

God tier Farm 2621

Chapter 2621 A huge surprise (1)

With the Liu family's coordination, the peach source didn't have much to wait at the Beijing International Airport. The car was pushed out as soon as it was ready. Then, it taxied to the end of the runway and was granted permission to take off immediately.

The streamlined body of the plane glistened under the sun, and after a high – speed slide, it lightly leaped into the sky.

After a short climb, paradise soon entered a stable cruising altitude.

This cruising altitude was much higher than an ordinary passenger airliner. At the same time, the airflow at this altitude was the most stable, and there would basically be no major bumps.

The continuous flight of more than ten hours was very boring, so Xia ruofei took Liu An's suggestion. After entering the cruising altitude, they returned to the compartment at the end of the cabin to rest.

Other than Xia ruofei's personal room, which had a real soft bed, all the seats in the cabin could be laid flat and become a single bed.

Because the take – off was in the morning, Liu Kuan did not want to lie down and rest. Xia ruofei asked the random flight attendant to serve him and then went to the compartment at the end of the cabin.

When Xia ruofei was in the Army, he had learned a very good skill. Whenever he needed it, he could fall asleep very quickly, even if he had just woken up in the morning. This was also a skill that special combat soldiers had to master. After all, the battlefield environment was very harsh, and the time to rest was generally not very long. If one could not sleep as soon as their head touched the ground, they basically would not get effective rest.

Even now, he could still fall asleep within three minutes of lying down.

Xia ruofei sat on the bed and browsed the news on his phone for a while. The WiFi speed on the plane was quite good, and it was easy to open the picture and text web page.

After watching the news for a while, Xia ruofei threw his phone in the drawer by the bed and fell asleep.

It was not until noon that the gentle wake – up bell at the head of the bed woke him up. It was the flight attendant who had asked him to get up for lunch.

Xia ruofei got up from his bed and went to his personal bathroom at the end of the cabin to wash his face. Then, he pushed the door open and walked out.

"Mr. Xia!" Liu Kuan stood up and greeted him.

"Uncle Liu, you didn't rest?" Xia ruofei asked, chuckling.

At first, Xia ruofei wanted to call Liu Kuan "uncle Kuan" like Liu Qunfeng did. Later, considering that Liu Kuan was old enough to be his grandfather, he changed it to "uncle Liu."

"I'm old," Liu Kuan said. "I don't sleep much, and I really can't fall asleep in the morning."

Xia ruofei nodded and asked, "uncle Liu, are you tired?" Why don't you take a break after dinner? I'll just take a nap."

"Your paradise is very comfortable," Liu Kuan said with a smile. "You won't feel tired even if you fly for a long time."

At this moment, the flight attendant came over with a tray and served a sumptuous lunch for the two of them.

In fact, at an altitude of 10000 meters, people's taste bud cells would become a little slow, and their appetite would also decrease. However, facing the lunch carefully prepared by the flight attendant, the two still ate a lot.

As the flight attendant was clearing the plates, Xia ruofei casually asked, "How long have we been flying?"

The flight attendant bowed slightly. "Mr. Xia, we've been flying for about five hours. According to the plan, the plane will land in Brian, Australia, for refueling in about four hours."

Xia ruofei nodded and said, "okay, pack up and eat quickly!" It's been hard on everyone this time. "

"Thank you, Mr. Xia!" The flight attendant said.

After the meal, Xia ruofei did not return to her room immediately. Instead, she sat in the middle of the cabin and chatted with Liu Kuan.

At this altitude, the scenery outside the porthole remained unchanged. Additionally, the airplane was very stable. Sometimes, Zhang tie even felt that the airplane was still. Although the comfort level of a private jet was extremely high, it was very boring to sit in it for a long time.

So, after sitting for a while, Xia ruofei returned to his room at the end of the cabin to rest. As for Liu Kuan, he didn't seem to be sleepy at all. After Xia ruofei went back to her room, he found a movie and watched it with great interest.

When Xia ruofei woke up again, it was already dark outside the porthole and he could not see anything.

It would take about ten hours to fly from Beijing to Brian at the speed of the peach source. It took off from Beijing at about 8:30 in the morning. Taking into account the time difference, it should be around 9 or 10 O' clock in the evening.

The plane had already begun to slowly descend and was about to land in Brian.

This was the reason why the flight attendant had woken Xia ruofei up.

Xia ruofei walked out of the room, sat down, and fastened his seat belt.

About half an hour later, the plane landed smoothly at the airport and was led to a private plane by a guide car. The ground crew was already ready. After the plane stopped and the car closed, someone immediately came to refuel the plane.

The plane wouldn't stay in Bolton for long. It would take off after a short rest after refueling. Hence, even though Xia ruofei's Australian visa had not expired, he did not enter the country in rainboas. He only followed Captain Liu An down to the plane for a round of inspection and to get some fresh air.

Soon, the plane took off again after refueling and lightly jumped into the night sky of Bolton.

There were about five hours left on the flight. Xia ruofei did not return to the room at the tail of the cabin. Instead, she sat down and chatted with Liu Kuan.

The plane flew steadily in the night sky. Below them was the vast and boundless South Pacific Ocean. Looking out through the porthole, it was pitch – Black everywhere. Nothing could be seen.

Xia ruofei was very confident in the Gulfstream G650's performance and the professional abilities of the two pilots. Of course, even if there was a small probability of an accident, Xia ruofei had enough reaction speed to hide in the spirit map space.

As time passed, the cabin, which had been professionally soundproofed, was very quiet. The sound of the engine could not even be heard clearly.

Finally, when the sky outside the porthole began to brighten, Captain Liu An's slightly tired voice came from the cabin broadcast, ""Mr. Xia, we're about to arrive at green cloud Island. Today's weather is good. From this altitude, we can already see the airport runway of green cloud Island, which is on the right front of the plane. Please fasten your seat belts and try not to walk around in the cabin during the landing. "

When Xia ruofei heard that they had finally arrived at cyan Cloud Island, he couldn't help but feel excited. It was indeed uncomfortable to be on a plane for such a long time. Even if Xia ruofei's physical strength was far beyond that of ordinary people, mental fatigue was inevitable.

He looked ahead through the right porthole of the plane.

The plane had descended by a lot. Xia ruofei's eyesight was much better than the average person's, so he saw the island that was embedded in the blue sea like an Emerald at first glance.

In fact, there were many other islands of different sizes scattered around the island, some close and some far away.

However, there was a 3000 – meter long runway on green cloud Island. In order to build this runway, the Liu family had specially filled the sea and "dug" out such a runway. Therefore, about one – fifth of the runway extended into the sea, which was very conspicuous from the sky.

After flying for more than ten hours, it was morning when they arrived. The sun shone on the sea and the scenery was magnificent. In addition, the plane was turning right and entering the five sides. Green cloud Island was just on the side of the plane, so Xia ruofei was very interested in admiring it through the porthole.

As the plane continued to turn, Xia ruofei's view of Qingyun Island and the surrounding islands also slowly changed.

At a certain angle, Xia ruofei's eyes could not help but narrow. There was a flash of surprise in his eyes.

From that angle, Xia ruofei realized that the position of cyan Cloud Island and the surrounding islands were actually in harmony with the great Dao of heaven and earth. If the cyan Cloud Island and the islands around it were seen as a whole, they would have an amazing sense of beauty.

Almost in an instant, Xia ruofei could confirm that this green cloud Island was actually a natural formation. No wonder he felt that the green cloud Island was full of vitality at first sight. It seemed to be a paradise.

Xia ruofei's training these years was not in vain. His ability to maintain his composure had improved a lot since he had just left the Army. Therefore, he didn't show any surprise. After all, Liu Kuan was sitting next to him. If he showed his surprise or ecstasy, Liu Kuan would definitely notice.

At that time, the Liu family would probably change their mind.

The uniqueness of cyan Cloud Island was most obvious at that angle. After the plane continued to turn, Xia ruofei looked over again and found that the breathtaking feeling had disappeared. He could not help but be amazed.

...

Soon, the plane turned five times, facing the direction of the runway. At this time, green cloud Island was directly in front of the plane, and it could no longer be seen through the side porthole.

Xia ruofei resisted the urge to go to the cockpit to observe the island from the sky. He sat in his seat patiently and waited for Yingying to remind him that he must not show any signs of abnormality, or else he might fail at the last step.

After realizing that the cyan Cloud Island was a natural formation, Xia ruofei did not hesitate for even a second. He secretly made up his mind to get the cyan Cloud Island into the Suan ni, a spiritual Island with the potential to become a paradise. It would be a waste if it fell into the hands of the Liu family.

