Chapter 3151 Professor Shen_

As soon as they arrived, Wang Chi realized that there were only three people from his team, while the other two universities had only sent one person each.

They were all big names in this circle, and it was common for them to meet at various academic conferences. Like today, Wang Chi felt a little embarrassed. He felt like Beijing University's Computer Science Department loved to take advantage of people. When they heard that the conference was going to be held at Paradise Club, three people came.

Shen Heping already knew that this exchange was organized by Xia ruofei.

However, he had heard Zhao Yongjun's introduction and knew that Xia ruofei was the chairman of paradise Corporation. Although the Paradise Corporation had been very popular recently, in Shen Heping's eyes, Xia ruofei was just a successful businessman. At most, he was just an internet celebrity.

As a scholar, he was always filled with a sense of superiority in front of a businessman. This seemed to be a natural chain of contempt.

Therefore, Shen Heping did not show any respect to Xia ruofei because of his identity.

Especially when he heard Xia ruofei and Song Wei's teasing, Shen Heping was even more furious. He said lightly, "Director Xia, I've already said that Junior Sister Song and I are senior and junior, but you still asked her to call me teacher. What do you mean by that?"

Today's exchange meeting was completely an Academic Exchange and had nothing to do with cultivation, so there was no need to avoid it. The staff were all from the club.

When they arrived at the meeting room, everything was ready.

Everyone sat on both sides of the conference table. At this time, Shen Heping, an Associate Professor of the Computer Science Department of Beijing University, noticed Song Wei sitting beside Xia ruofei. His eyes lit up and he shouted, "Song Wei? You're here too?"

Just now, Song Wei and Ling Qingxue were drinking tea with Mu Sheng and the others in the living room on the first floor. When Wang Chi, Shen Heping, and the others arrived, Zhao Yongjun and Xia ruofei led them directly to the conference room on the second floor because everyone was already there. Song Wei and the others followed behind, so Shen Heping did not see Song Wei at first. It was only when everyone was seated in the conference room that he was surprised and happy as if he had discovered a new continent.

After all, Song Wei's major was archeology and had nothing to do with Computer Science. Shen Heping did not expect Song Wei to appear at such a small exchange meeting.

Xia ruofei looked at Song Wei in surprise and asked with a smile, "Weiwei, do you know professor Shen?"

Song Wei's expression was a little unnatural. She nodded reluctantly and said, "They're from the same school, and I've met professor Shen a few times before."

Shen Heping said with a smile, "call me senior brother!" What professor Shen? Don't forget that I also went to Beijing University for my bachelor's degree. It's my first degree!"

Xia ruofei looked at the excited Shen Heping with interest, then turned to Song Wei and said with a smile, "I almost forgot that Wei Wei is also a top student at Beijing University! Then professor Wang and professor Shen can be considered your teachers!"

Song Wei smiled and nodded.

When Shen Heping heard Xia ruofei calling Song Wei "Weiwei" so intimately for the second time, he was displeased. Especially when he saw Song Wei's respectful and distant attitude towards him, the dissatisfaction in his heart was even stronger.

Shen Heping could tell that Song Wei and Xia ruofei had a close relationship. He noticed that when he greeted Song Wei with enthusiasm, Song Wei's eyes showed an undisguised rejection. At the same time, she subconsciously leaned closer to Xia ruofei. This kind of unconscious body language was the best explanation.

In fact, the relationship between Song Wei and Shen Heping was not as simple as just meeting a few times.

When Shen Heping finished his studies and returned to China a few years ago, Song Wei was just in her second year. Once, by chance, Shen Heping met Song Wei at a club event. At first sight, he was shocked by her beauty, and then he began to pursue her fiercely.

At that time, Heping Shen was just in his early 30s. He was a PhD student from a famous university who had just returned from overseas. He was also highly valued by the leaders of the computer research Institute. When he returned, he was immediately awarded the title of Associate Professor. In accordance with the talent introduction policy, he was given a residence permit and a house in Beijing. At that time, he also received a considerable amount of settling – in money.

In addition, Shen Heping was also considered handsome. During his undergraduate years, he was very famous at Beijing University for being handsome and good at studying. Even in a top university like Beijing University, he was still the most popular type of person.

After returning to Beijing University after getting his PhD from the United States, Shen Heping was very proud.

He thought that a PhD student with good looks, a bright future, and a lot of money would be able to pursue an undergraduate student easily.

He did not expect it to be so difficult to pursue Song Wei.

No matter how hard he tried, Song Wei did not show any signs of being tempted.

After all, Shen Heping was an Associate Professor with a certain amount of resources. Therefore, he had heard some information about Song Wei's family background. Although he was not particularly clear, he at least knew that Song Wei's father's rank was not low. He was a high – ranking official in power.

From then on, Shen Heping's pursuit of Song Wei became even more passionate.

However, from the time Song Wei was in her second year of University until she finished her bachelor's degree, and then continued to study for her master's degree, all the efforts Shen Heping had made on Song Wei over the years were in vain. There was no progress in their relationship at all, and Song Wei clearly showed that she was tired of him. This made Shen Heping feel a strong sense of defeat in his heart.

Of course, he was more unwilling to accept it.

Attending the so – called Academic Exchange was secondary to Shen Heping's visit to the legendary Paradise Club. His main purpose was to experience it. To put it bluntly, he wanted to experience something new. After all, the reputation of the Paradise Club had been like the sun in the sky in the capital in the past few months. Even the common people in the streets often talked about this club. They felt that being able to visit the Paradise Club once was a different status.

In fact, most of them had never been to the Paradise Club before. After all, only a few of them had membership cards.

Therefore, two days ago, when Shen Heping heard that there was an Academic Exchange meeting held at the Paradise clubhouse, he immediately fought for a spot.

Originally, professor Wang Chi was going to bring a PhD student with him. After all, the person who invited him to the meeting was also a very important person. The person was here for the Computer Science Department of Beijing University and his name, so it would be bad if he didn't attend.

Wang Chi saw that Shen Heping wanted to participate so much, so he reluctantly brought him along. After all, they did not limit the number of people who could attend. They even said that the more people the better, so there was no need to worry about a lack of reception.

As soon as they arrived, Wang Chi realized that there were only three people from his team, while the other two universities had only sent one person each.

They were all big names in this circle, and it was common for them to meet at various academic conferences. Like today, Wang Chi felt a little embarrassed. He felt like Beijing University's Computer Science Department loved to take advantage of people. When they heard that the conference was going to be held at Paradise Club, three people came.

Shen Heping already knew that this exchange was organized by Xia ruofei.

However, he had heard Zhao Yongjun's introduction and knew that Xia ruofei was the chairman of paradise Corporation. Although the Paradise Corporation had been very popular recently, in Shen Heping's eyes, Xia ruofei was just a successful businessman. At most, he was just an internet celebrity.

As a scholar, he was always filled with a sense of superiority in front of a businessman. This seemed to be a natural chain of contempt.

Therefore, Shen Heping did not show any respect to Xia ruofei because of his identity.

Especially when he heard Xia ruofei and Song Wei's teasing, Shen Heping was even more furious. He said lightly, "Director Xia, I've already said that Junior Sister Song and I are senior and junior, but you still asked her to call me teacher. What do you mean by that?"

Chapter 3152 Blasted off the stage (1)

Shen Heping didn't even want to talk about supercomputers today.

Because that wasn't his main research area, he wouldn't be able to talk much. As for the basic stuff like Guo Qian and Li Yufu, he disdained them.

Although the scope of today's exchange was very small, the people attending were of very high levels.

Needless to say, academician Wang Chi was Lu Zhou's direct boss and a big name in the domestic Computer Science field. Guo Qian and Li Yufu were also well – known figures in the domain.

Shen Heping naturally wanted to show his face at this exchange, not just to freeload off the free entertainment of the Paradise Club.

Therefore, he had prepared what he felt was the proudest content.

Especially when he saw that Song Wei was present today, it was a pleasant surprise for Shen Heping. This also strengthened his idea of explaining the original content today. It was perfect to talk about this part in front of Song Wei.

Shen Heping even thought that this was the arrangement of the heavens.

He confidently walked to the podium and turned on his laptop.

The staff came over and connected the MDT cable reserved on the podium to Shen Heping's laptop. Then, he wanted to help Shen Heping set up the computer and output the computer content to the projector.

However, Shen Heping waved his hand and said indifferently, "I won't project the screen for now. I'll do it myself when I need it."

Switching the shortcut keys wasn't a high – Level operation. Most people who used the computer screen often knew it. The staff member saw that the expert had such a request and naturally would satisfy it. He nodded, then bowed slightly and retreated to the side.

Shen Heping opened the PowerPoint on his computer, but because the projector screen was not turned on, no one could see the contents of the PowerPoint.

Shen Heping operated his computer for a while before straightening up. With a confident smile on his face, he said, "Today, I want to talk to you about the cutting edge of Computer Science, which is my main research field ..."

