

God tier Farm 3191

Chapter 3191 Unique advantage (2)

Scholar Yuntai paused for a moment and continued,"At that time, everyone treated venerable yang Shan's point of view as an after – meal topic ..."

"Why?" Xia ruofei felt that it was very strange."Venerable yang Shan has such high attainments in mathematics, and his cultivation is also extremely high. By right, everyone should pay more attention to his opinions!"

"If everyone follows venerable yang Shan's suggestion, then we might as well not try to break the rising Dragon Order," said layman Yuntai with a smile."Even venerable yang Shan thinks there's no hope!" In fact, who could resist that kind of temptation? In our time, there were many legends about the rising Dragon, some of which even the most powerful people in the leaving aperture stage would be moved by. "

"In addition ..." Layman Yuntai said,"among those who study the rising Dragon Token all year round, there are a few whose cultivation is on par with venerable yang Shan 's. They've invested a lot of time and energy into it, so they naturally won't give up easily just because of a few words from senior yang Shan. Moreover, it was a battle between two schools, and venerable yang Shan insisted that the correct way was to solve it from an arithmetic perspective."Some of the seniors have been trying the solution you mentioned before, where each floating point corresponds to a character. They keep trying various character combinations, and some persist for hundreds of years ..."

Xia ruofei was speechless after hearing this. The Super calculator needed less than four hours to complete the calculation. It would take a Jindan, Yuanying, and yuanshen expert hundreds of years of hard work and they could not complete it.

From this point of view, it was really hard to say which was better between modern technology civilization and cultivation civilization!

The so – called "nothing is absolute" referred to this situation.

Every inch had its own strengths and weaknesses.

Xia ruofei decided to modify and perfect the algorithm immediately. He would try to run the program again with the remaining time.

This time, he was even more confident than before.

At this moment, Mu Sheng came over with Xia ruofei's laptop. He smiled bitterly and said,"Little brother Xia, this ... Computer, I'll return it to you."

"Senior mu, aren't you going to read it?" Xia ruofei asked, feeling a little strange.

Mu Sheng definitely wouldn't be able to finish reading the remaining 750 documents in such a short time.

Mu Sheng said,"I'm dizzy from watching it, so I'm not going to watch anymore!" I'm not looking! We've all checked this together, so I'm afraid I won't find anything new ..."

Xia ruofei smiled and nodded. "Then, senior mu, please take a rest. I'll change the algorithm as soon as possible. I'll try to make use of the remaining time to do another calculation."

"Good! Then I'll have to trouble little brother Xia!" Mu Sheng said, "I hope we can get a good result this time, haha!"

In fact, Mu Sheng and the others were already used to failure. If they didn't gain anything this time, they wouldn't feel too disappointed. At most, they would be a little disappointed. Then, they would continue to work hard on the solution.

Mu Sheng did not want to disturb Xia ruofei while he was coding. After returning the computer, he sat down on the sofa on the other side and chatted with Liu Mansha in a low voice.

Xia ruofei looked at the laptop that was still fully charged and his heart moved.

He first put the computer into the stone room in the cave in the mountain sea realm of the spirit map space.

His behavior did not attract the attention of the rest in the lounge. Everyone must have thought that Xia ruofei had put the laptop in his storage treasure. This was a very normal behavior. If it were them, they would have done the same.

Then, Xia ruofei used his spiritual will to communicate with scholar Yuntai. "Yuntai senior, I've brought back my computer, and it has high – resolution scans of floating point pictures, as well as the most likely 1000 text combinations from the previous text scheme. If you are interested, you can take a look!"

"I'm interested!" Answered layman Yuntai. Of course I'm interested! He was idle anyway! But ... The computer you mentioned ... How do I use it?"

Now, layman Yuntai was only left with his spirit body. Although he could use his spirit body to control the things in the outside world, he was now inside the mysterious ore space, which made it even more difficult to control. Moreover, such control would inevitably cause damage to his spirit body.

It would be extremely difficult to replenish the spiritual energy after it was depleted.

Therefore, unless he had no other choice, Yuntai would not stupidly consume his spirit body to control the objects in the outside world.

Of course, Xia ruofei could also use his spiritual power to control the computer remotely.

However, his top priority now was to modify and perfect the algorithm program, so he naturally couldn't be distracted by helping scholar Yuntai open and close the pictures or turn the pages of the documents.

Hence, Xia ruofei simply called Xia Qing to the stone room in the cave.

The stone chamber in the cave was an absolutely forbidden area for anyone other than the owner of the spirit map space.

Of course, with Xia ruofei's permission, Xia Qing could enter the cave.

Simple computer operations were not high – tech, and Xia Qing learned very quickly. After a few minutes, she learned to use the touchpad to control the mouse, open and close documents, pictures, and other basic operations.

Xia ruofei communicated with Xia Qing through divine sense and taught her the basics at the fastest speed.

After that, Xia ruofei left Xia Qing in the stone room of the cave, temporarily acting as the “Secretary” of Yuntai scholar.

Xia ruofei said to master Yuntai, “master Yuntai, please take your time. Take your time. If you find anything new, please let me know at any time!”

“I know! You can go!” Scholar Yuntai casually said, “little puppet! First, help me open the HD scan that little brat Xia mentioned, let me see how clear it is!”

Xia ruofei smiled and retracted his spiritual power. He no longer actively tried to sense what was happening in the stone room. Of course, if Xia Qing or master Yuntai contacted him, he would receive it immediately.

Xia ruofei’s fingers flew across his laptop, deleting the codes and adding new ones.

The algorithm that he had constructed in his mind was gradually realized through the code.

This algorithm was a test of one’s logical thinking ability, especially when modifying the original algorithm. The difficulty was actually greater.

However, Xia ruofei had already sorted out his thoughts. He did not need to think much. In addition, his hand speed was extremely fast. The code on the computer kept rolling up. Ordinary people could not even see the contents on the screen.

Even so, Xia ruofei spent almost an hour to modify the algorithm program.

He called Chen Xuan over, and the two of them spent about half an hour checking the entire algorithm program.

Xia ruofei was the clearest about the logic of the entire program. Hence, as he flipped through the pages, he explained the purpose of the code to Chen Xuan in a low voice so that Chen Xuan could understand it faster and save as much time as possible.

During the examination, they made minor adjustments to two or three areas that were flawed.

In fact, a more reliable method would be to run the program in a simulation environment for a while to verify the stability of the program before running it on a supercomputer.

However, time was running out. Xia ruofei and Chen Xuan rushed to check the algorithm program. There were less than four hours left.

If he wasted any more time, he was afraid that the remaining time would not be enough to complete the calculation process.

Hence, Xia ruofei quickly encrypted the program and sealed it. Then, he copied it to a portable hard disk that had been cleared and quickly went to the control room.

"Engineer he, I've made some adjustments to the algorithm program. Please help us run it again!" Xia ruofei knocked on the door of the control room and handed the hard drive to the technician on duty.

The technician was a little surprised, but the leader had told him last night to cooperate with Xia ruofei. Besides, the other party's time was not up yet, and the equipment was still idle. Why should he be the bad guy and reject Xia ruofei's reasonable request?

"No problem!" The technician readily took the hard drive and said, "please wait a moment. I'll run the program and then send the hard drive out to you!"

"Alright! Thank you for your hard work!" Xia ruofei said.

Chapter 3192 The mysterious array_

The technician on duty knew that Xia ruofei's time was precious, so he did not waste any time. He quickly turned back to the control room, copied the algorithm program from the portable hard disk, and ran it on the supercomputer.