Of course, Xia ruofei also knew that at times like this, he had to be calm. Any abnormal behavior would be noticed by the smart Liu Kuan and secretly recorded.

Therefore, he didn't go to the cockpit. Instead, he sat quietly in his seat and waited for the plane to land.

Chapter 2622 Visiting the Green cloud Island (1)

The airport on blue cloud Island was not open to the public. Usually, there would only be one or two planes that took off and landed here to transport personnel or supplies.

However, the facilities at the island's airport were very advanced. It even supported three types of blind landing, which meant that in theory, the plane could land directly in the automatic pilot mode without any need for manual operation.

The airports that supported type 3 blind landing were generally more advanced. Only a few key airports in China had such conditions. Of course, due to the complexity of the take – off and landing phase, most pilots would choose to land manually. Even if the airport supported three types of blind landing, few people would use this function.

In fact, the China Civil Aviation Administration had a relevant regulation that the pilot had to operate the landing manually. This was to avoid any problems or other accidents during the landing phase of the autopilot and blind landing guidance, which the pilot could not deal with in time. After all, the height and speed of the plane were relatively low during the landing stage. If there was an accident, there would be very little space for emergency treatment.

Captain Liu An also chose to leave the autopilot and land manually.

Today's weather was very good. The ground was calm and the visibility was very high. Such a landing was a piece of cake for the experienced captain Liu An.

The plane landed smoothly on the runway of Qingyun island's airport. Xia ruofei and Liu Kuan, who were sitting in the passenger cabin, only felt a slight shake of the plane. There was almost no bump during the landing process. The plane was already taxiing at high speed on the runway.

With the help of the anti – thrust and automatic brakes, the plane's speed rapidly decreased and it quickly left the runway from the nearest exit.

Paradise was the only plane in the entire airport, and the airport even sent a guide car to lead the way and park paradise at the plane.

In fact, Xia ruofei felt that there was no need to do so. The airport was very small and did not have any complicated gliders. In addition, there were no other planes. The process of gliding after landing could not be any simpler.

After the plane stopped and the car closed, the flight attendant quickly opened the cabin door and put down the accommodation ladder. Captain Liu An also came out of the cockpit and went down to the side of the plane to wait.

Xia ruofei and Liu Kuan got up and walked to the cabin door. Under Liu Kuan's insistence, Xia ruofei stepped out of the cabin first.

He was surprised to see that the tarmac was covered with a red carpet that extended all the way from the ramp. At the end of the red carpet, there were three cars parked. Two of them were black Mercedes – Benz cars, and one was a familiar Toyota Elfa commercial car. A few burly Men in Black suits and sunglasses were waiting by the car.

Beside the accommodation ladder, in addition to Captain Liu An and the flight attendants who had gotten off the plane in advance, there were five or six men in suits and leather shoes. Except for a middle – aged man with brown skin who looked like a local, the others all looked Chinese.

The leader was about 45 or 46 years old and was slightly chubby. Perhaps because he had been working here for a long time, his skin was a little dark. In addition, a strand of hair from the "local support Center" was dancing in the sea breeze, which looked a little funny.

The bald middle – aged man saw Xia ruofei getting off the plane first and was slightly stunned. Then, he quickly came to his senses and took two steps forward. He extended his hands and said enthusiastically, "Hello! Welcome to the blue cloud Island! I'm Liu Qingfeng, the chief supervisor of the green cloud Island project. "

“Hello, President Liu.” Xia ruofei and Liu Qingfeng lightly shook hands and said indifferently.

Liu Kuan, who got off the plane after Xia ruofei, said, “Qingfeng, this is Chairman Xia ruofei of the Paradise Corporation. You can call him Mr. Xia.”

“Yes, uncle Kuan!” Liu Qingfeng said respectfully, and then greeted Xia ruofei again, “Mr. Xia, welcome! Welcome!”

Although he had only received a simple notice from his family in advance, Liu Qingfeng had already seen that the protagonist this time was obviously not the highly respected Liu Kuan, but the young man in his 20s in front of him.

Although in Liu Qingfeng’s opinion, the status of the chairman of the peach blossom company was completely different from that of the Liu family, how could he, a small project leader, dare to neglect someone who was treated so politely by Liu Kuan?

A few people behind Liu Qingfeng also came forward to greet him. Xia ruofei shook hands with them one by one, while Liu Qingfeng was responsible for introducing them.

These people were all responsible for a certain aspect of the huge project on green cloud Island. As expected, they were all Huaxia people, and should be the elites of the Liu family.

There was also a middle – aged brown man named benilatti. He was a local of ponautu and had joined the construction project of green cloud Island eight years ago. His main responsibility was to coordinate various relationships. Of course, as the defense of blue cloud Island became stronger and stronger, some of the local forces in Carnelian no longer dared to covet blue cloud Island. There were fewer and fewer things that needed to be coordinated and settled, so in the past two years, the focus of binirati’s work was mainly on material procurement, worker recruitment, and other aspects.

After all, this place was isolated overseas. If all the required materials were transported from China, the cost would be much higher. Therefore, if the conditions allowed, they would purchase what could be purchased nearby, including some building materials. As long as the technical standards met the requirements, they would also be purchased locally.

In addition to some core projects that needed to be kept secret, the construction of such a large island also required a lot of workers. The salary of the local indigenous people was much lower than that of the domestic workers, so this project also recruited a large number of local workers.

Of course, these workers were restricted in their area of activity. They were forbidden from approaching some of the core areas that involved the island’s defense.

Bainilatti was currently putting a lot of energy into managing these workers.

Speaking of which, he was also one of the few people with real power in the construction project of green cloud Island.

After a simple welcoming ceremony, Liu Qingfeng enthusiastically led the way and invited Xia ruofei and Liu Kuan to get in the car at a parking lot not far away.

A group of people walked on the red carpet to the car. Xia ruofei and Liu Kuan naturally sat in the Toyota Elfa. Liu Qingfeng also sat in the front passenger seat of this car, while the other senior executives sat in the remaining two Mercedes – Benz.

“Uncle Liu, please arrange for my flight crew to take a rest after a long flight,” Xia ruofei said.

“Don’t worry, Mr. Xia. I’ve already given my orders. They will make the necessary arrangements.” Liu Kuan said.

“In addition, the plane needs to refuel. There should be a certain reserve at the airport of Qingyun Island, right?” Xia ruofei said, “how much should it be? I’ll settle the bill later.”

“You’re our distinguished guest,” Liu Kuan quickly said. “It’s normal for the plane to refuel here, so how can we ask you to pay?” Besides, didn’t I take the plane too? Do I still have to pay for the plane ticket?”

Even if paradise was fully filled, it wouldn’t cost much. Hearing Liu Kuan’s words, Xia ruofei didn’t refuse. He smiled and said, “Thank you, then.”

“You’re too kind!”

At this time, Liu Qingfeng turned his head and respectfully asked, “Mr. Xia, uncle Kuan, please give us your instructions on what to do next.”

“Mr. Xia is here for an inspection,” Liu Kuan said lightly. “I’ll show you around the island first. You have to go to all the places.”

“Then ... What about Mount Qingyun ...” Liu Qingfeng was stunned for a moment and asked.

“Did I not make myself clear enough? We have to go to all the places!” Liu Kuan said coldly, “remember, for Mr. Xia, there are no secrets on the island!”

Liu Qingfeng’s heart trembled slightly, and he quickly said, “Understood!”

“Mr. Xia, do you think this arrangement is okay?” Liu Kuan turned his head and asked.

Xia ruofei nodded and said, “that’s good. Let’s do this!” In addition, I want to do a more comprehensive survey. It would be best if we can fly around the island ... I wonder if there are helicopters on the island?”

“There are! There are!” Liu Qingfeng quickly said, “the helipad is at the project department building, and the pilot is also on standby. You can take off at any time if you need to. ”

Xia ruofei said, “then let’s do it after the tour!” If it’s convenient to arrange!”

“Convenient! It’s convenient!” Liu Qingfeng quickly said.

The airport of Qingyun Island was very small, and the car soon slowly left the tarmac and continued to drive forward along the only asphalt road. Liu Qingfeng was responsible for explaining.

Green cloud Island was about three kilometers long from east to west, and two kilometers wide from north to south. There was a small mountain in the middle of the island, which had been named green cloud Mountain.

In addition, the island had a rare source of fresh water.

