

God tier Farm 3211

Chapter 3211 Everyone is happy (2)

Xia ruofei was obviously still hesitating about whether he should bring Ling Qingxue along.

Chen Nanfeng was slightly moved by Xia ruofei's words.

In his opinion, Xia ruofei was obviously trying to fulfill the reputation of the first heaven society. That was why he had asked for a spot and had no intention of using it.

According to Xia ruofei's plan, not only would the first heaven society's reputation not be damaged, but they would also have three spots. Only three people had passed the music selection. It could be said that they had used all the spots.

And the surging waves sect and soaring Flower Valley would also have one more spot, so naturally everyone was happy.

Only Xia ruofei's side had not changed much compared to Chen Nanfeng's distribution plan.

Chen Nanfeng couldn't help but feel touched. He said, "Fellow Daoist Xia, thank you for always thinking about us! The first heaven society will remember this favor and will definitely repay it in the future!"

From Chen Nanfeng's statement, it was clear that he had agreed to distribute the spots according to Xia ruofei's plan.

Mu Sheng of the surging waves sect and Liu Mansha of the soaring Flower Valley naturally did not have any objections. They both nodded in agreement.

Chen Xuan heaved a sigh of relief. He had almost missed out on this unprecedented moon landing expedition because of the quota.

He couldn't help but cast a grateful look at Xia ruofei.

The Qi refining disciples from the three sects were also grateful to Xia ruofei. They had also been given the opportunity to join the expedition team because of Xia ruofei's new distribution plan.

This was especially true for Xu yurou from the first heaven society. Only three people from the first heaven society had passed the music selection. Now that they had obtained three spots, it meant that she would definitely be able to join the exploration team.

Therefore, Xu yurou was very grateful to Xia ruofei. She looked at Xia ruofei with gratitude in her beautiful eyes.

Everyone was supportive of Xia ruofei's plan. The sects quickly selected their candidates to go to the moon.

Naturally, the first heaven society did not need to select their three candidates. Shen tianfang, who was in the intermediate golden core stage, Chen Xuan, who was in the beginner golden core stage, and Xu yurou, who was in the Qi refining stage, were the only three people who had passed the selection. Furthermore, their cultivation levels matched each other perfectly.

There was actually no suspense as to the spots for the surging waves sect and soaring Flower Valley.

The surging waves sect only had elder mu Hua and mu Jianfei. They were also the strongest among the people who had passed the selection.

As for the soaring Flower Valley, they naturally chose elder Yang Liu and Liu Mansha's personal disciple, Yu xiner.

Xia ruofei, on the other hand, could not make a decision for the time being. In theory, he had three slots, but he only wanted to use one of them. He did not want to have another one.

He didn't want Ling Qingxue to take the risk with him.

As for the third chosen candidate spot, it was of no use to him at all.

Of course, if the news were to spread that this quota was to be sold in the cultivation world, everyone would definitely fight to the death, even if they had to pay a high price.

But Xia ruofei would definitely not do that.

He didn't lack spirit stones, and he didn't want any uncertainties to appear in the team that was going to the moon. Therefore, he would rather void the quota than sell it.

Moreover, everyone had already agreed to keep this matter strictly confidential. No information was allowed to be leaked.

After everyone had decided on the candidates, they went back to their guest rooms.

There were still many things to do, including testing whether the spaceship could travel in outer space and solving the spacesuit problem. Therefore, it was impossible to set off immediately.

This trip to the moon was full of danger, so he naturally had to be fully prepared.

After returning to her room, Ling Qingxue saw that the other sects had already distributed the spots. She couldn't help but say, "RUO Fei, you have more than enough spots, bring me along!"

Xia ruofei said helplessly, "Qingxue, we're not going on an outing. We're going to the moon!" It was very dangerous! I really don't want you to take the risk with me!"

Ling Qingxue pouted and said, "it seems like you're afraid that my cultivation is too low and that I'll be a burden!"

"That's not what I meant ..." Xia ruofei said with a bitter smile. "Your cultivation is not low. Xu yurou of the first heaven society and Yu xiner of the soaring Flower Valley are about the same level as you ... To be honest, the difference between the Qi refining stages is not that big."

When Xia ruofei mentioned the two female cultivators, Ling Qingxue could not help but frown. She said, "If you don't think I'm a burden, then what's the point? Are you afraid that I'll affect your friendship with these two beauties? I saw the way fairy Xu from the first heaven sect looked at you just now. Her eyes were as tender as water!"

Xia ruofei didn't know whether to laugh or cry."What are you talking about? This time, he was going to do something important, so how could there be any unnecessary things? I'm not even close to them, okay?"

"We'll get familiar with each other after this adventure, won't we?" Ling Qingxue said,"you said it yourself. This time, it's very dangerous. If you play the hero and save the beauty again, the beauty might just throw herself into your arms!"

"We're talking about the quota. It's meaningless to talk about these things!" Xia ruofei said helplessly.

He thought to himself, you really can't reason with a woman. When you're unreasonable, you can't talk her out of it, but when you're reasonable, she doesn't reason with you at all!

At this time, Song Wei, who had been watching the show, said with a smile,""RUO Fei, I think ... You can actually consider bringing Qingxue along! If it wasn't for the fact that I didn't pass the music selection, I would've gone too!"

Xia ruofei looked at Song Wei helplessly and said,"Wei Wei, don't tell me you're like Qingxue, thinking of me like that! There are so many female cultivators in the world of cultivation, how could I ..."

"We're not that shallow, Qingxue was just joking with you!" Song Wei chuckled. Am I right? Qingxue!"

Ling Qingxue snorted and said,""Who asked this guy not to bring me along? And he rejected so quickly, and when he mentioned two female cultivators just now, he was so nervous! Don't let me guess what you're thinking by accident!"

"RUO Fei isn't that kind of person!" Song Wei smiled and said,"he's just worried about your safety! Let's talk to him nicely, he might just agree!"

Xia ruofei looked at Song Wei and Ling Qingxue and said,""I can finally see that one of you is playing the good cop, and the other is playing the good cop! This move is pretty good!"

Song Wei blushed and said, "Don't bite Lu Dongbin like a dog! I'm Doing This for Your Sake ..."

"Oh? I'd like to hear more details!" Xia ruofei looked at Song Wei with interest and said with a faint smile.

Song Wei sat on the sofa and said,""First of all, the other sects have at least two people and at most three people. It's very disadvantageous for you to go alone! And they didn't even look out for each other. Since Qingxue meets the conditions and you have a lot of slots, bringing her along would definitely be of help!"

"This rule is not valid!" Xia ruofei said,"I have the ability to protect myself. Even if Shen tianfang can defeat me, it's impossible for him to kill me easily. At least I'm confident that I can escape from his attack! As for the others, they're not my match at all!"

"Two fists can't fight four hands, not to mention in the harsh environment of the moon." Song Wei said,"any accident can happen, so Qingxue and I are actually very worried about you. It's also because of this that Qingxue is determined to go with you."

Xia ruofei was touched and said, ""I know how you feel, but you're the most important women in my life. How can I take Qingxue to such a dangerous place? If anything happens, how am I going to explain it to uncle Ling?"

Ling Qingxue's eyes turned red. "I believe that you have the ability to protect me. Even if we are on the moon, I'm not afraid of anything with you around!" She said.

Chapter 3212 The dust settles (1)

Xia ruofei's heart skipped a beat. He could not help but hold Ling Qingxue and Song Wei's hands and said, "I do have some means of self – Protection. If there are no major accidents, I should be able to protect Qingxue. I just don't think Qingxue needs to put herself in danger with me. All you need to do is to cultivate well under my protection. I will do my best to provide you with the best conditions!"

