

God tier Farm 3011

Chapter 3011 Spirit body out of body (1)

To prevent any accidents, Xia ruofei used his spatial energy to wrap the ore in layers the moment he entered the spirit map space. Then, he came to the square in front of the Linglong Pagoda. After setting up the time formation flag, he sat in the time formation and began to study the mysterious ore.

Xia ruofei was using a stupid method. He kept using his spiritual power to search, hoping to get more information.

Each wisp of spiritual power could only support one – tenth of a second at most, and the information transmitted back was very limited.

However, the space inside the ore was very exquisite and Xia ruofei happened to have a deep understanding of space. He could always gain something from the limited information, so he never got tired of it.

Every time his mental power was gone, it would never return, so the consumption was naturally very large.

Even if Xia ruofei's spiritual power was strong, he could not hold on for long under such a rapid consumption.

Moreover, he was so engrossed in the wonderful spatial structure inside the ore that he was completely unaware of the loss of his spiritual power.

Unconsciously, Xia ruofei felt that his spiritual energy was about to be exhausted. His head was throbbing, so he quickly stopped.

After checking himself, Xia ruofei realized that his spiritual energy had been exhausted. He looked at the time and realized that only a few hours had passed.

And this was after each wisp of mental energy was devoured. Xia ruofei had to spend a little time to understand the information that the wisp of mental energy had obtained. Otherwise, with the consumption rate like a clay ox entering the sea and taking in all the information, Xia ruofei's mental energy would not last for an hour no matter what.

A clever housewife can not cook without rice. Xia ruofei could not continue with his spiritual power, so he could only stop temporarily.

He took some water from the spiritual pond and drank it. Then, he sat cross – legged on the Jade futon and started to practice the great Dao formula. This way, he could increase his cultivation and speed up the recovery of his spiritual power. This was something that Xia ruofei had discovered before.

Xia ruofei was not in a hurry. He cultivated slowly while waiting for his spiritual power to recover.

When his mental power was almost fully recovered, he picked up the mysterious ore and began to study it again.

Time passed by slowly.

After a few rounds of recovery, Xia ruofei felt that his mental strength had been tempered. Of course, the effect was not particularly obvious but it was an unexpected gain.

His greatest gain was naturally his understanding of the laws of space.

There were tens of thousands of spaces within the ore, completely overlapping with each other.

Each of these small spaces had incomplete rules and were completely incomparable to the space outside. In fact, they were much worse than the rules of the spirit map.

The rules of the spirit map space were constantly being perfected. Every time the space was upgraded, the rules of the space would become more complete and closer to the outside world.

However, there were so many small spaces in the ore, each with its own characteristics and emphasis. The incomplete laws allowed Xia ruofei to comprehend them more clearly.

This was because they would not be affected by other laws.

Xia ruofei's understanding of the laws of space was gradually accumulating and becoming deeper.

However, the information that he could obtain through his spiritual power was very limited. Xia ruofei was gradually not satisfied with this speed.

So he tried to release two spiritual powers at the same time, so he could get more information.

Then, three, four ...

Xia ruofei continued to increase the amount of information he received. Of course, the speed at which his spiritual power was being consumed was also getting faster.

The information on the rules of space was very intricate. Xia ruofei would unknowingly be immersed in it. When he released nine rays of spiritual power in a single shot, he did not realize that the spiritual power in his body had been exhausted again. It was almost dried up.

At this moment, a change suddenly occurred.

Xia ruofei felt a huge pulling force coming from the direction of his spiritual power. He wanted to resist it subconsciously but realized that his spiritual power had been exhausted.

Xia ruofei felt like the world was spinning. It was similar to the first time he entered the spirit map space, but there was a clear difference. At least, it was much more intense.

Then, Xia ruofei felt that he had arrived in a chaotic space.

Xia ruofei was very familiar with this state of his. He immediately realized that he was in a spiritual state. When he was cultivating the "Scripture of the primogenitor" with Song Wei or Ling Qingxue, he was in this state.

In other words, the huge pulling force had forcefully pulled Xia ruofei's spiritual body out of his sea of consciousness and into this chaotic space.

Xia ruofei couldn't help but feel shocked and worried at the same time. He felt that this was the biggest crisis he had ever encountered since he started cultivating, and it was unknown whether it would be good or bad ...

He was already completely unable to contact the outside world, but after a brief moment of panic, he still steadied his mind.

Xia ruofei had experienced life and death situations many times since he joined the Army. He had long understood the principle that the more difficult the situation was, the more he had to maintain his composure. Even if he was in a desperate situation, he had to remain absolutely calm. Otherwise, the situation would only get worse.

Chapter 3012 Spirit body out of body (2)

After Xia ruofei cleared his mind of all his worries and distracting thoughts, he began to feel a sense of familiarity with the space he was in.

Soon, Xia ruofei realized that he was in one of the many small spaces in the mysterious ore.

This discovery made the usually tough Xia ruofei feel a sense of powerlessness. There were countless small spaces inside the ore, and many of them were overlapping with each other. The rules were quite complicated. How could he break through the space and escape?

Besides, Xia ruofei had been observing the inner space of the ore for a long time today. He knew that the space was intertwined and extremely complicated. Even if he could break open this space, there was a high chance that he would enter another small space and not leave this place.

Moreover, once he fell into the more complicated space stacking area, he could not be sure if his spirit body would be injured.

Speaking of which, Xia ruofei was not unfamiliar with the experience of a spirit leaving one's body.

However, in the past, he had only entered Song Wei's or Ling Qingxue's sea of consciousness. This was the first time he had left his body and entered such a complicated space.

Xia ruofei could not help but fall into a dilemma.

If he stayed here and didn't move, he would most likely be trapped to death.

And if he acted rashly, it was likely to bring unpredictable danger, or he might be completely lost in this extremely complicated space community.

Xia ruofei thought hard, but he could not find a good solution.

He couldn't help but regret his extreme actions. Xia ruofei had felt that it was his nine streams of mental energy that had entered the ore space at the same time that had caused this change. Furthermore, his mental energy was almost exhausted. He didn't even have the time to resist before his spirit body was extracted from his body.

If he had been as steady as he had been at the beginning and had only used one wisp of spiritual power, this situation would most likely not have occurred.

However, it was too late to regret now. Danger always coexisted with opportunity. Xia ruofei's many years of experience had made him extremely determined. Naturally, he would not give up easily just because of the current situation.

After a long time of thinking, Xia ruofei finally made a decision.