Xia ruofei realized that after years of construction, the green cloud Island had begun to take shape. There was a natural deep – Water port in the North, and a small dock had been built. The airport on the east side had also been put into use. A large part of the three – thousand – meter long runway was filled with land and extended into the sea.

There was also a large building and several villas of different sizes on the island, forming a Manor.

The building was currently being used by the project department. After the entire project was completed, this place would become an apartment – style residential building.

In addition, the interior of the small mountain in the middle of the island had almost been hollowed out, and an impregnable refuge had been built.

...

When the car drove into the fortification, Xia ruofei saw that the thick alloy gate was one or two meters thick. The inside of the mountain was a fortress made of reinforced concrete. At the same time, it stored a large amount of supplies. If there was any danger, the Liu family could quickly hide in the fallout shelter. After the alloy gate was locked, they could be completely isolated from the outside world. The supplies stored were enough to support hundreds of people for two years.

After looking around, Xia ruofei finally knew where the Liu family's money had been spent. The fallout shelter alone probably took up 70% to 80% of the entire project. This was only what could be seen. A lot of money had been spent, and it could not be seen from the outside.

Of course, these things were not Xia ruofei's concern. After the tour, he immediately mentioned that he wanted to take a helicopter and have a good look at the island.

This request was very reasonable in Liu Kuan's eyes. He immediately told Liu Qingfeng to prepare a helicopter and offered to go with Xia ruofei.

Xia ruofei smiled and said, "uncle Liu, you're not young anymore. The helicopter is so noisy and there's a strong wind. It's not stable. Don't go up there. I'll just fly two rounds around the island and come down!"

Liu Kuan thought about it and felt that Xia ruofei's words made sense, so he nodded and said, "Mr. Xia, then I'll be lazy. I'll wait for you downstairs. Qingfeng has prepared a welcome banquet. You can come back as soon as possible after you're done!"

"Alright!" Xia ruofei said with a smile.

Soon, Liu Qingfeng had already asked people to prepare the helicopter, and the pilot was also Chinese.

This wasn't a small sightseeing helicopter, but a super Jaguar. This plane, which cost hundreds of millions of Chinese dollars, must have been responsible for transporting people and resources.

Xia ruofei boarded the helicopter. For the convenience of observation, he sat next to the helicopter pilot, in the co-pilot's seat. He quickly put on his headphones and waved to Liu Kuan, Liu Qingfeng, and the others in the distance.

The Super Jaguar rose slowly, then the nose of the plane lowered slightly and flew toward the east.

...

Chapter 2623 The Taixu xuanqing formation (1)

The helicopter pilot, who had long been instructed by Liu Qingfeng to pay great attention to this flight, respectfully asked after the plane took off, "Mr. Xia, where do you want to start?"

Xia ruofei said, "there's no specific purpose. Just fly two circles above the island. Then, we'll fly around the island a few times. I'm just looking around!"

"Understood!" After the pilot finished speaking, he lifted the helicopter's main matrix lever and pushed the control lever forward at the same time. The helicopter began to accelerate and fly forward.

Even if they went straight to the target, the pilot would not be able to notice anything. However, Xia ruofei did not do so out of caution.

He wouldn't show any special interest until he got hold of the island. Otherwise, with Liu Kuan and old master Liu's experience, the Liu family might change their mind.

The helicopter first flew over the sky of green cloud Island. Because the island was not very large, such a flight route could basically have a panoramic view of the entire Island.

Xia ruofei also pretended to be interested and pointed at the buildings on the ground from time to time to ask the pilot some questions.

Following that, the helicopter pilot followed Xia ruofei's instructions and flew the Super Jaguar out of the vicinity of Qingyun Island. Then, it started to fly around the periphery of Qingyun Island.

Xia ruofei's eyes revealed a trace of anticipation, but he did not show any abnormality. Even his sitting posture did not change. He was still leaning on the seat with his right hand on his side of the porthole, his fingers tapping rhythmically.

The helicopter flew slowly around Qingyun Island and gradually approached the angle that Xia ruofei had observed on the peach source in the morning. It was almost at an angle of about 60 degrees from the extension of the airport runway. As the runway was 3000 meters long as a reference, it was easy to judge.

As the helicopter got closer to the best observation point, Xia ruofei started to focus. He scanned the surroundings and quickly formed a three – dimensional image of Qingyun Island and the nearby islands. He then combined the information with the location and did a comprehensive analysis.

Xia ruofei's attainments in the Dao of formations were no longer ignorant. He had already digested and absorbed the many ancient books on formations in the Jade talisman of inheritance. Although he had not put it into practice and could barely be called a formation master, he had a rich reserve of formation theories.

The shape and position of the island, as well as the surrounding islands and reefs, were undoubtedly in line with the great Dao of heaven and earth. Xia ruofei's intuition was very accurate on this point. He had already determined it at first glance on the peach origin.

Now that they were flying in a helicopter again at a lower altitude, the details were more complete. Xia ruofei was more confident in his judgment.

Finally, the helicopter slowly flew over the best observation point. At that moment, the three – dimensional image in Xia ruofei's mind was completely formed and it matched one of the formations that he had mastered.

Even though Xia ruofei was mentally prepared and had a good control of his energy, he still could not help but open his mouth slightly at this moment. His pupils shrank and he revealed a shocked expression.

However, the pilot was focused on operating the helicopter. In addition, Xia ruofei was wearing a big headset and her face was turned to the right, so the helicopter pilot did not notice at all.

Xia ruofei quickly adjusted his emotions. Even when the helicopter flew over the best observation point, his expression did not change much.

But in fact, at this moment, his heart was already in turmoil!

Although Xia ruofei was still looking out of the cabin, if one observed carefully, one would notice that his eyes were rather empty. This was because he was completely immersed in the three – dimensional image in his mind and was constantly comparing it with a large array recorded in the ancient array book.

The Taixu xuanqing formation!

It was a comprehensive array that was listed as an important position in the array DAO Records. With Xia ruofei's current array Dao cultivation, he was still far from being able to set up such a large array. According to the description in an array Dao ancient book, this array was usually set up in important places by sects with very strong overall strength. In history, it had even become a sect – protecting array.

It would take a lot of effort to set up such a complicated array, but now there was a natural one. Was this just the work of nature? Xia ruofei couldn't help but feel suspicious.

However, no matter how he looked at it, the blue cloud Island and the surrounding islands were all naturally formed. There were no traces of man – made at all. Moreover, in history, all the people who lived here were local Aborigines, mainly brown people. Could it be that there were some cultivation experts among these people?

Based on Xia ruofei's understanding of the cultivation world on earth, the inheritance of array Dao was mainly from the eastern cultivation world. There were relatively few cultivators outside of China, and there seemed to be no records of them cultivating array Dao.

Unless a cultivator from the East found this place and set up the Taixu xuanqing formation.

However, based on Xia ruofei's current observation, he could not find any traces left behind by the cultivators.

During the tour, Xia ruofei had released his spiritual power from time to time to investigate. There was nothing unusual on the island. Of course, there were many traces of man – made work, but they were all left behind by the Liu family after they had developed the island. There were no traces of cultivators.

Chapter 2624 The Taixu xuanqing formation (2)

Moreover, although the clear sky Island and the surrounding islands basically fit the layout of the Taixu xuanqing formation, some changes still needed to be made in order to let the formation play its role.

The most important thing was that the Liu family was building an airport on blue cloud Island, and the runway also formed an important part of the formation.

It could be said that if the runway had not been built, even if Xia ruofei were to observe everything from the same observation point, he might not have been able to sense the layout of the natural formation immediately. Of course, if Xia ruofei had stayed on the island for a longer time, he would have noticed something.

After all, the main body of the natural formation had already taken shape. Any subsequent changes would only be modifications to the foundation of the natural formation so that the formation could fully display its function.

From this angle, this great array was very likely to be the work of nature.

Thinking of this, Xia ruofei couldn't help but be amazed.

The Taixu xuanqing formation was a very powerful comprehensive formation. Not only was its defensive ability extremely strong, but it also had a certain offensive attribute. In addition, the formation also had the effect of gathering spiritual energy. After operating for a long time, as the core Island of the formation, the concentration of spiritual energy on the green cloud Island would gradually increase, and even become a blessed land.

The most important point was that once the Taixu xuanqing formation was formed, there was even a position where a teleportation formation could be set up.

This was the legendary Space Array.

