jade pillar array?

The moment Xia ruofei stepped on the Jade pillar, a change immediately occurred.

From the depths of the fog, an egg – sized glow suddenly shot out and headed straight for Xia ruofei.

The speed of the Halo was extremely fast. Even though Xia ruofei's reaction speed was much faster than that of ordinary people, he still had to wait until the Halo was in front of him before he could react.

He quickly turned sideways and dodged the Halo's attack by a hair's breadth.

However, he also lost his center of gravity, and his body fell to the side.

Even though he did not know what the Jade pillar array was for, Xia ruofei knew that he could not fall off the Jade pillar or he would fail the test.

So, after losing his balance, Xia ruofei's eyes quickly swept around. Then, with a very awkward movement, he moved his body a few centimeters sideways.

This way, when he fell, his fingers would touch the other Jade pillar.

With his current cultivation, as long as he had a place to borrow strength, he would naturally not fall under the Jade pillar.

Xia ruofei's fingers pressed hard on the Jade pillar and he immediately stood up.

After regaining his balance, Xia ruofei did not even have time to catch his breath when his spiritual power sensed another ball of light shooting towards him from behind.

This was the Halo from earlier.

After missing Xia ruofei, the ball of light seemed to have a life of its own. It drew a beautiful arc and changed its direction to attack Xia ruofei.

This time, Xia ruofei was more mentally prepared. He leaned forward and the Halo brushed past the back of his head. He immediately stomped on the ground and jumped towards another Jade pillar. He took the opportunity to move forward by one or two meters.

Soon, another ball of light flew rapidly from the depths of the fog. Its target was still Xia ruofei, who was standing on the Jade pillar. The ball of light from before did not disappear either. After drawing an arc, it persevered and flew rapidly towards Xia ruofei.

Xia ruofei relied on his spiritual power of the Spirit gathering realm and his superior reflexes. Under the pincer attack of the two halos, he did not panic at all. He calmly twisted his waist and dodged the faster halos. At the same time, he did a front flip and jumped over the second halos. Naturally, the Halos missed.

Xia ruofei was bold because of his skills. The two balls of light almost brushed past his clothes.

By the time Xia ruofei landed, he had already calculated his position. His feet were still firmly standing on the Jade pillar.

Just like that, Xia ruofei dodged the attacks of the Halos and moved forward step by step.

Time passed by and soon, Xia ruofei had held on for more than ten minutes. At this moment, more and more halos were attacking him. These halos were coming at Xia ruofei from different angles. The speed of each halos was not exactly the same. Some were so fast that Xia ruofei could not see their movement trajectory, while some were slow.

Besides, the speed of these halos was not constant. Sometimes, they would drift towards Xia ruofei in a wobbly manner, but in the next second, their speed would suddenly increase by several times and they would attack Xia ruofei with a whistling sound.

Hence, in order to avoid the attacks of these halos, Xia ruofei had to think quickly and continuously to judge the situation of all the Halos.

In these ten minutes, Xia ruofei looked very embarrassed. He had only advanced three to four meters when Jade stakes flew out of the White mist one after another. Xia ruofei's situation was getting more and more difficult.

Finally, after he dodged one of the Halos, he couldn't avoid the other one that followed closely.

In fact, with Xia ruofei's spiritual power, those halos could not hide their tracks. The reason why Xia ruofei was hit was because the calculations were too much. Even if he knew that the two halos were one after the other, he did not have the time to make a judgment in that instant.

After being hit by the Halos, Xia ruofei stopped dodging dejectedly. The remaining halos immediately pounced on Xia ruofei one after another.

With a soft 'plop' sound, the Halos touched Xia ruofei's body and quickly disappeared.

Xia ruofei did not feel any pain or discomfort after being hit by the Halo.

However, in the next moment, he suddenly felt an irresistible force locking him in place, and then his body flew up involuntarily.

When he came back to his senses, he found himself standing outside the boundary that the White mist did not dare to invade.

In front of him, there was still the faintly discernible Jade pillar in the rising white fog, extending into the depths of the fog.

Xia ruofei smiled bitterly and shook his head. He muttered to himself, "I was just saying that the Jade pillar formation was easy. I didn't expect to be eliminated after only advancing a few meters ... It's a good thing no one saw it!"

At this moment, Xia ruofei suddenly realized that the "three" on the wall that was shining with a faint golden light had twisted and quickly turned into a "two".

Xia ruofei immediately understood that the number "three" on the wall didn't represent the floor. Instead, it meant that he had three chances to take the test.

He had been hit by the White halo earlier, which led to his failure in the test.