When Shen Heping said this, Wang Chi, who was sitting in the audience, couldn't help but frown slightly. He was the leader of Beijing University's Institute of Computer Science, so he naturally knew the research direction of the researchers, professors, and associate professors. Although Shen Heping had only made a simple opening remark, Wang Chi had already guessed what Shen Heping was going to say.

Wang Chi naturally knew that the content of Shen Ping's speech had nothing to do with the main topic of today's exchange. He faintly felt that it was somewhat inappropriate.

However, as a leader, he still had to consider the face of his subordinates.

This was especially so for a young and arrogant Associate Professor who had returned from abroad like Shen Heping. His self – esteem was even stronger, so Wang Chi didn't intend to remind Shen Heping.

Not to mention, for various academic conferences and academic forums at home and abroad, everyone's speeches might not really fit the theme. Under normal circumstances, the organizers would not be dissatisfied.

After all, there were still similarities in academia, especially in the branches of the same major field. Even if there were two completely unrelated branches, there might still be inspiration and references.

Wang Chi did not interrupt Shen Heping's speech.

As for Xia ruofei and Chen Xuan, they did not know what Shen Heping wanted to say. They were interested and wanted to hear Shen Heping's opinion.

Although Xia ruofei could feel Shen Pingping's hostility before the exchange, he did not underestimate Shen Pingping's academic ability.

In the field of Computer Science, many young and middle – aged experts had achieved great achievements. This was a young industry in itself. Shen Heping had the Golden signboard of a PhD student who had returned from a famous overseas University, so he should have some real skills.

Besides, Xia ruofei believed in Zhao Yongjun's sense of propriety. If Shen Heping was really an ignorant and incompetent person, Zhao Yongjun would definitely not let him participate in the exchange meeting, even if it was Wang Chi's face.

Hence, Xia ruofei was still listening to Shen Heping's speech very seriously.

Shen Heping glanced at Xia ruofei and Chen Xuan, who were as serious as primary school students. He felt a strong sense of achievement in his heart. He could not help but look at Song Wei who was beside Xia ruofei.

To his disappointment, Song Wei did not look at the podium. Instead, she sat upright and stared at a potted plant on the conference table. She was obviously not listening to him at all.

Originally, Song Wei did not know much about this professional stuff. She was just accompanying Xia ruofei today. Moreover, the person who spoke was Shen Heping, who she hated. Naturally, she did not even want to maintain her superficial courtesy and directly went into a daze.

Shen Heping was not discouraged. He firmly believed that the content of his speech would definitely attract Song Wei's attention, and he might even win her heart!

In any case, for the past few years, Shen Heping had always maintained this kind of mysterious self – confidence.

Shen Heping continued, "today, I would like to talk to everyone about some of our achievements in the field of artificial intelligence, or rather, some breakthroughs!" The topic of my speech today is 'Beijing University Computer Science Department's Shen Heping's research group on artificial intelligence Xiaowei's research progress and several innovative thoughts in the field of artificial intelligence'."

As soon as Shen Heping said this, Li Yufu and Guo Qian turned their heads and looked at each other. However, since it was none of their business, they did not say anything and chose to watch the show in silence.

Wang Chi's eyelids drooped as he scribbled on his notebook, not having any intention of saying anything.

Chapter 3153 Blasted off the stage (2)

Xia ruofei and Chen Xuan frowned at the same time. Of course, they did not question it just because of the title.

On the other hand, Song Wei's face darkened when she heard the topic of the speech. She raised her head and stared at Shen Heping.

Obviously, Shen Heping's research group didn't name this artificial intelligence "Xiao Wei" randomly, which made Song Wei very uncomfortable.

When Shen Heping spoke, he kept looking at Song Wei.

When Song Wei's angry gaze fell on him, he immediately showed a smile that he thought was very charming. Then, he pressed a shortcut key to output the contents of the computer screen to the projector.

Everyone immediately saw the contents of Shen Heping's computer on the projection screen.

The PowerPoint on this page had a big title, and there was a cartoon of a girl on the bottom left. It was probably the AI Xiao Wei.

This was normal. In the research of artificial intelligence, regardless of whether they were really intelligent or the commonly seen "artificial retards," most of them would have an anthropomorphic image, and most of them were female. After all, women were naturally more approachable.

Even Wang Chi could not help but frown at the cartoon figure. Chen Xuan and Xia ruofei were even more displeased.

Song Wei's face was as dark as water, and she looked at Shen Heping with disgust.

The reason was simple. The cartoon figure was too similar to Song Wei.

Her style of dressing, hairstyle, and appearance were at least 80% similar to Song Wei's.

"Associate Professor Shen, isn't this a little inappropriate?" Chen xuanxian asked with a frown.

Chen Xuan really treated Xia ruofei as his good friend. Song Wei was Xia ruofei's cultivation partner, but Shen Heping used Song Wei's image as an artificial intelligence to "train" her every day. If this was in the world of cultivation, he would have drawn his sword against her long ago.

Shen Heping had an innocent expression on his face as he shrugged his shoulders and asked, "Sir, what do you mean? I'm sharing my research results now. If you have any questions, wait until I'm done speaking, don't interrupt me. This is the most basic etiquette, don't you understand?"

In Shen Heping's eyes, Xia ruofei still had some weight. After all, Xia ruofei was richer than him! However, it was just a little bit, and the amount was very limited.

As for Chen Xuan, Shen Heping didn't even care about him.

The academic world had never heard of such a person. Moreover, he had been following Xia ruofei the entire day. He was obviously just a follower.

Therefore, Shen Heping was not polite at all when he spoke to Chen Xuan. In fact, he was even a little overbearing.

If the people in the world of cultivation knew that the young master of the first heaven society was treated as a follower by an ordinary person, they would laugh their heads off.

Xia ruofei stopped Chen Xuan with his eyes and said, "Associate Professor Shen, we're talking about the application of supercomputing today. The artificial intelligence you're talking about has nothing to do with today's topic."

"President Xia, you definitely know more about business than me, but in terms of scientific research ..." Shen Heping said casually, "some things still need to be done by professionals. How do you know that artificial intelligence and supercomputing have nothing to do with each other?"

Shen Heping's words were unreasonable. The research of artificial intelligence naturally required the use of supercomputers, but it had deviated from today's topic. This was an indisputable fact.

From the topic of the speech, one could tell that Shen Heping's speech today was to brag about his research results and use 'Xiaowei' to show off in front of Song Wei. Such content would not be of any help to Xia ruofei and Chen Xuan.

It was like the organizers had spent a lot of money to invite a singer to sing, but when he arrived at the venue, the singer did a stand – up comedy for everyone.

Xia ruofei and Chen Xuan looked at each other, not knowing whether to laugh or cry.

Shen Heping's self – righteousness made Xia ruofei feel that it was ridiculous.

He was too lazy to argue with Shen Heping, so he directly beckoned the staff member next to him over and ordered, "Turn off the projector and the microphone on the podium."

The staff of the Paradise clubhouse naturally didn't care if the other party was an expert or a professor. They would definitely listen to Xia ruofei.

So, he nodded without hesitation, then quickly walked to the temporary control desk next to him. He turned the microphone to the lowest volume, picked up the remote control, and turned off the projector.

Shen Heping did not expect Xia ruofei's solution to be so simple and brutal. His face turned ashen as he slammed the table and asked, "What's the meaning of this?"

Xia ruofei leaned back in his chair and said, ""Since Associate Professor Shen doesn't have a speech on the topic of this exchange meeting, then in order to save everyone's precious time, Associate Professor Shen doesn't need to speak. You can come down!"

Guo Qian and Li Yufu looked at each other. They had attended many social events, but this was the first time they had seen such a tense situation.

In the past, the organizers had always treated the experts and professors like Masters. They had never been as domineering as Xia ruofei.

Wang Chi was also caught off guard. Shen Heping was someone he had brought along. Although his performance was indeed a little outrageous, Xia ruofei's tough attitude was also beyond his expectations.

Wang Chi looked at Shen Heping's ashen face and cleared his throat, ""President Xia, Shen's research has some new things. Actually ... There's no harm in listening to it, right?"

Xia ruofei sat up straight and said, ""Academician Wang, I'm sure you know what we want to hear about this exchange. After all, we've already communicated with you and the leaders of the other two universities. I'm just a businessman. I may not understand the big picture, but I also know that time is precious, and wasting time is a shameful behavior! Moreover, what this Associate Professor Shen is teaching is not what we need at all. It won't bring us any benefits, so there's really no need to listen. "

Song Rui also rolled his eyes and said, ""We have a lot of things to do every day. How can we have the time to listen to his artificial intelligence? I think this Associate Professor Shen really doesn't know his place. Since there's nothing we want to hear, why did he come here and join in the fun?"

Song Rui had always been a person who didn't care about anything. He even dared to talk back to an academic Big Shot like Wang Chi, not to mention that Shen Heping's level was far from Wang Chi 's! He didn't even put people like Shen Ping in his eyes.

