

God tier Farm 3161

Chapter 3161 An amazing night (1)

After eating and drinking, Xia ruofei asked the staff to arrange for the drunk song Rui and the others to rest in the guest rooms. He also instructed them to have someone take care of them to prevent them from suffocating in their sleep.

Then, he chatted with Zhao Yongjun, who was about 60 – 70% drunk, before bringing Song Wei and Ling Qingxue back to the villa above the array.

Mu Sheng and the others all found their own rooms and went back to rest.

Chen Xuan was the only one who was still under the living room's light, looking at his coding on his laptop.

He raised his head and looked at Xia ruofei. "Brother Xia, you're back!"

"MMH! The bug hasn't been resolved yet?" Xia ruofei asked, "what is yang Xincheng doing? Why do I have to rely on you to solve everything? What if you're not in the company anymore?"

Chen Xuan chuckled. "I'm sure that chief yang doesn't care about these specific matters. The reason why he assigned this job to me is mainly because I'm more efficient. In the future, when I leave the company, other people will be able to take on these tasks."

Xia ruofei forced a smile and said, "I feel like this Paradise Mall project has become your obsession!"
Alright, you can continue with your work! We're going back to our room, you should rest early too!"

"Got it!" Chen Xuan waved his hand.

The villa was not big, so there was a limited number of rooms. Since there were so many people today, Xia ruofei, Song Wei, and Ling Qingxue could only occupy one room.

To Chen Xuan and the rest, Song Wei and Ling Qingxue were both Xia ruofei's cultivation partners. It was no problem for the three of them to live together.

However, Xia ruofei was well aware of this, so he was prepared not to sleep tonight.

The three of them entered the largest master bedroom.

Xia ruofei looked at the wide Simmons bed and coughed. "Um ... Weiwei, Qingxue, you guys sleep in the bed tonight. I have to rush to write the algorithm architecture, so I might not be able to sleep."

Ling Qingxue chuckled. "Staying up late isn't good for your health. Besides, you guys aren't in a hurry. Why write through the night?" Let's just sleep together! The bed is big enough anyway ..."

Song Wei blushed and pinched Qingxue's arm secretly. She whispered, "You, how dare you say anything?"

Ling Qingxue chuckled and said, "what are you afraid of?" Does he really dare to do anything to us?"

Xia ruofei didn't know whether to laugh or cry, "alright! I admit defeat, okay? You guys go wash up and sleep! I'm not sleepy after drinking, so I can sort out the thoughts I had during the day. "

Ling Qingxue wanted to tease Xia ruofei a little more, but Song Wei dragged her to the master bedroom's bathroom to wash up.

Xia ruofei sat down cross – legged on the bay window. He took out a laptop from the space, calmed his mind, and began to write code.

After a while, Xia ruofei heard the sound of running water coming from the bathroom. He could not help but be surprised.

Ling Qingxue and Song Wei were taking a bath together?

He had thought that the two of them were just washing up inside, but he didn't expect them to be taking a bath together.

He was naturally very familiar with their bodies, so he couldn't help but start to imagine the scene in the bathroom. He suddenly felt an evil fire surging up.

Xia ruofei quickly took a few deep breaths and forced himself to focus on his computer screen.

But the more he didn't want to hear it, the more the sound of water seemed to drill into his ears.

The Golden core stage cultivator Xia ruofei had no choice but to use his vital Qi to seal off his hearing to escape from that alluring voice.

After a while, Song Wei and Ling Qingxue walked out of the washroom. Xia ruofei almost vomited blood again.

Both of them were wearing silk pajamas with suspenders, showing off their exquisite figures.

The two of them both had storage rings, so they were probably quite sleepy.

Song Wei was still a little shy and lowered her head while blushing. Ling Qingxue walked around Xia ruofei on purpose and smiled. "Ruofei, are you really not going to sleep? Then we're going to rest?"

Xia ruofei turned his face away and said with a bitter smile, "Qingxue, stop it ... Go to sleep!"

After finally coaxing the two to sleep, Xia ruofei sat by the bay window and started to code.

However, there were two close female friends sleeping not far away from him. Furthermore, they were dressed so seductively. How could Xia ruofei calm down so easily?

If not for the fact that he was afraid that everyone would misunderstand, he would have even thought of accompanying Chen Xuan in the living room. The atmosphere there was more suitable for coding farmers!

Xia ruofei wrote and stopped. Finally, he calmed down and focused more on the algorithm architecture.

After listening to Wang Chi and the rest's exchange, especially the free discussion segment, Xia ruofei had gained a lot of inspiration.

The knowledge that had stopped at the theoretical level was now connected to actual practice.

He had turned many of his thoughts during the day into code that could be recognized and operated by the supercomputer.

In fact, the process of cracking the logic was very simple.

The first step was image recognition, which required him to accurately identify each set of floating point images.

The next step was to list out the possibilities of the Chinese characters corresponding to each set of floating point patterns and then combine them according to the existing floating point patterns. This step could only be completed by a supercomputer, and the possibilities were astronomical. The human brain could not calculate all of them in a lifetime.

As for the third step, it was to make a logical judgment, eliminate the answers that were not smooth at all, and rank them according to the probability. This step was the most challenging step. The machine itself would not make a judgment, so it must be given a judgment logic.

This was also the reason why Xia ruofei had to search for sufficient information on the ancient language and make a matching database.

This process sounded simple and clear, but to really put it into practice, every step had to be done with code, which was not so simple.

There would be many problems in every process that Xia ruofei had to solve.

He gradually immersed himself in the world of coding. As his logic became clearer and he solved more and more problems, Xia ruofei felt that his brain was getting more and more active and excited.

Before he knew it, it was already three in the morning.

In order not to disturb Song Wei and Ling Qingxue's rest, Xia ruofei had already turned off all the lights in the room.

Song Wei opened her eyes in a daze and turned to see Xia ruofei sitting by the bay window. His fingers were still flying on the keyboard of his laptop. The faint light from the computer screen reflected his extremely focused face.

The drowsy Song Wei was in a daze for a moment. She felt that Xia ruofei's focused look was especially charming. She was a little mesmerized by him even with her head tilted ...

At this moment, Xia ruofei stopped and stretched. Then, he took out a bottle of spirit pool water from the spirit map space and took a few gulps.

Song Wei quickly looked away. Her face was still a little hot because she felt that her actions just now were a little infatuated ...

Song Wei thought for a while, then gently lifted the blanket and got out of bed.

...

Xia ruofei heard the noise and turned around immediately. When he saw Song Wei, he raised his hand to look at his watch. He was so focused on his work that he had forgotten the time. When he saw Song Wei, he thought it was already morning.

It was only threeo' clock when Xia ruofei quickly asked,"Wei Wei, why are you up at this time? Did I wake you up?"

"No..." Song Wei said,"I had a dream and then I woke up ..."

Afraid of waking Ling Qingxue up, the two of them spoke very softly.

"Oh, oh! Then you should go to sleep!" Xia ruofei said,"it's still early! I can still sleep for a few hours ..."

"Ruofei, why don't ..." Song Wei hesitated for a moment and said,"why don't ... You sleep on the bed for a while too!"

She mustered up the courage to say this, but her face and even her ears had already turned red.

Ever since she got together with Xia ruofei, Song Wei had always had a slight psychological barrier, and that was because of Ling Qingxue.

No matter how coincidental their relationship was, Song Wei could not escape the fact that she only became Xia ruofei's girlfriend after Xia ruofei and Ling Qingxue were together.

Therefore, whenever she and Ling Qingxue were by Xia ruofei's side, she would always consciously weaken her presence. Even when she was alone with Xia ruofei, she would have a slight psychological barrier when it came to intimate behavior and needed Xia ruofei's careful guidance.

This was the first time the three of them were in the same room.

...