In fact, he had no other choice. There was only one path he could take.

As for what would happen after he broke it, he could only take one step at a time. In any case, staying here was equivalent to waiting for death. Only by finding a way to leave this small space could he seize any possible opportunity.

Hence, Xia ruofei no longer had any distracting thoughts. He started to focus on understanding the rules of the small space where his spirit body was.

Previously, Xia ruofei could only rely on his spiritual power to enter and obtain limited information for a short period of time before he was devoured. Now, it was completely different. His spirit body was in the small space and he could feel the rules of this small space as much as he wanted. Naturally, he could obtain more and more information without any time limit.

In a sense, this way of comprehending the rules of the small space was many times more efficient than using his spiritual power to investigate.

If not for the fact that his spirit body was trapped and his safety was unknown, Xia ruofei would have cheered for him.

However, he could not be happy at all because he knew very well that even if he broke through this small space, it was extremely likely that he would be welcomed by another small space or an even more dangerous region of stacked spaces.

The small space where Xia ruofei's spiritual body was located was an area that he had not detected with his spiritual power.

This was very normal. After all, there were countless small spaces inside the ore. In such a short time, from a probability point of view, the possibility that Xia ruofei had explored it before was extremely low.

Fortunately, this small space was similar to the small space that Xia ruofei had previously explored. The rules were relatively simple.

Of course, the simplicity was relative. Compared to the spirit map space and even the space outside, the rules here were definitely relatively simple.

In fact, the laws of space were a high – Level law second only to the laws of time. As long as the laws of space were involved, there was basically nothing simple.

Otherwise, there wouldn't be a situation where no one in the cultivation world could forge storage rings.

Xia ruofei had benefited from controlling the spirit map space for a long time and had a deeper understanding of the rules of space. Compared to cultivators of the same level, his understanding of the rules of space was far ahead of others.

Hence, although Xia ruofei was a little confused about the rules of this small space, he was not at a loss.

He could directly sense the rules of this small space from the inside, so it was naturally more convenient for him to comprehend.

Xia ruofei was immersed in the comprehension of the laws of space. In this small space, Xia ruofei could analyze, interpret, and comprehend the laws of space that were extremely complicated to ordinary cultivators.

Unconsciously, Xia ruofei felt a little happy. He controlled the spirit body and flew towards a certain place in the small space.

By now, Xia ruofei had already understood the rules of this small space and easily found the weakest point.

As expected, under the attack of the spirit body, the small space was broken open without any resistance.

The moment Xia ruofei rushed out, he felt a completely different space rule. It was also a relatively simple incomplete rule.

He laughed bitterly in his heart. This was clearly another small space.

Although he already knew that after breaking through that small space, there was a high probability that he would enter another small space. The probability of directly breaking through the ore space and returning to the spirit map space at the beginning realm was extremely low. However, when he actually entered the other small space, Xia ruofei could not help but sigh.

When he was comprehending the laws of space, his concept of time was a little vague. However, after breaking through the small space, Xia ruofei sensed that he had spent ten whole days in that small space.

There were tens of thousands of spaces inside the ore, and the small space just now was a relatively simple space, but it took so long.

Xia ruofei suddenly felt that the road ahead was long.

However, since he was already in such a situation, he had to continue on no matter how long the road was.

Fortunately, a spirit body was not like a physical body, so it was fine even if he did not eat or drink.

However, Xia ruofei was a little worried. His physical body was still at the initial stage in the spirit map space. Could he have died after sitting there for ten days without eating or drinking? He didn't know how long it would take for him to get out. By the time he got out, his body would have already been reduced to mud.

If that was the case, then the joke had gone too far.

Thinking of this, Xia ruofei felt even more anxious.

After a short rest, Xia ruofei started to understand the rules of this space.

Basically, the rules of these small spaces were different, so Xia ruofei had to start from the beginning. Some of the rules even conflicted with each other, making it even more difficult to understand.

This small space was similar to the previous one. There was only one rule. Xia ruofei spent more than eight days and finally understood the rules of this space. He also successfully found the weakest node and broke through.

Next, Xia ruofei was like a wandering spirit, shuttling through countless small spaces.

In the beginning, he would try his best to record every space he passed, especially the node where he broke through the space, and he would put more emphasis on remembering it. This was equivalent to remembering the path one had taken while playing the maze.

However, after traveling through so many spaces, Xia ruofei could not remember all of them.

Moreover, he had observed from the outside that the space inside the ore was constantly moving, and the relationship between the small spaces was also constantly changing. Therefore, he knew that it would be useless to record it, so he simply gave up.

As time passed, Xia ruofei could not remember how many laws of space he had comprehended. He could only feel that his understanding of the laws of space had improved by leaps and bounds. There was an obvious improvement every day. He was like a dry sponge, absorbing nutrients tirelessly.

...

Regardless of whether he was active or passive, Xia ruofei had gained a lot from the space rules.

Chapter 3013 The long years (1)

Xia ruofei was even numb to time.

In the beginning, he was worried that the spirit body would leave the body for a long time, which would cause various unpredictable bad results, but later, he had no choice but to recognize the reality: All his worries were in vain. He could only do what he could do as well as possible and as soon as possible.

Xia ruofei couldn't remember how many small spaces he had been to. Usually, if the rules were relatively simple and the structure was simple, he would have spent ten days to a month. If the rules were more complicated, it was normal to be trapped for a few months.

Xia ruofei even encountered a few dangerous situations. After breaking through a small space, he would fall into an area where two or more spaces overlapped. The space rules in this area were very chaotic. If he could not find a safe area to avoid in time, the spirit body would be hurt or even killed.

If the spirit body was destroyed, then the soul would really be scattered.

Hence, it was the first time Xia ruofei had encountered a folded space. The situation was extremely dangerous. Fortunately, his calm mind played a role at the critical moment. He found a relatively stable area in the shortest time possible so that the spirit body had a safe place to live.

Even so, his spirit body had suffered considerable damage.

Fortunately, the space inside the ore seemed to be connected to the outside world. In other words, the rich spiritual energy of the primal level in the spirit map space of the mysterious ore could also seep in. Hence, Xia ruofei spent almost a month studying the laws of the layered space while absorbing spiritual energy to recover his spiritual body. Finally, he was able to gradually recover his spiritual body.

It was precisely because he could always absorb the spirit Qi from the spirit map space that he had the confidence that he would be able to break through one day.

