

God tier Farm 3181

Chapter 3181 Easy to approach (2)

After the car stopped, everyone saw Xia ruofei, who was holding a lunchbox, get out of the car with a smile.

All the fans were stunned.

They had never thought that Xia ruofei would come out to meet them personally.

When many celebrities walked on the streets and met their fans asking for autographs or photos, they would look impatient, which was very different from the kind and gentle image they had in front of the camera.

Although Xia ruofei's fans all believed that CEO Xia was not that kind of person, they did not expect Xia ruofei to be so approachable that he even came out to meet his fans.

Therefore, everyone was stunned for a moment.

A few seconds later, the fans started screaming excitedly. The sound was so loud that even the security guards at the entrance of the park across the road heard it and came out to check on the situation.

Although Xia ruofei's fans were relatively more rational, it depended on the situation. When a living idol appeared in front of them, very few people could maintain their basic rationality.

When Deputy Director Wei saw these excited fans, he suddenly thought of something. He did not see Wei Xue in the crowd, which meant that his daughter was very obedient. Even if she really wanted to come, she still stayed at home. Now, here came the problem ...

When these fans saw Xia ruofei, they would definitely spread the news in various fan groups and forums. These were also places that Wei Xue visited every day. It was not an exaggeration to say that it was her spiritual home.

This meant that Wei Xue would soon find out that Xia ruofei had personally come out to meet his fans.

Because of his father's request, he missed the close contact with his idol ... Deputy Director Wei couldn't help but smile bitterly when he thought of this.

Although Xia ruofei's personally signed gift was also very meaningful, wouldn't it be more meaningful for Wei Xue to meet her idol? Deputy Chief Wei did not know.

However, he knew that no matter what, Wei Xue would definitely not give him any face after this ...

Deputy Director Wei hesitated for a few seconds before he made a decision.

He walked to the side and called home.

The bored Wei Xue was sitting on the sofa and watching a drama! After the phone rang, she didn't even need to move and picked it up.

"Hello?"

"Xiaoxue, it's me!" Said Deputy Director Wei.

Wei Xue immediately pouted and said, "dad!" You still don't trust me! You're calling to check up on us so quickly ..."

Wei Xue also had a cell phone, but Deputy Director Wei called the house phone. She naturally felt that her father was checking if she was obediently staying at home.

Deputy Director Wei was too lazy to explain because time was tight. He said directly, "'Little Xue, come to the entrance of the park, now!" He said.

Wei Xue was stunned and asked, "what's wrong?" Didn't you forbid me from going?"

"I told you to come over immediately, take a taxi!" Deputy Director Wei did not mention that Xia ruofei was there. Instead, he said, "be there in ten minutes!" If you can't make it in time and miss something, don't blame me for not informing you!"

Wei Xue's eyes brightened and she quickly asked, "Did President Xia ..."

On the other end, Deputy Director Wei had already hung up.

Wei Xue jumped up from the sofa. First, she asked a few questions in the local fan group, but she did not get an answer. Those who had gone to the venue were now all surrounding Xia ruofei. How could they have the time to read the group messages? Those who didn't go naturally didn't know anything.

However, Deputy Director Wei's words were very obvious. Even if Xia ruofei did not appear, Wei Xue was willing to go to the entrance of the park. At least it was closer to Xia ruofei.

So, she grabbed her bag from the coffee table and rushed to the door.

However, she immediately slammed on the brakes and rushed into the bedroom. She picked out a set of clothes in the shortest time possible and changed into it. It was her favorite loose white T - Shirt, paired with cropped jeans, rainbow - colored canvas shoes, and a rice - colored fisherman's hat. She looked youthful and lively with a hint of playfulness.

Wei Xue tidied up her clothes in front of the mirror at the door, then rushed out of the house with her slanted bag. She stopped a taxi downstairs and rushed to the high - tech Park where the Supercomputing Center was located.

At the same time, Xia ruofei was having a good chat with his fans. Deputy Director Wei secretly hoped that Xia ruofei could interact with his fans for a while longer so that his daughter could make it here in time!

It was rare for Deputy Director Wei to spare no effort for his daughter's idol.

Of course, it was also because his daughter's idol was Xia ruofei. If it was some sissy boy, he would never do this.

The fans took out Xia ruofei's photos and all kinds of cards, asking for his signature. Xia ruofei did not reject any of them.

There were only about ten to twenty fans here, so it wasn't difficult to sign all of them.

Xia ruofei signed his name and chatted with his fans. He even asked them to introduce themselves.

"President Xia, my name is Ren Xiaoye. I'm studying at Xin Wu second high school and I'm in my second year of high school this year!"

"Director Xia, director Xia, I'm Liu Manman! I'm from No. 3 high school, and I'm in my first year of high school this year!"

"It's my turn! President Xia, I'm in the third year of middle school this year!" An even smaller loli squeezed in and said, "my name is he Miao! I really like you!"

.....

As Xia ruofei listened, he could not help but smile bitterly.

Most of his fans were female, and most of them were middle school students.

Xia ruofei mumbled in his heart, "shouldn't you guys at your age be admiring han and han, or infatuated with some sissy young hunks?" Why would she like me?

At this time, he saw a relatively steady figure from the corner of his eye. Judging from his age, he was definitely not a middle school student. Most importantly, he was a man.

Hence, Xia ruofei looked at him and asked with a smile, "How about you? You can't be a middle school student, right?"

The girls all laughed.

The young man was about 26 or 27 years old, with short hair and looked quite energetic.

He was a little shy at first and didn't want to squeeze into the circle. He didn't expect Xia ruofei to take the initiative to ask him. He was a little confused.

After calming himself down, the young man said excitedly, "President Xia, my name is Wu Peng! It was the new pilot of the new Wu airlines this year! I've seen the relevant information about you driving the qinqiu flight to Saipan to force the surrender. During the induction training, the instructor even specially organized an analysis of this case! I really admire you!"

Xia ruofei could not help but be stunned. So this person was a real pilot! Even in small airline companies, the pilots might be flying helicopters or small propeller planes, but they were regular pilots with commercial licenses!

Xia ruofei felt a sense of accomplishment to be praised and even worshipped by the pilot.

Wu Peng was obviously very familiar with these fans. Everyone knew his identity, so they were not "Good, good, good! No problem ..." Deputy Director Wei quickly said.

Wu Peng's phone was a newly bought Huawei flagship phone, so it was better at taking photos. surprised.

"Luck played a huge part in the success of the forced surrender," Xia ruofei said humbly. "Besides, I'm not a professional pilot ..."

"We saw the control data during the forced descent before the ground was touched!" Wu Peng said, "our instructor said that even experienced professional pilots would find it difficult to do this. He said ... Your operation was very good!"

"All hail President Xia!"

"President Xia is awesome!"

The girls did not understand what the pilot was talking about but they knew that Wu Peng was praising Xia ruofei in a different way so they all cheered.

Xia ruofei pressed his hands down and waited for everyone to quieten down before he said, ""Thank you very much for everyone's love! I can feel the enthusiasm of the people of new Wu!"

Xia ruofei's words caused everyone to burst into laughter.

He continued, "especially that lunchbox filled with love, I finished it all!" Thank you very much, everyone!"

Hearing that Xia ruofei had finished the entire lunchbox, the cheers from the fans were even louder.

Xia ruofei finally said, "let's take a photo together!" Director Wei, can you please help us take a picture?"

"Good, good, good! "No problem ..." Deputy Director Wei quickly said.

Wu Peng's phone was a newly bought Huawei flagship phone, so it was better at taking photos. After some discussion, they handed Wu Peng's phone to Deputy Director Wei and repeatedly asked him to take better and more photos.