Wang Chi saw the other party's domineering attitude and revealed a trace of displeasure. He felt that he had lost face.

However, when he thought about the cautious attitude of the person who had entrusted him with this task, he quickly suppressed his unhappiness.

At Wang Chi's level, he was no longer just a scholar or an expert. To be more precise, he was a "feudal lord". He was not simply immersed in research. He had to consider all aspects of relationships and resources. Of course, all of this was to serve his academic career. But no matter what, Wang Chi was actually more like an official.

He naturally would not rashly offend those who obviously had a deep background for Shen Heping.

Thus, Wang Chi chose to keep his mouth shut.

In this way, Shen Heping was left hanging on the stage. His chest was rising and falling rapidly, and his expression was extremely ugly.

This was the first time he had faced such "humiliation" since he returned to the country. Perhaps his previous life had been too smooth, making him forget himself.

Shen Heping pointed at Xia ruofei with a trembling finger and said with hatred, ""You're all unreasonable! You guys don't understand academia at all, yet you're here pointing fingers! It's an insult to academia to talk about academics with you!"

Xia ruofei said calmly, "Associate Professor Shen, I advise you to come down yourself." Don't delay academician Wang's speech. "

At this point, Xia ruofei paused for a moment and glanced at Shen Heping indifferently. Then, he continued, ""If I were you, I'd come down myself. Otherwise, it won't look good when the security guards ask you to come down. Since you're not prepared for today's exchange, why don't you go out and take a look? The hot spring in the Paradise clubhouse is not bad. There's also a Western restaurant and a lingji private restaurant. The dishes there are also very special. You can go and try them. Just put it on my bill ..."

Chapter 3154 Dejected (1)

If he was invited by the organizer to taste the delicacies of the Paradise Club, enjoy the various services and facilities of the Paradise Club, and enjoy the beautiful scenery, Shen Heping would definitely be very happy.

However, under such circumstances, how could he be interested in enjoying the services of the Paradise clubhouse when he was forced to leave the venue in such a humiliating way?

He shouted angrily, "Xia ruofei!" This is an unreasonable suppression and wanton insult to an expert and scholar! Our Capital University will not let this go!"

Wang Chi couldn't help but frown slightly. On one hand, he didn't think that Shen Pingping would use the name of Capital University; At the same time, he felt that Xia ruofei had gone too far. At least, he had overreacted.

He believed that even though the Paradise Club was a relatively powerful host, they could still use gentler methods to deal with this matter.

Just as Wang Chi was about to speak, Xia ruofei's eyes turned cold. He looked at Shen Heping and said calmly, ""Associate Professor Shen, do you really not know why I wanted to kick you off the stage? If some things were revealed, it would not look good on everyone's face. Don't you know what you've been doing with this so – called artificial intelligence?"

Xia ruofei patted the back of Song Wei's hand and said, "Wei Wei, don't worry, I'll take care of this matter after it's settled,"

"En!" Song Wei gently nodded her head and said. Then, she glanced at Shen Heping in disgust.

"What little scheme?" Shen Heping said confidently, "do you know how much effort my research group has put into this artificial intelligence project? Today, this project was at the leading level internationally! Those laughable thoughts you spoke of are just your own conjectures!"

Wang Chi raised his eyebrows discreetly. Shen Heping had bragged in front of Li Yufu and Guo Qian, who were experts in the industry. Their research group had only been in this artificial intelligence project for less than half a year, and their so – called results were very limited. They didn't even have any obvious

advantages in similar domestic projects, let alone compared with some international professional institutions that had studied artificial intelligence for many years.

This kind of bull story was easily exposed.

The premise was that one had to be professional enough and have a good understanding of the industry.

Guo Qian and Li Yufu were obviously such professionals.

As for Xia ruofei...He did not need to know all this. Furthermore, he did not target Shen Heping because of the advanced AI. Shen Heping had named the AI Xiao Wei and even blatantly used Song Wei's image. This had already crossed his bottom line.

Everyone knew that artificial intelligence had to grow through a large number of machine learning. During this process, Xia ruofei could easily figure out how Shen Heping had trained this 'Xiaowei' and whether he had mixed in some private stuff.

Otherwise, Xia ruofei wouldn't have reacted this way if it was just a waste of time.

He just didn't want Shen Heping to continue explaining. Who knew if Shen Heping's PowerPoint presentation would contain more embarrassing content that would make Song Wei even more embarrassed?

Song Rui, who was at the side, saw that Shen Ping was pestering him and impatiently shouted, "RUO Fei, why are you wasting your breath on him? Just get someone to kick him out!"

"Don't you dare!" Shen Heping's eyes widened in anger.

Song Rui smiled contemptuously, turned around and shouted, "Security!"

"Director song!" Soon, the two security guards at the door pushed the door open and came in. "What can I do for you?"

"Throw him out!" Song Rui pointed at Shen Heping on the stage and said, "this guy is trying to cause trouble. Control him first and deal with him after the exchange meeting!"

"Yes!" The security guard replied.

"You dare!" Shen Heping immediately panicked. "This is simply lawless!"

The security guards did not care about Shen Heping's identity. They only listened to their leader because he was the one who gave them their jobs.

Therefore, they naturally turned a deaf ear to Shen Heping's words. They directly came forward and grabbed Shen Heping on both sides, dragging him out of the conference room.

How could Shen Heping's small body bear the weight of two burly security guards? no matter how hard he struggled, he was still dragged out involuntarily.

Shen Ping shouted with all his might, "what you're doing is illegal!" It was illegal detention! I'm going to Sue you! Teacher! Teacher! Please say something! Are we, the people of Beijing University, being bullied like this?"

Wang Chi's expression changed slightly, and he opened his mouth to say, ""President Xia ..."

"Academician Wang!" Song Rui interrupted Wang Chi. "Can we have a word in private?"

At this time, Shen Heping had already been dragged out of the conference room, and his curses were getting further and further away.

Wang Chi frowned slightly and looked at Song Rui and Xia Ruofei. He nodded silently and stood up.

Xia Ruofei smiled and said, "professors, I'm really sorry. I didn't expect such a farce to happen." Please take a break and have some snacks. We'll continue the meeting when Academician Wang comes back. "

With that, Xia Ruofei gestured to the staff, who immediately went to bring out the desserts and snacks that had been prepared for the tea break.

"It's fine, it's fine!" Guo Qian chuckled. Professor Shen was young and full of youthful vigor! President Xia, please forgive me!"

Chapter 3155 Dejected (2)

"Old Guo, President Xia knows what he's doing. Let's not talk too much!" Li Yufu said with a smile.

"That's true ..." Guo Qian smiled and nodded.

"Thank you for the reminder, professors," Xia Ruofei said with a smile. I still have a lot of questions I'd like to ask the two of you later, and I hope you'll be generous with your advice!"

"Hahaha! Good! Good!" Guo Qian said.

Xia Ruofei stepped out of the meeting room and scanned the room with his spiritual power. He found that Shen Heping was confined to a room on the third floor. Two security guards were watching him closely. They must have been warned, so they did not dare to shout.

Song Rui and Wang Chi were talking in the room next door.

Xia Ruofei also walked into the room.

In the room, Song Rui first revealed his identity to Wang Chi.

To be honest, Wang Chi was quite shocked when he found out about Song Rui's identity.

He was the grandson of a legendary figure like Elder Song!

What shocked Wang Chi even more was that Song Rui, who had such a powerful background, had been accompanying Xia Ruofei like a Lackey ...

After Song Rui revealed his identity, he said directly, ""Academician Wang, you must think that Ruofei and I overreacted today, right?"

Wang Chi thought for a while and said, "Mr. Song, I know that it might be because of the name and image of Shen's artificial intelligence project, but ..."

Wang Chi paused for a moment, then continued, "Actually, it's common for artificial intelligence to be personified. Usually, the image of an artificial intelligence is based on familiar people around it, or the characteristics of many familiar people combined together. This is common ..."

At this moment, Xia ruofei pushed the door open and walked in. He smiled and asked, "Academician Wang, I know what you're saying, but did Associate Professor Shen Pingping ask for Weiwei's opinion and permission before using this image? I don't think so, judging from Wei Wei's performance today!"

"He must have neglected this." Wang Chi said awkwardly, "but we're all from Beijing University. We should be able to negotiate after this ..."

Wang Chi was also quite tired of Shen Heping's matter, but as the leader of the Computer Science Institute, he had to help Shen Heping get out of it.

Xia ruofei smiled. "Academician Wang, I can tell you clearly. There's no room for negotiation."

Wang Chi's expression changed slightly, and he said, "President Xia ..."

"Academician Wang!" Song Rui said directly, "ruofei and I are not unreasonable people, but we are actually helping the Beijing University computer science research Institute. It's also a good thing that Shen Heping came to the exchange and even told us about the AI. "

"Young master Song, what do you mean?" Wang Chi asked.