Then, he took the hard disk out of the control room and handed it to Xia ruofei. He smiled and said, "President Xia, we've started running the program. You still have four hours. As long as the calculations aren't too complicated, it shouldn't be a big problem!"

The technician had made this judgment based on Xia ruofei's previous program, which had taken more than three hours to complete the calculation. If Xia ruofei did not make too many changes to the program, there should not be too much of a change in the calculation.

In fact, after Xia ruofei's modification, the calculation volume was much less than before.

Therefore, if nothing unexpected happened, there would be enough time. Xia ruofei was confident about this.

He smiled and said, "then I'll have to trouble you!" Worker he, I'll be waiting in the reception room downstairs. Once the results are out, please give me a call!"

"Alright!" The technician, he Gong, smiled and said, "President Xia, I think you might as well go back to the guest house and rest for a while! You can't even lie down in the reception room. I estimate that it will take at least three to four hours for the results to be out. It's enough for you to sleep!"

Xia ruofei smiled. "I won't go back and forth. I'm still young anyway. It's not a big deal to stay up all night!" Besides ... We've already slept for a while in the first half of the night!"

"Alright then!" The technician, he Gong, said, "once the results are out, I'll call the reception room immediately!"

"Good! Hard work! It's been hard on you!" Xia ruofei replied politely and left the engine room.

Of course, Xia ruofei was still using his spiritual power to monitor the control room.

The rising Dragon Order was too important, and any negligence was not acceptable.

After returning to the reception room, Xia ruofei explained the situation to Chen Xuan. Then, the two of them used their spiritual power to cover the monitoring room and observe the movements of the guards.

Time passed by.

Every second, the Super computer, the light of Taihu territory, was doing countless calculations.

The sun slowly rose from the East.

At around 7:30 in the morning, the phone in the reception room rang.

Xia ruofei had already used his spiritual power to check. The technician on duty, he Gong, was on the phone. He was slightly happy and walked over to grab the phone. "Hey! He Gong?"

"Yes! President Xia, you've completed all the procedures!" The technician, he Gong, said, "the result is a package of encrypted data. I made a copy of it without any changes!"

Xia ruofei had been watching gong he's every move. He knew that gong he did not do anything unnecessary, nor did he try to save a copy of the data.

"Alright! I'll be right there!" Xia ruofei said, "what trouble?!"

"You're too polite!" He Gong said, "I've already put it on the work computer outside the control room. You can check or copy it directly. I've also cleared the data on the control computer. You can rest assured that it's confidential!"

"Alright!" Xia ruofei said.

He called Chen Xuan, Mu Sheng, Liu Mansha, and the others and headed to the computer room.

At this time, the Supercomputing Center hadn't started work yet, but people who had a shift or were in charge of the next project that required the use of supercomputers had arrived in advance. When everyone saw this large group of people walking in the Supercomputing Center building, they couldn't help but cast curious looks.

At this time, in addition to engineer he, there were other technical personnel in the control room. Everyone was taking advantage of this short period of time to check the equipment parameters.

Worker he saw Xia ruofei and the others enter through the large glass window. He immediately put down his work and walked out of the room.

"President Xia!"

"Worker he, thank you for your hard work!" Xia ruofei said with a smile.

"Where? The calculation data is already in the shared folder of this computer!" He Gong smiled. "You can just handcuff him!"

As he Gong spoke, he opened the shared folder and pointed at one of the compressed files.

The compressed file was named automatically. Xia ruofei had written the program himself, so he could recognize it at a glance.

Moreover, his power of the will had been covering the control room, which meant that he had seen he Gong operate it with his own eyes. Therefore, there was definitely no problem.

“Thank you!”

Xia ruofei took out a portable hard drive and copied the compressed file onto it. Then, he ran the data – crushing program that he had written on the hard drive and completely deleted the original data on the computer.

Xia ruofei pulled out the hard drive and said, “He Gong! Thank you again! It’s been hard on you last night!”

“You’re welcome!” He Gong said with a smile.

He didn’t say anything about looking for him if there was a problem with the data because the data was automatically generated and compressed by the program. Due to the principle of confidentiality, he couldn’t open the Kasaya without permission. Of course, it wasn’t that easy to open it either. There was a high chance that Xia ruofei would have found out when he tried to open it.

He had also deleted the compressed file on the computer in the control room.

The light of Taihu territory, established by Shenwei, often took on some high – Level confidential business, so there was a fixed process for the processing of sensitive data. Yesterday, the director of the Center, Cai Songlin, personally instructed that the confidentiality of the data must be kept to the extreme, so he Gong also strictly followed the process and destroyed the data.

Chapter 3193 Mysterious array_

Of course, Cai Songlin’s consideration was not only about Wang Chi’s reputation. The main thing was that Xia ruofei was still the chairman of the Paradise Corporation. He was worried that if the supercomputer was used to simulate a project related to the Paradise corporation’s trade secrets, there would be some trouble in the future if the secret was leaked.

Therefore, the strict implementation of confidential data processing procedures was also a kind of protection for the Supercomputing Center itself.

After Xia ruofei received the data, he did not stay in the increasingly busy control room. He greeted engineer he and left the control room with Chen Xuan and the rest.

“Brother Xia, where are we going now?” Chen Xuan asked.

Xia ruofei thought for a while and said, “let’s go to the guest house first.” Let’s look at the situation in the data first ...”

If the data was still wrong, Xia ruofei might need to coordinate more supercomputer hours. Even if Wang Chi couldn’t help, if he really needed to use a supercomputer, Xia ruofei would have to ask elder song for help to coordinate more supercomputer hours.

However, no matter what, it was right to stay in new Wu city for now, lest he had to go back and forth later.

Not to mention, Wang Chi was still at the Supercomputing Center. Even if he was going back to Beijing, he couldn't just leave this old scholar here!

Hence, the group returned to the guest house and went to Xia ruofei's room.

Xia ruofei didn't waste any time. He took out his laptop from the spirit map space and connected the hard drive to the computer. He first copied the data onto the computer and then used the decryption software that he had written to uncompress the data.

The text data couldn't be that big, so it only took about ten seconds to uncompress it.

This time, there was only a text document in the folder.

Xia ruofei took a deep breath and double clicked the document.

Everyone held their breath and stood behind Xia ruofei, staring at the computer screen.

What entered his sight were rows of numbers: "6035502,201335052,635223,72 ..."

Of course, this was not surprising. Xia ruofei had written the algorithm program based on the idea that each floating point represented a number or a group of numbers. After adding various logical judgments, there was only one result.

However, in the face of a pile of numbers, no one could figure out the reason for it.

This was even more difficult to judge than the previous time.

Previously, all that was generated were words. Even though there were 1000 chapters, everyone could make a basic judgment with a glance. At least, they knew if it was meaningless words piled up or if there was really content.

This time, all the generated were numbers. No one could even judge whether the program was running normally or whether the generated results were correct.

Xia ruofei quickly scanned through all the 3000 sets of numbers. He had already confirmed that there were 3865 sets of numbers in the generated document, which corresponded to Floating Points.

In other words, after a variety of logical judgments, the program believed that each floating point represented a set of numbers, not a single number.

This was in line with Xia ruofei's prediction. After all, if there were more than 3800 numbers, the number of times they would be repeated would not be that few. With more than 3800 sets of numbers, the probability of repeated numbers would naturally be much lower. This was in line with the current distribution of results.

Xia ruofei smiled. "This is the result. We can only assume that this result is correct. Then, we can analyze the data." Everyone, please tell me! What do you see from these 3000 sets of numbers?"