It was considered fast to recover his spiritual body in a month. Xia ruofei could feel that his spiritual body had recovered after being damaged by the shattered space. It was more solid than before. It seemed like there were benefits to building up again after being destroyed.

However, it was easy for a spirit body to recover, but it was not so easy to break through this kind of complicated layered spatial region.

It was the first time Xia ruofei had encountered such a layered space. He had been trapped for five years.

He studied the laws of this layered space without rest. After the two spaces overlapped, the complexity of the laws increased exponentially. The effects and interactions between the different laws were endless. Xia ruofei patiently deduced and comprehended. Finally, on the fifth year, he successfully broke through this region.

As Xia ruofei's understanding of the rules of space deepened, the speed at which he was breaking the small space also increased.

This was especially true for independent spaces with relatively simple rules. He would need a few days at the start, but as he progressed, he would be able to complete it in one or two days.

Moreover, these independent spaces were the most common. After Xia ruofei encountered them many times, he had gained a lot of experience.

When Xia ruofei encountered two overlapping small spaces again, he was not as flustered as the first time. He could protect the spirit steadily and then slowly break it.

And as the number of times he did it increased, the speed at which he cracked this kind of spatial region also slowly increased.

Xia ruofei's worst experience was when he was trapped in an area where three small spaces intersected at the same time. The spatial rules in this area were extremely chaotic! In the past ten years, Xia ruofei had not been able to make any sense of it. All the rules seemed to have become a pot of mush or a huge mess. He could not find any way to break through.

Even with Xia ruofei's strong will, he could not help but feel a sense of despair when faced with such a situation.

He gritted his teeth and persevered. Finally, on the eleventh year, he caught a flash of inspiration in his mind.

As the saying goes, everything is difficult at the beginning. The fear was that they could not even find a breakthrough. Once they found the correct and effective breakthrough, even if the later process was still complicated and arduous, they could always see hope in front.

This was the case this time. After Xia ruofei had grasped that fleeting inspiration, the chaotic spatial laws gradually became orderly in his eyes. He had used a full 30 years, spinning silk from a cocoon and moving forward with great difficulty. Finally, he had gnawed on this hard bone.

These small spaces and overlapping areas seemed to be endless. After breaking one, Xia ruofei would have to face another more difficult space.

As the years went by, Xia ruofei began to encounter the space that he had cracked before.

In other words, to a certain extent, he was already walking back, but he still didn't see any hope of breaking through this mysterious ore space.

Of course, Xia ruofei had already confirmed that these small spaces were actually moving. Hence, he did not really go back.

Whenever he came across a space that he had cracked before, Xia ruofei would stop for a short while to re – understand the rules of the space.

After so many years of accumulation, Xia ruofei's comprehension of space was ten times or a hundred times better than before. Looking back, when he first entered this world, his understanding of the laws of space was very shallow.

Chapter 3014 The passing of time (2)

Therefore, if one tried to comprehend it again, they would often gain new gains.

As the saying goes, review the old to know the new.

Besides, whenever Xia ruofei encountered a small space that he had been to before, he would not break through from the same spatial node. Instead, after reviewing the old and re – comprehending the new, he would choose a relatively weaker spatial node and break it easily.

Naturally, he did this to avoid falling into an endless loop.

Just like that, Xia ruofei's spirit body traveled through the seemingly endless space, year after year.

Sometimes, he would stop.

Every time this happened, he would feel an inexplicable sadness in his heart.

After so much time had passed, his body, which was at the primordial realm while sitting cross – legged in the spirit map space, had probably been reduced to mud ...

Even if he could break open the internal space of the mysterious ore and return to the spirit map space, what would he do without a physical body?

Speaking of which, this ore space was quite magical. His spirit body had been here for so many years. According to the cultivation ancient books he had read, his spirit body should have been gradually worn

away. A spirit body that had left the physical body could not survive for a long time. Even if it could absorb spiritual energy to supplement it, it could not suppress the loss. This was the law of nature.

Only after reaching the leaving aperture realm would one's spirit body be able to leave one's physical body freely and drift outside for a long period of time.

However, after so many years in the inner space of the ore, Xia ruofei's spirit body had not been damaged at all, except for the occasional injury caused by the complicated and dangerous overlapping space. Moreover, after the spirit body had absorbed the spiritual Qi, it could recover smoothly. Usually, after each injury, the spirit body would become more solid.

If it wasn't for the fact that the pain of a spiritual body being injured was ten times or even a hundred times more painful than the physical body, Xia ruofei would have massacred himself.

However, as long as one had experienced the pain of a spirit body being injured, the pain would definitely be engraved in one's heart. It was absolutely impossible for one to take the initiative to try again. Even if one thought about it, one could not help but tremble.

Thinking that his physical body might have already died, Xia ruofei couldn't help but feel a little discouraged.

If he were to break open the internal space of the ore, his spirit body would return to the spirit map space. Without the protection of his physical body, his spirit body would probably only be able to survive for a few years at most before it would be completely exhausted.

In comparison, it seemed that staying inside the space of the ore was a better choice!

It's better to live than to die!

However, every time he had such a thought, Xia ruofei would quickly cut it off.

He told himself directly, "this must be an inner demon!" The heart's devil that was born over the long years! You want me to sink into this place forever!

In fact, the small spaces inside the ore did not even have complete laws. In Xia ruofei's eyes, these primitive small spaces were always lifeless without a trace of vitality. If he were to be locked in here forever, he would be better off dead.

People often pursued eternal life.

The ultimate goal of a cultivator's cultivation was often eternal life.

But was eternal life really that attractive?

After spending a long time in the ore space, Xia ruofei had understood one thing: Immortality without any hope or goal was even more terrifying than death.

Death often meant that everything was over, and eternal life meant that even if it was extremely painful, one could only continue to live in such pain.

When Xia ruofei was in elementary school, he had read a short science fiction novel. The background of the story was that an alien civilization had achieved eternal life through scientific means. A huge server

had stored everyone's memory in real time, including everyone's DNA. At that time, the alien civilization had already eliminated diseases. If a person died in an accident, the eternal life machine would use his DNA to make an identical person and implant his own memory. This was also the way to achieve immortality.

Just thinking about it was a scene that everyone yearned for!

But what was the actual situation? It was the exact opposite.

After this alien civilization achieved eternal life, they had banned reproduction. In other words, the population of this civilization would never change.

In the first ten thousand years, everyone was reveling to their heart's content. They had played all that could be played, because they already had an endless life.