Song Rui said, "I'm sure academician Wang doesn't know who Song Wei is." She's a member of the song family, so according to seniority, she has to call me uncle! Academician Wang, have you ever thought about what my Grandpa would think if he found out that a young girl from the song family was made into an artificial intelligence? What would they think of the Beijing University Institute of Computer Science?"

"Especially since this AI could be installed on a humanoid robot in the future," Xia ruofei said. "It'll be tested and ridiculed by various researchers, media reporters, and students like a toy ..."

There was one more thing that Xia ruofei did not mention, but Wang Chi was sure to know.

The humanoid robots were all very realistic, including their figures, skin, and so on. They were extremely close to real people.

Based on Shen Heping's feelings for Song Wei, if such a humanoid robot was created, it was obvious what kind of dirty things he would do to the robot ...

Wang Chi couldn't help but sweat, his heart filled with shock.

Song Rui continued, "academician Wang, you don't have to suspect Song Wei's identity. I have no reason to lie to you. It won't do her any good to pretend to be a member of the song family." She's just keeping a low profile and doesn't want people to know about her family background. I hope that after this, academician Wang Can continue to keep it a secret so as not to disturb her peaceful life. "

“Understood!” Wang Chi nodded. Please don’t worry about this, young master Song. My mouth is still quite tight.”

“That’s good. “Song Rui nodded and asked. Academician Wang, please handle today’s matter properly!”

“Thanks for the reminder!” Wang Chi nodded. Don’t worry!”

Then, Wang Chi turned to Xia ruofei and said,”“President Xia, the exchange meeting will be suspended for a while. I want to see Shen Heping first. Is that okay?”

Xia ruofei smiled and replied,”of course!” Academician Wang, this way please!”

Xia ruofei personally brought Wang Chi to the room on the third floor where Shen Heping was temporarily held.

After pushing the door open, he motioned for the two security guards to come out first. Then, he nodded at Wang Chi and left the room.

Only then did Shen Heping return to his senses. He quickly stood up and called out,”Teacher! Teacher! You’ve finally come to save me!”

Wang Chi frowned slightly and said,”“Are you exaggerating? They just didn’t want you to make a scene at the venue. Do you think they can really detain you? They are merchants, not bandits!”

“Teacher!” Shen Heping said aggrievedly. I don’t think these barbarians are any different from bandits! Look at Xia ruofei and song Rui’s behavior. I suspect that they are involved in ...”

“Enough!” Wang Chi rebuked,”before you speak ill of others, you should first look at yourself and see if there’s anything wrong with you!”

Shen Heping was stunned,”teacher, I ... What problem could I have?” Just because the content of the speech at this exchange meeting is not completely consistent with what they have requested, I have to be treated like this? Isn’t this too ridiculous?”

“Hmph!” Wang Chi snorted coldly and said,”you and I both know the real reason why they are so angry. You don’t have to say this in front of me, right?”

Shen Heping revealed an embarrassed expression as he lowered his head and said,”Teacher, regarding the name of the artificial intelligence and the cartoon image, I did not think it through, but ...”

In fact, Shen Heping still didn’t think much of it. If he was in the lighthouse Country where he studied abroad, this problem might be very serious, and the violation of portrait rights might cause him to go bankrupt. But after returning to his country, Shen Heping felt that such things were common, and it was not a big deal at all!

“Just lack of consideration?” Wang Chi frowned and asked,”you used Song Wei’s image and name. Don’t you have your own thoughts?”

Shen Heping lowered his head and did not say anything. In any case, he would not admit it even if he was beaten to death.

Wang Chi didn't want him to admit it, so he directly said, ""You should go back to school! Stop this artificial intelligence project and change it. Remove all the cartoon figures and change the name to a number temporarily!"

"Ah?" Shen Heping was taken aback. He raised his head and shouted, "teacher, how can this be? Now that the project was in a critical stage, if they stopped at this time, wouldn't they give others a chance to overtake them? Moreover, I don't think the cartoon image and name are a big problem. "

"You think?" Wang Chi snorted coldly and said, "do you think today's incident would still happen if it was useful?"

"But this project is the blood, sweat, and tears of our entire team for more than half a year ..." Shen Heping said in a hoarse voice.

"I'm the head of the Computer Science Institute. I have to consider this from the perspective of the entire Institute and even the entire school!" Wang Chi replied, "this matter has already been decided. I'm just informing you! All changes must be completed within a week! Before the rectification is completed, the research project's account will be temporarily frozen, and the subsequent project funds will also stop being allocated until the rectification passes my inspection!"

Shen Heping's face was ashen, there was no room for negotiation.

He was suddenly filled with endless hatred towards Xia ruofei, song Rui, and even song Wei ...

Wang Chi seemed to be able to see through Shen Heping's thoughts, and he said lightly, "Shen, you used to be my best student, and now you're the best researcher I've ever taken in. So, I'd like to give you a few words of advice ..."

Chapter 3156 The method of elimination (1)

"What do you think ..." Shen Heping said weakly.

"As a scholar, you should be more pure and focus on scientific research." Wang Chi said, "there are some things and some people that you and I can't get involved in! I don't want to see you regret it, and I don't want Beijing University Computer Science Department to be implicated because of you ..."

"Teacher, I don't quite understand ..." Shen Heping said in confusion.

Wang Chi gave Shen Heping a meaningful look and said, ""I'm afraid you don't want to understand! I'll just get straight to the point! Whether it's song Rui or Xia ruofei, or even song Wei, you can't afford to offend them. Besides, you're in the wrong this time, so I advise you to put away any thoughts of revenge, especially those against Song Wei. Otherwise, you'll probably get yourself killed!"

At this point, Wang Chi stared deeply at Shen Heping and said, word by word, "I can't even protect you!"

Shen Heping's eyes finally revealed a trace of fear as he said, ""How ... How is this possible? Teacher, you ..."

"That's all I can say, you can decide for yourself!" Wang Chi said, "hurry back to the station now. We'll start the reform today!"

Shen Heping's body trembled and he quickly replied, "I know, teacher ..."

Wang Chi said lightly, "Oh right, in the future, you can still call me professor Wang, academician Wang, or director Wang in front of others!" After all, I've never really taught your class or guided you on your thesis, so it's not appropriate to call me teacher. "

Shen Heping's heart turned cold, and his eyes revealed a look of regret. He lowered his head and said, "Yes, I know ..."

Xia ruofei was waiting outside the door. Of course, he did not eavesdrop on the conversation between Wang Chi and Shen Heping.

Seeing the door open and Wang Chi and Shen Heping walk out, Xia ruofei stepped forward to welcome them.

Wang Chi said to Xia ruofei, "Mr. Xia, I've talked to Shen. The research project will start to change today. We will completely remove and replace the relevant content."

"Alright!" Xia ruofei smiled and nodded. "Thank you, academician Wang."

"I've already asked Shen to rush back to the Computer Science Institute. " Wang Chi said, "he definitely won't go to the venue to cause trouble again. President Xia, do you think ... You can let him leave now?"

Xia ruofei smiled. "Of course! I'll send a car to drop off Associate Professor Shen!"

"Then I'll have to trouble you!" Wang Chi said.

Wang Chi and the others were picked up by the car sent by Tao Yuan club. If they didn't have a car, it would be difficult to get a taxi in this suburban area!

"You're too polite!" Xia ruofei said with a smile.

Then, he gave a few instructions to the security guards, asking them to coordinate the convoy to send a car over to send Shen Heping.

Wang Chi saw that Xia ruofei had made all the necessary arrangements and said, "President Xia, let's go back to the meeting room! Don't let little Guo, little Li, and the others wait too long!"

"Okay, academician Wang, this way please!" Xia ruofei said with a smile.

Shen Heping was led downstairs by the security guard to wait for the car, while Xia ruofei and Wang Chi took the stairs to the meeting room on the second floor.

Everyone turned to look at Xia ruofei and Wang Chi.

Xia ruofei smiled and said, "I'm sorry for taking up everyone's time. Let's continue!" Let's welcome academician Wang to give the main speech!"

The staff had already restored the projector, projection screen, and microphone. Wang Chi's PhD student, Feng Xiaoyi, who didn't have much of a presence, went up to adjust everything first. Wang Chi then got up and walked onto the stage.

Feng Xiaoyi sat down and used the remote control to help Wang Chi turn the pages. Wang Chi only needed to speak.

Before Wang Chi started his speech, Xia ruofei sat down and whispered into Song Wei's ear, "That matter has been resolved. Shen Heping will go back today to rectify it. All elements that involve you will be removed from this project."

"Yeah!" Song Wei nodded. With you around, I'm very assured ..."

Xia ruofei grinned. "Actually, I don't need to do it. If you want to deal with him, you can do it with a word."

Whether it was in terms of family background or personal strength, Song Wei could crush Shen Heping.

Even if she didn't use her family connections to deal with Shen Heping, as a cultivator, Song Wei had many ways to make Shen Heping disappear forever, and she wouldn't leave any evidence.