The fans quickly lined up in two rows, with Xia ruofei naturally in the middle.

At this moment, a voice was heard, ""Wait for me! Wait for me!"

Deputy Director Wei turned around and saw his daughter, Wei Xue, who had just gotten out of a taxi, running towards him. Then, a gust of wind swept past him and in the blink of an eye, she was running towards Xia ruofei.

Deputy Director Wei was flustered. I've been ignored by my daughter ...

Chapter 3182 The program runs (1)

"Wei Xue! Quickly come over here!"

"Wei Xue! I reserved a seat for you!"

.....

The fans all greeted Wei Xue one after another. It was obvious that this girl was quite popular.

However, there was only Xia ruofei in Wei Xue's eyes now. She looked at Xia ruofei with shining eyes and a sweet smile on her face.

Xia ruofei looked at Deputy Director Wei, who looked like he had nothing to live for, and said to Wei Xue, ""You're called Wei Xue? Weren't you locked up at home by your dad?"

"Eh? How did you know, President Xia?" Wei Xue was shocked.

"Of course it was your dad who told me!" Xia ruofei laughed and said, "you suddenly came here. Someone must have informed you, right? Aren't you afraid that your dad will blame you?"

"It was my dad who called me ..." Wei Xue said, then patted her head. "Oh right, where's my dad ..." She said.

Xia ruofei pouted angrily in Deputy Director Wei's direction. Wei Xue slowly turned her head and immediately saw her father's bitter face.

Wei Xue revealed a fawning smile and said, ""Hehe ... Dad!"

"I'm standing right here, and you didn't notice me?" Deputy Director Wei said unhappily.

"I ... I was just too excited!" Wei Xue said with her head lowered.

"Let's take a photo together!" Xia ruofei laughed.

Wu Peng, who was relatively calm, also quickly said, ""Yes, yes, yes, let's take a group photo first! President Xia is here to do something, we can't take up too much of his time!"

Hence, the fans regrouped and smiled at the camera.

Wei Xue was the last to arrive, but she was able to sit beside Xia ruofei. She was so happy that she could not close her mouth.

After the group photo was taken, Xia ruofei gave Wei Xue an autograph.

Then, if someone wanted to take a picture with him alone, he would grant them all their requests. He felt like he was a prop, the people around him changed like a trotting horse lamp, and he only needed to smile.

Of course, the fans still loved him, not just as a background for the group photo.

After being busy for half an hour, the sensible fans took the initiative to let Xia ruofei go back to work.

Before Xia ruofei got on the car, he also reminded everyone to put more effort into their studies and not be distracted by chasing after celebrities. In addition, he also asked everyone to disperse and not gather at the entrance of the park. It was a waste of time.

Although Xia ruofei had never thought of himself as an idol, he felt that it was his responsibility to guide them in the right direction since these children liked him. No matter if it was useful or not, or how useful it was, at least he had to fulfill his responsibility.

Xia ruofei didn't expect that his fans would take his words seriously.

After Xin Wu's fans went back, they organized and posted the meeting with Xia ruofei, as well as a large number of photos, group photos, and short videos, to the fan group, forum, and Tieba, especially Xia ruofei's instructions. Some people also took videos and posted them.

Xia ruofei's fans had even set up a study group on Tieba. They checked their progress every day and monitored each other.

The fans in new Wu city often had offline exchange and study sessions to improve their results.

Of course, this was all a story for later.

When Xia ruofei and Deputy Director Wei returned to the Supercomputing Center, Song Wei and Ling Qingxue had already fixed the pictures. They carefully selected nine and sent them to Xia ruofei.

The nine photos were of Xia ruofei opening the lunchbox, looking clean after eating, and most of them were photos of Xia ruofei eating heartily from various angles.

Song Wei and Ling Qingxue's photography skills were not bad. The composition and lighting were good. One look and you would have an appetite. The picture told you that the food was delicious. Otherwise, how could you eat like this?

Of course, it could also be that he had fixed the map well.

After Xia ruofei got the nine pictures, he immediately posted them on Weibo. The caption was simple: The love lunch boxes sent by the fans were so delicious that they couldn't stop eating!

After posting on Weibo, Xia ruofei took a look at the Weibo posts of the people who had tagged him recently. As expected, they were all posts by the fans he had just met. There was even a person with the ID "little Xue 'er be good" and her profile picture was Wei Xue herself.

Xia ruofei did not know if this was the real Wei Xue's account, but it did not matter. He picked a few Weibo accounts that looked better in his photos, including Wei Xue's account, and reposted them. Then, he closed the Weibo app.

This was because academician Wang Chi was also in the lounge.

Xia ruofei stood up and greeted him. He smiled and asked, ""Academician Wang, are you done with your business?"

Wang Chi chuckled and said, "it should be almost done!" I mainly wanted to discuss a few academic problems with everyone. I can't explain it by email, so I decided to come here myself!"

Xia ruofei knew that communication was so advanced now. Even if he couldn't explain it through email, he could make a video call in minutes. The reason why Wang Chi went in person was probably to help him adjust the time.

Xia ruofei was very grateful to Wang Chi. No matter if the process of unlocking the token went smoothly, he would definitely want to repay Wang Chi at the right time.

Cai linsong, the director of the Supercomputing Center, who was beside Wang Chi, quickly said, ""Academician Wang, we have some academic problems that we need your guidance on. We can't say that we're discussing ..."

Chapter 3183 The program runs (2)

"We're learning from each other and improving ourselves!" Wang Chi said with a smile.

"President Xia, how do you feel after visiting our Supercomputing Center?" he asked Xia ruofei.

"The nation's most important weapon indeed lives up to its reputation!" Xia ruofei said seriously.

"Haha!" Wang Chi laughed and said, "it seems like the light of Taihu territory has met Mr. Xia's requirements!"

Wang Chi had been deeply involved in the design, manufacturing, assembly, and debugging of the light of Taihu territory. He could be said to be the leader of this project, so he was very proud of Xia ruofei's praise.

Xia ruofei smiled. "Of course. This is the best supercomputer in China and even the world. If it doesn't meet the requirements, then we can only hope that the alien civilization can help us!"

"Hahaha!"

Everyone laughed, and the Supercomputing Center's leaders also felt honored.

"Academician Wang, President Xia, we've booked a room at the guest house," Cai Songlin said. "Please take a rest first, and then we'll have dinner together." The engine room will need to undergo a routine maintenance after it's shut down tonight. It'll only be back in use around 10 pm, so after dinner, everyone can go to the guest house to rest for a while. I'll send someone to inform everyone when the engine room is ready!"

Xia ruofei thought for a while and asked, "Academician Wang, what do you think?"

"Let's do as the host says," Wang Chi said readily. "We'll follow director Cai's arrangements!"

"Alright!" Xia ruofei said, "then I'll have to trouble you, director Cai!"

"No trouble at all! It's no trouble at all!" Director Cai said quickly.

"Director Cai," Wang Chi said, "director Xia has a few friends at the Xin Wu hotel. Don't forget to send a car to pick them up tonight!"

"Oh! This has already been arranged, don't worry!" Cai Songlin said.

"Yes!" Wang Chi nodded. "Just let the driver contact Xiaoyi. He'll coordinate the people!"

"Alright!"

Under Cai Songlin's lead, the group arrived at the Supercomputing Center Guest House.

The guest house was not far behind the supercomputer Center building. The first and second floors were canteens, and the third to sixth floors were guest rooms. There were thirty to forty rooms in total. It was clear that the reception work at the supercomputer Center was not light.

Between the guest house and the computer room building, there were three - story auxiliary buildings on both sides. They were mainly spare parts warehouses, security staff dormitories, and so on.