As time passed, the humans of this civilization began to become more and more empty. They were tired of all forms of entertainment and even treated life – and – Death battles as a game. The two armies fought on the battlefield for excitement.

Later on, some of them had a mental breakdown, and the endless life force made them feel despair.

Many people began to attempt suicide, but whether it was suicide or an accident, the eternal life machine would resurrect the person very accurately, and those who committed suicide all failed without exception.

Thus, everyone began to try to destroy the eternal machine, but the highest level of protection and extremely powerful recovery ability made all their efforts in vain.

Everyone could only live in emptiness and despair, with no end in sight.

The ending of the story was also somewhat unexpected. In the end, time defeated the eternal machine. After countless years, the eternal machine itself could not resist the erosion of time and finally stopped working.

When everyone heard the news, the entire civilization cheered. "We can finally choose death!"

When the young Xia ruofei first read the story, he could not understand it at all. At the age where he had just learned about life and death, "immortality" was something that people yearned for. How could he really be 'tired of living'?

After spending a long time in the ore space, Xia ruofei finally understood the story.

Without the simultaneous development of spiritual civilization, eternal life was really a terrifying thing.

It was because of this that Xia ruofei's faith was firm from the beginning to the end. He had to break open this ore space, even if he could not survive long after returning to the spirit map space.

Of course, Xia ruofei couldn't have been comprehending the spatial rules all the time. After all, he was a human, not a machine.

However, because he did not have a physical body and was only in the state of a spirit body, he could not cultivate. Therefore, during this period of time, he took out a large number of ancient books and records from his mind and slowly studied them, as a way to regulate his body.

Of course, most of the time, he was still comprehending the spatial rules.

It was just that this period of time was really too long. Even if it was only a small part of the time that he 'did not do his proper work, the accumulation was still quite considerable.

Xia ruofei had basically studied all the books in the Jade talisman of inheritance.

In the past, it was only "stored" in his mind. Now, this valuable wealth of knowledge had truly become Xia ruofei 's.

Just like that, Xia ruofei spent year after year of loneliness in the ore space.

On this day, he faced the three layered small space in front of him and let out a long breath.

He had been trapped here for three years, and today, he had finally understood the laws of this area. His understanding of the laws of space was now very profound. He still remembered the first time he had fallen into the triple – layered small space folding area and had almost lost his life. It had taken him several decades to break out of that area.

But this time, he had completely comprehended it in a short three years. It could be seen how much he had improved in the laws of space over this long period of time!

Xia ruofei's spirit body followed a strange route and floated towards a seemingly dangerous spatial node without hesitation. He did not receive any attacks and directly passed through the spatial node. When he was cracking the spatial laws, he had already mastered the technique of lifting heavy objects as if they were light.

This time, when Xia ruofei's spirit body broke through the spatial zone, he did not feel the familiar spatial aura. Instead, he felt a burning sensation as if he had been thrown into a pot of boiling oil.

...

Chapter 3015 A thousand years in an instant (1)

Xia ruofei was caught off guard by this sudden situation.

Over the years, Xia ruofei had gotten used to all kinds of unexpected situations. However, most of them were the instantaneous damage caused by the chaotic laws of space when he entered an area with overlapping layers of space.

This was the first time he had encountered such a situation.

Xia ruofei felt as if his spirit body was melting like snow under strong sunlight.

Could it be that the spirit body couldn't stand the erosion of time and was about to collapse?

When this thought came to Xia ruofei's mind, he felt a little sad, but at the same time, he felt relieved.

After all, for so many years, they had been shuttling back and forth in these small, lifeless spaces. There was no hope of escape at all. Those with a slightly weaker will would have gone crazy long ago.

From the moment Xia ruofei broke through the three layers of space to the moment he felt that his spirit body was about to melt, everything had happened in a flash.

Xia ruofei only had time to think of this before he felt a strong suction force that caused his spirit body to fly in one direction.

At this moment, Xia ruofei realized that his environment had completely changed.

This place was full of vitality, rich in spiritual energy, and all he could see was an exuberant green.

The scene in front of him was both familiar and strange.

It was familiar because this was the spirit map space's primal realm. Xia ruofei had been here countless times.

The unfamiliarity was because Xia ruofei had been trapped in the ore space for too many years.

Before he was trapped, Xia ruofei had only lived for about 20 years. However, in the space inside the ore, just the complex three – layer space could trap him for decades.

After such a long time, Xia ruofei had a strange feeling about everything that happened before he was trapped.

He was out of trouble just like that?

It was as if a lifetime had passed.

He was really caught off guard! This sudden happiness stunned Xia ruofei. He did not even resist when his spirit body was being pulled in one direction by the strong suction force.

He was completely oblivious to the pain that felt like the scorching sun.

Xia ruofei only came back to his senses when the fluttering feeling disappeared and he could feel his feet on the ground again.

He was surprised to find that his spirit body had returned to his physical body.

It seemed that the suction force just now came from his physical body.

Xia ruofei revealed a look of disbelief. He even suspected that he had been trapped in the space of the ore for too long, causing him to have such a realistic illusion.

It had been so many years, how could his body still be there? Even if his spirit body had not left his body, his physical body should have died long ago!

Xia ruofei tried to move his fingers and then his neck ...

There was no problem!

If it wasn't for the fact that cultivators were very familiar with their own bodies, Xia ruofei would have thought that he had 'possessed' someone else's body.

However, it was impossible for anyone else to appear in the spirit map space.

Originally, there was no need to confirm it. However, this matter was really beyond his understanding, so Xia ruofei felt that it was best to confirm it to avoid any mistakes.

As a result, he subconsciously waved his hand, and the invisible force of the spirit map space immediately gathered, instantly forming a smooth mirror. Before he was trapped, this would have been very difficult to do, but now he could easily do it with a thought. It could be seen how much he had improved.

Xia ruofei raised his head with some difficulty and looked at the mirror.

What was presented in front of him was his own appearance!

He was still in his twenties and looked the same as before he was trapped. There was no change at all.

Xia ruofei was stunned. He looked at his reflection in the mirror and did not move for a long time.

These emotions were very complicated. There was surprise, excitement, and an inexplicable feeling ...

Xia ruofei looked at himself in the mirror. His eyes were filled with vicissitudes that could not be erased.

That's right! He had been trapped inside the ore space for a thousand years. After such a long time, a person's heart would change, especially when he had spent the past thousand years in such a lifeless and hopeless environment.

Xia ruofei had never thought that he would one day become a thousand – year – old demon ...