Song Wei and Ling Qingxue looked at each other, then said, ""Of course we believe in you, but we don't want to become that kind of people. We don't want to be of no help to you at all! "So, this is the second reason I want to say ..."

Song Wei paused for a moment to organize her words before she continued, ""I believe you've also noticed that the other three sects have all sent their Qi refining disciples to participate in the moon exploration."

Xia ruofei nodded and said, "yes, but if they want to use up all the slots, they can only use disciples in the meditational stage!"

The surging waves sect and soaring Flower Valley only had one early gold core elder each who passed the selection of the music. Of the two spots they had, the remaining spot naturally had to be given to a Qi condensation disciple.

Song Wei shook her head and said, "I've heard that the surging waves sect and the soaring Flower Valley have quite a few golden core stage elders. If they were to send more people over to accept the screening of the music piece, it shouldn't be too difficult for them to pass one more golden core stage elder."

Xia ruofei had not thought about this and fell into deep thought.

Song Wei continued, "in fact, they didn't do so. Instead, they sent a lot of talented Qi layer disciples." Normally, it would be much more dangerous for a refinement stage cultivator to go to the moon with you. If any accidents happened, they would be the first to die. But why would they take the risk and add a refinement stage disciple to the team? Sect leader mu sent his own son, and Yu Xin 'er is Valley master Liu's favorite direct disciple. Don't they care about the life and death of their own descendants?"

"Obviously not!" Xia ruofei said, "however, the competition in the cultivation world is very cruel. This is a great opportunity that others can only dream of. How could sect leader mu and valley master Liu deprive their juniors of the opportunity to obtain this opportunity just because there might be danger? Even if they might encounter an accident, get seriously injured, or even die on the desolate moon, they would not hesitate!"

"That's just one aspect. " Song Wei's eyes flashed with wisdom as she said, "the core meaning of what I want to say is actually ... The other three sects are all intentionally expanding the coverage of their

cultivation levels. For example, the first heaven sect's three spots are for the middle stage of the Golden core, the early stage of the Golden core, and the Qi refining stage. The other two sects also have one spot for the Golden core stage and the Qi refining stage. I think they have their own intentions in distributing the spots like this."

Xia ruofei nodded thoughtfully and said,"Please continue."

"I didn't pass the music selection, so I didn't experience the moon scene you guys were talking about." Song Wei said,"however, according to your description, the biggest opportunity of this expedition is likely to be that faintly discernible secret realm. "The music also has a very strange criteria for selecting cultivators. It seems to have nothing to do with cultivation. Whether it's the middle jiedan stage, the early jiedan stage, or the Qi refining stage, it's possible for them to pass the selection. I even think that if there's a Yuanying stage cultivator, it's possible for them to pass the selection. Could this be related to the secret realm? For example, the so – called ..."

"For example, there are some areas that only Qi refining cultivators can enter!" Xia ruofei's eyes lit up.

"Or perhaps you'll face some tests. Qi condensation cultivators will face a much easier test than Aurous core cultivators, and the chances of passing might be higher" Song Wei nodded.

Seeing Xia ruofei nodding his head, Song Wei knew that he had taken her advice. She smiled and continued,"In short, it is impossible for the refinement stage cultivators to be cannon fodder. Otherwise, what's the point of screening them out by the music?"

Xia ruofei nodded and said,"that makes sense!" That made sense! It seemed that Chen Nanfeng, Mu Sheng, and the others had already thought through this! However, they tacitly didn't say it out loud. They probably couldn't wait for me to go to the moon alone! This bunch of bad old men are really bad!"

Song Wei pursed her lips and smiled,"they're also thinking about the sect's interests!" RUO Fei, so you're willing to ..."

"I'll ask Qingfeng to go to the star Seizer sect and get some more Qi refining disciples here. I don't believe that no one from such a big star Seizer sect can pass the selection!" Xia ruofei said.

Ling Qingxue raised her eyebrows and said,"Xia ruofei! Are you deliberately going against me? I clearly fit the criteria, but you still insist on transferring people from the star Seizer sect over to participate in the selection. What do you mean by this! Do you look down on me that much?"

Xia ruofei came back to his senses and quickly smiled apologetically."Qingxue! I ... I didn't mean that ... I was just thinking that you shouldn't go to such a dangerous place if you can! The star Seizer sect has many Qi condensation disciples, so losing one or two of them is nothing ..."

"What!" Ling Qingxue was so angry that she was stomping her feet.

Chapter 3213 The dust settles (2)

Song Wei used her eyes to stop Ling Qingxue, who was on the verge of going berserk. She smiled and said,"RUO Fei, I think ... It's more suitable for Qingxue to go with you."

Xia ruofei looked at Ling Qingxue and then at Song Wei. He did not say anything. It was obvious that he did not want Ling Qingxue to take the risk with him.

“Even if the star Seizer sect’s disciples are selected through strict selection, you can’t trust them completely,” Song Wei continued. “In an environment like the moon, if you can’t trust them completely, it’ll be a bad thing. In addition, we also know that you must have some unknown means to protect yourself and the people around you. Unless it’s absolutely necessary, you must not use these means, right?”

Xia ruofei nodded. His biggest trump card was the spirit map space. He would not reveal the secret of the spirit map space unless it was the last resort.

Song Wei said, “everything on the moon is unknown. There might be all kinds of dangers in the mystic realm. If you have to resort to those methods, do you think it’s better for Qingxue to stay by your side or for a star Seizer sect disciple who you can’t completely trust to stay by your side?”

Xia ruofei fell into deep thought.

Song Wei’s words had indeed moved him. He asked himself honestly, if he was really in danger of losing his life without using the spirit map space, and if there was a star Seizer sect disciple by his side, he would really abandon the other party rather than risk exposing the secret of the spirit map space to save her. However, if he did that, his conscience would definitely be condemned, and his Dao heart might even be affected.

If the person beside him was Ling Qingxue, he would naturally not hesitate to save her first!

From this perspective, perhaps Ling Qingxue was more suitable to go to the moon with him.

Of course, in that kind of environment, the situation could change in an instant, and they could encounter unexpected situations at any time. If Ling Qingxue went with him, it would be very dangerous.

Song Wei didn’t want Xia ruofei to hesitate, so she said, “Don’t think too much about it. Qingxue is a ready – made candidate who meets the conditions, and she’s one of us. Why do you have to go to the star Seizer sect to look for her?”

Ling Qingxue was also looking at Xia ruofei murderously. Although she didn’t say anything, she looked like she would pounce on Xia ruofei and scratch his face if he refused again ...

Xia ruofei could not take the pressure from two close female friends.

Moreover, Song Wei’s analysis was very objective and reasonable.

After some internal struggle, Xia ruofei finally nodded helplessly and said, “Alright! Then bring Qingxue along ...”

When Ling Qingxue heard this, the murderous look on her face disappeared instantly and was replaced by a happy expression. She smiled like a flower and said sweetly to Xia ruofei, “RUO Fei, thank you! I knew you’re the best ...”

Xia ruofei felt goosebumps all over his body from her sweet words. He shivered and said, “Speak properly!”

Ling Qingxue and Song Wei both laughed out loud. The two of them clapped back in celebration. They had probably discussed this beforehand. Now that their “evil plan” had succeeded, the two of them were naturally quite happy.

Xia ruofei continued, “Qingxue, you can come with me. However, you must listen to my orders throughout the entire journey. You are not allowed to act on your own!” If such a situation really happens, I will immediately imprison you until you return to Earth!”

Xia ruofei himself was not sure what kind of situation he would face on this trip. Now that he had to bring Ling Qingxue along, he was naturally under more pressure. That was why he was afraid that Ling Qingxue would not listen to his orders and fall into a dangerous situation.