Of course, Song Wei would not be so crazy. After all, things had not reached that stage yet.

On the stage, Wang Chi had already started his speech. Xia ruofei also sat up straight and listened carefully.

Wang Chi's ranking was much higher than Guo Qian and Li Yufu's, and he was the finale of the day. Hence, Xia ruofei and Chen Xuan were looking forward to his speech.

Of course, Wang Chi did not disappoint them.

The content of his speech was also very consistent with the theme. It had always been centered around several supercomputer projects and analyzed from specific application examples.

The content of Wang Chi's speech was similar to Guo Qian and Li Yufu's, but an academician was an academician. The resources of the Beijing University of Computer Science and Technology Research Institute were obviously better than the capital University of posts and communications and the capital University of Aeronautics and Astronautics. Therefore, Wang Chi's speech was more substantial. Xia ruofei and Chen Xuan felt like their thirst had been quenched.

The two of them listened very seriously and took notes almost non-stop.

Wang Chi's speech lasted for almost an hour. When his PowerPoint reached the last page, Xia ruofei was the first to stand up and applaud. Everyone else followed suit.

Chapter 3157 The method of elimination (2)

On one hand, it was out of respect for Wang Chi's academic status. On the other hand, it was also because the content of his speech was indeed strong.

Wang Chi walked down the stage with a smile on his face and returned to his seat.

"Academician Wang, you're indeed a leading figure in your field," Xia ruofei said. "Your speech was very interesting!"

Wang Chi said humbly, "after I received the notice of this meeting, I spent a few days preparing. It was inevitable that I made some mistakes. I hope everyone can give me some advice!"

"I don't dare to give you any advice!" Xia ruofei smiled and said, "I think academician Wang's speech is very mature. It can be published in an SCI Journal!"

Guo Qian and Li Yufu both agreed with Wang Chi's statement.

The PhD student, Feng Xiaoyi, felt honored.

As a member of Beijing University's computer science research Institute, Feng Xiaoyi felt a little embarrassed after Shen Heping's incident. He was even more disdainful of Shen Pingping.

Fortunately, his teacher, Wang Chi, immediately regained his face.

Wang Chi smiled and waved his hand, "you're all too kind!" I don't deserve that!"

Even though he said that, Wang Chi was still a little proud of himself. Of course, he was pleased with himself because of the acknowledgment from his peers like Guo Qian and Li Yufu. As for Xia ruofei and Chen Xuan, he didn't think that these two young people would know much about professional stuff. He thought that their praise was more of flattery.

Even if they were "complimenting each other," they had to be of similar academic standards to feel a sense of accomplishment!

Xia ruofei and Chen Xuan looked at each other and said, ""Thank you to the three expert professors for your wonderful speech. I think it's almost time, so why don't we go to the cafeteria for lunch first, take a break at noon, and then we can have some exchanges in the afternoon?"

This morning's schedule was supposed to finish the entire meeting in half a day.

However, each expert's speech time was a little too long, and with Shen Heping's interlude, a lot of time had been wasted. Secondly, after listening to everyone's speech, Xia ruofei and Chen Xuan had both improved greatly. At the same time, they had accumulated a lot of questions. Hence, he considered holding the exchange in the afternoon to give them more time.

However, he had forgotten that the Qin Zhuan experts and professors were also human. They had come to this small exchange meeting not only to give face to the person who had entrusted them with the task, but also to see the legendary and extremely luxurious paradise clubhouse.

According to their original plan, they would finish their meetings in half a day, so they could have a good experience at the Paradise Club in the afternoon and evening.

Therefore, the three experts, including Wang Chi, objected to Xia ruofei's suggestion without hesitation.

Guo Qian was the first to say, "director Xia, it's only 11:30 now. I think it's still early!" Why don't we strike while the iron is hot and immediately enter the exchange session!"

"I also agree with elder Guo's opinion." Li Yufu said, "I've just heard everyone's speech, and I have the deepest impression of them. It might be better to communicate now!"

Wang Chi also smiled and nodded, "President Xia, there's no hurry to eat. We can talk to each other first!" He talked through the problem. I think we can even get the restaurant to pack some takeaway and we can eat in the conference room! That's not bad!"

"Academician Wang's suggestion is not bad!" Guo Qian immediately expressed his agreement.

"Work is the most important! I also agree!" Li Yufu said.

Xia ruofei and the others looked at each other, but Xia ruofei quickly guessed what the experts and professors were thinking. He smiled and nodded. "Then let's continue to the next segment!"

Then, he turned to Song Rui and said, "Xiao Rui, inform the restaurant to prepare the dishes first. Only start cooking after receiving the notice!"

Of course, he wouldn't let the experts and professors eat lunch. Besides, they were the ones who made the decisions at the Paradise clubhouse, so they could eat whenever they wanted.

"Alright!" Song Rui stood up and said, "then you guys talk first. I'll go to the restaurant to take a look."

After Song Rui left, Xia ruofei focused on communication.

Exchanging glances with Chen Xuan, he raised his own question, "Academician Wang, I'm very interested in your speech on using the supercomputer's method of elimination to solve practical problems. There are a few things that I don't understand, and I hope you can teach me!"

After that, Xia ruofei raised some of the questions he had after hearing about Wang Chi's case.

Xia ruofei's questions were all targeted. After all, his ultimate goal was to use a supercomputer to crack the secret of the floating point pattern on the token.

According to their speculations, each group of these floating point patterns likely represented a Chinese character.

There were about 3000 Chinese characters, and there were about 1000 to 2000 commonly used ones. Therefore, each set of floating point patterns had about 2000 to 3000 possibilities.

When all the floating point patterns were combined, the possibility would be an astronomical figure.

It was impossible to crack it by human strength.

This was also the reason why Xia ruofei and Chen Xuan thought of using supercomputers to crack the code.

And this kind of cracking actually used the method of exhaustion.

Supercomputers could do things that the human brain couldn't.

The supercomputer could list all the possibilities and compare them one by one.

Of course, the premise was that he had enough time and enough long – distance computing ability.

Hence, Xia ruofei was especially interested in the example of the law of elimination mentioned by Wang Chi and listened to it the most seriously. Xia ruofei and the others looked at each other, but Xia ruofei

quickly guessed what the experts and professors were thinking. He smiled and nodded.””Then let’s continue to the next segment!”

Then, he turned to song Rui and said,””Xiao Rui, inform the restaurant to prepare the dishes first. Only start cooking after receiving the notice!”

Of course, he wouldn’t let the experts and professors eat lunch. Besides, they were the ones who made the decisions at the Paradise clubhouse, so they could eat whenever they wanted.

“Alright!” Song Rui stood up and said,”then you guys talk first. I’ll go to the restaurant to take a look.”

After song Rui left, Xia ruofei focused on communication.

Exchanging glances with Chen Xuan, he raised his own question,””Academician Wang, I’m very interested in your speech on using the supercomputer’s method of elimination to solve practical problems. There are a few things that I don’t understand, and I hope you can teach me!”

After that, Xia ruofei raised some of the questions he had after hearing about Wang Chi’s case.

Xia ruofei’s questions were all targeted. After all, his ultimate goal was to use a supercomputer to crack the secret of the floating point pattern on the token.

According to their speculations, each group of these floating point patterns likely represented a Chinese character.

There were about 3000 Chinese characters, and there were about 1000 to 2000 commonly used ones. Therefore, each set of floating point patterns had about 2000 to 3000 possibilities.

When all the floating point patterns were combined, the possibility would be an astronomical figure.

It was impossible to crack it by human strength.

This was also the reason why Xia ruofei and Chen Xuan thought of using supercomputers to crack the code.

And this kind of cracking actually used the method of exhaustion.

...

Supercomputers could do things that the human brain couldn’t.

The supercomputer could list all the possibilities and compare them one by one.

Of course, the premise was that he had enough time and enough long – distance computing ability.

Hence, Xia ruofei was especially interested in the example of the law of elimination mentioned by Wang Chi and listened to it the most seriously. Of course, the premise was that he had enough time and enough long – distance computing ability.

Hence, Xia ruofei was especially interested in the example of the law of elimination mentioned by Wang Chi and listened to it the most seriously.

Chapter 3158 A full harvest (1)

After hearing Xia ruofei's question, Wang Chi showed a look of admiration.

The layman watched the show, while the expert watched the tricks.

From Xia ruofei's question, Wang Chi and the other experts could tell that Xia ruofei was really listening and could understand what they were talking about. It was not a meeting for show.

Wang Chi thought about it seriously for a while before saying, "President Xia, this is what we've been thinking about regarding the questions you've raised ..."

Then, Wang Chi began to explain the solutions they had come up with when they encountered these problems.

Guo Qian and Li Yufu were also listening attentively.

Wang Chi had long given up on the idea of doing errands. He was really serious about the academic Exchange.

When he got excited, he asked the staff to find a whiteboard, then he walked to the front and wrote down some key parts of the program on the whiteboard with a marker. He explained their ideas while writing.