Chen Xuan and the others looked at one another with bitter smiles on their faces.

Mu Sheng and Liu Mansha could only barely recognize the Arabic numbers. After all, they were used to using “one” to represent “1” most of the time. Although it was not difficult to master these tadpole – like Arabic numbers, it still took time to get used to them.

“Just say what you have to say! Everyone, let’s brainstorm!” Xia ruofei smiled and said, “I don’t know why either, so I wanted to ask everyone’s thoughts. Who knows, someone might have a flash of inspiration and find a breakthrough! Weiwei, Qingxue, just tell us what you found. Brother Jianfei and miss Xin ‘er, don’t be embarrassed. You can tell us anything you found for everyone’s reference!”

Yu Xin ‘er’s face turned slightly red. She glanced at her master.

Liu Mansha said with a smile, “Xin ‘er, just say what you have to say!” Don’t be nervous, no one will blame you if you say something wrong!”

Now that everyone had no ideas, it was natural to encourage everyone to speak up. Even if they said something wrong, it would not matter. Perhaps it could give others some inspiration.

Yu Xin ‘er nodded and said in a soft voice, “I ... Looked at these numbers and found that there were only 0 to 7. I didn’t see 8 or 9! I don’t know if this is a special place ...”

Yu Xin ‘er was still unconfident and lowered her head shyly after she finished speaking.

Xia ruofei looked at the document filled with numbers on the computer screen. After a quick glance, he immediately smiled and said, “Miss Xin ‘er, you’re very good! This was definitely a discovery! To be more precise, there were only positive and negative 1 to 7, and 0. There were no positive and negative 8 or 9! Miss Xin ‘er has made a good start! Let’s analyze again and see if there’s anything different about these numbers!”

After being praised by Xia ruofei, Yu Xin ‘er’s face blushed and she lowered her head even more.

Song Wei and Ling Qingxue looked at each other, then at the same time, they looked at Xia ruofei with a faint smile.

Xia ruofei did not notice the murderous look in his two close female friends ‘eyes. He was still staring at the computer screen and mumbled to himself, “The length of each group of numbers is not constant, and there is no fixed pattern. The ratio of positive and negative values ...”

“Brother Xia, is it possible that there’s some sort of special encryption method?” Chen Xuan asked.

Xia ruofei smiled bitterly. “If it’s just a simple password ... It would require a strong foundation in mathematics. Without enough samples, it would be difficult to crack it with just this document!”

At this point, Xia ruofei paused for a moment and said, “I don’t think it’s possible ... In fact, to translate the floating point pattern into a combination of numbers without the help of a supercomputer is already hell – Level difficulty. If this combination of numbers is still encrypted, and there is no way to crack it, it can only mean one thing ...”

Everyone turned to look at Xia ruofei.

“This means that the person who made these five tokens didn’t want to be able to decipher the secret in them!” Xia ruofei said.

Everyone could not help but laugh.

Xia ruofei continued, "seniors, brother Chen, this token is so exquisitely designed. The floating patterns on it are also very mysterious. I think that this token, which took so much effort to make, must be meant to leave some important information. If it's too difficult to decipher, or even beyond the scope of human labor, the possibility of this happening is not very high!"

Mu Sheng stroked his beard and smiled. He nodded and said, "I agree with little brother Xia's words. I think we shouldn't think too much about it and focus on finding out if there are any patterns in these numbers! Perhaps it's just as little brother Xia said, everything isn't that complicated!"

"Mm! We don't need to complicate a simple problem!" Chen Xuan nodded his head and said, "let's try to find a pattern first. If it really doesn't work, we'll consider a more complicated plan!"

Everyone started to discuss it. However, other than Yu xiner's initial discovery that only had numbers 0 to 7 and "7 to" 1, and the missing discovery of positive and negative 8 and 9, no one made any particularly exciting discoveries.

At this moment, Song Wei, who had been standing beside Xia ruofei, stared at the numbers on the computer screen and subconsciously started to hum ...

Chapter 3194 It's a music score?_

Everyone was in the middle of a discussion, so the room was rather noisy. However, Xia ruofei's sharp ears picked up Song Wei's humming.

He couldn't help but turn his head and ask with a smile, "Wei Wei, what's this tune? I don't think I've heard it before, but it's really nice to listen to!"

Actually, Song Wei was humming subconsciously. She only realized it when she heard Xia ruofei's words and quickly stopped with a red face.

"Don't stop!" Xia ruofei smiled and said, "by the way, Weiwei, you haven't answered me yet! What song is it?"

Song Wei came back to her senses and pointed at the computer screen in embarrassment, "I ... I don't know what's wrong with me. I just subconsciously hummed these numbers according to the music score. I didn't expect it to really be like a song ..."

Xia ruofei was stunned.

He turned his head and stared at the computer screen, turning the numbers into simplified music scores in his mind. As expected, the first few sets were the songs that Song Wei had just hummed.

Chen Xuan and the rest had also noticed the conversation between Xia ruofei and Song Wei.

Chen Xuan couldn't help but say, "brother Xia, miss Song Wei has provided us with a good idea!" But ... Could these numbers be just a song? If that was all, why did they need to use such a complicated method for encryption? Could it just be a coincidence?"

Xia ruofei was not in a hurry to answer. Instead, he quickly went through all 3000 sets of numbers.

These numbers were not the standard simplified music score, and what the negative numbers and zeros represented had to be guessed. Hence, Xia ruofei could not immediately reproduce the song in his mind.

However, even after going through it once, Xia ruofei was sure that the combination of these numbers could really form a song.

Xia ruofei thought for a moment and said, ""Brother Chen, let's analyze it first ... First, let's assume that the direction of deciphering this time is correct, and the program is running normally, so there is no problem with the result, right?"

"Of course!" Chen Xuan nodded. "That's a major premise."

A smile appeared on Xia ruofei's face. He couldn't suppress his excitement and said, ""I'm pretty sure that there won't be any problems with this premise!"

Chen Xuan was taken aback for a moment before he snapped back to his senses. His eyes widened as he asked, ""You're saying that our decryption direction is correct, the program is running normally, and the results and data are accurate? You're sure of all this?"

Xia ruofei nodded with a smile. "Due to strict consideration, I can only say that it's basically confirmed. However, the possibility is very high!"

Chen Xuan and the others gasped in shock. Chen Xuan was still in disbelief as he pointed at the document filled with numbers on the computer screen and asked, ""What's the basis? Is it because of that song?"

Xia ruofei nodded. "I've just used my fastest speed to go through the combination of more than 3000 numbers. Although I'm not completely sure what the numbers mean if this is a simplified score, there's no doubt that these 3000 numbers can still form a song!"

Chen Xuan nodded his head thoughtfully and said, ""I believe in brother Xia's vision. That is to say, these numbers can really be turned into a song, right?"

Xia ruofei nodded. "If you want to restore it perfectly, you need to try again. The main thing is to figure out the meaning of some numbers."

After listening for a while, Mu Sheng couldn't help but interrupt, ""Little brother Xia, I don't quite understand. Even if these numbers can form a song, how can they prove that our previous judgments are correct?"

Xia ruofei smiled and said, ""Sect leader mu, think about it from another perspective. There are three conditions in the major premise that we just mentioned. The direction is correct, the process is normal, and the data is accurate. If any one of them does not hold, then the answer we get must be a pair of chaotic and irregular numbers. And since we've gotten the score, doesn't that mean that we've been on the right path?"