That was why Song Wei could not fall asleep at first. However, she did not dare to open her eyes to look at Xia ruofei.

After that, she finally fell asleep in a daze. The quality of her sleep wasn't good either. She kept dreaming and had completely woken up just now.

However, when Song Wei saw Xia ruofei sitting by the bay window alone and the focused expression on his face, her heart melted in the quiet midnight. It was as if a barrier had been broken.

Xia ruofei was slightly stunned. He hesitated and said,"This ... This isn't very good! Besides ... I'm not sleepy!"

"Even if you're not tired, you should still sleep!" Song Wei insisted,"you're so young. Do you want to be like those cultivators who don't eat or drink? Then what's the fun in living?"

"Hehe! "Of course not ..." Xia ruofei laughed drily."It's today's ..."

"Qingxue and I are both your girlfriends. What does that have to do with you?" Song Wei said,"besides ... I only told you to go to bed and sleep. I ... I didn't tell you to do anything bad ..."

Song Wei endured her shyness as she finished her sentence. Her face was already burning hot.

Xia ruofei could not help but laugh when he saw Song Wei's pouting face.

He looked at the sleeping Ling Qingxue and asked after some hesitation, "If Qingxue finds out tomorrow ..."

Song Wei rolled her eyes and said, "Qingxue wouldn't care! Don't you know her well enough?"

Xia ruofei thought for a while and nodded. "Alright then! I'm really tired, so I'll sleep for a while ..."

Xia ruofei would not be a man if he still refused after all that was said!

Chapter 3162 The horse doesn't stop_

Xia ruofei did not take another shower. Instead, he took out a set of pajamas from the spirit map space and changed into a Kasaya. For a cultivator at Xia ruofei's level, he was basically spotless. Ordinary dust could not even get close to his body. Most of the time, taking a shower was a long – term habit. It was already so late today, so he did not take a shower again to avoid waking Ling Qingxue up.

Song Wei blushed when Xia ruofei changed into his pajamas. She lowered her head and said, "You ... You can sleep in the middle! I'll come back after I go to the washroom!"

Xia ruofei was also excited and said, "Good! Good!"

He carefully climbed onto the bed and lay down beside Ling Qingxue.

The pillow and bedding on the bed had a faint fragrance. When Xia ruofei smelled the fragrance, he felt relaxed and happy.

Soon, Song Wei returned to the bed. She looked at Xia ruofei and hesitated for a moment before she lifted the blanket and lay down. However, her body was a little stiff. She lay flat on the bed and did not move.

Xia ruofei said softly, "Weiwei, lie down a little more!" Be careful not to fall down when you're sleeping in that position ..."

"Oh ..." Song Wei replied in a panic. Then, she moved her body slightly, but it was probably only a few centimeters.

Ling Qingxue was fast asleep, and Song Wei's heart was beating like a deer.

Even though she had shared the same bed with Xia ruofei many times, this was the first time the three of them were lying on the same bed together.

Seeing this, Xia ruofei stretched out his right hand and passed it under Song Wei's neck. He put his arm around Song Wei's shoulder and moved her body closer.

Song Wei's body trembled slightly, but she did not resist. She moved her body.

Xia ruofei did not retract his arm. He just lay behind Song Wei's head. This position gave Song Wei a sense of security.

Of course, this seemingly warm sleeping position was impossible for an ordinary person to last through the night. Their arms would soon go numb.

Of course, Xia ruofei did not have such a problem.

He put his arm around Song Wei's shoulder and said softly, "Wei Wei, go to sleep!"

"En!" Song Wei said in a soft voice.

Naturally, she would have some wild thoughts in her heart. Even though she knew that Ling Qingxue was right beside her and that Xia ruofei would not overstep the boundaries, how could she not feel a little moved when she was lying beside Xia ruofei?

Therefore, Song Wei could not fall asleep until she heard Xia ruofei's breathing become long and deep. Then, she gradually fell into a deep sleep.

.....

The next morning, when Xia ruofei woke up, he felt a pair of long legs on top of his. In his arms was Song Wei, who was curled up like a kitten and sleeping peacefully.

Xia ruofei did not need to look to know that the leg belonged to Ling Qingxue.

Xia ruofei was very clear that Ling Qingxue had never been a good sleeper.

At that moment, Song Wei and Ling Qingxue were still asleep. Xia ruofei decided to stay still. On one hand, he did not want to wake the two of them up and wanted them to sleep as much as possible. On the other hand, he also felt that it was not a good idea to wake up first in this situation.

For a cultivator in the Golden core stage, it did not seem difficult to maintain a posture and pretend to be asleep.

Of course, it was already bright outside, so Song Wei and Ling Qingxue wouldn't sleep for too long. After all, they used to have a very regular schedule. One had to go to school, and the other had to go to work, so their biological clocks were relatively normal.

When it was almost eight o'clock, Ling Qingxue was the first to wake up.

At first, she thought that she was rolling around in her sleep and had put her legs on Song Wei's body. However, she soon noticed the familiar aura on Xia ruofei. She could not help but pull her hair aside, rub her eyes, and let out a cry of surprise.

The sound was not loud, but it was enough to wake Song Wei up.

Song Wei opened her drowsy eyes. When she saw Ling Qingxue, she quickly made a shushing gesture and said softly, "Qingxue, don't wake him up. He only fell asleep at three o'clock last night ..."

"What's the situation?" Ling Qingxue also asked softly, "how did this guy sleep between us?"

Song Wei blushed and said, "When I woke up in the middle of the night yesterday, I saw that he was still working on his computer at three o'clock, so I advised him to go to bed and rest for a while. It was too hard to stay up all night ..."

"Oh ..." Ling Qingxue rolled her eyes and asked, "you're the one who let him sleep in the middle?"

"Which side do you think is more suitable for him?" Song Wei asked.

Ling Qingxue thought about it and smiled. ""That's true ... But I usually sleep very soundly at night. Did this guy do anything bad?"

Song Wei didn't know whether to laugh or cry. She thought to herself, Qingxue, you're no longer an innocent girl. Don't you know this little bit of common sense? No matter how deep your sleep is, you can't possibly not feel anything when RUO Fei did "bad things," right? Not to mention, that guy was as strong as a bull ...

Thinking about this, Song Wei's face couldn't help but heat up.

Ling Qingxue's interest was piqued and she asked, ""Did he really do something bad?"

"Silly girl, don't you feel what he did?" Song Wei blushed and said. How is that possible?"

"Of course I feel it," Ling Qingxue said, grinning. "I mean, did he bully you while I was asleep?"

Chapter 3163 The horse doesn't stop_Song Wei's face turned even redder. She lowered her eyes and said, "What kind of nonsense are you thinking about? How could we be so ridiculous ..."

"Of course you won't, but I can't be sure about this guy." Song Wei looked at Xia ruofei, who was still "sleeping" and said with a smile.

"No," Song Wei replied shyly. Don't let your thoughts run wild. He was so tired last night that he fell asleep as soon as he lay down ..."

"Oh, oh ..." Ling Qingxue was a little disappointed. "I thought something exciting was going to happen!"

"Let's not talk here," Song Wei quickly said, "we don't want to wake him up!" Get up first! Be gentler ..."

"I know!" Ling Qingxue pouted and said, "you're so good to this guy ..."

Even though Ling Qingxue said that, when she really got out of bed, she was still very light.

The two of them got off the bed carefully. They did not make any noise or cause any vibration. This made Xia ruofei, who had been pretending to be asleep, feel moved.

Of course, he couldn't "wake up" right now. Since he was pretending to be asleep, he had to do it properly. Otherwise, if Song Wei and Ling Qingxue saw through him, it would be hard to say what the two of them would do in their embarrassment and anger!

Hence, Xia ruofei decided to wait for the two of them to wash up. When they were almost done, he stretched lazily and pretended to have just woken up. He rubbed his drowsy eyes and leaned against the door frame of the bathroom. He asked in a sleepy tone, ""You guys are up so early?"