Guo Qian and Li Yufu also joined the discussion. They weren't questioning the academician, but they were discussing Wang Chi's plan from an academic point of view.

The clash of ideas between the three industry big names could be said to be wonderful.

Xia ruofei and Chen Xuan naturally benefited a lot from it. They listened and noted it down, and their faces even revealed a look of enlightenment.

In theory, Xia ruofei and Chen Xuan were at least qualified. However, in terms of practical experience, none of the experts here were qualified.

The ingenious ideas of the three experts seemed to have opened a new door for Xia ruofei and Chen Xuan. The two of them were mesmerized.

In fact, Chen Xuan was reminded of the time when he had just stepped into the Qi refinement stage, when he had been enlightened by the teachings of the elders of the sect.

It was as if a mess had been sorted out in an instant. That comfortable feeling was enough to cure all OCD patients.

Without realizing it, everyone's discussion on the method of elimination had been going on for more than an hour, but they had no intention of stopping.

Even Wang Chi had found a new way of thinking from this discussion.

If he were to design this plan now, he felt that he would definitely be able to find a more concise and effective method.

The staff had already filled everyone's cups with water many times. When the experts were excited, they would go on and on, so the water consumption naturally increased.

As for Song Rui, Ling Qingxue, and Song Wei, who just came back from the restaurant, they were listening to a heavenly book. They were all speaking Chinese, but they couldn't understand a single sentence when they were combined together ...

Wang Chi and the others didn't end the discussion until 1:30 in the afternoon.

It was Xia Ruofei's suggestion. Otherwise, they could have talked for the whole afternoon.

These scholars were so immersed in the atmosphere of academic discussion that they completely forgot about the Paradise Club's services.

Xia Ruofei felt that the experts were not young anymore, especially Wang Chi. If something bad happened to him, he would not be able to bear the responsibility. Hence, he could not help but interrupt their discussion and ask them to go to the dining room for lunch.

Wang Chi and the others wanted to chat a little longer, so they all said that they were not hungry.

However, Xia Ruofei said that they could eat while they chatted. If they were not satisfied, they could continue eating in the meeting room. They left the meeting room reluctantly and took the electric car with Xia Ruofei and the others to the restaurant in the main building to eat.

Xia Ruofei was the one who organized the exchange meeting, so Zhao Yongjun and Song Rui were very concerned about him.

Therefore, today's lunch was especially sumptuous.

He had used the best Drunken Eight Immortals wine and ordered the 'Buddha Jumps Over the Wall' from the Lingji private restaurant. He had prepared it in advance yesterday. After all, many ingredients needed to be stewed with warm fire.

In addition to the Ling's private kitchen's signature dishes, they also had the club's Western restaurant's star chef personally cook exquisite and delicious Western food. There was steak, foie gras, caviar, escargot, and so on. The ingredients used for these Western dishes were all top – grade ingredients that had been air – flown over. After going through the skillful hands of a Michelin star chef, they looked, smelled, and were all complete.

This meal that combined Chinese and Western cuisine made several experts praise it, saying that such delicious food could not be found in the entire capital.

Everyone drank and savored the food while continuing The Unfinished Conversation in the meeting room.

It was a wonder to drink with an academic discussion.

However, the three experts and professors were enjoying it. When the discussion reached its peak, they said, "this place is wonderful, it's time for a Great White!" Then, he raised his head and drank, letting them experience the pride of a young man.

After the meal, Xia Ruofei and Chen Xuan were not drunk at all. It could be said that they had gained a lot. They already had a rough idea of how to solve the floating point pattern.

The three experts and Feng Xiaoyi, Wang Chi's PhD student, were almost drunk, and their steps were unsteady.

Hence, Xia ruofei called song Rui over and said, ""Xiao Rui, arrange for the specialists to soak in the hot spring to sober up. Then, if they have any needs, do your best to satisfy them. Just put it on my tab."

"Aren't you slapping my face!" Song Rui asked, "what do you mean by putting it on your tab? The other shareholders will definitely not have any objections. "

"There's no need ... It's rare for me to come to the club, and the dividends are all lying on my account." Xia ruofei smiled and said, "that's it then! I'm really not being polite with you guys!"

Song Rui pouted and said, "fine, fine, fine!" I know you're a tycoon! However, you just have to listen to us. Brother Zhao has already arranged it. If you don't have anything to do here, you can go and do your own things! Don't forget about the drinking tonight! Houzi and the others will be coming over!"

"Don't worry, I won't forget!" Xia ruofei said, "I'll rest at the clubhouse this afternoon. I won't be going out." When it's dinner time, just call me!"

"Alright!" "Okay," song Rui nodded and said. Then, he led the staff to arrange Wang Chi's next performance.

Xia ruofei led Mu Sheng and the others to the villa above the array.

The lakeside villa wasn't big, but it was the place with the densest spiritual Qi in the entire club.

They were all cultivators, so they naturally loved this kind of environment.

Walking into the villa, Mu Sheng couldn't help but praise, ""Little brother Xia, the concentration of spiritual energy in your array core is comparable to some places in our sect! This is really a treasure land!"

Xia ruofei chuckled and said, "it's similar to the corners of your sect with the thinnest spiritual Qi!" Senior mu, please don't make fun of our poor and remote village!"

"I'm not joking, little brother Xia. I'm really surprised that you can open up such a place in the secular world!" Mu Sheng said with a smile.

Liu Mansha also said with a smile, "it's said that the future generations are fearsome. Fellow Daoist Xia has perfectly interpreted this word!"

Xia ruofei quickly raised his hands and begged for mercy, ""Two seniors, please let me go! I'm blushing from all the praise!"

Everyone couldn't help but burst out laughing. Ling Qingxue, Song Wei, and Yu xiner covered their mouths and laughed.

Xia ruofei said, "everyone can look around. You can also find a place to rest. The spiritual energy in this basement is the densest. You can also go down and cultivate." I'll discuss a specific solution with brother Chen!"

Mu Sheng quickly said, "it's more important for you to get back to your business!" Don't mind us!"

“Brother Chen, please sit here!” Xia ruofei pointed at the tea table in the corner of the living room and smiled. “Let’s make tea and chat!”

...

Chen Xuan nodded his head and smiled, “Alright!”

The two of them sat around the tea table. Xia ruofei took out some tea leaves and said with a smile, “Brother Chen, after listening to today’s expert exchange, do you have any thoughts?”

“Seeing is better than hearing!” Chen Xuan chuckled. “There’s still a difference between theory and practice. Furthermore, I feel that if we were to really try it out, we might encounter all sorts of problems.”

“That’s for sure!” Xia ruofei started to boil the water and said, “but when that time comes, we can only rely on ourselves to solve it slowly. I think our biggest gain today is the method that experts and professors use to solve practical problems. It’s something that can’t be mastered no matter how many theories we learn.”

It was like doing questions before the college entrance examination. After one was familiar with it to a certain extent, it didn’t make much sense to do the same type of questions. Brushing up on questions was actually brushing up on the thought process of solving the questions, the thought process of solving different types of questions.

Xia ruofei continued. “I already have a rough plan in my head. Brother Chen, I’m sure you’ve gained a lot from this, right?”

“I did gain something,” Chen Xuan said with a smile. “Brother Xia, I’ll leave this crucial calculation to you!”

“Oh? Don’t you want to try, brother Chen?” Xia ruofei asked curiously.

“I also want to! However, I don’t have as much time as brother Xia ...” Chen Xuan chuckled in embarrassment. “I just received an email from my department’s boss. He said that there are a few bugs in another group’s code that can’t be solved. He wants me to help him take a look. As you know, finding bugs is more troublesome than writing code, so ...”

Xia ruofei didn’t know whether to laugh or cry. He stared at Chen Xuan for a long time before he said helplessly, “Fine! You’re such an outstanding employee, I can’t bear to let you leave the company ... Okay! Brother Chen, let’s exchange our thoughts first! I’ll summarize our opinions and try to come up with a plan first!”

“Alright!” Chen Xuan agreed readily.

...

Next, Xia ruofei and Chen Xuan discussed the specific implementation plan, which mainly revolved around the algorithm.

After the exchange, both of them had some inspiration, and many of them were similar, so the discussion process was very smooth.

In the end, Xia ruofei said, "brother Chen, I think it's almost done. However, sharpening a knife will not delay the work of cutting wood. Before I write the algorithm, I still need to do one thing."

Chapter 3159 Initial plan (1)

"Is there anything else?" Chen Xuan asked in confusion.

Xia ruofei said, "all of our work now is based on a certain judgment. That is, each set of floating point patterns represents a Chinese character. Right?"

"Of course!" Chen Xuan said.

"If this premise doesn't hold, then all the work we're doing now will be useless." Xia ruofei said.

Chen Xuan replied nonchalantly, "it's normal to take a few detours in the process of cracking such a mysterious token. Besides, whether it's useless or not, we'll only know after we've tried it!"