Therefore, the "three" on the wall became "two."

Originally, Xia ruofei did not believe in heresy and was prepared to challenge the Jade pillar formation again. But now that he saw that there was a limit to the number of times he could challenge it, he couldn't help but hesitate.

In fact, even though the process just now was embarrassing, Xia ruofei could still feel the magical effect of the Jade pillar array.

This seemingly simple array of Jade stakes was of great help to his reaction speed, accurate judgment, and control of his body.

It was a test, but at the same time, it was also a form of training.

Although it was only a short ten minutes, Xia ruofei could clearly feel that his abilities had improved in all aspects. The main reason was that under that extreme state, his mind was spinning rapidly and his body's potential was squeezed out. Most of the time, he had to rely on a flash of inspiration to avoid the white light by a hair's breadth.

Xia ruofei was confident that if he were to do it again, he would definitely go further.

However, the words on the wall clearly stated that he still had two more chances to challenge.

With only two chances, Xia ruofei was not confident that he could pass through the array of Jade pillars. After all, the Jade pillars extended into the depths of the fog. His spiritual power was greatly restricted in the fog and he could not explore far. Hence, he was not sure how long the array of Jade pillars was.

Xia ruofei thought for a while and decided not to rush things. He turned back to look at the rising white mist and the faintly discernible Jade pillar inside before leaving the Linglong tower.

When Xia ruofei crossed the Jade Bridge and returned to the shore of the pond, he turned around and saw that the Linglong Pagoda had become small and exquisite again. Each level was only a meter tall. He could not help but sigh at the magical Jade Pagoda again.

Xia Qing had been waiting on the shore for a while. Seeing Xia ruofei come out so quickly, she couldn't help but ask curiously, "Master, you've already used up three of today's challenge chances?"

Xia ruofei couldn't help but blush, but he quickly caught the main point in Xia Qing's words and immediately asked, "Today? Xia Qing, you're saying that ... The limit to the number of times you can challenge someone is only limited to today? Even if I fail all three times, I can still challenge him in the future, right?"

Chapter 2436 Try again (1)

Try again

"A challenge can be initiated every seven days. After it's opened, you have three chances to challenge." Xia Qing didn't keep him in suspense any longer and said with a smile, "master, I believe you have already seen the wonderful use of the Jade pillar array ..."

Before Xia Qing could finish her sentence, she saw a figure flash in front of her. Xia ruofei had already stepped onto the Jade Bridge and entered the Linglong Pagoda in the blink of an eye.

Xia Qing couldn't help but reveal a bitter smile.

After almost 40 minutes, Xia ruofei walked out of the Linglong tower, drenched in sweat. He had a carefree smile on his face.

After seeing Xia Qing, Xia ruofei grinned and said, "Cool!"

He used up the remaining two challenge chances in one go.

In his second challenge, he persevered for almost 15 minutes, which was five meters more than his first challenge.

In the third challenge, Xia ruofei was lucky enough to persist for 25 minutes and advanced to more than 20 meters.

After 20 meters, the Halo's density increased significantly. Its speed was sometimes fast and sometimes slow, making it even more unpredictable. Xia ruofei could not hold on any longer and was directly blasted out of the Jade pillar array.

Obviously, twenty meters should be a threshold. After twenty meters, the difficulty of the Jade pillar array would increase by another level.

At the same time, the Jade pillar array continued to extend forward in the White fog. It was impossible to tell how long it had stretched.

However, Xia ruofei still felt rather carefree.

After challenging the Jade pillar formation three times today, he could clearly feel the improvement in his movement technique. After his reaction speed was pushed to the limit, he felt as if he had suddenly become enlightened.

Xia ruofei was not in a hurry to enter the mountain sea realm. He wiped his sweat and said to Xia Qing, "Tell me more about this Jade pillar array!"

"Yes, master!" Xia Qing bowed slightly and said, "the Jade pillar array is actually used to train one's body technique. If I may be so presumptuous as to ask, what is master's best result in the three rounds?"

"Around 20 meters," Xia ruofei replied casually.

Xia Qing had followed Xia ruofei for a long time and was familiar with the modern measurement units. He quickly converted twenty meters to ten feet. He said happily, "Master, you're able to rush to a distance of seventy to eighty feet on your first attempt. Moreover, you haven't cultivated any movement techniques. It seems that you're really talented!"

Xia ruofei shook his head and said, "I feel like I'm still far from it!" By the way, Xia Qing, how long is this Jade pillar array in total? I can't even see the end of the formation ..."

"Master, the Jade pillar formation is 600 feet long," Xia Qing replied with a smile.