These buildings formed a small courtyard with a basketball court in the middle.

The guest house had already prepared the rooms. They did not know about Xia ruofei's relationship with Ling Qingxue and Song Wei, so they gave everyone a single room. Because of the king's pool, the rooms were the best.

Everyone rested in their rooms until evening. Cai Songlin personally went to the guest house to invite everyone down for dinner.

They did not set up a banquet in the hotel. Instead, they invited Xia ruofei and the others to a private room on the second floor of the cafeteria.

Obviously, the Supercomputing Center Guest House often received guests, so they were very confident in the skills of their chefs.

In fact, the chef didn't let them down.

The table was full of specialty Jiangsu dishes with fine colors, fresh, fragrant, and crispy. Just looking at them made one very appetizing.

Jiangsu cuisine was sweet and light in taste, similar to the food at San Shan. That was why Ling Qingxue and Xia ruofei were used to it. Song Wei also liked sweet dishes and enjoyed them.

As they still had important things to do at night, the Drunken Eight Immortals wine that Cai Songlin had specially prepared was not put to use. Everyone chose to drink fruit juice.

As the director of the Supercomputing Center, Cai Songlin naturally had to put his work first, so he couldn't persuade him to drink.

Without drinking, the banquet naturally ended early.

At around eight o'clock, everyone had already eaten and drunk to their fill, and returned to the guest house.

Everyone rested at the guest house for a while. At around 9:30, Chen Xuan and the others arrived at the park in the Supercomputing Center's Toyota Coaster.

Hence, Xia ruofei and the rest went to the engine room and waited in the lounge.

The engine room was undergoing a routine shutdown for maintenance.

Cai Songlin didn't go back either. He stayed in the lounge and chatted with everyone while waiting for Yingying, mainly to accompany Wang Chi.

Even though Chen Xuan, Liu Mansha and Mu Sheng were already Aurous core stage cultivators, they could not help but feel nervous.

After all, the five Holy badges, or to be precise, the rising Dragon badge, had been passed on to all kinds of gods in the cultivation world for so many years. When everyone thought that the mysterious veil of the badge would be unveiled tonight, they became a little uneasy.

On the other hand, Xia ruofei was still calm and composed.

He didn't have the same feelings as Chen Xuan and the others. After all, the heavenly sect had spent decades collecting and studying the five Holy badges.

Time passed by.

When the clock on the wall pointed to 9:55, there was a knock on the door of the lounge. A technician in the computer room walked in and said, ""Director Cai, the equipment has been repaired, and it is back to normal! It can be put into Use at any time!"

"Alright." Director Cai nodded and said, "to make sure there's no problem, we'll need to do a more important data calculation immediately!"

"The current equipment is running stably. All parameters are normal!" The technician said.

"I know, you guys go and make your preparations!" Cai Songlin said.

Then, he smiled at Xia ruofei and said, ""CEO Xia, from now on until 8 am tomorrow morning, a total of ten hours of work time is yours. However, you must finish it by 8 am tomorrow morning. There are still many tasks waiting in line!"

"The Supercomputing Center has always had a lot of work to do," Wang Chi said. "President Xia, please understand!"

Xia ruofei was not someone who did not know what was good for him. He immediately replied, ""Director Cai, I'm already very grateful that you were able to coordinate ten hours for me in such a tight time!"

"You're welcome! You're welcome!" Cai Songlin chuckled and said, "then ... Let's not waste any time. Let's go to the computer room!"

"Alright!"

This time, they were going to run the procedures directly. Therefore, Chen Xuan, Mu Sheng, Liu Mansha, and the others had to be there as well. Thus, the group of them left the lounge and headed straight for the computer room.

After registering and entering the computer room, Cai Songlin said, ""Director Xia, according to the regulations, only staff members can enter the control room. You have to copy the packaged program to us or directly copy it to this computer. Our staff can read the data through the internal network."

Cai Songlin said as he pointed to a work computer at the side.

This was a suite, and the control room was inside. The room outside was a little smaller. There was a large double - layer glass window on the wall between the control room and the room outside, which was similar to the studio and director room of a radio or TV station.

Xia ruofei could tell that the room was designed for visitors. That way, they could see the control room without disturbing the staff.

He pondered for a while and said with a smile, ""No problem! Let's just copy it to this computer!"

After saying that, he took out a portable hard drive from his bag and started to operate on the computer.

"You put it in this shared folder, right?" Xia ruofei asked.

"Yes, I am!" A technician called over by Cai Songlin quickly said.

Xia ruofei took about five minutes to copy the data. Then, through the window, everyone saw the staff inside copying the algorithm program through the intranet and starting to run the program.

Mu Sheng saw that the staff inside didn't seem to be doing anything. They were just sitting on the chair and monitoring the status and parameters of the equipment. He couldn't help but pull on Chen Xuan's clothes and asked in a low voice, ""This is it?"

"The calculation process is done by a calculator. We don't know how much time it will take. All we have to do is wait for the results!" Chen Xuan replied.

Cai Songlin walked out of the control room and said, ""Director Xia, there's no problem with the program. It's already running! You can wait for the results here, or you can rest in the lounge or guest house. "

Chapter 3184 Complete in advance_

Under normal circumstances, projects that required supercomputers would require a lot of computation power, so it was impossible to get results in a short time.

Xia ruofei had asked for ten hours of flight time in one go, so Cai Songlin also expected that the calculation time this time would not be too short.

However, Xia ruofei was the boss of a private company after all. Cai Songlin was not sure what his project was. Hence, he did not know if Xia ruofei was worried about the safety of the data and suggested that they wait in this room.

In fact, if the time needed was too long, many people would choose to sleep in the guest house.

Some units even sent their programs remotely and entrusted the Supercomputing Center to do calculations and simulations. This was very normal.

Xia ruofei thought for a while and smiled. ""Let's go to the guest house! It was getting late, and academician Wang was not young! We can't disturb his rest!"

Wang Chi smiled and replied, "I'm fine!" Who in the field of scientific research hasn't stayed up late?"

"That was when I was young. No one at your age would stay up late!" Xia ruofei said, "besides, the program is running. There's nothing we can do here. We might as well go back to the room and wait!"

Wang Chi knew that Xia ruofei was more concerned about data security. He didn't know why Xia ruofei left so easily, but he had to be grateful for Xia ruofei's consideration.

Wang Chi said, "that works!" The rules and regulations at the Supercomputing Center were very strict. The calculation data and results were absolutely impossible to be leaked! President Xia, you can rest assured!"

Cai Songlin also quickly said, "yes, yes, yes!" We've done a lot of big projects, including some very secret aerospace projects, and we've never made any mistakes!"

Xia ruofei laughed, "of course I trust you!" This is the National Supercomputer Center, is there a safer place than this?"

The feeling of being trusted by others was very good. Cai Songlin was in a very good mood.

He smiled and said, "in that case, please go to the guest house to rest!" Old Zhong! Quickly get the guest house to open a few more rooms for President Xia's friends to rest in!"

Director Zhong from the general office quickly said, "Alright! I'll make the call now!"

Xia ruofei continued, "director Cai, I only have one request. Please inform me as soon as we're done with the procedures. No matter what time it is!" I want to see the results immediately!"

"That's no problem at all!" Cai Songlin smiled and said, "I'll get them to call the room in chief Xia's guest house. Call them as soon as possible!"

"Thank you!" Xia ruofei said.

Everyone watched for a while more. The situation in the control room was naturally calm.

Thus, the group of people walked out of the computer room and headed directly to the guest house building.