When Song Wei heard the voice, she turned around and asked, ""Ruofei, did we wake you up because we were too loud when we washed our faces?"

Xia ruofei yawned and said, ""It's getting late, I should get up!"

Ling Qingxue wiped her face with a towel and said casually, ""Since you're awake, let's get ready for breakfast! They should be here by now!"

Xia ruofei knew that Mu Sheng and the others didn't like to join in the fun, especially when the restaurant at the club was filled with ordinary people from the secular world. So, he had asked Zhao Yongjun to arrange for someone to send breakfast over early in the morning.

Xia ruofei nodded and said, "yes!" I'll go out after I wash my face. You guys should get ready!"

In fact, they didn't have much to prepare. Both of them had storage rings, so they had brought a complete set of face wash, skin care products, and some of their favorite clothes with them. After washing up, they just packed their things and changed into a new set of clothes.

"Okay, give us a few more minutes. It'll be ready soon!" Song Wei said.

Very quickly, Song Wei and Ling Qingxue had finished packing their things and left the bathroom. It was Xia ruofei's turn to wash.

Then, the three of them left the room together and went to the villa's restaurant on the first floor for breakfast.

Everyone tacitly kept quiet about the three of them sharing the same bed last night. However, Xia ruofei could feel that the atmosphere between the three of them had gradually changed.

This was good news for Xia ruofei.

He couldn't wait for such things to happen a few more times. Even if he couldn't really sleep with them in the future, at least he wouldn't always feel like he was walking on thin ice when he was with his two confidants!

During breakfast, Xia ruofei asked for the opinions of Mu Sheng and the others. He asked if they would like to stay at the Paradise clubhouse or go to the siheyuan.

According to the plan, they might have to stay in Beijing for a few more days.

After all, the library here had all kinds of materials and journals, and the resources were more abundant. Moreover, Wang Chi and other expert professors were all in Beijing, so the algorithm writing work was completed in Beijing. If there were any problems, it would be more convenient to look for information or consult experts.

Originally, Xia ruofei thought that Mu Sheng and the others would choose to stay in the peach Garden Club.

After all, this place was closer to the environment of a cultivation sect. Basically, if one stayed in the villa above the array eye, they could cultivate 24 hours a day. However, the concentration of spirit Qi was still a distance away from those top sects.

On the other hand, the courtyard house was quiet, but the cultivation environment was not as good.

He didn't expect that Mu Sheng and Liu Mansha would choose to return to the siheyuan at the same time.

According to them, the environment of the courtyard house was more to their liking, and they were not used to living in such a modern villa.

As for cultivation, since he was only staying for a short time, he could just use spiritual crystals to cultivate for two to four hours a day.

Xia ruofei naturally respected Mu Sheng and the others' opinions. Besides, if they lived in a courtyard house, it was closer and more convenient to go to the National Library or Capital University.

Hence, Xia ruofei contacted Zhao Yongjun and asked him to arrange for two commercial cars, as well as his Elfa. The three cars left Taoyuan clubhouse and returned to the liuhai Lane courtyard in the city.

Xia ruofei prepared to go to the library. His main purpose was to search for more information on the ancient language. He had brought a portable hard disk. As long as there was an electronic version of the information, he was prepared to copy it to improve the database.

Large libraries also provided copies of electronic documents, but they had to pay a certain fee.

Xia ruofei naturally did not care about the cost. Besides, it was only natural for him to pay for knowledge.

Chen Xuan wanted to continue working on the code for the Paradise Mall project, so Xia ruofei asked him to stay in the courtyard house. He then brought Song Wei and Ling Qingxue to the National Library.

For the past few days, he had brought Song Wei and Ling Qingxue with him wherever he went, mainly for safety reasons.

After all, it was impossible for him to trust Mu Sheng, Liu Mansha, and the others without any reservations. Now that everyone knew that Song Wei and Ling Qingxue were his Dao partners, these two girls, in a sense, were his weak spot.

If he really had ulterior motives, even Chen Xuan could easily subdue Song Wei and Ling Qingxue by himself, let alone intermediate golden core cultivators like Mu Sheng and Liu Mansha.

Even though it was a rare occurrence, Xia ruofei would never allow any accidents to happen. When it came to the safety of the people around him, he could never be too careful.

Song Wei and Ling Qingxue did not feel bored at all. Xia ruofei usually did not spend much time with them, but during this period, they were almost always together. Even if they had to spend the whole day in the library with Xia ruofei, they were still happy to do so.

Xia ruofei stayed in the National Library for an entire day. He made a copy of a large number of ancient texts, focusing on the documents from the pre – Qin period. After all, he already knew that the rising Dragon Order had already appeared in the ancient cultivation world. Thus, the texts from that era were naturally more valuable for reference.

After returning to the courtyard house from the library, Xia ruofei started to work through the night.

The structure of the algorithm was already very clear. All that was left was to fill in the code.

Therefore, his focus was on the comparison database, which was also very important. It could provide a reference standard for the computer, so that the computer could arrange the most likely correct combination of answers according to rationality.

Today, Xia ruofei had really stayed up all night. He was almost non – stop working in front of the computer.

He didn't stop even after dawn. After a simple breakfast, he immediately went back to work.

If he was not a cultivator but an ordinary person, he would have died easily after a few days of such intense work. Chen Xuan was also a little upset. He temporarily put aside his work at paradise Corporation and came to help Xia ruofei.

Xia ruofei's focus was on the important database while Chen Xuan started to help Xia ruofei fill in the algorithm structure that she had already prepared. If he was not a cultivator but an ordinary person, he would have died easily after a few days of such intense work. Chen Xuan was also a little upset. He temporarily put aside his work at paradise Corporation and came to help Xia ruofei.

Xia ruofei's focus was on the important database while Chen Xuan started to help Xia ruofei fill in the algorithm structure that she had already prepared.

Chapter 3164 Super computer (1)

Hearing that Xia ruofei and Chen Xuan had finished writing the algorithm, Mu Sheng and the others came over.

However, everyone, including Song Wei and Ling Qingxue, could not understand the dense code on the screen.

"Little brother Xia, can we crack the secret of the token with this?" Mu Sheng asked hesitantly.

Xia ruofei smiled."Of course, it's not that simple. First of all, brother Chen and I need to check the algorithm further to make sure that there are no major problems." In addition, it needs to be run on a supercomputer, and the supercomputer will crack it. "

"Speaking of which ..." Chen Xuan asked,"brother Xia, can you contact the time of the supercomputer now?"

Xia ruofei nodded and said,"yes!" It's good to confirm it in advance. Let's check the algorithm again and again. I think it will only take one or two days. "

If it were an ordinary programmer, it would be impossible for them to finish checking such a complex algorithm in one or two days. It was also impossible for an ordinary programmer to write this algorithm in such a short time.

However, Xia ruofei and Chen Xuan were different. One to two days was more than enough for them.

After Xia ruofei finished speaking, he took out his phone and dialed Wang Chi's number.

The phone rang a few times before Wang Chi picked it up. He laughed heartily and said,""President Xia! Are you looking for me to discuss a problem or something related to the supercomputer?"

Xia ruofei couldn't help but laugh. Academician Wang was a straightforward person.

He said,"academician Wang, I do want to trouble you to contact them. Can you help me find some supercomputer time ..."

Wang Chi chuckled. "I've always been very concerned about your matters. I've been helping you contact people these past few days." Speaking of which, your luck is pretty good. I was thinking that it would be good if I could coordinate with the timing of the Tianhe No. 1 or the Tianhe No. 2. I didn't expect the result to be better than I expected ..."

"Oh?" Xia ruofei's eyes brightened. "Could it be the light of Taihu territory?" he asked.