After a long time, he waved his hand to disperse the mirror formed by the invisible force of the spirit map space. He turned his head slightly and his eyes fell on the mysterious ore beside him.

Xia ruofei's eyes were filled with fear.

After being trapped for a thousand years, he was truly afraid of this ore.

Xia ruofei wanted to use his spiritual power to check it out a few times, but he could not overcome the fear in his heart. In the end, he gave up and used the invisible spatial force to wrap the ore up and throw it aside.

After his spiritual body returned to his physical body, Xia ruofei quickly circulated the “great Dao technique” and used his spiritual power to check his body.

He didn't find any problems, and his cultivation method was running smoothly. His body was still that of a young man in his twenties, and all his functions were no different from before he was trapped.

How could that be possible? Xia ruofei was also in disbelief.

After a thousand years, even if the spirit body was still in the body, the body should have been reduced to mud by now, right? Furthermore, it was a physical body without a spirit body?

Chapter 3016 A thousand years in an instant (2)

Could it be that the spirit map space had such a function? It could prevent the body from rotting? This was the first thought that came to Xia ruofei's mind.

However, he quickly denied it.

The reason was simple.

The so – called unity of spirit and body of cultivators was actually a state where the spirit and the body were in harmony. If the spirit left the body for a thousand years, the compatibility between the two would definitely drop to an extremely low point. Even if the body did not decay after a thousand years, it would be very difficult for the spirit to return after leaving the body for such a long time.

Even if he managed to return to his physical body, the compatibility between the two would be very poor. If he wanted to return to the perfect state of spirit and body as one, he would need a long time to slowly adapt.

According to the ancient records, even leaving aperture stage cultivators did not dare to let their spiritual bodies leave their physical bodies for too long. Otherwise, the problem of merging their spiritual bodies with their physical bodies would be difficult to solve.

Of course, the spiritual body of a leaving aperture stage cultivator was many times stronger than that of a golden core stage cultivator. Their physical body had also become very strong during the long process of cultivation. Coupled with the cultivation technique of the leaving aperture stage, it was enough to ensure that the spiritual body of a leaving aperture stage cultivator would not have the problem of being unable to merge with the physical body for one or two months.

However, Xia ruofei had never heard of a spirit body that had been separated from the physical body for a thousand years and could still be perfectly compatible with the physical body.

Xia ruofei had tried it many times. After his spirit body returned to his body, it really fit perfectly. It was as if it had never left, but it also seemed like it had only left for a very short time ...

Time!

Xia ruofei suddenly thought of a concept.

Could it be that a thousand years was just his subjective feeling?

When he thought of the long years of unbearable experience he had experienced in the ore space, he felt that it was unlikely.

One had to know that his comprehension of the rules of space was real. Moreover, he had taken the time to study so many classics and secret techniques from the Jade talismans of inheritance.

Could it be a problem with the flow of time? Or was it that the time law within the ore's internal space was simply in disorder?

Xia ruofei felt that it was more likely.

It was actually very simple to prove it.

With a thought, Xia ruofei left the spirit map space and returned to the outside world, which was the quiet room in star – picking tower.

Under normal circumstances, Xia ruofei would leave his phone outside before entering the spirit map space.

This was because the flow of time in the spirit map space was different for those at the primal level. If he brought his phone in, the time on his phone would be messed up.

Of course, the internet was the only thing keeping time. As long as he came to the outside world and connected to the internet, the time would naturally be adjusted.

However, Xia ruofei had already formed a habit. Hence, every time he entered the spirit map space, he would leave his phone, watch, and other things outside.

In the spirit map space, he had also placed a clock to keep time.

Once Xia ruofei returned to the quiet room, he reached out and picked up the phone beside the futon.

After looking at the time on his phone, Xia ruofei was stunned ...

His phone showed that it was still the day he entered the spirit map space!

The year had not changed!

The date had not changed!

In fact, only a minute had passed.

This was also thanks to Xia ruofei's habit of checking the time on his phone every time he entered the medium and left his phone outside.

There was definitely no problem with his memory. As long as a cultivator remembered something, they would basically not forget it, even if his subjective consciousness had already experienced a long thousand years.

In that case, did that mean that he had actually spent a thousand years in the ore space, while time in the outside world had not passed at all?

Otherwise, there was no way to explain the problem of time.

Even for those at the original beginning realm in the spirit map space where the mysterious ore was located, after the time formation was set up, the time flow was 2000 times slower than the outside world. If time passed at the same time, at least half a year would have passed in the outside world after 1000 years.

However, that was not the case in reality!

It had only been less than a minute since he had entered the medium.

He estimated that this little bit of time was spent after he entered the space and before he started to study the ore.

After all, he was studying the ore in an environment where time was flowing 2000 times faster.

A dream of a thousand years?

This word appeared in Xia ruofei's mind.

No matter what, after confirming this, Xia ruofei felt more at ease.

Even though half a year was not considered a long time, if he were to really seclude himself in this cultivation room for half a year, the outside world would probably be in chaos.

There was no need to mention the Paradise company in the secular world. Even if he was used to being a boss who did nothing, as the boss, not appearing for half a year was a bit too much!

Song Wei, Ling Qingxue, and Xia ruofei's friends and family in the secular world would be very worried, thinking that he had gone missing.

Li Yifu, who was on Peach Blossom Island, knew that Xia ruofei and Luo Qingfeng had attended the auction together, so he was even more worried. After all, Xia ruofei had asked Li Yifu to leave first to avoid any accidents on the way back because he had offended someone.

Li Yifu could not find the exact location of the star Seizer sect, nor did he know what had happened after he left the auction. He would probably think that Xia ruofei had been ambushed on his way out.

This was because Qingfeng Luo would most likely loyally wait outside the quiet room and would not leave. It was impossible for him to inform Li Yifu.

If Luo Qingfeng was worried that Xia ruofei had been in seclusion for too long and went to the quiet room to check, he would only see the spirit map and not Xia ruofei's figure. He would probably be even more panicked.

Fortunately, time didn't seem to be flowing at the same time, so these problems didn't exist.

In fact, when Xia ruofei was trapped in the inner space of the ore, these were no longer a problem for him. He did not have time to think about it at all. At that time, he was most worried about the damage to his physical body.

However, as time passed, Xia ruofei felt that what should have happened had already happened, so he simply did not bother to think about it.

At that time, he didn't expect that the thousand years he had spent in the space of the ore would only be an instant in the outside world.

A thousand years passed in an instant, but it felt like a lifetime had passed ...