Mu Sheng was deep in thought, but he still frowned and asked, ""Little brother Xia, I'm not doubting your judgment! I'm just a little worried. What if this is a coincidence?"

Xia ruofei was very sure. "It might be a coincidence that one or two groups could form a meaningful tune. However, if more than 3000 groups could form a song, the probability of it being a coincidence is much lower than winning the lottery!"

Xia ruofei smiled and said, "Today's incident made me recall a story. The Russia psychologist, Lefev, had always believed that music was the transmission of feelings from one person to another. He even believed that the language of music was the universal language! Lefeyvore had studied the spectrum of planet SS433 before. He found that the slowed – down spectrum matched the music composed of nine notes, and the accuracy was unusual. Many experts thought it was ridiculous at first, but after careful examination, they had to admit that the spectrum of planet SS433 could indeed form music. "Of course, most astronomers think that the creation of music is an accidental phenomenon and not some cosmic intelligence using the planet to compose!"

After Xia ruofei finished his story, he looked around at the crowd and said, "Lefeyvore had calculated the probability of this planet's spectrum matching the music from a mathematical point of view. It was about one in a thousand. Such a low probability was enough to attract everyone's interest and attention. In other words, the possibility of a piece of music being formed naturally or by chance was extremely low. "Especially when we have more than 3000 groups of numbers combined to form a meaningful music piece. To say that it was formed by coincidence or chance ... I can say that the probability of this happening is infinitely close to zero! Basically, it can be ignored!"

Chapter 3195 It's actually a music score?_

"That's right!" Chen Xuan nodded his head slowly. "The probability is indeed extremely low ... Brother Xia, this means that we've found the right path this time!"

Xia ruofei laughed and replied, "yes!" The problem now is how we can go further on this path until we reach our final goal and obtain the ultimate answer!"

"Fellow Daoist Xia, since the composition is confirmed, shouldn't we start with the composition?" Liu Mansha smiled and asked in a negotiating tone.

Xia ruofei nodded and said, "I agree!" Let's confirm the content of the music as soon as possible, and we might be able to find more clues!"

At this point, Xia ruofei couldn't help but smile at Song Wei and said, "Wei Wei is really My Lucky Star! If not for your sudden inspiration, we wouldn't have thought that this would be a song!"

"I didn't mean to ... I don't know what happened just now, but I subconsciously hummed it as a simplified music score," Song Wei said with a red face.

"Invisible ... Uh, unintentional things are the most awesome!" Xia ruofei laughed and said, "this means that you're fated to play this song! So, you'll have to put in more effort next! Let's try to reproduce this song perfectly!"

Song Wei blushed and nodded, "If I can help, I'll definitely spare no effort!"

Xia ruofei nodded. "Weiwei just hummed the first part of the song. How do you feel?"

Song Wei nodded and said, "actually, I didn't think too much about it just now. I just followed 1 to 7 to correspond to do to si. Then, I felt that it shouldn't be completely correct because it was obviously a bit of a mess."

"Hmm ... We'll think about this later!" Xia ruofei smiled and said, "there are always more solutions than difficulties. Besides, we should have already overcome the most difficult part. The next step is nothing more than trial and error. The workload is not particularly heavy."

Mu Sheng and the others were also very excited. Liu Mansha pondered for a while and said, "Fellow Daoist Xia, let's study this combination of numbers according to the music score!"

Xia ruofei nodded and said, "this should be the direction we should focus on!" But ... I think we should go back to the capital first!"

"That's right!" Chen Xuan nodded. Since we can basically confirm that the answer is correct, we don't need a supercomputer anymore. It's not convenient here, so let's go back to brother Xia's courtyard house in Beijing!"

In fact, Chen Xuan wanted to return to the first heaven society more. However, he knew that Xia ruofei could not let his guard down completely. It was not appropriate for Xia ruofei to return to the first heaven society, at least not at this stage.

Similarly, if Mu Sheng and Liu Mansha requested to study the combination of numbers at the surging waves sect or the soaring Flower Valley, Chen Xuan would also have some concerns.

Therefore, Xia ruofei's business in the secular world was the most suitable choice. After all, they didn't have to worry about their safety or which side was too powerful. Even Xia ruofei, the owner, was the same as everyone else. He was even at a slight disadvantage because of his cultivation and background.

Mu Sheng and Liu Mansha were both people who had experienced many vicissitudes of life. Naturally, they understood the various considerations in this matter after a little hesitation. Therefore, the two of them did not raise any objections and readily agreed.

Hence, Xia ruofei kept his laptop for the time being and contacted the crew members who were still on standby in Xin Wu, asking them to immediately apply for a flight route back to Beijing.

After calling the flight crew, Xia ruofei called Wang Chi's Ph.D. Student, Feng Xiaoyi, to ask about Wang Chi's schedule. He found out that Wang Chi was having breakfast on the second floor of the guest house, so Xia ruofei went downstairs to look for him.

In the private room, Cai Songlin, the director of the Supercomputing Center, and some other members of the central team, including Deputy Director Wei, were having breakfast with Wang Chi.

"President Xia! Have you eaten?" Wang Chi asked with a smile after seeing Xia ruofei.

"It was a little easy to deal with!" Xia ruofei smiled and said, "you're up early, academician Wang!"

Wang Chi laughed at himself. "When people get older, they sleep less. Nowadays, young people sleep until late in the morning. Only the old people who are about to die get up early!"

Cai Songlin smiled and said, "academician Wang, this is a healthy lifestyle!" It's not related to age!"

Then, Cai Songlin said to Xia ruofei, ""President Xia, I asked someone to treat you to breakfast in the room early in the morning, but since you went to the computer room, I asked the computer room to keep an eye on you. After you're done with your business, I'll invite you here for breakfast! These people aren't working hard. I'll have to criticize them later!"

Xia ruofei was a guest brought by Wang Chi. Although Xia ruofei had been waiting in the engine room the whole morning for some objective reasons, Cai Songlin still felt that he had not been very hospitable to his guests, especially in front of Wang Chi. He had to show his attitude.

Xia ruofei smiled and said, "director Cai, it has nothing to do with our comrades in the computer room. Everyone is tired from work, especially engineer he. He couldn't even sleep last night and was busy handing over work in the morning. I didn't want to disturb him, so I quietly returned to the guest house."

"Mr. Xia, did the program run smoothly last night?" Wang Chi asked.

Xia ruofei smiled and said, "the first time wasn't very smooth. I adjusted the algorithm and ran it again. The result was finally more ideal!" Fortunately, academician Wang, you helped me coordinate the flight time, and my program's calculation was less than expected. I managed to complete the operation before the flight time ran out!"

Wang Chi revealed a strange expression and said, ""So, you adjusted the algorithm program on the spot last night?"

In such a tight time, it was easy to find the parts that needed to be modified in a sea of code and then change the appropriate content. Perhaps a small bug could take a few days for a programmer.

Xia ruofei chuckled. "I was lucky. I found the part that needed to be adjusted immediately. Coincidentally, my train of thought was quite clear too. So, I changed it immediately!"

"Amazing!" Wang Chi could not help but give Xia ruofei a thumbs up.

"By the way," Xia ruofei said, "academician Wang, what are your plans?"

Wang Chi smiled and said, "my work at new Wu is done. I'll leave it to you." If you want to stay in Xin Wu for a few more days or go to other places, I'll take little Feng back to the capital first. "

Xia ruofei smiled. "We're also preparing to return to the capital. Let's go together!" He said.