"Hahaha! President Xia is indeed smart! I guessed it right!" Wang Chi said with a smile, "it's just that if we use God's power to build the light of Taihu territory, we need to go to new Wu city. I wonder if it's convenient for you, director Xia?"

"Convenient! Of course, it's convenient!" Xia ruofei quickly said.

The light of Taihu territory was one of the top supercomputers in Huaxia, and it was ranked in the top three in the world. This supercomputer was developed by the National parallel computer Engineering Research Center and installed in the National supercomputer, Xin Wu Center. That was why Wang Chi said that to use the light of Taihu territory, one had to go to Xin Wu city.

From Xia ruofei's perspective, he naturally hoped to use the best supercomputer.

And the light of Taihu territory, which was supported by Shen Wei, was obviously the best choice.

It should be known that this supercomputer only took four hours to complete the calculation task that "Tianhe No. 2" would take more than 20 hours to complete in the testing of the supercomputer's standard program.

This meant that its computing speed was far superior to the previous "Tianhe No. 2" supercomputer.

Xia ruofei quickly asked, "academician Wang, is Shenwei in a hurry to build the light of Taihu territory?" Can you really free it for us to use?"

Wang Chi did not answer Xia ruofei's question directly. Instead, he asked, "How long do you think it will take?"

Xia ruofei pondered for a while and calculated in his heart. He didn't expect to have the opportunity to use the divine power to support the light of Taihu territory, so he didn't estimate the time.

After a while, Xia ruofei said, "it'd be best if it can last for ten hours. If it doesn't work, eight hours will do!"

"Swish!" Wang Chi shouted, "your thing ... Has such a large computational ability?"

"Is it hard to coordinate?" Xia ruofei asked, "if we really can't do it, let's settle for the second best?"

"There shouldn't be any problems!" Wang Chi said, "however, you will have to wait for three days. I will inform you after I confirm the specific time of use. Also ... I'll accompany you to new Wu. If there's really not enough time, I'll help you coordinate on the spot!"

Xia ruofei couldn't help but feel touched. Wang Chi's favor was too big.

What if there wasn't enough time and the algorithm they wrote was only halfway through? If Wang Chi accompanied him, this problem would be easily solved. With his reputation, he could still delay the matter for a while.

"Thank you so much!" Xia ruofei said sincerely, "academician Wang, we will take care of the transportation and accommodation problems. You just need to let me know the exact time!"

"Alright!" Wang Chi laughed and said, "don't take it to heart, Mr. Xia. I have something to do at the new Wu Supercomputer Center anyway. I'll help you guys coordinate your in – Flight schedule!"

Xia ruofei smiled and said, "no matter what, you've done us a great favor!" Thank you so much!"

Wang Chi was helping Xia ruofei with all his might not only because of the 30000 Yuan storage card. As an academician, he wouldn't do anything for 30000 Yuan. It was mainly because Wang Chi could see that Xia ruofei was different from the rest. These details included the leader who invited him to the exchange meeting a few days ago, Zhao Yongjun, Song Rui, and the others' attitudes towards Xia ruofei.

Chapter 3165 Super computer (2)

Wang Chi felt that Xia ruofei was worth his time and effort to befriend, which was why he did this. Otherwise, let alone a storage card, even if it was an official Paradise Club membership card, it wasn't something that they needed. There was no need to be so enthusiastic!

"You're welcome! You're welcome!" Wang Chi chuckled and said, "I'll let you know if I have any news! You just need to be prepared. "

"Alright, alright!" Xia ruofei said.

After Wang Chi hung up the phone, Xia ruofei told Chen Xuan and the rest about the situation. Everyone was very happy.

There were still three days left, so Xia ruofei and Chen Xuan did not have to be in such a hurry.

They could easily check the algorithm program and even try to run a small sample in a home computer environment to check if there were obvious logic errors in the algorithm.

At the same time, Xia ruofei called the private jet paradise to prepare for its flight to the capital city in three days. At the same time, he applied for a flight route from the capital city to new Wu city in advance.

If Wang Chi accompanied them to the Supercomputing Center at new Wu, Xia ruofei and the rest would not be able to take the airboat.

Moreover, Wang Chi was getting on in years, so he had to make his travels as comfortable as possible.

At this time, a luxurious private jet would be very useful.

Hearing that Xia ruofei and Chen Xuan had finished writing the algorithm, Mu Sheng and the others came over.

However, everyone, including Song Wei and Ling Qingxue, could not understand the dense code on the screen.

“Little brother Xia, can we crack the secret of the token with this?” Mu Sheng asked hesitantly.

Xia ruofei smiled; “of course, it’s not that simple. First of all, brother Chen and I need to check the algorithm further to make sure that there are no major problems.; In addition, it needs to be run on a supercomputer, and the supercomputer will crack it. ”

“Speaking of which ...” Chen Xuan asked, “brother Xia, can you contact the time of the supercomputer now?”

Xia ruofei nodded and said, “yes!” It’s good to confirm it in advance. Let’s check the algorithm again and again. I think it will only take one or two days. ”

If it were an ordinary programmer, it would be impossible for them to finish checking such a complex algorithm in one or two days. It was also impossible for an ordinary programmer to write this algorithm in such a short time.

However, Xia ruofei and Chen Xuan were different. One to two days was more than enough for them.

After Xia ruofei finished speaking, he took out his phone and dialed Wang Chi’s number.

The phone rang a few times before Wang Chi picked it up. He laughed heartily and said, “”President Xia! Are you looking for me to discuss a problem or something related to the supercomputer?”

Xia ruofei couldn’t help but laugh. Academician Wang was a straightforward person.

He said, “academician Wang, I do want to trouble you to contact them. Can you help me find some supercomputer time ...”

Wang Chi chuckled. “I’ve always been very concerned about your matters. I’ve been helping you contact people these past few days.” Speaking of which, your luck is pretty good. I was thinking that it would be good if I could coordinate with the timing of the Tianhe No. 1 or the Tianhe No. 2. I didn’t expect the result to be better than I expected ...”

“Oh?” Xia ruofei’s eyes brightened. “Could it be the light of Taihu territory?” he asked.

“Hahaha! President Xia is indeed smart! I guessed it right!” Wang Chi said with a smile, “it’s just that if we use God’s power to build the light of Taihu territory, we need to go to new Wu city. I wonder if it’s convenient for you, director Xia?”

“Convenient! Of course, it’s convenient!” Xia ruofei quickly said.

The light of Taihu territory was one of the top supercomputers in Huaxia, and it was ranked in the top three in the world. This supercomputer was developed by the National parallel computer Engineering Research Center and installed in the National supercomputer, Xin Wu Center. That was why Wang Chi said that to use the light of Taihu territory, one had to go to Xin Wu city.

From Xia ruofei’s perspective, he naturally hoped to use the best supercomputer.

And the light of Taihu territory, which was supported by Shen Wei, was obviously the best choice.

It should be known that this supercomputer only took four hours to complete the calculation task that “Tianhe No. 2” would take more than 20 hours to complete in the testing of the supercomputer’s standard program.

This meant that its computing speed was far superior to the previous “Tianhe No. 2” supercomputer.

Xia ruofei quickly asked, “academician Wang, is Shenwei in a hurry to build the light of Taihu territory? Can you really free it for us to use?”

Wang Chi did not answer Xia ruofei’s question directly. Instead, he asked, “How long do you think it will take?”

Xia ruofei pondered for a while and calculated in his heart. He didn’t expect to have the opportunity to use the divine power to support the light of Taihu territory, so he didn’t estimate the time.

After a while, Xia ruofei said, “it’d be best if it can last for ten hours. If it doesn’t work, eight hours will do!”

“Swish!” Wang Chi shouted, “your thing ... Has such a large computational ability?”

“Is it hard to coordinate?” Xia ruofei asked, “if we really can’t do it, let’s settle for the second best?”