Xia ruofei couldn't help but take a deep breath and said, "Two hundred meters? In other words, I've only cleared one – tenth of it even after using all my strength?"

Xia ruofei was speechless.

One had to know that although he had used three chances to clear one – tenth of the test, the difficulty did not increase in a linear manner. There was an obvious change at the 20 – meter mark. In other words, he had only passed the lowest part of the 180 meters. The difficulty might jump nine more times in the next 180 meters. At the 20 meters, Xia ruofei already felt that he could not handle it. What would happen at the 200 meters?

He didn't dare to imagine the difficulty of the last Jade pillar array.

Xia Qing said, "master, the Jade pillar array was originally used to train the body technique. Master has not yet cultivated any body technique. You are completely relying on your own reaction. To be able to cross 70 to 80 feet is already a feat of heaven!"

Xia ruofei waved his hand disinterestedly and said, "It seems that I still have to cultivate my movement technique!"

Although there were many cultivation manuals in the human jade talisman, most of them were about cultivating genuine Qi. There were also some methods on mental power. As for body techniques, combat techniques, and so on, there were almost none.

As for the earth character jade talisman, there were only ancient books on array Dao.

Hence, Xia ruofei had not cultivated any movement techniques.

He could guess that the reason why the previous owner of the spirit map space did not leave behind any martial arts or other battle techniques was that he had prepared something better. The reason he did not release it was probably to let Xia ruofei, who came later, focus more on the cultivation of the great Dao Sutra.

Xia Qing nodded and said, "it'll be much easier for master to break through the Jade pillar array after he's cultivated his body technique." That's right ... If master can pass the test of the Jade pillar formation, you will be able to obtain the reward left behind by Shanhai Zhenren. "

"Oh?" Xia ruofei's eyes lit up when he heard that there were benefits. He asked, "What's the reward?"

"The prize is at the end of the Jade pillar array. You will know after you pass it." Xia Qing said with a smile.

Xia ruofei couldn't help but complain, "you're keeping me in suspense again!"

"Master, please forgive me!" Xia Qing said with a slight bow. His attitude was very respectful, but he couldn't say that he was tight – lipped.

Xia ruofei had long been familiar with Xia Qing's situation. He knew that no matter how much Xia Qing looked like a human, she was still a soul puppet. Just like the intelligent Robots that many research institutions were researching, no matter how much she looked like a human, she was still a robot in essence and must operate according to a certain process.

Hence, Xia ruofei did not mind. He waved his hand and did not continue to ask about the exquisite Pagoda and the Jade pillar array.

Anyway, the Linglong tower was here and it wouldn't grow wings and fly away. He had plenty of time to slowly understand it.

Chapter 2437 Try again (2)

"Let's go! Come with me to the mountain sea realm to take a look!" Xia ruofei said indifferently.

With a thought, he directly brought Xia Qing to the mountain and sea realm.

The first thing that came into view was the mountain peak that towered into the clouds. After the spatial upgrade this time, the mountain in the mountain sea tier had once again grown a large chunk taller. Moreover, it had also expanded horizontally by quite a bit, faintly showing signs of a continuous stretch.

There were indeed a few "clouds" floating on the mountain peak. However, Xia ruofei could tell with one glance that they were not clouds at all. They were formed by the spiritual energy that had been slowly condensed into a water – like mist.

These “spiritual Qi clouds” slowly drifted, and the water – formed spiritual Qi in the clouds continuously fused together. Sometimes, it would even transform into a rain of spiritual Qi that fell down, hiding in the land of the mountain and sea realm.

It was obvious that in such an environment, the crops that Xia ruofei had planted in the mountain and sea realm would grow even faster.

The area of the mountain sea realm had almost doubled.

In reality, the mountain sea realm was too vast. It was difficult to judge the changes in the area with the naked eye. However, Xia ruofei now had absolute control over space. He only needed a thought to accurately grasp the situation in the entire mountain sea realm.

The sea on the periphery had also expanded a lot. Standing on the beach and looking out, it was no different from the sea outside.

Fortunately, the expansion of space was only limited to the exterior, and not the entire mountain sea realm.

Otherwise, the area of the newly planned herb gardens and rice fields would double. Moreover, if the normal planting density was increased to an equal ratio, the space between all the crops would double.

Xia ruofei immediately flew around the mountain and sea realm and made a quick round. Then, he came to the space cage area where the mobile temporary house was located. He first moved the space cage that had imprisoned Liu chengfeng to a certain place in the void.

Now that the upgrade and evolution of the space had been completed, the spirit map space was more stable than before, so the danger was naturally removed.