Ling Qingxue stuck out her tongue and said, “I know! Don’t worry! I’ll be good ...”

As long as she could go on an adventure with Xia ruofei, she would do whatever Xia ruofei said.

Song Wei revealed an envious expression and said, “I also want to go with you guys! It’s a pity that I failed to live up to expectations and couldn’t pass the music selection ...”

“Actually, going to the moon might not be a good thing,” Xia ruofei consoled. “It’s still very dangerous. Also, Wei Wei has a mission to accomplish on earth. ”

“What mission?” Song Wei quickly asked.

“The distance between Earth and the Moon isn’t too far, so there won’t be much delay in real – time communication.” Xia ruofei said, “so, I might set up a communication system between the sky and the earth. Wei Wei will be in charge of the ground. On one hand, she can keep track of everyone’s situation. On the other hand ... If anything happens, she can leave behind information for future generations to refer to. I’m sure the other three sects will support you!”

For the first heaven sect, the surging waves sect, and the soaring Flower Valley, even if this group of people who went to explore was completely annihilated, they would not stop their exploration. In the future, they would definitely let more people receive the selection and form a new exploration team to go to the moon. In this way, some real – time information of the first team could be transmitted back and recorded, which would have great reference value.

“Don’t say such disheartening words!” Song Wei’s eyes reddened. You guys will be fine!”

Xia ruofei laughed and said, “it’s better to be safe than sorry!” Moreover, there are many benefits to being able to communicate with the world in real time. ”

“Yes, yes!” Song Wei nodded and said, “I’m willing to do that. After all, I’ll feel more at ease if I can keep in touch with you guys ...”

Xia ruofei nodded and said, “it’s late. Let’s rest first.” There are still many things to do starting tomorrow!”

.....

The next day, Xia ruofei told Chen Nanfeng and the others about his decision to bring Ling Qingxue to the moon.

Naturally, no one had any objections.

Xia ruofei already had two spots, and with the one given to him by the first heaven society, it was reasonable for him to bring two people. They couldn't say anything, not to mention that Xia ruofei only used one of the spots.

Xia ruofei continued, "I'll make some arrangements for the spacesuits. Also ... We can start the initial test today to see if the spacecraft can adapt to the outer space environment. However, for safety reasons, we need to do it step by step. Also ... Before we get the spacesuits, it's best not to really ascend into outer space."

Chen Nanfeng and the others all agreed.

At this moment, the voice of master Yuntai rang in Xia ruofei's mind.

"Little brat Xia! What kind of supercomputer are you using to calculate these words? they're useless!" Scholar Yuntai said, "I'm dizzy from reading 1000 chapters. It's useless!"

Xia ruofei then remembered that he had given a laptop with the first calculation results of a super computer to scholar Yuntai for research.

In other words, by treating each floating point as a Chinese character, the 1000 writings that had the highest possibility of being simulated would be calculated.

Xia ruofei asked Xia Qing to cooperate with scholar Yuntai to operate the computer, and then he didn't care about this matter.

Later, he changed to a numerical scheme, and then Song Wei found a clue by accident. He was busy arranging music again. He had been so busy these days that he completely forgot that master Yuntai was still studying those meaningless man groups.

After hearing what scholar Yuntai had said, Xia ruofei quickly greeted Chen Nanfeng and the others, saying that he would go into the room to solve the spacesuits problem, and then hurried back to his room.

Xia ruofei said to master Yuntai, "senior Yuntai, Didn't I tell you that day?" This proposal has already been rejected and those words are meaningless. Did you really read them for a few days?"

Scholar Yuntai snorted, "If I don't read it myself, how can I be sure that there's no mystery in the words?"

"So you're done now? What was the result?" Xia ruofei asked with a smile.

Scholar Yuntai said in a depressed tone, "I've finished reading it. There's indeed nothing mysterious about it!"

Xia ruofei couldn't help but laugh and continued, "Senior Yuntai, in fact, we've made a breakthrough in cracking the token these days and obtained very crucial information. I just happen to have something to ask you!"

Chapter 3214 The black Phoenix flying ship (1)

“Wait!” Layman Yuntai was not interested in the question that Xia ruofei wanted to ask him. He asked, “little fellow Xia, you mean ... You’ve already solved the secret of the floating point pattern?”

Xia ruofei casually set up a soundproof enchantment around himself and then continued to communicate with scholar Yuntai through spiritual sense, “It should be almost the same!”

“Quickly tell me! Quickly tell me!” Scholar Yuntai said impatiently, “in our era, many experts spent their entire lives studying the rising Dragon Order, but to no avail! You’re just a Jindan stage rookie, how did you manage to develop it in such a short time?”

Xia ruofei did not know whether to laugh or cry. “As long as we can find the right direction,” he said, “cracking the secret of the token seems to have nothing to do with cultivation!”

“So, you’ve found the right direction?” Scholar Yuntai said, “you used fufu points as numbers to crack the array?”

“To be more precise, each floating point corresponds to a set of numbers!” Xia ruofei said with certainty, “we can basically confirm this. We got an answer with more than 3000 sets of numbers.”

“And then?” Asked layman Yuntai.

“This is actually a piece of music score!” Xia ruofei said.

He then briefly explained the process of cracking the code to scholar Yuntai, and finally said, “Because the music that was selected is very special, and it definitely has an effect that can only be found in the world of cultivation, we have basically confirmed that so far, our direction is correct.”

“This is amazing!” Scholar Yuntai sighed with emotion, “I really didn’t expect that a few golden core and Qi refining cultivators could so easily solve the secret of the rising Dragon Order!” Also, is the supercomputer that you mentioned really that powerful?”

Xia ruofei smiled and said, “senior Yuntai, perhaps there hasn’t been much progress in the cultivation world for thousands of years. However, Ordinary People’s Society has changed a lot after thousands of years of development. Now, human technology is very powerful. It can even make up for the shortcomings of cultivators in many aspects. For example, the Super computer we’re using this time is such a case. If you use the human brain to calculate, you won’t be able to calculate it even if you spend your entire life because the amount of calculation is too large. However, for a supercomputer, it only takes a few hours to calculate!”

“It seems that I’ve disappeared for more than 3000 years, and the outside world has long changed!” Layman Yuntai said with emotion.

Xia ruofei asked, “so, does senior Yuntai also think that we’ve completed the cracking?” That’s right, just now, we found that everyone’s tokens had disappeared. It should be like what senior told me before. This token has been out for more than 300 years, and it’s time for it to disappear. Therefore, we no longer have any tokens for further research. Even if the high – definition image of the floating point pattern is saved, if the real secret is in the token itself, we have already lost the chance. ”

Scholar Yuntai said with certainty, ""You don't need the token anymore. If such an answer is not the message that the final token wants to convey, it can only mean one thing. The floating point pattern on the token is simply a deliberate mystery and has no practical significance!"

Then, he changed the topic and said, ""However, every time the token disappears and reappears, the floating point pattern will be different from the last time, which means that the message it wants to convey will also change. So, the information you get this time may still be valid now, but it will be unclear after a long time."

"We think so too!" Xia ruofei said, "that's why we're preparing to go and explore as soon as possible."

"The moon you're talking about?" Asked layman Yuntai.

"Yes! Therefore, I have some questions to ask you, senior!" Xia ruofei said.

"No one in our era has ever been to the moon!" Scholar Yuntai laughed and said, "I have never been to the moon myself, so you are asking the wrong person!"

"Senior Yuntai," Xia ruofei said. "We really want to know if a spiritual treasure like an airboat can fly out of Earth and stay in outer space for a long time."

Scholar Yuntai was stunned for a moment and said, ""Earth? Are you referring to the world we live in? It really did look like a big ball, but it should have more water, right? Why is it called earth and not water ball?"