Xia ruofei was still worried that Wang Chi had some unfinished business here. They were all in a hurry to go back and continue studying the combination of numbers, so they couldn't wait here forever. If Wang Chi couldn't return to the capital today, Xia ruofei would go back first. At most, he would buy a first class ticket for Wang Chi and his teacher.

Since Wang Chi was also preparing to go back, it was the best of both worlds.

At this moment, the flight crew called. After Xia ruofei answered, he smiled and said, ""Academician Wang, the flight crew just called. They're taking off at 10:30 am. Is there anything else you need to do? Will we make it in time?"

Wang Chi chuckled and said, "sure!" Yes! Let's prepare according to this time!"

“Alright!” Xia ruofei said, “then I won’t disturb your breakfast! Let’s set off at 9:30, we’ll meet downstairs at the guest house!”

Chapter 3196 Major progress (1)

Xia ruofei bade Wang Chi, Cai Songlin, and the others farewell and left the private room.

Wang Chi said to Cai Songlin, “director Cai, could we trouble central to send a car to take us to the airport?” We’ll leave at 9:30 sharp!”

Cai Songlin nodded his head and said, “No problem! No problem! Director Zhong, please make the arrangements!”

“Alright!” Director Zhong, who was in the general office, quickly replied. Then he took his mobile phone and walked out of the room to call the car team to send a car.

Earlier, when Xia ruofei was around, Cai Songlin did not ask too much. Now that Xia ruofei had left, he could not hold back his curiosity and asked, “Academician Wang, President Xia just said ... The flight crew called him? It should be the airline’s ground service staff, right? And ... The take – off time can be discussed?”

Wang Chi laughed and patted Cai Songlin’s shoulder, saying, “Xiao Cai! We should be more imaginative! President Xia was in a private jet, so wasn’t it the same as directly contacting the flight crew? Their take – off time is also more flexible. It’s based on the boarding time of the passengers!”

Cai Songlin was stunned for a moment, then he could not help but smile bitterly and said, “It’s true that poverty has limited my imagination!”

Wang Chi laughed and said, “don’t talk about you. This is also my first time taking a private jet. I’ve been to many places in my life. I’ve been abroad more than 30 times over the years! But when I came here yesterday, I really almost made a fool of myself ...”

“That’s not necessary!” Cai Songlin laughed.

.....

Xia ruofei returned to his room in the guest house and told everyone about the upcoming schedule. Then, they got ready to leave.

In fact, they didn’t have much to prepare. Everyone basically had a storage magic treasure, and they were used to carrying all kinds of necessities when they went out. When they left, they just needed to pack their things.

There was still about an hour before they would set off. Hence, Xia ruofei discussed with everyone and decided to study the combination of numbers that seemed to be a music score in the guest house.

Xia ruofei’s suggestion received everyone’s agreement.

When the result of this combination of numbers came out today, it basically meant that they had taken a big step forward in cracking the five sages order or the rising Dragon Order. Now, everyone was itching to find the ultimate answer as soon as possible!

Hence, Xia ruofei took out his laptop and started to study it with the others.

Everyone was enthusiastically discussing.

"1 to 7 means do to si. There should be no doubt about that." Xia ruofei muttered.

Song Wei subconsciously hummed a tune based on this.

Xia ruofei frowned and asked, "then what does 0 mean?" A rest talisman?"

Song Wei was the first to discover that the array was suspected to be a score. She had a certain foundation in music theory, so she had more say in it.

After hearing Xia ruofei's words, Song Wei shook her head and said, "I don't think it's possible because 0s have appeared too many times, and many of them are in the middle of a group of numbers. If it's a pause, then the music is intermittent. Also, we saw that in a set of numbers, there would be two zeros in a row. Stop talismans shouldn't be used like that ..."

Xia ruofei nodded and said, "that makes sense. Then what does this 0 mean?" Weiwei, tell me! Everyone, share your thoughts and we'll brainstorm!"

Liu Mansha smiled. "The Music Theory I know is all about Gong Shang and jiao yu. I don't know anything about these tadpole – like numbers!"

Xia ruofei smiled and said, "the five tones are connected!" As long as it's related to music theory, everyone can talk about it so that we can inspire each other!"

Liu Mansha smiled and nodded, but did not say anything. It was obvious that she did not have any constructive opinions for the time being.

Xia ruofei didn't force her and continued, "Then, Wei Wei, tell me your opinion."

"What I said might not be right, it's just a guess ..." Song Wei said after some thought.

"It's okay, just tell me what you think." Liu Mansha smiled and said, "there's no difference in seniority or cultivation level here. Everyone, please speak your mind!"

Xia ruofei laughed and said, "that's right!" There are specializations in every profession! Not to mention, it was a brainstorming now. Who knew, someone might have a good idea when the inspiration came! It has nothing to do with cultivation!"

"Then I'll tell you!" Song Wei said, "I don't think it's a rest talisman. Could it be a beat?" Let's assume that the number "0" represents a delay of one beat, then it seems that the whole song will be much smoother!"

After she finished, Song Wei even hummed a few lines. As expected, everyone could clearly feel that the first few lines were smoother and more pleasant to the ear.

Xia ruofei slapped his thigh and said, "what Wei Wei said is quite possible!" The song was obviously smoother! And I feel that this song is really melodious. I've never heard such a song before. It's like heavenly music!"

Chen Xuan and the rest nodded their heads in agreement. Just the first few lines of Song Wei's song and Song Wei's soft humming of the song were enough to stir the hearts of everyone.

Of course, this also made everyone even more excited. The more complex the song was, the higher the possibility that they had chosen the right path. They were also closer to solving the secret of the floating point image on the token.

Chapter 3197 Major progress (2)

"As for the number 0, we'll deal with it according to the extended beat symbol for now!" Xia ruofei said, "the next question is these negative numbers. From 7 to 1, what do they represent?"

"I think ... It's probably the tone!" Song Wei said. 1 corresponds to 1, 2 corresponds to 2, and so on. However, I don't know if the pitch of a negative number is higher or lower than a positive number, and how many degrees different they are ..."

Xia ruofei thought for a moment and said, "We can try this bit by bit. After all, there are only a few possibilities."

"I think Song Wei's answer is closer to the correct one!" Chen Xuan said. After we return to the capital, we'll follow this guess. First, we'll convert the song into a simplified score, and then list out all the versions. When the time comes, we'll be able to distinguish which one is correct after listening to it!"

Xia ruofei nodded and said, "yes!" We've already guessed the main problems. As for the remaining small problems, we'll just have to try and make some mistakes. We should be able to find the right song very soon!"

Mu Sheng laughed and said, "we're also looking forward to it!" This time, they finally saw a ray of hope! We've been researching the secret of the five Holy badges for many years, but we've never had any results! I didn't expect it to go so smoothly this time!"

Although there were some twists and turns in the process of cracking the token, from Mu Sheng's point of view, it was already quite successful to be able to progress to this extent in such a short time.

Liu Mansha also laughed and said, "the future generations are truly fearsome!" If it were us old guys, even if we had five tokens in front of us, we might not be able to crack the secret of this floating point pattern in our entire lives!"

Although they had yet to completely succeed in cracking the secret of the token, Mu Sheng and Liu Mansha could already see a huge hope. What made them feel even more embarrassed was that the people who had played a role in the whole process were mostly young people. Chen Xuan and Xia ruofei had put in the most effort, especially Xia ruofei. Even song Wei, Ling Qingxue, and the others had played a bigger role than them.

Xia ruofei smiled. "Valley master Liu, you're too kind. We also rely on the computing power of supercomputers and a little bit of luck."