There were many requirements to set up a teleportation formation, including some special materials. With Xia ruofei's current condition, it was a little difficult to set up a teleportation formation. However, the fact that there was a space for the teleportation formation in the formation itself was already quite unbelievable.

This was also an important reason why in the ancient cultivation world, some sects used this array as a sect – protecting great array. The Kasaya had extremely strong defensive capabilities, had offensive and spirit – gathering attributes, and could also be used to arrange a teleportation array. This almost satisfied all the needs of a sect's great array.

When Xia ruofei thought of this, he could not help but feel excited.

At this moment, the helicopter pilot asked, "Mr. Xia, we've already made a round. How do we fly next?"

"Adjust the course," Xia ruofei said calmly. "We'll go one more round in the opposite direction and then go back!"

"Alright!"

The pilot responded, then controlled the helicopter to nimbly change direction in the air and began to fly counterclockwise around the blue cloud Island.

When he returned to the best observation point, Xia ruofei's expression was still very calm. He did not show any signs of surprise. However, he still checked the positions of all the islands again to confirm the existence of this natural formation.

The helicopter slowly landed in the project building. Liu Kuan, Liu Qingfeng, and the others braved the strong wind caused by the propeller and waited on the tarmac on the roof.

Although they kept a safe distance, the wind brought by the helicopter's propeller still blew Liu Qingfeng's pitiful hair into a mess, making him look quite funny.

When Xia ruofei got off the helicopter, Liu Kuan and the others quickly came up to him.

"Mr. Xia, how do you feel after looking around?" Liu Kuan asked with a smile.

"Not bad! It's like a paradise, and the island's defensive measures are already very complete." Xia ruofei said.

His tone was very objective and did not reveal any bias.

Before they left, Grandpa Liu had told Liu Kuan to sound out Xia ruofei.

From the Liu family's point of view, naturally, they did not want Xia ruofei to choose the option of adding cash to clear sky Island. In fact, from old master Liu's personal point of view, he would rather Xia ruofei choose the 40% shares. Of course, in his mind, the first option was still the three billion dollar option.

However, if Xia ruofei chose Qingyun Island, old man Liu would also accept it. After all, it was his own proposal. Obviously, after weighing the three proposals, he felt that they were within his acceptable range and could show the greatest sincerity.

Old master Liu knew very well that as long as Xia ruofei chose one of the treatments, it meant that his life was saved. Even if Xia ruofei was tight-lipped and insisted that he was not 100% confident in the treatment, old master Liu's intuition told him that as long as he paid the price, Xia ruofei would definitely have a way to make him completely recover.

As for Liu Qunfeng and the others, as long as Xia ruofei didn't choose the 40% share, they could accept the other two options.

Liu Kuan had been on the plane with Xia ruofei for more than ten hours, and they had been visiting the island for two or three hours. However, Xia ruofei did not show any signs of accepting or rejecting the plan, which made Liu Kuan feel a little troubled.

The group left the roof and took the elevator down.

In the elevator, Liu Kuan thought for a moment, then asked, "Mr. Xia, what's the next arrangement? We'll listen to your orders."

Xia ruofei said casually, "just stay one night on the green cloud Island!" We'll leave tomorrow morning, but I hope to stay in Australia for a day. Uncle Liu, are you okay with this?"

"No problem! No problem!" Liu Kuan quickly said, "before we left, master told us to follow your instructions."

Xia ruofei smiled and nodded. "Then let's do this! By the way, chief Liu, is there any problem with our accommodation on the island?"

"Of course, no problem!" Liu Qingfeng quickly replied. Mr. Xia, we've already made the necessary arrangements. Your flight crew has also been properly settled. In addition, we've prepared some wine and food for lunch. Please do come along, Mr. Xia!"

"Then I'll accept your invitation!" Xia ruofei said with a smile.

Liu Qingfeng personally sent Xia ruofei and Liu Kuan to the room that had been arranged in advance for a rest, and then he ran to the dining room to follow up on the luncheon.

Xia ruofei and the rest were also resting in this building. In fact, the project department only used three floors. From the fourth floor onwards, they were all apartment – style houses. Some of them were luxuriously decorated for the purpose of entertaining important guests. Today, they were all used.

Xia ruofei took a simple shower and sat in his room to rest for a while. Liu Qingfeng personally came over to invite him to lunch.

During the banquet, Liu Qingfeng and the others naturally tried their best to curry favor with him. Xia ruofei, on the other hand, was calm and collected. He did not appear arrogant, but at the same time, he was not overly enthusiastic. He maintained a perfect distance.

Liu Kuan, who had been secretly observing the situation, naturally couldn't see anything wrong.

After lunch, Xia ruofei declined Liu Qingfeng's suggestion to arrange for someone to accompany him. He went back to his room and changed into casual clothes. Then, he left the building alone with a sun hat on and strolled around the island.

After Liu Kuan heard Liu Qingfeng's report, he did not disturb Xia ruofei.

He also knew that Xia ruofei would not want anyone to follow him at this time. If it were him, he would definitely check it over and over again for such a big deal and then weigh the pros and cons.

Therefore, in Liu Kuan's opinion, it was normal for Xia ruofei to visit the island after lunch.

An area of five or six square kilometers didn't sound small, but in fact, the widest part of green cloud Island was only about three kilometers, and the north and south were about two kilometers. The entire area was really not too large.

He strolled leisurely along the island's roads while releasing his spiritual power at the same time, silently memorizing the situation on the island one by one.

After walking for a while, Xia ruofei found a rock by the sea and sat down. Facing the vast sea, his thoughts gradually spread out.

Of course, he wanted the island. Therefore, he had already begun to think about how to develop and utilize the island after he obtained it, and how to ensure the island's safety.

Chapter 2625 The star Seizer sect (1)

How to take over, how to transform, how to manage ... These were all matters that would be taken care of after obtaining the island.

Xia ruofei only thought about it briefly and formed a few options in his mind. Then, he stood up and strolled towards the project department building.

In the evening, Liu Qingfeng prepared a sumptuous dinner for Xia ruofei and Liu Kuan, and the middle management of the Qingyun Island project also arrived.

After a night's rest on green cloud Island, Xia ruofei and Liu Kuan left green cloud Island in paradise and flew to Australia early in the morning.

Although Xia ruofei and the rest had left, the people in charge of the green cloud Island project had their own plans.

Liu Kuan did not deliberately hide the news. On the contrary, under the instructions of old master Liu, he had already revealed the news that the owner of cyan Cloud Island might change to Liu Qingfeng and the others. He also clearly told everyone that the next owner of cyan Cloud Island was very likely to be Xia ruofei.

After all, most of the people who participated in the construction of Qing Yun Island were the capable men of the Liu family. Over the years, they had invested a lot of time and energy in the construction of Qing Yun Island. Old master Liu had asked Liu Kuan to let them know in advance so that they could be mentally prepared in case Xia ruofei really chose this plan to collect the medical fees, and the people on Qing Yun Island were caught off guard.

Of course, old man Liu still had a scrutinizing mentality. He also wanted to see how the people in charge of the blue cloud Island project would react after they learned that the island was about to change hands. Usually, only at this time could a person's true side be revealed.

Some of these project managers were very depressed, some had an indifferent attitude, and even more people were busy making calls back home, asking for help from acquaintances in their families to operate a new position. Obviously, most people thought that once Xia ruofei took over the green cloud Island, they would be kicked out of the house, so many people had begun to find a way out, including Liu Qingfeng.

However, Liu Qingfeng was not as anxious as the others. After all, his position in the family was still very high. Otherwise, he would not have been entrusted with the important task of building the blue cloud Island. Therefore, Liu Qingfeng was only concerned about where his next position would be. For a backbone of the Liu family like him, once Xia ruofei took over the green cloud Island, he would definitely not stay.

At the same time, Liu Qingfeng also had a deep regret in his heart. It could be said that under his witness, the blue cloud Island was built little by little. Now, more than ten years of hard work had ended

up in someone else's hands. For Liu Qingfeng, who had been in charge of this project for many years, there was a strong sense of frustration in his heart.

.....

Evates Island was the island where the capital of ponattu was located. It was also the largest island in ponattu's territory, covering an area about ten times the size of Qingyun Island.

It was the only five – Star hotel on the island, the Kenu Holiday Hotel.

In one of the luxury suites in the hotel, two people were sitting on the sofa in the living room and having an intense discussion.

Both of them had Chinese faces. The older one was about 60 years old and was wearing a light green robe. It was rare even in China, not to mention in an island country far away in the South Pacific. The other man was slightly younger, about forty years old. He was dressed quite normally, wearing a beige casual suit, and his hair was combed back neatly.