Xia ruofei didn't know whether to laugh or cry. How would he know why it was a conventional name?

However, after hearing what master Yuntai said, Xia ruofei knew that at least 3000 years ago, the cultivators had actually flown out of Earth. They did not know how far they had gone, but at least they had seen the Earth from space. Otherwise, master Yuntai would not have known that the world he lived in was a big ball, and most of it was covered by the ocean.

Xia ruofei said, "senior Yuntai, this ... I'm not too sure about the name. Anyway, it has always been called earth ... So, have you been to the space outside earth?" Did you take an airboat?"

Scholar Yuntai laughed and said, "you have too many questions. I'll answer them one by one!" The cultivators of our era, as long as they are above the primordial soul Stage, have basically been to the earth ... Outside the earth, whether by flying boat or sword riding, it is not a problem to fly directly out. In fact, the real danger is the extreme cold of the outer space you mentioned, and there is no air to breathe. The environment is very harsh, and even the primordial soul Stage and even the leaving aperture stage cultivators find it difficult to survive for a long time. "

Chapter 3215 The black Phoenix flying ship (2)

Scholar Yuntai paused for a moment and continued, ""Therefore, in the early years, there were still people who wanted to explore the outside world, but as we learned more and more about outer space, such suicidal behavior has never appeared again. Of course, cultivators above the primordial soul realm can survive half a day to one day in that kind of environment without any problem. Therefore, most of the cultivators who have reached the primordial soul realm will go out and take a look out of curiosity. "

Xia ruofei said, "I understand ... In other words, if you fly up directly on your sword, you can also fly out of the Earth's atmosphere and into outer space." It's the same for flying ships, right?"

"Almost!" Scholar Yuntai said, "however, your question just now is whether a magic treasure like an airboat can fly in outer space for a long time. How should he put it ... It depended on what kind of airboat it was! As I've said, it's very harsh outside. Sometimes it's extremely cold; sometimes it's extremely hot. If you're unlucky, you might be attacked by flying rocks. Therefore, ordinary airboats might not stand that long ..."

Speaking of this, layman Yuntai asked again, "By the way, since you have my storage ring, you should have already obtained my Black Phoenix flying ship, right?"

Xia ruofei almost burst into tears. Master Yuntai finally remembered his black flying ship. After such a long time, he finally knew the name of the treasure. It was called the black Phoenix flying ship.

"So it's called the black Phoenix flying ship! It's a good name indeed!" Xia ruofei said, "I've been wanting to ask you a few times, but you went into seclusion after a few words. I haven't had the time to ask you for advice!"

"Hahaha!" Grandmaster Yuntai laughed awkwardly and said, "little brat Xia, since the black Phoenix flying ship is in your hands, it shouldn't be a problem for you to ride it and explore the world. Do you know what the greatest advantage of the black Blaze flying ship is?"

The black Phoenix flying ship was the proud work of master Yuntai and he only had Xia ruofei to communicate with. Hence, when the black Phoenix flying ship was mentioned, he couldn't help but want to show off.

Xia ruofei was obviously a good sidekick. He asked, "Could it be that his greatest strength is his speed?"

Xia ruofei had been on the first heaven society's Clearwater flying boat before. When he compared it to the black Phoenix flying boat, he could clearly feel that the black Phoenix flying boat was much faster than the Clearwater flying boat.

"No, no, no!" Scholar Yuntai repeatedly denied it. "The black Phoenix flying ship's speed can only be considered above average. In the cultivation world, there have been some people who were known for their speed, but they were much faster than the black Phoenix flying ship!"

"Then this junior doesn't know. Senior, please give me some guidance!" Xia ruofei said humbly.

Scholar Yuntai proudly said, "its biggest feature is its defense!" I've specially searched for precious obsidian crystals and forged it with 18 types of precious ores. At least in the era I lived in, I've never seen a flying – Type magical treasure that's stronger than the Obsidian flying ship! "As I've said earlier, the environment in outer space is extremely cold and hot. Furthermore, we might be attacked by flying rocks from outer space. An ordinary flying ship would not be able to hold on for long under the alternating effects of extreme cold and extreme heat. However, the black Phoenix flying ship would definitely not have such a problem!"

Xia ruofei couldn't help but reveal a trace of joy and said, "In that case ... Taking the black Phoenix flying ship to the moon and searching for the mystic realm mentioned in the music piece is a feasible plan?"

Scholar Yuntai also stopped blowing his own trumpet and quickly said, "Little brat Xia, are you really going to the moon?"

"Didn't senior also say so? The disappearance of the token means that the validity period of the message transmitted by the token is not long. If there is really a Mystic realm on the moon, then the location of the exit may change soon. So, we naturally have to go to the moon to investigate as soon as possible!" Xia ruofei said with a smile.

"I was just saying that the black Phoenix flying ship should have no problem adapting to outer space. Even in the extreme cold and heat, it should be able to ensure that it won't be damaged. I've once steered the black Phoenix flying ship away from earth and stayed outside for two days, but the black Phoenix flying ship was completely undamaged!" Said layman Yuntai.

Xia ruofei couldn't help but click his tongue. He wasn't shocked by the black Phoenix flying ship's thick skin. He was shocked that master Yuntai could be exposed to outer space for two days. Were all primordial soul realm cultivators so strong?

Obviously, the words of Yuntai weren't meant to show off that he could survive in outer space for two days without any external equipment. Therefore, he quickly changed the topic and said, "Little brat Xia, if you're going to the distant moon, transportation is only one aspect. More importantly, you have to be able to survive in such a harsh environment for a long time! You must know that there's no air outside. A primordial soul Stage cultivator can go days without breathing, but you, a golden core stage cultivator, can only last for two to four hours. Furthermore, a few days is not enough for you to travel from earth to the moon! It was far from enough! In addition, the extremely cold and hot environment that I mentioned just now is not only a test for the airboat, but also for the passengers of the airboat. In my opinion, at least you, a Jindan stage rookie, can't survive in such an environment!"

Xia ruofei smiled. "I will find a way to solve these problems one by one. I'm not stupid enough to go to my death for a secret realm that might exist. It's obvious that I can't return."

"It's good that you know!" Layman Yuntai said, "you are a smart person. I believe that even if I don't say anything, you will not do anything stupid!"

Speaking of this, layman Yuntai immediately said, "By the way, when I said that the black Phoenix flying ship can travel in outer space for long periods of time, that was just my speculation. After all, I've never tried to let it fly for more than ten days, a month, or even a few months in a row."

"I believe in senior's professional judgment." Xia ruofei said with a smile.

Scholar Yuntai was a master of refining in his own era. Xia ruofei trusted his judgment of flying magical equipment.

"The moon is at least a few hundred thousand miles away. No one knows what will happen or what dangers we will encounter on the way." Scholar Yuntai solemnly said, "no one has ever tried to go to the moon before, so everything is unknown. I can't guarantee that the black Blaze flying ship will be able to shoulder such a heavy responsibility."

Xia ruofei smiled and said, "at least senior gave me more confidence. You let me know that the black Phoenix flying ship's defense is top – notch. That's enough." The path of cultivation was like sailing

against the current and changing one's fate. How could it always be smooth sailing and peaceful? If he dodges every time there's danger, I don't think he'll have any great achievements in cultivation! Therefore, this trip to the moon can not be guaranteed to be foolproof, but it must be done!"

After a moment of silence, layman Yuntai said,""Little brat Xia, you've really taught this old man a lesson! In that case, I also support you to explore the moon! Of course, you must first take care of the problem of protection, which is the problem of extreme cold, extreme heat, and breathing I mentioned. Otherwise, no matter how confident you are, you won't be able to hold on for long. Lofty aspirations can't be eaten!"