Cai Songlin and the others naturally did not know that the 'trust' they felt was not true trust. Even the ancient cultivation world had not been able to crack the contents of the rising Dragon medallion. If they could crack it with the help of a supercomputer this time, how important would it be? How could he easily believe that a technician would abide by the confidentiality rules?

Even if there was a 99.999% chance that the technician would not be able to understand the deciphered content, Xia ruofei and the others would not let their guard down as long as there was a slight possibility of it leaking.

The reason why Chen Xuan and the others did not object to his suggestion to wait at the guest house was because everything was under control.

The guest house was very close. Whether it was Mu Sheng, Liu Mansha, Xia ruofei, or Chen Xuan, they could easily cover them with their mind power. It could be said that every move of the technicians in the control room was under their surveillance.

Even if Mu Sheng and Liu Mansha did not understand modern Science and Technology, Xia ruofei and Chen Xuan knew. Under their cross – Monitoring, they would be able to detect any unusual actions from the technician.

At such a close distance, they could even deal with it immediately.

Besides, Xia ruofei and Chen Xuan had also done some work on the security. The calculation data was directly packaged and encrypted, which required another program package to be decoded.

Although it was the fastest to analyze the data directly on a supercomputer, Xia ruofei would rather spend more time on a normal computer. After all, the most time – consuming process was the process of exhaustive calculations, which could not be satisfied by the performance of a normal computer.

Of course, due to time constraints, the encryption algorithm was relatively crude. As long as there was a certain amount of time, many programmers would be able to crack it.

However, Xia ruofei just needed this little bit of time to ensure that the programmers in the control room of the Supercomputing Center did not come into contact with the real calculation data. That was enough.

Hence, Xia ruofei and Chen Xuan left the control room with a peace of mind. Although Mu Sheng and Liu Mansha did not know much about modern technology, they were relieved after Xia ruofei's simple explanation through voice transmission.

The group returned to the guest house.

As usual, each person had their own room. Xia ruofei and Chen Xuan both maintained their spiritual power to cover the control room and monitor the technical staff's actions.

Mu Sheng and the others took a short nap in the room. They didn't know anything about modern technology anyway. Even if the technicians did something, they wouldn't find out. Besides, Xia ruofei and Chen Xuan were monitoring them, which was enough.

Chapter 3185 Early completion (2)

As time passed, even Xia ruofei started to get excited. This was a token that even the ancient cultivators couldn't crack! If it could be cracked today, what a great achievement that would be!

Moreover, he was filled with curiosity and anticipation towards the contents of the token.

However, Xia ruofei had designed the algorithm himself, so he knew how much it would take to calculate.

Using the method of elimination to list all the possibilities and compare them with the database, then sorting them according to the size of the possibility. It sounded simple, but in reality, even a supercomputer would have to spend a lot of effort.

Hence, Xia ruofei knew that the results would not be out soon.

He waited patiently.

Time passed by slowly. At about one o'clock in the evening, Xia ruofei, who had been monitoring the situation with his spiritual power, noticed that the drowsy technician in the control room suddenly stood up.

Xia ruofei's spirit was lifted. Could it be that the calculation was completed so quickly? The light of Taihu territory really lived up to its name!

Unexpectedly, the technician just stretched and then strolled to the bathroom connected to the control room ...

Xia ruofei pouted. He could not use his spiritual power to pay attention to someone else going to the toilet. What was so interesting about an otaku with an unkempt beard? If it was a beautiful technician ... Of course, she couldn't spy on people going to the toilet!

After the technician went to the bathroom, he entered hypnosis mode again.

Other than recording the various parameters at fixed times, he spent most of his time sitting in his chair and dozing off.

At around two in the morning, Xia ruofei 'saw' the technician stand up again with his spiritual power.

Xia ruofei didn't know whether to laugh or cry. He felt that it was necessary to suggest to this guy to check his kidney and bladder functions ...

However, the technician didn't go to the bathroom this time.

He walked to the control panel and looked at it. After double – checking, he picked up the phone on the control panel and began to dial a number on a piece of paper.

Then, Xia ruofei's phone rang ...

Xia ruofei quivered and picked up the phone. ""Hello, are you President Xia?"

"I am!"

"This is the central control room, I'm on duty, little Xia! Director Xia, your program has completed its calculations. Do you need to come over now to copy the data?"

"I'll be right there!" Xia ruofei said without hesitation.

Xia ruofei put down the phone and rushed out of the room.

At the same time, the door to Chen Xuan's room was opened. He was also using his spiritual power to monitor the situation in the control room. Therefore, when the technician on duty called Xia ruofei, he was the first to know about the situation.

"Brother Chen, get senior mu and senior Liu. We're going to the computer room!" Xia ruofei said.

Soon, Mu Sheng and the others also walked out of the room.

"Is this a success?" Mu Sheng asked.

Xia ruofei said calmly, "I haven't seen the data yet. I don't know if it's a success or not!" However, the calculations have already been completed!"

"I hope everything goes well!" Chen Xuan asked with a face full of anticipation.

Xia ruofei looked at Chen Xuan and noticed that his face was a little pale. He asked with concern, ""Brother Chen, you don't look like you're in a good state! Are you feeling uncomfortable?"

Chen Xuan couldn't help but think to himself, 'you're the one who's not in the right state! I'm just an early – Stage golden core cultivator. It's already not easy for me to maintain this state after continuously spreading my mental power for four to five hours!

Then, Chen Xuan looked at Xia ruofei, who did not seem tired at all. He could not help but say, "Both of them were Aurous core beginner stage cultivators, so why was there such a huge gap between them?"

"Thank you for your concern, brother Xia. I'm fine, just a little tired!" Chen Xuan squeezed out a smile.

"Brother Chen has been working hard recently!" Xia ruofei said, "I have to work on the algorithm program here and also modify the code for paradise Corporation. It's really tiring to work on both sides!"

Chen Xuan was speechless, 'am I tired because of this?' There was simply no common language with this kind of person with freakishly strong spiritual power ...

Mu Sheng laughed and said, "now that this matter is over, nephew Chen can have a good rest!" It's been hard on nephew Chen and little brother Xia this time ..."

They talked as they walked and soon returned to the computer room building.

Outside the control room, the technician was already waiting.

"President Xia! You've completed all the procedures!" The programmer said, "the result of the calculation is a data package. I have already placed it on this computer. As required, the working computer in the control room has already cleared the data."

"Thank you for your hard work!" Xia ruofei nodded.

On the way from the guest house to the computer room, Xia ruofei's spiritual power had been covering the control room. He knew the technician's every move like the back of his hand, so he knew that the technician was not lying.

Xia ruofei connected the portable hard drive to the computer and copied the data while telling the technician, "We need to use the lounge to check the data."

"No problem! I'll call someone to open the door!" The technician said.

Cai Songlin had already instructed them to do their best to satisfy Xia ruofei's requests. Not to mention, this technician saw that even academician Wang Chi was friendly to Xia ruofei, so he naturally wouldn't be impatient over such a small matter.

Although it was already the second half of the night, the staff on duty at the Supercomputing Center were on standby 24 hours a day. It was just a matter of opening the door.

The technician was making a call on the phone while Xia ruofei waited for the data to be copied.

The amount of data was not huge. Even though the probability was astronomical, Xia ruofei and Chen Xuan had discussed it and decided that the lower – ranked combinations were meaningless after the algorithm had filtered them. Therefore, he set it to retain only the combinations with the highest probability in the top 1000.

Pure text data was naturally very small.

In a short while, Xia ruofei had copied the sealed data into the USB drive. He then used a small tool that he had developed to completely destroy the data package on the computer.