There was nothing wrong with his body. Xia ruofei let out a long sigh of relief.

...

Moreover, the strange space inside the ore had actually allowed his spirit body to survive for a thousand years. Not only was it not damaged at all, but it had also become stronger because of the repeated injuries and recovery.

Xia ruofei had earned a lot.

A thousand years immersed in the comprehension of spatial laws, his achievements were unimaginable.

He felt that his attainments in the laws of space were even higher than that of the realm Fox Bai Qingqing.

In addition, Xia ruofei also used his “business time” to study many secret techniques and theories on alchemy, medicine, and equipment. Other than not being able to verify them with actual practice, his level in these other aspects had also improved greatly. This would be quite beneficial for his future development in the world of cultivation.

Xia ruofei sat in the quiet room in a daze. It took him a while to calm down his turbulent emotions.

He had stayed in the inner space of the ore for too long. According to the lifespan of an ordinary person, he had stayed in there for more than ten lifetimes!

Hence, after successfully breaking open the space in the ore, Xia ruofei felt as if he was in a dream. And it was a very, very long dream.

He sat in a daze for a while and couldn’t help but shout,””Qingfeng!”

Luo Qingfeng, who was waiting outside the door, quickly replied,””Master, this old servant is here! Master, do you have any orders?”

All the miscellaneous people in the entire Zhai Xing Lou had been cleared out. Even the area around Zhai Xing Lou had been listed as a restricted area. Thus, Luo Qingfeng did not have to worry about being overheard by others.

...

“How long have I been in seclusion?” Xia ruofei asked.

Luo Qingfeng was confused by Xia ruofei’s random question. He thought to himself,”What’s wrong with master? And why did Master’s Voice sound so old? It was as if he had cultivated for thousands of years ...

Although his heart was full of questions, Luo Qingfeng still answered meticulously,””Master, you entered the chamber ... Less than 15 minutes ago ...”

Chapter 3017 The biggest harvest (1)

After hearing Luo Qingfeng’s words, Xia ruofei’s heart was completely at ease.

He was silent for a while before he said,””I know. You stand guard outside for me. Remember, don’t let anyone in. Don’t come in unless I call you!”

“Yes! Master!” “Yes,” Luo Qingfeng replied.

In the quiet room, Xia ruofei heaved a long sigh of relief. Then, he calmed himself down and returned to the spirit map space.

Just now, he was so excited that he didn't have the time to think about it. Now, he had to feel the changes in himself.

After entering the spirit map space, Xia ruofei's first feeling was that his understanding of this space had become very clear.

In fact, Xia ruofei used to feel that his control of the spirit map space was very good. But now, it was a completely different feeling.

In the past, he might have known it but not the reason.

But now, with his understanding of the laws of space, the spirit map space seemed to be able to be broken down into the most basic laws in his eyes.

Of course, in the spirit map space, especially the space of the Archean realm, the rules were much more complicated than the space inside the ore. At the same time, it was also more complete. Xia ruofei was still unable to completely understand the rules like he did in the ore.

If he could do that, Xia ruofei would be able to break open the spirit map's space, even if he was not the one controlling it.

Of course, after the spirit map space had been upgraded several times, it was very close to the outside world. The spatial rules here were very complete and stable. It was extremely difficult to break through such a space.

Therefore, the safety of the spirit map space, at least for now, was absolutely not an issue.

At least, Xia ruofei knew that even the Jie Li Bai Qingqing could not do this.

From this point of view, Bai Qingqing's spatial talent was indeed very good, and her attainments in the aspect of space were also very high. However, she was probably at Xia ruofei's current level at most, or perhaps even worse.

Xia ruofei quietly comprehended the rules of the spirit map space for a while, silently corroborating them with the space rules he had comprehended in the past thousand years. He also had some new insights in his heart.

After he withdrew his thoughts, he turned his gaze to a certain place in the space.

It looked empty, but in fact, there were layers of spatial power wrapped around the mysterious ore.

Xia ruofei's feelings were complicated.

The purpose of his participation in the auction was to get two storage rings for Song Wei and Ling Qingxue. He had never expected that the biggest gain would actually be this mysterious ore.

Of course, it was also because of this ore that Xia ruofei had almost fallen into a situation of eternal damnation.

He still felt a lingering fear when he thought back to the dangers he had experienced inside the ore space.

There were a few times when his spirit body was almost instantly torn apart in the complex layered space.

Furthermore, even if there were no such dangers, being trapped in such a lifeless environment for a thousand years could easily lead to a mental breakdown, and one would go crazy.

Now that he thought about it, if Xia ruofei's will wavered even a little, he might really be trapped in it and never be able to get out.

Xia ruofei really wanted to use his spiritual power to check again, but he could not muster the courage.

In fact, Xia ruofei had another thought in his mind. The spirit map space was also "drooling" over this mysterious ore. He could completely let go of the restraints and let the spirit map space devour this ore.

This was because Xia ruofei was still tempted to explore the secrets of the ore space again. However, at the same time, he told himself that this idea was very dangerous and that he should not try it.

If he let the spirit map space devour it, he would no longer have such thoughts.

However, after much thought, Xia ruofei still couldn't bear to do it.

The laws of the small spaces within the ore were very primitive and simple. To comprehend the laws of space, this was a very valuable resource.

It was equivalent to dismantling the complex and complete spatial laws, crushing them and embedding them into different small spaces. At the same time, he also used some stacked spatial regions to demonstrate the effect of the combination of laws.

It was naturally more effective to comprehend the spatial laws through such a small space and layered region than to directly comprehend the complete spatial laws.

Xia ruofei felt that if he did not make full use of this mysterious ore, he would definitely regret it in the future.

Therefore, he eventually suppressed the idea of letting the spirit map space devour him directly.

Xia ruofei muttered to himself and called Xia Qing over using telepathy.

"Master, do you have any orders?" Xia Qing slightly bowed and asked.

Xia ruofei waved his hand and the spatial force that enveloped the mysterious ore turned transparent. It looked like the ore was suspended in mid – Air. Of course, the spatial force was still in effect, isolating the connection between the ore and the spirit map space.

"Can you recognize what this is?" Xia ruofei asked.

Xia Qing looked at it for a long time and said with a slight frown, "I'm sorry, master. I don't recognize this stone ..."

"You don't know him, or you can't say it due to the rules?" Xia ruofei asked.

"I really don't know him!" Xia Qing said with a bitter smile. In fact, after master broke through to the Golden core stage, the rules "restrictions on me are already very small. There's basically nothing I can't say."