"Martial uncle Zheng, I still feel that we can't rush this matter!" The middle – aged man with slicked – back hair played with his jade ring and said, "now that the island has been in their hands for more than ten years, and they are not short of money, what do you think we can do in a short time?"

Martial uncle Zheng, who was wearing a light blue long robe, frowned and said, ""Boshan, can you put down that thing in your hand first? The sect made you in charge of worldly affairs, not for you to learn to be like those nouveau riche!"

The middle – aged man with slickback hair awkwardly took off the Jade ring and put it in his pocket. He laughed and said, ""Martial uncle Zheng, I ... I'm just trying to better integrate into the secular world, right? Tell me, if I dress like you all day and look like an immortal, how can I make friends with people in the secular world? How was he going to do business? How do I complete the mission given by the sect?"

"You have so many reasons!" Martial uncle Zheng glared at him and said, "there's only the two of us here. Who are you acting for? I think you're addicted to this colorful world and have forgotten your home!"

The middle – aged man with slickback hair quickly cried out, ""Martial uncle Zheng, you've wronged me! No matter how good the secular world was, could it be better than the sect? Not to mention anything else, this impure spiritual energy was enough to choke him. There was no way for him to cultivate properly! If it wasn't for my poor results in the competition, I wouldn't have been sent here! If they could return to the sect to cultivate, who would be willing to stay here?"

The middle – aged man with slicked – back hair was called Wang Boshan, and the old man in the long robe was called Zheng Yongshou. The two of them came from the star Seizer sect. Zheng Yongshou was a disciple of the Yong generation of the star Seizer sect, while Wang Boshan was one generation lower than Zheng Yongshou. He was considered a third generation disciple of the star Seizer sect.

Chapter 2626 The star Seizer sect (2)

The star Seizer sect was located in the South China Sea and had been in seclusion for many years. The most senior disciples were Zheng Yongshou's master, Luo Qingfeng, and his uncle – Master, Chi

Qingcheng. Luo Qingfeng had just broken through to the Golden core stage in recent years, while Chi Qingcheng was still stuck at the ninth level of the Qi refining stage and had not been able to break through.

For the past few decades, due to the continuous deterioration of Earth's cultivation environment, the cultivation of cultivators had generally stagnated. The older generation of cultivators had also withered under the erosion of time. A sect like the star Seizer sect that had a golden core cultivator in charge was already quite a good sect.

Due to the lack of cultivation resources, Luo Qingfeng was the only one who had broken through to the Golden core stage in recent years.

Many cultivation sects realized that if they were isolated from the world, they might wither even faster. After all, cultivation also required the accumulation of resources. Therefore, more and more sects sent their disciples into the secular world to gather money and resources for their sects.

Wang Boshan was a disciple of the star Seizer sect that had come to the secular world.

In the eyes of many cultivators, this was a drudgery. After all, the cultivation environment in the sect was definitely much better than the outside world, and there were Masters and elders to guide them at any time. Once they left the sect and went to the secular world, the impact on their cultivation was really too great.

However, there were also some people who were willing to go to the secular world.

The reason was very simple. These people felt that they had no future in cultivation, especially today when the cultivation environment continued to deteriorate. There were many such pessimists.

After arriving in the secular world, with the support of the sect, at least he would have no problem eating and drinking well.

Since he couldn't pursue longevity, why did he have to live a life of simple cultivation? It's better to be carefree and at ease, so that it's not a waste to come to this world.

Wang Boshan had the same mentality. He came last in the sect competition, so he simply applied to come to the secular world.

Generally speaking, the sect disciples sent to the secular world had a certain level of cultivation and the sect's resources support, so it was easy for them to develop.

They also usually relied on the advantages of their sects to run some medicine or even Feng Shui businesses in the secular world. After they developed well, they would even set up a group company and search for senior management talents. They would even get involved in finance, real estate, and other industries.

In any case, their only goal was to earn as much money as possible for the sect. In addition, when they discovered cultivation resources, they would take them at all costs.

The Amethyst blood radish that the Liu family had discovered had been auctioned off for a sky – High price of 200 million US dollars a few years ago. In reality, it had been bought by a sect's secular person – in – charge without any hesitation after discovering it.

In Xia ruofei's eyes, this spiritual herb was not very precious. However, it was a rare resource in the cultivation world.

The person in charge had also been rewarded with a lot of resources by the sect for finding the Amethyst blood radish.

The reason why Zheng Yongshou left the sect and came to the South Pacific island ten thousand miles away was also because of the information sent back by Wang Boshan.

A year ago, Wang Boshan discovered that the green cloud Island seemed to be somewhat different because of a chance. Of course, with his cultivation, he could not accurately judge that the green cloud Island was a natural array like Xia ruofei. He could even match the name of the array immediately. However, as a cultivator, Wang Boshan could still sense it.

Therefore, he specially checked it a few more times. With his limited knowledge of arrays, he faintly felt that the green cloud Island was not simple, so he reported it without hesitation.

The star Seizer sect immediately sent out Zheng Yongshou, who was the most talented in array formations. Zheng Yongshou's cultivation was only at refined Qi Level 7, but he was astonishingly talented in array formations. Furthermore, the star Seizer sect was also known for its array formations. The sect had many array formations manuals, and Zheng Yongshou's attainments in array formations were no less than that of the sect leader, Luo Qingfeng.

After Zheng Yongshou went to the scene to check it out, he immediately recognized the Taixu xuanqing formation formed by the blue cloud Island and the surrounding islands. This discovery made him pleasantly surprised.

Regardless of whether the star Seizer sect had enough resources to activate the natural formation on green cloud Island, Zheng Yongshou's first thought was naturally to take it down.

If he could successfully modify the Azure cloud Island and let the Taixu xuanqing formation operate, the environment on the Azure cloud Island would be even better than the star picking Island where the star picking sect's headquarters was located. This would be a great contribution!

Therefore, Zheng Yongshou immediately instructed Wang Boshan to buy the green cloud Island at all costs.

In the beginning, Wang Boshan was also full of enthusiasm. He also realized that his contribution this time was great. He was the first one who discovered the difference of the green cloud Island. If he was the one who eventually took over the ownership of the green cloud Island, then most of the credit for this matter would fall on him.

Although he no longer had any extravagant hopes for the path of cultivation, if the sect could reward him with some resources, then his cultivation would also have the opportunity to improve further. No matter what, who would refuse to become stronger? Furthermore, with a higher cultivation, one's lifespan would also be extended!

Therefore, Wang Boshan actively began to inquire in many ways.

He had thought that a small island country like agate could be done with money. How could these Japanese Aborigines have seen so much money?

Wang Boshan had been running the sect's company in the secular world well these years. His cash flow was quite sufficient and he could transfer hundreds of millions of us dollars at any time.

However, after asking around, he found out that things were not that simple.

It turned out that as early as more than a decade ago, the state of ponautu had already sold the island. In the beginning, Wang Boshan was still very nervous, worried that some sect would beat him to it. After asking around, he was relieved. It turned out that it was just a big family in China who bought it.

Moreover, Zheng Yongshou had also seen that the natural formation of the blue cloud Island had not been activated at all. The construction of the Liu family over the years had not used any means of cultivators. It was obvious that they had only built this as their last refuge.

Therefore, Wang Boshan immediately tried to get in touch with the Liu family, hoping to buy the blue cloud Island with money.

Naturally, the Liu family refused flatly. They were not short of money, and old man Liu attached great importance to the construction of Qingyun Island at that time. He even bought the island from the agate map after setting up a trap. How could he resell it for money?

Therefore, this matter was in a stalemate. Wang Boshan tried hard in many ways, but it was difficult to find a breakthrough.

Zheng Yongshou couldn't stay in the secular world for long. He returned not long after he confirmed the nature of the great array on green cloud Island. However, he was very obsessed with array Dao. In addition, after the head of the star Seizer sect, Luo Qingfeng, heard his report, he also attached great importance to this matter. There had been no progress on Wang Boshan's side, so during this period, Luo Qingfeng had sent Zheng Yongshou over many times to supervise the operation.

This was already the third time Zheng Yongshou had left the mountain to supervise this matter, and his patience was almost worn out.

Therefore, this time, Zheng Yongshou directly asked Wang Boshan to come to evac, the capital of the agate, to see him. It was obvious that he wanted to start from the agate.