Although it was possible to recover a part of the data if they were to encounter a special and powerful recovery software, it was relatively safe.

"President Xia, the door is open. You can move to the lounge now." The technician said.

"Thank you! You've worked hard!" Xia ruofei patted the technician's shoulder, took out a pack of cigarettes from his pocket, and gave it to him. "Keep this for yourself. It'll help you stay awake."

Although it was only a pack of soft Chunghwa cigarettes, it was considered a high – cost cigarette for most people, especially for smokers who bought half a pack a day. They would not be willing to buy a pack that cost a few dozen Yuan.

Xia ruofei used his spiritual power to monitor the entire control room. Naturally, he knew that this technician was an old smoker. He had to smoke a cigarette every once in a while. In fact, this kind of shift work was very boring. Many people who did similar jobs could not avoid smoking.

"No need, no need!" The technician quickly declined, "this is my job ..."

...

"Take it!" Xia ruofei stuffed the cigarette into his hand and smiled. "I might have to trouble you!"

"No problem, no problem!" The technician reluctantly accepted the cigarette and said, "until eight o'clock tomorrow morning, it's still your time. If you need anything, you can find me at any time!"

Xia ruofei nodded. "Thank you for your hard work. Let's go to the lounge to check the data."

"Alright, alright!" The technician said.

Xia ruofei and the rest went to the lounge. Xia ruofei connected the hard disk to the laptop and copied the data.

The software to analyze the data was installed on this laptop.

It was actually a software similar to a decompression software that Xia ruofei had written himself. However, he had specially designed the decryption logic, which was not easy for ordinary people to crack.

After the software read the data, it automatically began to analyze it.

Xia ruofei and the others looked at the progress bar and became more and more excited ...

Chapter 3186 A new direction (1)

In fact, the software analyzed the data very quickly. After all, it was only a combination of the first 1000 digits, and the amount of data was not large. However, to Xia ruofei and the others, the progress bar was moving extremely slowly.

Of course, this was an illusion.

With great difficulty, the progress bar finished running and a prompt box popped up: The analysis was successful.

“Brother Xia, you open it!” Chen Xuan said.

Xia ruofei heard Chen Xuan’s trembling voice and couldn’t help but laugh.”Regardless of whether it works or not, the data is here. There’s no need to be so nervous ...”

“I wasn’t nervous before, but now I’m suddenly nervous!” Chen Xuan didn’t try to hide his nervousness, as though there was nothing to be embarrassed about.

In fact, even Mu Sheng and Liu Mansha couldn’t help but feel nervous.

Mu Sheng was calmer. He said in a deep voice,””Little brother Xia, I suggest that the four of us check the results first, and the rest of you can leave for a while. What do you think?”

The others were mu Jianfei, Yu xiner, Song Wei, and Ling Qingxue.

“No problem!” Xia ruofei replied nonchalantly.

Song Wei and Ling Qingxue weren’t involved in this matter to begin with. If they took a second look at the contents, it would only invite more trouble.

Hence, Song Wei and the rest went to the other side of the lounge and sat down on the sofa.

Xia ruofei, Chen Xuan, Mu Sheng, and Liu Mansha were gathered in front of their laptops.

“I’m opening it!” Xia ruofei said.

“Open!”

“Open it!”

Xia ruofei double clicked on the analyzed data folder.

In fact, what was generated was a thousand text documents. The content was the first thousand combinations that were arranged in order. After complicated calculations and comparisons, the supercomputer felt that the 1000 combinations had the highest possibility.

The file name of each document was a number, from 1 to 1000.

Everyone looked at the first article with hope. Xia ruofei double clicked the document.

The first document was naturally the one that the supercomputer thought had the highest possibility of being published. It was also what everyone was looking forward to the most.

However, when everyone glanced at the contents of the document, they couldn’t help but reveal a confused look. Although they were all Chinese characters, they couldn’t understand what they meant when they were connected together. Or rather, this was a completely meaningless combination of words!

There were more than 3000 Floating Points on the token, which meant that each document was only about 3000 words long.

Xia ruofei and the rest finished reading the document very quickly.

With the brain development level of a golden core cultivator, they could basically memorize the content.

The four of them exchanged glances, wanting to see if anyone else had discovered anything. However, the result was clearly that everyone was very confused.

In the end, Xia ruofei said, "" Next, Xia ruofei and the others continued to read seven to eight documents, but the result was the same. They were all meaningless combinations of words.

In fact, the higher the number, the more reasonable it should be.

Xia ruofei's heart sank as he realized that something might have gone wrong.

However, with a serious attitude, they still had to check all 1000 documents.

Xia ruofei said to Chen Xuan, "brother Chen, let's bring out a few more computers. The four of us will split 250 documents each. Read them as soon as possible and then we'll discuss."

"I guess that's the only way!" Chen Xuan replied dejectedly.

Chen Xuan had put in a lot of effort into this algorithm. From the looks of it, it seemed as though all of his efforts were in vain. Naturally, he was in a bad mood.

Xia ruofei had placed a laptop in the spirit map space, and Chen Xuan had two laptops as well, so they had enough in a short while.

In fact, if it wasn't enough, Song Wei and Ling Qingxue would definitely have some. The two of them had just received storage rings and wanted to stuff their entire house into them. Things like laptops and single – lens reflex cameras must have been kept in their storage rings.

Xia ruofei copied the entire file onto the portable hard drive and asked Chen Xuan to copy the file to the other computers.

Xia ruofei said, "okay, now every computer has a complete data folder. All 1000 documents are the same. But to increase efficiency, the four of us will split up and each of us will look through 250 documents. This will be faster!"

Xia ruofei quickly explained, ""Our flight time is until eight in the morning tomorrow. The data doesn't look very good, so we have to speed up the verification process. If we can find the problem and solve it in a short time, we can still run the program again!"

"Alright!"

"We know!"

"Sect leader mu, please check documents 1 to 250! Valley leader Liu specifically looks through files 251 to 500, and brother Chen is in charge of files 501 to 750. I'll check the last part. " Xia ruofei quickly distributed the tasks."Does anyone have a different opinion?"

"Let's arrange it this way! There's no time to waste!" Liu Mansha said.

Hence, everyone took a laptop each and started to check the documents.

Mu Sheng and Liu Mansha only needed to learn the basic computer operations.

The four of them did the same thing and quickly flipped through the documents.

Chapter 3187 A new direction (2)

Xia ruofei's heart sank. He was responsible for the last 250 documents, which were the ones in the top 1000 that the supercomputer thought had the lowest possibility of getting the correct answer.

In fact, after reading the first few documents, Xia ruofei had already felt that the hope was slim.

The brain development of golden core cultivators far exceeded that of ordinary people. Thus, their speed of reading documents was very fast.

In less than half an hour, everyone had already finished reading the 250 documents assigned to them. Even Chen Xuan, who was the slowest, was only a few minutes behind.

Everyone closed their laptops and gathered together with serious expressions.

"How is it?" Xia ruofei asked.

The three of them slowly shook their heads, and Mu Sheng said, "Unless it's a code word or something like that, none of them are fluent."

Liu Mansha and Chen Xuan also nodded in agreement.

In fact, smooth sailing was the minimum requirement. As the content preserved in the rising Dragon Order, it must contain some secret. Now, they couldn't even do a simple smooth sailing, which already explained the problem.

In fact, Liu Mansha, Mu Sheng, and the others had always thought that the most likely situation was that there was a cultivation technique recorded in the rising Dragon Token.

Looking at it now, there wasn't even the most basic and smooth document, let alone the cultivation technique.

"I'm in the same situation as everyone else," Xia ruofei said with a dark expression.