"Hahaha! Anyway, using this super computer or whatever ... We old guys will never think of it in our lifetime." Mu Sheng laughed and joined in the praise, "it's all thanks to little brother Xia this time!" If you can successfully crack the secret of the token, you will be the main contributor!"

Xia ruofei quickly said, "we don't know if we can crack it!" I dare not accept sect leader MU's evaluation ..."

As they discussed the score made up of numbers, they chatted. Soon, it was almost 9:30.

Hence, Xia ruofei beckoned everyone to go downstairs.

The bags in everyone's hands were basically for show, and most of the luggage was stored in storage magic treasures.

On the other hand, Wang Chi and his teacher were dragging two large suitcases.

A coaster from the Supercomputing Center was already parked outside the guest house. Cai Songlin, along with Deputy Director Wei and the other leaders of the Supercomputing Center, also came to the building to see them off.

"Academician Wang, can't you stay for a few more days?" Cai Songlin said, "everyone in our Center is looking forward to you guiding us in our work!"

Wang Chi chuckled and said, "the problems that need to be solved have been solved!" I have a lot of work to do at the Research Institute in Beijing, so I have to rush back as soon as possible!"

"You've worked hard, academician Wang! I haven't been able to entertain you well these two days!" Cai Songlin said politely.

"Hey! I'm used to running here and there!" Wang Chi said in a carefree manner.

"You are the pillar of our country's Computer Science field. We can't live without you!" Cai Songlin flattered him and said, "academician Wang, I'll be looking forward to your guidance at the Supercomputing Center!"

"No problem!" Wang Chi said, "let's communicate more often. If you have any questions, contact me by email!"

As they were talking, Xia ruofei and the rest walked out of the guest house.

"I'm sorry, I came down late!" Xia ruofei said with a smile.

"I was the one who went downstairs early!" Wang Chi said with a smile.

"President Xia, I came and went in a hurry this time. Please forgive me for my poor hospitality!" Cai Songlin smiled.

"I've caused trouble for the Supercomputing Center!" Xia ruofei said politely, "thank you, director Cai, Deputy Director Wei, and all the leaders. When I go back, I will ask the company to send a batch of jade skin cream over. You can distribute it as an employee benefit. It's not worth much, but it's just a token of my appreciation."

"No need, no need, no need ..." Cai Songlin quickly said, "President Xia, you don't have to be so polite! We're all doing this for work! Also ... Academician Wang is the one who asked for it, so what's the big deal?"

“Of course, I have to thank academician Wang!” Xia ruofei smiled and said, “but the Supercomputing Center has indeed helped me a lot. I’ve always been a person who draws a clear line between gratitude and grudges, so I still have to thank you ... Director Cai, it’s almost time. We’ll take our leave now!”

“Good! Academician Wang, President Xia, I wish you all a safe journey!”

Xia ruofei, Wang Chi, and the rest got into the Super – Computing Center’s Toyota Coaster. They drove all the way to the new Wu hotel and checked out before heading straight to the airport.

At 10:20 A. M., Not long after everyone had boarded the plane, the tower’s take – off command was sent.

The runway of Xin Wu airport was not long, but it was enough for the public jet to take off and land.

After a short slide, paradise rose into the air and began to climb rapidly in a light posture.

The flight was smooth. Before 12 o’ clock, paradise had landed on the runway of Beijing airport.

It was already lunch time, so Xia ruofei brought everyone to paradise clubhouse for lunch. After all, the car that was going to pick them up was also from paradise clubhouse.

As for the flight crew, after some consideration, Xia ruofei ordered them to take a short break and return to the three mountains.

Sanshan airport was the base airport of the public jet, paradise. This plane was actually under the name of Li Yifu’s company. The company had signed a long – term agreement with Sanshan airport, which included the rental of the venue, ground service maintenance, fuel refilling, and so on.

If the plane were to stop at another airport, it would naturally cost an additional fee.

Besides, the flight crew also had a fixed residence at the three mountains. Hence, if they were not using the plane for a while, Xia ruofei felt that it was more appropriate to let them wait for orders at the three mountains.

In fact, he had less and less time to use an airplane. After all, an airboat was more convenient.

After lunch at the Taoyuan club, Xia ruofei gave Wang Chi and Feng Xiaoyi each a gift. It was actually two bottles of Drunken Eight Immortals wine, a box of Dahongpao tea leaves, and a Jade skin cream. In addition, there was a Cordyceps sinensis among the gifts for Wang Chi, which was better for the elderly. Feng Xiaoyi was young, so he naturally didn’t give it to him.

Of course, the gift was just a small token of appreciation. In fact, Wang Chi and Feng Xiaoyi didn’t know that. What was more precious was that Xia ruofei felt that he owed Wang Chi a favor and would definitely return it in the future.

This favor, at the right time, would play an immeasurable role.

After arranging for the Taoyuan club’s car to send Wang Chi and his disciple back to Beijing University, Xia ruofei also took the Taoyuan club’s business car and returned to the courtyard house in liuhai Lane with Chen Xuan, Mu Sheng, Liu Mansha, and the others.

When they reached home, Xia ruofei brought everyone to the master's courtyard in the middle. He opened the door and said, "Let's start studying this music score today and try to solve the secret of the token as soon as possible."

In comparison, Xia ruofei was more anxious than Mu Sheng and the others because he knew that the token had appeared more than three hundred years ago. According to the information provided by the master of the cloud platform, they could disappear at any time and hide. No one knew how many years it would take for them to reappear.

This was something that Chen Xuan and the others did not know.

The door opened, and everyone entered the house.

"Brother Xia, where do you plan to start?" Chen Xuan asked. Shouldn't we study the main musical instruments of the ancient times first? You have to know that the sound produced by different instruments is very different!"

Xia ruofei waved his hand and said, "this score doesn't look like it was written by the ancient people. Although we can't determine the era, this score looks even more crude than a simplified score. How can it be played by an ancient instrument?" So, I've decided to start with something simple and crude!"

At this point, Xia ruofei's face broke into a smile ...

Chapter 3198 This song should only exist in the heavens_

"Oh? I'd like to hear more details!" Chen Xuan said hurriedly.

In fact, Xia ruofei was the one in charge of cracking the token. Even seniors like Mu Sheng and Liu Mansha were used to letting Xia ruofei make the decisions.

Xia ruofei smiled and said, "I believe everyone has seen that the score is extremely simple. There are basically only two tones, seven notes, and a number '0' that seems to be a beat symbol. Logically, such a simple score is not enough to form a song."

At this point, Xia ruofei paused and continued, "And in reality? Everyone has seen it with their own eyes. Not only did it form a song, but even with such a simple score, the tone of the simple humming is extremely beautiful ... So, I think we can start from the simplest direction! First find the correct score, then consider whether the instrument and other factors will affect the song."

"That makes sense ..." Chen Xuan nodded his head after a moment of silence. "How do we do it?" he asked.

"With the help of music arrangement software!" Xia ruofei said without hesitation, "input our score into the music arrangement software according to our judgment and different situations. Then, we'll produce several versions of the music. We'll just listen to the effect directly!"

"Good idea!" Chen Xuan said.

Mu Sheng and Liu Mansha looked at each other and smiled wryly at the same time. They didn't know anything about music arrangement software. These days, they felt like they were fools and didn't know anything.

Xia ruofei took out his laptop from the spirit map space. He first paid for a professional music arrangement software, installed it on the computer, and learned a little.

This kind of professional software usually didn't have a particularly good user experience, and it was a bit difficult to operate.

However, Xia ruofei found a few video tutorials on the official website of the software, watched them, and actually operated the software for a while. Soon, he had a basic understanding of how to use the software.