“There shouldn’t be any problems!” Wang Chi said, “however, you will have to wait for three days. I will inform you after I confirm the specific time of use. Also ... I’ll accompany you to new Wu. If there’s really not enough time, I’ll help you coordinate on the spot!”

Xia ruofei couldn’t help but feel touched. Wang Chi’s favor was too big.

What if there wasn’t enough time and the algorithm they wrote was only halfway through? If Wang Chi accompanied him, this problem would be easily solved. With his reputation, he could still delay the matter for a while.

“Thank you so much!” Xia ruofei said sincerely, “academician Wang, we will take care of the transportation and accommodation problems. You just need to let me know the exact time!”

“Alright!” Wang Chi laughed and said, “don’t take it to heart, Mr. Xia. I have something to do at the new Wu Supercomputer Center anyway. I’ll help you guys coordinate your in – Flight schedule!”

Xia ruofei smiled and said, “no matter what, you’ve done us a great favor!” Thank you so much!”

Wang Chi was helping Xia ruofei with all his might not only because of the 30000 Yuan storage card. As an academician, he wouldn’t do anything for 30000 Yuan. It was mainly because Wang Chi could see that Xia ruofei was different from the rest. These details included the leader who invited him to the exchange meeting a few days ago, Zhao Yongjun, song Rui, and the others’ attitudes towards Xia ruofei.

Wang Chi felt that Xia ruofei was worth his time and effort to befriend, which was why he did this. Otherwise, let alone a storage card, even if it was an official Paradise Club membership card, it wasn’t something that they needed. There was no need to be so enthusiastic!

“You’re welcome! You’re welcome!” Wang Chi chuckled and said, “I’ll let you know if I have any news! You just need to be prepared. ”

“Alright, alright!” Xia ruofei said.

After Wang Chi hung up the phone, Xia ruofei told Chen Xuan and the rest about the situation. Everyone was very happy.

There were still three days left, so Xia ruofei and Chen Xuan did not have to be in such a hurry.

They could easily check the algorithm program and even try to run a small sample in a home computer environment to check if there were obvious logic errors in the algorithm.

At the same time, Xia ruofei called the private jet paradise to prepare for its flight to the capital city in three days. At the same time, he applied for a flight route from the capital city to new Wu city in advance.

If Wang Chi accompanied them to the Supercomputing Center at new Wu, Xia ruofei and the rest would not be able to take the airboat.

Moreover, Wang Chi was getting on in years, so he had to make his travels as comfortable as possible.

At this time, a luxurious private jet would be very useful. If Wang Chi accompanied them to the Supercomputing Center at new Wu, Xia ruofei and the rest would not be able to take the airboat.

...

Moreover, Wang Chi was getting on in years, so he had to make his travels as comfortable as possible.

At this time, a luxurious private jet would be very useful.

Chapter 3166 Group heading to_

“That’s too costly ... Actually, we can just take a civilian flight ...” Wang Chi muttered.

The PhD student behind him, Feng Xiaoyi, had a new look in his eyes as he looked up at the beautiful Gulfstream G650.

Wang Chi’s status was quite distinguished. He was an academician. According to his rank, he could enjoy high – speed rail business class, train soft sleeper, or plane first – Class. It was not that he had never seen the world, but it was his first time taking a private plane.

Xia ruofei smiled and said, “this is the company’s plane. It’s not expensive. As long as it can improve travel efficiency, it doesn’t matter. Academician Wang, please!” Let’s talk on the plane!”

“Alright! Alright!” Wang Chi said.

Xia ruofei made an inviting gesture and let Wang Chi walk in front of him. He was half a step behind Wang Chi and they walked towards the accommodation ladder of the public jet paradise.

A beautiful Chinese flight attendant stood by the accommodation ladder to welcome them with a charming smile on her face.

After stepping into the cabin, Wang Chi was even more dazzled by the luxurious decorations.

Wang Chi was still in a relatively good state, at least he maintained a certain degree of calmness.

And his student, Dr. Feng Xiaoyi, was like a grandmother Liu entering the Grand View Garden.

Feng Xiaoyi was originally a scientific research worker under Wang Chi. Working for a Big Boss like Wang Chi, his life was quite comfortable. The project funds were also more abundant. When the project progressed smoothly, the boss would give them bonuses or something. Compared to the average PhD student, he was definitely not suffering.

However, even when he went to academic conferences with his supervisor, he had to squeeze into Economy Class or second – Class seats on the high – speed rail. He had never enjoyed such a luxurious private plane before.

After Feng Xiaoyi got on the plane, he didn't even know where to put his hands. Under the dreamy atmosphere lights of the plane, the handmade leather seats, the smooth walnut strips, the soft Italy wool carpet, and other facilities all looked even more high – end. He was afraid that he would accidentally knock them, as he really couldn't afford to pay for it!

After Xia ruofei guided Wang Chi to his seat, he also noticed Feng Xiaoyi's awkward situation. He smiled and said, "Dr. Feng, please put away your luggage first!"

Feng Xiaoyi seemed to wake up from a dream and quickly said, "Oh, oh! Alright! Alright!"

Xia ruofei guided Feng Xiaoyi to put their luggage into the luggage compartment and arranged a seat near the front cabin for Feng Xiaoyi.

Mu Sheng and the rest had also boarded the plane. Wang Chi and Feng Xiaoyi then realized that none of them had any luggage with them. They were basically all on empty – handed planes. Only Xia ruofei and the two beautiful girls beside him had a small bag with them.

Xia ruofei quickly arranged everyone's seats.

The four airline seats in the middle of the cabin were reserved for him, Song Wei, Ling Qingxue, and Wang Chi.

Mu Sheng and the others weren't interested in dealing with academicians from the secular world. They were people from two different worlds. If it wasn't for this incident, they wouldn't even have had any contact with each other.

So, they all sat in the front seats with great interest, looking at the most advanced business plane that mankind had.

Chen Xuan sat on the sofa diagonally opposite Xia ruofei and the others. There was also a seat belt installed here, and it would be convenient for him to communicate with Wang Chi when needed.

Xia ruofei sat down beside Wang Chi, and opposite them were the beautiful sisters, Song Wei and Ling Qingxue.

After all the passengers had boarded the plane, the flight attendant checked and confirmed with Xia ruofei before closing and locking the cabin door. He then went to the cockpit to report to the captain.

Very soon, the flight crew received permission from the control tower. They had already applied for the flight route in advance and reported to be ready on time, so everything went smoothly.

Basically, not long after everyone sat down, the plane was pushed out. When the nose of the plane faced North, the cart began to slowly glide.

Wang Chi subconsciously raised his hand to look at his watch. It was 9:55.

It had only been about 20 minutes since he had gotten off the plane at the business terminal and the plane had begun to taxi – in. This included the security checks of more than ten people, as well as the time bu Fang had walked through a certain passageway before boarding the plane.

At 10 O' clock sharp, the public jet paradise, which was waiting at the runway entrance, was allowed to enter the runway and take off after an Airbus A320 landed and left the runway.

Captain Liu An controlled the plane to make a turn at the end of the runway. After aiming at the runway, they, who had already done a pre – take – off inspection, directly pushed the accelerator to the take – off thrust.

The sound of the engine of the peach origin suddenly became much louder, and its speed suddenly increased. It began to glide on the runway at high speed.

This runway could accommodate the take – off and landing of heavy aircraft such as the Boeing 787 dream plane, so paradise was naturally more than enough.

When he glided at high speed to about half the length of the track, he had already reached the wheel – lifting speed of VR.

Captain Liu An gently pulled the control stick back, and the plane suddenly leaped up lightly and rushed into the clear blue sky.

As the plane continued to climb, Wang Chi looked out of the porthole at the rapidly shrinking ground buildings. He couldn't help but feel that Qianqian had indeed saved a lot of time by taking the business jet. At least she could save a few hours of waiting at the airport, and she also had a lot more freedom.