Chapter 3018 The biggest harvest (2)

Xia ruofei knew that "basically no" meant that there were more. However, since Xia Qing had said that he really didn't know anything about this ore, and it wasn't because of the rules that he couldn't say anything, then he really didn't know.

Otherwise, even if she couldn't say it, Xia Qing would have done so.

Xia Qing would definitely not lie to him.

Actually, Xia ruofei was already mentally prepared for this outcome.

Before falling into the space inside the ore, Xia ruofei wanted to study it by himself and did not ask Xia Qing directly. After escaping from the ore space, Xia ruofei had a faint feeling that this ore should be very rare, and Xia Qing probably didn't know about it.

After asking, the result was as expected.

Hence, Xia ruofei was not too disappointed.

"I know, then you can go!" He said.

"Yes!" Xia Qing said.

Just as Xia Qing was about to leave, Xia ruofei called out again, ""Wait!"

"What other instructions does master have?" Xia Qing turned around and asked.

"This stone ... Is related to the rules of space." Xia ruofei thought for a while and said, "do you think ... Bai Qingqing would know more?"

"The realm Fox is very sensitive to the rules of space, and its talent in space is also very strong. It's inherited from its bloodline, and the realm Fox has inherited memories, so it might be able to recognize this stone." Xia Qing said cautiously, "however, if there is no information about this stone in the inherited memory, then it most likely doesn't know what it is."

"I see ..." Xia ruofei nodded. "You can go back to your work!" Don't tell Bai Qingqing anything about this stone. If I need it, I'll find it myself. "

"Understood!" Xia Qing bowed slightly and said, "master, this subordinate will take his leave!"

Xia ruofei nodded.

After Xia Qing left, Xia ruofei muttered to himself for a while and then used his spatial energy to cover up the mysterious ore.

Then, with a thought, he directly passed through the mountain sea realm, and appeared on the platform in front of the cave.

Xia ruofei took out the storage ring with a spatial nested structure from the stone chamber in the cave.

As soon as the storage ring left the cave, Xia ruofei saw a white light flash in front of him, and Bai Qingqing, the world Fox, appeared on the platform in front of the cave.

In the past, Xia ruofei could not capture Bai Qingqing's movements at all. However, after experiencing the inner space of the ore for a thousand years, Xia ruofei's understanding of the laws of space had deepened by many times. This time, the spatial fluctuations when Bai Qingqing appeared could no longer escape Xia ruofei's eyes. The entire movement trajectory was captured by Xia ruofei without missing anything.

Naturally, Bai Qingqing could not sense the change in Xia ruofei. She spoke in the human language, ""You're finally done. Are you here to crack this nested space?"

Xia ruofei laughed and said, "it seems like you take this matter very seriously!" The moment this storage ring appeared, you immediately ran out!"

"No matter how small a mosquito is, it's still meat!" Bai Qingqing pouted her lips in a very human – like manner and said, "in this small space of yours, other than being able to comprehend the spatial laws to my heart's content, there's really nothing good about it ... It's been a long time since I've eaten a world stone ... I'm just hoping that the nested space in this storage ring can bring me a little surprise!"

Xia ruofei looked at Bai Qingqing's pitiful expression and couldn't help but laugh. ""Please! I haven't seen a world stone in a long time, alright? I still want to find more world stones for my spirit map space to absorb! How long has it been since my dimension has been upgraded?"

"Then you have to go out and search more often!" Bai Qingqing could not help but complain, "you've been staying in one place every day. Do you think the world stone will come to you on its own?" My ability to sense world stones can be said to be unparalleled in this world. With such good conditions and yet you don't make use of them, who else can you blame?"

Xia ruofei smiled bitterly and said, "I know!" He knew! It's just that I haven't had the time recently! Besides, the world was so big. If they searched everywhere without any clues, the chances of finding the world stone would probably not be high! I feel like it's like a blind cat trying to catch a dead mouse!"

Bai Qingqing looked a little embarrassed. She waved her front paw and said, ""It's better to find someone than not! I've been hungry for so long ..."

In fact, Bai Qingqing knew that Xia ruofei was right. No matter how strong its ability to sense the world stone was, it had a limited range. If it did not have any target and just searched aimlessly, the chances of finding the world stone would be very low.

After all, world stones were not something that could be found anywhere. Even in the ancient cultivation world, they were extremely precious resources.

Since it had failed, Bai Qingqing did not want to continue on this topic. It said directly, ""Let's not talk about the world stone for now! We'd better hurry up and break this nested space! To hide such a small space inside so carefully, it must be used to store very precious things. There might even be world stones!"

Xia ruofei laughed and asked, ""Then, do you want to talk about the world stone or not?"

Bai Qingqing waved her claws in anger and said, ""I want to talk about the nested space! Since you took the time to come in today, let's seize the time to crack this nested space! Don't forget the share you promised me, you can't go back on your word! I'll now teach you how to find and break the nested space. The method is not ..."

Chapter 3019 The biggest harvest_

"Wait! Wait a minute! Don't say it yet!" Xia ruofei interrupted Bai Qingqing.

Bai Qingqing was a little shocked and asked, "what do you mean?" Do you still want to crack this nested space or not? I'm telling you, there might be some good treasures inside! According to the agreement, you can get 90%! I'm already starting to regret agreeing to your share of the profits. It turns out that I've only been able to get 10% after so much effort! I advise you to quickly get down to business before I change my mind! Otherwise, it'll be too late for you to regret!"

Xia ruofei looked at Bai Qingqing with a faint smile and said, ""My meaning is very simple. I don't want you to tell me the way to crack it first, in case I can't explain it clearly later ..."

"Ah?" Bai Qingqing was confused. "What do you mean by that? what do you mean?"

Xia ruofei chuckled. "I'm saying that I want to try to crack this nested space by myself first. That's why I asked you not to tell me anything about cracking the nested space." This way, if I succeed, I'll crack it on my own, and naturally I won't need to share the profits with you, right?"

Bai Qingqing was stunned. She then sneered and said, ""W – what? I didn't hear wrong, did I? Are you going to crack it on your own?"

"It seems like your hearing isn't bad!" Xia ruofei shrugged.

"Who told you about your hearing?" Bai Qingqing said angrily, "do you think you can crack this nested space by yourself? What exactly gave you such an illusion? Xia ruofei, I can tell you clearly that even if you were to comprehend the rules of space for another hundred years, it would still be difficult to find the correct way to break the nested space! If you use brute force, there's a 99% chance that you'll destroy the storage ring, and the things hidden in the nested space will all fall into the spatial turbulence, never to be found again!"