Xia ruofei tried to compose a short piece of music and smiled at Chen Xuan. "Brother Chen, you were talking about the problem with the instruments. This software can simulate the sounds of all kinds of instruments! From the chimes to the zither and lute ... There's everything you can think of!"

"That's great!" Chen Xuan chuckled. "Let's decide on the song first, then use an instrument to simulate it. We should be able to find the most accurate version very quickly!"

"Then I'll get to work first!" Xia ruofei said with a smile as he stretched his neck.

The rest of the work was actually quite boring.

All he had to do was to input the score into the music arrangement software according to the numerical combination in the document.

Xia ruofei first listed out a few plans on the paper, mainly involving the different situations represented by negative numbers and some minor adjustments. In short, they were all guesses. They had to form music pieces through software and listen to them all to find the most suitable or correct one.

Of course, this did not need to be simulated by a supercomputer, because only about 20 combinations were listed in the end.

Besides, Xia ruofei didn't have to type more than 20 times. Each time, he would have to type almost 4000 combinations of numbers. It was quite tiring to type once. If he had to type more than 20 times, it would be a little unbearable.

There wasn't much of a problem with physical strength, but it was too boring.

In reality, Xia ruofei had only managed to key in every single tune into the music arrangement software the first time.

Then, he made another copy of the plan.

The next 20 or so plans were all modified based on this.

This was because most of these 20 or so combinations were actually the same. The parts that needed to be changed were different, but the proportion was not very high.

Of course, the overall workload was still very heavy.

Xia ruofei did not finish the work for the entire afternoon.

Everyone went to the backyard to have dinner, and then Xia ruofei continued to work through the night.

It was not until the second half of the night that Xia ruofei entered all 20 combinations into the music arrangement software.

He spent some more time checking through everything.

When it was confirmed, the horizon also revealed the dawn of dawn.

Xia ruofei had stayed up all night again.

Now, everyone's trust in Xia ruofei was even higher. Last night, they did not stay in Xia ruofei's room for the entire time. They left at 90 PM, leaving Xia ruofei, Song Wei, and Ling Qingxue behind.

Of course, Xia ruofei could not be sure if Mu Sheng and Liu Mansha, or even if Chen Xuan was completely at ease with him. He could not rule out the possibility that they had used their spiritual power to monitor him after they returned to their room at night.

Hence, during Xia ruofei's entire working day, he was basically typing in the simplified version of the music score. He did not even listen to a small part of it to prevent Li Xia from not being able to explain it clearly.

Anyway, Xia ruofei had no intention of monopolizing the food.

If he wanted to test the effect, it would be better to wait until everyone was present.

Song Wei and Ling Qingxue did not go to bed until the second half of the night. In the morning, when Xia ruofei finished inputting all the combinations and stood up to stretch, the two of them woke up.

Both Song Wei and Ling Qingxue felt sorry for Xia ruofei, but he was happy and did not look tired at all.

On the contrary, after completing a task that did not require much skill but was extremely cumbersome, Xia ruofei felt a sense of relief.

Chapter 3199 This song should only be played in the heavens (2)

Moreover, he was also a little impatient to hear what song it was that had to be hidden so well.

If he could find the right song, would he be able to discover some shocking secret?

Xia ruofei asked Ling Qingxue and Song Wei to freshen up as soon as possible while he walked out to the courtyard to stretch his muscles and breathe in some fresh air.

The main thing was that he knew that as long as he appeared in the courtyard, Mu Sheng, Liu Mansha, and the others would also come out very quickly.

As expected, just as Xia ruofei was about to move his limbs and sit down at the stone table, Chen Xuan, Mu Sheng and the rest walked out of the room.

"Morning!" Xia ruofei greeted him with a smile.

"Thank you for your hard work, brother Xia!" "You didn't sleep last night?" Chen Xuan asked with a smile.

Xia ruofei smiled and nodded. "I can't stop once I've done something. I might as well finish it in one go!"

“So, little brother Xia has already finished?” Mu Sheng asked.

Xia ruofei smiled and nodded.””Yup! I formed different music sheets from the various possibilities that we discussed and entered them into the software one by one. More than 20 songs were generated. As for the secret we want to know, I’m not sure if it’s in these 20 songs ...”

“That’s great!” Mu Sheng said happily,”little brother Xia, thank you for your hard work!”

Xia ruofei chuckled.”Actually, it’s all repetitive work without any technical content. It’s mainly a test of patience. It’s not hard work ...”

Mu Sheng deliberately put on a bitter face and said,”little brother Xia, we old men don’t know anything about the job that you said has no technical content!” After hearing what you said, we feel even more useless!”

“That’s not what I meant ...” Xia ruofei explained.”It’s easy for sect leader mu to learn these things. It’s just that there’s no need to!”

In terms of learning ability, Mu Sheng and Liu Mansha, who were in the intermediate stage of the Golden core realm, only needed a few hours to master the basic knowledge of computer operation and the use of a software. However, as Xia ruofei had said, they did not need to use it at all, so it was naturally unnecessary.

Xia ruofei continued.”I plan to listen to these songs now. I won’t be having breakfast. What do you think?”

“Just what I wanted!” Mu Sheng said.

“I can’t wait either!” Liu Mansha said with a smile.

“I agree!” Chen Xuan replied.

For cultivators, three meals a day was more of a continuation of a habit. Their bodies had already exceeded the scope of ordinary people, and they did not need to eat every day.

In fact, it was a relatively low – Level method to obtain energy through eating food. It was much more direct for cultivators to absorb the spiritual energy of heaven and earth than eating.

“Then it’s decided!” Xia ruofei said.

He called Wu Qiang directly and told him that he and the guests would not be eating breakfast today. In addition, there was a more important matter in the master’s courtyard, and he asked him to tell everyone not to enter the courtyard.

Then, Xia ruofei brought everyone to the basement.

The siheyuan had a large basement, and there was a very professional movie and music Hall in it, which was basically the configuration of a small cinema.

The sound system in the theater was very professional, so the effect was naturally much better than the computer.

Xia ruofei wanted to listen to more than 20 songs today. The first thing he thought of was to come to the recording studio.

In addition to the sound effects, the sound insulation was also very good. Basically, once the door was closed, no sound could be heard from the outside.

The group walked into the movie hall. There were a total of two rows of eight very comfortable leather couches placed in a semicircle, facing the movie screen in front of them.

Xia ruofei asked everyone to find a place to sit down first. Then, he went to the small screening room in the studio, connected the computer to the mixer, and made some simple adjustments. The sound effect was very good.

Then, Xia ruofei walked out of the screening room and said to everyone, "Everyone, please wait for a moment. I'll set up a sound – proof barrier, and then we'll start to listen to the music!"

With that, Xia ruofei walked out of the recording hall and skillfully set up a formation barrier around the area, covering the entire Hall.

This way, not a single sound could be heard.

Xia ruofei had also considered the fact that the music score was heavily protected. It was encrypted and recorded on the token. He did not know if there would be any special effects. If the sound leaked out and was heard by the staff outside or even the passersby in the alley, it would be difficult to deal with it.

In short, there was no harm in being careful.

After setting up the barrier, Xia ruofei returned to the recording hall.

Mu Sheng and the others were already a little impatient. Xia ruofei smiled and said, "I'm going to start playing the songs in order. There are a total of 26 songs, and I've already numbered them!"

"Let's start!" Mu Sheng said, "we're all ready!"