Chen Xuan didn't mind wasting a few days. Even though he had spent a lot of time and effort on this plan, he didn't think much of it. Even if it failed, it would at least eliminate a wrong path!

"Yes, let's not consider this possibility for now," Xia ruofei said with a smile. Let's go back to what I said just now ... Brother Chen, have you ever thought about what the most likely content formed by these Floating Points is if our premise judgment is correct?"

Chen Xuan pondered for a moment before saying, "this is really hard to judge, but I think it might be a cultivation technique." It couldn't be some meaningless words, right? If that's the case, why would you go through so much trouble to record it on the token?"

Xia ruofei did not think so.

The reason was simple. The Grand cloud platform scholar had told him that these floating point patterns would change every 50 years or so.

If it was a cultivation technique, then the content should be fixed. How could it change periodically?

However, this did not affect Xia ruofei's decision.

He smiled and said, "whether it's cultivation Arts or other content, we use the method of elimination to crack it. The problem is that there are too few samples. There are countless possibilities. How can the supercomputer rule out those impossible combinations? And how do you choose the most likely combination among the countless possibilities and arrange them in order?"

Without waiting for Chen Xuan's reply, Xia ruofei continued, "We can't control the number of samples. There's only one set, so we can only think of a way based on the judgment ability of the algorithm. This token is very old, so I need to find as many ancient language samples as possible, as well as information such as ancient language grammar, to form a database. I think this will be beneficial for the supercomputer to make a judgment. "

Chen Xuan and the others didn't know the exact age of the token.

Of course, Xia ruofei was not sure either. However, he knew that this token had existed for two to three thousand years. Hence, when he went to look for the ancient language samples, he could focus more clearly on his goal.

“That’s true!” Chen Xuan nodded. However, it’s not easy to write down the algorithm for this judgment!”

“If it’s too easy, wouldn’t there be no challenge?” Xia ruofei smiled and said, “brother Chen, I’m going to take some time this afternoon to sort out the framework. From tomorrow onwards, we’ll start working on the ancient language database. We’ll do this first.”

“I think it’s possible!” Chen Xuan nodded. “I’ll have to trouble brother Xia then. I ... I’ll take a look at the code that boss sent me ...”

Xia ruofei smiled bitterly and said, “fine!” Let’s do our own things!”

Xia ruofei and Chen Xuan took out their laptops from their storage space and sat in the living room of the villa, busy with their own work.

The afternoon passed by quickly.

At night, Xia ruofei’s friends from the capital all came to the Paradise clubhouse. Zhao Yongjun organized a gathering. It wasn’t easy for everyone to get together, so naturally, they had to drink and chat.

Xia ruofei brought along Song Wei and Ling Qingxue to the drinking party.

As for Mu Sheng, Chen Xuan and the rest, they were completely uninterested in such a noisy place. They all stayed in the villa above the array eye.

While Mu Sheng and the rest were busy with their training, Chen Xuan was still immersed in his world of coding.

In fact, Wang Chi and his group were also in the club, but they were in another private room, accompanied by one of the club’s management.

Xia ruofei also took the time to bring Song Wei and Ling Qingxue over for a round of toasts.

His main battlefield was still on Zhao Yongjun’s side.

Of course, he was the best at drinking in the room. Everyone had long given up on trying to get Xia ruofei drunk. The main reason was that they were happy together as brothers, so they had a few more drinks.

Other than Zhao Yongjun, who still had to manage things, he was more or less able to control himself. The others were all drunk. Song Rui was the first to collapse. If Xia ruofei had not held him up, he would have probably slipped under the table.

After three rounds of drinks, a club staff member walked in and whispered a few words into Zhao Yongjun’s ear. Zhao Yongjun nodded slightly.

Then, Zhao Yongjun said to Xia ruofei, “”Ruofei, academician Wang and the others are preparing to go back. Let’s go see them off!”

“Alright!” Xia ruofei immediately stood up and walked out of the room with Zhao Yongjun.

Wang Chi and the others also walked out of another private room not far away, a little tipsy.

This afternoon, they had been treated like a VIP at the Paradise clubhouse, and all the services were free. In the evening, they had tasted the best food that they couldn’t usually eat.

In addition, today’s exchange meeting was also quite carefree.

Therefore, after eating and drinking to their heart’s content, the experts were very satisfied.

“Academician Wang, Professor Guo, professor Li, and Dr. Feng, did you all have a good meal?” Zhao Yongjun smiled and asked.

Wang Chi chuckled and nodded, “I’ve had my fill!” Director Zhao, your hospitality is too warm! Thank you!”

“You’re too polite!” Zhao Yongjun smiled and said, “of course, we wouldn’t dare to neglect ruofei’s instructions! I’m afraid we won’t be able to serve you well!”

Wang Chi looked at Xia ruofei thoughtfully, then smiled and said, “President Xia, I realized that you’re pretty good in the field of Computer Science. Why didn’t you do research in the end? why did you start a business instead?”

Wang Chi’s tone carried a tinge of regret. He clearly felt that Xia ruofei’s business was a waste of his academic talent.

Xia ruofei chuckled. “Actually, whether it’s doing business or learning computer – related things, they’re all personal hobbies. I’ll just have some fun occasionally!”

Feng Xiaoyi, who was standing behind Wang Chi, was speechless. This kind of winner in life was really annoying. You created a company with a market value of billions just by playing around, and you have such a high level of expertise in the field of supercomputer application. How can we, poor PhD students, bear this?

At this time, the car that was supposed to send Wang Chi and the others back arrived. It was still a three – Car car ride. The Paradise clubhouse had around 20 of these commercial cars, which were specially used to provide pick – up services for important guests. Naturally, they wouldn’t just send one car to the experts and take all kinds of detours in order to save resources.

At this time, Zhao Yongjun took four envelopes from the staff around him and handed them to Wang Chi and the others. Even Wang Chi’s follower, Dr. Feng Xiaoyi, had one.

“Director Zhao, this ...” Wang Chi hesitantly took the envelope and asked, “this isn’t very appropriate, is it?”

“Ruofei is my good brother,” Zhao Yongjun said with a smile. “Several experts and professors have helped my good brother a lot this time. As his brother, I must express my gratitude.” Academician Wang and the other experts, this is a little token of my appreciation. Please accept it. ”

Wang Chi pondered for a moment, then nodded and said, "Alright then! Then, thank you, President Zhao!"

The organizers would usually pay for experts and professors like Wang Chi to participate in discussions or lectures. They didn't charge anything for coming to the Paradise clubhouse this time. As the organizer's representative, Zhao Yongjun had to pay for their transportation and appreciation, so Wang Chi and the others didn't feel any pressure accepting the invitation.

"You're too polite! Academician Wang, please get in the car!" Zhao Yongjun said with a smile.

The first car was for Wang Chi and Feng Xiaoyi, and the two cars behind were for Guo Qian and Li Yufu.

Xia ruofei stood beside Zhao Yongjun and waved goodbye to the car with a smile. After the experts and professors left, Xia ruofei said, "Thank you, brother Zhao!"

...

"We're brothers, so we naturally have to do things beautifully." Zhao Yongjun said nonchalantly, "you don't understand these things. As your brother, of course I have to help you take care of it. Otherwise, these old professors will think that you don't understand the ways of the world!"

"Brother Zhao is so thoughtful." Xia ruofei smiled and then asked curiously, "what kind of standard transportation fee did you prepare for them?"

Zhao Yongjun laughed. "You don't have to worry about that. They'll definitely be happy!"

.....

In the Mercedes – Benz of the Taoyuan clubhouse, Feng Xiaoyi held the thin envelope in his hand. He was a little excited, but at the same time, he was a little curious.

He didn't expect that he would be able to enjoy the service of a top – notch club after coming out with his mentor. He didn't even do much work, and he even had a share in the transportation fee before he left.

He saw that Wang Chi had already closed his eyes to rest. He could not help but gently open the envelope and take a look at the contents.

Feng Xiaoyi couldn't help but exclaim and immediately covered his mouth.

However, Wang Chi had already heard it. He opened his eyes, turned around, and frowned slightly. He looked at Feng Xiaoyi and asked indifferently, "What's wrong?"

Wang Chi thought to himself, "this little Feng is too rash and not steady at all. I'll have to teach him a lesson in the future!"

"Teacher, the transportation fee that director Zhao gave us ... Is a little too ..." Feng Xiaoyi stuttered.

...

"Too what?" Wang Chi asked impatiently, "if you have something to say, then say it. Why are you hemming and hawing?"

Wang Chi felt that Feng Xiaoyi was still inexperienced. This kid came from a small place, and although his academic ability was good, it was obvious that he was not very knowledgeable. Even if the Taoyuan club paid a little more than a regular meeting, he should not be so scared!

“You ... You should take a look yourself ...” Feng Xiaoyi said.

Wang Chi opened the envelope in confusion. After taking a look, he, who had just been criticizing Feng Xiaoyi, couldn't help but take a deep breath.