After listening to Wang Boshan's complaints, Zheng Yongshou frowned and said, "Alright, alright, don't go too far! Boshan, if this matter is completed, it will be a great merit! Originally, shizun was full of praise for you, but your work efficiency is too low. He has been quite critical of you recently!"

Wang Boshan quickly replied, "junior uncle Zheng, I swear to God!" You know that I've been running around for this matter and I've spent a lot of energy, but ... The other party is not convinced. I don't have any good ideas at the moment!"

Wang Boshan carefully observed Zheng Yongshou's expression, and then continued, "The Liu family is quite influential in Huaxia, and didn't the sect leader say so? In the secular world, it's best to follow the rules of the secular world. Problems that can be solved with money are best solved with money ... The problem is that money can't solve them now ..."

"I don't think so!" Zheng Yongshou said. If money can't solve the Liu family's problem, can't we solve the problem with the agate?"

Chapter 2627 An interesting encounter (1)

"What?" Wang Boshan was stunned for a moment and asked, "martial uncle Zheng, you mean ... We should start from the higher ups of the agate?"

"I don't know much about the Mutual Deception in the secular world, but since the Liu family won't listen to anything, and that blue cloud Island is nominally the territory of ponautu, why don't we make some trouble here?" Zheng Yongshou nodded and said. Wouldn't it be easier to handle as long as they could take back the green cloud Island? It's nothing more than some compensation from the state of bonaintu to the Liu family, we'll pay for it! In addition, they had to feed their higher – ups! I don't believe that they won't be tempted if they can make two rounds of money on a small island!"

Wang Boshan criticized in his heart, 'you still say that you don't know how to deceive and scheme against each other? This was already black – bellied enough!

Although he thought so in his heart, he did not dare to say it out loud. He smiled apologetically and said, "martial uncle Zheng is indeed wise and resourceful!" No wonder you asked me to meet you here!"

"Stop flattering me!" Zheng Yongshou said in a reserved manner. Let's see if this method works first? If there's no problem, get it done as soon as possible!"

Wang Boshan said, "martial uncle Zheng, you don't know this ... The Liu family has built the blue cloud Island into an impregnable fortress over the years. Their defensive ability is strong enough to resist the Army of the ponaattu country. You may not know this, but the Army of a small country like ponaattu is extremely weak ... So, the blue cloud Island is only considered as the territory of ponaattu in name. What's more, they signed a permanent use transfer agreement, which can't be taken back easily." Therefore, whether it's from the perspective of Dharma and logos or ability, there's no way to take the agate map back to the blue cloud Island. "

Zheng Yongshou coldly snorted and said, "As long as the ponyagu sect announces that they're taking back the right to use the island, is there really no way for us to drive out that Liu family?"

"Junior uncle Zheng ..." Wang Boshan hesitated for a moment before saying, "if we use the sect's power, it would be beyond the means of the secular world. This would not be in line with the original intention of the sect leader!"

After staying in the secular world for a long time, Wang Boshan was used to using secular means to solve problems. He didn't agree with Zheng Yongshou's plan in his heart.

Zheng Yongshou couldn't help but angrily say, "this also won't do!" That won't do either! Was he going to keep dragging it out like this? If things go wrong ... Neither you nor I will be able to bear this responsibility!"

Wang Boshan said, "martial uncle Zheng, I'm still inclined to plan it slowly. After all, if we use the sect's power, it will inevitably attract the attention of other forces. By then, it won't be just our star Seizer sect who knows the secret of the blue cloud Island." At least for now, no other cultivation forces have discovered the secret of the blue cloud Island. We still have time!"

How could Zheng Yongshou not know this? In fact, Qingfeng Luo attached great importance to the matters of the green cloud Island. In order to prevent the leak, only four people knew about this matter. In addition to Wang Boshan, Zheng Yongshou, and Qingfeng Luo himself, there was another disciple of the Yong generation who was responsible for dealing with Affairs of the secular world with Wang Boshan.

Moreover, this disciple of the Yong generation only knew a little bit of it. After Luo Qingfeng sent Zheng Yongshou to confirm the situation on the green cloud Island, that disciple no longer knew anything. Even so, Luo Qingfeng had already issued a gag order to this Yong generation disciple, strictly ordering him not to reveal a word. Even Chi Qingcheng, another disciple of the Qing generation of the star Seizer sect, did not know.

The reason why Luo Qingfeng was so careful was naturally to prevent the other sects from getting the news.

The star Seizer sect's strength in the cultivation world could only be considered average. Although the sect's strength had made a qualitative leap because of Luo Qingfeng's breakthrough to the Golden core stage in the past few years, their Foundation was still lacking. Not only was he the only golden core cultivator, but the number of disciples in the upper levels of the Qi refining stage was also much lower than those of the older sects. If the other sects were to hear about this, the star Seizer sect would not have any advantage in seizing the green cloud Island.

After listening to Wang Boshan's words, Zheng Yongshou also fell into deep thought. After a long time, he said, "Boshan, we can't just keep waiting like this. There must be a procedure, right?"

Wang Boshan was already prepared for this, he said, "Martial uncle Zheng, I haven't been idle these days. I've also spent a lot of time and effort in gathering information on the Liu family. As far as I know, the head of the Liu family is seriously ill, and it was this head of the Liu family who firmly refused our acquisition at the time. If he passes away, his children won't be so interested in blue cloud Island, and we'll have the opportunity to buy this Island for a certain price!"

"Oh?" Zheng Yongshou's eyes lit up and he said, "there's such a thing? Then ... Why don't we add fuel to the fire and send this family head Liu on his way?"

"Uncle – Master Zheng, I don't recommend doing this if it's not necessary," said Wang Boshan quickly. Firstly, I heard that the Liu family's master is very sick, and he won't be able to hold on for long even without our help." Secondly ... The Liu family has a great influence in Huaxia. You don't know much about the situation in the secular world. In short, there will be a certain risk in dealing with them. Even if we succeed, once we leave any traces, it will be impossible for us to acquire green cloud Island! So, my suggestion is to wait patiently ..."

Zheng Yongshou revealed a trace of hesitation.

Chapter 2628 An interesting encounter (2)

At this moment, the phone in Wang Boshan's pocket rang.

"Martial uncle Zheng, I'll take this call first ..." He apologized.

These years, Wang Boshan had developed very well in the secular world, and some technological products of the secular world had gradually appeared in the star Seizer sect. Naturally, Zheng Yongshou would not be unable to recognize a mobile phone, but he was not used to using these things.

Zheng Yongshou nodded lightly and continued to lean on the sofa, thinking about how to take over the blue cloud Island. Wang Boshan stood up and answered the phone.

Wang Boshan chatted with the other party in English. Zheng Yongshou naturally didn't understand at all, but when he saw the irrepressible joy on Wang Boshan's brows, he couldn't help but look forward to it.

After Wang Boshan hung up the phone, he said with joy, ""Martial uncle Zheng, what did I say! As long as we wait patiently, there will always be good news!"

Zheng Yongshou couldn't help but sit up straight and asked, ""Boshan, what good news is it? Don't keep me in suspense, tell me!"

"Yes! Junior uncle Zheng!" Wang Boshan said, "just now, one of my insiders on green cloud Island called me and told me that the ownership of green cloud Island is likely to change!"

"What?" Zheng Yongshou couldn't help but cry out.

"Martial uncle Zheng, don't worry. It should be a good thing!" Wang Boshan smiled and said, "according to my insider, the Liu family intends to transfer the blue cloud Island to a young man. My insider has also found out the identity of this person. His name is Xia ruofei, the boss of a agricultural product company in China. According to his past experience, I think this person should have nothing to do with the cultivation world!"

Speaking of this, Wang Boshan revealed a trace of excitement and said, ""Martial uncle Zheng, our chance has finally come! As long as the Liu family transfers the island to Xia ruofei, it will be much easier to buy the island from him than from the Liu family!"

Zheng Yongshou also revealed a look of great joy and quickly said, ""Then what are we waiting for? Hurry up and find this young man! Don't worry about the money, just give him a price he can't refuse!"

In the eyes of cultivators, the importance of money was extremely low. Although many sects had businesses in the secular world, these businesses were ultimately for the sake of better collection of cultivation resources and for the sake of cultivation services. If they could take over the green cloud Island, the star Seizer sect would not hesitate even if they had to give up all of their businesses.

"Martial uncle, please be patient, I'll get it done as soon as possible!" Wang Boshan said. However, the Liu family hasn't officially transferred the ownership of cyan Cloud Island to Xia ruofei yet, and Xia ruofei hasn't returned to China yet, so we're not in a hurry. But ... We can return to our country first. I'll meet this lucky young man in person!"