Then, Xia ruofei asked Xia Qing to lift the martial law around the temporary housing area and let the free workers leave their rooms to work at their respective places.

The mountain and sea realm in the spirit map space also gradually became lively.

Xia ruofei did not care about these trivial matters. Instead, he looked at the tall mountain in the distance.

There was a stone chamber in the cave halfway up the mountain. There were two light films protecting a jade talisman and a small box.

He could basically confirm that the Jade talisman was the heaven jade talisman.

Xia ruofei felt that if the previous owner of the spirit map space had left behind any inheritances such as movement techniques or battle skills, they would most likely be in this heaven jade talisman.

That was because his spiritual power had already broken through to the spirit gathering realm. The last time he tried to open the heaven jade talisman, he had failed. The light film that wrapped around the jade box would probably require Xia ruofei’s cultivation to reach a very high level before he could open it.

Xia ruofei's cultivation level had not changed since he tried to open the protective light film of the heaven jade talisman. He was still at the peak of refined Qi level 8 and his spiritual power had reached the spirit gathering realm.

Therefore, in theory, he still had no way to unlock the heavenly jade talisman.

However, during this period of time, Xia ruofei felt that his cultivation and spiritual power had improved by a lot.

Hence, Xia ruofei decided to try again.

In fact, the reason why Xia ruofei failed to unlock it last time was mostly because of his body, especially his palm, which could not withstand the internal and external pressure. Although he failed, his spiritual power still had some strength left.

After thinking for a while, Xia ruofei moved to the entrance of the cave on the mountainside in a flash and walked in.

If it was in the past, Xia ruofei would not be in a hurry. Since his cultivation had not reached the requirement, he would continue to cultivate and try again after he had a breakthrough. However, ever since Liu chengfeng appeared, his sense of crisis had become much stronger. He also knew where his shortcomings were, so he was eager to unlock the heaven jade talisman and make up for them as soon as possible.

Soon, Xia ruofei arrived at the stone room. He walked straight to the stone table and stared at the last two protective light films.

After weighing the pros and cons in front of the stone platform, Xia ruofei finally made up his mind, and his eyes became more determined.

However, he didn't immediately take action. Instead, with a thought, he moved a translucent preservation box over from the Archean realm.

The container was half – filled with spirit Heart Flower petals, which he had saved up over the past few days. There were two such containers in total, and the other one was already full.

Xia ruofei immediately opened the container and placed it on the stone table.

He was prepared to fight it out. If his palm could not withstand the pressure, he would not hesitate to use the petals of the spirit Heart Flower to recover.

Xia ruofei took a few sips of the spiritual pond water and sat down cross – legged on the stone bed with the Jade futon as a cushion.

Now that there was an energy exchange between the spirit map world and the chaotic space outside, Xia ruofei had less to worry about. He sat down cross – legged and began to cultivate the “great Dao technique”.

In a short while, Xia ruofei had adjusted himself to his best condition.

Previously, when he was challenging the Jade pillar array at the Archean realm, he had sustained some injuries. In a short period of time, he had recovered by half.

For these ordinary injuries, Xia ruofei did not need to use any medicine or waste any petals of the spirit Heart Flower. He could recover quickly during the process of cultivation.

It felt really good to cultivate directly in the space.

However, Xia ruofei had not come to this stone chamber to cultivate. Hence, when he felt that he was in his best condition, he stopped cultivating and stood up to walk to the stone platform.

Xia ruofei stared at the ancient jade talisman in the light film. He gritted his teeth and pressed his hand on the light film.

There was a strong counterforce, but Xia ruofei did not back down. Instead, he released his spiritual energy and covered his palm with genuine Qi, pressing against the light film.

Xia ruofei had already tried it once and knew the characteristics of this light film like the back of his hand.

In the beginning, Xia ruofei did not find it hard. He put his palm on the protective light film and kept injecting his spiritual power into it.

Soon, as Xia ruofei's spiritual energy entered the light membrane, it started to shake.

Xia ruofei gritted his teeth and continued to increase the output of his spiritual power.

After a while, Xia ruofei felt the pressure on his palm getting stronger and stronger. He could even feel the bones in his hand starting to crack.

In fact, he was very close to unlocking the heaven jade talisman. Last time, Xia ruofei had reached this level but had helplessly chosen to give up.

Now, Xia ruofei could only watch as his palm slowly sank into the protective light film. He could feel the pain in his palm every second.

Xia ruofei clenched his teeth and persevered.

After a short while.

Xia ruofei heard a soft crack and broke out in a cold sweat. He realized that his metacarpal bone had been broken by the pressure.