"Won't we know if it's an illusion or not after we try?" Xia ruofei said with a smile.

He also said in his heart, "student Xiaobai, you're right. If I had only comprehended the rules of space for a hundred years, I might not have been able to crack this nested space!" However, I've comprehended it for over a thousand years, so it should be barely enough ...

In fact, when Xia ruofei took the storage ring out of the cave, he had already checked it again.

With his current rapid progress in spatial knowledge, what he saw was naturally very different from before.

Although it was just a glimpse, and Bai Qingqing had rushed over, Xia ruofei could basically confirm that he had the confidence to crack the nested space. In fact, he was very confident.

This was because the nested space was actually very similar to the overlapping small spaces inside the ore. However, the overlapping space area was a small part of a few independent small spaces that were intertwined with each other. A nested space was a space where a small space with a simpler rule was put into another small space. The former was like an intersection of geometry, while the latter was like concentric circles.

The core difference between the two was that the intersection of the nested spaces was actually the entire small space with simpler rules.

From the perspective of the laws, the nested space was undoubtedly much simpler than the layered space.

Hence, Xia ruofei only took a glance and confidently came to the conclusion that he could solve it.

Chapter 3020 Massive amount of resources (Part 1)

After hearing Xia ruofei's words, Bai Qingqing was so angry that she laughed. She took two steps back and said, ""You can try if you want! But don't say I didn't warn you, the nested space is extremely exquisite. If you try it rashly without knowing the way to break it, there's a high chance that you'll directly destroy the small space in the nested space, and then it'll be irreparable ..."

After saying that, Bai Qingqing showed a hint of sarcasm and said, ""But I guess with your current understanding of the laws of space, it won't be easy to destroy the nested space ... Try it if you want to! By the way, if your attempt doesn't succeed and you want me to help you, we'll have to renegotiate the share ..."

Xia ruofei smiled and nodded. Then, without further ado, he released an extremely pure spiritual power and probed into the storage ring.

After thousands of years of tempering in the space inside the ore, Xia ruofei's spiritual body had been cut and restored countless times. It was several times more solid than before.

The spirit body could be said to be the center of the soul sea and also the source of spiritual power.

Hence, after Xia ruofei's spiritual body returned to his physical body, he immediately realized that his spiritual power had improved by another level.

Although he was still quite far from the spirit transformation realm, which was the equivalent of the nascent soul realm, he had already reached the late stage of the spirit gathering realm.

Under normal circumstances, cultivators in the early stage of the Golden core realm usually had a cultivation of the early stage of the spirit gathering realm. Cultivators who were particularly talented in terms of their spiritual power, or whose cultivation methods focused on the spiritual power, or who had specially cultivated cultivation methods to assist in increasing their spiritual power, might be able to reach the middle stage of the spirit gathering realm.

For someone like Xia ruofei, who was only in the early stage of the Golden elixir realm and had reached the late stage of the spirit gathering realm, it could be said that he was one in a million.

It was impossible to determine if such a genius existed in the so – called ancient cultivation world.

However, at least in the modern cultivation world, such a level of spiritual power was absolutely shocking.

Even Chen Nanfeng, who was widely acknowledged as the number one in the cultivation world, only had a spiritual power cultivation of late – Stage spirit gathering realm.

This was the first time Xia ruofei used his spiritual power after he had escaped. He could feel the changes after his improvement. He had never felt like he could control his spiritual power so easily before.

The realm Fox, Bai Qingqing, had a hint of mockery in her eyes as she sat at the side, waiting to see Xia ruofei make a fool of himself.

On the other hand, Xia ruofei had long since understood the small space in the storage ring and the space with the simpler rules.

His spiritual power split into two and went straight to the two weakest nodes that connected the two.

To be honest, Xia ruofei did not know what kind of solution Bai Qingqing would come up with. He was just trying to break the connection between the two based on his understanding of the structure of the nested space.

Then, Xia ruofei's spiritual energy went straight to the separated nested space and broke through it from the outside to the inside with great force.

It wasn't difficult.

In just a few breaths 'time, the small space embedded in it was directly broken open.

This was not a violent crack, so the items inside were naturally preserved. When the small nested space was destroyed, the items hidden in the small space were naturally returned to the storage ring.

Actually, it was not that Xia ruofei could not take out the things inside while protecting the small nested space. It would just take a little more time.

But he didn't think too much about it, because his vision was much higher now. In his opinion, this nested small space was indeed a bit simple and had no value at all! It would be more convenient to break it directly.

Although Bai Qingqing looked like she didn't care, as if she was waiting to see Xia ruofei make a fool of himself, she was actually very concerned about the situation here. She was mainly worried that Xia ruofei would use brute force to destroy the nested small space.

Therefore, Bai Qingqing had been keeping an eye on the situation inside the storage dimension.

To Bai Qingqing, who was extremely talented in spatial manipulation, this was not a difficult task.

When it saw Xia ruofei's fierce movements, it fell into a state of confusion.

It could even cut off the connection between the nested space and the main space like this?

Was it really possible to crack the outer wall of the space directly like this? Wouldn't it cause the space to collapse?

Two roads ... No! It was actually a three – pronged approach? How could there be such an operation?

Bai Qingqing was dumbfounded.

Especially when she saw how Xia ruofei only took a few breaths to separate the small nested space and then broke it down like a butcher dismembering an ox, Bai Qingqing started to doubt her life.

Am I really a space pet?

Is my spatial talent really unparalleled?

Am I dreaming?

Who am I?

Where am I?

What am I doing?

.....

Xia ruofei had no time to care about the dumbstruck Bai Qingqing. He was looking at the pile of items in his storage ring and was happily calculating his gains!

There were three big boxes of spiritual crystals, and there were thousands of them.

There were at least a thousand crystals in the large box.

The spiritual stones were not packed at all. They were piled up like a small mountain of garbage, and there were at least hundreds of thousands of them.

There were also many porcelain bottles containing all kinds of medicinal pills. However, it was unknown if the medicinal properties of these medicinal pills could still be preserved after the passage of time.

Each of the five flying swords didn't look like ordinary objects. Light flowed around the swords like clear autumn water. They were definitely top – notch flying swords.

.....

There were still many other things.

Xia ruofei arrived at the foot of the mountain in a flash. He found a flat patch of grass and took out all the items from his storage ring.