Xia ruofei laughed and said,"don't worry, senior!" I'm thinking of a way to solve this. Didn't I tell you before? The development of modern technology can sometimes solve problems that cultivators can't solve. This time, we may have to rely on modern technology to solve it. "

"It's good that you can consider these problems and come up with a solution. " Scholar Yuntai said,"in that case, I'll go into seclusion for a while!"

Closed up again? Xia ruofei couldn't help but complain in his heart.

This Yuntai senior was really a closed – door cultivation madman!

Yuntai fell silent, but he quickly said,""Don't worry! I don't want to miss out on your magnificent feat of exploring the moon. Remember to let me know when the time comes. It would be best if I could also appreciate the magnificence of the Dark Universe!"

Xia ruofei was shocked by the sudden turn of events by scholar Yuntai. He didn't know whether to laugh or cry."No problem. When the time comes, I'll release all the barriers, and you can use your spiritual power to appreciate it ..."

"Hahaha! Thank you in advance!" Scholar Yuntai laughed.

Then, there was really no more sound.

Xia ruofei used his spiritual power to sense and confirmed that the closed – door cultivation madman, master Yuntai, had really entered a state of closed – door cultivation.

Xia ruofei then took out the satellite phone from the spirit map space and skillfully dialed a few numbers.

Chapter 3216 Spacesuits (1)

Xia ruofei was in contact with Li Yifu, who was on Peach Blossom Island.

After the exchange with master Yuntai, Xia ruofei knew that the black Phoenix flying ship's defense was very strong and could handle outer space flight. Hence, he was very confident. What he had to do now was to find a way to solve the spacesuits problem.

Li Yifu's family had been developing in the United States. After two generations of accumulation, their assets had reached tens of billions of US dollars and they had a great influence in the United States.

If Xia ruofei wanted to get a spacesuit from NASA, Li Yifu would be his first choice.

Of course, China's level in the aerospace field was also leading in the world. The "flying sky" EVA suit that China had independently developed was also very advanced in technology.

Xia ruofei wanted to ask for a few spacesuits from the aerospace industry through elder song and the others. It was not difficult. Besides, he would not ask for it for free. He would definitely pay for it.

However, the purpose of buying a spacesuit was really difficult to explain.

It might even cause unnecessary trouble for elder song and the others.

After all, the aerospace field was too sensitive.

Xia ruofei couldn't possibly use the methods of cultivators in his own country to steal it just to hide it from others.

Therefore, he chose to purchase a spacesuit from the United States secret.

Of course, if the deal in the United States did not work out, Xia ruofei would not hold back. He would not have any psychological burden if he stole NASA's spacesuits.

Xia ruofei had this 'buy if you can, steal if you can' mentality 'attitude, so he contacted Li Yifu first.

Li Yifu quickly picked up the call and greeted him respectfully, "Senior granduncle, what are your orders?"

Xia ruofei asked, "foster husband, do you have any way to get in touch with NASA?"

Li Yifu couldn't help but be stunned for a moment before asking, "Great uncle – Master, you mean ... The National United States?"

Xia ruofei chuckled. "You heard me right. It's NASA. I want to do business with them. Can you find me a way?"

Li Yifu said, "uncle – Master, I can definitely find NASA's connections. However, the aerospace field is very sensitive. I'm also Chinese, so it's impossible to trade some core technology with them. The United States intelligence Department is watching!"

"I don't want their technology." Xia ruofei said, "I just want to get a few spacesuits. Can you do that?"

"A spacesuit?" Li Yifu was stunned for a moment, then he immediately reacted and said, "senior granduncle, you're preparing to go to outer space!"

Since it was not a face – to – Face conversation but a satellite phone call, there was a possibility that it could be monitored. Hence, Xia ruofei did not explain in detail and only said, "Almost! The most important thing right now is to get a spacesuit, and it has to be an EVA suit. Foster husband, can you think of a way?"

Li Yifu pondered for a moment before saying, "Grand uncle – Master, if you want to buy a spacesuit from an official United States organization like NASA, it'll be more difficult. Don't look down on just spacesuits, it also involves many core technologies!"

"If the difficulty is too high, then forget it!" Xia ruofei laughed and said, "I'll think of another way!"

Xia ruofei's "other way" naturally did not refer to purchasing. For practitioners, even if NASA was heavily guarded, they could still come and go as they pleased.

The only question was, would NASA have so many spacesuits in stock? In addition, it was said that spacesuits were tailor – made for astronauts. If there were no flight missions, a spare spacesuits might not be enough, and it might not fit.

"Great uncle – Master, I said it's not easy to get a spacesuit from NASA, but it should be possible!" Li Yifu said.

"Oh?" Xia ruofei asked with interest, "where else can I get a spacesuit other than NASA?"

"I don't know if martial granduncle has heard of the name of elonmask?" Li Yifu asked.

Xia ruofei thought for a while and said with uncertainty, ""You mean the owner of the Tesla electric car?"

"Yes!" Li Yifu replied with a smile. He's the founder of Tesla, but he also has another identity, spaceX, the CEO and CEO of the United States space exploration technology company. You should have heard of the Falcon rocket, right?"

Xia ruofei said, "I seem to have an impression of it ... I heard that their rocket boosters can be retrieved, right?" You're saying that this space technology company also belongs to this guy, and he might be able to get spacesuits from there?"

"This is what this disciple means." Li Yifu said, "in fact, SpaceX has obtained a lot of technology from NASA. Their manned space technology is also very advanced. Soon, they will be carrying out independent manned flights! Therefore, the quality of SpaceX's spacesuits is no worse than NASA 's. It's definitely easier to deal with a private company than a state agency United States!"

"Understood!" Xia ruofei said, "adopted husband, please go and coordinate this personally. I need to get at least 18 sets of Eva suits as soon as possible. It would be better if you could get more. In addition, we need as many oxygen supply modules as possible to ensure that at least nine people can stay in outer space. The oxygen supply modules alone can support one to two months "worth of supply."

Three from the first heaven society, two from the Cang lang society, two from the soaring Flower Valley, plus Xia ruofei and Ling Qingxue, they had a total of nine people on this trip. The 18 spacesuits were just one main and one backup. Considering that the probability of everyone's spacesuits breaking down was not high, one main and one backup were barely enough.

Chapter 3217 Spacesuits (2)

Of course, this was a long – term outer space voyage. If the spacesuits couldn't last that long, they would have to change. If that happened, 18 sets would be too much for them. It would be best if they could buy more spacesuits.

As for the oxygen supply module, he would definitely need to prepare more.

Li Yifu couldn't help but click his tongue and said, ""That's quite a lot! Grand uncle – Master, even masker's company might not have so much stock! After all, spacesuits cost tens of millions of dollars ..."

“As long as he has the technology and we have the money, we can definitely produce it as soon as possible!” Xia ruofei said, “your task is to get rid of masker and get him to provide us with the things we need as much as possible and as soon as possible.”

“Understood!” Li Yifu said, “grand uncle – Master, I’ll go back to the United States as soon as possible. But as for the peach source Island ...”

“I’ll let Qingfeng bring Zheng Yongshou over to take charge!” Xia ruofei said.

Zheng Yongshou had also learned how to control the formation of the peach source Island, and his formation skills were far better than Li Yifu’s. With the jade pendant made by Xia ruofei, he had no problem in taking charge of the daily maintenance of the formation and defending against possible enemies.

In addition, Luo Qingfeng, who was a golden core cultivator, was also there, so it was even more foolproof.

It just so happened that Luo Qingfeng was in the capital as well and had brought along King Mount to help receive his fellow practitioners from the cultivation world. Hence, Xia ruofei only needed to give the order and he could call Zheng Yongshou to head to Paradise Island together.