However, the cost was naturally much higher. If time was money, then the time saved was not cheap.

Chapter 3167 Group heading to_

Of course, Wang Chi also knew that the values of rich people were different. If they were all economic accounts, there would not be so many rich people who would buy private planes and yachts. After all, even if these big toys were not moved, the daily maintenance costs were not something that ordinary people could afford.

The plane was climbing very fast and entered the cruising altitude in a short time. The captain also turned off the seat belt indicator light in time.

The two flight attendants began to serve fruits, drinks, alcohol, and snacks.

Xia ruofei unbuckled his seat belt, stood up and smiled.””Everyone can walk around and look around. You can also go to the cockpit, but you have to enter one by one and in an orderly manner!”

Mu Sheng, Liu Mansha, and the others were really interested in the cockpit of the plane. After all, except for the fact that the speed of the plane was slightly slower, its performance was actually quite close to

that of an airboat. Also, the plane did not need any spiritual energy. Without any means of the cultivation world, such a heavy 'iron block' could fly. Naturally, they were very curious.

In addition to Mu Sheng and Liu Mansha, Feng Xiaoyi also wanted to visit the cockpit. However, he was a step too slow, so he stood outside the cabin door and waited.

In fact, Mu Sheng and Liu Mansha couldn't tell at all. Facing the dense meters and display screens in the cockpit, the two intermediate jiedan stage cultivators couldn't help but feel a little dizzy.

After taking a cursory look around, Mu Sheng and Liu Mansha left the cockpit. Feng Xiaoyi, who had been waiting outside, couldn't wait to go in.

Xia ruofei smiled and said to Wang Chi, "Academician Wang, you're not going to take a look?"

Wang Chi chuckled and said, "let the youngsters see!" I'm not really interested in these things ..."

At this time, Ling Qingxue, who was sitting opposite him, couldn't help but ask, "Academician Wang, it's said that the computing speed of the light of Taihu territory is among the best in the world. How fast is this supercomputer?"

Ling Qingxue's question was a bit of a noob question, but it was clear that this was not the first time Wang Chi had faced such a question. He smiled and said, "Miss, our divine power engine, the light of Taihu territory, is the world's first supercomputer with a computing speed of more than one billion times per second. Its peak computing speed has reached 1.254 billion times per second. To put it bluntly, the calculation of the light of Taihu territory every minute requires 7.2 billion people in the world to hold a calculator and calculate for 32 years continuously. "

Wang Chi's analogy might not be very accurate, but it was indeed very direct.

After Ling Qingxue heard this, she couldn't help but take a deep breath and exclaim, "This is too amazing!"

Direct numbers sometimes didn't have any shocking effect. The divine power engine light of Taihu territory's computing speed could reach one billion or two billion times per second. For people who didn't understand this, it didn't seem to make any difference.

However, with the addition of an image comparison, with all of humanity working together with a calculator in each hand, continuously calculating for 32 years, the image was immediately created.

This was only equivalent to a minute of calculation required by the light of Taihu territory. The huge difference immediately set off the awesomeness of this supercomputer.

It was obvious that Wang Chi had been asked this question many times, so he gave such a vivid answer almost without thinking.

"It's all thanks to academician Wang," Xia ruofei said with a smile. "Otherwise, we wouldn't have been able to get such good resources!"

Wang Chi smiled. "You're welcome, President Xia. I can only say that you're all really lucky. Even I didn't expect things to go so smoothly!"

“You’re the one with the most face!” Xia ruofei laughed.

Wang Chi then asked with concern, “by the way, have you guys tested your algorithm?” Do you need me to help you go through it again? If there’s a problem with the algorithm, it would be a waste of time. ”

Xia ruofei was very confident in the code that he and Chen Xuan had checked together. He smiled and said, “Thank you for your concern, academician Wang. There shouldn’t be any problems with the algorithm. We’ve tested it a few times in the simulated environment, and at least there are no obvious bugs. The probability of error is not very high.”

Wang Chi nodded and said, “that’s good!” That’s good! After all, the time when Shenwei built the light of Taihu territory is precious. It would be a pity if it was wasted because of the algorithm. ”

“I don’t believe that will happen!” Xia ruofei smiled and said, “oh yeah, academician Wang, our project is very confidential. I wonder what the Xin Wu Supercomputing Center ...”

Wang Chi chuckled and said, “don’t worry about that!” The Supercomputing Center has strict confidentiality regulations, and their staff will not touch your data. You can copy the final result and delete it completely. After this supercomputer was put into use, it has simulated many important projects in the fields of aerospace, Meteorology, and drug screening, including the accurate simulation of the return path of the Tiangong -1. These projects are all top – secret, and the new Wu Supercomputing Center has not been leaked so far!”

Xia ruofei was relieved to hear that.

At the same time, after listening to Wang Chi’s introduction of the items, he was more confident in cracking the secret of the token.

For example, the calculation of the return path of the “Tiangong No. 1” involved countless variables. The amount of calculation needed to precisely simulate the return path was very large, and the divine power engine, light of Taihu territory, could easily complete it, which was enough to prove its powerful performance.

Wang Chi and Xia ruofei then talked about the application of supercomputers.

After all, the old man had limited energy. After chatting for a while, he leaned back in his chair and closed his eyes. Xia ruofei sat beside Chen Xuan and took out his laptop. The two of them continued to check the algorithm code.

In fact, this algorithm program had been checked a few times. Xia ruofei and Chen Xuan could not find any bugs in it. It was just to kill time.

At about 11:30, the business jet, paradise, landed steadily on the runway of the new Wu airport.

It was drizzling in new Wu, and the clouds were very thick.

During the approach phase, the plane was slightly bumpy in the airflow. However, Liu An’s crew’s Flying Standard was very high. They still managed to control the plane to smoothly pass through the clouds and land smoothly.

The runway was a little wet and slippery, but the length of the runway was more than enough for a small plane like the Gulfstream G650. Therefore, the crew did not feel any pressure. They just activated the reverse thrust and the automatic brakes as usual. After the plane taxied at high speed for a while, its speed suddenly dropped, then it left the runway and entered the runway.

After the plane stopped at the parking space next to the business terminal, the flight attendant immediately opened the cabin door and lowered the accommodation ladder. Then, he used an umbrella to send Xia ruofei and the others under the eaves seven or eight meters away.

Xia ruofei waved goodbye to the flight crew. Then, under the guidance of the staff, he led everyone through the passageway of the business jet building and out of the airport.

Outside, a light yellow Toyota Coaster was already parked by the road. The driver was holding up a sign with Xia ruofei's name on it.

This was the pick – up service that Xia ruofei had ordered when he booked the hotel. After all, he did not know how far the hotel was from the airport. Besides, it would be inconvenient to take a taxi with so many people.

After confirming the guests' identities, the driver welcomed everyone into the car. Then, the Toyota Coaster drove out of the airport and headed in the direction of the new Wu hotel.

Generally, a hotel that was named after the local name was basically the best hotel in the area.

The new Wu hotel was no exception.

It was a five – Star hotel that had only been renovated two years ago. All the facilities were very new.

Xia ruofei checked in to the rooms that had been arranged for them. Then, he said, "Everyone, go back to your rooms and put down your luggage. Rest for a while. We'll meet in the hotel lobby in half an hour. Let's have lunch first!"

Chapter 3168 Supercomputing Center (1)

Xia ruofei's room arrangement was quite interesting.

Xia ruofei arranged for Liu Mansha and Yu xiner, master and disciple, to share a room according to their wishes. It was a luxurious double bed room.

Mu Sheng and mu Jianfei, father and son, each had a luxurious big bed room.

Chen Xuan and Feng Xiaoyi were also staying in single rooms.

In order to show his respect as an academician and care for the elderly, Xia ruofei booked a luxury suite for Wang Chi.