Chapter 3160 Returning the favor (1)

There was a thin card inside the envelope, but this card was not a bank savings card, but a spending card for the Paradise Club.

Thirty thousand Yuan.

The instructions on the back of the card clearly stated that Qin Zhuan was not an informal membership card of the Paradise Club. It was just a storage card, but when there was a balance in the card, one could use this card to enjoy various services in the Paradise Club. After the balance was used up, the card would be taken back.

Moreover, there were different levels to stored – value cards. The card that Zhao Yongjun had given out was naturally of a high level. With this card, they could enjoy the same treatment as Gold members. Gold members were the second – tier members, and most of the facilities and services of the Paradise Club were open to Gold members.

This transportation fee was much more generous than a normal meeting. It could be said that they were not in the same order of magnitude at all.

Today, Wang Chi and the others had just enjoyed the hot springs, food, and other services of the Paradise Club for free, so they knew the prices of the services here were much more expensive than the outside world. Of course, the quality was also much higher.

Even so, 30000 Yuan was enough for them to bring their friends here to have fun. If they were the only ones here, it would be no problem to use it three or four times.

Wang Chi glanced at the card in Feng Xiaoyi's hand. It was also 30000 Yuan.

It seemed like Zhao Yongjun didn't distinguish between their identities and gave them the same card.

Needless to say, Guo Qian and Li Yufu also received the same gold storage cards.

Just this alone had already cost him 120000 Yuan.

Wang Chi calculated that the two meals alone cost tens of thousands of Yuan. There were also hot springs, saunas, and fitness ... All of them were very expensive.

Wang Chi couldn't help but secretly sigh, “this is really a big move!”

Of course, from this perspective, Wang Chi could also see Xia ruofei's position in the hearts of Zhao Yongjun and the others. This was no ordinary care. It could be said that they had considered everything and were very respectable.

Feng Xiaoyi asked carefully, "teacher, this ... Isn't this a little too expensive?" I ... I don't dare to take it, you can take it!"

Feng Xiaoyi was here today to do odd jobs for Wang Chi. He didn't even get a chance to join in during the discussion. He was just a bystander. He came here and actually gave Wang Chi a 30000 Yuan storage card. He suddenly felt a little hot.

"Since it's from director Zhao," Wang Chi said indifferently, "you can just accept it. What's there to worry about?"

"I didn't do anything ..." Feng Xiaoyi said.

"Maybe President Zhao doesn't care about this. His perspective of the problem is different." Wang Chi said, "Xiaoyi, just keep it! Don't you have a girlfriend recently? I'll bring her here to play on the weekend. The environment here is quite good."

Naturally, Feng Xiaoyi wanted this stored – value card very much. However, he felt that he should not take a reward without doing anything. He felt a little uneasy in his heart. Since Wang Chi had said so, Feng Xiaoyi no longer had any concerns.

"Then ... Then Thank you, teacher!" He said carefully.

Wang Chi smiled and said, "why are you thanking me?" This is from director Zhao. If you want to thank someone, you should thank director Zhao and director Xia!"

"They're only doing this because of you, teacher. The one I want to thank is naturally you, teacher!" Feng Xiaoyi said with a smile.

Even though he had a PhD, it didn't mean he was a nerd. No matter how high an academic level a person was, it was impossible for them to be accepted as a disciple by an academician.

"Haha!" Wang Chi laughed and said, "you ... But speaking of thanks, I really have to make a phone call ..."

Wang Chi took out his phone and quickly found Xia ruofei's phone number. While they were talking, Xia ruofei and Wang Chi exchanged phone numbers and they added each other on WeChat.

When Wang Chi called, Xia ruofei was still fighting at the table.

He glanced at the caller ID and saw that it was Wang Chi. He didn't want to disturb his brothers 'drinking, so he told Zhao Yongjun, who was beside him, and got up to answer the call outside the room.

"Academician Wang, you're home already?" Xia ruofei asked with a smile.

"He's still on the way!" Wang Chi smiled and said, "I just saw the gifts that director Zhao prepared for us. This is a very kind thought! You scared our little Feng!"

"Hahaha! Brother Zhao just wanted to express his gratitude. The gift is not about the weight, but the heart and sincerity!" Xia ruofei laughed and said, "tell Dr. Feng to accept it without worry! There's nothing inappropriate about that!"

Xia ruofei didn't know what Zhao Yongjun had prepared for the experts, but since Wang Chi had called, it must be something expensive.

However, he didn't intend to ask clearly. It was fine as long as he understood what his brother was doing.

No matter how valuable it was, it was nothing to people of Xia ruofei and Zhao Yongjun's level.

"I still have to thank you!" Wang Chi said, "director Xia, not only did you provide us with a platform for Academic Exchange, you also let us teachers enjoy the service of a top club. After that, director Zhao even gave us such a valuable gift. This is all thanks to you, director Xia!"

Wang Chi was not a pedantic bookworm. He knew that the person he should thank was Xia ruofei, so he called Xia ruofei.

Xia ruofei laughed and said, "academician Wang, you're too kind. We should be the ones thanking you!" Chen Xuan and I have benefited greatly from this exchange. It has been of great help to us!"

"In fact, the communication between Professor Guo, professor Li, and I was a great inspiration for us. We got a lot of new inspiration through the collision! So let's thank each other!" Wang Chi laughed and said.

"I wouldn't dare!" Xia ruofei said.

"Mr. Xia," Wang Chi said, "you're organizing this exchange meeting. I guess you want to do something in the field of supercomputer application?"

"I do have plans in this area, but the idea isn't very mature yet," Xia ruofei said.

Of course, the matter of the token could not be known to the people of the secular world, so he could only vaguely explain it.

Wang Chi had been in academia for so many years, so he naturally knew the importance of confidentiality. He didn't ask further, but smiled and said, "If you have any questions in the future, you can come to me at any time! We can discuss it together! Also, if you need to coordinate some supercomputers, I should be able to help!"

Xia ruofei's eyes brightened. He had wanted to find someone through elder song and get them a supercomputer for their use, but asking elder song for help was a bit overkill.

Wang Chi happened to be a big name in his field. He was also an academician and a member of various committees. Wang Chi had a lot of say in the evaluation of titles and awards, so there wouldn't be any problems if he were to coordinate things.

More importantly, supercomputers were very busy most of the time. If they wanted to occupy the time, they had to make use of every opportunity. If elder song came forward, no matter how difficult it was, they would have to squeeze out some time, which might delay the progress of some important scientific research projects.

Since Wang Chi had come forward, he would naturally assess the situation from a professional point of view and allocate his time in a scientific manner, so as to achieve the best of both worlds.

Xia ruofei was overjoyed, "that's great!" I'll have to thank you first, academician Wang!"

Wang Chi laughed and said, "just give me a call if you need anything!" I can still help you with this small matter!"

"Thank you! Thank you!" Xia ruofei said.

In the Mercedes – Benz, after Wang Chi hung up the phone, he said to Feng Xiaoyi, ""We Chinese pay attention to reciprocity. Now, we can accept their kind intentions."

Feng Xiaoyi smiled and said, ""Teacher, you're so thoughtful."

Wang Chi smiled and then contacted Guo Qian and Li Yufu to talk about this "thought". Soon, the three of them came to an agreement. If Xia ruofei needed any technical guidance in the future, they would spare no effort in contacting him, including when it came to coordinating the supercomputer.

After all, everyone had different resources at hand, so it was naturally easier to get things done by contacting many parties.

...

Furthermore, Guo Qian and Li Yufu had also received the same gifts. Wang Chi naturally wouldn't let them idle around. It was only fair for everyone to work together!

.....

In the Paradise clubhouse, Xia ruofei returned to the private room.

Zhao Yongjun clinked his glass with Xia ruofei's and the two of them drank together. Then, Zhao Yongjun smiled and asked, ""Is academician Wang looking for you?"

Xia ruofei laughed. "Brother Zhao, the gift you prepared is too expensive. I feel a little uneasy."

"He's just being polite!" Zhao Yongjun said, "he's an academician, what hasn't he seen? How can I not accept such a small gift?"

Xia ruofei laughed. "But brother Zhao, you're very considerate. You've really helped me!"

"Oh?" Zhao Yongjun suddenly became alert. "What do you mean?"

Xia ruofei told Zhao Yongjun about what he had told Wang Chi on the phone. He smiled and said, ""I was just thinking about who to ask for help with this super computer! Academician Wang offered to help us solve this problem, and if we have any technical questions, we can ask him at any time. Don't you think this gift is very useful?"

Zhao Yongjun chuckled and said, "it's a human society!" Everyone would carry a sedan of flowers! This academician Wang is an interesting person! Since he spared no effort to help you, I will definitely repay him at the appropriate time!"

Xia ruofei poured himself a glass of wine and said, ""Brother Zhao, there's no need to thank me. It's all in the wine!"

...

"Hahaha! Good brother!" "Cheers!" Zhao Yongjun said forthrightly.