“Yes! That disciple will wait for Luo Qingfeng and Zheng Yongshou to arrive, hand over the array control talisman, and then leave for the United States at top speed!” Li Yifu said respectfully.

“Then I wish you success!” Xia ruofei said with a smile.

Then, Xia ruofei thought of something else and said, ““Oh right! Foster husband, when you talk to masker, don’t limit yourself to the spacesuits and the support module. As long as you can get your hands on outer space equipment, we want it all, even the spacecraft’s experiment cabin. As long as he’s willing to sell it, I’ll buy it with money!”

“Alright, this disciple will definitely do his best!” Li Yifu said, “however, the space equipment involves a lot of sensitive technology. I can’t guarantee that the negotiations will go smoothly. After all, masker is not particularly short of money ...”

If money could solve the problem, Li Yifu wouldn’t even frown even if he had to spend all his money. However, Musk was also a rich man. He started his business in Silicon Valley as early as the 1990s, and later developed the famous payment tool ”

After that, he founded the famous Tesla and created the Tesla electric car that was popular all over the world.

This guy had always been very persistent in his space dream. In 2001, he invested 100 million US dollars to establish SpaceX, which was now popular all over the world, which was also the United States space exploration technology company. At that time, everyone thought this guy was crazy. He entered the space field with a private identity that many countries could not afford to burn money. 100 million US dollars was only enough to buy a few extra – dimensional spacesuits, so it was destined to not cause any splash.

However, they sent the Falcon rocket into space in 2012, opening the era of private space transportation. In 2018, the complete recovery of the first – Stage booster rocket was completed, greatly reducing launch costs.

As SpaceX's manned space flight was infinitely close to success, masker's assets also snowballed. Now, he had a net worth of 40 to 50 billion US dollars, which was comparable to Li Yifu.

For such a rich man, it was definitely not enough to just spend money.

Xia ruofei smiled and said, "of course, it's the most convenient to solve problems with money. Although this masker has a lot of assets, he has many areas to burn money in!" As long as we can safely earn a large sum of US dollars, I don't believe he won't be interested. "

"Of course he's interested in making money," Li Yifu said. "He's still a businessman by nature! If we can ensure his safety, I believe he'll be tempted. So, I might have to trouble you to go to the United States personally. "

Xia ruofei pondered for a while and understood Li Yifu's meaning. He smiled and said, "That's true. Such a large pile of equipment and spacesuits are all very sensitive equipment. It's impossible to ship them out of the United States even through smuggling channels. They can only transport them with storage magical equipment. I think as long as we don't ship the goods out of the United States, masker should have less to worry about. "

"This disciple also thinks so." Li Yifu said, "I won't let anyone else handle this matter. I'm going to personally talk to masker in private."

"Mm! "If money can't solve it ..." Xia ruofei said, "you can consider other methods. It was also possible to use some cultivator's methods when necessary. In short, we can only succeed in this matter and can not fail. We have no way out. "

Even though many cultivators despised using the methods of a cultivator to deal with an ordinary person, the moon exploration was too important. Furthermore, time was of the essence. Besides, Xia ruofei did not have any psychological burden dealing with an American.

"Understood!" Li Yifu said, "don't worry, senior granduncle. I'll head to the United States first. If I really can't come to a conclusion, I'll report to you and see what to do next."

"Okay, I'll make some arrangements and meet you United States!" Xia ruofei said.

After hanging up, Xia ruofei called Luo Qingfeng over.

"Qingfeng, contact Zheng Yongshou immediately and go to Paradise Island with him. My adopted husband has an important mission and needs to return to the United States for a while. During his absence, you and Zheng Yongshou will be in charge of Paradise Island. Zheng Yongshou will be responsible for the maintenance and control of the array, and you will be in charge of the overall situation."

"Yes!" Luo Qingfeng quickly replied. This old servant will immediately move out!"

Xia ruofei nodded and checked the soundproof barrier again. Then, he whispered, "Make sure to take a few circles on the road to prevent anyone from following you."

During this period of time, many cultivators had come to Xia ruofei's courtyard house. There were also many golden core stage experts. If they were not careful, they might be followed and found on Peach Garden Island. That would be a lot of trouble.

Xia ruofei also knew that the Paradise Island would be exposed to the cultivation world sooner or later, but he hoped that it would be as late as possible. It would be best if he only revealed it when his strength had become something that everyone had to look up to. This way, no one would dare to covet it.

In fact, the most convenient way would be for Xia ruofei to take Luo Qingfeng back to the star Seizer sect with the black Phoenix flying boat and bring Zheng Yongshou along before flying back to the peach source Island.

He should have even sent Li Yifu back to the United States by airboat, which would be the fastest.

However, now that the first heaven society and many other sects were working together to crack the token and organize an expedition to the mystic area on the moon, Xia ruofei was the key person and had obtained some important information. They would definitely not be at ease to let Xia ruofei leave alone.

However, Peach Blossom Island had to be kept a secret and Xia ruofei couldn't bring these cultivators with him. Hence, he couldn't use this method.

Qingfeng Luo and Yifu li could only spend more time and energy on the journey. There was no other way.

Luo Qingfeng used the phone in Xia ruofei's room to contact the sect. He quickly found Zheng Yongshou and agreed on a meeting place with him.

Then, he respectfully bade Xia ruofei farewell.

After leaving the room, Luo Qingfeng was prepared to bid farewell to Chen Nanfeng and the others. After all, he was the sect master of the star Seizer sect, and his status in the cultivation world was equal to Chen Nanfeng and the others.

As soon as they stepped out of the door, Xia ruofei and Luo Qingfeng saw Chen Nanfeng, Mu Sheng, and Liu Mansha walking towards them from the front yard. The three of them did not look too good and were in low spirits.

What was going on? Xia ruofei looked at the three dejected people and couldn't help but Mutter in his heart.

Chapter 3218 The fragile blue water flying boat (1)

Seeing Xia ruofei and Luo Qingfeng, Chen Nanfeng squeezed out a smile and greeted, "Sect leader Luo, fellow Daoist Xia!"

Xia ruofei smiled and nodded.

Luo Qingfeng naturally noticed that something was wrong with the three of them, but he did not ask any further. He just smiled and said, "Sect leader Chen, sect leader mu, Valley master Liu, I was just about to bid farewell to the three of you!"

“Oh? Is sect leader Luo leaving?” Chen Nanfeng asked in surprise.

In his opinion, Luo Qingfeng was a firm supporter of Xia ruofei. Although Luo Qingfeng did not pass the music screening, at least he could give Xia ruofei more confidence by staying here. After all, he was also an Aurous core cultivator!

Therefore, Chen Nanfeng and the other two were quite surprised that Luo Qingfeng was in such a hurry to leave.

“There are still many things in the sect,” Luo Qingfeng said with a faint smile. “I can’t help much here, so I’ll go back first after discussing with the first elder.” The disciple I brought will stay and continue to serve everyone well. ”

“I see, then I wish sect leader Luo a safe journey!” Chen Nanfeng said.

Chen Nanfeng’s mind was not on Qingfeng Luo. Furthermore, Qingfeng Luo did not pass the music selection. Even if he stayed, he would not be able to participate in the moon exploration. Therefore, in Chen Nanfeng’s opinion, Qingfeng Luo’s departure did not matter at all.

Luo Qingfeng smiled and nodded. He then greeted Mu Sheng and Liu Mansha, and then nodded to Xia ruofei. He then left the courtyard house, found a place with no one around, summoned his flying sword, and flew away.

In the courtyard house.

Xia ruofei looked at the three and asked, “Three seniors, is there something else? You don’t look too good ...”

Chen Nanfeng sighed and said, “Let’s talk inside!”

“Alright, please come in!”

Everyone went to Xia ruofei’s master suite and sat down on the sofa in the living room.