Xia ruofei was already prepared. With a slight thought, a spirit Heart Flower petal flew out from the Tupperware.

Now, Xia ruofei's control of the spirit map space had reached an extremely high level. Even if he was fully focused on breaking the light film, he could still easily split a part of his mind to control the petals of the spirit Heart Flower.

That petal fluttered up, and then was directly pushed by the invisible spatial force to his already fractured hand.

As soon as the petals of the spirit Heart Flower touched the skin of his hand, they were completely absorbed by his hand.

This was an entire petal of the spirit Heart Flower. It contained quite a lot of active ingredients. Xia ruofei's fractured hand suddenly felt like it was receiving rain after a long drought. Wisps of cool energy flowed towards the wound on Xia ruofei's palm. The injury on his palm seemed to have improved a lot.

Just like that, Xia ruofei gritted his teeth and continued to exert all his spiritual power. The veins on one of his hands were already popping out. He was constantly breaking his bones from the terrifying pressure, and the medicinal properties of the spirit Heart Flower petals were quickly absorbed.

Xia ruofei could hear the sound of bones breaking from time to time. It was another fracture.

His bones were continuously fractured by the pressure, but Xia ruofei continued to attack with his spiritual power.

The protective light film kept shaking, and finally, it couldn't bear the pressure anymore and broke with a "Chi" sound.

Chapter 2438 The heaven jade talisman (1)

Xia ruofei heaved a long sigh of relief. His entire body collapsed and his legs gave way as he sat on the ground.

His entire body was drenched in sweat, as if he had just been fished out of the water.

This time, Xia ruofei had gone all out. In order to get the heaven jade talisman, he had almost used up all his strength.

In order to break through the light barrier, one's spiritual power cultivation had to reach the spirit gathering realm. Xia ruofei was only about to meet the requirements. However, his genuine Qi cultivation was a few levels lower, and his physical strength was far from enough.

Especially the hand that was in direct contact with the light membrane barrier, it was bearing almost all the pressure.

Xia ruofei could not remember how many times he had broken the bones in his palm.

As the saying went, the ten fingers were connected to the heart, so the pain of the bones of the palm and fingers being continuously crushed was no less than cruel torture.

Xia ruofei's strong willpower and anti – interrogation training during his military service had made his pain tolerance much higher than that of ordinary people. Otherwise, he might have passed out before Xia ruofei could break the light membrane.

Xia ruofei leaned against the stone platform, panting heavily.

Although Xia ruofei had been using the spirit Heart Flower petals to repair his palm during the process, his hand was still swollen like a steamed bun. The recovery speed of the spirit Heart Flower petals could not keep up with the speed at which his bones and fingers were broken. The medicinal properties of the petals were also quickly consumed.

Although there was still a large number of spirit Heart Flower petals in the preservation box on the stone platform, and Xia ruofei could take the petals to continue repairing his palm with just a thought, he did not want to move at all. In fact, his spiritual power was almost exhausted.

The strength of this light barrier was much tougher than he had expected.

This time, it was also a risky move, and they had almost failed.

Xia ruofei felt a lingering fear when he thought about it, but it was quickly followed by a strong sense of joy.

As the saying goes, wealth comes from danger. This saying was really not wrong.

Although the process was a little dangerous, the harvest was gratifying.

Now, the “heaven” jade talisman was quietly placed on the stone platform. There was no barrier on the outside, waiting for Xia ruofei to take it away at any time.

Xia ruofei sat on the ground and rested for more than ten minutes before he slowly regained his senses.

At this moment, the swelling on his palm had also subsided a little. The remaining medicinal properties of the misty spirit Heart Flower had been healing the injuries on his palm.

However, it was obvious that the fracture had not been completely cured. Xia ruofei could still feel the sharp pain in his palm.

After resting for a while, his spiritual power had recovered slightly.

Hence, with a thought, a spirit Heart Flower petal from the Tupperware on the stone platform floated up and landed accurately on his slightly swollen palm.

The petals quickly melted when they came into contact with his skin.

Xia ruofei felt a comfortable chill in his hand and the pain was reduced.

He stood up and walked to the stone bed. After climbing onto the bed, he sat down cross – legged on the Jade futon and began to circulate the cultivation method of the “great Dao formula”.

Perhaps it was because the true Qi and mental energy in his body had been greatly consumed, but at this time, his body was like a sponge, greedily absorbing the rich spiritual energy in the space.

To Xia ruofei, it was a happy thing to be able to cultivate in the space without any worries.

The “great Dao Arts” was a top – notch technique and the spiritual Qi in the space was so rich. Hence, Xia ruofei’s cultivation efficiency was very high. As he continued to practice the technique, the true Qi in his dantian gradually filled up and the recovery speed of his mental power also increased.