"Alright!" Zheng Yongshou said. Good! Boshan, I won't be returning to the sect this time. I'll go with you to Huaxia. After I'm done with this, I'll personally go back to the sect to ask for your reward!"

Zheng Yongshou wanted to report the good news to Luo Qingfeng as soon as possible, so he stayed in the secular world to wait.

Once this matter was completed, not only would Wang Boshan receive a lot of rewards, he, Zheng Yongshou, would also have a great contribution. At that time, he would not be able to avoid his rewards.

“Uncle – Master, I’ll arrange a plane for us to return to China!” Wang Boshan said excitedly.

.....

Of course, Xia ruofei did not know that a cultivation sect had set their eyes on Qingyun Island. He and Liu Kuan took the peach source. After five to six hours of flight, the plane landed smoothly at Sydney’s Kingsford Smith International Airport.

The plane quickly left the runway and moved steadily on the runway, heading toward the parking lot.

At this time, Xia ruofei inadvertently looked out of the porthole and was surprised to find that on another taxiway parallel to the taxiway paradise was travelling on, an Airbus A350 with a very distinctive paint was also slowly gliding. On the wing tips of the plane was the striking LOGO of paradise Corporation, and on the body were the names of fresh vegetables and fruits and Paradise Farm.

Xia ruofei could not help but raise his eyebrows. This was too much of a coincidence! The aircraft that was gliding side by side with paradise was obviously the only Airbus A350, “ruofei”, which had a special coating.

When Xia ruofei and Feng Jing were on the flight to Australia, they encountered the depressed co – Pilot Wilkins who had poisoned the flight captain, Johannson. He locked the cockpit door and was prepared to bury the entire crew in the sea. It was Xia ruofei who helped the crew break down the door. When the only pilot, Brook, was unable to fly the plane due to his arms being seriously injured, Xia ruofei turned the tide. Under Brook’s technical guidance, he landed the plane in Saipan.

This epic – Level forced Xia ruofei to enter the public eye for the first time. He had embarked on the ‘road of no return’ of the ‘boss of an internet celebrity’.

To thank Xia ruofei, qiuhan not only gave him a cash reward and the title of ‘lifetime honored passenger’, but also named the repaired plane ‘ruofei’. They also changed the paint of the plane to a pattern that was very similar to the peach blossom company and Paradise Farm.

No matter which airport it appeared in, the delicate and alluring vegetables and fruits on the body of the plane would always be very eye – catching. Additionally, at the sight of such paint, those who understood the situation would naturally recall the soul – shaking forced landing. Therefore, it was very eye – catching wherever it was.

Xia ruofei had also seen the Chinese netizens on the internet who happened to board this plane. They had excitedly posted selfies on the internet, saying that this plane had too many connections with China, so the Chinese netizens felt quite close to it when they saw it.

It was Xia ruofei’s first time seeing the plane in person.

What was more interesting was that the “paradise” that Xia ruofei was on was also painted with vegetables and fruits. The style of the two parallel planes was very similar, and they both had the LOGO of “paradise Corporation” on them. One was on the tip of the wings, while the other was on the tail.

The passengers on the Airbus A350 also noticed this. Many of them screamed in excitement and took out their mobile phones to take pictures of paradise.

Xia ruofei also felt that it was too much of a coincidence. In a good mood, he also waved to the passengers on the vacant plane through the porthole.

Liu Kuan and the flight attendants of the peach source were also amazed.

As an aviation practitioner, be it a flight attendant or a pilot, they knew Xia ruofei's experience like the back of their hands. Liu Kuan, as old master Liu's butler, naturally knew the details of Xia ruofei's disclosure. Therefore, they all knew the special meaning of the "ruofei" paint. Everyone felt that it was fate, especially the flight attendants, who couldn't help but take out their mobile phones to take pictures.

Two planes with similar paint were gliding slowly across a runway. Next to the plane A350 for intercontinental flights, Xia ruofei's Gulfstream G650 was like a Chihuahua next to a Tibetan Mastiff. The huge difference formed an interesting contrast.

[illegible]

The next moment, Liu An, the captain of paradise, received instructions from the control tower's control tower to change their parking spot temporarily. Naturally, the taxiing route also changed accordingly.

Liu An was stunned for a moment. Because private planes were generally parked at the long – distance seats, they were generally closer to the access passage for public planes. It was rare to change the parking spot at the last minute.

However, Liu An was still very professional. He quickly recorded the parking spots and the nodes of the gliding route, and then accurately repeated them.

The plane was still moving slowly on the runway. Xia ruofei and the others did not know that the parking lot had changed.

After turning a corner, paradise followed quandé's "ruofei". The two planes, one big and one small, glided forward like a hen leading a chick.

What surprised Liu An was that the two planes were travelling in the same direction.

In the end, after the Airbus A350 from quinba entered the parking lot, Liu An realized that their parking lot was actually adjacent to paradise.

Liu An then realized that this should be the intentional arrangement of the tower. He calmed his mind and controlled the plane to slide into the parking spot and land accurately. He then skillfully turned off the engine and the electric doors.

At this moment, the pilots and passengers on the peach source had already noticed that the ground crew had already driven over the airstair car that had been prepared earlier the moment the Airbus A350 landed. Some people had even started to lay a red carpet under the airstair ...

Chapter 2629 It's really God's arrangement_1

In addition to the quick – moving staff, there were also some reporters with long guns and short cannons standing in an area surrounded by the security zone. There was even a girl with flowers.

Xia ruofei, who was about to get off the plane, was stunned by the crowd. There was a red carpet, fresh flowers, and even the media was present. Could it be that there were important guests on the Australian Airlines plane today? But if it was a VIP, it shouldn't have stopped at this ordinary plane ...

By then, the space – time travel machine had already opened the cabin door and lowered the accommodation ladder. Xia ruofei walked towards the cabin door with a trace of doubt.

As soon as he stepped down from the ramp of the peach Garden, he heard someone calling his name excitedly.

As it was too noisy, Xia ruofei could not hear it clearly. Just as he turned his head to look for the source of the sound, the window on the captain's side of the qplease airlines A350's cockpit opened ...

A person stretched out his upper body with great effort, then waved at Xia ruofei excitedly, shouting his name loudly.

Xia ruofei took a closer look and could not help but reveal a surprised look. The pilot of this flight was actually Captain Brook, who had gone through thick and thin with him.

The flight that Xia ruofei had taken had two captains. The two captains and the co – Pilot were on the same flight. During the incident, the co – Pilot, Wilkinson, had killed the captain of the flight, Johansson. After Xia ruofei broke the cabin door, Captain Brook was the first to rush into the cockpit, and Xia ruofei followed closely.

At that time, Wilkins had used the most extreme method to continuously shoot the windshield with the steel ball gun, causing the windshield on the passenger side to completely shatter. Wilkins had also been sucked out of the cockpit by the powerful air pressure and died without a burial.

Captain Brook rushed into the cockpit first and was also the first to bear the brunt. Not only was one of his arms injured by the rebounded steel ball, but he was also sucked into the seat when the cockpit lost pressure. His other arm was also fractured.

At that time, Brook was the only pilot on the plane, but both his hands were injured. Because of this, Xia ruofei had no choice but to take the pilot's seat.

Thanks to Xia ruofei's strong psychological quality and learning ability, under the technical guidance of Captain Brook, the plane finally landed safely in Saipan.

Xia ruofei did not expect such a coincidence today. Paradise, which he was on, and ruofei, which was piloted by Captain Brook, landed one after the other. They were even assigned to the adjacent parking spaces.

It could be said that Xia ruofei and Captain Brook had experienced life and death together. If it were not for their seamless cooperation, the passengers on that plane would have been buried in the sea. Therefore, this kind of life and death experience could easily close the distance between people.

Seeing Captain Brook again, Xia ruofei was naturally very happy. He stood beside paradise and waved at Captain Brook.

“Xia, don’t go yet. Wait for me downstairs!” Brook shouted.

Xia ruofei was not in a hurry for this trip to Australia. Since he had met Captain Brook, the two of them definitely wanted to catch up. Hence, he nodded and gave Captain Brook an ‘OK’ sign.