Only Xia ruofei, Song Wei, and Ling Qingxue were left. Xia ruofei booked a big, luxurious room.

Song Wei and Ling Qingxue were with Xia ruofei when he booked the room, but they did not object.

Of course, they knew that Xia ruofei did not book the room to save on the accommodation fee.

However, after sharing the same bed at paradise clubhouse that night, their mentality seemed to have a subtle change. At least, in their minds, they felt that even if they were in such a state, it seemed to be acceptable.

After Xia ruofei distributed the room cards to everyone, he returned to his room with Song Wei and Ling Qingxue.

He opened the door, plugged in the power, turned on the lights, and turned on the air conditioner ...

Xia ruofei finished all this in one go and said, "I'll make it clear first! I'm probably going to stay up all night at the Supercomputing Center, that's why I booked a room like this. "

"You're lying!" Ling Qingxue chuckled.

"Trying to cover up will only make things worse!" Song Wei added.

"Then I'll be brazen!" Xia ruofei chuckled.

After he finished speaking, he made a posture of a hungry tiger pouncing on its prey and was about to pounce on the two people.

Song Wei and Ling Qingxue screamed in fear and dodged to the left and right.

Naturally, Xia ruofei would not be so lecherous. He was just fooling around with his two female friends. Everyone went to wash their faces and the girls touched up their makeup. Then, it was almost time for dinner.

Xia ruofei had already booked a table at the hotel restaurant. The ten of them could sit at one table.

He ordered a lot of local specialty dishes and exquisite Jiangnan specialty desserts, but because they had important things to do that night, no one drank.

After lunch, Wang Chi found Xia ruofei and said, "President Xia, I'm going to the Supercomputing Center in the afternoon to do my own things and to finalize the time."

"Aren't you going to take a rest?" Xia ruofei asked.

Xia ruofei's supercomputer was scheduled to start at 10 pm, so it was basically an all-nighter. Under normal circumstances, Wang Chi would have to accompany him throughout the entire process, so Xia ruofei was worried that he would not be able to hold on at his age.

"I've contacted the Supercomputing Center," Wang Chi said with a smile. "They'll send a car to pick me up at three in the afternoon. I can still rest in the hotel for two hours at noon. In addition, there's a place to rest at night. The condition of the lounge in the Supercomputing Center is not bad. If there's any situation, you can call me at any time. "

Xia ruofei was enlightened. He nodded and said, "That's good. I was worried that your body wouldn't be able to take it!"

Wang Chi smiled. "If you're fine, do you want to go to the supercomputer Center with me this afternoon?" he asked. "Should we meet with the leaders over there in advance?"

Xia ruofei thought for a while and nodded.””Alright, I’ll go over first. However, when it’s time to use the supercomputer, my friends will be there too. That should be fine, right?”

Wang Chi chuckled.”Of course, no problem. The new Wu Supercomputing Center receives countless visitors every year, but it’s rare to see visitors in the second half of the night, haha!”

Xia ruofei smiled.”We’re working on this project together. We all want to see the results as soon as possible. So ...”

“I understand! I understand!” Wang Chi replied,”no problem! I’ll ask the supercomputer Center to send a car to pick up your friend at the hotel at 9 pm. Then, I’ll let Xiaoyi stay here to coordinate. There won’t be any problems!”

“There’s no need to send a car!” Xia ruofei said,”the car rental service at the hotel is very convenient!”

“In new Wu city, with the resources of the Supercomputing Center, what’s the point of renting a car?” Wang Chi replied,”I don’t know the exact time of departure and landing of your plane. Otherwise, you wouldn’t have to rent a car to pick me up!” President Xia, if there’s no problem, then it’s decided! Let’s meet at the hotel lobby before 3 pm!”

Xia ruofei nodded and said,”okay!” Oh yeah, academician Wang, I’m bringing two friends to the Supercomputing Center this afternoon, the car ...”

Xia ruofei would definitely bring Song Wei and Ling Qingxue with him. Besides, although Chen Xuan was definitely interested in the Supercomputing Center, he considered that if he brought Chen Xuan along, Mu Sheng and Liu Mansha would have some concerns. They would definitely be worried that he and Chen Xuan would abandon them and go to solve the secret of the token first.

They didn’t understand the super-computer’s computer time, so they didn’t think it was 10 pm just because they had agreed on it.

In order to avoid suspicion, Xia ruofei decided to let Chen Xuan stay in the hotel with Mu Sheng and the rest.

At least, Chen Xuan would not misunderstand Xia ruofei’s intention to start a new project. Besides, Chen Xuan knew that even if Xia ruofei secretly went to the Supercomputing Center to use the supercomputer, it would take at least several hours to get a result with the calculation of their algorithm. Xia ruofei would not have enough time.

This way, Chen Xuan could still explain the situation to an Musheng and the others.

Chapter 3169 Supercomputing Center (2)

Of course, Xia ruofei and Wang Chi raised this question mainly because they were worried that the bus would not be able to fit, so they had told him the number of people in advance.

“No problem,” Wang Chi nodded with a smile.”I’ll get them a business car. It’ll definitely be enough!”

“Then, thank you, academician Wang!” Xia ruofei said.

Then, Xia ruofei called Chen Xuan, Mu Sheng and the rest over and explained the situation to them.

What he was worried about didn't happen. Everyone trusted him quite a bit and agreed very readily.

Xia ruofei did not leave the hard drive and laptop with the algorithm program to Chen Xuan because it was meaningless to avoid suspicion. He had a lot of time alone. If he really wanted to leave everyone behind, he had countless opportunities to make a new copy of the algorithm program, even though he did not do so.

Xia ruofei asked everyone to rest well in the afternoon. At the same time, he arranged dinner for everyone at the hotel and handed some coordination matters to Feng Xiaoyi. Then, he brought Song Wei and Ling Qingxue back to their rooms.

After resting in the hotel room for a while, Xia ruofei left the room with his two female friends at around 2:40 am. They took the elevator to the hotel lobby on the first floor.

It was almost three o'clock when Xia ruofei saw Feng Xiaoyi walking out of the elevator with Wang Chi.

"President Xia, you came down early!" Wang Chi greeted him with a smile.

"I've just arrived too," Xia ruofei smiled and said, "academician Wang, did you have a good lunch break?"

"Hahaha! It's not bad!" Wang Chi said, "I've been running around all my life and I'm used to it. I've never recognized a bed. I can fall asleep as soon as I lie down! However ... The single bed in the laboratory was the most comfortable! It's especially safe to sleep on it!"

Feng Xiaoyi smiled and added, "President Xia, you don't know, do you?" I often go to the laboratory to spend the night during the holidays just to have a good night's sleep!"

Song Wei and Ling Qingxue couldn't help but laugh. Xia ruofei, on the other hand, was in awe. He knew that if Wang Chi didn't spend all his time in the laboratory, he wouldn't have developed such a "habit".

"Academician Wang is really working hard for the development of our country's computer industry!" Xia ruofei praised.

Wang Chi waved his hand with a smile and said, "what Xiaoyi said is just a rumor!" I went to the laboratory during the holidays only because the air conditioner at home was broken. It was really too hot!"

Everyone burst into laughter.

Xia ruofei knew that Feng Xiaoyi might be telling the truth, but Wang Chi didn't want to show off.

After chatting for a while, Feng Xiaoyi's phone rang. He picked it up and said a few words before hanging up. He then said to Wang Chi, "Teacher, the bus has arrived!"

"Oh?" Wang Chi nodded. President Xia, let's go out then!"

"Sure!" Xia ruofei smiled.

As everyone walked out of the hotel, they saw a golden champagne – colored Buick GL8 slowly coming to a stop. A middle – aged man in his forties in the front passenger seat saw Wang Chi and quickly pushed open the door to get out. He almost ran over to Wang Chi.