When Xia ruofei finished his cultivation, he realized that the injury on his palm had basically healed.

In fact, if the spirit Heart Flower petals that were consumed during the entire process were given to old man Liu, his tumor would probably disappear on the spot.

Of course, Xia ruofei did not think that it was a waste at all.

His gaze fell on the ancient jade talisman on the stone platform, and a satisfied smile appeared on his face.

At this moment, he was at least 70 – 80% recovered, even if he was not fully recovered.

Xia ruofei jumped off the stone bed and walked to the stone platform in a few steps. He reached out and picked up the Jade talisman.

The Jade talisman felt very warm to the touch. Its simple appearance looked similar to the earth and human Jade talismans from before, but the patterns on it were more complicated.

Xia ruofei fondled with the Jade talisman for a while before putting it into his pocket and walking out of the cave.

Although he had already obtained the ‘heaven’ jade talisman, Xia ruofei still needed to perfectly engrave the array patterns on the Jade talisman in order to obtain the inheritance.

After the “extreme challenge”, Xia ruofei was still mentally exhausted even though his body had almost recovered. The array patterns on the Jade talismans were usually difficult and could not be completed in one go. Hence, Xia ruofei did not start learning the array patterns on the Jade talismans.

You can’t eat hot tofu in haste.

Xia ruofei patrolled around the mountain sea realm and saw that Xia Qing had arranged the free laborers ‘work in an orderly manner. He did not go over to disturb her and directly returned to the outside world with a thought.

It was already dark outside. Xia ruofei had been busy upgrading the space and did not even have dinner. In addition, his body was almost exhausted in the cave, so he felt his stomach empty.

Chapter 2439 The heaven jade talisman (2)

So, he strolled to the backyard, ready to find something to eat in the kitchen.

However, he was discovered by Wu Qiang as soon as he appeared in the backyard. When he found out that Xia ruofei was looking for food, Wu Qiang quickly called his sister – in – Law, Wu Xiujuan, out.

Wu Xiujuan immediately went to the kitchen to prepare food for Xia ruofei.

Xia ruofei didn’t want to trouble everyone, but he couldn’t help but smile bitterly at the scene. Fortunately, it wasn’t too late. Wu Qiang and the others hadn’t rested yet, so it wasn’t too much trouble.

Xia ruofei asked Wu Xiujuan to prepare some light side dishes and some plain porridge.

After slurping down two bowls of hot porridge, Xia ruofei felt much better.

He bade Wu Qiang and the others farewell and returned to his courtyard.

Although he had taken a shower before entering the medium, the clothes he had just changed into were drenched in sweat when he unlocked the heaven jade talisman. At this moment, his body was also sticky.

Hence, Xia ruofei immediately went to take a shower before returning to the bedroom. He laid on the bed and studied the heaven jade talisman, carefully studying the formation patterns on it.

However, Xia ruofei did not try to carve it immediately. He only studied it for a while and had a general understanding of the array pattern on the Jade talisman. He also had a direct understanding of the difficulty of carving it. Then, he put the heaven jade talisman into the spirit map space and lay down to have a good sleep.

The next day, Xia ruofei had planned to start trying to carve the array pattern of the “heaven” jade talisman at home. However, he received a call from manager Lu early in the morning, saying that elder song wanted to see him.

Xia ruofei guessed that it was about Liu haojun, so he immediately agreed.

He didn't let Wu Qiang drive, but drove the Land Rover to the song family's old house.

Although Xia ruofei's car often entered and left the song family's house, he was stopped twice by the security guards for inspection and verification. He was only allowed to pass after confirming his identity.

Furthermore, Xia ruofei could clearly feel that the security around the song family's residence had increased. He knew that this might be a chain reaction caused by song Qiming's assassination. Especially when he knew that the mastermind behind this was a direct descendant of the Liu family, elder song would naturally be more alert and arrange for more people to protect him.

Soon, Xia ruofei saw elder song in the dining room of the song family's old residence.

The old man was used to waking up early, but he would always arrange a certain morning exercise program. After the morning exercise, he would take a break to read the latest newspapers and documents before having breakfast.

Elder song saw Xia ruofei and asked with a smile, “Ruofei, have you had breakfast?”

Xia ruofei grinned and said, “I was just about to get up and eat!” Manager Lu called me ...”

Manager Lu couldn't help but laugh when he saw this. He personally got up and took a set of cutlery from the side and said, “Then come over and eat! Wouldn't it be better to have Breakfast with the Chief?”