Xia ruofei nodded and walked into the small screening room. His heart was filled with anticipation. He selected the song numbered 1 on the music arrangement software and played it.

A melodious tune rang out in the recording hall. The top – notch sound system created a very good surrounding effect, causing people to involuntarily immerse themselves in the atmosphere of listening.

Xia ruofei stood at the door of the screening room, listening to the song with his eyes closed.

He had to admit that the melody was beautiful. Even though the score looked simple, the music had a unique quality to it. It was similar to the Chinese folk music style, but it was better than any of the folk music that Xia ruofei had ever heard.

After a long time, the song ended.

Xia ruofei finally opened his eyes and looked at the crowd.

"How do you feel, Valley master Liu?" Xia ruofei asked.

"It's a beautiful melody, but I don't think it's the correct version ..." Liu Mansha said with a smile.

Mu Sheng nodded in agreement and said, ""The melody is indeed very beautiful, but I keep feeling that there are some places that are not particularly coordinated. As for the specific reason, I can't tell!"

"Brother Chen, what do you think?" Xia ruofei asked with a smile.

Chen Xuan pondered for a moment before saying, ""I have the same feeling as the two seniors, this song is probably not the best version!"

Xia ruofei nodded and smiled. ""Looks like everyone's feeling is the same as mine."

When Xia ruofei listened to the song, he also felt that although the melody was very nice, he could more or less feel a trace of disharmony. Especially when he used his spiritual power to listen, this feeling was more obvious.

Xia ruofei had recorded more than 20 versions of the song. In fact, the difference between each version was very subtle, and there might only be a few minor adjustments.

Therefore, he was pretty sure that this song wasn't the answer they were looking for.

"Then let's continue with the second song!" Xia ruofei said with a smile.

...

Then, he walked into the screening room and clicked on the second song.

This song also made people feel that it was a bit uncoordinated, and it was what everyone felt.

Then, the third song, the fourth song ...

Xia ruofei and the others listened to 18 songs in a row.

Everyone couldn't help but feel a little emotional. The overall melody of the song was basically the same, but after some minor adjustments, it gave people a different feeling.

What was even rarer was that these 18 songs were definitely the best of the best. If any of these songs were to be uploaded onto the internet, it would definitely be crazily sought after by people who loved folk music. Even people who didn't usually like to listen to pure music would be attracted by it.

But to everyone's disappointment, these 18 songs still felt a little off. It felt like they were just a little bit away from perfection, but they were just a little bit off.

Of course, after listening to the 18 songs, although they still didn't gain anything, their confidence increased.

These 18 songs had fully proved that the combination of numbers obtained by solving the floating point pattern of the token through supercomputing was not a meaningless pile of numbers.

This also confirmed their conclusion that Yingying had really found the right direction this time!

Xia ruofei was not discouraged. After exchanging opinions with everyone, he played the 19th song.

...

This time, it was the same melody that everyone was familiar with. However, when the melody played in the recording room, Xia ruofei's body trembled slightly.

His mouth was slightly open, and although his eyes were focused ahead, they were clearly not focused.

The moment the song was played, Xia ruofei had already entered a wonderful state ...

Chapter 3200 A wonderful journey (1)

Xia ruofei felt as if his soul had left his body. He could not control his consciousness at all.

A moment ago, he was still in the Music Hall, but when the music started, the scene in front of him changed like the stars.

Xia ruofei felt like he was flying at high speed.

Of course, his consciousness wasn't completely sealed. He felt like he was a weightless consciousness form. Under the effect of a suction force, he couldn't help but fly upwards.

He could even feel that the earth was moving away quickly, and the White clouds that drifted past him at a high speed were actually him moving towards the White clouds.

In the blink of an eye, Xia ruofei felt as if he had passed through the atmosphere and entered the dark space.

He instinctively felt a little scared, but he did not feel any suffocation or discomfort. Only then did he realize that he had not left earth with his physical body at all. How could he feel anything?

Xia ruofei looked down and could already see the huge curved outline of earth.

This was his first time looking back at the home of mankind from a first – person perspective. The spectacular view was indeed very shocking.

However, Xia ruofei quickly recovered from the shock because he realized that his consciousness was still moving forward at a rapid pace with no intention of stopping.

As the distance between them increased, Xia ruofei could see the entire earth behind him. The Blue Planet was like a sapphire embedded in the dark Universe, so dazzling.

Xia ruofei could feel that he was traveling at an extremely fast speed in space. He was surrounded by absolute darkness and hundreds of millions of years of loneliness. The only light of hope came from earth behind him, but it was getting further and further away.

Even though Xia ruofei's mental strength had long surpassed that of ordinary people and he was already a cultivator in the Golden core stage, he still felt a trace of fear from the bottom of his heart in such an environment.

He didn't know where he would go, and in front of him was absolute darkness, with no end ...

Xia ruofei did not know how long he had been flying for when he saw a familiar celestial body in front of him.

He was slightly stunned. Wasn't this the moon?

In such a short time, they had already arrived near the moon? Xia ruofei was dumbfounded.

His flying speed did not slow down as he quickly approached the small planet.

Looking at the familiar craters and the mottled craters on the planet's surface, and looking back to confirm Earth's position, Xia ruofei could basically confirm that this was indeed the moon that hung in the sky every night ...

As they neared the moon, Xia ruofei realized that he was slowing down.

Could the destination be the moon? Xia ruofei suddenly had a thought.

His consciousness swept past the surface of the moon and went to the back.

Xia ruofei couldn't help but feel excited. This was the legendary Dark Side of the Moon!

It was well known that due to the tidal lock, only one side of the moon was always facing the earth, while the other side was invisible from the earth. This was what people called the "back of the moon."

There were many legends about the dark side of the moon. Some said that there was an alien base there used to monitor the people on earth; There were also rumors that there were people from the moon living on the dark side of the moon ... In short, there were all kinds of evil legends.

In fact, humans had also launched probes to check out the situation on the dark side of the moon. China's Jade Rabbit had even landed on the dark side of the moon. From what they had detected, the dark side of the moon and the front side of the moon were similar. They were both extremely lonely. Not to mention the people on the moon, even unicellular organisms could not be found ...

But no matter what, Xia ruofei was still looking forward to seeing the dark side of the moon.

After arriving at the dark side of the moon, Xia ruofei's altitude was getting lower and lower. However, his speed did not decrease by much.

As they got closer to the moon, Xia ruofei realized that the craters that looked like pockmarks on the pictures were actually huge.

His consciousness passed through the huge craters and finally landed on the back of a crater.

Then, Xia ruofei saw that in this barren Valley, there were eight bright spots that lit up in eight different directions. Each of them lit up three times in a different order and the speed was extremely fast. In a short time, the bright spots seemed to have connected into one.

Xia ruofei still subconsciously memorized the positions and order of these bright spots.

After the eight bright spots lit up three times, under the thick dust that seemed to have been silent for thousands of years, a gourd – like pottery slowly rose up.

Xia ruofei couldn't help but be dumbfounded. This gourd – shaped pottery was obviously an artificial item! Why did it appear on the dark side of the moon? And what were those eight bright spots?

The scene in front of him seemed to have subverted Xia ruofei's understanding.

Before he could recover from his shock, the gourd – shaped pottery made a melodious sound.

Xia ruofei felt that the music was familiar, but he could not react in time.

As the music played, a screen slowly appeared in the area surrounded by the eight bright spots.

It was like a gate of time and space. Xia ruofei could even see a world full of green mountains and rivers behind the light screen. A similar tune was coming from the world behind the light screen, echoing the music played by the gourd – shaped pottery.