The rest of the people on the peach source had also alighted from the plane. Captain Liu An came over and said, “Mr. Xia, the tower has changed its parking spot at the last minute. It’s probably because it saw two planes with similar and unique paint, so it made a last – minute decision. We’re quite far away from the public transport passage now. I’ve already called a shuttle bus from the cockpit, so you may have to wait for a while. ”

Xia ruofei laughed and waved his hand. “There’s no hurry. I met an acquaintance. I might have to stay here for a while.”

“Acquaintances?” Liu An was stunned.

Xia ruofei smiled and nodded. He pointed at the cockpit of the A350 and said, “Up there! I’ll introduce you to each other later. ”

Seeing that Xia ruofei was keeping him in suspense, Liu An did not continue to ask. He could only nod with a trace of doubt. “Alright ...”

The cabin door of the Qinba plane opened and the passengers began to disembark.

When they saw the red carpet laid at the end of the accommodation ladder, they could not help but be surprised and happy. They just did not know which great God had helped them.

The ground crew quickly guided the passengers to the entrance and exit passage. Xia ruofei and the others stood beside paradise and waited patiently for the captain of the Qin flight to be the last to leave the plane. The flight crew would only leave when all the passengers had alighted.

There were not many passengers on this flight, only about a hundred in total. Although everyone was curious about the red carpet and the media, they were very orderly and did not stay too long at the scene. They walked into the passage in an orderly manner.

Finally, all the passengers got off the plane, and the flight attendants also lined up to get off the plane, followed by the air traffic police and two other pilots. They stood on both sides of the accommodation ladder.

The media reporters at the scene also raised their cameras.

Xia ruofei lifted his head and looked at the door of the Airbus A350 curiously. It seemed that the main character today was Captain Brook! He was the only one who had not gotten off the plane.

As expected, a moment later, when Brook appeared at the cabin door, the crowd burst into a warm applause.

Chapter 2630 It's really God's arrangement_2

Brook waved at the crowd with a smile on his face, then stepped down the ramp.

The girl holding the flowers also stepped out of the crowd and waited at the bottom of the ramp. There was a middle – aged woman with an outstanding temperament standing beside her.

When Brook stepped down the last step, the girl took a step forward and handed over the flowers with tears in her eyes. She said with a choked voice, "Dad! Congratulations!"

It turned out that this girl was the daughter of the captain, Brook. She had come here today to give her father flowers, and the woman beside her was Brook's wife.

After Brook took the flowers, he hugged his wife and daughter with a smile on his face. The sound of shutters and everyone's applause suddenly sounded.

After a short hug, Brook patted his wife and daughter's back and said, "Wait for me!"

Then, he passed the flowers back to his daughter. He ignored the reporters who kept reaching out for their microphones and strode towards Xia ruofei.

From a distance, Captain Brook laughed and opened his arms. Xia ruofei also smiled and went up to him. The two of them hugged each other.

"Xia, did you come here to celebrate my first return flight?" asked Captain Brook. You're such a good friend!"

"Captain Brook, is this the first flight after the restoration of flight?" Xia ruofei was stunned.

"Yup!" Brook grinned. "After the injury on my arm recovered, I went through a long stage of psychological intervention treatment. Finally, after a psychological test and a simulator test, the aviation Director confirmed that I have the qualifications to fly again. Today is my first flight, and the company has specially assigned 'RUO Fei' to let me fly. We think this is more memorable."

After experiencing the horror in the air, Captain Brook not only had broken arms and suffered external injuries, but also witnessed his colleague Johannson being poisoned to death in his seat and the co – Pilot, Wilkinson, being sucked out of the cockpit by a huge airflow and dying without a burial place. This had caused a great psychological trauma to him.

In fact, during this long period of time, Captain Brook had mainly been recuperating psychologically.

He continued to receive psychological intervention treatment. From the moment he closed his eyes, he would see the terrifying scene in the cockpit, and when he slept, he would dream of Wilkinson and Johannson. Later, his symptoms gradually alleviated, and he finally met the seafaring standards. It could be said that this was an extremely difficult process.

In the end, Captain Brook was able to return to his flight position completely due to his strong perseverance and his love for flying.

Xia ruofei smiled and said, "then I really have to congratulate you!" "Captain Brook, but ... I'm not here to attend the ceremony. I wasn't informed beforehand. In fact, I'm here to inspect my farm and winery in Hunter Valley. I didn't expect that our two planes would land one after the other. We were even noticed by the tower administrator, which led to such an interesting arrangement."

Brook's eyes widened and he exclaimed, "God! This is unbelievable!"

Xia ruofei shrugged and said, "I also think it's unbelievable!" "No matter what, I've made it in time for this important ceremony! Brook, congratulations again! I also wish you a safe and sound flight in the future! Have fun flying!"

"Thank you! Thank you!" Brook said, "in the words of you Chinese people, this is called 'meeting by fate'!"

When Captain Brook said the words "we are fated to meet," he actually used Chinese. Although it was a little awkward, his pronunciation was relatively clear.

"I didn't expect you to have learned Chinese ..." Xia ruofei said in surprise.

Brook grinned and asked, "In the process of psychological treatment, I learned some Chinese by myself and also developed a great interest in your magical Chinese medicine. Of course, my Chinese standard is still very average. It's only limited to a small number of daily phrases!"

At this point, Captain Brook revealed a distressed expression and said, "Your language is too complicated ... Xia, Did you know? I saw a topic on a Chinese learning Forum and I'm still confused!"

Xia ruofei couldn't help but raise his eyebrows and said, "Oh? Tell me about it, I can answer your questions!"

Brook nodded and said, "Xiaofang said, 'your sister, my period hasn't come this month. I'm worried to death. This is simply a scam!' The question was, who was in a hurry? A, Xiaofang's sister B, Xiaofang's mother C, Xiaofang's Sister D, Xiaofang's father E, Xiaofang's period F, Xiaofang's G, Xiaofang's boyfriend Xiao Ming ..."

Xia ruofei almost burst out laughing when he saw Captain Brook's confused look. He patted Captain Brook's shoulder sympathetically and said, "Brook, it's just a funny question. You don't have to take it seriously."

Brook's eyes widened and he asked, "Is there no answer to this question?"

"Uh ... The answer is, of course, yes," Xia ruofei said, "if it were me, I would choose G, Xiaofang's boyfriend, Xiaoming."

After hearing this, Captain Brook was even more confused, because he was the first one to rule out this option.

"Why?" Brook could not help but ask. This little Ming didn't even appear in the main text!"

Xia ruofei couldn't help but rub his forehead and said, "It's a little complicated ... I'll explain it to you when I have time. You should go to the celebration ceremony now ..."

Brook came back to his senses and said, ""Alright then! Xia, you have to explain this question to me, it's too profound! Oh, right ..."

After saying that, Captain Brook smiled at Xia ruofei and asked, ""Xia, do you still remember what I said when the plane landed?"

"I remember you said a lot." Xia ruofei shrugged his shoulders and asked, "which sentence are you referring to?"

"I said that everything is God's arrangement," said Captain Brook seriously. Look! You're on the first flight after I resumed my flight, and you're here. Our planes landed one after another, which further confirms my theory, right?"

Xia ruofei was speechless. He smiled and said, ""Captain Brook, of course I respect your faith, but in my opinion, this is just a coincidence!"

"This is not just a coincidence ..." Captain Brook insisted.

At this moment, a gentle voice sounded, ""My dear, everyone is waiting for you!"

It was Captain Brook's wife, Molly. She had seen her husband leaving the airline leaders and media reporters to chat with a young man in a private plane nearby for so long, so she couldn't help but come over to take a look.

"Hey! My dear!" Brook said excitedly, "look who's this?"

Mo Li was stunned for a moment and looked at Xia ruofei seriously. In the eyes of many Westerners, the faces of Chinese people were similar, just like how Chinese people looked at foreigners in the same way. Many Chinese people could not distinguish the features of foreigners.

Mo Li's eyes gradually widened. She covered her mouth and exclaimed, ""Oh! God! You're Mr. Xia!"

Captain Brook put his arm around Molly's waist and said with a smile, "Xia, this is my wife, Mo Li!"

Xia ruofei then smiled at Mo Li and said, ""Lady Mo Li, it's a pleasure to meet you!"

"Thank you! Thank you ... Mr. Xia, you've saved my husband's flying career. No! You've saved his life!" Mo Li exclaimed agitatedly, "I'm so happy to be able to see you at such a special time!"

Brook hugged Molly tightly and said, ""My dear, we should go!"

Then, he turned to Xia ruofei and said, ""Xia, you should come with us! I believe that the higher – ups of the aviation Administration and the media reporters present will be very happy to see you here!"