Xia ruofei didn't pretend to be polite. He sat on the seat to the left of elder song and took a sip of milk. Then, he grabbed two pieces of bread, added bacon to it, and started eating.

Elder song was happy that Xia ruofei did not regard him as an outsider.

He was almost done eating but he was not in a hurry to get up. Instead, he smiled as he watched Xia ruofei eat.

Of course, Xia ruofei did not treat this place as his own home. He ate his breakfast slowly. He quickly ate some bread and drank a glass of milk. Then, he used a napkin to wipe his mouth and said, “Grandpa song, I'm done!”

Elder song nodded, and manager Lu immediately motioned for the service staff to come and clean up the dishes.

Xia ruofei and elder song sat at the table and chatted. Manager Lu, after instructing the service staff to clean the table, found an excuse to leave. The others naturally left as well.

“You should’ve heard the news, right?” elder song asked. Liu haojun is dead. ”

Xia ruofei nodded calmly and said, “The news spread all over the capital yesterday. If he died, then he died! He’s asking for it, and he deserves it!”

Eccentric song nodded. He naturally wouldn’t care much about the life and death of a junior from an opposing family.

Eccentric song revealed a profound smile. “The Liu family is making an announcement to the world ...”

Elder song then looked at Xia ruofei and asked, “Ruofei, you’ve been in contact with old Liu many times. What do you think of him? What do you think of him?”

Xia ruofei replied without thinking, “a formidable person!”

“You’re quite direct!” Eccentric song laughed. How do you know?”

“That person from the Liu family is able to reach such a high position, so he naturally has very strong abilities.” Xia ruofei said, “and his style of doing things is very distinctive. Everything he does is for his family’s benefit.”

At this point, Xia ruofei revealed a strange expression and said, “But ... I think this kind of person is quite scary! In the face of the family’s interests, he could sacrifice anything. In his eyes, it might only be the size of the interests. There was nothing that could not be sacrificed. If there was, it was because the benefits that could bring him were not enough. Besides, if even family ties are gone, then what’s the point of living?”

“Your evaluation of old Liu is quite accurate, ruofei,” laughed elder song. We’ve known each other since we were young, so I know him quite well. He’s been like this since he was young. ”

Speaking of this, eccentric song couldn’t help but reveal a trace of nostalgia, sighing, “However, this characteristic of his was actually quite good in that era, especially when he worked in the Army. In the face of the ever – changing battlefield environment, he needed to quickly make the most favorable judgment for his side. There are very few people who can be as calm as him and directly sacrifice the soldiers he has led for many years. Thus, he also had outstanding military achievements at that time!”

Xia ruofei nodded in agreement and continued, “Maybe ... But at least in this era, such a person is a little scary ... The day you went to the Liu family, I talked to the old man ... He’s really ... Terrifyingly calm!”

“Let’s not talk about this!” Elder song laughed. Ruofei, I called you here because of Liu haojun. After all, the news you got was only hearsay, while my source is more reliable, so I can confirm for you that Liu haojun is indeed dead. ”

Xia ruofei nodded and waited for elder song to continue.

"There's one more thing," elder song continued, "about the treatment you gave old Liu ... I know you've been controlling his recovery speed. Otherwise, with your abilities, he would have been alive and kicking by now! When I saw him at the Liu family's house that day, he still looked sickly. I knew ..."

"Grandpa song, I don't have that kind of ability." Xia ruofei smiled and said, "it's mainly because old master Liu's condition is very complicated and it's a dangerous pancreatic tumor. Naturally, he won't recover so quickly."

Elder song smiled and said, "actually, I just wanted to remind you that it's okay to delay the treatment process a little, but don't make it too obvious. Otherwise, not only will the Liu family not be grateful, but they might even hate you. And in the end, you still have to cure him. When that time comes ..."

Elder song knew that Xia ruofei had been delaying the treatment to fight for the song family's interests.

This time, the Liu family was caught off guard by the Liu haojun incident. The song family had already gained a lot from this incident, but the Liu family had suffered heavy losses and even lost a direct descendant like Liu haojun. The Liu family would definitely not be in a good mood. They might not bite anyone, but it was very likely that they would vent their anger on Xia ruofei.

Therefore, elder song felt that he needed to let Xia ruofei know so that he wouldn't be treated badly.

Chapter 2440 Unlocking the Jade talisman (1)

Elder song's kind reminder warmed Xia ruofei's heart.

However, he was also very clear that there was already a Rift between him and the Liu family. Even if he sped up the treatment, the Liu family would not be grateful.

This was also why Xia ruofei had defined this treatment as a pure deal from the beginning.