“Fellow Daoist Xia, the three of us took some time to test the jadewater flying boat ...” Chen Nanfeng said.

Xia ruofei looked very surprised. He had just entered the room and talked with scholar Yuntai for a while, then called Li Yifu to arrange the purchase of spacesuits and other space equipment, and then called Luo Qingfeng over to give him some instructions. In fact, there was not much time.

The three of them had already taken the jadewater flying boat to space?

However, he felt relieved after thinking about it. If it was just to test the performance of the flying boat, it did not necessarily need to completely break out of the atmosphere. Besides, it would take enough time to fly up and down.

“Sect leader Chen, have the three of you reached the outer space?” Xia ruofei asked.

Chen Nanfeng shook his head. “I don’t think so. But I can see the curved outline of our world. It’s quite high.”

Xia ruofei nodded and said, "so ... The results of the test are not ideal?"

Chen Nanfeng sighed and said, "The environment outside is much worse than we thought. Just as fellow Daoist Xia said, the air at our altitude is very thin. If an ordinary person doesn't have any protection, they may die in a short time. Even a golden core cultivator wouldn't be able to hold on for long with their physical body ... It's also for this reason that we didn't continue flying upwards, but chose to return."

"I'm aware of the outer space environment," Xia ruofei said, "that's why I'm taking the spacesuits very seriously. I've already thought of a way to contact the United States to purchase spacesuits. Of course, there are also some other equipment, including the oxygen supply module. As I've said before, the Science and Technology of the secular world are sometimes more useful than the means of the cultivation world."

Chen Nanfeng nodded in agreement and said, "Yup! I heard from Xuan 'er that there's a Space Station made by ordinary people flying around above our heads. It's much higher than the altitude we were at just now, but ordinary people without any cultivation can live on it for a long time."

Xia ruofei nodded with a smile. "There are many redeeming qualities about human technology. Furthermore, their development speed is far faster than the cultivation world."

Then, Xia ruofei asked again, "three seniors, if it's just the problem of the external environment, you don't have to worry too much. I will definitely find a way to solve it."

"If this was the only problem, we wouldn't be so depressed ..." Mu Sheng said at this time.

"Oh? Could it be that there's something that's hard to solve?" Xia ruofei asked.

"Let brother Chen say it himself!" Mu Sheng sighed and said.

"Fellow Daoist Xia," Chen Nanfeng said with a wry smile, "to be honest with you, I'm afraid we'll have to discuss our plan again ... Because I'm afraid that the Clearwater flying boat can't withstand long – term space travel!"

Mu Sheng also nodded and said, "that's true. We didn't stay for long just now, but the Bluewater flying boat has been damaged in the extremely cold environment outside. You also know that many things in the ancient cultivation world have been lost. This flying boat refining method is one of them. We don't know how to repair it when it's damaged."

"It's only been a short time, but it's already damaged in several places." Liu Mansha added, "a one – way trip to the moon will take ten days to half a month. We all think that the Clearwater flying boat will not be able to last that long. Moreover, we still have to consider the problem of returning!"

Chapter 3219 The fragile blue water flying boat (2)

Chen Nanfeng waited for his two friends to finish before he said, "I remember fellow Daoist Xia also said that the environment in outer space is not only extremely cold, but also extremely hot. Under the alternation of cold and hot, I'm afraid it will be more difficult for the jadewater flying boat to withstand it."

Xia ruofei thought for a while and said, ""That is indeed the case. In addition to the extreme cold and heat, the universe is filled with all kinds of cosmic rays that are invisible to the naked eye, which can also damage the materials of the Flying Ship. If the materials used to build the Flying Ship are not strong enough, there is indeed a risk of collapse. "

In fact, only high – Level cultivators like Chen Nanfeng, Mu Sheng, and Liu Mansha would have been killed by the cosmic rays if they were ordinary people exposed to outer space like this. Or, they would have been frozen into popsicles or frozen mummies before they were killed by the cosmic rays.

"Looks like I'll have to change my plan!" Mu Sheng said with a sigh. Then, his eyes lit up and he said, "Just now, brother Chen said ... There's a Space Station in the sky that orbits around the Earth all year round, and there's always ordinary people living inside?"

Xia ruofei nodded. "To be precise, there's an International Space Station. Our country also has the Tiangong experiment module. Of course, it's smaller than the space station, but it's also designed for long – term stay."

Mu Sheng clapped his hands and said, "then isn't it settled?" If we steal the International Space Station, wouldn't it be great to take this Space Station to the moon?"

Liu Mansha's eyes lit up when she heard this. "Sect leader mu, that's a good idea! Since even ordinary people can survive in there, cultivators naturally have no problem!"

Even Chen Nanfeng couldn't help but show a hint of interest.

The Clearwater flying boat had only flown out for a short while, but it had already caused a certain degree of damage. Chen Nanfeng was very distressed. After all, no one had the ability to repair the flying boat now.

Moreover, at this rate of damage, the Clearwater flying boat would completely collapse before it could reach the moon. At that time, everyone would die in the vast space.

Therefore, it was necessary to find another way. Mu Sheng's suggestion provided another way of thinking.

Xia ruofei couldn't help but smile bitterly. He didn't know how to explain it to these "science – ignorant" people.

In the end, Xia ruofei tried his best to explain in layman terms, ""Three seniors, I'm afraid that's not realistic. Whether it's our country's Tiangong or the International Space Station, they can only fly around the Earth. They rely on the effect of gravity to orbit the earth, but if they want to fly to the moon, they must break free from Earth's gravity, which is something space stations don't have. "

The International Space Station naturally had a propulsion system, but it was prepared for orbital fine tuning when necessary. It wasn't enough to break away from Earth's gravity and fly to the moon.

Of course, Xia ruofei did not tell the three golden core seniors about the International impact.

If the International Space Station disappeared, it would probably cause global panic.

However, Xia ruofei felt that Chen Nanfeng and the others would not care much about it.

After hearing Xia ruofei's words, Chen Nanfeng asked in disappointment, ""Fellow Daoist Xia, is this method really not going to work?"

"It definitely won't work!" Xia ruofei said with certainty.

"Then what should we do?" Mu Sheng said, "since the methods of the cultivation world are useless, we can only rely on the technology of ordinary people!"

"That's right!" Chen Nanfeng nodded. I remember fellow Daoist Xia saying that the Americans landed on the moon 50 to 60 years ago. We'll go to the United States let them send our people to the moon!"

Xia ruofei smiled bitterly. "Three seniors, I'm afraid the United States doesn't have any ready-made rockets and spaceships ... Those were the products of the struggle between the United States and the Soviet Union decades ago. At that time, the Apollo program cost a lot of money. In fact, as of now, landing on the moon is more symbolic than practical. Therefore, for the past few decades, the United States has not launched any moon landing programs. In other words, even if the Americans want to return to the Moon, they don't have any ready-made equipment. They have to build it from scratch. This is a systematic project, and I'm afraid it won't be completed in a year or two."

"This can't do, that can't do ..." Mu Sheng frowned and said, "are we just going to watch the moon above us and know that there may be a top-tier treasure land and secret realm, but we can't go there at all?"

Xia ruofei smiled. "Seniors, please calm down ... Actually, I have an airboat too. I think we can try to see if my airboat can withstand the outer space environment before we make any plans."

Mu Sheng was not in high spirits. He said, "little brother Xia, brother Chen has already tried his Clearwater flying boat. I'm afraid it's meaningless to try your flying boat again!" "You'll even damage your flying ship for no reason, isn't that not worth it?"

Liu Mansha's thoughts were similar to Mu Sheng's, so she also nodded and echoed, ""I think it's more appropriate to think of other ways."