In order to save time, no one had finished reading all 1000 documents, but there was no need to hide this kind of thing. Everyone had all 1000 documents in their hands, and it would be very quick to read them after they had finished reading them. At this time, the lie would be exposed very quickly.

"Then, there is a high probability that the data we obtained this time is not the correct answer!" Xia ruofei continued.

Mu Sheng, Liu Mansha, and Chen Xuan all nodded their heads. There was no doubt about this.

Xia ruofei said, "let's analyze it first!" As for the algorithm, brother Chen and I worked together to create it. We've checked it many times and even built a simulation environment for a trial run. The situation is very good, so the possibility of problems occurring is not high. "

At this point, Xia ruofei paused for a moment and continued, "Although I don't want to admit it, I still feel that ... Maybe we are going in the wrong direction!"

"Our algorithm is based on the judgment that each floating point represents a character," Chen Xuan said with a slight frown. "If this judgment is wrong, we naturally won't get the correct result."

Xia ruofei nodded and said, "yes!" I'm also highly suspicious that our basic judgment back then might have been wrong."

Xia ruofei had never thought that the rising Dragon Token recorded a cultivation technique.

This was because he had more information than Chen Xuan, Mu Sheng, and Liu Mansha.

He had already learned from layman Yuntai that the floating point pattern on the rising Dragon Order could change. Basically, it would change once every 50 years or so.

If what was recorded was a cultivation technique, how could the content be changed?

Because of the periodic change, Xia ruofei had a feeling that it did not make sense for each floating point to represent a character.

However, everyone felt that this was a huge step forward and was very close to the truth. That was why Xia ruofei and Chen Xuan used this as a basis to further optimize the algorithm.

Now, it seemed that there was really a possibility that he had made a basic judgment.

Xia ruofei was hesitating whether he should tell everyone about the characteristic of the floating point pattern's periodic changes.

It was undoubtedly easier for him to draw on the collective wisdom of others, but the biggest problem was that he could not explain the source of this information.

Before this, no one in the entire cultivation world had collected all five tokens, let alone know that the five tokens would form the rising Dragon Token. How did Xia ruofei know that the floating point pattern on the rising Dragon Token would change periodically?

Moreover, this cycle was 50 years long. Xia ruofei was only in his 20s!

Xia ruofei hesitated for a long time and finally decided not to tell her.

After all, even if he pushed all the blame to his Yuanying stage master, it was not very reasonable. There was no record of the rising Dragon Order in the cultivation world, so how did the Yuanying stage master know?

Xia ruofei pondered for a moment and said, "two seniors and brother Chen, let's study the token again." Maybe there's some information that we've missed!"

"That's the only way ..." Mu Sheng nodded.

"Fellow Daoist Xia, are you going to put everyone's tokens back together?" Liu Mansha asked.

After a high – definition scan in the Forbidden City, everyone disassembled the tokens and stored them separately.

Xia ruofei thought for a while and said, "let's take a look at the scan!" If we can't find anything, we'll assemble the tokens!"

The resolution of the scanned image was extremely high, and basically all the details were preserved. Moreover, it could be enlarged at will in the computer, which was more conducive to observing the details of the token.

Xia ruofei opened the scan on his laptop.

Everyone gathered behind Xia ruofei and quietly observed and analyzed the map.

At this moment, everyone's mood was somewhat low. After all, they had always felt that they were very close to the answer. Everything had been very smooth up until now, but they did not expect the final result to give everyone a head – on blow.

Xia ruofei's emotions were not affected much. After he opened the scan, he stared at the computer screen without blinking.

He sometimes observed the floating point pattern as a whole, and sometimes enlarged it so that a single floating point occupied the entire screen. He then carefully observed the black dot matrix pattern on the floating point.

After a long while, Xia ruofei said, "since the possibility of these Floating Points being words is very low, then ... Does everyone think that they might represent numbers?"

Chen Xuan revealed a pensive expression and said, "It's not impossible. Numbers can represent coordinates, or they can be passwords. So, in fact, in encrypted content, there are many scenarios where numbers are used."

Mu Sheng and Liu Mansha didn't know much about this, but they had their own thoughts.

"Little brother Xia, if it's just a number, even if we can crack it, we can't judge whether it's correct or not!" Mu Sheng said.

If words could be logically judged through context, how could numbers be judged?

If it was the wrong result, and he still tried to crack the digital password based on this result, he would be running in the wrong direction and would never get the correct result.

Xia ruofei thought for a moment and said, "If each floating point image represents a number or a group of numbers, the answer should be unique and there won't be many possibilities. However, there's still one point, and that is, it must be based on the premise that the judgment is correct. If the judgment is wrong, then the result of the wine will be useless. "

"Why don't we try it first?" Liu Mansha said.

Chen Xuan pondered for a moment before saying, "Brother Xia, let's try again in this direction! Wasn't there still a few hours left? According to the direction of the numbers, the calculations shouldn't be too big, so we should have enough time!"

Xia ruofei nodded and said, "okay!" We have to reserve at least two hours to modify the algorithm!"

"There are about 60 to 70 black dots in each floating point image. The total number is not constant, and the array combination is not constant either. Therefore, the number of calculations that have to be done is more than that."

...

Xia ruofei nodded and said, "yeah!" In addition, we also have to consider the possibility that the answer to the number is binary, octal, or hexadecimal. After all, we don't know anything yet, so we can't just assume that it's decimal!"

"Then the workload will be even greater!" Chen Xuan said with a frown.

Xia ruofei shook his head with a bitter smile and said, "I have to try even if the workload is heavy! Moreover, there's no way to break it down, so I have to complete it by myself. Brother Chen, please help me check and fill in the gaps!"

Chapter 3188 New news about scholar Yuntai (1)

"Good! There's no time to waste, then I'll have to trouble brother Xia!" Chen Xuan said.

Part of the algorithm could still be used, but it needed some logical judgment. Besides, the ancient language database that Xia ruofei had spent a lot of effort on was basically in vain.

Only cultivators like Xia ruofei and Chen Xuan could complete the modification in such a short time. If it were an ordinary programmer, they would have to work for at least a week to complete the task.

Mu Sheng and Liu Mansha couldn't help either. The only thing they could do was to accompany Xia ruofei and give him some spiritual encouragement.

Song Wei and Ling Qingxue saw that the four of them had finished their discussion and walked over.

Song Wei saw the serious expressions on everyone's faces and could not help but ask softly, "RUO Fei, what's wrong? The results aren't too good?"

Xia ruofei nodded. "Maybe we were going in the wrong direction. We were preparing to try other ways."

Song Wei and Ling Qingxue could not help but look at each other. Xia ruofei had spent a lot of energy on this matter. They did not expect that he would be running wildly on the wrong path. They both felt that this was a big blow.

Xia ruofei smiled and said, "I'm already mentally prepared for this result." The Legend of the Five sacred badges has been circulating in the cultivation world for so many years. It would be abnormal if it could be easily cracked by a supercomputer!"

Xia ruofei's mentality was indeed much more peaceful than Chen Xuan and the rest.

The main reason was that he had a higher estimation of the difficulty. After all, he had more information about the nascent soul and immortal soul Stage cultivators in the ancient cultivation world, as well as the rising Dragon Order.

"We won't disturb you then. You can go back to your work!" Song Wei nodded.

Xia ruofei nodded and sat cross – legged on the sofa with his laptop in his arms. He opened the original algorithm program and thought about how to modify it.

The entire algorithm was still based on the high – Level scan sketch. The image recognition part did not need to be changed. The main part was the logical judgment part. Let’s assume that each floating point represented a number or a group of numbers, and each group of numbers had two, three, four numbers ... At the same time, these numbers could be in binary, octal, decimal, or hexadecimal ...