He directly took the pharmaceutical Group from the Liu family, and the song family also got a lot of benefits. For the Liu family, this was no different from cutting their flesh.

In addition, the conflict between Xia ruofei and Liu haojun had been going on for a long time. The reason why Liu haojun went to the extreme this time was because he had failed in his battle with Xia ruofei and ruined his future.

It was basically impossible for them to live in peace with the Liu family.

Of course, Master Song was also thinking for Xia ruofei. Even if they could not make peace, at least they did not have to offend the Liu family. After all, a family of the Liu family's scale, even if they had suffered some losses in several confrontations, was still a huge force. Moreover, as long as old master Liu was still alive, the losses of the Liu family would not be a big deal. In elder song's eyes, Xia ruofei did not need to go against such a big family.

This was also why elder song had used Liu haojun's matter to negotiate with elder Liu. He had been determined to draw Xia ruofei's name out of this matter.

Xia ruofei nodded, "I understand, Grandpa song ..."

Although Xia ruofei didn't agree with elder song's point of view, he still appreciated the concern of an elder.

In fact, as his cultivation level increased, Xia ruofei's mentality was also slowly changing. In his mind, the Liu family's threat was far less than those in the world of cultivation. He also did not really take the Liu family, who seemed to be invincible to others, seriously.

Elder song saw that Xia ruofei didn't want to say more, so he smiled and didn't mention it again.

Then, elder song asked about Xia ruofei's company and the construction of the club in the capital.

When he heard that the club's basic construction was completed and would be ready to go into operation soon, elder song said with relief, "Xiao Rui has changed a lot recently. In the past, this child had nothing to do every day, but now, he's starting to look like he's doing something serious!"

Xia ruofei smiled. "Grandpa song, Xiao Rui is a good person. He just needs a chance to prove himself."

Actually, there was something that Xia ruofei did not say. Song Rui's elders were all too outstanding. They were simply dazzling. It was actually very stressful to grow up in such a family.

In song Rui's words, if they did well, they would be the help of the family and would have no sense of existence at all. If they did not do well, they would be like mud that couldn't hold up the wall and would be pointed at every day.

"It's Xiao Rui's good fortune to have met you as a friend ..." Elder song sighed.

"Please don't say that." Xia ruofei said, "Xiao Rui has helped me a lot too. For example, I didn't do anything for the club this time. It was Xiao Rui, brother Zhao Yongjun, and a few others who were busy."

Elder song waved his hand. "To you, the peach blossom banquet is just a small part of the fun. You're an entrepreneur now. How can you just spend all your time with them?"

Xia ruofei said humbly.

What a joke! With his net worth, he was naturally a rich man in the eyes of ordinary working class people, but he was still not enough to enter the eyes of the person in front of him. Even now, the scale of the song family's Financial Group was far from what Xia ruofei's paradise Corporation could compare to, not to mention the projects that could easily cost tens or even hundreds of billions before elder song retired.

A few days ago, Xia ruofei had taken the time to check his assets. Other than the peach blossom company, his overseas account now had about 2.5 billion US dollars. Most of it was from the "black – Market" trip to Africa.

However, even so, all of his assets were only converted to about 10 billion Chinese dollars. Even among private enterprises, it was far from the standards of the first group, not to mention that there were many giant state – owned enterprises in China.

The old and the young sat in the dining room and chatted for a while. Then, elder song pulled Xia ruofei to the study room to play two games of chess. He also asked Xia ruofei to stay for lunch at the song family's house before letting him go home.

Manager Lu couldn't help but feel envious.

Elder song admired Xia ruofei from the bottom of his heart. Even among the direct descendants of the song family, few could compare to Xia ruofei in admiration.

Manager Lu also had a good impression of Xia ruofei. Xia ruofei could be said to be successful at a young age and had the full support of people like elder song. However, he was never arrogant and had a calmness that did not match his age.

What was even more valuable was that Xia ruofei had never used elder song's influence for his own convenience. Although he was close to the song family, he had always maintained a gentleman's friendship. His magnanimity and breadth of mind had already surpassed most people.

Therefore, when he personally sent Xia ruofei out, manager Lu's attitude towards Xia ruofei was much warmer.

"RUO Fei! Next time, remember to bring me two sets of jaded skin ointment!" Manager Lu smiled and said, "the higher – ups in my family have already given me a death order. If I don't complete the task, I can't enter the house!"

Xia ruofei laughed and said, "manager Lu, it's just a small matter. You can just say the word!" How about this! Please send me your address and auntie's contact information. I'll arrange for someone to send it to Auntie regularly!"