However, Chen Nanfeng's heart moved and he said, ""I think ... There's no harm in trying!"

Mu Sheng was a little anxious when he heard this. He said, ""Brother Chen, you've just experienced it yourself. You know how bad the environment outside is. The jadewater flying boat was damaged in such a short time. It's a bit inappropriate for you to ask brother Xia to take the risk with the treasure!"

In the current cultivation world, flying ships were considered extremely precious treasures.

Although flying boats couldn't assist in cultivation or help people fight back, flying magical treasures were very rare. Compared to riding a flying sword, it was much more comfortable. In the current situation where the highest cultivation level in the cultivation world was not even at the Yuanying stage, the flying boat was still a divine tool for escape. The speed of most cultivators' flying sword was not as fast as the flying boat.

Mu Sheng had always been fond of Xia ruofei, so his words were also quite protective of Xia ruofei. Even when he was facing Chen Nanfeng, the top master in the cultivation world, he did not speak with false courtesy.

Of course, this was also because Mu Sheng and Chen Nanfeng had a good personal relationship. The two would not fall out over such a small matter.

Xia ruofei looked at Mu Sheng gratefully and then smiled. "Thank you for your kind intentions, sect leader mu. However, I'm still very confident in my Black Blaze flying ship. Besides ... We'll only know if it works after we try!"

Chen Nanfeng looked at Mu Sheng with a smile and said, "Brother mu, did you hear that? Fellow Daoist Xia is very confident! Also ... Do you think that I'm the kind of person who would harm others without benefiting myself? Since fellow Daoist Xia proposed this plan, I believe he must have his own reasons. Shouldn't we show our support?"

Actually, what Chen Nanfeng said wasn't important.

He didn't say the most important reason.

He had once sent someone to investigate Xia ruofei in secret and knew that Xia ruofei's Black flying boat was extremely fast. At least in terms of performance, it was much better than the Clearwater flying boat.

Therefore, Chen Nanfeng was also looking forward to seeing if Xia ruofei's airboat could withstand the harsh environment in outer space if the Clearwater airboat could not do the job.

Regardless of whether it worked or not, Chen Nanfeng at least knew that Xia ruofei's Black Swift Boat would not be as fragile as the Clearwater Swift Boat.

Moreover, everyone was experienced this time and would not be caught off guard. Even the black flying boat could not withstand such an extreme environment. Chen Nanfeng felt that he could at least ensure that Xia ruofei's Black flying boat would not be damaged as badly as the Clearwater flying boat.

Mu Sheng said helplessly, "since you've said so, what else can I say?" Let's try it!"

Xia ruofei smiled and said, "in that case, let's go now!" Strike while the iron is hot!"

Chapter 3220 Powerful defense (1)

Chen Nanfeng and the other two had returned in a hurry, mainly because the Clearwater flying boat had been damaged. In fact, the three of them could still hold on.

Furthermore, cultivators had very strong recovery abilities, so they were already at full health.

Since Xia ruofei had suggested to test the black Phoenix flying ship, they naturally had no objections and nodded in agreement.

Chen Nanfeng even called Chen Xuan over.

Xia ruofei immediately released the black Phoenix flying ship from the courtyard and let it float above the central courtyard.

Fortunately, the Flying Ship had an invisibility effect on ordinary people. Otherwise, with such a huge flying ship quietly floating above their heads, the huge sense of oppression brought by the black hull

with a trace of modern technology beauty would definitely make people think of keywords such as an alien civilization invasion.

Xia ruofei and the other five people jumped onto the flying boat.

Xia ruofei was not in a hurry to increase the altitude of the flying boat. Instead, he took Chen Nanfeng and the others around the flying boat.

Mu Sheng clicked his tongue and praised, "little brother Xia, your flying boat looks much bigger than brother Chen 's!" And this black material looks extremely sturdy!"

Chen Nanfeng couldn't help but roll his eyes. Could refining materials be measured by 'hardness'? Gold was also very soft! Was he worse than a hard rock?

Liu Mansha touched the side of the ship and said, "Fellow Daoist Xia, what is your flying boat made of? Why do I feel like ... It looks like obsidian Crystal?"

"Impossible! Obsidian Crystal is such a precious material. " Mu Sheng shouted, "a fist – sized Obsidian Crystal can be sold for a sky – High price. How many obsidian crystals will be used to build such a large flying ship? Even with the power of the sect, it's impossible to take it out!"

Chen Nanfeng said, "brother mu, you've made a mistake!" I'm sure that this flying ship definitely used Obsidian Crystal, and it's very likely to be the main material!"

"Really?" Mu Sheng couldn't believe it and looked at Xia ruofei questioningly.

Xia ruofei nodded helplessly and said, ""Master did mention it before. He said that this flying ship is made from precious Obsidian Crystal, so it's called the Obsidian flying ship!"

Even though they had already guessed the answer, Chen Nanfeng and the other two still gasped in unison. Such a large flying ship made entirely of Obsidian Crystal was quite a visual impact.

Moreover, when they heard Xia ruofei mention "master" again, they had a feeling that they were right.

Obviously, no matter how much of a genius Xia ruofei was, he couldn't be like the Doraemon, who had one treasure after another. For example, this Black Phoenix flying ship must have been given to Xia ruofei by his mysterious and powerful master.

Of course, Chen Nanfeng and the others didn't have any other thoughts.

First of all, they were allies now, and they would soon cooperate to explore the moon.

Besides, since Xia ruofei's master had given the black Phoenix flying ship to him and he had taken it out in front of everyone, it meant that he definitely had a way to keep it.

Otherwise, an ordinary man would be guilty of treasuring a treasure. If an ordinary cultivator owned such a flying ship, it was very likely that he would bring death upon himself.

Of course, this was also because the temptation was not big enough.

After all, flying boats were mainly used as a flying tool, and their scope of application was relatively narrow.

If it was a treasure land like the peach source Island ...

Perhaps even Chen Nanfeng would find it hard to resist such a huge temptation.

Xia ruofei showed everyone around. Chen Nanfeng secretly felt that the black Phoenix flying ship was much better than the Clearwater flying ship. However, he did not know how strong the black Phoenix flying ship's defense was or whether it could adapt to outer space.

Chen Nanfeng thought to himself, 'this flying ship is made of extremely precious Obsidian Crystal, and its defensive power is extremely high. I'm sure this flying ship is not bad!'

Everyone arrived at the control room.

Looking at the control console that was much simpler than the Clearwater flying boat, Chen Nanfeng asked with a smile, "Fellow Daoist Xia, what fuel does your flying boat use?"

Xia ruofei chuckled and said, "spiritual stones or spiritual crystals are fine. As long as you can provide it with energy, it can fly." The higher the purity of the energy, the faster the flying speed. So, I'm going to give it some high – purity fuel today!"

With that, Xia ruofei flipped his hand and took out a crystal that was emitting a strong energy aura from the spirit map space.

"Origin crystals!" Chen Nanfeng and the others couldn't help but be surprised.

"Hahaha! Little brother Xia, you're really generous!" Mu Sheng said with a smile.

Origin crystals could directly provide rich vital energy and were the first choice of resources for Aurous core stage cultivators to assist in their cultivation. However, origin crystals were also extremely precious, especially when the resources in the modern cultivation world were increasingly scarce. Even golden core cultivators were reluctant to use origin crystals in their daily cultivation.

Xia ruofei smiled. "Resources are meant to be used. These aren't gemstones. Do you think they have any value?"

Chen Nanfeng and the others couldn't help but laugh.

But at the same time, they also had a deeper judgment: No wonder Xia ruofei was able to reach the Golden core stage at such a young age. He must have been given the best resources since he was young. He probably didn't know what it felt like to be short of cultivation resources! He was definitely a winner in life born with a golden spoon!