The balding middle-aged man had a warm smile on his face as he said, "Academician Wang! Hello, hello!"

A reserved smile hung on Wang Chi's face as he nodded, "Director Zhou! We meet again!"

"President Xia, let me introduce you. This is director Zhou from the general office of the new Wu Supercomputing Center." Wang Chi smiled.

The balding man, director Zhou, quickly said, "Academician Wang, you can just call me little Zhou."

Wang Chi didn't comment and said indifferently, "Director Zhou, this is the chairman of Paradise Corporation, Xia Ruofei."

"President Xia, it's an honor to meet you!" Director Zhou said with a warm smile on his face.

"Hello! Director Zhou, I've caused you trouble!" Xia Ruofei said with a smile.

"Where? You're too polite!" Director Zhou quickly said, "Academician Wang, director Xia, let's get in the car!"

"Alright!" Wang Chi nodded.

Xia Ruofei said to Song Wei and Ling Qingxue, "You guys can sit in the back row. Go up first!"

The two seats in the middle were the most comfortable, but Wang Chi was too old to squeeze into the back seat. It was not appropriate for him to do so, so he had to take the middle seat.

Director Zhou, who had brought the car, naturally sat in the front passenger seat.

Therefore, the remaining middle row was not suitable for either Song Wei or Ling Qingxue. The two of them sitting together in the back row was the most appropriate arrangement.

It wasn't that Xia Ruofei didn't care about his girlfriend.

Naturally, Song Wei and Ling Qingxue did not have any objections.

To get into the back of the Buick minivan, the only way was to pass through the gap between the two seats in the middle or lift up the middle seat. Therefore, the passengers in the back had to get on the car first.

After Song Wei and Ling Qingxue got into the car, Xia Ruofei and Wang Chi sat in the middle row.

The Buick GL8 was driving toward the Supercomputing Center in the suburbs.

This director Zhou of the General Affairs Department was probably mainly responsible for reception and security work. He was not very proficient in technology, so on the way, when Xia Ruofei and Wang Chi were talking about the application of supercomputers, director Zhou basically couldn't get a word in.

The car drove for about half an hour before they entered an Industrial Park.

"The Supercomputing Center is in this Park," Wang Chi introduced. "It's fine here, but the security is still very tight when we're near the Supercomputing Center!"

Chapter 3170 Supercomputing Center (3)

Xia ruofei smiled and said, "I understand!" This was the world's leading supercomputer! From a certain point of view, it's not an exaggeration to call this a national treasure!"

"Yup!" Wang Chi said with a smile.

Soon, the car arrived at the courtyard of the Supercomputing Center.

The Supercomputing Center was only an eight – story building with a few other low – rise ancillary buildings. From the outside, it could be said to be ordinary. If no one introduced it, many people would not have thought that China's most advanced supercomputer was installed here.

Of course, Xia ruofei scanned the area with his psychic power and found that there were indeed many hidden sentries around. Many of the security guards were armed with live ammunition. It was obvious that the security was tight.

The car slowly stopped, and the electric door slowly opened with a beeping sound.

The car door was only half open when a few people who had been waiting in the courtyard quickly walked to the car.

"Academician Wang! We warmly welcome you to inspect and guide our work!" The leading official in his 50s came forward and said enthusiastically.

The official was dressed in a white shirt, black suit pants, and a pair of gold – rimmed glasses. His hair was also neatly arranged, and he looked very refreshing.

Wang Chi also revealed a smile and said gently, "Director Cai, long time no see!"

"You're still as elegant as ever! You look even more energetic than the last time we met!" Director Cai said with a smile.

"That mouth of yours ..." Wang Chi pointed at director Cai and said, "by the way, let me introduce you. This is the chairman of paradise Corporation, Xia ruofei, CEO Xia. CEO Xia, this is Cai linsong, the director of the National Supercomputing Center!" Director Cai has the final say in the new Wu's Supercomputer Center!"

"Academician Wang, you're joking. We're also following the instructions from our higher – ups to manage the equipment." Cai linsong laughed drily, then immediately showed a warm smile to Xia ruofei. He took the initiative to extend his hand and said, "welcome, CEO Xia!"

"Sorry for the trouble, chief Cai!" Xia ruofei said as he shook hands with Cai linsong.

Wang Chi asked, "director Cai, is there any problem with the timing I booked in advance?" I've even brought President Xia here. If you drop the ball here, I'll really have no place to hide my old face!"

"No problem!" Cai linsong quickly replied. No problem! How would we dare to disobey your words? Don't worry! Before 10 O' clock tonight, I'll make sure that President Xia can use the equipment!"

"Then, thank you, director Cai!" Xia ruofei said happily.

"You're welcome! You're welcome!" Cai linsong chuckled.

Then, Cai linsong introduced the other leaders to Wang Chi, Xia ruofei, and the rest. He mainly introduced them to Xia ruofei. Wang Chi often came to the Supercomputing Center, so he was familiar with the other leaders.

After the small talk, the group of people escorted Wang Chi into the Supercomputing Center.

"I'll go to director Cai's place to settle some things first," Wang Chi said while walking. Director Cai, can you arrange for someone to show President Xia around the equipment first?"

"Alright!" Cai linsong said with a smile.

Cai linsong assigned a Deputy Director with the surname Wei to bring Xia ruofei, Song Wei, and Ling Qingxue on a tour. He brought Wang Chi to his office. As for the other team members, they naturally dispersed and returned to their offices.

"Director Wei, I've caused you trouble!" Xia ruofei said with a smile.

"No, no, no!" Deputy Director Wei smiled and said, "President Xia is a great hero! It's my honor to be able to receive a great hero like you!"

Xia ruofei was stunned for a moment. Then, he realized that Deputy Director Wei might be talking about the incident where he had forced the plane to surrender in Saipan. In a sense, he was really a hero. After all, if it were not for him, the hundreds of people on the plane would have been wiped out. He had saved hundreds of lives.

However, because the plane was Air Australia, half of the passengers were Chinese and half were foreign. Therefore, although the Chinese media focused on reporting, it was always a matter of foreign airlines.

If Xia ruofei had saved a Huaxia airline's plane back then, it would have been a classic case and publicized all over the country.

"I didn't expect director Wei to know about my past ..." Xia ruofei said with a smile.

"Hey! My daughter really admires President Xia!" Deputy Director Wei said, "I've never seen her so obsessed with someone since I was young. She said you're her ... What bean?"

"Do you like your idol?" Ling Qingxue chuckled.

"It seems so!" Deputy Chief Wei smiled bitterly. "Anyway, I don't understand these things of young people at all. How did you become a bean?"

Song Wei smiled and explained, "director Wei, 'idol' is the English transliteration of 'idol', which means idol!"

"Oh ..." Deputy Director Wei suddenly realized and said with a smile, "the children these days are really ... So what if they are idols? What idol ..."

"Director Wei!" Ling Qingxue glanced at Xia ruofei before asking, "how old is your daughter?"

Xia ruofei could not help but feel a chill down his spine. Was this the rhythm of a jealous lover?

"I'm in the first year of middle school this year!" Deputy Chief Wei said, "this child didn't chase after celebrities in the past! Ever since I saw some of President Xia's Weibo posts, videos, and that ... That TV show ..."

"The life you yearn for?" Song Wei reminded.

"Yes, yes, yes. It's the one where a few celebrities played rural tourism together!" Deputy Director Wei said, "anyway, she's completely mesmerized after seeing these things related to President Xia ..."

Xia ruofei's forehead was full of sweat as he said, ""Director Wei, it's not a good thing for a child to be obsessed with chasing stars. You have to persuade her. Besides, I'm not a celebrity ..."

"Oh! "That's good ..." Deputy Director Wei said. "Her academic performance didn't decline much, and she seems to be a lot more cheerful, so we didn't really care about her!"