Based on the black dot matrix patterns among the more than 3000 Floating Points, especially the floating Points where some patterns repeated, he could determine what number or array each different floating point represented.

It was still an impossible task if the human brain were to do the calculations.

However, if he were to use a supercomputer, the amount of calculation required would not be that large.

Compared to the previous method of elimination, which listed the possibilities of every Chinese character combination, the amount of calculation was much less.

Xia ruofei opened a new document and jotted down some of his thoughts.

At this moment, the voice of scholar Yuntai suddenly rang in his mind ...

“Little brat! What are you busy with?” Scholar Yuntai laughed and said, “this old man has been in seclusion for a long time, right? I have to say that closed – door cultivation is really comfortable. It’s so refreshing to wake up!”

Xia ruofei couldn’t help but feel surprised. He quickly used his spiritual will to communicate with scholar Yuntai, “Senior Yuntai, you’ve finally come out of seclusion!”

“Hey! From your tone, you seem to miss me a lot!” Said scholar Yuntai with a smile.

“We’ve been studying the secret of the rising Dragon!” Xia ruofei said, “I have many things to ask you!”

“Oh? You’ve already put the tokens together?” Upon hearing this, scholar Yuntai immediately became interested. “I’m right, right? Did it become a token with the words “Rising Dragon” and a floating point pattern?”

“Of course, senior is right!” Xia ruofei said.

“Did you make a copy of the floating point pattern?” Scholar Yuntai immediately asked.

“Uh It should be considered a skill storing!” Xia ruofei hesitated and said, “I’ve already scanned it with a high – resolution camera. It’s even clearer than a copy!”

“Oh, really? Give me some reference!” Scholar Yuntai said with great interest.

“Senior, please wait a moment ...” Xia ruofei said after a moment of silence.

This high – resolution scan image was stored in both of Xia ruofei’s laptops. The laptop that he had taken out from the space was still in the outside world. Mu Sheng was using the same laptop just now. He had

only read the first 250 documents. Since he had nothing to do now, he opened the remaining 700 documents and went through them again. It was considered a cross – check.

Xia ruofei said, "senior Yuntai, I have something urgent to do now. I can't show you the scanned image for the time being. Wait for a while. My computer is free. I'll put it in the small space for you to look at it!"

"What's a computer?" Scholar Yuntai asked curiously.

Although Xia ruofei had specially built a communication channel so that scholar Yuntai could still communicate with him through spiritual thoughts in the spirit map space, it was impossible for scholar Yuntai to sense the situation outside. Otherwise, no matter what Xia ruofei did, others could spy on him, and he would definitely not be happy.

"I'll explain it to you later!" Xia ruofei said, "senior Yuntai, let me tell you about our progress in cracking the secret of the rising Dragon Order!"

As expected, the interest of layman Yuntai was immediately diverted, and he said, "Alright! Alright! Kid, have you made a breakthrough discovery?" I'm afraid that won't be easy!"

Chapter 3189 New news about scholar Yuntai (2)

Xia ruofei forced a smile. "You're right ... Senior Yuntai, you've touched the rising Dragon Order. I wonder if you've noticed that there's a black matrix on every floating point?"

"Of course!" Scholar Yuntai said without hesitation.

There was no doubt about this answer. After all, although the floating point was only the size of a rice grain, and the black matrix on it was almost indistinguishable with the naked eye, this was only relative to the vision of ordinary people. How could a cultivator not notice such an obvious clue?

Xia ruofei continued. "Senior Yuntai, I don't know if the seniors in the ancient cultivation world have tried it before. This time, we determined that each floating point might represent a word. Then, some Floating Points with the same matrix pattern mean that the words are repeated. From this, we can calculate the content recorded in the whole article with more than 3000 Floating Points ..."

Grand cloud scholar said with a smile, "this is almost the mainstream judgment of our time. Although I have not participated in the related research, I have often heard about it. But boy ... This possibility is almost infinite. Some people have spent hundreds of years and still can not list it all. And the floating point distribution changes every 50 years."

"Speaking of which, a change every 50 years might not be a bad thing!" Xia ruofei said, deep in thought.

"What are you talking about?" Layman Yuntai asked, puzzled.

"Grand cloud stage senior, this floating point pattern changes every fifty years or so, but the black matrix on the surface of the floating point sphere should have many duplicates, right?" Xia ruofei asked.

"That's right!" Scholar Yuntai said, "someone has specially compared them. 70% to 80% of the black matrix combinations will appear repeatedly. Of course, their positions are all messed up."

“That’s equivalent to having a lot more samples!” Xia ruofei said, “different floating point patterns are different samples. This way, the accuracy of the calculation will be higher.”

“If even one floating point picture can’t list all of them, what’s the use of having more?” Scholar Yuntai retorted with a smile.

Yuntai layman didn’t know what a sample was, but he knew that someone had spent hundreds of years focusing on a floating point pattern, but still got nothing.

“If you’re saying that each floating point represents a character, we’ve already listed all the possibilities,” Xia ruofei said.

“What?” Scholar Yuntai was shocked and quickly asked, “how did you do it? How was that possible? That was more than 3000 words! Other than a few repeated Floating Points, I have no other clue!”

“It’s constantly listing them out!” Xia ruofei said, “then, we’ll make a judgment. If it’s obviously illogical, we’ll naturally deny it!”

“All of them?” Scholar Yuntai couldn’t help but click his tongue and ask, “how long did you take? Don’t tell me ... I’ve been in closed – door cultivation ... For more than a thousand years?”

Xia ruofei almost burst out laughing. He quickly said, “Senior Yuntai, please don’t misunderstand. You just entered closed – door cultivation for a few days! It took us less than four hours...Uh, four hours to complete the list!”

“This is impossible!” Said layman Yuntai.

What Xia ruofei had said was beyond his understanding.

What could he do in four hours? For cultivators, it would only take a snap of their fingers! Sometimes, thinking about a problem in cultivation would pass by in the blink of an eye. Not to mention closed – door cultivation, a few days, a few months, or even a few years would pass in the blink of an eye.

Now, Xia ruofei was telling him that he had used four hours to list out all the possibilities. How was that possible?

Xia ruofei briefly explained the principle of supercomputers and said, “Senior Yuntai, after we finished the calculation program, the calculation was done by the Super computer. Its calculation speed is very fast. It only took two hours to list all the possibilities and then arranged them in order according to the size of the possibility. Of course, it would take a lot of data to keep all the combinations, so I only kept the first 1000 possibilities. ”

At this point, Xia ruofei paused for a moment. However, before scholar Yuntai could ask, he continued, “Unfortunately, we’ve just checked all of the 1000 possibilities, and there’s not even a single sentence that’s coherent. In other words, we’ve basically ruled out the possibility that each floating point pattern represents a word!”

Scholar Yuntai was stunned for a while before he said, “In other words, at least 60% of the cultivators who studied the rising Dragon Order in our era had actually gone in the wrong direction from the beginning?”

“Although I can’t be completely sure, it’s highly possible!” Xia ruofei said.

Xia ruofei was very confident in the algorithm he had written. He believed that even if there were more samples, the final result would be the same.

The cultivators of the ancient cultivation world did not have supercomputers at their disposal. They had to rely on human strength to list and make judgments. In addition, the lifespan of cultivators was very long, so some people had spent hundreds of years studying this Rising Dragon Order. If these people knew that the direction they had chosen hundreds of years ago was wrong, it was unknown whether they would collapse.

Of course, it was also unknown where these cultivators were now. He wondered if they had disappeared in the long river of history, or if they had gone to some mysterious place, just like the cultivators above the nascent Soul Stage who had disappeared more than three hundred years ago.

Xia ruofei’s thoughts were a little scattered, and master Yuntai didn’t say anything for a long time because of this shocking news. Both of them were silent.

After a long time, Xia ruofei realized that now was not the time to be absent – minded. Precious time was still being wasted!

“Senior Yuntai, in your time, did anyone ever consider that a floating point image might represent one or a group of numbers?” he asked quickly.

Layman Yuntai thought for a moment and said, “there are some, but not as many as those who insist on the written method!” The reason for the opposition is simple. If it’s more than 3000 numbers, what’s the point?”

“Didn’t they think of double encryption?” Xia ruofei asked, “turn the picture into numbers and then use the rules of the numbers to solve the secret of the token! Could it be that this is not possible?”

Yuntai scholar laughed and said, “we don’t understand the double encryption you’re talking about, but I do understand what you mean. At the time, most of the cultivators who studied the rising Dragon Token thought that the floating point pattern was complicated enough. It was so complicated that even a cultivator’s entire life might not be able to crack it. If it only represents some numbers ... Of course, not everyone is against this view!”

“Oh?” Xia ruofei said, “in other words, some people think that a floating point pattern might represent one or a group of numbers, right?”

Layman Yuntai said, “the people who insist on this direction may not even be half of the people who study the rising Dragon!” The number of people was relatively small, and they did not have any results from their research! However ... Among the people who supported the numerical solution, there was a person who played an important role in the cultivation world at that time!”

“Oh?” Xia ruofei suddenly became energetic. “Please tell me more about it, senior Yuntai!”

Xia ruofei couldn’t help but complain in his heart. The last time when scholar Yuntai mentioned the rising Dragon Token, he didn’t reveal such information. He only said that the floating point pattern had no pattern and didn’t even mention the black matrix.

Did he really think that it was insignificant, or was he deliberately hiding some information?

Xia ruofei muttered in his heart.

“There was a senior who firmly supported the ‘number school’ at that time,” said layman Yuntai. “His name was venerable Yangshan, and he was already a monk of the leaving aperture realm at that time ...”

“The leaving aperture period!” Xia ruofei couldn’t help but be shocked.

In the current cultivation world, this level of cultivation was no longer just a legend. The current cultivators could only dream of reaching the original infant stage. After the original infant stage, there was the primordial spirit stage, and then the leaving aperture stage. The difference was too great ...

“Yes,” said layman Yuntai. “Venerable Yangshan insisted that fufu patterns represent numbers. He was even laughed at by some cultivators of the same level ... Oh, yes, venerable Yangshan is also a Grandmaster in mathematics!”

Chapter 3190 Unique advantage (1)

“Mathematics?” Xia ruofei was a little surprised. He couldn’t help but ask, “could it be a chicken and rabbit in the same cage?”

He knew that the standard of mathematics in ancient China was not very high. Of course, the development of mathematics around the world was still in its early stages. Including “nine chapters of arithmetic”, it only appeared in the Western Han Dynasty, and the time of Yuntai and the others should be the Qin Dynasty.

Layman Yuntai was also stunned and asked, “What do you mean by chicken and rabbit in the same cage?”

Xia ruofei thought about it. The problem of the chicken and rabbit in the same cage should have been first recorded in the sun Zi computational Canon, which appeared about 1500 years ago, far later than the era of Yuntai scholar, so it was normal that he did not know the classic problem of the chicken and rabbit in the same cage.

Hence, Xia ruofei said, “I’m just giving you an example. The problem is like this. Today, there are pheasant rabbits in the same cage. There are thirty – five of them on the top and ninety – four legs on the bottom.”

Xia ruofei explained the problem of the chickens and rabbits in the same cage, then asked with a smile, “Is this the mathematics problem that venerable yang Shan is studying?”

Scholar Yuntai laughed and said, “it’s such a simple question. How can it be called mathematics?” Venerable yang Shan’s knowledge covers a wide range, and his mathematics is also extensive and profound, including the hook probing method, Tianyuan technique, great evolution seeking technique, mistake technique, stacking technique, and so on ...”

Xia ruofei was dumbfounded. He couldn’t help but use the search engine on the computer to search for the sophisticated mathematical methods mentioned by Yuntai scholar. Then, he couldn’t help but be amazed.

What scholar Yuntai said, if translated into the language of modern mathematics, would be Pythagorean Theorem, high – order equations, one – time cohomology arrays, high – order inversion methods, high – order differential equations ...

Even though the content wasn't particularly profound in modern mathematics, in the context of the Qin Dynasty, it was simply the work of the gods.

In Xia ruofei's memory, these contents had only appeared in the song and Yuan Dynasty. Yet, a senior cultivator who lived in the Qin Dynasty had already studied these contents so deeply.

It must be known that the development of a theory was not just a flash of inspiration from a genius. It must be the joint contribution of countless talented people to promote the development of a theory.

However, this venerable yang Shan lived in the Qin Dynasty, or even earlier, so he naturally did not have any reference materials when facing these complex mathematical problems. Basically, it was certain that he had researched it alone.

This was amazing.

Xia ruofei stopped looking down on the ancient people's Mathematics Level and asked humbly, "Senior Yuntai, does this venerable Yangshan have any specific opinions on how to crack the rising Dragon Order?"

Scholar Yuntai said, "senior Yangshan has also studied the rising Dragon in a short period of time. It was probably only one or two years!" He concluded that the secret of the rising Dragon Token lies in these floating point patterns, and the cracking of these floating point patterns involves the content of mathematics. "

Xia ruofei asked curiously, "since venerable yang Shan has already concluded that we need to use mathematical methods to solve the secret of the floating point pattern, and he's an expert in mathematics, why didn't he continue?" Could it be that he's not interested in the rising Dragon?"

"No!" Replied layman Yuntai. "Venerable yang Shan said publicly that even if his mathematical attainments were ten times more profound, it would still be difficult for him to crack the secret of the rising Dragon Order. This is because there is a limit to human strength, and the complexity of the floating point pattern is beyond the scope of human strength. Therefore, he wisely chose to give up, so as not to waste a lot of time and energy and end up empty – handed!"

An idea flashed in Xia ruofei's mind. He almost immediately guessed the situation at that time. The venerable of yang Shan's mathematics attainment was indeed beyond that era. He might have already calculated that the calculation required to completely crack the secret of the floating point pattern was terrifying, so he gave up.

After all, even if venerable yang Shan's knowledge was beyond that era, and his spiritual power cultivation might have reached a terrifying level that Xia ruofei could not understand, in terms of computing power, he could not be compared to a supercomputer.

Perhaps, venerable yang Shan could not see any hope of breaking it, and so he gave up decisively.

However, this amount of computation power was never a problem for supercomputers.

In other words, the biggest problem that venerable yang Shan had encountered two to three thousand years ago was no longer a problem.

Hence, when Xia ruofei heard the news, he was not disappointed. Instead, he was very happy.

This was because it indirectly confirmed their direction of solving the problem. Moreover, this conclusion came from a brilliant mathematician, so it was naturally more convincing.

Xia ruofei was even more excited. He asked, ""Senior Yuntai, do you still have any comments about the rising Dragon Order from this venerable yang Shan? Or did he leave behind any ancient books or works?"

Layman Yuntai smiled bitterly. "There should be some of venerable yang Shan's inheritance left behind, but there's really not much about the rising Dragon Order. After all, senior yang Shan only studied the rising Dragon Order briefly and gave up. He never mentioned it again." It was by chance that I heard the elders of my sect talk about this at the gathering where all the sects were discussing the rising Dragon Order. "
